APPENDIX A

BIBLIOGRAPHY

The following documentation was used to provide data and information associated with stream flows, population, river mileage, types of waste and water treatment, and data from special studies which were not available in the STORET computer system.

1. Number of Inhabitants - United States Summary, U.S. Deparment of Commerce, Bureau of the Census.

2. 1972 Commercial Atlas and Marketing Guide, 103rd Edition, Rand McNally & Co.

3. The National Atlas of the United States of America, U.S. Department of the Interior, Geological Survey, Washington, D.C., 1970.

4. Catalog of Information on Water Data - Index to Water Quality Section, U.S. Department of the Interior, Geological Survey, Office of Water Data Coordination, 1970 Edition.

5. Catalog of Information on Water Data - Index to Surface Water Section, U.S. Department of the Interior, Geological Survey, Office of Water Data Coordination, 1970 Edition.

6. 1968 Inventory of Municipal Water Facilities, U.S. Department of Health, Education, and Welfare, Public Health Service.

7. Municipal Water Facilities for Communities of 25,000 Population and Over, United States and Possessions, as of January 1, 1964, U.S. Department of Health, Education, and Welfare, Public Health Service.

8. Fish Kills Caused by Pollution, Twelfth Annual Report, TS-00-72-10, Environmental Protection Agency, Office of Air and Water Programs, Monitoring and Data Support Division.

9. Reservoirs in the United States, Geological Survey Water Supply Paper, 1938.

10. Compilation of Records of Surface Waters of the United States, October 1950 to September 1960, Geological Survey Water Supply Papers.

11. Surface Water Supply of the United States, 1961-65, Geological Survey Water Supply Papers.

12. Water Pollution Surveillance System, Annual Compilation of Data, October 1, 1962-September 30, 1963, U.S. Department of Health, Education and Welfare, Public Health Service.

13. National Water Quality Network, Annual Compilation of Data, October 1961-September 30, 1962, U.S. Department of Health, Education and Welfare, Public Health Service.

14. National Water Quality Network - Supplement 12, Plankton Population Dynamics, U.S. Department of Health, Education, and Welfare, Public Health Service.

15. Ohio River Valley Water Sanitation Commission Yearbooks, 1958-1970.

16. Water Quality and Flow Variations, Ohio River and Tributaries, 1956-57, Ohio River Valley Water Sanitation Commission.

17. Ohio River Basin Comprehensive Survey, Appendix D, U.S. Department of the Interior, Federal Water Pollution Control Administration, Ohio River Basin Project.

18. The Missouri River Basin Comprehensive Framework Study, Missouri Basin Inter-Agency Committee Standing Committee, June 1969.

19. Everyone Can't Live Upstream - A Contemporary History of the Water Quality Problems On the Missouri River, Environmental Protection Agency, Office of Water Programs, Kansas City, Missouri, April 1971.

20. Sterols as a Measure of Fecal Pollution, Murtaugh, J. and Bunch, R. L., 1967, Journal of Water Pollution Control Fed., 39:3, Pages 404-409.

21. Water Quality Criteria - Report of the National Technical Advisory Committee to the Secretary of the Interior, April 1, 1968, Federal Water Pollution Control Administration.

22. Second Compilation of Animal Waste Management, U.S. Department of the Interior, Federal Water Pollution Control Administration, Missouri Basin Region, Kansas City, Missouri, June 1969.

23. Stages and Discharges of the Mississippi River and Tributaries and Other Watersheds, U.S. Army Engineer District, New Orleans, Corps of Engineers, 1971.

24. Upper Missouri River Navigation Charts, U.S. Army Division, North Central Corps of Engineers, Chicago, Illinois, 1972.

25. Flood Control and Navigation Maps of the Mississippi River - Cairo, Illinois to the Gulf of Mexico, U.S. Army Engineer District, Vicksburg, Corps of Engineers, Vicksburg, Mississippi, 1972, 40th Edition.

26. Tennessee River Navigation Charts, Paducah, Kentucky to Knoxville, Tennessee. U.S. Army Engineer District, Nashville, Tennessee, January, 1963.

