Chicago, IL 60604-3590

Data in this publication are current as of February 1984

Foreword

The EPA Chemical Activity Status Report (EPACASR) is a guide to Agency activities relating to chemical substances. It is easily accessed by chemical via Chemical Abstract Service [CAS] Registry Number. The activities listed in this fourth edition, EPACASR-4, are not limited to chemical regulatory activities. Developed with the assistance of a number of Agency programs, the report includes such entries as technical assistance information, preregulatory assessments, chemical and bio- logical testing, and monitoring programs, both completed and in progress. Because this document describes work in progress, listed activities are in various stages of completion, and have not necessarily completed any Agency peer review. The principal purpose of this information is to alert EPA users to other completed or ongoing work in order to avoid duplication of effort.

This publication supersedes EPACASR-Third Edition. EPACASR-4 is current to February 1984. Also, the data in EPACASR-4 now exist in an interactive database, and can be accessed for either specific chemicals or specific types of activities. The broad base of the EPACASR-4 publication, together with this interactive computer capability, make it a useful tool for assessing the EPA-wide status of chemicals. Given a list of chemicals, EPACASR-4 can be used to quickly determine which EPA programs regulate a chemical, are considering regulating the chemical and/or are assessing the chemical, and what scientific/technical work has been done with regard to the chemical.

We hope you find EPACASR-4 valuable. We will endeavor to handle your requests for use of the EPACASR-4 database; please direct them to the Chemical Information and Analysis Group (202) 382-3375 together with any additions or corrections.

Walter W. Kovalick, Jr.
Director
Chemical Policy and Coordination Staff
Office of Toxic Substances

U.S. Environmental Protection Agency

Introduction

The following compilation of EPA's chemical-related activities is as complete as we can make it; however, there may be omissions or inaccuracies. In an effort to maintain a current database, and to perfect future editions, we would appreciate having comments and any corrections or additions you may have.

The following pages contain suggestions for users. In brief, this report is organized into three sections.

1. Alphabetized Chemical Name Reference Listing (an index of names used for chemicals included in the text).

2. Chemical Name Synonym List (showing all synonyms for chemicals in the text, and arranged by CAS Registry Number).

3. EPA Chemical Activities Report (arranged sequentially by CAS Registry Number).

Sections 1 and 2 are in Volume I, Section 3 is in Volume II.

Comments, updates, and suggestions should be addressed to:

E. T. Merrick
Chemical Policy and Coordination Staff
Office of Toxic Substances (TS-777)
U.S. Environmental Protection Agency
Washington, DC 20460
Phone: (202) 382-3414

Suggestions for Users

The decision to organize EPA Chemical Activities by CAS Registry Number (CAS number) is in accordance with a policy adopted by EPA that CAS Numbers and CAS Preferred Names be used to standardize chemical nomenclature.

We recognize that many people who will be using this report are not accustomed to using CAS numbers. For this reason, we are placing the index (Part I, Alphabetized Chemical Name Reference Listing) at the beginning.*

Because people interested in chemicals often want to know what other names are applied to a chemical of interest, we have included a listing of synonyms (Part III, Chemical Name Synonym List).

Chemical categories, and chemicals not registered by Chemical Abstracts Service, are assigned a Sequence number (SEQ number) arbitrarily. Synonyms or related names are indexed in the Alphabetized Chemical Name Reference Listing, and are given sequentially at the beginning of the Chemical Name Synonym List. The Sequence numbers are the first listings in the EPA Chemical Activity Status Report.

After obtaining the CAS or SEQ number for the chemical of interest, the user should then turn to Part II (EPA Chemical Activity Report) to ascertain what EPA activity relates to that chemical. In a number of instances, there will be only one entry; in others, as many as eight.

Part I and III comprise Volume 1; part II is Volume 2.

The text should be largely self explanatory. The items in each chemical report indicate: Authority, Activity, Status, Reason, and Contact. A few items will require some clarifications.

