Preface

This publication lists the published articles by the staff of the Environmental Protection Agency's Environmental Research Center, Research Triangle Park, North Carolina. EPA conducts its research program through the Office of Research and Development which, in turn maintains 15 research Laboratories throughout the United States. Four of these Laboratories comprise the Environmental Research Center - Research Triangle Park, North Carolina:

- Health Effects Research Laboratory
- Environmental Sciences Research Laboratory
- Environmental Monitoring and Support Laboratory
- Industrial Environmental Research Laboratory

This Bibliography is inclusive for the period January 1971 through September 1975, although some citations predating EPA's creation (December 1970) are included. The Bibliography consists of 3 sections:

KWIC Index	(Key Word-In-Context) - Alphabetical listing of titles by principal (Key) words in the title.
Author Index	Alphabetical listing of titles by author.
Publication Citations	Listing of complete citations by citation code number.

Each title in the KWIC and Author Indices contains an individual citation code number (e.g., EMS7100002). These numbers are listed alphabetically and numerically in the Publication Citations section along with the complete citation. Code numbers followed by an asterisk (e.g., IER7200005*) indicate special ordering information (see below). In the Author Index code numbers followed by a + (e.g., EMS71000023+) indicate that the author is the primary author for that citation. The two digits following the three letters indicate the year of publication, (e.g., EMS<u>71</u>00002+).

The letter portion of the code number refers to the Laboratory in which the article originated. These letter designations and their respective Laboratories are:

HEE HEP HER HES	Health Effects Research Laboratory Environmental Protection Agency Research Triangle Park, N. C. 27711

EMS	Environmental Monitoring and Support Laboratory Environmental Protection Agency Research Triangle Park, N. C. 27711
ESM ESR	Environmental Sciences Research Laboratory Environmental Protection Agency Research Triangle Park, N. C. 27711
IER	Industrial Environmental Monitoring Laboratory Environmental Protection Agency Research Triangle Park, N. C. 27711

ORDERING INFORMATION - Copies of articles published in the open literature may be obtained from local libraries, publishers and authors. Requests for citations containing the term NTIS should be addressed to:

National Technical Information Service
U. S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161 (703) 321-8543

NTIS sells paper copies at various prices and microfiche at $2.25. If payment does not accompany order, NTIS will charge an additional $5.00 per order. Requests for citations containing the term GPO should be addressed to:

Superintendent of Documents
U.S. Government Printing Office
Washington, D. C. 20402 (202) 541-3497

GPO sells paper copies at various prices; GPO does not sell microfiche. Payment must accompany all orders to GPO.

Requests to authors (for those citations codes containing an *) will be honored as long as supply lasts. Such requests should be addressed to the author in care of his Laboratory. In most cases requests for reports in the open literature will be better filled by the sources suggested above.

Comments on this Bibliography, its usefulness and format are welcome.

16. ABSTRACT

Listing of the published articles by the staff of the four Laboratories comprising EPA's Environmental Research Center, Research Triangle Park, North Carolina. These are the

- Health Effects Research Laboratory
- Environmental Sciences Research Laboratory
- Environmental Monitoring and Support Laboratory
- Industrial Environmental Research Laboratory

The Bibliography is inclusive for the period January 1971 - September 1975, although some citations predating EPA's creation (December 1971) are included. The Bibliography consists of a Key Word-In-Context Index, an Author Index, and a Publication Citations section.