27. Ohio River Navigation Charts, Cairo, Illinois to Foster, Kentucky, U.S. Army Engineer District, Louisville, Kentucky, January 1973.

28. Missouri River Navigation Charts, Kansas City Missouri to the Mouth, U.S. Army Engineer Division, Missouri River Corps of Engineers, Omaha, Nebraska.

29. Missouri River Navigation Charts, Sioux City to Kansas City, U.S. Army Engineer Division, Missouri River Corps of Engineer, Omaha, Nebraska.

30. Ohio River Navigation Charts, Foster, Kentucky to New Martinsville, West Virginia, U.S. Army Engineer District, Huntington, West Virginia, 1973.

31. Ohio River Navigation Charts, Pittsburgh, Pennsylvania to New Martinsville, West Virginia, U.S. Army Engineer District, Pittsburgh, Pennsylvania, January, 1973.

32. Water Quality in the Tennessee Valley, Tennessee Valley Authority, Division of Environmental Planning, Water Quality Branch, Chattanooga, Tennessee, June 30, 1973.

33. A Report on Pollution of the Upper Mississippi River and Major Tributaries, U.S. Department of the Interior, Federal Water Pollution Control Administration, Great Lakes Region, Twin Cities - Upper Mississippi River Project, July 1966.

34. Report on the Effect of the St. Louis Metropolitan Area on Water Quality in the Mississippi River, Federal Water Quality Administration, Great Lakes Region, Lake Michigan Basin Office and National Field Investigation Center, Cincinnati, Ohio, September 14, 1970.

35. Community Water Supply Study, Kansas City, Kansas-Missouri Standards Metropolitan Statistical Area, U.S. Department of Health, Education, and Welfare, Public Health Service, June 1969, Final Draft.

36. Water Quality Index Applications in the Kansas River Basin, National Sanitation Foundation, Ann Arbor, Michigan, Draft.

37. Plant Nutrient Losses in Silt and Water in the Tennessee River System, E. O. Fippin, Soil Science, 60, pages 223-239, 1945.

38. Roger Thomas, Engineering Section, Tennessee Valley Authority, Personal Communication.

39. Water Quality in the Tennessee Valley, E-WQ-73-1, Tennessee Valley Authority, Division of Environmental Planning, Water Quality Branch, Chattanooga, Tennessee, June 30, 1973.

40. The Water Encyclopedia, Water Information Center, Port Washington, New York, 1970.

41. Drought Flow of Michigan Stream, University of Michigan, School of Public Health, Department of Environmental Health, 1960.

42. Conference In the Matter of Pollution of the Navigable Waters of the Detroit River and Lake Erie and Their Tributaries in the State of Michigan, United States Department of Health, Education, and Welfare, Second Session, June 15-18, 1965.

APPENDIX B

STORET STATIONS

B. STORET STATIONS USED

This appendix provides a list of all monitoring stations in EPA's computerized information system (STORET) which are used in this report. Each station is identified by a user number and a station number: the user names and numbers are shown below followed by the detailed list of all stations.

STORET User Names and Numbers

User Name	User Number
Water Resources Division U.S. Geological Survey Reston, Virginia	112WRD
U.S. Bureau of Reclamation Denver, Colorado	113BRECD
U.S. Bureau of Reclamation Sacramento, California	113BUREC
Delaware River Basin Commission Trenton, New Jersey	31DELRBC
Interstate Commission on the Potomac River Basin (INCOPOT) Washington, D.C.	31POTOMA
Tennessee Valley Authority Chattanooga, Tennessee	131TV050, 131TVAC 131TV110
Corps of Engineers New Orleans, Louisiana	11COELMN
Corps of Engineers Seattle, Washington	1119COE
Philadelphia Electric Co. Philadelphia, Pennsylvania	311390WQ
Montgomery County Government Rockville, Maryland	21MDMONT
Water Quality Control Division Colorado Dept. of Public Health Denver, Colorado	21COL001
Idaho Dept. of Environmental and Community Services	21IDAHO

