POLLUTION OF SUBSURFACE WATER BY SANITARY LANDFILLS

Volume 3

This interim report (SW-12rg.2) on work performed under
solid waste management research grant EP-000162 to Drexel University
was written by A. A. FUNGAROLI
and is reproduced as received from the grantee.

Volume 1 is a narrative description of the project and will be
available through the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C. 20402.

Volume 2 is a compilation of the experimental data collected
and is available through the National Technical Information Service,
Springfield, Virginia 22151

16. Abstracts This study was to provide quantitative information as to the behavior of sanitary landfills under natural and simulated environmental conditions in an environment common to southeastern Pennsylvania and a large portion of the region extending between Washington, D.C., and Boston, Massachusetts. The long-range objectives were: (1) To provide means for predicting the movement of pollutants in subsurface regions under existing and proposed sanitary landfill sites. (2) To develop hydrologic, geologic, and soil criteria for the evaluation of site suitability for sanitary landfill operations. (3) To appraise design methods and remedial procedures for reducing any undesirable contaminant movement. A laboratory and a field sanitary landfill were developed to generate the data needed to attain these long-range objectives. This report consists of three volumes: Volume 1 (available from the U.S. Environmental Protection Agency, Cincinnati, Ohio 45213) describes the experimental facilities; Volume 2 (also available from the National Technical Information Service) contains the experimental data collected from Oct. 1, 1967, to Dec. 31, 1968; this volume (Volume 3) contains the experimental data collected from Jan. 1, 1969, to Sept. 29, 1969.

This report has been reviewed and approved for publication by the U.S. Environmental Protection Agency. Approval does not signify that the contents necessarily reflect the views and policies of the U.S. Environmental Protection Agency, nor does mention of commercial products constitute endorsement or recommendation by the U.S. Government.

FOREWORD

An important objective of the Office of Solid Waste Management Programs is to aid in developing economic and efficient solid waste management practices. As authorized under the Solid Waste Disposal Act (Public Law 89-272) and the Resource Recovery Act (Public Law 91-512), the Office has awarded almost 100 research grants to nonprofit institutions in this effort to stimulate and accelerate the development of new or improved ways for handling the Nation's discarded solids.

The present document reports on work done under one of these research grants, and was received from the grantee in three volumes. Volume 1 is a narrative description of the project. Volume 2 is a compilation of the experimental data collected from October 1, 1967, to December 31, 1968, and is also available through the National Technical Information Service, Springfield, Virginia 22151. This volume is a compilation of the experimental data collected from January 1, 1969, to September 29, 1969.

Research Grant EP-000162 has been renewed to cover an additional 3 years of research. Volume 4 of this series is an interim report covering an additional year of testing and evaluation. This volume is currently being processed and will be published in early 1972. A final report covering the entire 6-year project period is expected for publication in the fall of 1972.

It is recognized that a sanitary landfill, unless properly engineered and on a suitable site, can pollute subsurface water. To determine the kind and degree of contamination under varying field and laboratory conditions was an aim of this project. From this, criteria were developed which can be useful to others in the design of landfills and prediction of their performance.

INTRODUCTION

The data presented herein has been obtained from the experimental facilities described in Volume I. The data is separated into three sections and includes all results obtained from January 1, 1969 to September 29, 1969.

Section I contains data obtained from the laboratory experimental sanitary landfill. Section II contains data obtained from the field experimental facility. Each of the two main sections are divided into three subsections; A contains temperature data, B contains percentages of gases generated, and C contains chemical composition of leachate.

SECTION I
LABORATORY EXPERIMENTAL SANITARY LANDFILL

Note: Figure 1 - shows thermistor locations and positions of the four sampling ports.

SECTION 1-B
LYSIMETER GAS COMPOSITION

Notes:

1. Nomenclature

CO_2 = Carbon Dioxide
 O_2 = Oxygen
 N_2 = Nitrogen
 CH_4 = Methane
 H_2S = Hydrogen
 CO = Carbon Monoxide

2. All results are in percent of total gas.

SECTION 1-C1

LYSIMETER LEACHATE ANALYSIS

Notes:

1. Nomenclature

VOL IN = volume distilled water added to soil surface
LEACHATE = volume of water removed from bottom
FE = total iron content of leachate
ZN = total zinc content of leachate
NI = total nickel content of leachate
CU = total copper content of leachate
PH = hydrogen ion concentration
HARD = total hardness in milligrams per liter as CaCO_3
D.O. = dissolved oxygen
 PO_4^4 = phosphate ion
CL = chloride ion
NA = sodium ion
S. SOL = suspended solids
N FRE = free ammonia nitrogen
N AMO = organic nitrogen
COD = chemical oxygen demand
BOD = biological oxygen demand
RES. = total residue on evaporation
% VOL = % volatile portion of residue
ML = milliliters
MG/L = milligrams per liter

SECTION 2-A
FIELD LANDFILL TEMPERATURES

Notes:

1. Nomenclature

MO = month
DA = day of ~~the~~ month
DAY NO = day of the year
YR = year 196-

- 2. T1 through T50 = temperature locations as listed in Table 1.**
3. Temperatures are in degrees Fahrenheit.

TABLE 1
FIELD TEMPERATURE LOCATIONS*

T1 - From 9/10/68 Groundwater Temp.	T26 N-12
2 - outside atmosphere	27 P-14
3 - west - 2 feet	28 P-18
4 - south - 2 feet	29 P-23
5 - east - 2 feet	30 A-4
6 - north - 2 feet	31 A-8
7 - west - 4 feet	32 A-13
8 - south - 4 feet	33 B-18
9 - east - 4 feet	34 B-4
10 - north - 4 feet	35 B-8
11 - west - 6 feet	36 B-13
12 - south - 6 feet	37 C-18
13 - east - 6 feet	38 C-4
14 - north - 6 feet	39 C-8
15 - west - 8 feet	40 C-13
16 - south - 8 feet	41 D-18
17 - east - 8 feet	42 D-4
18 - north - 8 feet	43 D-8
19 - west - 10 feet	44 D-13
20 - south - 10 feet	45 E-18
21 - east - 10 feet	46 E-4
22 - north - 10 feet	47 E-8

SECTION 2-B
FIELD GAS COMPOSITION

Notes:

1. Nomenclature; same as in Section 1-B.
2. All results in percent of total gas.
