

Federal and California Exhaust and Evaporative Emission Standards for Light-Duty Vehicles and Light-Duty Trucks

Federal and California Exhaust and Evaporative Emission Standards for Light-Duty Vehicles and Light-Duty Trucks

Certification and Compliance Division Office of Air Transportation and Air Quality U.S. Environmental Protection Agency

NOTICE

This technical report does not necessarily represent final EPA decisions or positions. It is intended to present technical analysis of issues using data which are currently available. The purpose in the release of such reports is to facilitate the exchange of technical information and to inform the public of technical developments which may form the basis for a final EPA decision, position, or regulatory action.

Federal Certification Exhaust Emission Standards for Light-Duty Vehicles (Passenger Cars) and Light Light-Duty Trucks: Federal Test Procedure (FTP), Cold CO, and Highway & Idle Tests (grams/mile)

I

	Federal Definitions
of 8	Adjusted Loaded Vehicle Weight (ALVW)
	The numerical average of vehicle curb weight and GVWR. (40 CFR 86.1803-01) [Note: The federal "adjusted loaded vehicle weight" definition is identical to the California definition for "test weight."]
	Approach Angle
	The smallest angle in a plan side view of an automobile, formed by the level surface on which the automobile is standing and a line tangent to the front tire static loaded radius arc and touching the underside of the automobile forward of the front tire. (40 CFR 86.1803-01)
	Axle Clearance
	The vertical distance from the level surface on which an automobile is standing to the lowest point on the axle differential of the automobile. (40 CFR 86.1803-01)
	Basic Vehicle Frontal Area
	The area enclosed by the geometric projection of the basic vehicle along the longitudinal axis, which includes tires but excludes mirrors and air deflectors, onto a plane perpendicular to the longitudinal axis of the vehicle. (40 CFR 86.1803-01)
	Breakover Angle
	The supplement of the largest angle, in the plan side view of an automobile, that can be formed by two lines tangent to the front and rear static loaded radii arcs and intersecting at a point on the underside of the automobile. (40 CFR 86.1803-01)
	Clean Fueled Vehicle (CFV) Program
	The Federal program established to promote the sales of low emission vehicles in the State of California (California Pilot Program) and to promote the sales of LEV, ILEV and ULEV vehicles in twenty-two metropolitan areas in the United States (the Clean Fuel Fleet Program). (40 CFR Part 88) Eighteen areas have opted out of the Clean Fuel Fleet Program. The four areas which have adopted federal Clean Fuel Fleet programs are Atlanta, GA Chicago-Gary-Lake County, IL/IN; Denver-Boulder, CO; and the Milwaukee-Racine, WI metropolitan areas.
	Departure Angle
	The smallest angle, in a plan side view of an automobile, formed by the level surface on which the automobile is standing and a line tangent to the rear tire static loaded radius arc and touching the underside of the automobile rearward of the rear tire. (40 CFR 86.1803-01)
	Federal Test Procedure (FTP)
	The test procedure as described in 40 CFR 86.130-00 paragraphs (a) through (d) and (f) which is designed to measure urban driving tail pipe exhaust emissions and evaporative emissions over the Urban Dynamoneter Driving Schedule as described in 40 CFR Part 86 Appendix I. (40 CFR 86.1803-01)
	Gross Vehicle Weight Rating (GVWR)
	The value specified by the manufacturer as the maximum design loaded weight of a single vehicle. (40 CFR 86.1803-01)
	Heavy Light-Duty Truck (HLDT)
	Heavy light-duty truck means any light-duty truck rated greater than 6,000 lbs GVWR. (40 CFR 86.1803-01) Heavy-Duty Vehicle (HDV) Any motor vehicle rated at more than 8,500 pounds GVWR or that has a vehicle curb weight of more than 6000
	pounds or that has a basic vehicle frontal area in excess of 45 square feet. (40 CFR 86.1803-01)
	Incomplete Truck
	Any truck which does not have the primary load carrying device or container attached. (40 CFR 86.1803-01)

