Ambient Ozone And Human Health: An Epidemiological Analysis

Volume II

AMBIENT OZONE AND HUMAN HEALTH:
AN EPIDEMIOLOGICAL ANALYSIS

Paul R. Portney and John Mullahy

Resources for the Future
1755 Massachusetts Avenue, N.W.
Washington, D.C. 20036

Volume II
Draft Final Report
September 1983

Submitted to the Economic Analysis Branch, Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, under contract number 68-02-3583.

U.S. Environmental Protection Agency

DISCLAIMER

This report has been reviewed by the Office of Air Quality Planning and Standards, U. S. Environmental Protection Agency, and approved for publication as received from Resources for the Future. The analysis and conclusions presented in this report are those of the authors and should not be interpreted as necessarily reflecting the official policies of the U. S. Environmental Protection Agency.

ACKNOWLEDGEMENTS

This report and the analysis on which it is based have benefitted from the efforts of a large number of individuals. Robert Fuchsberg and his colleagues in the Division of Health Interview Statistics at the National Center for Health Statistics were extraordinarily helpful in making available to us and acquainting us with the intricacies of the Health Interview Survey. Professor Raymond Palmquist of North Carolina State University gave most generously of his time to match the individuals interviewed in the 1979 Health Interview Survey to the air pollution monitors nearest their homes.

Within the Environmental Protection Agency, we received support and advice from Allen Basala, William Hunt, Bart Ostro, as well as others in the Economic Analysis Branch, the Ambient Standards Branch, the Monitoring and Data Analysis Branch, the Health Effects Research Laboratory, and the Environmental Criteria Assessment Office. Thomas Walton, our project officer, not only assisted us with countless administrative and procedural details but also made valuable substantive suggestions at each stage of our research. V. Kerry Smith, Raymond Palmquist, Duncan Holthausen, Jan Laarman, and W. Kip Viscusi--all acting as consultants to EPA--also provided valuable comments on our analysis.

A number of people knowledgeable about air pollution health effects assisted us in the early stages of our research by identifying air pollutants that might plausibly be associated with certain types of acute

and chronic illness. We are most grateful in this regard to Gilbert Omenn, Jane Koenig and Michael Morgan of the Department of Environmental Health at the University of Washington, Michael Lebowitz of the College of Medicine at the University of Arizona, and Alice Whittemore of the Stanford University School of Medicine. John Spengler of the Harvard University School of Public Health was also very helpful in this regard. We also benefitted from comments received during seminars at the University of California at Berkeley, Harvard University, Johns Hopkins University, the University of Washington and Washington State University.

Finally, we owe several of our colleagues at Resources for the Future a debt of thanks. Michael Hazilla wrote the programs which summarized the mass of air quality data with which we worked and matched it to the periods for which had individuals' health histories. Richard Carson provided expert research assistance in the early stages of the project. Among those who commented on early versions of the chapters, Robert Frank deserves special mention. He read and commented extensively on both the form and substance of every chapter. William Vaughan, Clifford Russell, Winston Harrington and Allen Kneese also provided very helpful comments on individual chapters. Margaret Parr-Recard, Pat Flynn, D.J. Curran, Anne Farr and others worked very hard typing and helping produce this draft report. We are grateful to them all for their help.

It goes without saying that none of the individuals mentioned above bears any responsibility for the contents of this report. That is the responsibility of the authors alone.

TABLE OF CONTENTS

	Page
<u>VOLUME I</u>	
CHAPTER 1. INTRODUCTION	
1.1 General Background	1-1
1.2 Economic Valuation and Physical Effects	1-4
1.3 Identifying Air Pollution Health Effects	1-5
1.4 The RFF Study	1-15
1.5 Summary and Plan of this Report	1-20
CHAPTER 2. DATA	
2.1 Overview	2-1
2.2 The Health Interview Survey	2-9
2.2.1 Main Survey	2-9
2.2.2 Smoking Supplement	2-16
2.2.3 Residential Mobility Supplement	2-19
2.2.4 Documentation and Cross Referencing of HIS Data	2-21
2.3 Air Pollution Data	2-22
2.3.1 SAROAD System	2-22
2.3.2 Data Integrity and Completeness	2-24
2.3.3 Multi-Year Averaged Data	2-37
2.3.4 Description of the Pollution Variables	2-42
2.3.5 Matching Individuals to Monitors	2-46
2.4 Meteorological Data	2-47
2.5 Other Data	2-51
2.5.1 Pollen	2-52
2.5.2 Indoor Air Pollution	2-54
2.5.3 Paid Sick Leave	2-56
2.5.4 The Pollutant Standard Index	2-57
2.5.5 availability of Medical Care	2-59
2.6 Problems of Sample Selection	2-60
CHAPTER 3. METHODOLOGY	
3.1 Measures of Health Status: Choice of the Dependent Variables	3-2
3.2 Explanatory Variables	3-6
3.3 Estimation Techniques	3-52
Appendix to Chapter 3: Definitions of and Procedures Used to Create Measures of Morbidity	A3-1
CHAPTER 4. RESULTS AND DISCUSSION	
4.1 Acute Morbidity Due to All Causes	4-5
4.1.1 Adults	4-5
4.1.2 Children	4-21

4.2	Acute Morbidity Due to Respiratory Disease	4-28
4.2.1	Adults	4-31
4.2.2	Children	4-55
4.3	Chronic Respiratory disease	4-59
4.3.1	Adults	4-61
4.3.2	Children	4-81
4.4	Cardiovascular and Other Chronic Diseases	4-85
4.5	Analysis of Multicollinearity	4-89
CHAPTER 5. ALTERNATIVE OZONE CONCENTRATIONS AND CHANGES IN MORBIDITY: ILLUSTRATIVE ESTIMATES		
5.1	Ozone-related Changes in Morbidity	5-2
5.1.1	Acute Morbidity	5-3
5.1.2	Chronic Morbidity	5-6
5.2	Acute and Chronic Illness: Feedback Effects	5-8
5.3	Relative Risks	5-11
5.4	Monetary Benefit Estimates	5-18

U.S. HEALTH INTERVIEW SURVEY

2. R.O. number 3. Sample 4. Segment type
☐ Area
☐ Permit
☐ Address
☐ Cen-Sup
☐ Special Place

5. Control number
 PSU Segment Serial

6a. What is your exact address? (Include House No., Apt. No., or other identification and ZIP code)
 City State ZIP code County
 b. Is this your mailing address? ☐ Same as 6a
 Mark box or specify if different. Include ZIP code.
 City State ZIP code County
 c. Special place name Sample unit number Type code

7. YEAR BUILT ☐ Ask ☐ Do NOT Ask
 When was this structure originally built?
☐ Before 4-1-70 ☐ After 4-1-70 (Go to 9c, complete
 Continue interview) (required and end interview)

8. Type of living quarters ☐ Housing unit ☐ OTHER unit

9. Area segments ONLY
☐ a. Are there any occupied or vacant living quarters besides your own in this building?
☐ b. Are there any occupied or vacant living quarters besides your own on this floor?
☐ c. Is there any other building on this property for people to live in - either occupied or vacant?
☐ d. None

10. Land use ☐ RURAL ☐ URBAN (13)
 -- Regular units and Special Place units coded 85-99 in 6c, go to 11.
 -- Special Place units not coded 85-99 in 6c, go to 12.

11. Do you own or rent this place? ☐ Own ☐ Rent ☐ Rent for free

12a. Does this place you (own/rent/rent for free) have 10 acres or more? Y (12b) N (12c)
 b. During the past 12 months did sales of crops, livestock, and other farm products from this place amount to \$50 or more? Y (13) N (13)
 c. During the past 12 months did sales of crops, livestock, and other farm products from this place amount to \$250 or more? Y N

13. How many rooms are in this --? Rooms
 Count the kitchen but not the bathroom. 14. How many bedrooms are in this --? Bedrooms
 If "None" describe in footnotes.

15. What is the telephone number here? Area code Number
☐ None

16. Was this interview observed?
☐ Y ☐ N

17. Interviewer's name Code

BEFORE LEAVING HOUSEHOLD, CHECK THAT ITEM 20 HAS AN ENTRY.
 Determine the best time for callbacks.

FOOTNOTES

18. Non-interview reason
 TYPE A
 1. Refusal - Describe in a footnote
 2. No one at home - repeated calls
 3. Temporarily absent - Followup
 4. Other Specify
 TYPE B
 1. Vacant - nonseasonal
 2. Vacant - seasonal
 3. Usual residence elsewhere
 4. Armed Forces
 5. Other Specify
 TYPE C
 1. Chused line of listing sheet
 2. Demolished
 3. Merged
 4. Outside segment
 5. Built after April 1, 1970
 6. Other Specify

19. Record of calls
 Month Date Beginning time Ending time Completed Work
 1. 1 1 1 1 1
 2. 1 1 1 1 1
 3. 1 1 1 1 1
 4. 1 1 1 1 1
 5. 1 1 1 1 1
 6. 1 1 1 1 1

