The site will keep you on top of the latest developments in the U.S. EPA's Design for the Environment (DfE) Program and its efforts to help businesses incorporate environmental considerations into both the design and redesign of products and processes, and into technical and management systems.

DfE is currently working in voluntary partnership on several projects with the following industry sectors:

- Printed Wiring Boards
- Screen Printing
- Lithography
- Flexography
- Garment and Textile Care
- Metal Finishing

The site will also keep you informed about other aspects of the DfE Program, including:

- Educational Initiatives
- Green Chemistry Program
- Assessment Tools
- Environmentally Preferable Purchasing Program

Browse the DfE Website to learn more about these initiatives, view and download information products, learn about upcoming events, link to related websites, and order publications.