Boise, Idaho	
Illinois Environmental Protection Agency Springfield, Illinois	21ILL
Indiana Stream Pollution Control Board Indianapolis, Indiana	21IND
Michigan Water Resources Commission Mich. Dept. of Natural Resources Lansing, Michigan	21MICH
Minnesota Pollution Control Agency Minneapolis, Minnesota	21MINN
New York Dept. of Environmental Conservation Albany, New York	21NYDEC1
Oregon Dept. of Environmental Quality Portland, Oregon	21400000
Pennsylvania Dept. of Environmental Resources Harrisburg, Pennsylvania	21PA2ORS
Division of Water Quality Control Tennessee Department of Public Health Nashville, Tennessee	21TNWQ
Water Programs Division Washington Department of Ecology Olympia, Washington	21540000
West Virginia Dept. of Natural Resources Charleston, West Virginia	21WV7IWQ
Division of Environmental Protection Wisconsin Dept. of Natural Resources Madison, Wisconsin	21WIS
Region I EPA John F. Kennedy Federal Building Room 2203 Boston, Massachusetts	1111REG1
Region II EPA 26 Federal Plaza New York, New York	1111H030,1111H010, 1111H050,1110NET
Region III EPA Curtis Building 6th and Walnut Streets Philadelphia, Pennsylvania	1112C100,1114T020, 1110NET, 1112S010

Annapolis Field Office Annapolis Science Center Annapolis, Maryland	111210WQ, 11121TWQ,111230WQ
Region IV EPA College Station Road Athens, Georgia	1113S050,1113MONA, 1113COOP,1113S000, 1110NET
Region V EPA 1 North Wacker Drive Chicago, Illinois	1115T030,1110R050, 11140100,1114ENF1, 1110NET
Gros Ile Laboratory 9311 Groh Road Grosse Ile, Michigan	1115D050, 1115D030
Region VI EPA 1600 Patterson Street Dallas, Texas	1116SURV,1116APCC, 1110NET
Region VII EPA 1735 Baltimore Avenue Kansas City, Missouri	1117MBR,1116L050, 1116A050, 1110NET
Region VIII EPA 1860 Lincoln Street Denver, Colorado	1118C030,1110NET
Region IX EPA 100 California Street San Francisco, California	1110NET
Region X EPA 1200 6th Avenue Seattle, Washington	1119C050, NITROGEN, 1119NMFS, 1110NET

APPENDIX C

MAJOR MUNICIPAL SOURCES

APPENDIX C

MAJOR MUNICIPAL DISCHARGERS

For each of the major municipal dischargers the following information is provided:

- ID NO. - EPA Identification number.
- FACILITY - the name of the municipal facility.
- POP SERVED - the population which discharges through the municipal facility.
- DESIGN FLOW (MGD) - the volume of waste which the facility was designed to process (millions of gallons per day).
- ACTUAL FLOW (MGD) - the volume of waste which the facility currently receives (millions of gallons per day).
- TYPE TREATMENT - the level of treatment which the facility currently provides.
- BOD INFLUENT (mg/l) - the average concentration of the BOD waste load which the facility receives.
- BOD EFFLUENT (mg/l) - the average concentration of the BOD waste load which the facility discharges.
- PERCENT BOD REMOVED - the percentage of BOD which the facility removes from its incoming load.

RUN DATE: 74/02/21

STATE = AL

APPENDIX E

MAJOR INDUSTRIAL DISCHARGERS

For each of the major industrial dischargers the following information is provided:

- NAME - the principal name of the plant.
- ST - the abbreviation of the name of the state in which the plant is located.
- WATERBODY - the stream, lake or ocean into which the plant discharges. For plants discharging into more than one waterbody, only one is shown.
- PRINCIPAL PRODUCT - one of the principal products. For plants which produce more than one product, only one is shown.
- FLOW - the total volume of waste water which the plant discharges to surface water (millions of gallons per day).
- PRINCIPAL POLLUTANTS - five pollutant parameters were selected to indicate the quality and magnitude of the discharge from major plants. Each pollutant load is expressed in pounds per day.
    - BOD - the five day biochemical oxygen demand.
    - NITROGEN - ammonia + nitrate (as nitrogen)
    - PHOSPHORUS - total phosphorus
    - TOTAL SOLIDS - total dissolved solids + suspended solids
    - METALS - antimony + arsenic + cadmium + chromium + cobalt + copper + iron + lead + manganese + mercury + nickel + silver + thallium + tin + zinc + molybdenum

APPENDIX G

SEGMENT GAZETTEER

G. SEGMENT GAZETTEER

This appendix displays information for individual waterway segments provided to EPA by States in their Section 106 program submissions for fiscal year 1974.