20. List column numbers of sample persons not interviewed during initial interview.
☐ None

21. Record of additional contacts
 Month Date Beginning time Ending time
 1. 1 1 1 1
 2. 1 1 1 1
 3. 1 1 1 1
 4. 1 1 1 1

<p>1a. What is the name of the head of this household? — Enter name in first column</p> <p>b. What are the names of all other persons who live here? — List all persons who live here.</p> <p>c. I have listed (Read names). Is there anyone else staying here now, such as friends, relatives, or roomers?</p> <p>d. Have I missed anyone who USUALLY lives here but is now away from home?</p> <p>e. Do any of the people in this household have a home anywhere else?</p> <p>f. Are any of the persons in this household now on full-time active duty with the Armed Forces of the United States? ... Y ... (Call it) ... (Delete) ... N</p>		<p>1b. First name 1 AGE</p> <p>Last name</p> <p>RACE</p> <p>1 W</p> <p>2 B</p> <p>3 OT</p>																					
<p>2. How is — related to — (Head of household)?</p>		<p>2 Relationship</p> <p>HEAD</p> <p>SEX</p> <p>1 M</p> <p>2 F</p>																					
<p>3. What is —'s date of birth? (Enter date and Age, and circle Race and Sex)</p>		<p>3 Month Date Year</p>																					
<p>L Ask Condition list — Use Flashcard — to determine Sample persons; mark SP boxes.</p>		<p>BED DAYS: DV HOSP.</p> <p>None VP None NP None VP</p> <p>None VP None NP None VP</p>																					
<p>C 1. Record the number of Bed Days, Doctor Visits, and hospitalizations</p> <p>2. Record each condition in the person's column, with the question number(s) where it was reported.</p> <p>Reference dates</p> <p>2-week period —</p> <p>12-month Bed Days and Doctor visit probe —</p> <p>Hospital probe —</p>		<p>C 3. No. Condition</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </table>																					
<p>If 17+ ask.</p> <p>4. Is — now married, widowed, divorced, separated, or never married?</p>		<p>5 Under 17</p> <p>6 Married — spouse present</p> <p>7 Married — spouse absent</p> <p>8 Widowed</p> <p>9 Divorced</p> <p>10 Separated</p> <p>11 Never married</p>																					
<p>H If related persons 17 years old or over are listed in addition to the respondent, say:</p> <p>We would like to have all adults who are at home take part in the interview.</p> <p>Is your —, your —, etc., at home now? If "yes," ask: Please ask them to join us.</p>		<p>H 1 Under 7</p> <p>2 At home</p> <p>3 Not at home</p>																					
<p>This survey is being conducted to collect information on the Nation's health. I will ask about visits to doctors and dentists, illness in the family, and other health-related items. (Hand calendar)</p> <p>The next few questions refer to the past 2 weeks, the 2 weeks outlined in red on that calendar, beginning Monday, (date), and ending this past Sunday, (date).</p> <p>5a. During these 2 weeks, did — stay in bed because of any illness or injury?</p> <p>b. During that 2-week period, how many days did — stay in bed all or most of the day?</p>		<p>5a Y (5b)</p> <p>5b Days</p> <p>6a 00 None (8)</p> <p>6b 00 None (9)</p> <p>7a 00 None (9)</p> <p>7b 00 None (9)</p>																					
<p>6. During these 2 weeks, how many days did illness or injury keep — from work?</p> <p>(For females): not counting work around the house?</p>		<p>6a 00 None (8)</p> <p>6b 00 None (9)</p>																					
<p>7. During these 2 weeks, how many days did illness or injury keep — from school?</p>		<p>7a 00 None (9)</p> <p>7b 00 None (9)</p>																					
<p>If one or more days in 5b, ask 8. Otherwise go to 9.</p> <p>8. On how many of these — days lost from { in bed lost from work lost from school } did — stay in bed all or most of the day?</p>		<p>8a 00 None</p> <p>8b 00 None</p>																					
<p>9a. (NOT COUNTING the day(s) { in bed lost from work lost from school })</p> <p>Were there any (other) days during the past 2 weeks that — cut down on the things he usually does because of illness or injury?</p> <p>b. (Again, not counting the day(s) { in bed lost from work lost from school })</p> <p>During that period, how many (other) days did he cut down for as much as a day?</p> <p>If one or more days in 5-9, ask 10. Otherwise go to next person.</p>		<p>9a 1 Y</p> <p>9b 2 N (10)</p> <p>10a 00 None</p> <p>10b 00 None</p>																					
<p>10a. What condition caused — to { stay in bed miss work miss school cut down } during the past 2 weeks?</p> <p>b. Did any other condition cause him to { stay in bed miss work miss school cut down } during that period?</p> <p>c. What condition?</p>		<p>10a Enter condition in item C. Ask 10b</p> <p>10b Y</p> <p>10c N (NP)</p> <p>10d Enter condition in item C. Ask 10e</p>																					
<p>Fill item C, (BED DAYS), from 5a for all persons.</p>

Ages 17+	19a. What was -- doing MOST OF THE PAST 12 MONTHS -- (For males): working or doing something else? If "something else," ask: b. What was -- doing? If 45+ years and was not "working," "keeping house," or "going to school," ask: c. Is -- retired? d. If "retired," ask: Did he retire because of his health?	19 20. 1. Working (24a) 2. Keeping house (24b) 3. Retired, health (23) 4. Retired, other (23) 5. Going to school (28) 6. 17+ something else (23) 7. 6-16 something else (25)
Ages 6-16	20a. What was -- doing MOST OF THE PAST 12 MONTHS -- going to school or doing something else? If "something else," ask: b. What was -- doing?	1-5 years (27) 6-16 something else (25)
Ages under 6		
21a. Is -- able to take part at all in ordinary play with other children?	21a. Y N (28)	
b. Is he limited in the kind of play he can do because of his health?	b. 2 Y (28) N	
c. Is he limited in the amount of play because of his health?	c. 2 Y (28) N (27)	
22a. Is -- limited in any way because of his health?	22a. 1 Y 5 N (NP)	
b. In what way is he limited? Record limitation, not condition.	b. (28)	
23a. Does -- health now keep him from working?	23a. 1 Y (28) N	
b. Is he limited in the kind of work he could do because of his health?	b. 2 Y (28) N	
c. Is he limited in the amount of work he could do because of his health?	c. 2 Y (28) N	
d. Is he limited in the kind or amount of other activities because of his health?	d. 3 Y (28) N (27)	
24a. Does -- NOW have a job?	24a. Y (24c) N	
b. In terms of health, is -- NOW able to (work - keep house) at all?	b. Y 1 N (28)	
c. Is he limited in the kind of (work - housework) he can do because of his health?	c. 2 Y (28) N	
d. Is he limited in the amount of (work - housework) he can do because of his health?	d. 2 Y (28) N	
e. Is he limited in the kind or amount of other activities because of his health?	e. 3 Y (28) N (27)	
25. In terms of health would -- be able to go to school?	25. Y N (28)	
26a. Does (would) -- have to go to a certain type of school because of his health?	26a. 2 Y (28) N	
b. Is he (would he be) limited in school attendance because of his health?	b. 2 Y (28) N	
c. Is he limited in the kind or amount of other activities because of his health?	c. 3 Y (28) N	
27a. Is -- limited in ANY WAY because of a disability or health?	27a. 1 Y 5 N (NP)	
b. In what way is he limited? Record limitation, not condition.	b. (28)	
28a. About how long has he { been limited in -- been unable to -- had to go to a certain type of school? }	28a. 100 Less than 1 month 1 1-5 yrs. 2 6-10 yrs. 3 11-15 yrs. 4 16-20 yrs. 5 21-25 yrs. 6 26-30 yrs. 7 31-35 yrs. 8 36-40 yrs. 9 41-45 yrs. 10 46-50 yrs. 11 51-55 yrs. 12 56-60 yrs. 13 61-65 yrs. 14 66-70 yrs. 15 71-75 yrs. 16 76-80 yrs. 17 81-85 yrs. 18 86-90 yrs. 19 91-95 yrs. 20 96-100 yrs.	
b. What (other) condition causes this limitation?	b. Enter condition in item C. Ask 29c.	
If "old age" only, ask: Is this limitation caused by any specific condition?	Old age only NP	
c. Is this limitation caused by any other condition?	Y Reason (29d and c) N	
Mark box or ask:	Only 1 condition	
d. Which of these conditions would you say is the MAIN cause of his limitation?	d. Enter main condition

AA

1 ☐ Missing extremity (A4)
 2 ☐ Condition in C2 does not have a letter as source (A4)
 3 ☐ Condition in C2 has a letter as source, Doctor seen (11)
 4 ☐ Condition in C2 has a letter as source, Doctor not seen (15)

11a. Does -- NOW take any medicine or treatment for his ...? 1 Y 2 N (12)

b. Was any of this medicine or treatment recommended by a doctor? 1 Y 2 N

12. Has he ever had surgery for this condition? 1 Y 2 N

13. Was he ever hospitalized for this condition? 1 Y 2 N

14. During the past 12 months, about how many times has -- seen or talked to a doctor about his ...? ____ Times
 (Do not count visits while a patient in a hospital.) 000 ☐ None

15a. About how many days during the past 12 months has this condition kept him in bed all or most of the day? ____ Days
 000 ☐ None

Ask if 17+ years:

b. About how many days during the past 12 months has this condition kept him from work? ____ Days
 For females: Not counting work around the house? 000 ☐ None

16a. How often does his ... bother him -- all of the time, often, once in a while, or never?
 1 ☐ All the time 2 ☐ Often 3 ☐ Once in a while
 4 ☐ Never (16c) 5 ☐ Other -- Specify ____

b. When it does bother him, is he bothered a great deal, some, or very little?
 1 ☐ Great deal 2 ☐ Some 3 ☐ Very little
 4 ☐ Other -- Specify ____

☐ All the time in 16a OR condition list 4 asked (A4)

c. Does -- still have this condition?
 1 Y (A4) 2 N

d. Is this condition completely cured or is it under control?
 2 ☐ Cured 3 ☐ Under control (A4)
 4 ☐ Other -- Specify ____ (A4)

e. About how long did -- have this condition before it was cured?
 0 ☐ Less than one month ____ Months ____ Years

A4 ☐ Accident or injury ☐ Other (NC)

17a. Did the accident happen during the past 2 years or before that time?
☐ During the past 2 years ☐ Before 2 years (18a)

b. When did the accident happen?
☐ Last week ☐ Over 3-12 months
☐ Week before ☐ 1-2 years
☐ 2 weeks-3 months

18a. At the time of the accident what part of the body was hurt?
 What kind of injury was it? Anything else?

Part(s) of body	Kind of injury

If accident happened more than 3 months ago, ask:

b. What part of the body is affected now?
 How is his -- affected? Is he affected in any other way?