	Federal Definitions - Continued
ge 5 of 8	
	Low-Emission Vehicle (LEV)
	Any vehicle certified to low-emission standards.
	Light Light-Duty Truck (LLDT) Light light-duty truck means any light-duty truck rated up through 6,000 lbs GVWR. (40 CFR 86.1803-01)
	[Note: The definition for this category of trucks is essentially identical to the California definition for "light-duty
	truck.")
	Light-Duty Truck (LDT)
	Any motor vehicle rated at 8,500 pounds GVWR or less which has a vehicle curb weight of 6,000 pounds or less
	and which has a basic vehicle frontal area of 45 square feet or less, which is:
	(1) Designed primarily for purposes of transportation of property or is a derivation of such a vehicle, or
	(2) Designed primarily for transportation of persons and has a capacity of more than 12 persons, or
	(3) Available with special features enabling off-street or off-highway operation and use. (40 CFR 86.1803-01)
	Light-Duty Truck 1 (LDT1)
	Any light light-duty truck up through 3,750 lbs loaded vehicle weight. (40 CFR 86.1803-01)
	Light-Duty Truck 2 (LDT2)
	Any light light-duty truck greater than 3,750 lbs loaded vehicle weight. (40 CFR 86.1803-01)
	Light-Duty Truck 3 (LDT3)
	Any heavy light-duty truck up through 5,750 lbs adjusted loaded vehicle weight. (40 CFR 86.1803-01)
	Light-Duty Truck 4 (LDT4)
	Any heavy light-duty truck greater than 5,750 lbs adjusted loaded vehicle weight. (40 CFR 86.1803-01)
	Light-Duty Vehicle (LDV)
	A passenger car or passenger car derivative capable of seating 12 passengers or less. (40 CFR 86.1803-01) [Note: The federal "light-duty vehicle" definition is essentially identical to the California definition for "passenger
	car."] Loaded Vehicle Weight (LVW)
	The vehicle curb weight plus 300 pounds. (40 CFR 86.1803-01)
	National Low Emission Vehicle (NLEV) Program
	The National Low Emission Vehicle Program (NLEV) program is a voluntary program to introduce cleaner cars and light trucks in all parts of the country. Under the agreement between the States and automobile manufacturers, manufacturers began selling cleaner model year 1999 and 2000 cars and trucks in Connecticut, Delaware, Maryland, New Hampshire, New Jersey, Pennsylvania, Rhode Island, Virginia, and the District of
	Columbia. (Massachusetts, New York, Vermont and Maine adopted California emission standards beginning in the 1999, 1999, 2000 and 2001 model years, respectively.) Twenty-four of the largest automobile manufacturers have voluntarily entered into the NLEV program. In model year 2001 to 2003 automobile
	manufacturers will voluntarily sell these cleaner cars and trucks in the 45 states nationwide which are participating in the NLEV program. Although the automobile manufacturers volunteered for the program,
	the lower emission levels and other requirements of the NLEV program are enforceable like any other federal new vehicle program. The NLEV program will continue to exist until the cleaner Federal Tier 2 emission standards become effective in the 2004 model year. (40 CFR Part 86 Subpart R)

 Page 6 of 8 Non-Methane Organic Gases (NMOG) The total mass of oxygenated and non-oxygenated hydrocarbon emissions. SC03 Cycle The test cycle, described in 40 CFR 86.160-00 and listed in Appendix I, paragraph (a), of 40 CFR part 86, which is designed to represent driving immediately following startup, in 95 degrees F ambient conditions with the vehicle air conditioning on. (40 CFR 86.1803-01) Special Features Enabling Off-Street Or Off-Highway Operation And Use A vehicle: (1) That has 4-wheel drive; and (2) That has at least four of the following characteristics calculated when the automobile is at curb weight, on a level surface, with the front wheels parallel to the vehicle's longitudinal centerline, and the tires inflated to the manufacturer's recommended pressure; (i) Approach angle of not less than 28 degrees; (ii) Breakover angle of not less than 20 degrees; (iv) Running clearance of not less than 8 inches; (v) Front and rear axle clearances of not less than 7 inches each. (40 CFR 86.1803-01) Supplemental Federal Test Procedure The additional test procedures designed to measure emissions during aggressive and microtransient driving, as 		Federal Definitions - Continued
The total mass of oxygenated and non-oxygenated hydrocarbon emissions. SC08 Cycle The test cycle, described in 40 CFR 86.160-00 and listed in Appendix I, paragraph (a), of 40 CFR part 86, which is designed to represent driving immediately following startup, in 95 degrees F ambient conditions with the vehicle air conditioning on. (40 CFR 86.1803-01) Special Features Enabling Off-Street Or Off-Highway Operation And Use A vehicle: (1) That has at least four of the following characteristics calculated when the automobile is at curb weight, on a level surface, with the front wheels parallel to the vehicle's longitudinal centerline, and the tires inflated to the manufacturer's recommended pressure; (i) Approach angle of not less than 20 degrees; (ii) Departure angle of not less than 20 degrees; (iii) Departure angle of not less than 20 degrees; (iv) Running clearance of not less than 1 inches; (v) Front and rear axle clearances of not less than 7 inches each. (40 CFR 86.1803-01) Supplemental Federal Test Procedure The additional test procedures designed to measure emissions during aggressive and microtransient driving, as described in 40 CFR 86.1803-01 over the US06 cycle, and also the test procedure designed to measure urban driving emissions while the vehicle's air conditioning system is operating, as described in 40 CFR 86.1803-01 cycle. (40 CFR 86.1803-01 over the US06 cycle, and also the test procedure designed to measure urban driving emissions while the vehicle's air conditioning system is operating, as described in 40 CFR 86.1803-01 cycle. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV) 		Supplemental Federal Test Procedure
 Transitional Low-Emission Vehicle (TLEV) Any vehicle certified to transitional low-emission standards. Ultra-Low-Emission Vehicle (ULEV) Any vehicle certified to ultra-low emission standards. US06 The test cycle, described in 40 CFR 86.159-00 and listed in appendix 1, paragraph (g) of 40 CFR part 86, which is designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01) Vehicle Curb Weight (VCW) The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.1803-01) Zero-emission vehicle (ZEV) 		described in 40 CFR 86.159-00 over the US06 cycle, and also the test procedure designed to measure urban driving emissions while the vehicle's air conditioning system is operating, as described in 40 CFR 86.160-00 over the SC03
 Ultra-Low-Emission Vehicle (ULEV) Any vehicle certified to ultra-low emission standards. US06 		
Any vehicle certified to ultra-low emission standards. US06 The test cycle, described in 40 CFR 86.159-00 and listed in appendix 1, paragraph (g) of 40 CFR part 86, which is designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01) Vehicle Curb Weight (VCW) The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV)		Any vehicle certified to transitional low-emission standards.
 US06 The test cycle, described in 40 CFR 86.159-00 and listed in appendix 1, paragraph (g) of 40 CFR part 86, which is designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01) Vehicle Curb Weight (VCW) The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV) 		Ultra-Low-Emission Vehicle (ULEV)
The test cycle, described in 40 CFR 86.159-00 and listed in appendix 1, paragraph (g) of 40 CFR part 86, which is designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01) Vehicle Curb Weight (VCW) The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV)		Any vehicle certified to ultra-low emission standards.
designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01) Vehicle Curb Weight (VCW) The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV)		
The actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV)		designed to evaluate emissions during aggressive and microtransient driving. (40 CFR 86.1803-01)
equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the manufacturer. (40 CFR 86.1803-01) Zero-emission vehicle (ZEV)		5
Zero-emission vehicle (ZEV)		equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with 40 CFR 86.082-24; incomplete light-duty trucks shall have the curb weight specified by the
		Any venice certified to zero emission standards.