First, statutory authorities and sponsoring organizations are abbreviated. The following listings give those abbreviations:

*The sequence of chemical names that appear in the Alphabetized Chemical Name Reference Listing was produced by computer program. The program ignores all single characters for alphabetizing purposes. Numbers and letters (Roman and Greek) are not considered when they stand alone; i.e., if they are separated from the main body of the chemical name by a comma, dash, or space. A few simple examples will illustrate this: t-butyl alcohol is alphabetized under b, while tert-butyl alcohol would be alphabetized under t; 4-dichlorobenzene and p-dichloro- benzene are alphabetized under d, while para-dichlorobenzene would be alphabetized under p; alpha-lindane would be alphabetized under a.

Statutes:

AEA	Atomic Energy Act
CAA	Clean Air Act
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act
CWA	Clean Water Act (Federal Water Pollution Control Act)
ERDA	Energy Research and Development Act
FIFRA	Federal Insecticide, Fungicide, and Rodenticide Act
RCRA	Resource Conservation and Recovery Act
SDWA	Safe Drinking Water Act
TSCA	Toxic Substances Control Act

Three abbreviations appearing in the index may not be familiar to some users. These are:

VAN	Valid Ambiguous Name
8CI	Eighth Collective Index Preferred Name
9CI	Ninth Collective Index Preferred Name

Contacts:

Assistant Administrator's Office (giving as heading, although not used in text)	"OD"	Will usually be Office Directors; in Research and Development, will be the Assistant Administrator, except in the Office of Health and Environmental Assessment (OHEA).
	"DIV"	Will usually be a Division; in Research and Development, will be a location indicator except for the groups within OHEA, which will be so identified.

Notes on Entries:

Under "Activity," "regulation" can appear as "in development," "proposed" or "promulgated" in the "Status" category.

Under "Activity," "preregulatory" or other assessment refers to a study that will produce some or all of the data to support a regulation or a regulatory decision. Such an assessment will not necessarily result in a regulation. These will have "Status" entries of "in development" or "completed."

The "Activity" designated as "technical assistance data" includes the Oil and Hazardous Materials Technical Assistance Data System and other files giving chemical characterization and hazard data, as well as guidance for handling chemical accidents and problem chemicals. All of these entries have "completed" "Status."

The "Activity" identified as RPAR/or ANPR will also appear as having "completed" "Status." This means that RPAR or advance notice of proposed rulemaking was issued, and, usually, not that a final decision has been made.

The additional "Activity" items are self-explanatory. "Risk assessment" may be somewhat arbitrary, as the outcome of such an effort may not be a full-scale assessment of risk, but only a documentation of one aspect of risk or hazard.

"Status" entries are largely explained above. A few activities are described as being "in litigation" (when an action is being challenged in court), and "deferred" (in this case, giving a date and reason).

"Reasons" include "known/suspect carcinogen/oncogen"; "general health effects" (including knowledge or suspicion of mutagenicity, teratogenicity, and/or chronic effects), "general environmental effects," "high volume production" (as determined by the organization responsible for the activity) and "Congressional mandate" (especially when a statute includes a specific mandate to address a chemical). The "Reason" entries: "member of class of concern," "surrogate for," "metabolite of," "similarity to" and "contamination with" will identify the CAS number of the appropriate chemical or the SEQ number of an unregistered class that appears in the publication. If the class or chemical is not a part of this report, it will be identified by a name.

"Contact" usually refers to a specific individual, especially if the "Activity" is "in progress." Some "completed" activities will cite "report" as the contact, especially when the project manager is no longer with the Agency. The report number will be given under the "Status" entry, and

the report or purchase information can be obtained from the sponsoring office. A report listed by its PB number can be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA, 22161.

Sources of Data included in the Text:

Clean Air Act

Criteria Pollutants designated under Sec. 109 of the Act (40 CFR 50).