Part(s) of body	Present effects

19. Where did the accident happen?
 1 ☐ At home (inside house)
 2 ☐ At home (adjacent premises)
 3 ☐ Street and highway (includes roadway and public sidewalk)
 4 ☐ Farm
 5 ☐ Industrial place (includes premises)
 6 ☐ School (includes premises)
 7 ☐ Place of recreation and sports, except at school
 8 ☐ Other -- Specify ____

20. Was -- at work at his job or business when the accident happened?
 1 Y 2 N (NC)
 3 ☐ While in Armed Services
 4 ☐ Under 17 at time of accident

21a. Was a car, truck, bus, or other motor vehicle involved in the accident in any way? 1 Y 2 N (NC)

b. Was more than one vehicle involved? Y N

c. Was it (either one) moving at the time? 1 Y 2 N

CONDITION 5				
1. Person number	Name of condition			
2. When did -- last see or talk to a doctor about his ...?				
1 <input type="checkbox"/> In interview	2 <input type="checkbox"/> Past 2 wks. (Item C)	3 <input type="checkbox"/> 1-4 yrs.	<div style="display: flex; align-items: center;"> <div style="margin-right: 10px;"> 4 <input type="checkbox"/> 5+ yrs. 5 <input type="checkbox"/> Never 6 <input type="checkbox"/> DK if Dr. seen 7 <input type="checkbox"/> DK when Dr. seen </div> </div>	
week	2 <input type="checkbox"/> 2 wks.-6 mos.	6 <input type="checkbox"/> 5+ yrs.		
(Reask 2)	3 <input type="checkbox"/> Over 6-12 mos.	7 <input type="checkbox"/> Never		
	4 <input type="checkbox"/> 1 yr.	6 <input type="checkbox"/> DK if Dr. seen		
		7 <input type="checkbox"/> DK when Dr. seen		
A1	Examine "Name of condition" entry and mark			
<input type="checkbox"/> Color blindness (NC)	<input type="checkbox"/> On Card C (A2)			
<input type="checkbox"/> Accident or injury (A2)	<input type="checkbox"/> Neither (3d)			
If "Doctor not talked to," transcribe entry from item 1.				
If "Doctor talked to," ask				
3a. What did the doctor say it was? - Did he give it a medical name?				
<div style="display: flex; justify-content: space-between;"> Do not ask for Cancer <input type="checkbox"/> On Card C (A2) </div>				
b. What was the cause of ...?				
<input type="checkbox"/> Accident or injury (A2)				
If the entry in 3a or 3b includes the words:				
Ailment	Condition	Disorder	Trouble	<div style="display: flex; align-items: center;"> <div style="font-size: 3em; margin-right: 10px;">}</div> Ask c. </div>
Anemia	Cyst	Growth	Tumor	
Asthma	Defect	Measles	Ulcer	
Attack	Disease	Rupture		
c. What kind of ... is it?				
For allergy or stroke, ask				
d. How does the allergy (stroke) effect him?				
If in 3a-d there is an impairment or any of the following entries.				
Abscess	Damage	Paralysis	<div style="display: flex; align-items: center;"> <div style="font-size: 3em; margin-right: 10px;">}</div> Ask e. </div>	
Ache (except head or ear)	Growth	Rupture		
Bleeding	Hemorrhage	Sore		
Blood clot	Infection	Swollen		
Boil	Inflammation	Ulcer		
Cancer	Neuralgia	Varicose veins		
Cramps (except menstrual)	Nouritis	Weak		
Cyst	Pain	Weakness		
	Palsy			
e. What part of the body is affected?				
Show the following detail.				
Head	skull, scalp, face			
Back/spine/vertebrae	upper, middle, lower			
Ear or eye	one or both			
Arm	one or both; shoulder, upper, elbow, lower, wrist, hand			
Leg	one or both; hip, upper, knee, lower, ankle, foot			

Ask remaining questions as appropriate for the condition entered in:

1 <input type="checkbox"/> Item 1	3 <input type="checkbox"/> Q. 3b	5 <input type="checkbox"/> Q. 3d
2 <input type="checkbox"/> Q. 3a	4 <input type="checkbox"/> Q. 3c	6 <input type="checkbox"/> Q. 3e

4. During the past 2 weeks, did his ... cause him to cut down on the things he usually does?		1 Y	2 N (9)
5. During that period, how many days did he cut down for as much as a day?		___ Days 30 None (9)	
6. During that 2-week period, how many days did his ... keep him in bed all or most of the day?		___ Days 30 None	
Ask if 17+ years		___ Days (9)	
7. How many days did his ... keep him from work during that 2-week period? (For females) not counting work around the house?		___ Days (9) 30 None (9)	
Ask if 6-16 years		___ Days	
8. How many days did his ... keep him from school during that 2-week period?		___ Days 30 None	
9. When did -- first notice his ...?			
1 ___ Last week	4 ___ 2 weeks-3 months		
2 ___ Week before	5 ___ Over 3-12 months		
3 ___ Past 2 weeks-OK which	6 ___ More than 12 months ago		
(Was it during the past 12 months or before that time?)			
(Was it during the past 3 months or before that time?)			
(Was it during the past 2 weeks or before that time?)

 3 ☐ Condition in C2 has a letter as source, Doctor seen (11)
 4 ☐ Condition in C2 has a letter as source, Doctor not seen (15)

11a. Does -- NOW take any medicine or treatment for his ...? 1 Y 2 N (12)

b. Was any of this medicine or treatment recommended by a doctor? 1 Y 2 N

12. Has he ever had surgery for this condition? 1 Y 2 N

13. Was he ever hospitalized for this condition? 1 Y 2 N

14. During the past 12 months, about how many times has -- seen or talked to a doctor about his ...? ____ Times
 (Do not count visits while a patient in a hospital.) 000 ☐ None

15a. About how many days during the past 12 months has this condition kept him in bed all or most of the day? ____ Days
 000 ☐ None

Ask if 17+ years:

b. About how many days during the past 12 months has this condition kept him from work? ____ Days
 For females: Not counting work around the house? 000 ☐ None

16a. How often does his ... bother him - all of the time, often, once in a while, or never?
 1 ☐ All the time 2 ☐ Often 3 ☐ Once in a while
 4 ☐ Never (16c) 5 ☐ Other - Specify _____

b. When it does bother him, is he bothered a great deal, some, or very little?
 1 ☐ Great deal 2 ☐ Some 3 ☐ Very little
 4 ☐ Other - Specify _____

☐ All the time in 16a OR condition list 4 asked (A4)

c. Does -- still have this condition?
 1 Y (A4) 2 N

d. Is this condition completely cured or is it under control?
 2 ☐ Cured 3 ☐ Under control (A4)
 4 ☐ Other - Specify _____ (A4)

e. About how long did -- have this condition before it was cured?
 0 ☐ Less than one month ____ Months ____ Years

A4 ☐ Accident or injury ☐ Other (NC)

17a. Did the accident happen during the past 2 years or before that time?
☐ During the past 2 years ☐ Before 2 years (18a)

b. When did the accident happen?
☐ Last week ☐ Over 3-12 months
☐ Week before ☐ 1-2 years
☐ 2 weeks-3 months

18a. At the time of the accident what part of the body was hurt?
 What kind of injury was it? Anything else?

Part(s) of body	Kind of injury

If accident happened more than 3 months ago, ask

b. What part of the body is affected now?
 How is his -- affected? Is he affected in any other way?

Part(s) of body	Present effects

19. Where did the accident happen?
 1 ☐ At home (inside house)
 2 ☐ At home (adjacent premises)
 3 ☐ Street and highway (includes roadway and public sidewalk)
 4 ☐ Farm
 5 ☐ Industrial place (includes premises)
 6 ☐ School (includes premises)
 7 ☐ Place of recreation and sports, except at school
 8 ☐ Other - Specify _____

20. Was -- at work at his job or business when the accident happened?
 1 Y 2 N (NC)
 3 ☐ While in Armed Services
 4 ☐ Under 17 at time of accident

21a. Was a car, truck, bus, or other motor vehicle involved in the accident in any way? 1 Y 2 N (NC)

b. Was more than one vehicle involved? Y N

c. Was it (either one) moving at the time? 1 Y 2 N

CONDITION 6

1. Person number	Name of condition	
2. When did -- last see or talk to a doctor about his ...?		
1 <input type="checkbox"/> In interview	2 <input type="checkbox"/> Past 2 wks. (Item C)	3 <input type="checkbox"/> 2-4 yrs.
4 <input type="checkbox"/> week (Reask 2)	5 <input type="checkbox"/> 2 wks.-6 mos.	6 <input type="checkbox"/> 5+ yrs.

If Doctor not talked to, transcribe entry from item 1		
If Doctor talked to, ask		
3a. What did the doctor say it was? - Did he give it a medical name?		
Do not ask for Cancer <input type="checkbox"/> On Card C (A2)		
b. What was the cause of ...?		
<input type="checkbox"/> Accident or injury (A2)		
If the entry in 3a or 3b includes the words		
Arteriosclerosis	Condition	Disorder
Anemia	Cyst	Growth
Asthma	Defect	Masses
Attack	Disease	Rupture
c. What kind of ... is it?		
For allergy or stroke, ask		
d. How does the allergy (stroke) affect him?		
If in 3a-d there is an impairment or any of the following entries		
Abscess	Damage	Paralysis
Ache (except head or ear)	Growth	Rupture
Bleeding	Hemorrhage	Sore
Blood clot	Infection	Soreness
Bail	Inflammation	Tumor
Cancer	Malignant	Ulcer
Cramps (except nonmuscular)	Numbness	Vascular veins
Cyst	Pain	Weak
	Palsy	Weakness
e. What part of the body is affected?		
Show the following detail		
Head	skull, scalp, face	
Back/neck/vertebrae	upper, middle, lower	
Ear or eye	one or both	
Arm	one or both shoulder, upper elbow, lower, wrist, hand	
Leg	one or both hip, upper, knee, lower, ankle, foot	

A2	Ask remaining questions as appropriate for the condition entered in 1.	
	1 <input type="checkbox"/> Item 1	2 <input type="checkbox"/> Q. 3b
	3 <input type="checkbox"/> Q. 3a	4 <input type="checkbox"/> Q. 3c
	5 <input type="checkbox"/> Q. 3d	6 <input type="checkbox"/> Q. 3e
4. During the past 2 weeks, did his ... cause him to cut down on the things he usually does?		
5. During that period, how many days did he cut down for as much as a day?		
6. During that 2-week period, how many days did his ... keep him in bed all or most of the day?		
Ask if 12+ years		
7. How many days did his ... keep him from work during that 2-week period? For families, not counting work around the house?		
Ask if 6-12 months		
8. How many days did his ... keep him from school during that 2-week period?		
9. When did -- first notice his ...?		
1. Last week		
2. Week before		
3. Past 2 weeks--OK which		
4. 2 weeks-3 months		
5. Over 3-12 months		
6. More than 12 months ago		
(Was it during the past 12 months or before that time?)		
(Was it during the past 3 months or before that time?)		
(Was it during the past 2 weeks or before that time?)		
A3	1 <input type="checkbox"/> Not an eye cond. (AA1)	
	2 <input type="checkbox"/> First eye cond. (under 6) (AA1)	3 <input type="checkbox"/> First eye cond. (6+ yrs.) (10)
		4 <input type="checkbox"/> Not first eye cond. (AA1)
10. Can -- see well enough to read ordinary newspaper print WITH GLASSES with his

APPENDIX B

HEALTH INTERVIEW SURVEY DATA DOCUMENTATION

Following is a cross-referencing of all the independent variables used in the present study. The cross-reference scheme works as follows. In the entries below marked "P xx-yy," "C xx-yy," "S xx-yy," or "HH xx-yy," the user is referred to the HIS public use data tape documentation for the person, condition, smoking, and household files, respectively. These documentations follow the variable listing below. The xx-yy refer to entries in the columns headed "tape location." Next to each of these entries in the tape location column is found the item number reference. These item numbers refer to question numbers on the actual HIS survey instrument, a facsimile of which is found below. One will note that some variables definitions are descriptive, e.g. "sex dummy"; typically, these are variables in the datasets that are derivatives or summaries of other HIS variables.

