DISCLAIMER

This report has been reviewed by the Office of Air Quality Planning and Standards, U. S. Environmental Protection Agency, and approved for publication as received from Radian Corporation. Approval does not signify that the contents necessarily reflect the views and policies of the U. S. Environmental Protection Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

PREFACE

In response to State and local agency requests for air toxics information and to support these agencies in their air pollution control efforts, EPA has designed and is implementing an information dissemination center, known as the National Air Toxics Information Clearinghouse. The design and implementation of the Clearinghouse has been conducted in close coordination with the State and Territorial Air Pollution Program Administrators (STAPPA) and the Association of Local Air Pollution Control Officials (ALAPCO).

The purpose of this bibliography is to provide State and local agencies with citations to reports and Federal Register notices useful to them in developing and operating air toxics control programs. The reports selected for this bibliography were published by the following agencies: U. S. Environmental Protection Agency, National Academy of Sciences, National Cancer Institute, National Institute of Environmental Health Sciences, National Toxicology Program, National Institute for Occupational Safety and Health, Consumer Products Safety Commission, and World Health Organization, including the International Agency for Research on Cancer. Relevant reports published by various State and local agencies are also included in this edition. This edition of the bibliography updates the cumulative bibliography previously published by the National Air Toxics Information Clearinghouse, Bibliography of Selected Reports and Federal Register Notices Related to Air Toxics (July 1987). The citations selected for this year were compiled from sources available through March 31, 1988.

The Clearinghouse plans to continue to update this bibliography on a regular basis. Other publications of the Clearinghouse include:

- National Air Toxics Information Clearinghouse: Rationale for Air Toxics Control in Seven State and Local Agencies, EPA-450/5-86-005, PB86-181179/AS, August 1985;

ABSTRACT

The National Air Toxics Information Clearinghouse has been established by the EPA Office of Air Quality Planning and Standards for the purpose of facilitating information transfer among Federal, State, and local air quality management agencies. This document has been published as part of that effort. The purpose is to provide State and local agencies and other Clearinghouse users with citations to reports and Federal Register notices useful in developing and operating air toxics control programs. The reports selected for this bibliography were published by the following agencies: U. S. Environmental Protection Agency, National Academy of Sciences, National Cancer Institute, National Institute of Environmental Health Sciences, National Toxicology Program, National Institute for Occupational Safety and Health, Consumer Products Safety Commission, and World Health Organization, including the International Agency for Research on Cancer. Reports published by various State and local agencies are also included.

The bibliography is published in two volumes plus an index. Volume 1 contains cumulative citations from before 1974 through March 1987 (EPA-450/5-87-005, Volume 1, PB88-136601/XAB). Volume 2 (EPA-450/5-88-005) has the more recent citations from April 1987 through March 1988 (taken from sources available through March 31, 1988). This volume consists of two parts. Part 1 includes introductory material describing the scope and organization and contains information necessary for the proper use of the document. Volume 2, Part 2 contains the report and Federal Register notice entries with bibliographic information and, in most cases, an abstract. The index to the bibliography covers all the reports from 1974 to the present. Each listing indicates which of the two volumes contains the citation. The current index (Index - 1988, EPA-450/5-88-006) is organized by document type; by pollutant class, name, or Chemical Abstracts Service (CAS) number; by source category Standard Industrial Classification (SIC) Code; and by sponsoring agency.

This document was submitted in partial fulfillment of EPA Contract No. 68-02-4330, Work Assignment No. 44, by Radian Corporation under the sponsorship of the U. S. Environmental Protection Agency. This edition of the bibliography updates previous bibliographies published by the National Air Toxics Information Clearinghouse. The Clearinghouse will continue to publish regular updates in separate volumes, consecutively numbered. Periodically, these volumes will be combined into one document. Each year, a new cumulative index will be published that expands and replaces the previous year's edition. This index allows users to identify publications of interest in either Volume 1 or 2 (the volume number, in parentheses, will appear immediately preceding the publication number).

16. ABSTRACT

The bibliography is published in two volumes plus and index. Volume 1 contains cumulative citations from before 1974 through March 1987. Volume 2 has the more recent citations from April 1987 through March 1988 (taken from sources available through March 31, 1988). This volume consists of two parts. Part 1 includes introductory material describing the scope and organization and contains information necessary for the proper use of the document. Volume 2, Part 2 contains the report and Federal Register notice entries with bibliographic information and, in most case, an abstract. The index to the bibliography covers all the reports from 1974 to the present. Each listing indicates which of the two volumes contains the citation. The current index is organized by document type; by pollutant class, name, or Chemical Abstracts Service (CAS) number; by source category Standard Industrial Classification (SIC) Code; and by sponsoring agency.