	Exhaust and Evaporative Emission Standards	
	California Definitions	
8		
н	e avy-Duty Vehicle (HDV) Any motor vehicle having a manufacturer's gross vehicle weight rating greater than 6000 pounds, except	
	passenger cars.	
In	complete Vehicle	
	Any vehicle which does not have the primary load carrying device or container attached. In situations where individual marketing relationships makes the status of the vehicle questionable, the Executive Officer shall	
Ti	determine whether a specific model complies with the definition of incomplete vehicle. ght-Duty Truck (LDT)	
	Any motor vehicle, rated at 6000 pounds gross vehicle weight or less, which is designed primarily for purpose transportation of property or is a derivative of such a vehicle, or is available with special features enabling off-street or off-highway operation and use.	
	[Note: The California "light-duty truck" definition is essentially identical to the federal definition for "light light duty truck."]	
Li	ght-Duty Truck 1 (LDT1)	
	Any light-duty truck up through 3,750 lbs loaded vehicle weight.	
	[Note: California does not use the terms "light-duty truck 1" and "light-duty truck 2" in an official sense. Howe they subdivide their light-duty trucks of less than 6000 pounds GVWR based on LVW in exactly the same way federal regulations do, so these terms are applied to California emission standards to facilitate comparison.]	
Li	ght-Duty Truck 2 (LDT2)	
	Any light-duty truck greater than 3,750 lbs loaded vehicle weight. [Note: California does not use the terms "light-duty truck 1" and "light-duty truck 2" in an official sense. Howe they subdivide their light-duty trucks of less than 6000 pounds GVWR based on LVW in exactly the same way federal regulations do, so these terms are applied to California emission standards to facilitate comparison.]	
Lo	w-Emission Vehicle (LEV)	
	Any vehicle certified to low-emission standards.	
М	edium-Duty Vehicle (MDV) Any pre-1995 model year heavy-duty vehicle having a manufacturer's gross vehicle weight rating of 8,500 pou or less, any 1992 and subsequent model year heavy-duty low-emission, ultra-low-emission, super-ultra-low- emission or zero-emission vehicle having a manufacturer's gross vehicle weight rating of 14,000 pounds or les any 1995 and subsequent model year heavy duty vehicle having a manufacturer's gross vehicle weight rating 14,000 pounds or less. Medium-duty vehicles are subdivided into five classes (MDV1-MDV5) based on vehic test weight.	
N	on-Methane Organic Gases (NMOG)	
5	The total mass of oxygenated and non-oxygenated hydrocarbon emissions.	
Pa	Issenger Car (PC) Any motor vehicle designed primarily for transportation of persons and having a design capacity of 12 person less.	
	[Note: The California "passenger car" definition is essentially identical to the federal definition for "light-duty vehicle."]	

	California Definitions - Continued
age8 of 8	
	Super-Ultra-Low-Emission Vehicle (SULEV)
	Any medium-duty vehicle certified to super-ultra-low-emission standards.
	Test Weight (TW) The average of the vehicle's curb weight and gross vehicle weight.
	[Note: The California "test weight" definition is identical to the federal definition of "adjusted loaded vehicle
	weight."]
	Transitional Low-Emission Vehicle (TLEV)
	Any vehicle certified to transitional low-emission standards.
	Ultra-Low-Emission Vehicle (ULEV)
	Any vehicle certified to ultra-low emission standards.
	Zero-emission vehicle (ZEV)
	Any vehicle certified to zero-emission standards.
