Introduction

The purpose of the *Core List of Environmental References* is to identify key books, reports, and documents for research in the areas of environmental protection, management, and science. The *Core List* was developed by the Environmental Protection Agency's Library Network for EPA librarians and information professionals, State environmental librarians, and other individuals involved in building or managing collections of environmental information resources.

Developing the Core List

The *Core List was* compiled under the direction of Jonda Byrd, Library Network Program Manager, by Mary Hoffman (contractor), Library Network Coordinator, with the assistance and support of the EPA Library Network. The titles included on the list are those used most frequently by librarians and their staffs working in Environmental Protection Agency libraries in support of the Agency's mission. The books and documents contain information about conservation, pollution, environmental law, atmospheric trends, water quality, alternative and renewable energy, waste management, public policy, endangered species, and many other environmental issues too numerous to mention.

All of the books and documents included in this core list were in print at the time the list was compiled. In fact, a number of titles were omitted from the list because they were not readily available when the list was compiled. Most of the titles on the list were published between 1985 and 1993, and some of them were published serially.

Using the Core List

The *Core List* is divided into seventeen sections. Most relate to environmental topics such as "air" or "toxic waste." A few sections are composed of specific types of documents such as directories and encyclopedias. At the beginning of the *Core List* there is a brief list of background documents that may be found in non-environmental collections, but which are useful for researching regulatory or legislative environmental information, and a table of the acronyms used throughout the *List*. At the end of the *Core List* you will find a list of companies that publish or distribute environmental information sources, and an index.

Entries are arranged alphabetically within each section. Each entry includes the title, author or editor, publication date, publisher or distributor, and ordering information, if it was available at the time the list was compiled. The prices listed are the published price estimates for the items at the time the list was compiled. We recommend that all prices be verified with the publisher or distributor.

The entries marked with asterisks (* or * *) are the recommended and highly recommended titles. The entries marked with one asterisk (*) were recommended by two of the EPA librarians; those with two asterisks (* *) were recommended for the list by more than two of the librarians.

Updating the *Core List*

The EPA Library Network plans to update the *Core List* periodically, expanding it to include annotations for the entries, and additional sections for items that can be categorized under topics such as "Health Effects," "International Sources," and " Chemical Properties." Currently the list includes selected entries that would fall into these categories, but there were not enough of these titles to warrant the inclusion of separate sections at the time of compilation.

The Network also plans to identify key journals, CD-ROMs, and other key environmental information sources for future editions of the *Core List*, or for supplementary volumes.

For More Information

If you would like additional information about the EPA Library Network, contact Jonda Byrd, Library Network Program Manager, U.S. Environmental Protection Agency, M.S. 291, 26 W. Martin Luther King Drive, Cincinnati, OH 45268; (513) 569-7183; Email - Byrd.Jonda.

Background Documents

Following is a list of major publications of a more general nature that are key to research in the area of environmental study. The titles are listed here, rather than in the list of recommended titles.

Code of Federal Regulations - codifies final regulations having general applicability and legal effect that have previously appeared in the *Federal Register*. These titles are especially relevant to the Environmental Protection Agency:

Title 40 - Protection of the Environment.

Title 42 - Public Health.

Title 33 - Navigation & Navigable Waters.

Title 21 - Food and Drugs.

Title 49 - Transportation.

Title 29 - Labor.

Title 50 - Wildlife and Fisheries.

The following **Code of Federal Regulations** titles also contain sections relevant to environmental research:

Title 7 - Agriculture.

Title 10 - Energy.

Title 14 - Aeronautics & Space.

Title 25 - Indians.

Title 36 - Parks, Forests, and Public Property.

Title 46 - Shipping.

Title 48 - Federal Acquisitions.

Congressional Information Service Index & Abstracts - contains indexes and abstracts to the working papers of the U.S. Congress, including hearings, reports, committee prints, and other congressional papers.

Congressional Record - contains an edited transcript of all activities that take place on the floor of the House and Senate in the U.S. Congress.

Federal Register - includes proposed and final Rules written by Federal regulatory agencies, and notices of public hearings on the rules; presidential proclamations and executive orders; and decisions of fact-finding bodies.

Federal Regulatory Directory - contains comprehensive profiles of 13 of the largest Federal regulatory agencies, including the Environmental Protection Agency. Each profile includes information on the agency's history, powers and authority; personnel by function; relevant Congressional committees and legislation; and information sources within the agency.

Standard Industrial Classification Manual - covers the entire field of economic activities and defines industries in accordance with the composition and structure of the economy. The Standard Industrial Classification (SIC) is the statistical classification standard

underlying all establishment-based Federal economic statistics classified by industry.

U.S. Code Congressional and Administrative News - contains the full text of public laws, legislative histories, executive orders, presidential proclamations, administrative regulations, messages from the president, and popular names of laws.

U.S. Government Manual - contains data about each government agency and its subdivisions. The names of officials, history of the creation of agencies and their functions, and addresses and phone numbers of field officers are included.
