What Is Asset Management?

Asset Management is a process for maintaining a desired level of customer service at the best appropriate cost.

How Can Asset Management Help Your Utility?

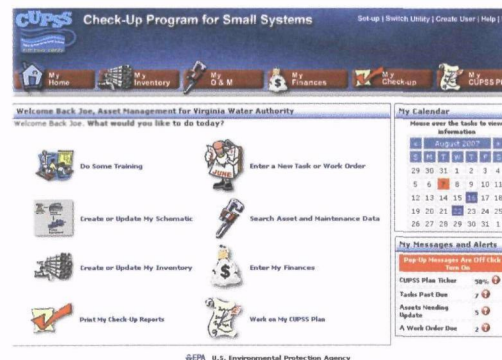

The benefits of asset management include:

- Making good investment decisions based on understanding of costs and benefits.
- Setting service levels and making the investments needed to meet them.
- Reducing asset risk through capital investment or changed maintenance practices.

What Is CUPSS?

CUPSS is a free, easy-to-use, asset management tool for small drinking water and wastewater utilities. CUPSS provides a simple, comprehensive approach based on EPA's highly successful Simple Tools for Effective Performance (STEP) Guide series. Use CUPSS to help you develop:

- A record of your assets
- A schedule for your maintenance tasks
- An understanding of your financial situation
- A tailored asset management plan

CUPSS Long-Term Benefits

- Make more informed decisions
- Save time by planning ahead
- Back up budget talks with facts
- Improve customer service

CUPSS Special Features

There are many features that will assist you with daily, weekly, monthly and annual tasks. Some of the special features include:

- Drawing a utility schematic
- Graphical presentation of asset priority
- Assembling a customer-oriented plan
- Managing multiple utilities