The data shown from left to right are:

- EPA region (01 through 10)
- State or territory (abbreviation)
- Basin code (two-digit number)
- Segment code (two-digit number)
- Segment classification: E (effluent-limited) or W (water quality-limited)
- Description of segment (or basin or State name)
- Water quality status--date of expected water quality goal achievement and brief explanatory notes where needed.

APPENDIX H

REFERENCE LEVEL RANKINGS

The reach rankings in Chapter II were derived by the procedure described in this appendix. This procedure is the only one of several tried which produces rankings that do not vary with seasonal groupings of the data.

Reference levels were established for 25 parameters, and good water reference levels for 14 of the 25. Parameters and levels were taken without modification from references existing in the literature to various critical parameters and levels. Some parameters measure the same pollutant using differing techniques.

The reference levels are compared, by parameter, with the mean median concentration on each reach. If a mean median for a parameter on a reach is better than that parameter's good water reference level, the parameter is said to be exemplary on the reach. If the mean median is worse than the reference level, the parameter is said to be exceptional on the reach. The levels selected represent the best available quantitative criteria, either from EPA guidelines, or from research activities. They are not intended to replace legally adopted local water quality standards. Table H-1 displays the reference levels and Table H-2 displays the good water reference levels and their sources.

Table H-3 displays the status - exemplary, exceptional, also measured, not measured - on each reach of the parameters associated with both sets of reference levels.

The reaches were then ordered by increasing number of exceptional parameters, and by decreasing number of exemplary parameters within groups of reaches with the same number of exceptional parameters.

This procedure yields the ranking given in Chapter II, reproduced in Table H-4 along with the number of parameters exemplary and exceptional on each reach.

TABLE H-1

REFERENCE LEVELS

STORET Parameter number	Parameter name (Method)	Reference level
10	Water temperature	32°C–aquatic life*
70	Turbidity	50 Jackson candle units–aquatic life*
80	Color	75 platinum-cobalt units–water supply+
300	Dissolved oxygen	4 mg/1–aquatic life, lower limit*
310	BOD (5 day)	30 mg/1–secondary treatment**
400	pH	6-9 standard units–aquatic life, range*
515	Total filtrable residue (105°C)	500 mg/1–water supply*
530	Total nonfiltrable residue	80 mg/1–aquatic life+
610	Total ammonia (as N)	.89 mg/1–aquatic life+
620	Total nitrate (as N)	.9 mg/1–nutrient++
630	Total nitrite plus nitrate (as N)	.9 mg/1–nutrient++
650	Total phosphate (as PO4)	.307 mg/1–nutrient*
653	Total soluble phosphate	.307 mg/1–nutrient*
665	Total phosphorus (as P)	.1 mg/1–nutrient*
940	Chloride (as Cl)	250 mg/1–water supply+
945	Sulfate (as SO4)	250 mg/1–water supply+
31501	Total coliforms (membrane filter, immediate, M-endo, 35°C)	10,000 per 100 ml–recreation*
31503	Total coliforms (membrane filter, delayed, M-endo, 35°C)	10,000 per 100 ml–recreation*
31504	Total coliforms (membrane filter, immediate, les endo agar, 35°C)	10,000 per 100 ml–recreation*
31505	Total coliforms (most probable number, confirmed, 35°C)	10,000 per 100 ml–recreation*
31507	Total coliforms (most probable number, completed, 35°C)	10,000 per 100 ml–recreation*
31615	Fecal coliforms (most probable number, EC, 44.5°C)	2,000 per 100 ml–recreation*
31616	Fecal coliforms (membrane filter M-FC, 44.5°C)	2,000 per 100 ml–recreation*
32730	Phenols	1 ug/1–water supply+
70300	Total filtrable residue (180°C)	500 mg/1–water supply*