Chemicals addressed under New Source Performance Standards (Sec. 111) (40 CFR 60).

National Emission Standards for Hazardous Air Pollutants (Sec. 112) (40 CFR 61).

Assessments in Progress, obtained from the Office of the Director, Air Quality Planning and Standards.

Clean Water Act

Hazardous Spill Regulations. Promulgated or proposed under Sec. 311 of the Act, and obtained from the F.R. Notices. (These will ultimately be superseded by regulations under CERCLA).

Toxic Pollutant Effluent Standards proposed and promulgated under Sec. 307(a) of the Act, and obtained from 40 CFR 129, and the Criteria and Standards Division.

Water Quality Criteria published under Sec. 304 of the Act. Obtained from the F.R. Notice of November 28, 1980.

NOTE: Effluent Guidelines, published under Section 306(b), were not included because they are generally not chemical-specific; however, controlling certain traditional parameters will afford an unspecified degree of reduction in certain toxic chemicals.

Federal Insecticide, Fungicide, and Rodenticide Act

Major cancellations and suspensions, obtained from a report prepared by the Pesticide Enforcement Branch. This includes partial as well as total cancellation (e.g., the most hazardous uses may be cancelled, and other uses permitted with or without restrictions).

RPAR's issued under the registration authorities of Sec. 6. Rebuttable Presumption Against Registration (RPAR) is the normal first step toward cancelling or modifying pesticide registrations, although RPAR may not always result in such action. Some final actions may be cited as RPAR.

Preregulatory assessments address those substances being considered for RPAR.

Restricted use pesticides are those that must be applied only by certified applicators.

Pesticides for which Registration Standards have been published or are being prepared have been obtained from OPP, as have the chemicals subject to data call-in. Data call-ins are designed to fill major data gaps. The Registration Standards are identified as "Reg Std - (common pesticide name)"; data call-ins are identified as "DCI - (common pesticide name)."

Pesticide tolerances are cited, as are those chemicals for which farmworker reentry standards have been promulgated.

NOTE: Pesticide common names are incorporated into most entries, to make them more readily understandable to users.

Resource Conservation and Recovery Act

Chemicals designated as hazardous under Sec. 3001, obtained from the F.R. Notice of May 19, 1980 and subsequent amending notices. (40 CFR 261.24, .33)

Chemicals designated as hazardous constituents of waste are not at this time included, except as they are listed above.

Safe Drinking Water Act

Interim Primary Drinking Water Regulations promulgated under 40 CFR 141.

Interim Secondary Drinking Water Regulations, obtained from the F.R. Notice of March 31, 1977.

Chemicals for which ODW has issued technical advisories or is developing same, and those for which primary regulations are in development.

Toxic Substances Control Act

Testing recommendations by the Inter-Agency Testing Committee (ITC), under Sec. 4(e) authority (F.R. Notices). Test rules in development or disposed of are also listed.

Chemicals regulated under Sec. 6, and proposed for, or subject to reporting rules under Sec. 8(a). Also, chemicals proposed for gathering of information about health and safety studies under the authority of Sec. 8(d). The contacts listed with the various Sec. 8 rules are the intended users of the submitted data.

Submissions received by the Office of Toxic Substances pursuant to Sec. 8(e), the "substantial risk" information reporting provision of the Toxic Substances Control Act. Briefly, Sec. 8(e) requires chemical manufacturers, processors, and distributors to immediately report to EPA any new (e.g., unpublished) information that provides *reasonable support* for a conclusion that a chemical substance or mixture presents a substantial risk of injury to health or the environment. Considering that a large number of Sec. 8(e) submissions are based on preliminary findings, the mere fact that chemical toxicity and/or exposure information has been submitted to EPA pursuant to Sec. 8(e) should *not* be viewed as being *conclusive* evidence of the existence of risk. Additional information with regard to Sec. 8(e) reporting can be found in EPA's March 16, 1978 "Statement of Interpretation and Enforcement Policy; Notification of Substantial Risk" (43 FR 11110).

