TOXIC CHEMICAL RELEASE INVENTORY
GLOSSARY OF SYNONYMS

This glossary contains chemical names and their synonyms for substances covered by the reporting requirements of SARA Title III, section 313. The glossary was developed to aid in determining whether a facility manufactures, processes, or otherwise uses a chemical subject to section 313 reporting. These synonyms are available to the EPA through the public literature, primarily CAS Online.

The glossary is divided into two parts. Part 1 is a listing by CAS registry number. The first chemical name that follows the CAS registry number is the same by which the toxic chemical is identified under section 313. The synonyms that follow are in alphabetical order.

Part 2 contains names and synonyms in an alphabetical listing. All entries in the alphabetical listing followed by an asterisk (*) represent the name by which the chemical is listed in the regulation that implements section 313 (see 40 CFR 372.45(a) and (b)). There have been several revisions to the section 313 list in the past year that are reflected as changes in this document. The following chemicals have been specifically delisted and are not covered for the 1991 reporting year:

	<u>CAS Number</u>
Titanium dioxide	13463-67-7
C.I. Acid Blue 9 diammonium salt	2650-18-2
C.I. Acid Blue 9 disodium salt	3844-45-9
Melamine	108-78-1
Sodium sulfate (solution)	7757-82-6
Sodium hydroxide (solution)	1310-73-2
Aluminum oxide (non-fibrous forms)	1344-28-1
Terephthalic acid	100-21-0
* C.I. Pigment Blue 15	147-14-8
* C.I. Pigment Green 7	1328-53-6
* C.I. Pigment Green 36	14302-13-7

(* These substances were delisted from the "Copper Compounds" category.)

Aluminum oxide (CAS number 1344-28-1) remains on the list, but only in its fibrous form.

The following chemicals have been added to the toxic chemical list and reporting is required beginning with the 1991 reporting year:

	<u>CAS Number</u>
bromotrifluoromethane	75-63-8
trichlorofluoromethane	75-69-4
dichlorodifluoromethane	75-71-8
dichlorotetrafluoroethane	76-14-2
monochloropentafluoroethane	76-15-3

dibromotetrafluoroethane
bromochlorodifluoromethane

124-73-2
353-59-3

None of the 20 categories of chemicals listed in 40 CFR 372.45(c) are included in this glossary. EPA did not attempt to identify synonyms associated with each chemical category because each category itself contains many chemical substances. Prefixes and numbers were not used in the alphabetization of the chemical names, but are included in the alphabetized list. The CAS registry number also appears with each name for cross-referencing purposes.

The glossary enables the trade and common names of a substance to be matched to the CAS number or other synonyms. If the trade or common name of the substance is listed, the TRI name (i.e., the name required for reporting under the section 313 regulation) can easily be identified. For example, a listing of Acetate Fast Orange R can easily be identified by referencing the alphabetical listed portion of the glossary (Part 2). The corresponding CAS number, 82-28-0, listed with this synonym name can be cross referenced to the TRI name, 1-Amino-2-methyl anthraquinone in Part 1.

Please note that this list may not be complete. The list of synonyms may not describe all products currently available in commerce, particularly mixtures, that may contain a section 313 chemical.