The assignment of an individual's condition vector was accomplished as follows. First, it was determined what individual or individuals in the sample had reported the largest number of conditions. It turns out that this number is fourteen. Then, space was allocated in the dataset such that each individual would have a condition vector numbering fourteen elements, although for the majority of individuals no conditions were reported, and for those that reported conditions,

one condition was the modal response. The references to individuals' data in the condition file of the HIS will be to the general descriptors of the conditions (e.g., chronic or acute, diagnostic recodes, onsets, etc.), subscripted by the condition sequence, with the subscript ranging over 1,2,...,14. So, for example, DGRCD101 refers to diagnostic recode number one for the condition in element one of the condition vector, DGRCD102 refers to diagnostic recode number one for the condition in element two of the condition vector, and so forth. The position of any given condition within an individual's condition vector is of no significance.

Some entries in the variable list below are marked "pollution appendix," "weather appendix," or "pollen appendix." For definition of these variables, see the respective sections following the HIS tape documentation. For the sake of parsimony, only representative pollution variables were included in the list below. A full description of all available pollution measures is included in the pollution description below.

APPENDIX A

CODES FOR TYPES OF SPECIAL DWELLING PLACES

I. Specified Institutions

CODES

TYPES

Correctional Institutions

- 11 State and Federal penitentiaries, prisons, and reformatories
- 11 State and Federal prison farms and camps
- 11 County and City jails, workhouses, penitentiaries
- 11 County and City prison farms and camps
- 11 Federal detention headquarters
- 12 State and Federal training or industrial schools
- 12 County and municipal training or industrial schools
- 12 Private schools for delinquents, such as "House of the Good Shepherd"
"Boys Town," etc.

Mental Institutions

- 21 Homes and training schools for mental defectives
- 21 Homes, training schools, colonies, and villages for epileptics
- 21 State, Federal, County, and City hospitals for mental diseases
- 21 Private hospitals and sanitariums for mental disease
- 22 Hospitals for the treatment of alcoholics and drug addicts
- 23 Veterans Administration mental hospitals

Homes for the Aged, Infirm, and Needy

- 31 Orphan Asylums
- 31 Children's homes
- 32 County homes, almshouses, poor farms, etc.
- 33 Fraternal or religious homes for the aged
- 34 Commercial boarding house for the aged
- 35 Homes and schools for the blind
- 36 Homes and schools for the deaf
- 37 Hospital or resident schools, orthopedic hospitals, and homes for
the crippled
- 38 Soldiers' and sailors' homes
- 39 Veterans Administration homes (domiciliary care)
- 40 Nursing, Convalescent and Rest Homes

Other Hospitals and Homes Providing Specialized Care

- 51 Tuberculosis sanitariums
- 52 Veterans Administration tuberculosis hospitals
- 53 Homes for incurables
- 54 Chronic and Cancer hospitals
- 55 Maternity homes for unmarried mothers
- 56 Detention and receiving homes

II. Other Special Dwelling Places

- 61 Veterans Administration General, Medical and Surgical Hospital
- 62 Facilities for the Treatment of the Physically Ill

This type of facility treats physical disorders and is one in which the patient stays for a relatively short period of time. Examples of this type of special dwelling place are:

1. General or emergency hospitals; children's hospital; maternity hospital
2. Infirmary

- 71 Hotels, Transient-type
- 72 YMCA, Transient-type
- 73 YWCA, Transient-type
- 74 YMHA, Transient-type
- 75 Private residential clubs } Those that meet the special dwelling
- 76 Tourist homes } place definition
- 77 Motel, Transient-type
- 78 Tourist camp or court, Transient-type
- 79 Groups of 5 or more vacation cabins under single management, Transient-type
- 80 Combinations tourist-trailer court, Transient-type

Facilities for Housing Students

- 81 School Dormitory
- 82 Fraternity
- 83 Sorority
- 84 Schools with resident students (other than for the needy or infirm and other than resident schools with separate codes 93 and 94 -- see below)
- 93 Schools with resident students and with predominantly non-salaried faculty such as nuns or priests
- 94 Schools with resident students and operated primarily for religious training (other than those with predominantly non-salaried faculty such as Bible Institutes)

Facilities for Housing Workers

- (85 Dormitory for workers
86 Bunkhouse (provided that it has or is expected to have quarters
for 5 or more farm or ranch hands)
87 Labor Camp
88 Logging Camp
89 Migratory workers' camp

Additional Other Places

- 91 Convents
92 Monasteries
93)
94 } See Facilities for Housing Students
00 Nurses' Homes
01 Flophouses
02 Missions
03 Recreational and Religious Camps (Adults or Family)
04 Recreational and Religious Camps (Children's)
(05 Trailer Camps
06 Tent Camps
07 Armed Forces Installations
08 Armed Forces Hospitals
09 Non-transient Hotel (when instructed to treat as a special dwelling
place)

14	Not in labor force	90

CONDITIONS

CONDITION FILE INCLUSIONS

The Condition File is comprised of the following types of records:

1. Acute condition records (location 103=2).
2. Chronic condition records where the condition is reported to be the main or secondary cause of activity limitation (location 103=1 and location 129=1 or 2).
3. Chronic condition records (location 103=1) with locations 105-108 coded to the check list of conditions for each body system: digestive; skin and musculoskeletal; genitourinary, etc.; circulatory; and respiratory.

For 1979, the total sample was divided into six sub-samples. Each of these sub-samples were administered a check list of broad categories of chronic conditions, including impairments.

The condition list assigned and asked is indicated in tape location 177:

- 1 ... Digestive
- 2 ... Skin and Musculoskeletal
- 3 ... Miscellaneous (includes conditions of the genitourinary, nervous, endocrine, metabolic, and blood and blood-forming systems and other selected chronic conditions).
- 4 ... Impairments
- 5 ... Circulatory
- 6 ... Respiratory
- 7 ... Unknown

To obtain the weighted prevalence for a particular system:

- a. Control on the code in location 177 for the system.
- b. Divide the factor in locations 411-420 by 1,000,000 (to adjust for the implied decimal) and multiply the result by the weight in locations 219-227.
- c. Sum the results of b.

Prevalence of specific conditions within the check lists can be obtained by using the ICD codes (location 105-108) or a combination of Recode 1 codes (location 109-111) and the ICD codes. There are at least two situations where the same conditions appear on two separate lists. For example, selected impairments appear in both 177:2 and 177:4 and diabetes appears in 177:1 and 177:3.

To obtain the prevalence of diabetes using both condition lists:

- a. Control on the list codes in location 177 (177:1 and 177:3) and location 109-111:090.
- b. Divide the factor in locations 411-420 by 2,000,000 (to adjust for the implied decimal) and multiply the result by the weight in locations 219-227.
- c. Sum the results of b.

HIS - 1979 COMPUTER PROCESSING

Description of Class of Accident Code

The three-digit Class of Accident Code described in detail below classifies accidents as follows:

Total Motor Vehicle Accidents = Codes 1 and 2 in first digit of recode

Moving Motor Vehicle

Accidents = Code 1 in first digit of recode

Nonmoving Motor Vehicle

Accidents = Code 2 in first digit of recode

Total Work Accidents = Code 1 in second digit of recode

Total Home Accidents = Code 1 in third digit of recode

Class of Accident
Recode

Loc. 169-171

Description

111	Moving motor vehicle - at work - at home
112	Moving motor vehicle - at work - not at home - street or highway
113	Moving motor vehicle - at work - not at home - not on street or highway
121	Moving motor vehicle - not at work - at home - not on street or highway
122	Moving motor vehicle - not at work - not at home - on street or highway
123	Moving motor vehicle - not at work - not at home - not on street or highway
211	Nonmoving motor vehicle - at work - at home
212	Nonmoving motor vehicle - at work - not at home
221	Nonmoving motor vehicle - not at work - at home

Attachment to Final Condition Record--Cont'd.

Class of Accident
Recode
Loc. 169-171

Description

222	Nonmoving motor vehicle - not at work - not at home
311	Nonmotor vehicle - at work - at home
312	Nonmotor vehicle - at work - not at home
321	Nonmotor vehicle - not at work - at home
322	Nonmotor vehicle - not at work - not at home
400	Injured in Armed Forces
500	Therapeutic misadventure
600	Injury Condition - No Table A

DIAGNOSTIC RECODES

October, 1980

National Health Interview Survey

Diagnostic Recode #1*
Diseases, Injuries, and Impairments

- I. Purpose: Recode #1 is a list of 278 categories of diseases and injuries selected from the complete list of 3 and 4-digit categories of the International Classification of Diseases, (ICD), 9th Revision, as modified for survey purposes. In addition, a complete list of types and sites of impairments completes the recode. The recode has been used as a device to simplify tabulating of diagnostic information. In general this recode contains the greatest amount of detail tabulated; very rarely are the 4-digit ICD rubrics used for final tabulation purposes.
- II. Content: Each line of the recode contains the following elements: recode number, title summarizing the contents, and the equivalent rubric numbers from the ICD. The full detail of all modifications of the ICD is shown in the Medical Coding Manual. A summary listing of modifications which directly affect the use of the recode is shown as follows:
 - a. The letter "A" following a rubric means that this is a special number devised for survey purposes which is not to be found in the ICD.
 - b. Certain ICD rubrics are not used in the survey medical coding and, therefore are not shown in Recode #1. Impairments and their causes, as reported by the household members, are coded directly to the X-codes according to a system that differs considerably from the ICD method. A complete description of the Classification of Impairments (X-code) is given in the Medical Coding Manual.
 - c. The abbreviations "NOS" and "NEC", represent, respectively, "not otherwise specified", and "not elsewhere classified."

* For use in processing the 1979 NHIS condition diagnosis.

