Catalog of OPP Publications And Other Information Media

Recycled/Recyclable
Printed with Soy/Canola Ink on paper that
contains at least 50% recycled fiber

INTRODUCTION

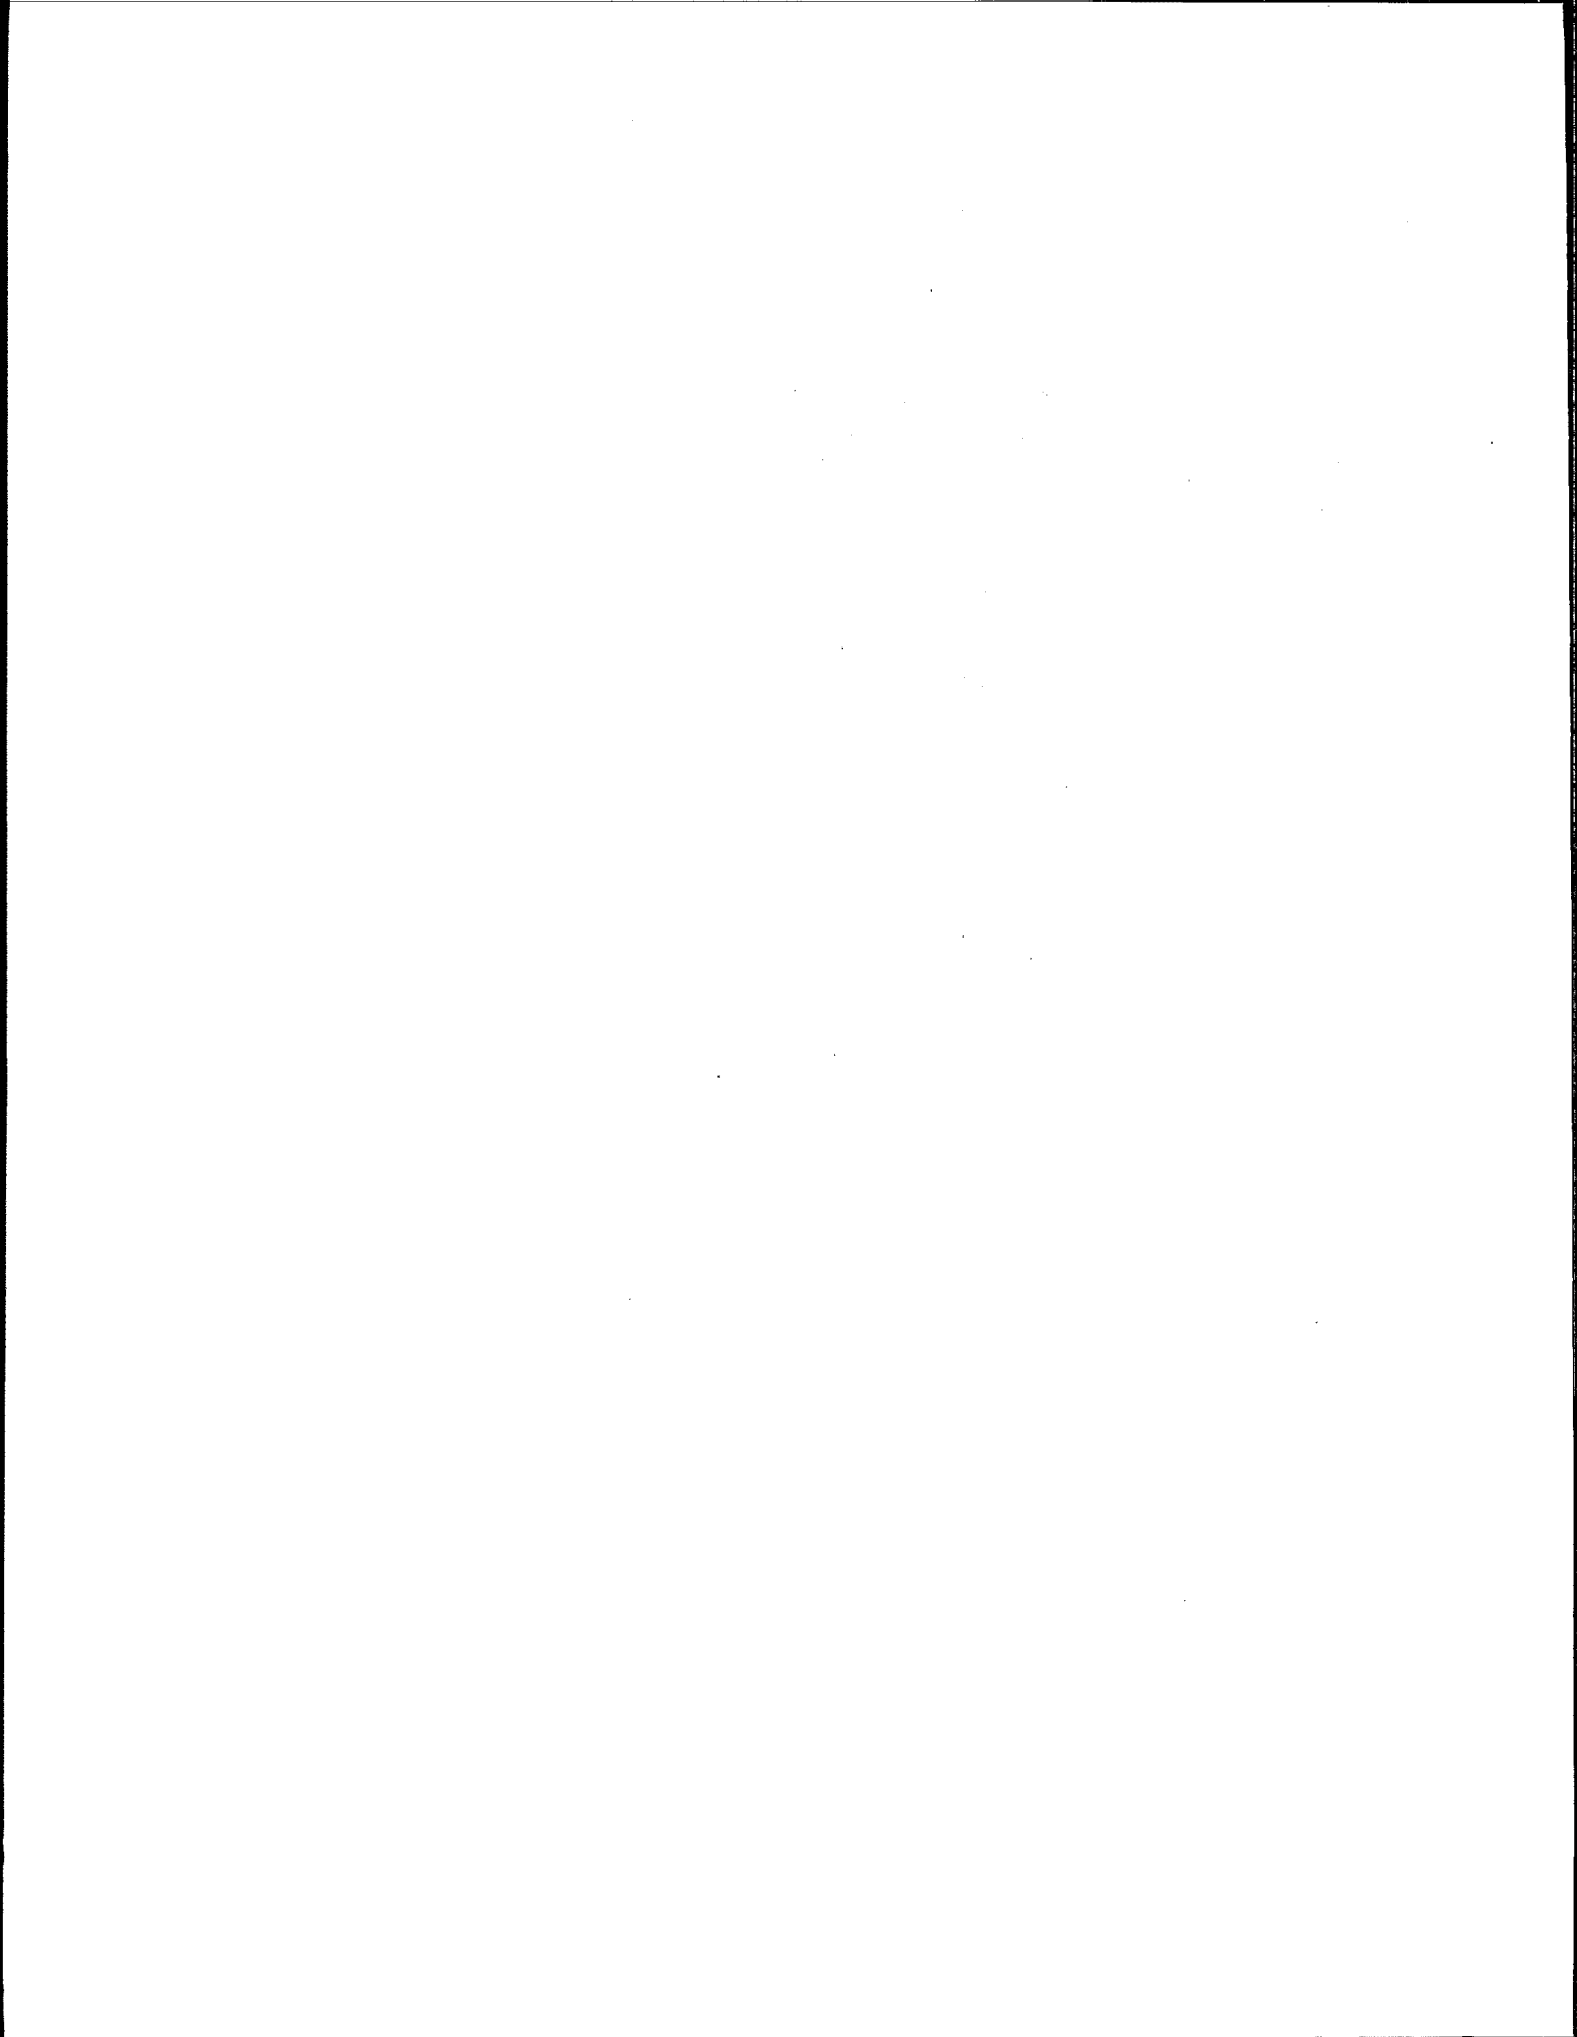

Welcome to the "Catalog of OPP Publications and Other Information Media". In the following pages you will find listings, categorized by the type of item, of the publications and other information products available to the public from the US Environmental Protection Agency's Office of Pesticide Programs (OPP). In addition to the listings, there is a table of contents, instructions on how to order these items, a list of the acronyms used in this publication and their meanings, and a brief description of the various document types.

OPP believes it is important to make information about pesticides available to consumers so they can make informed, responsible decisions concerning their use of pesticides. OPP also makes available policy decisions and regulatory information concerning pesticides