Comprehensive Data Element Dictionary

U.S. EPA SUPERFUND PROGRAM
COMPREHENSIVE DATA ELEMENT DICTIONARY

INTRODUCTION

November 15, 1991

This version of the EPA Superfund Program Data Element Dictionary (DED) is an update of the June 14, 1991 version. All of the EPA Superfund CERCLIS-related computer systems are documented in this version of the DED. These systems include:

- CERCLIS - the mainframe system for the 10 EPA regions' data and the U.S. Army Corps of Engineers' (USACE) data.

- WasteLAN - a PC LAN-based system used for data entry and reporting by the EPA regions.

- ISIF - a subsystem of WasteLAN which allows data entry and reporting of specific Superfund data.

- CleanLAN - a PC LAN-based system used for data entry and reporting by USACE.

- CERHELP - a subsystem to both CERCLIS and WasteLAN which contains non-site-specific data.

All of these systems exchange data, so their data elements are very similar. This DED documents all the data elements in all of the systems that store data entered by the user or that store system-generated data as a result of data entry by the user. Data elements used strictly for system maintenance are not defined in the DED. This includes CERCLIS System-only data elements, WasteLAN data elements contained in data files not in the /DATA subdirectory, and CleanLAN data elements contained in data files not in the /DATA subdirectory.

The DED is divided into three major sections:

- Component Number, (C####) Data Elements - site-specific data elements contained in CERCLIS, WasteLAN, and CleanLAN. There are some component number data elements contained only in WasteLAN or contained only in CleanLAN.[1]

---

[1] This section is organized numerically by component number and is the bulk of the DED.

- PC-only Data Elements - site-specific data elements contained only in WasteLAN and CleanLAN.[2]

- CERHELP Data Elements - non-site-specific data elements contained in CERCLIS and WasteLAN. This section is organized numerically by component number.

Each section presents the following indices to help you find data elements quickly:

- Index by search name (the component number or PC data element data file name),

- Index by common name (the WasteLAN screen name or other popular name for the data elements).

Each page of the DED supplies the following attributes about each data element.

Attribute	Definition
Search Name*	Component number (e.g., C101) or data element data file name (e.g., SID). Note, component numbers in WasteLAN have leading zero(s) (e.g., C0101). Component numbers in both CERCLIS and WasteLAN are listed without the leading zero(s).
System Name*	Name as it appears in the CERCLIS or CERHELP computer-generated data description. If the element is required during screen entry, an 'R' follows the system name. PC-only data elements have N/A as the system name since there is no data description in the PC environment.
Common Name*	Name of the data element as it appears on WasteLAN data entry screens. If the data element is CleanLAN only, then the common name is the name as it appears on CleanLAN data entry screens. Otherwise, the common mane is an abbreviated most commonly used element name. If the screen name is abbreviated, the common name will be the screen name followed by a hyphen and a more descriptive name (e.g., REF NO - Reference Number). As you find data element names on WasteLAN data entry screens which are unfamiliar, you can look the name up in the common name index

---

[2] This section is organized alphabetically by the PC data element data file name.

and turn to the page in the DED for information about the data element.

Field Definition*	System or program description of what the element identifies/classifies, special circumstances that may arise and/or potential uses for the data. Identifies the type of data to be entered (i.e., code, text, dollar value) and identifies if the element is regionally defined.
Keywords*	The name of the system(s) that contains the specified data element as part of the file structure and the appropriate version number (e.g., WASTELAN 2.0). If the data element can be entered using ISIF or is system-generated as a result of ISIF data entry the keyword attribute will contain 'WASTELAN/ISIF 2.0'.
Data Type*	Nature of the data allowed in the data element. • A - alphanumeric; equivalent to character in Foxbase • N - numeric • D - date
Field Length*	Number of fixed spaces allowed for data input. Note, date fields (MM/DD/YY) have a field length of 6 and time fields (HH:MM:SS) have a field length of 6.
Date of Entry*	Original date that information on the element was entered into the dictionary.
Date of Change	Date on which the most recent modification to any of the attributes of the element was done.
Index Class*	Indicator of whether element contents are indexed and tally is allowable on the mainframe (INDEX CLASS = 'KEY') or contents are not indexed and cannot be tallied on the mainframe (INDEX CLASS = 'NON-KEY'). Since this attribute is mainframe-only, all PC-only data elements carry NON-KEY as the value for INDEX class since they are not included or tallied on the mainframe.