277	Other complications of medical care (acute) (chronic)	323.5, 995.0, 999
278	Injuries, 3 months+, NEC, no residual specified	906.0-4, 908

IMPAIRMENTS: RECODE 1

X-CODE NUMBER	TITLE
	All impairments (X00-X99). For additional 1-digit codes expressing etiology of impairments, see Appendix I, Medical Coding Manual.
	<u>BLINDNESS AND IMPAIRMENT OF VISION (X00-X04)</u>
X00	Serious Visual Impairment
X01	Other Visual Impairment involving both eyes
X02	Blindness or Visual Impairment of any degree involving only one eye
X04	Impaired Vision except as in X00-X02
	<u>DEAFNESS AND IMPAIRMENT OF HEARING (X05-X09)</u>
X05	Deafness, both ears Includes persons who have no useful hearing in both ears, or can't hear, both ears.
X06	Other hearing impairment involving both ears Any bilateral hearing impairment which cannot be coded to X05.
X07	Deafness or hearing impairment of any degree involving only <u>one ear</u> .
X08	Deafness, NOS Unknown whether one or both ears are involved.
X09	Impaired hearing, NOS Unknown whether one or both ears are involved.
	<u>IMPAIRMENT OF SPEECH, SPECIAL SENSE AND INTELLIGENCE (X10-X19)</u>
X10	Stammering and Stuttering
X11	Other speech defects
X12	Loss or impairment of sensation Includes taste, smell and loss or disturbances of sensation (burning) and numbness of any body parts.
X14	Special learning disability (reading) (mathematics) ("mirror writing or reading").
X19	Mental retardation: Any degree or any type, including "mongolism." ("Down's (Downes) Syndrome")

X-CODE NUMBER	TITLE
	<u>ABSENCE, LOSS, EXTREMITIES, AND CERTAIN OTHER SITES (X20-X35)</u>
X20	Arms, both
X21	Hands, both
X22	One or more fingers (excludes tip only-below first joint) (thumb(s)) of both hands
X23	Arm, one
X24	Hand, one
X25	One or more fingers, (excludes tip only-below first joint), thumb, of only one hand.
X26	Legs both
X27	Feet or toes (excludes tip only-below first joint) only both
X28	Leg, one
X29	Foot or toes (excludes tip only-below first joint) only, one
X30	Absence, Lung
X31	Absence, Kidney
X32	Absence, Breast
X33	Absence of rib, bone, joint, or muscle of trunk, one or more
X34	Absence of bone, joint, or muscle of extremity without loss of extremity, one or more
X35	Tips of fingers or toes (below first joint) only

X-CODE NUMBER	TITLE
	<u>PARALYSIS, COMPLETE OR PARTIAL, ALL SITES EXCEPT AS IN X00-X19 (X40-X64)</u>
	<u>Paralysis NOS (COMPLETE) of Extremities</u>
X40	Entire body or four limbs
X41	One side of body only, including limbs; or "hemiplegia."
X42	Arms, both
X43	Arm, one
X44	Hands, both, and/or finger(s) (thumb) on one or both hands only.
X45	Hand, one, and/or finger(s) (thumb) on one hand, only.
X46	Legs, both; or "paraplegia."
X47	Leg, one
X48	Feet, both, and/or toe(s) on one or both feet, only.
X49	Foot, one, and/or toe(s) on one foot, only.

X-CODE NUMBER	TITLE
	<u>CEREBRAL PALSY AND PARALYSIS PARTIAL OF EXTREMITIES</u>
X50	Cerebral palsy
X51	Partial paralysis, one side of body only, including limbs; or "hemiparesis."
X52	Partial paralysis, arm, both
X53	Partial paralysis, arm, one
X54	Partial paralysis, hands, both, and/or finger(s) (thumb) on one or both hands only.
X55	Partial paralysis, hand, one, and/or finger(s) (thumb) on one hand only.
X56	Partial paralysis, legs, both; or "paraparesis."
X57	Partial paralysis, leg, one
X58	Partial paralysis, feet, both, and/or toe(s) on one or both feet, only.
X59	Partial paralysis, foot, one, and/or toe(s) on one foot, only.
	<u>PARALYSIS, COMPLETE OR PARTIAL, SITES EXCEPT EXTREMITIES</u>
X60	Trunk, any part except parts included in X40, X41, X51
X61	Face (Bell's palsy or paralysis)
X62	Bladder or anal sphincter
X63	Paralysis, complete or partial, sites NOT of extremities, trunk, nor affecting special senses or speech
X64	Paralysis, complete or partial, NEC

X-CODE NUMBER	TITLE
<u>SPECIFIED DEFORMITY OF LIMBS, TRUNK, BACK (X70-X79)</u>	
X70	Curvature and other structural deformities of spine or back, except as in X71.9
X71.9	Spina bifida (with meningocele) (always congenital)
X73	Deformity of shoulder or upper extremity, NEC
X74	Deformity of hand(s), finger(s), thumb(s), only
X75	Dislocation, congenital, and other deformity <u>hip</u> and/or pelvis
X76	Deformity of any site on lower extremity, one or both, NEC
X77	Flatfoot (including weak, fallen or other difficulty with arches)
X78	Clubfoot
X79	Deformity, neck, trunk bones, NEC
<u>NON-PARALYTIC ORTHOPEDIC IMPAIRMENT (CHRONIC), NEC (80-X89)</u>	
X80	Back, any part (includes neck)
X84	Shoulder(s) and/or upper extremity(ies)
X85	Hip and/or pelvis
X86	Lower extremity
X89	Other and ill-defined sites

X-CODE NUMBER	TITLE
	<u>DEFECT, ABNORMALITY, SPECIAL IMPAIRMENT, NEC (X90-X99)</u>
X90	Disfigurement, scarring, face, nose, lips, ears
X91.9	Cleft palate and harelip (with speech defect)
X92	Other dentofacial handicap
X93	Deformity of skull (hydrocephaly) (microcephaly)
X94	Artificial orifice (opening) or valve (surgical) any site (colostomy)
X99	Special impairment, ill-defined

National Health Interview Survey

October 1980

Diagnostic Recode #2*
Acute Conditions

- I. Purpose: Recode #2 consists of 33 4-digit categories of frequently reported acute conditions. These acute condition categories have been selected from the more extensive diagnostic listing in Diagnostic Recode #1 following the definition of acute condition shown below.
- II. Arrangement of the Recode: The first two digits of the recode are to be used for subtotals for use in the annual Acute Conditions report. The first digit will be used to separate the data into the five major condition groups, and the second digit into subcategories of these five. The third and fourth digits are the basic units of the recode.
- III. Definition of Acute Condition: For the purposes of the National Health Interview Survey an acute condition is any disease or injury with onset in the 3-month reference period prior to the week of interview, exclusive of certain conditions always classified as chronic regardless of date of onset. The incidence of acute conditions is limited to acute conditions with onset in the 2-week reference period prior to the interview week. Acute conditions also include current deliveries, normal or complicated, and current complications of pregnancy and the puerperium. Acute conditions must have had either activity restriction or medical attention in order to be included in the survey statistics.

Acute conditions, as defined, are given a supplementary 1-digit code number identifying them as acute, and are sorted for tabulation under Recode #2 categories on this basis. Also, the incidence of acute conditions is tabulated under Recodes #1 and #2 only for those conditions with onset in the 2-week period prior to interview.
- IV. Content: Each line of the recode contains the following elements: Recode #2 number, title summarizing the contents of the category, Recode #1 inclusions, and rubric numbers from the International Classification of Diseases (ICD), 9th Revision.

A summary listing of modifications which affect the use of the recode is shown as follows:

- (a) The letter "A" following an ICD rubric means that this is a special number devised for survey purposes which is not to be found in the ICD.
- (b) Abbreviations "NOS," and "NEC," represent respectively, "not otherwise specified," and "not elsewhere classified."

*For use in processing the 1979 NHIS condition diagnosis.

NATIONAL HEALTH INTERVIEW SURVEY

October 1980

Diagnostic Recode #3*
Chronic Conditions and Impairments

- I. Purpose: Recode #3 consists of 53 2-digit categories of chronic conditions and impairments. These categories have been selected from the more extensive diagnostic listing in Diagnostic Recode #1 following definitions shown below.
- II. Definition of Chronic Condition and Impairment: For the purposes of the National Health Interview Survey a chronic condition and an impairment are any departures from normal health with onset more than 3 months from date of interview, except certain complications of pregnancy (630-676) which are always classified acute. Also included are certain chronic conditions and impairments which are classified as chronic regardless of the date of onset. All chronic conditions are counted in the survey whether or not they have necessitated activity restriction or medical care. All impairments coded with "X" in the first digit are, by definition, chronic.

Chronic conditions and impairments, as defined, are given a supplementary 1-digit code number identifying them as chronic and are sorted for tabulation under Recode #3 categories on this basis.

- III. Content: Each line of the recode contains the following elements: Recode #3 number, title summarizing the contents of the category, Recode #1 inclusions, and rubric numbers from the International Classification of Diseases (ICD). Since the impairment categories are coded according to the Classification of Impairments (X-code) instead of the ICD method, no corresponding ICD rubric numbers are shown in the last column for these categories. See Diagnostic Recode #1 for a listing of the X-codes.

A summary listing of modifications which affect the use of the recode is shown as follows:

- (a) The letter "A" following an ICD rubric number means that this is a special number devised for survey purposes which is not to be found in the ICD.
- (b) Abbreviations "NOS" and "NEC," represent respectively, "not otherwise specified," and "not elsewhere classified."

* For use in processing the 1979 NHIS condition diagnosis.

National Health Interview Survey

Diagnostic Recode #4*
Hospital Diagnosis

- I. Purpose: Recode #4 is a list of 38 categories of diseases, injuries, and impairments selected from Recode #1. It is designed for use in tabulating the diagnosis reported for each hospitalization.
- II. Contents: Each line of the recode contains the following elements:
 - (a) The letter "A" following a rubric means that this is a special number devised for survey purposes which is not found in the ICD.
 - (b) ICD rubrics for impairments and most of the late effects of diseases are not used in the survey medical coding and, therefore are not shown in Recode #1. Impairments and their causes, as reported by the household members, are coded directly to the X-codes according to a system that differs considerably from the ICD method. A complete listing of the Classification of Impairments (X-code) is given in the Appendix I of the Medical Coding Manual.
 - (d) The abbreviations "NOS" and "NEC" represent, respectively, "not otherwise specified" and "not elsewhere classified."

* For use in processing the 1979 NHIS condition diagnosis.

APPENDIX C

VALUING THE BENEFITS OF IMPROVED HUMAN HEALTH

Winston Harrington and Paul R. Portney

Many of the federal regulatory agencies created since the mid-1960s have as one goal the protection and/or enhancement of human health. These include the Environmental Protection Agency (EPA), the Occupational Safety and Health Administration (OSHA), the National Highway Transportation Safety Administration (NHTSA), the Consumer Product Safety Commission (CPSC) and the Mine Enforcement and Safety Administration (MESA). Health protection is also an important goal of other, older regulatory agencies, the Food and Drug Administration (FDA) being the most notable example. Therefore, in an era when all federal regulatory activity is to be subjected to close analytical scrutiny, if not full-blown benefit-cost analysis, it is important to have accurate, conceptually correct measures of any human health benefits that result from these regulatory programs.

Unfortunately, this is no simple task. Not only is it often quite difficult to map regulatory policy into physical improvements in health (less sickness, fewer accidents, etc.), but it is equally difficult to translate changes in health status into appropriate dollar valuations. This is perhaps most difficult when the policy outputs are "lives saved," or -- more correctly -- lives prolonged, but difficulties arise even when health benefits take the form of reductions in acute or chronic illness unrelated to premature mortality.

A number of methods have been used to value either sure prospects for reduced morbidity (from sickness or injury) or a reduced likelihood of its occurrence. For instance, Loehman et al. [1979] employed a contingent valua-

tion approach and surveyed individuals directly about their willingness to pay for a reduced incidence of coughing, congestion, and other physical ailments. Alternatively, others have examined the markets for labor (Thaler and Rosen [1976], Smith [1979], Viscusi [1978]), housing (Portney [1981]), and safety devices (Blomquist [1979], Dardis [1980]) for indirect or revealed evidence on the value which individuals attach to reduced morbidity or increased longevity. By and large, however, the most common approach to the valuation of morbidity has involved one of two methods: (i) the imputation of more or less ad hoc values to days of sickness or injury (Freeman [1982], Ostro [1981]); or, more frequently, (ii) a "cost of illness" (COI) approach designed to reflect both the direct, out-of-pocket expenses arising from illness or injury (e.g., medicines and doctor and hospital charges), as well as any resulting opportunity costs incurred, foregone earnings being the most obvious example (Cooper and Rice [1976], Lave and Seskin [1977, especially p. 225]).

In spite of its wide popularity and intuitive appeal, the COI approach is not without problems. First, it ignores the "defensive" expenditures that individuals can and do make to influence their health status (Grossman [1972], Cropper [1981], and Crocker et al. [1979]). If individuals fully protected themselves against environmental or occupational insults, say, a regulation-induced reduction in such insults might not lead to any observed health improvement, but would be beneficial nonetheless by virtue of reducing the need for defensive expenditures.¹ Second, the COI approach ignores the possibly considerable direct disutility of sickness or injury, a cost unrelated to direct or indirect financial losses. This, too, should figure in any theoretically grounded measure of the benefits arising from the protection of human health.

It is our purpose in this paper to derive such a measure and contrast it to the commonly used COI approach. In the first section of this paper, we present a simple model of constrained utility maximization in which illness or injury not only reduces the time which can be devoted to labor or leisure and induces certain remedial medical expenditures, but also has disutility of its own. In this model, individuals can make defensive expenditures to lessen their chances of illness or injury, thus influencing directly their actual health status. As one might expect in such a model, expenditures on defensive goods will be shown to depend both upon the direct and indirect costs of illness as well as upon the disutility it imparts. Following that, we recast the individual's decision-making problem in terms of the indirect utility function. This enables us to derive directly the conceptually correct measure of the benefits of reductions in the health threats that individuals face. We also discuss the practical difficulties that arise in attempts to estimate empirically this measure. In section III we find that, under plausible conditions, the "true" benefit measure is consistently greater than that resulting from the COI approach. This conclusion holds under a number of extensions to our simple model presented in section IV.

I. The Basic Model

Consider an individual with a utility function of the form:

$$(1) \quad U = U(X, L, S)$$

where X represents expenditures on nonhealth-related goods,² L is leisure time per period, and S is time spent ill per period ($U_X, U_L > 0$; $U_S < 0$). Time spent sick depends upon some environmental threat (broadly defined) which could take

the form of air pollution, exposure to a harmful substance in the workplace or in a foodstuff or other consumer product, or other hazard.³ For simplicity we will refer to all such threats as pollution, P , although the broader applicability of our findings should be borne in mind. Sickness also depends upon preventive defensive expenditures, D , which can shorten the duration of any sickness which does occur. Thus,

$$(2) \quad S = S(D, P)$$

where $S_D < 0$ and $S_P > 0$. In turn, medical expenses, M , are assumed to depend on the duration of sickness, or

$$(3) \quad M = M(S(D, P)) \quad , \quad \text{with } M'(S) > 0.$$

The individual is assumed to receive per-period nonwage income I (from capital or transfer payments) and to work for wage rate w .

The individual's decision problem can then be expressed as:

$$(4) \quad \max_{X, L, D} A = U(X, L, S) - \lambda [I + wT - wL - wS(D, P) - X - D - M(S(D, P))] \\ - \mu [T - L - S(D, P)]$$

where T is total time available per period. The bracketed expression multiplying λ is the "full income" constraint as introduced by Becker [1971]. The second constraint merely ensures that the sum of leisure time and time spent ill does not exceed the total time available. The first order conditions are:

$$(5) \quad \Lambda_X = U_X - \lambda = 0$$

$$(6) \quad \Lambda_L = U_L - w\lambda - \mu = 0$$

$$(7) \quad \Lambda_D = U_S S_D - w\lambda S_D - \lambda - \lambda M'(S) S_D - \mu S_D = 0$$

$$(8) \quad \Lambda_\lambda = I + wT - wL - wS(D, P) - X - D - M(S) = 0$$

$$(9) \quad \Lambda_\mu = T - L - S \geq 0; \quad \mu(T - L - S) = 0.$$

For the balance of this paper, we will assume that all individuals work some positive number of hours per period. Thus, from (9) it is the case that $\mu = 0$. It follows, then, that conditions (5) and (6) represent the familiar trade-off between labor and leisure (since we treat X as total expenditures on other goods, its price is unity).

Equation (7) can be rewritten to shed some light on defensive expenditures by individuals. Specifically we can see that:

$$(10) \quad \frac{U_S S_D}{\lambda} - wS_D - M'(S) S_D = 1.$$

The interpretation of expression (10) is straightforward. It indicates that, at the margin, a dollar's worth of defensive expenditure is comprised of three parts: these are, in order, the dollar value of disutility arising from

additional sick time ($\frac{U_S S_D}{\lambda}$), the opportunity cost of illness valued at the wage rate ($-wS_D$), and the out-of-pocket expenses caused by increased illness ($-M'(S)S_D$).

II. Willingness to Pay: Theory and Estimation

Having introduced this simple model, we can turn to the valuation of health benefits arising from a reduction in pollution. To do so we employ the indirect utility function (see Courant and Porter [1981], Just, Hueth and Schmitz [1982]). The optimal values for the choice variables X , L and D clearly depend upon the wage rate w , nonwage income I , and air pollution P . The indirect utility function, V , gives the maximum utility obtainable for a given set of parameter values.

$$(11) \quad V = V(I, P, w) = U(X, L, S(D, P)) + \lambda [I + wT - wL - wS(D, P) - X - D - M(S(D, P))] + \mu [T - L - S(D, P)]$$

where X , L , D , λ and μ are functions of the parameters I , P and w .

Suppose nonwage income I and the wage rate w are fixed. If the pollution level changes, say from P_0 to P_1 , utility will also change from V_0 to V_1 , where

$$(12) \quad V_0 = V(I, P_0, w) \quad \text{and} \quad V_1 = V(I, P_1, w).$$

If $P_0 < P_1$, then $V_0 > V_1$. For fixed wages, the only way to keep an individual indifferent to a change in pollution is to change the nonwage income I . This is illustrated in Figure 1(a). When pollution increases from P_0 to P_1 with no

Figure 1(a)

Willingness to pay
to avoid increase
in pollution from
 P_0 to P_1 is $I_1 - I_0$

Figure 1(b)

Individual cannot
be compensated for
increase in
pollution

change in income, the individual drops from the indifference curve $V = V_0$ to $V = V_1$. To leave the individual indifferent to the change in pollution, I must be increased from I_0 to I_1 . The amount $I_1 - I_0$ is, by definition, the (negative) benefit to the individual of the change in air quality. Note that it is not always possible to keep the individual on the same indifference curve. In the case illustrated in Figure 1(b), there is no change in income that compensates the individual for an increase in pollution from P_0 to P_1 . This possibility can arise only for increases in pollution. The change in income associated with a decrease in pollution is always defined. In any event, we are primarily interested in small changes for which this possibility is unlikely to arise; hence, it is ignored in what follows.

As suggested by Figure 1, holding V constant while P varies defines I implicitly as a function of P , which we denote as $I^*(P)$. Thus, $V(I^*(P), P) = V_0$.⁴ The total derivative of V with respect to P is then

$$(13) \quad \frac{dV}{dP} = V_I \frac{dI^*(P)}{dP} + V_P = 0, \quad \text{or} \quad \frac{dI^*(P)}{dP} = - \frac{V_P}{V_I}.$$

$\frac{dI^*(P)}{dP}$ is the marginal willingness to pay (be compensated) for a marginal decrease (increase) in pollution P . Because V is set equal to V_0 , the initial level of utility, in (12), equation (13) gives the marginal compensating variation. Equivalent variation would be obtained if V had been set equal to V_1 .

The derivatives of V are quite simple to compute; because the first order conditions (5) - (9) hold, many terms drop out. In fact,

$$(14) \quad V_I = \lambda; \quad \text{and}$$

$$(15) \quad V_P = (U_S - \lambda w - M'(S))S_P.$$

But from (7), we know that $U_S - \lambda w - M'(S) = \lambda/S_D$, so that

$$(16) \quad V_P = \lambda \frac{S_P}{S_D} \quad \text{and}$$

$$(17) \quad \frac{dI^*(P)}{dP} = - \frac{V_P}{V_I} = - \frac{S_P}{S_D}.$$

At first glance it would appear that the expression (17) for marginal willingness to pay is independent of personal tastes and income and rather depends only on the technical characteristics of the sickness (or dose-response) function, S . Note, however, that since D is a choice variable for the individual, the ratio S_P/S_D is dependent upon the characteristics of the individual and the values of the parameters he or she faces. S_P/S_D would be independent of D only if $\partial(S_P/S_D)/\partial D = 0$. This condition would be met if S were linear, for example, but is not generally satisfied.