to the pesticide industry and commercial users, among others. To help achieve OPP's goal of ensuring pesticide information is made available to all who need it, OPP established the Document Distribution Quality Action Team (DDQAT). The purpose of the DDQAT was to evaluate OPP's document distribution processes and determine the most efficient and effective way to make published information available to the public. Publishing this catalog was one of the team's recommendations.

We hope this catalog provides useful information about OPP's publications and products. Additional copies of this catalog may be obtained by writing to the Public Information Center, 401 M Street S.W., Washington DC 20460, or the National Center for Environmental Publications and Information (NCEPI), PO Box 42419, Cincinnati OH 45242-2419.

Questions about the catalog itself should be directed to the Communications Branch, in the Office of Pesticide Programs. They can be reached by calling 703-305-5017 or writing to:

US Environmental Protection Agency

ORDERING INFORMATION

The items in this catalog are available from EPA's National Center for Environmental Publications and Information (NCEPI); the National Technical Information Service (NTIS); the U.S. Government Printing Office (GPO) and/or other sources. Each item description in this catalog includes the document title; source(s) from which the item is available; the EPA number; and the office which created the item. **Contact the originating office when it is the *only* source shown for the document, or if you have questions about the contents of an item.**

NCEPI

Complementary single copies of documents are distributed by EPA's NCEPI to domestic and international locations. Requests for multiple copies are filled if approved by the originating office. To place a request, provide your name, phone number, address to forward document, document title, and document number to the NCEPI address below. Requests can be submitted in writing, via fax or by telephone.

Fax: 513-891-6685*

NTIS and GPO

Multiple copies of items or items which are unavailable due to an exhausted stock at NCEPI can often be purchased from NTIS or GPO. Many inactive items are available through NTIS. GPO sells a select number of EPA documents. Both NTIS and GPO charge a fee for documents. NTIS customers receive a paper copy reprinted from microfiche. To order publications from NTIS or GPO, please contact the following:

*National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161.
Telephone: 703-487-4650
(TDD) 703-487-4639
Fax: 703-321-8547
Rush: 800-553-NTIS
For Assistance: 703-487-4679*

*Government Printing Office

WPS Worker Protection Standard

DESCRIPTION OF DOCUMENT CATEGORIES

This catalog of documents is divided into several categories. Below is a description of the categories of documents included in the listing.

Reregistration Eligibility Decision (R.E.D.) Document

Page 1 - 5

The Reregistration Eligibility Decision (RED) Document discusses the scientific data and other information supporting EPA's regulatory conclusion that some or all products containing a pesticide do not pose unreasonable risks when used as directed by Agency-approved labeling, and are eligible for reregistration. OPP has issued over 50 RED documents so far under FIFRA '88, and ultimately will reach such reregistration eligibility decisions for about 350 more groups of related pesticides (or chemical "cases").

R.E.D. Fact Sheets

Page 6 - 10

RED Fact Sheets briefly summarize the information in the RED documents (see above). That is, they summarize the uses, regulatory history, toxicity and environmental effects data, and EPA's conclusion, as set forth in the RED document that some or all products containing a pesticide are eligible for reregistration.

Registration Standards

Page 11 - 27

The Registration Standard program was conducted by OPP during the 1970's and 1980's (until 1989) to review the data bases of food use pesticides and determine their readiness for registration.

A Registration Standard document analyzed the available data on an existing chemical, identified and required submission of additional data, and set forth other conditions the pesticide's registrant(s) had to meet in order for EPA to reregister the active ingredient.

Special Review Position Documents

Page 28 - 39

Special Review is the process used by OPP to review those pesticide uses which may have the potential to pose unacceptable risks to either human health or the environment.

Position Documents (PDs) present the Agency's risk assessment, benefits assessment, regulatory options, and proposed regulatory actions.

The PD 1 contains preliminary information and requests comments and more data from interested parties.

The PD 2 is issued when the additional analysis following the PD 1 indicates that there is not an unreasonable risk.

The PD 2/3 presents more refined risk and benefit assessments, the regulatory options under consideration, and a proposed decision. It is also followed by a comment period.

The PD 4 presents the final regulatory action.

Science Chapters

Page 40 - 47

Science Chapters provide the scientific basis for the regulatory policies established in a registration standard or RED. Science Chapters are a compilation of data evaluations prepared by each scientific discipline. The Science Chapters document typically consists of a toxicology chapter, a residue/product chemistry chapter, an environmental fate/exposure assessment chapter, and an ecological effects chapter.

Chemical Fact Sheets

Page 48 - 69

Each fact sheet, which may be obtained separately, describes a particular pesticide: what it is used for, who makes it, when it was registered, its toxicity, environmental fate effects, and regulatory action(s) the Agency has taken on the pesticide. It describes a pesticide at a specific point in time and the Agency's regulatory action at that time.

General Interest Fact Sheets (Non-Chemical)

Page 70 - 72

These documents are brief (2-4 pages) descriptions of various aspects of the pesticide regulatory process, or discussions of timely pesticide-related issues."

Pesticide Regulation (PR) Notice

Page 73 - 74

The Pesticide Regulation Notice is a brief document written primarily for registrants and falls into two categories: those that contain strictly informational material and require no action on the registrant's part or those that inform the registrants about changes in policy or procedures that are important to them and may require action on their part.

