Water Resources Abstracts

Learn how to quickly locate abstracts for articles on water resources by attending a CD-ROM orientation on April 20, 2-3pm. Produced by the U.S. Geological Survey, the database covers water resource economics, ground water and surface water hydrology, metropolitan water resources planning and management, and water related aspects of nuclear radiation and safety, from 1967 to the present. Call the Water Librarian, Anne Bolin (contractor), at (202)260-8670 to sign up for the session.

Newsletters of interest to EPA Office of Water staff

Printed on Recycled Paper

Office of Water staff members receive newsletters from conservation groups, government agencies, and professional associations everyday. Newsletters represent already existing networks -- and provide effective way to get EPA's message out. In bringing together information on water-related newsletters, this directory also aims to prevent duplication of effort in creating new newsletters.

This directory provides subscription and content information for many of these titles. Sample issues of newsletters are available in the Headquarters Library, and the library subscribes to all newsletters which are distributed free of charge.

This directory will be updated semi-annually, and staff are encouraged to submit names of newsletters not included here to the compiler, Ann Walsh, Water Librarian (contractor).

Copies of this directory are available from:
