State Fact Sheets		41

❖ Introduction ❖

The fact sheets in this document summarize the basic 1998 Toxics Release Inventory (TRI) data for each state. This document serves as a companion volume to EPA's 1998 Toxics Release Inventory Public Data Release (EPA 745-R-00-007), a more detailed examination of TRI data for 1998 and previous years.

The TRI is a publicly available database containing information about releases and other waste management of toxic chemicals by reporting facilities. The TRI was established by section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. EPCRA was passed to promote planning for chemical emergencies and to provide information to the public about the presence and release of toxic and hazardous chemicals in their communities. Following passage of the Pollution Prevention Act of 1990, the TRI was expanded to include reporting of additional waste management and pollution prevention activities.

Facilities in the manufacturing sector (Standard Industrial Classification codes 20 through 39) have been required to report to TRI since its inception. Beginning with reporting year 1994, federal facilities have also been required to report to TRI. 1998 data reflect the first year of reporting by seven additional industries:

- ◆ metal mining (SIC code 10, except 1011, 1081, and 1094),
- ◆ coal mining (SIC code 12, except 1241),

- ◆ electrical utilities that combust coal and/or oil (SIC codes 4911, 4931, 4939, and 4953),
- ◆ RCRA subtitle C hazardous waste treatment and disposal facilities (in SIC code 4953),
- ◆ chemical wholesalers (SIC code 5169),
- ◆ petroleum terminals and bulk stations (SIC code 5171), and
- ◆ solvent recovery services (SIC code 7389).

In the TRI public data release materials, including this volume, reporting by two of these industries—solvent recovery services and RCRA subtitle C hazardous waste treatment and disposal facilities—is analyzed together.

By July 1 each year, facilities must report their estimated amounts of releases and other waste management of toxic chemicals for the preceding calendar year. Facilities provide this information to EPA and to the state in which they are located. For 1998, 23,487 facilities filed 87,328 individual chemical reporting forms. After completion of data entry and data quality assurance activities, EPA makes these data available to the public through on-line databases and a variety of other means, including this report.

For further information about TRI and for assistance in obtaining TRI documents, contact the EPCRA Information Hotline at 1-800-424-9346. For assistance in obtaining

1998 Toxics Release Inventory

access to the data, contact the TRI User Support Service at 202-260-1531. For further information about individual state TRI programs, contact the state TRI coordinator listed at the bottom of the fact sheet for that state.

❖ TRI Data by State: ❖ Overview

Tables on the following pages summarize 1998 TRI reporting by state. These tables do not contain the footnotes that appear on the individual state fact sheets for Florida, Iowa, Minnesota, Montana, and Virginia. For 1998, individual tables rank states and summarize their data for:

- ◆ **on- and off-site releases** (includes transfers out-of-state for disposal and, for tables with all industries, excludes transfers to disposal sent to other TRI facilities that reported the amount as an on-site release),
- ◆ **on-site releases** (includes amounts released at the facility; excludes amounts transferred to other sites for disposal),
- ◆ **releases within each state** (includes off-site releases sent into the state by facilities in other locations, excludes transfers out-of-state for disposal, and excludes transfers to disposal sent to other TRI facilities that reported the amount as an on-site release),
- ◆ **transfers for further waste management**—sent to recycling, energy recovery, treatment, and Publicly Owned Treatment Works (POTWs)—

or for disposal (excluding metals sent to POTWs), and

- ◆ **transfers of metals** (and their compounds) and non-metals to POTWs.

Additional tables summarize on-site and off-site releases, as well as on-site releases, separately for new and original reporting industries. Similar tables provide comparable data for 1997, 1996, and 1995. The final tables supply totals for on- and off-site releases for the four-year period, 1995–1998 and for 1988 and 1995–1998. This last table does not include data on chemicals whose reporting requirements have changed during the period 1988 through 1998.

Therefore, it does not include delisted chemicals, chemicals added in 1990, 1991, 1994 and 1995, aluminum oxide, ammonia, hydrochloric acid and sulfuric acid.

The following section, “Description of the Fact Sheets,” explains data provided in these summary tables, as well as in the individual state fact sheets.

❖ Description of the ❖ Fact Sheets

Each four-page state fact sheet provides the following:

State Summary Data

(First Page for Each State)

Data are presented for the original industries (those which have been required to report to TRI since its inception and federal facilities), new industries reporting for the

first time in 1998, and the total for all industries.

◆ Reported Releases and Waste Management Activities:

◆ **On- and Off-site Releases:** The amounts of toxic chemicals released to air, water, and land and injected into underground wells (on-site releases) at reporting facilities within the state and the amounts of toxic chemicals transferred off-site to disposal (off-site releases) by reporting facilities within the state. Off-site releases include transfers to disposal of all TRI chemicals plus transfers of metals and metal compounds to

solidification/stabilization, to wastewater treatment (excluding POTWs), and to POTWs. Off-site transfer data exclude amounts sent for disposal to other TRI facilities that report those amounts as on-site releases.

◆ **Waste Management:** Quantities of TRI chemicals in Production-related Waste Managed by reporting facilities, including recycling, energy recovery, and treatment on-site and off-site, as well as the quantity released on- and off-site. Non-production-related Waste Managed includes quantities released as the result of one-time events, for example, remedial activities or catastrophic events.

Total On- and Off-site Releases is not the same as Quantity Released On- and Off-site. These *State Fact Sheets* present both amounts in the top left corner for each state. Facilities are also ranked separately in each state for both of these measures of releases.

The difference between these amounts arises primarily from the types of releases reported on different sections of the Form R. Total On- and Off-site Releases reflects all on-site releases collected in Section 5 of Form R plus off-site releases (transfers off-site for disposal) reported in Section 6 (including metals and metal compounds transferred to solidification/stabilization and to wastewater treatment, including POTWs). The Quantity Released On- and Off-site is reported in Section 8.1 of Form R. This quantity reflects production-related releases and excludes releases associated with catastrophic events, remedial actions, and other one-time events not related to production.

Other reasons also contribute to the different quantities reported in different sections of the Form R. For example, a release or transfer of less than 1,000 pounds may be reported in ranges in Section 5 and 6, whereas an exact amount must be included in Section 8. Furthermore, facilities may round off the quantities reported in Section 8 to two significant digits.

In 1998, some facilities reported transfers of metals and metal compounds to solidification/stabilization and to wastewater treatment (excluding POTWs) using incorrect disposal codes in Section 6 of Form R (codes M40 and M61). For the *1998 TRI Public Data Release* and the *State Fact Sheets*, off-site releases include these amounts. These facilities may have reported these transfers in Section 8 as treated off-site rather than incorporating the amounts into Quantity Released On- and Off-site. Because of the differences between Section 6 and Section 8 reporting, EPA cannot correct these Section 8 quantities.

1998 Toxics Release Inventory

- ◆ **Transfers Off-site for Further Waste Management/Disposal:** Amounts of TRI chemicals sent off-site whether for further waste management—recycling, energy recovery, treatment, POTWs—or for disposal (off-site releases). For amounts transferred to POTWs, metals and metal compounds are identified separately from non-metals.

- ◆ **State map** with triangles and squares marking the location of each facility reporting to the TRI in 1998, specifically squares for new industries and triangles for original industries. Triangles and squares are proportionally sized to represent each facility's total on-site releases.

- ◆ **Population and area** of the state, the **number of facilities** reporting to TRI from the state, and the **number of forms** submitted by those facilities. Population statistics for the 50 states and the District of Columbia are 1998 U.S. Census estimates issued in December 1998; the U.S. Census estimates for American Samoa, Guam, the Northern Marianas, Puerto Rico, and the Virgin Islands were issued in December 1999.

- ◆ The state's **national rank** (and pounds) for total on- and off-site releases (includes transfers out-of-state for disposal and excludes transfer amounts sent to other TRI facilities reporting that amount as on-site releases), for total on-

site releases (includes amounts released at the facility; excludes amounts transferred to other sites), for total releases within the state (includes off-site releases sent into the state by facilities in other locations, excludes transfers out-of-state for disposal and transfers to other TRI facilities in the state reporting that amount as on-site releases), and for total production-related waste managed.

- ◆ **Contact** names, telephone numbers, and fax numbers for the state TRI coordinator and for the EPA TRI coordinator for the region in which the state is located.

Chemicals and Facilities with Largest Amounts

(Second through Fourth Pages for Each State)

Chemicals and facilities are ranked separately for the original industries (those which have been required to report to TRI since its inception and federal facilities) and for new industries reporting for the first time in 1998.

- ◆ The **10 chemicals released in the state in the largest amounts** (including transfers into the state for disposal and excluding transfers out-of-state for disposal, as well as transfers within the state to other TRI facilities reporting that amount as on-site releases). Ranking of chemicals includes on-site releases

(reported in Section 5 of TRI's Form R) and off-site releases (reported in Section 6 of TRI's Form R, including transfers of metals and metal compounds to solidification/stabilization and to wastewater treatment including POTWs). Data on all transfers into, within, and out of the state are also presented.

- ◆ The **10 facilities reporting the largest amounts of total on-site releases** of TRI chemicals (reported in Section 5 of TRI's Form R). Ranking of these facilities excludes amounts transferred off-site for

disposal, although information on transfers within the state and out of state (reported in Section 6 of TRI's Form R) is provided.

- ◆ The **10 facilities reporting the largest total quantities of TRI chemicals released on- and off-site** (reported in Section 8.1 of TRI's Form R). These tables supply data for all categories of production-related waste managed and for non-production-related waste managed.

1998 Toxics Release Inventory

[†]One facility, Cyprus Miami Mining in Claypool, AZ, that reported under SIC code 33 and SIC code 10 in 1998 and previous years has been included in the new industry category SIC code 10 for the purpose of this analysis.

[‡]This table includes all off-site releases reported, including off-site transfers to disposal sent to other facilities that reported that amount as an on-site release. Such off-site transfers are only excluded where the table presents amounts for all TRI facilities, for example on Table 1. For amounts of off-site releases which exclude transfers to disposal to other TRI facilities reporting that amount as an on-site release see the individual state fact sheets.

[†]One facility, Cyprus Miami Mining in Claypool, AZ, that reported under SIC code 33 and SIC code 10 in 1998 and previous years has been included in the new industry category SIC code 10 for the purpose of this analysis.

[‡]This table includes all off-site releases reported, including off-site transfers to disposal sent to other facilities that reported that amount as an on-site release. Such off-site transfers are only excluded where the table presents amounts for all TRI facilities, for example on Table 1. For amounts of off-site releases which exclude transfers to disposal to other TRI facilities reporting that amount as an on-site release see the individual state fact sheets.

Total Production-related Waste Managed	783,478,246	108,268,730	891,746,976
Total Non-production-related Waste Managed	233,142	547	233,689

Transfers Off-site for Further Waste Management/Disposal

Recycling	35,805,780	418,184	36,223,964
Energy Recovery	11,387,978	29,595,406	40,983,384
Treatment	8,822,439	228,240	9,050,679
Publicly Owned Treatment Works (POTWs)	1,232,153	8	1,232,161
Metals and Metal Compounds*	40,413	0	40,413
Non-metal TRI Chemicals**	1,191,740	8	1,191,748
Other Off-site Transfers****	0	0	0
Off-site Transfers to Disposal (not including metals to POTWs)	18,445,330	535,663	18,980,993
Total Transfers Off-site for Further Waste Management/Disposal	75,693,680	30,777,501	106,471,181

* Transfers to POTWs of metals and metal compounds are included in off-site releases. Excludes transfer amounts sent for disposal to other TRI facilities reporting that amount released on-site.

** Transfers to POTWs of non-metals are included in treated off-site waste management activity.

*** Excludes non-production-related releases; e.g. releases due to catastrophic events or remedial actions.

****Transfers reported without a valid waste management code.

** Includes amounts released at the facility. Excludes amounts transferred to other sites.

*** Excludes transfers for disposal sent out-of-state or sent to other TRI facilities within the state reporting that amount released on-site.

†Three IMC-Agrico plants in Mulberry, Florida submitted 1998 forms too late for inclusion in this report. They reported a total of 11.5 million pounds of on-site releases which changes the state national rankings as follows. Rank for total on- and off-site releases for original industries changes from 11 to 10 and for total industries from 13 to 12. Rank for total on-site releases for original industries changes from 8 to 5 and for total industries from 11 to 10. Rank for total releases within state for original industries changes from 11 to 10 and for total industries from 13 to 12.

* Excludes amounts transferred to other TRI facilities in the state reporting that amount released on-site.

** The chemical ranking is based on the amounts in this column.

[†] Three IMC-Agrico plants in Mulberry, Florida submitted 1998 forms too late for inclusion in this report. They reported total releases in the state of 7,140,000 pounds of phosphoric acid, 4,129,000 pounds of ammonia and 215,000 pounds of sulfuric acid. The rank of ammonia changes from fourth to third.

* Includes transfers out-of-state for disposal. Excludes transfer amounts sent for disposal to other TRI facilities reporting that amount released on-site.

** Includes amounts released at the facility. Excludes amounts transferred to other sites.

*** Excludes transfers for disposal sent out-of-state or sent to other TRI facilities within the state reporting that amount released on-site.

†One facility, George Neal South in Sioux City, Iowa was incorrectly located in Minnesota. It reported 1.3 million pounds released on-site and total production-related waste managed. Adding this facility to Iowa totals changes the national rank for total on-site releases for new industries from 33 to 32 and for production-related waste managed for new industries from 41 to 40.

Non-metal TRI Chemicals**	4,920,177	0	4,920,177
Other Off-site Transfers****	0	6,000	6,000
Off-site Transfers to Disposal (not including metals to POTWs)	5,460,756	580,126	6,040,882
Total Transfers Off-site for Further Waste Management/Disposal	105,803,663	1,226,178	107,029,841

* Transfers to POTWs of metals and metal compounds are included in off-site releases. Excludes transfer amounts sent for disposal to other TRI facilities reporting that amount released on-site.

** Transfers to POTWs of non-metals are included in treated off-site waste management activity.

*** Excludes non-production-related releases; e.g. releases due to catastrophic events or remedial actions.

**** Transfers reported without a valid waste management code.

Total Transfers Off-site for Further Waste Management/Disposal	100,262,325	9,017,608	109,279,933

* Transfers to POTWs of metals and metal compounds are included in off-site releases. Excludes transfer amounts sent for disposal to other TRI facilities reporting that amount released on-site.

** Transfers to POTWs of non-metals are included in treated off-site waste management activity.

*** Excludes non-production-related releases; e.g. releases due to catastrophic events or remedial actions.

****Transfers reported without a valid waste management code.