Submissions received by the Office of Toxic Substances on a "For Your Information" or FYI basis. Although FYI submissions often contain the same types of chemical toxicity and/or exposure information as TSCA Sec. 8(e) notices (see above), FYI submissions are sent to EPA on a voluntary basis and not in response to a mandatory reporting provision of TSCA. The FYI submissions that have been received by EPA have come from chemical manufacturers, processors, and distributors; trade associations; labor organizations; Federal and State agencies; academia; public interest and environmental protection interest groups; and the general public.

CHIPs, Chemical Hazard Information Profiles, are chemical reviews prepared by the Chemical Screening Branch/Existing Chemical Assessment Division. The purpose of the CHIP is to briefly characterize the chemical in question and to assess the adequacy of readily available risk-related

information for the purpose of deciding whether a larger-scale, more resource-intensive assessment is warranted. The CHIP is used to focus further activity on specific aspects of the chemical that appear to be a problem. It is typically a 15- to 20-page narrative report which describes the health and environmental effects and exposure potential associated with the subject chemical. Completed CHIPs may be obtained from the TSCA Assistance Office (800-424-9065, or in Washington (202)-554-1404).

Comprehensive Environmental Response, Compensation, and Liability Act.

OHM-TADS (Oil and Hazardous Materials Technical Assistance Data System), obtained from the Emergency Response Division, and maintained under joint authority of Section 311 of the Clean Water Act and CERCLA. Used to support Environmental Emergency Response programs.

Chemicals for which regulations under Sec. 101(14), are required to be set, obtained from the Emergency Response Division's listing of chemicals from mandated sources.

Other

OHEA reviews to support assessment under the foregoing statutes. Listing supplied by OHEA.

Completed ORD projects were retained from EPACASR-2.

Ongoing ORD activities are included to the extent we have been able to obtain them. The catalog is now complete. These will continue to be entered into EPACASR as circumstances permit.

Final ORD reports may still be available. Inquiries should be directed to the Publications Staff at (513) 684-7562. If they cannot provide copies, they will provide information on purchase source and price.

CONTACT: SW/HIW/ALAN CORSON

CAS NO: 96-48-0
NAME: 2(3H)-Furanone, dihydro- (8CI)(9CI)

AUTHORITY: TSCA
ACTIVITY: TEST METHOD DEVELOPMENT/VALIDA
STATUS: COMPLETED/PUBLISHED; 09/83; PB 83-225078
REASON: KNOWN/SUSPECT CARCINOGEN/ONCOGEN
OTHER; PLANT SEEDS
MUTAGENICITY
IN VITRO SYSTEM
CONTACT: RD/HERR/SHAHBEG S. SANDHER

CAS NO: 96-76-4
NAME: Phenol, 2,4-bis(1,1-dimethylethyl)- (9CI)

AUTHORITY: CWA
ACTIVITY: MONITORING/LEVELS MEASUREMENT
STATUS: COMPLETED/PUBLISHED; 03/79
REASON: OTHER; COMPUTER DATABASE
PROGRAM SUPPORT; OWRS & REGIONS; ORD
CONTACT: WRS/MDS/USER SUPPORT

CAS NO: 97-02-9
NAME: Benzenamine, 2,4-dinitro- (9CI)

AUTHORITY: TSCA/8D
ACTIVITY: REGULATION
STATUS: PROMULGATED; 09/02/82; 40CFR716
REASON: GENERAL HEALTH EFFECTS
OTHER; TEST RESULTS; THREE YEARS
REPORTING REQUIREMENT
LACK OF DATA
CONTACT: TS/ECA/GARY TIMM

AUTHORITY: TSCA/4B
ACTIVITY: TESTING RULE
STATUS: IN DEVELOPMENT/PROGRESS; FY 1984
REASON: KNOWN/SUSPECT CARCINOGEN/ONCOGEN
