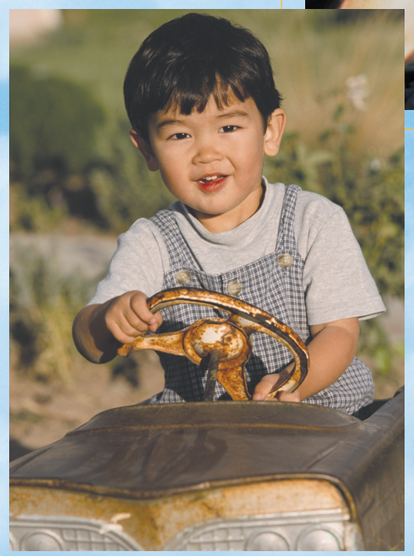
# Get On Board!

## Give your vehicle a clean bill of health.



**Many states are incorporating on-board diagnostic (OBD) checks for 1996 and newer cars and trucks into operating inspection and maintenance (I/M) programs. Performing OBD checks:**

- Is fast, effective, and convenient.
- Requires only a quick computer scan.
- Helps pinpoint problems accurately.
- Improves customer satisfaction.

**You can help educate vehicle owners about OBD and the Check Engine light. Tell your customers that responding to the Check Engine light helps them:**

- Save money through preventive maintenance.
- Utilize warranty coverage in some circumstances.
- Maximize their car or truck's fuel economy.
- Protect the environment.
