INTRODUCTION

The Pesticide Data Submitters List is a compilation of names and addresses of registrants who wish to be notified and offered compensation for use of their data. It was developed to assist pesticide applicants in fulfilling their obligation as required by sections 3(c)(1)(f) and 3(c)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and 40 CFR Part 152 sub part E regarding ownership of data used to support registration.

ELECTRONIC ACCESS

INTERNET

The Pesticide Data Submitters List is available on EPA's World Wide Web site at the following URL address:

http://www.epa.gov/opppmsd1/DataSubmittersList

HOW TO USE THE PESTICIDE DATA SUBMITTERS LIST

The listing consists of two files: DSLMAIN.TXT is a sequential list of data submitters sorted by chemical code number. DSLCHEM.TXT is an index to the chemical code numbers arranged alphabetically by chemical name.

Since many chemical names are too long to be handled easily, the Agency has assigned a chemical code number for every active chemical ingredient. This six-digit number (including zeroes) appears under the heading "code number" to the left of the chemical name in file DSLCHEM.TXT. The user should determine the code for a particular chemical from this list and then look in the DSLMAIN.TXT file for that particular chemical code.

DSLMAIN.TXT is a sequential list by chemical code of all companies who have submitted data concerning that particular chemical since December 31, 1969. If a chemical does not appear on the sequential list, it is an indication that (a) no data have been submitted for that active ingredient since December 31, 1969, or (b) data submitters have asked to have their names withdrawn from the listing so that no correspondence regarding compensation would be sent to them, or (c) a Registration Standard or Reregistration Eligibility Document (RED) has been published identifying data submitters has been issued for that chemical.

Although not included on the sequential list of chemicals, chemicals for Registration Standards or Reregistration Eligibility Documents (REDs) have been issued are incorporated by reference on the Data Submitters List. For these chemicals, applicants should refer to the Registration Standards or RED's themselves to determine the persons to whom compensation offers must be made. At the present time, Registration Standards and Reregistration Eligibility Documents have been issued for the chemicals listed below.

REGISTRATION STANDARDS

Chemical	NTIS Stock Number
Acephate	PB88-131362
ADBAC (Hyamine 3500)	PB86-169406, PB87-138749
Alachlor	PB86-179835
Aldicarb	PB84-207653
Aldrin	PB87-183778

Copies of Registration Standards and Reregistration Eligibility Documents (RED's) are available through the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Va 22161. When ordering, please provide the NTIS stock number indicated above.

Copies of Reregistration Eligibility Documents (RED's) are also available on EPA's World Wide Web site at the following URL address:

http://www.epa.gov/oppsrrd1/REDs

In the DSLMAIN.TXT file, the type of data is indicated by 'XX' under one of the following codes: EU, AT, EC, FW, EF, or OT. The codes indicate the types of data involved. An explanation of these codes follows:

EU indicates exclusive Use - Where new chemical (new active ingredients) have been registered since September 30, 1978, the listing designates the applicable data as "exclusive use data" in accordance with section 3(c)(1)(D)(i) of FIFRA. The requestor must write directly to the submitter listed for written permission to use the data.

AT indicates that the applicant has submitted acute toxicity data where the substance tested was a formulated end-use product rather than a technical grade or manufacturing-use product (including acute oral, dermal, inhalation, primary eye and dermal sensitization).

EC indicates that the data submitter has submitted environmental chemistry field studies where the substance tested was required to be the formulated end-use product rather than a technical grade of manufacturing-use product.

EF indicates that the data submitter has submitted efficacy data.

FW indicates that the data submitter has submitted fish and wildlife field studies, where the substance tested was required to be a formulated end-use product rather than a technical grade or manufacturing-use product.

OT indicates that the data submitter has submitted other data, which may be product or residue chemistry, subacute and chronic toxicity data, acute toxicity data using a technical or manufacturing-use product, and/or other fish and wildlife and environmental chemistry studies than set forth above.

CORRECTION OF LIST

If users find an error or omission in the updated list, they should notify the Agency in writing of the error and what corrections are necessary. Please address such corrections to:

13. ABSTRACT (Maximum 200 words)

The Pesticide Data Submitters List is a compilation of names and addresses of registrants who wish to be notified and cffered compensation for use of their data. It was developed to assist pesticide applicants in fulfilling their obligation ad required by sections 3(c)(1)(f) and 3(c)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and 40 CFR Part 152 sub part E regarding ownership of data used to support registration.

14. SUBJECT TERMS Pesticides; Regulation; Pesticide Data Submitters	15. NUMBER OF PAGES 877
	16. PRICE CODE