What are the prospects for empirical estimation of (17)? At first glance they may appear good since, in principle, both S_P and S_D should be observable from dose-response or health production functions, of which there are no shortage in the literature. However, even the best of these functions is based on data which are inadequate in key respects. These data usually include measures of individuals' personal and economic characteristics, the environmental

and meteorological conditions in the area in which they live and work, and, on occasion, an indication of the price and availability of medical care. But it almost never includes usable information about the behavioral adjustments, purchases, or other measures individuals take to protect themselves against environmental hazards.⁵ Thus, S_D is very difficult to observe.

Furthermore, consider the difficulty of estimating S_D even with a data base containing detailed information on consumer expenditures. A great many expenditures that we might wish to label "defensive" serve other purposes as well. Air conditioning filters the air, for example, but also cools it. Exercise helps maintain health capital but also provides enjoyment. One way to model this situation is to allow defensive expenditures to affect utility directly -- however, in such a model the true measure of benefits is no longer equal to $-S_D/S_D$ but also includes a derivative of the utility function. Thus, the hybrid nature of many defensive expenditures makes it difficult to obtain an unbiased benefit estimate.

Another problem arises from the suspicion that the extent of illness may influence the level of defensive expenditures, as well as vice versa. In principle, this problem could be handled using a simultaneous equations model, but this will be difficult to do in practice. Typically, epidemiological studies only explain a small fraction of the total variation in illness; Ostro [1981], for example, reported R-squares of about .02. Such poor fits suggest that a number of important variables have been omitted. To use the results of such studies for dose-response functions requires one to assume, somewhat uneasily, that the unobserved and omitted variables are orthogonal to those included in the estimating equation. This assumption may not be valid in a simultaneous equation model because anything that affects S will also affect D . If both sickness and defensive expenditures depend in part on an unobserved

variable (an individual's genetic predisposition to illness, for example), cross-section estimates of S_D will be biased. That is, those genetically predisposed toward more illness may spend more to mitigate its effects, thus leading the unwary to conclude that defensive expenditures increase the duration of illness.

III. True Benefits and the Cost-of-Illness Approach

Let us now turn to a comparison between the conceptually correct measure of benefits given in (17) and that resulting from the COI approach to benefit estimation. Typically under the latter approach, a dose-response relationship is estimated in a cross-section epidemiological study, like those of Crocker [1979] or Ostro [1981]. This relationship is then used to predict the effect on health status of a change in pollution. Finally, increases or decreases in sick time are valued at the wage rate to reflect the opportunity cost of illness, and out-of-pocket medical costs are linked to sickness through a function like $M(S)$ in equation (3).

As we indicated above, virtually no cross-section epidemiological study has included data on defensive expenditures, although all such studies do include most or all of the other data we describe above. Since individuals do make defensive expenditures and other adjustments to help mitigate or prevent environmentally-related adverse health effects, what is actually observed in cross-section studies is a total rather than a partial effect of pollution on health. Assuming that the determinants of health other than D and P are invariant with respect to P , the dose-response relationship $S = S(D, P)$ can be totally differentiated to obtain:

$$(18) \quad \frac{dS}{dP} = S_D D_P + S_P \quad .$$

Since it is this total change in health status for a given change in pollution that is used in the COI approach, the added cost of illness for a change in pollution can be expressed as:

$$(19) \quad \frac{dC}{dP} = w \frac{dS}{dP} + M'(S) \frac{dS}{dP} \quad ,$$

the terms on the right-hand side denoting, respectively, the lost wages or leisure time due to pollution-related illness, and the resulting out-of-pocket medical costs.

But from (7),

$$(20) \quad w + M'(S) = \frac{U_S}{\lambda} - \frac{1}{S_D} \quad .$$

Combining (18), (19), and (20) we have

$$(21) \quad \frac{dC}{dP} = w \frac{dS}{dP} + M'(S) \frac{dS}{dP} = \left[\frac{U_S}{\lambda} - \frac{1}{S_D} \right] \frac{dS}{dP} = \frac{U_S}{\lambda} \frac{dS}{dP} - D_P - \frac{S_P}{S_D} \quad .$$

Hence,

$$(22) \quad \frac{dC^*}{dP} = - \frac{S_P}{S_D} = w \frac{dS}{dP} + M'(S) \frac{dS}{dP} - \frac{U_S}{\lambda} \frac{dS}{dP} + D_P \quad .$$

The true willingness to pay to avoid an increase in pollution is, therefore, the amount resulting from the COI approach (the first two terms on the right-hand side of (22)), plus the last two terms. The term $-(U_S/\lambda)(dS/dP)$ is the dollar value of the disutility of pollution-induced illness. Since $U_S < 0$, $-(U_S/\lambda)(dS/dP) > 0$. D_p is the change in defensive expenditures associated with an increase in pollution. It is reasonable to assume that $D_p > 0$ -- that an increase in pollution brings forth more defensive expenditures -- but nothing in the model requires that result.

Calculating health benefits through the COI approach leads to an unbiased estimate of true benefits only if sickness does not enter the individual's utility function directly, and if defensive expenditures are not accounted for in the analysis.⁶ If either of these conditions is not met, the COI approach probably underestimates true willingness to pay.

IV. Extensions of the Basic Model

In this section we examine three extensions of the basic model and discuss their effects on benefit estimation. These extensions are as follows:

- (i) Pollution enters the utility function directly.
- (ii) Individuals are assumed to receive paid sick leave for a fixed work period.
- (iii) Sickness affects the wage rate.

(i) If pollution has a direct effect on utility, we write the utility function as $U = U(X, L, S, P)$. The first-order conditions (5)-(9) remain unchanged, but the derivative V_p of the indirect utility function becomes

$$(23) \quad V_p = U_3 S_p - U_4 - \lambda w S_p - \lambda M'(S) S_p = \frac{\lambda S_p}{S_p} - U_4 \quad .^7$$

If we work through the arithmetic as in the preceding section, we find that:

$$(24) \quad \frac{dI^*}{dP} = -\frac{S_D}{S_D} - \frac{U_4}{\lambda} = [w - M'(S)] \frac{dS}{dP} + D_D - \frac{U_3}{\lambda} \frac{dS}{dP} - \frac{U_4}{\lambda}$$

that is, $\frac{dI^*}{dP}$ is the same as in our basic case except for the term $-U_4/\lambda$. In this model, the expression for true benefits contains a derivative of U , which is unobservable. Therefore, even if we had data on defensive expenditures, it would not be possible to estimate benefits precisely. Nonetheless, since $U_4 < 0$ (we assume that no one likes pollution for its own sake), allowing pollution to enter the utility function directly provides yet another reason why the COI approach underestimates true willingness to pay.⁸

(ii) As Crocker and others have pointed out, it is plausible that the duration of an individual's illness could affect the wage he or she faces. Chronically ill individuals might be excluded from some physically demanding but high paying jobs, for example. Or, individuals might be paid a lower wage because of their frequent absences from work.

We can model this phenomenon quite easily by allowing the wage rate to depend upon sickness, i.e., $w = w(S)$ where $w'(S) < 0$. Incorporating this change in (11) above, the first-order conditions become:

$$\Lambda_X = U_X - \lambda = 0$$

$$\Lambda_L = U_L - \lambda w(S) = 0$$

$$\Lambda_D = U_D S_D - \lambda [w'(S)(T - S - L) - w(S)S_D - M'(S)S_D - 1] = 0$$

However, since this change affects neither V_2 nor V_3 , expression (22) is still the correct measure of true benefits. Thus, allowing the wage rate to depend upon sickness does not affect our basic conclusion that the COI approach underestimates true benefits.

(iii) Many workers lose no pay when they get sick because of paid sick leave. In this case, lost time due to illness still represents a cost to the economy, but one borne by employers. One can therefore argue that the presence of paid sick leave does not affect the total economic benefits of pollution control, but only their distribution.

This argument assumes implicitly that the availability of paid sick leave will not affect the efforts of individuals to avoid sickness.⁹ To drop this assumption, we must also drop the full income constraint, which permits the leisure and income to be traded off without restriction. Instead, suppose an individual receives a wage w per hour for W hours of work per year, regardless of whether those hours are actually worked. Let $Y = wW$ denote income, and suppose further that the distribution of work hours is fixed, as in the 9 to 5 workday. In the previous model illness affects utility directly, by taking up time that could be devoted to labor or leisure, and by inducing out-of-pocket costs. With paid sick leave, the illness that occurs during working hours affects utility and medical costs but the individual's money income is not affected as before. If we assume the individual is just as likely to get sick while at work as outside of work, we can put the proportion q of illness occurring during leisure at $q = (T - W)/T$, the proportion of nonwork hours.