Standard Evaluation Procedures (SEP)

Page 75 - 79

A SEP is a guidance document which explains the procedures used to evaluate environmental and human health effects data submitted to the Office of Pesticide Programs.

Pesticide Assessment Guidelines

Page 80 - 86

The Pesticide Assessment Guidelines contain the standards for conducting acceptable tests, guidance on evaluation and reporting of data, definition of terms, further guidance on when data are required, and examples of acceptable protocols.

Endangered Species Fact Sheets, Interim Measures, Etc.

Page 87 - 91

OPP's Endangered Species Protection Program is dedicated to protecting threatened and endangered species from potentially harmful exposure to pesticides while at the same time maintaining viable agricultural production in the United States. In addition to the bulletins and pamphlets, EPA has developed a series of fact sheets on endangered and threatened species in the United States to assist the public in learning about endangered and threatened species.

Worker Protection Standard (WPS)

Page 92 - 94

The documents listed in this category pertain to the implementation of the Worker Protection Standard. It includes publications for farm workers and pesticide handlers on how to handle pesticides safely, guidance for agricultural employers on how to comply with the WPS, etc.

Pesticide Product Information - Compact Label File

Page 95

The compact label file contains a collection of microfiche with information on registered pesticide labels. This information includes active ingredients and percentages of same; common names of active chemicals, sites and pests for usage, dosage, and safety information.

