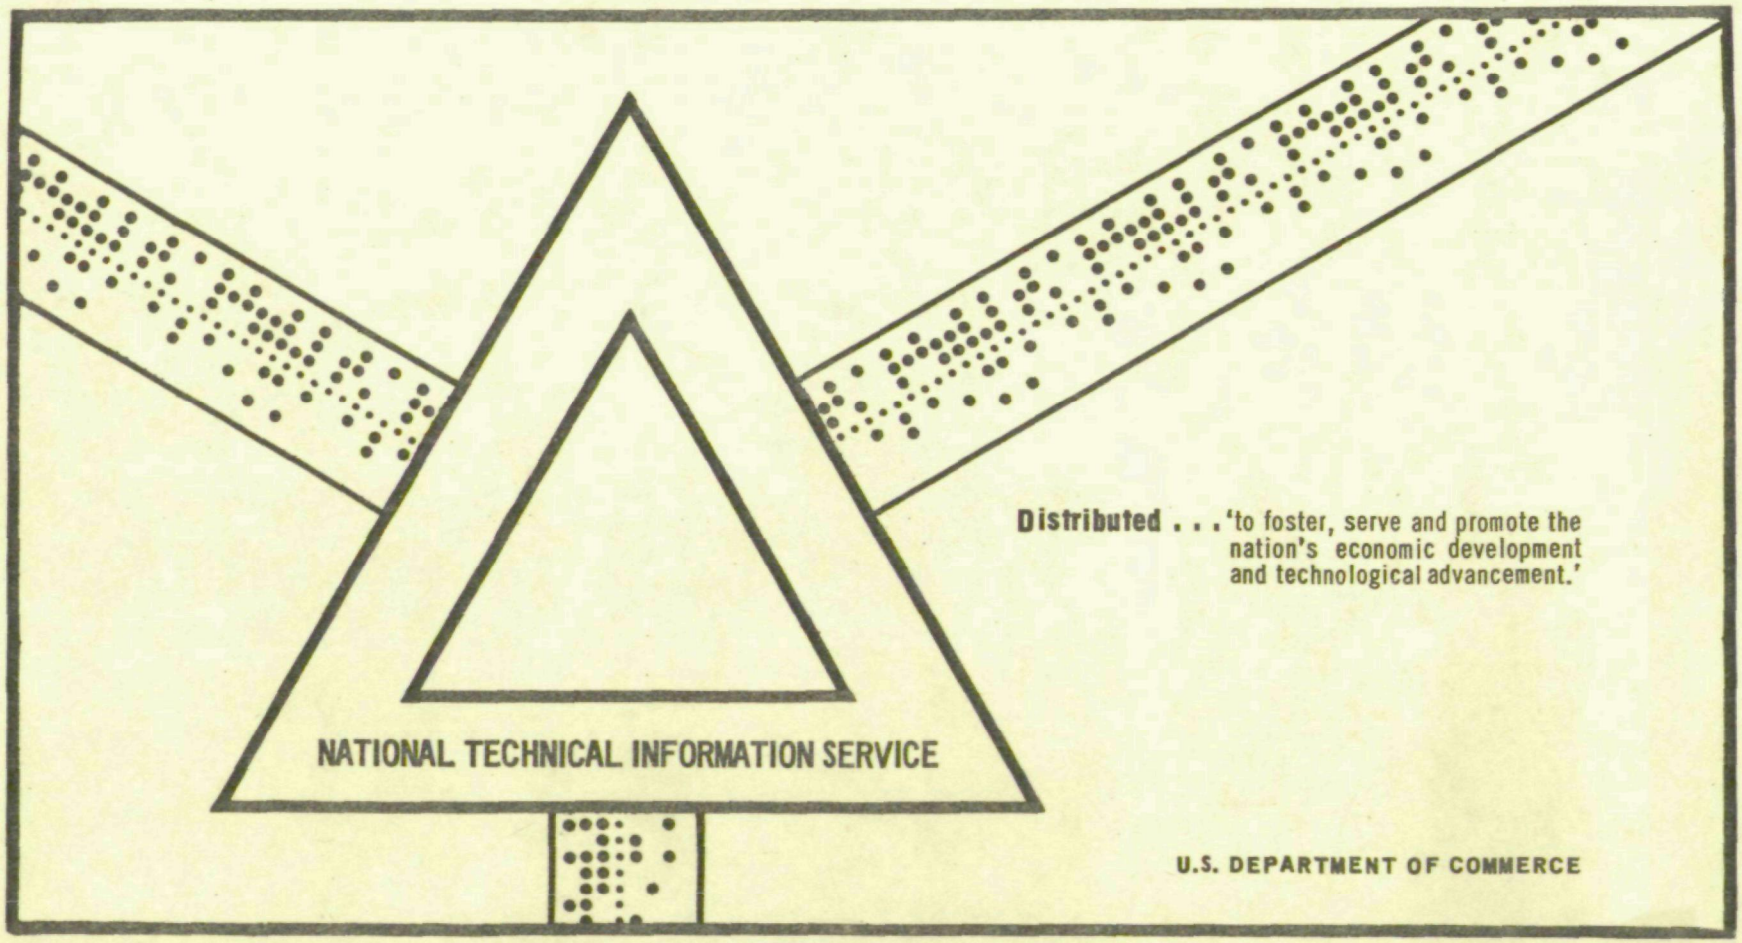
SELECTED BIBLIOGRAPHY OF ELECTROSTATIC PRECIPITATOR LITERATURE

Southern Research Institute
Birmingham, Alabama

March 1970



SELECTED BIBLIOGRAPHY OF ELECTROSTATIC PRECIPITATOR LITERATURE

MARCH 1970

NATIONAL AIR POLLUTION CONTROL ADMINISTRATION
Contract CPA 22-69-73

SOUTHERN RESEARCH INSTITUTE
2000 9th Avenue S. Birmingham, Alabama 35205

ponding to the article are given. Thus, all the articles in the bibliography that have the particular descriptor are listed by the numbers. It may be reasonably hoped that papers listed under the foregoing descriptors will contain not only general design information on precipitator power supplies, but specific details such as current-voltage and sparkover characteristics for methane, perhaps even for various electrode configurations at high pressure.

2. Background material is sought on the application of electrostatic precipitation in the steel industry. Here the statement of the problem is so general that only a single descriptor is suggested, viz. steel. Scanning the thesaurus, it is seen that steel is not a descriptor, but its cross reference, iron and steel, is. Moreover, the following descriptors of interest are listed: basic-oxygen furnace, blast furnace, coke ovens, electric-arc furnace, and open-hearth furnace. A review of the literature derived from these descriptors might call attention to certain problem areas for which information is needed in greater depth; for example, high resistivity (cross referenced to resistivity), or conditioning, to name two of a larger number of possibilities.