11/15/91

Legitimate Entries*	List of valid entries for a data element as they appear in WasteLAN pop-up menus if applicable, or a range of what is allowed in the element (e.g., Up to 10 characters of text or blank). Default values are identified with a 'D'. Pop-up menu values that are not descriptive are followed by a hyphen and a more textual description (e.g., FIT - Field Investigation Team). FIT is the pop-up value. When allowed, 'Blank' is listed as a valid entry. Previously used codes that still reside in the Superfund systems are included in LEGITIMATE ENTRIES for historical purposed only. These codes cannot be entered or used to modify data. They are view only and are identified with an 'H'. Historical codes which no longer preside in the system are noted in the Comments attributes sections.
Edit Criteria	System requirements and/or constraints existing when entering and/or modifying element values.
Basic or Derived*	Method used to input data. 'BASIC' indicates manual entry is required, 'DERIVED' indicates that data is system-generated or originates from a system data transfer, and 'BOTH' indicates that the data element may or may not be system-generated, involved in a data transfer, or manually entered depending on which system (e.g., CERCLIS or WasteLAN) or depending on certain conditions (e.g., existence of a particular date).
Derivation	Component number(s) of the data element(s) used to generate data for the specified element. The system is listed prior to the derivation component number (e.g., CERCLIS C101). If no system is listed the derivation occurs in all systems listed in KEYWORDS.
Data Steward*	Provides information on (1) what organization level (Headquarters, regional, or USACE) has responsibility for request and/or collecting the required data and (2) what organization level 'defines' the data element or determines its specific values (ex. Regionally Required; Regionally Defined indicates the Regions have responsibility for both providing and defining the data). If the element contains system data, the DATA STEWARD will be the 'Data Administrator'.

| Comments | Additional information relevant to the data element that has not been included in any other attributes. This includes: |

- A note if the element is not maintained in a system even though it is contained in the system. Non-maintenance implies that the element does not appear on data entry screens unless otherwise specified.

- A note if other data elements provide the same type of information.

- Screen name of data element as it appears in non-WasteLAN systems if the screen name is significantly different from the WasteLAN screen name.

- Programmatic guidance not covered in the FIELD DEFINITION on how the field should be used.

*Required, must contain data.

Please forward any corrections, comments, or concerns to Lisa Saunders (phone: (703)538-7590 or fax:(703)538-7298). All comments are encouraged. The DED is a service to the users, system developers, and third party testers. An attempt will be made to incorporate any suggested improvements in content, and/or format in the next version of the DED.

COMMENTS: HISTORICAL CODES ARE INCLUDED FOR
DOCUMENTATION PURPOSES ONLY. THEY CANNOT BE
USED TO ENTER OR MODIFY DATA. FINANCIAL TYPES
F, 1-8, L, N, P, S, AND C ARE USED FOR LITIGATION
ACTIVITIES. FINANCIAL TYPES 1-8, C, F, N, S, L, P, R, Q,
I, J, K, M, U, AND V ARE USED FOR SETTLEMENTS AND
ORDERS.

FINANCIAL TYPES HAVE VARYING DEFINITIONS BASED
UPON THE ENFORCEMENT ACTIVITY WITH WHICH IT IS
ASSOCIATED. FOR EXAMPLE, F, FEDERAL COST
RECOVERY, MAY REFER TO THE COST RECOVERY
DOLLARS SOUGHT FOR A SPECIFIC REFERRAL
DOCUMENT (C1701 = SF) OR AN ADMINISTRATIVE
ORDER (C1701 = AC) OR IT MAY REFER TO AN
ESTIMATE OF SITE WIDE COSTS ANTICIPATED WITH A
PLANNED COST RECOVERY ACTION (C1701 = AV).

DEFINITIONS AS FOLLOWS FOR SPECIFIC FINANCIAL
TYPES:

A   DENOTES THE AMOUNT WRITTEN OFF AS NOT
RECOVERABLE FOR CLOSEOUTS OR OTHER
ENFORCEMENT ACTIVITIES.

T   DENOTES THE TOTAL (I.E., SITE WIDE)
PROJECTED COST RECOVERY, AS DISTINCT FROM
THE CURRENT (I.E., DOCUMENT SPECIFIC) COST
RECOVERY AMOUNT SOUGHT.