Information Available via Electronic Access

Page 96

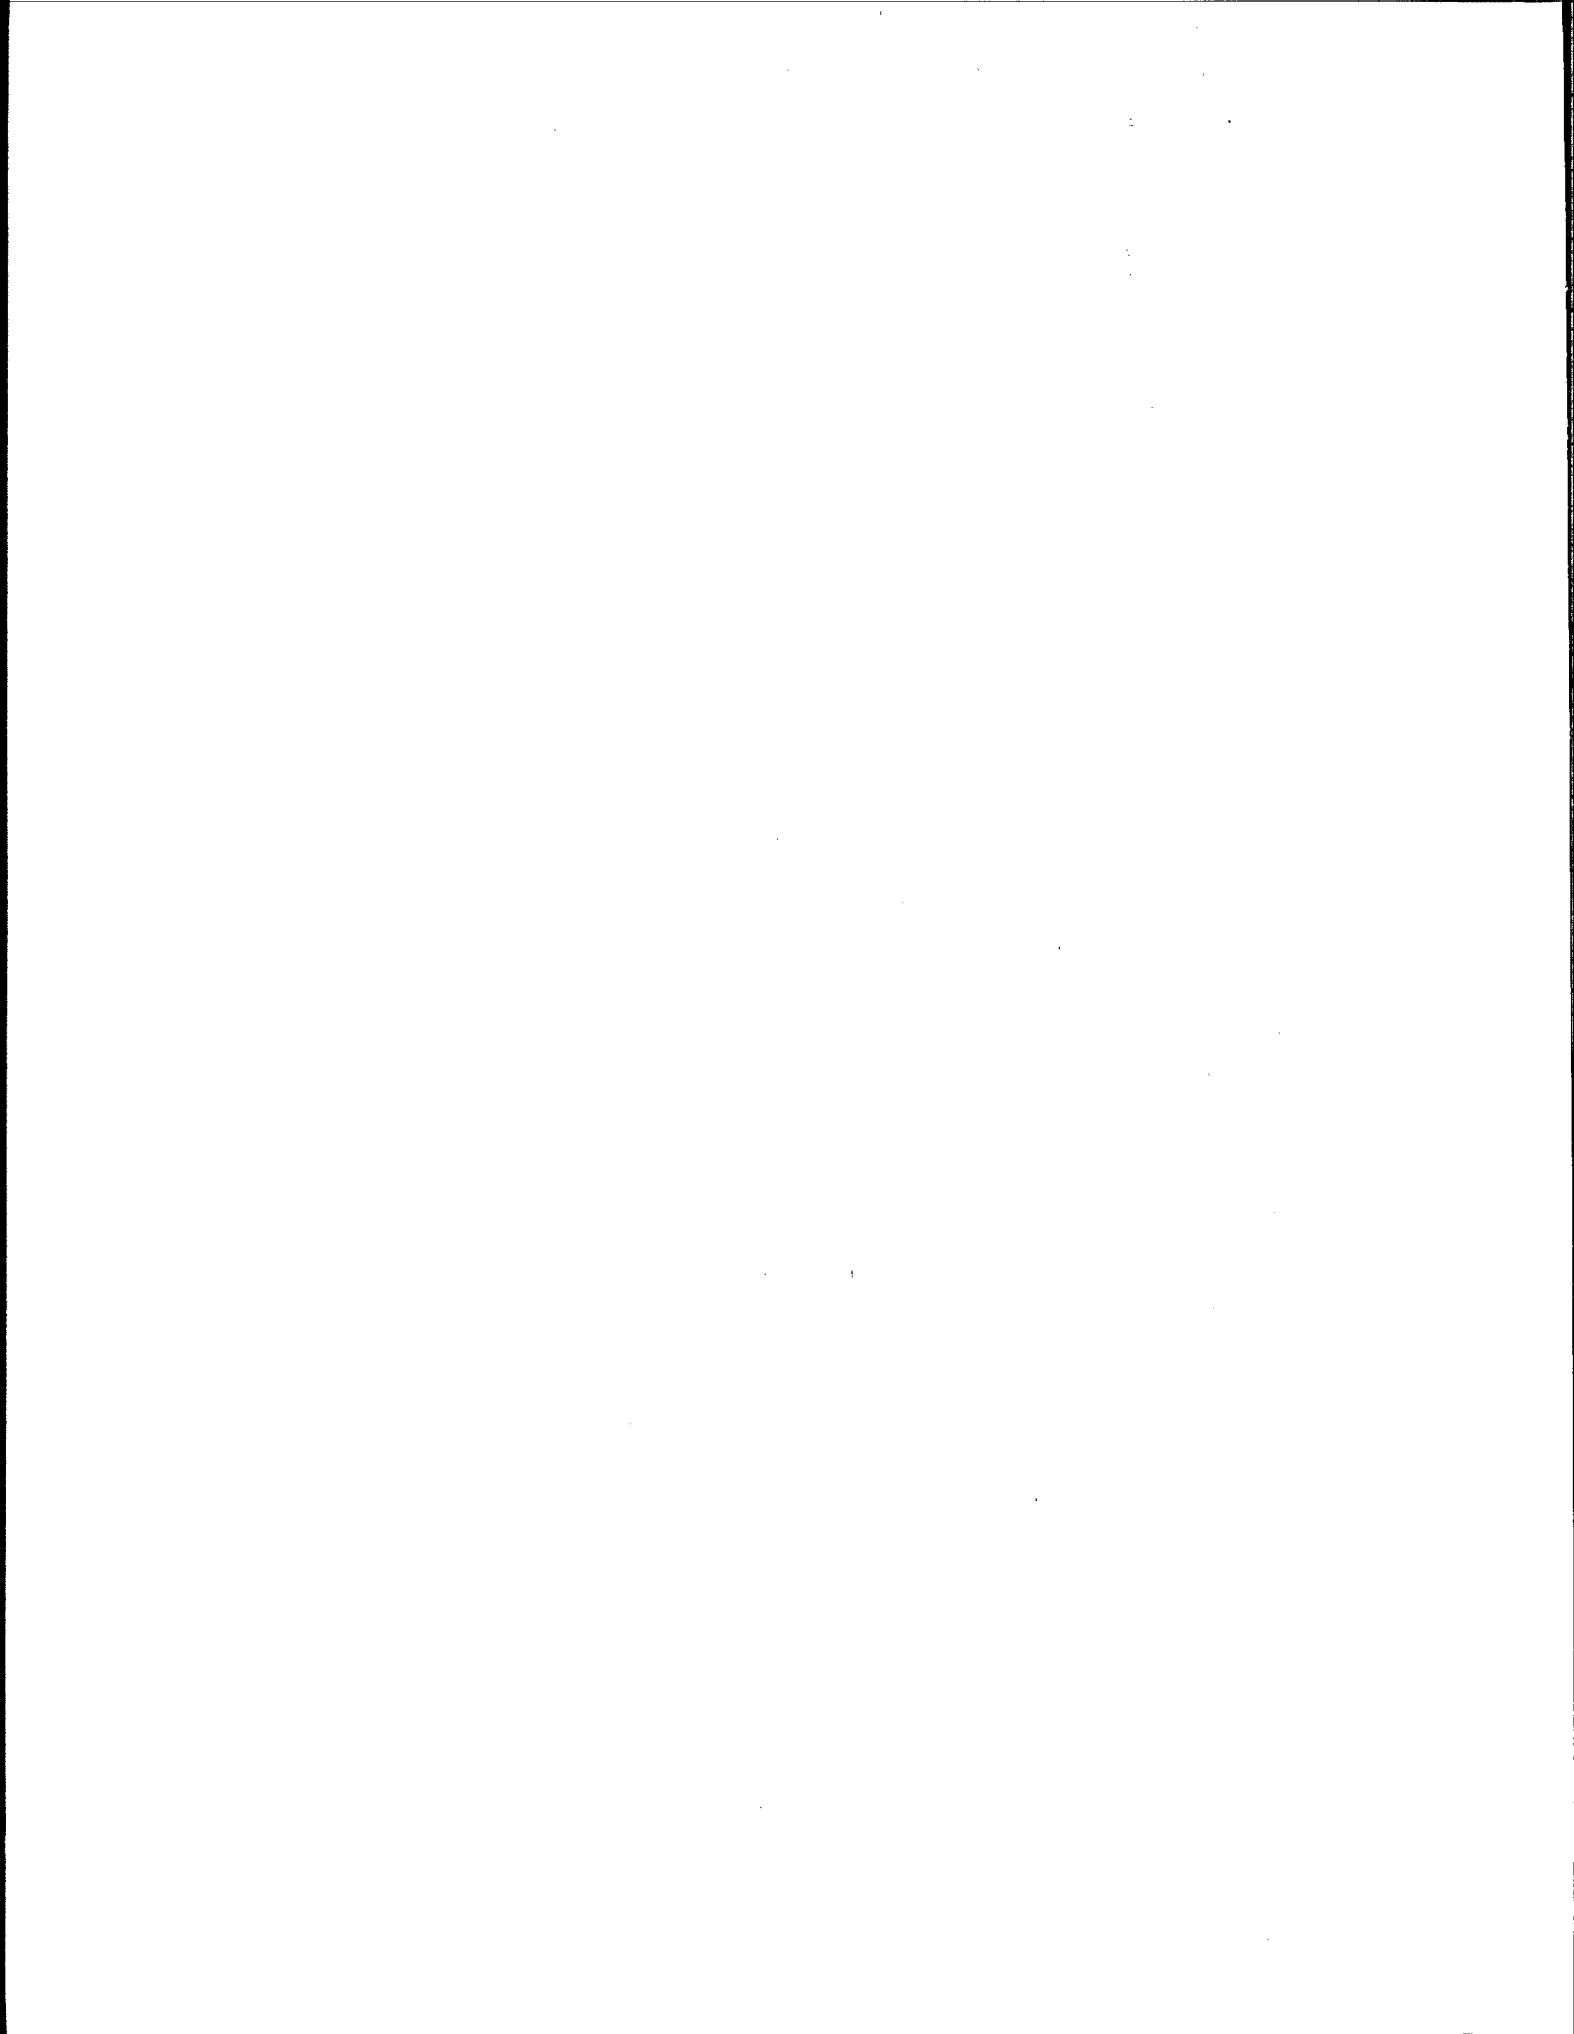

Surveys

Page 97

Miscellaneous Publications

Page 98 - 105

This is a diverse collection of documents including pamphlets and brochures on pesticide-related topics of general interest, reports on program status and progress, and analyses and evaluations of the adequacy and appropriateness of various types of supporting or related studies; e.g., livestock pesticide feeding, and household pesticide poisonings. Some of these publications deal mainly with training skills for pesticide applicators, either in an urban or agricultural setting and include illustrations of pesticide protective equipment to be used by applicators in agriculture, lawns, or gardens.
