Center (CPM52)
841 Chestnut Street
Philadelphia, PA 19107

March 1992

Produced by
Computer Sciences Corporation
under contract to the U.S. Environmental Protection Agency
Contract No. 68-WO-0043

Printed by the U.S. Environmental Protection Agency for the Chesapeake Bay Program

Acknowledgments

The Chesapeake Bay Program Office acknowledges the significant efforts of all the people involved in the production of this document including: Robin Laird, Chesapeake Bay Program, for her coordination and technical advise; and Deirdre Murphy and Walter Butler, Maryland Department of the Environment, for lending their technical expertise. Without the cooperation from the staffs of the Maryland Department of the Environment, the Interstate Commission on the Potomac River Basin, and the Virginia Institute of Marine Sciences, we would not have been able to produce as extensive a list as presented in this document.

This document was produced with the assistance of the Chesapeake Bay Program Toxics and Living Resources Subcommittees' Joint Criteria and Standards Workgroup.

Introduction

This report, "A Comprehensive List of Chesapeake Bay Basin Species," serves three specific purposes:

- it provides the Bay community with a standardized list of Chesapeake Bay aquatic and aquatic-associated living resources;
- it provides the Chesapeake Bay Program access to toxicity data that will be used to revise and update the Chesapeake Bay Toxics of Concern List; and,
- it supports Chesapeake Bay Program agencies in determining the presence and status of living resources in the Bay.

This list is a compilation of living resource data from federal and state agencies, and private institutions' monitoring programs. An extensive search was conducted to identify available aquatic Chesapeake Bay species information. Species data were collected from the following agencies: the Interstate Commission on the Potomac River Basin, the Maryland Department of the Environment, and the Virginia Institute of Marine Sciences. These data sets were then verified and merged with the U.S. EPA Chesapeake Bay Program's species monitoring data.

The merged list of species from the four respective agencies was then reviewed to remove any duplications or errors. The species were matched according to the National Oceanographic Data Center (NODC) code and the U.S. EPA STORET/BIOS scientific name. Any remaining species that did not match either by NODC code or scientific name were reexamined.

In addition to this standardization process, three documents were reviewed to assure that key Chesapeake Bay species (i.e., water-associated biota such as waterfowl, Bay raptors and wetlands vegetation) were included in this comprehensive list. The three documents reviewed included:

- *Habitat Requirements for Chesapeake Bay Living Resources*. 1991. Editors: S.L. Funderburk, S.J. Jordan, J.A. Mihursky and D. Riley for the Living Resources Subcommittee of the Chesapeake Bay Program;

- *Distribution of Submerged Aquatic Vegetation in the Chesapeake Bay*. 1989. Virginia Institute of Marine Sciences, Gloucester Point, VA; and,
- *Life in the Chesapeake Bay*. 1984. A.J. Lippson and R.L. Lippson. The Johns Hopkins University Press.

The species compiled in this report are arranged alphabetically by scientific name. Furthermore, the common name and NODC code is included if known.

This list will be updated periodically as additional species monitoring results and reports are made available and as NODC codes or scientific names are updated. New species data will then be standardized, documented, and incorporated into the Chesapeake Bay Program's computer data base prior to inclusion in this comprehensive list.

Chesapeake Bay Basin Species List

NODC Code	Scientific Name	Common Name