COMMENTS: EACH SUBEVENT IS LINKED TO A PARTICULAR (C2101)
                         EVENT TYPE. THE FIRST TWO POSITIONS REPRESENT A
                         CODE FOR THE SUBEVENT. THE THIRD POSITION IS A
                         NUMERIC INDICATOR THAT UNIQUELY AND
                         SEQUENTIALLY IDENTIFIES MULTIPLE OCCURRENCES
                         OF THE SAME SUBEVENT TYPE FOR A SINGLE EVENT.

                         FOR CLARITY, EACH SUBEVENT HAS BEEN LISTED
                         ALPHABETICALLY FOLLOWING THIS COMPONENT
                         NUMBER. THE DEFINITION OF THE START DATE,
                         COMPLETION DATE, AND THE SUBEVENT ITSELF IS
                         PROVIDED IN THESE ENTRIES.

                         CODES BEGINNING WITH X, Y, OR Z ARE RESERVED FOR
                         REGIONAL DEFINITION AND USE. THE EVENT NAME

FOR AN ACTIVITY. THE DCN SERVES THE FOLLOWING
PURPOSES:

1. ESTALISHES A LINK BETWEEN IFMS AND CERCLIS
THAT ALLOWS FOR AUTOMATED TRANSFERS OF IFMS
DATA TO CERCLIS.

2. PROVIDES A UNIQUE IDENTIFICATION NUMBER FOR
EACH SPENDING TRANSACTION.

3. PROVIDES A LINK BETWEEN THE DOCUMENT
CONTROL REGISTER AND THE COMPUTER REPORTS.

SEARCH NAME:	C3204
SYSTEM NAME:	FINANCIAL-ACCOUNT (R)
COMMON NAME:	ACN (IFMS ACCOUNT NUMBER)

FIELD DEFINITION: THE ACN IS A TEN-DIGIT CODE ASSIGNED BY THE FMO
IN A REGION OR OERR/OWPE IN HEADQUARTERS TO A
FUNDING DOCUMENT TO ENABLE THE PROGRAM TO
TRACK THE FUNDING DOCUMENT THROUGH ITS LIFE
CYCLE. THIS NUMBER, IN CONJUNCTION WITH C3203
ACN (ACN/DCN COMBINATION), UNIQUELY IDENTIFIES
A FINANCIAL TRANSACTION.

KEYWORDS: CERCLIS

EDIT CRITERIA: C3204 CANNOT BE PARTIALLY FILLED. C3204 CANNOT
BE BLANK IF C3203, DCN, CONTAINS DATA.

DUPLICATE ACN/DCN COMBINATIONS ARE NOT
ALLOWED ACROSS SITES, EVENTS, OR CERHELP. THEY
ARE ALLOWED ACROSS FINANCIAL TYPES WITHIN THE
SAME EVENT.

CERCLIS: DURING SCREEN ENTRY, THE DATA ENTRY
OPERATOR CANNOT PASS THIS FIELD WITHOUT
ENTERING A VALUE, IF C3202 = A, C, D, OR M.

WASTELAN: USER CANNOT CHANGE DCN ONCE IT HAS
BEEN UPLOADED.

DATA STEWARD: NATIONALLY REQUIRED; NATIONALLY DEFINED

COMMENTS: THE ACCOUNT NUMBER IS THE PRIMARY LINK
BETWEEN THE ORGANIZATIONAL STRUCTURE AND THE
PROGRAM BUDGET STRUCTURE.

THE ACCOUNT CONTROL NUMBER (ACN) IS THE FOCAL
POINT OF THE FUNDS CONTROL PROCESS. EVERY
COMMITMENT AND OBLIGATION MUST HAVE AN ACN.
THE ACN MAY BE CONSIDERED AN EXTENSION OF THE
ACCOUNT NUMBER. IT IS A UNIQUE NUMBER FOR
EACH RELATED COMMITMENT AND OBLIGATION FOR
AN ACTIVITY. THE ACN SERVES THE FOLLOWING
PURPOSES:

1. ESTABLISHES A LINK BETWEEN IFMS AND CERCLIS
THAT ALLOWS FOR AUTOMATAED TRANSFERS OF IFMS
DATA TO CERCLIS.

2. PROVIDES A UNIQUE IDENTIFICATION NUMBER FOR
EACH SPENDING TRANSACTION.

3. PROVIDES A LINK BETWEEN THE DOCUMENT
CONTROL REGISTER AND THE COMPUTER REPORTS.