In this model the maximum number of hours that can be worked per year is W . The actual time spent working is $W - (1 - q)S$, the nominal work time less sick leave taken. The individual is no longer able to trade work for leisure without restriction, and the marginal value of leisure is no longer equal to

the wage rate. The problem now is to maximize utility subject to both a money and a time constraint:

$$\begin{array}{ll} \text{Maximize} & U(X, L, S(D, P)) \\ & X, L, D \end{array}$$

subject to:

$$X + D + M(S) \leq Y = wW$$

$$L + qS \leq T - W \quad .$$

The Lagrangian is

$$\Lambda = U(X, L, S) + \lambda(Y - D - X - M(S)) + \gamma(T - W - L - qS) \quad ,$$

with first order conditions

$$(25) \quad \Lambda_X = U_X - \lambda = 0$$

$$(26) \quad \Lambda_L = U_L - \gamma = 0$$

$$(27) \quad \Lambda_D = U_S S_D - \lambda - \lambda M'(S) S_D - \gamma q S_D = 0$$

The marginal change in income Y necessary to keep utility constant while pollution changes is again

$$(28) \quad \frac{dy}{dP} = - \frac{V_P}{V_Y} = - \frac{S_P}{S_D} .$$

In this case the employer will also benefit from improvements in air quality, due to a reduction in sick leave payments. Assuming the wage rate is equal to the value of a day's output by a worker,¹⁰ we can represent the benefit to the employer of a marginal reduction in pollution as:

$$(29) \quad (1 - q)w \frac{dS}{dP} .$$

Combining (28) and (29), the social benefit of a reduction in pollution is, for each worker in the population,

$$(30) \quad \text{Benefit} = (1 - q)w \frac{dS}{dP} - \frac{S_P}{S_D} .$$

In earlier discussion, we showed that the COI approach would probably underestimate the true benefits of pollution control. When sick leave is introduced, it is no longer possible to say whether or not this remains the case. From the first-order condition (27) we have

$$(31) \quad M'(S) = \frac{U_S}{\lambda} - \frac{1}{S_D} - \frac{\gamma}{\lambda} q$$

The benefit estimate given by the cost-of-illness approach is

$$\begin{aligned}
 (32) \quad \text{Cost of illness} &= [w + M'(S)] \frac{dS}{dP} \\
 &= w \frac{dS}{dP} + \frac{U_S}{\lambda} \frac{dS}{dP} - \frac{\gamma}{\lambda} q \frac{dS}{dP} - \frac{1}{S} [S_D D_P + S_P]
 \end{aligned}$$

Combining (30), (31) and (32), we have

$$(33) \quad \text{Benefit} = \text{Cost of illness} + D_P - \frac{U_S}{\lambda} \frac{dS}{dP} + \left(\frac{\gamma}{\lambda} - w \right) q \frac{dS}{dP}$$

Therefore, the benefits associated with a change in pollution is equal to the cost of illness plus three additional terms. The first two, representing the change in defensive expenditures and the direct disutility of illness, have been encountered before. The third term is a correction that takes account of the fact that sickness outside of working hours is no longer valued at the wage rate (the ratio γ/λ is the individual's marginal value of leisure time). If leisure has a value exceeding the wage rate, this term is positive and we can again conclude that the cost-of-illness approach underestimates benefits. If, however, the individual values leisure time at less than the wage rate, this conclusion is no longer possible.

7. Conclusion

Our principal objective in this paper has been to compare the "cost-of-illness" approach to health benefit estimation with an expression of willing-

ness to pay derived from a model of individual utility maximization. We have shown that the cost-of-illness approach results in an underestimate of "true" benefits when sickness enters the utility function directly, and when individuals are allowed to take some defensive measures against pollution.

However, this conclusion requires us to assume that defensive expenditures are an increasing function of the pollution level. While the sign of D_p depends on both individual preferences and the dose-response function, we believe that it is reasonable to suppose that an increase in pollution will bring forth additional efforts to avoid it. In any event, our results should be of some use in applied benefit estimation in the regulatory area where, before, the relationship between ad hoc approaches and conceptually correct measures was unclear.

Our finding proved robust with respect to several variations in our basic model. True benefits exceed those derived from the cost-of-illness approach when wages are assumed to be affected by pollution-induced illness, and when pollution is assumed to enter the utility function both directly as well as indirectly via its effect on sickness and, hence, the labor-leisure tradeoff. Only when our basic model was extended to include the case of paid sick leave was there indeterminacy about the relationship between the traditional cost-of-illness approach and willingness to pay as derived from the model. In this case, the relationship depended critically on individuals' valuation of leisure time.

A final observation concerns the estimability of the conceptually correct benefit measure. The expression we derived for willingness to pay, $-S_p/S_y$, is in principle observable. Bringing this term to life, so to speak, will be more difficult than it may at first appear. It will require detailed information on both the market and nonmarket measures that individuals take to defend

themselves against pollution and other environmental threats, broadly defined. Until such data are available, our conclusions suggest that the cost-of-illness approach can be used as a lower bound for true benefits in most interesting cases.

Footnotes

¹As Courant and Porter [1981] show in a recent paper, however, one must be quite careful not to assume that defensive expenditures prevented in an exact measure of willingness to pay for regulatory benefits.

²We find it more convenient to make utility a function of expenditures on various classes of goods rather than a composite good, as is customary.

³although the disutility of sickness presumably depends on its intensity as well as its duration, we assume that all illnesses are equally intense.

⁴Definition of I as a function of P requires $V_P \neq 0$, but we assume, as is customary, that $V_P > 0$.

⁵Very recently, data sets with some information on exercise and preventive medicine have begun to be explored. See Gerking [1982], for example.

⁶This result may appear to follow from equation (22) if U_S and D_P equal to zero. But calculation of true benefits in our model requires $S_P \neq 0$; thus, the COI approach is not just a special case of the model we use. Nonetheless, in a simpler model in which $U = U(X, L)$ and $S = S(P)$, true willingness to pay can be shown to equal the terms included in the COI approach.

⁷ U_3 and U_4 are the partial derivatives of U with respect to the variables in the 4-tuple (X, L, S, P) . Thus, $U_P = U_3 S_P + U_4$.

⁸Using a slightly different model than ours, Courant and Porter [1981] conclude that observed defensive expenditures may either under- or overestimate true willingness to pay when pollution enters the utility function directly.

⁹This conceptual problem should be kept distinct from the empirical problem of estimating morbidity when workers are covered by paid sick leave. What is usually observed in morbidity studies is not sickness itself but days of illness reported. Sick leave can obviously affect whether an individual

responds to illness by staying home from work.

¹⁰ If the employer expects a certain number of sick days each year and sets wages accordingly, the value of a day's output might slightly exceed the wage rate.

TECHNICAL REPORT DATA

(Please read Instructions on the reverse before completing)

1. REPORT NO. EPA-450/5-85-005b		2.	3. RECIPIENT'S ACCESSION NO.
4. TITLE AND SUBTITLE Ambient Ozone and Human Health: An Epidemiological Analysis Volume II		5. REPORT DATE Sept. 1983 (Date of Preparation)	
7. AUTHOR(S) Paul R. Portney and John Mullahy		6. PERFORMING ORGANIZATION CODE	
9. PERFORMING ORGANIZATION NAME AND ADDRESS Resources for the Future 1616 P Street N.W. Washington, DC 20036		8. PERFORMING ORGANIZATION REPORT NO.	
12. SPONSORING AGENCY NAME AND ADDRESS U.S. Environmental Protection Agency Office of Air Quality Planning and Standards (MD-12) Research Triangle Park, NC 27711		10. PROGRAM ELEMENT NO. 12A2A	
		11. CONTRACT/GRANT NO. 68-02-3583	
		13. TYPE OF REPORT AND PERIOD COVERED Final Report	
		14. SPONSORING AGENCY CODE 0AQPS	
15. SUPPLEMENTARY NOTES Project Officer: Thomas G. Walton			
16. ABSTRACT This report is the second volume of an analysis of the relationship between ozone and human health benefits.			
17. KEY WORDS AND DOCUMENT ANALYSIS			
a. DESCRIPTORS	b. IDENTIFIERS/OPEN ENDED TERMS	c. COSATI Field/Group	
Benefit Analysis Air Pollution, O ₃ Epidemiology			
18. DISTRIBUTION STATEMENT Release Unlimited	19. SECURITY CLASS (This Report) Unclassified	21. NO. OF PAGES 232	
	20. SECURITY CLASS (This page) Unclassified	22. PRICE	

INSTRUCTIONS

1. REPORT NUMBER

Insert the EPA report number as it appears on the cover of the publication.

2. LEAVE BLANK

3. RECIPIENTS ACCESSION NUMBER

Reserved for use by each report recipient.

TITLE AND SUBTITLE

Title should indicate clearly and briefly the subject coverage of the report, and be displayed prominently. Set subtitle, if used, in smaller type or otherwise subordinate it to main title. When a report is prepared in more than one volume, repeat the primary title, add volume number and include subtitle for the specific title.

5. REPORT DATE

Each report shall carry a date indicating at least month and year. Indicate the basis on which it was selected (*e.g., date of issue, date of publication, date of preparation, etc.*).

6. PERFORMING ORGANIZATION CODE

Leave blank.

7. AUTHOR(S)

Give name(s) in conventional order (*John R. Doe, J. Robert Doe, etc.*). List author's affiliation if it differs from the performing organization.

8. PERFORMING ORGANIZATION REPORT NUMBER

Insert if performing organization wishes to assign this number.

9. PERFORMING ORGANIZATION NAME AND ADDRESS

Give name, street, city, state, and ZIP code. List no more than two levels of an organizational hierarchy.

10. PROGRAM ELEMENT NUMBER

Use the program element number under which the report was prepared. Subordinate numbers may be included in parentheses.

11. CONTRACT/GRANT NUMBER

Insert contract or grant number under which report was prepared.

12. SPONSORING AGENCY NAME AND ADDRESS

Include ZIP code.

13. TYPE OF REPORT AND PERIOD COVERED

Indicate interim final, etc., and if applicable, dates covered.

14. SPONSORING AGENCY CODE

Insert appropriate code.

15. SUPPLEMENTARY NOTES

Enter information not included elsewhere but useful, such as: Prepared in cooperation with, Translation of, Presented at conference of, To be published in, Supersedes, Supplements, etc.

16. ABSTRACT

Include a brief (*200 words or less*) factual summary of the most significant information contained in the report. If the report contains a significant bibliography or literature survey, mention it here.

17. KEY WORDS AND DOCUMENT ANALYSIS

(a) **DESCRIPTORS** - Select from the Thesaurus of Engineering and Scientific Terms the proper authorized terms that identify the major concept of the research and are sufficiently specific and precise to be used as index entries for cataloging.

(b) **IDENTIFIERS AND OPEN-ENDED TERMS** - Use identifiers for project names, code names, equipment designators, etc. Use open-ended terms written in descriptor form for those subjects for which no descriptor exists.

(c) **COSATI FIELD GROUP** - Field and group assignments are to be taken from the 1965 COSATI Subject Category List. Since the majority of documents are multidisciplinary in nature, the Primary Field/Group assignment(s) will be specific discipline, area of human endeavor, or type of physical object. The application(s) will be cross-referenced with secondary Field/Group assignments that will follow the primary posting(s).

18. DISTRIBUTION STATEMENT

Denote releasability to the public or limitation for reasons other than security for example "Release Unlimited." Cite any availability to the public, with address and price.

19. & 20. SECURITY CLASSIFICATION

DO NOT submit classified reports to the National Technical Information service.

21. NUMBER OF PAGES

Insert the total number of pages, including this one and unnumbered pages, but exclude distribution list, if any.

22. PRICE

Insert the price set by the National Technical Information Service or the Government Printing Office, if known.
