

2021 SmartWay Shipper Company Partner Tool: What's New in this Version?

Version 2.0.20 of the Shipper Tool contains a number of updates and revisions to the prior version, 2.0.19. These updates have been implemented to enhance the usefulness, clarity and accuracy of the Tool, and are summarized below:

-  If the user chooses the Way 4 participation level, only Mile & Weight Improvements and Modal Shift Impacts implemented during the reporting year will be counted towards Way 4 participation. Partners can still use the tool to estimate changes from activities to be implemented in the coming year as before, but they will not count towards Way 4 participation requirements.
-  Black carbon emissions estimates are now available in the tool's Emissions Summary, Carrier Performance, and SmartWay Category Detail reports.
-  Miscellaneous text and format updates for clarification.