STANDARD TITLE FOR TECHNICAL REPORTS	1. Report No. APTD-0612	2. Gov't Accession No.	3. Recipient's Catalog No.
4. Title and Subtitle: Selected Bibliography of Electrostatic Precipitator Literature			5. Report Date: March 1970
			6. Performing Organization Code
7. Author(s)			8. Performing Organization Rept. No.
9. Performing Organization Name and Address: Southern Research Institute, 2000 9th Avenue, S., Birmingham, Alabama 35205			10. Project/Task/Work Unit No.
			11. Contract/Grant No. CPA-22-69-73
12. Sponsoring Agency Name and Address: Division of Process Control Engineering, National Air Pollution Control Administration, Cincinnati, Ohio 45227			13. Type of Report & Period Covered
			14. Sponsoring Agency Code
15. Supplementary Notes: from page i			
16. Abstract: This bibliography was performed by Research-Cottrell, Inc., who served as subcontractor. It is arranged alphabetically by author and numbered sequentially. In the back of the bibliography, about 100 descriptors comprising the thesaurus are listed with numbers corresponding to the articles for which the particular descriptor is appropriate. There are 1017 articles entered.			
17. Key Words and Document Analysis. (a). Descriptors: Air pollution control equipment; Electrostatic precipitators; Bibliographies; Indexes (documentation)			
17b. Identifiers/Open-Ended Terms			
17c. COSATI Field/Group 13/02, 05/02			
18. Distribution Statement: Unlimited	19. Security Class (This Report) UNCLASSIFIED	21. No. of Pages 159
