THE EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT

EPA has prepared this brochure to alert businesses to their reporting obligations under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA),^{*} and to help you determine whether your facility is covered under the law. If you are covered, this brochure will also help you prepare to meet your reporting obligations. If you are uncertain whether you are covered, it will tell you how to get assistance.

This brochure deals with reporting requirements of only one section of the Emergency Planning and Community Right-to-Know Act: Section 313, which pertains to release reporting. Other EPCRA planning and reporting requirements may also affect your business. The nearest EPA regional office can provide complete details, but the other basic requirements of EPCRA are as follows:

Facility owners/operators that have on their premises chemicals designated under EPCRA as "extremely hazardous substances" must cooperate with state and local planning officials in preparing comprehensive emergency plans (Sections 302 and 303);

■ Facility owners/operators must report accidental releases of, "extremely hazardous substances" and CERCLA "hazardous substances" to state and local response officials (Section 304); and

* The Act is also known as Title III of SARA (the Superfund Amendments and Reauthorization Act of 1986).

Facility owners/operators must make Material Safety Data Sheets (MSDSs) available to local and state officials and must also report, to local and state officials, inventories (including locations) of chemicals on their premises for which MSDSs exist (Sections 311 and 312).

For more information on the Emergency Planning and Community Right-to-Know Act, ask your regional EPA office for the EPCRA Fact Sheet; or call the Emergency Planning and Community Right-to-Know Information Hotline (800) 535-0202 or (703) 412-9877.

REPORT TOXIC CHEMICAL RELEASES

Under Section 313 of the Emergency Planning and Community Right-to-Know Act, certain businesses are required to submit reports each year on the amounts of toxic chemicals their facilities release into the environment, either routinely or as a result of accidents. The purpose of this reporting requirement is to inform government officials and the public about releases of toxic chemicals into the environment. Section 313 requires facilities to report releases to air, water, and land. The reports must be sent to the United States Environmental Protection Agency (EPA) and to designated state agencies. Reports are due by July 1 each year. Those who fail to report as required are subject to civil penalties of up to \$25,000 a day.

The final Toxic Chemical Release Inventory rule under Section 313 was published in the Federal Register on February 16, 1988.

WHO MUST REPORT

A plant, factory, or other facility is subject to the provisions of Section 313 if it meets all three of the following criteria:

It conducts manufacturing operations (is included in Standard Industrial Classification (SIC) codes 20 through 39, listed on page 9); and

It has 10 or more full-time employees (or the equivalent 20,000 hours per year); and

It manufactures, imports, processes, or otherwise uses any of the toxic chemicals listed on pages 15-35 in amounts greater than the "threshold" quantities specified below. At present, 651 chemicals and chemical categories are covered. The list may be changed in future years.

THRESHOLDS

Thresholds are specified amounts of toxic chemicals used during the calendar year that trigger reporting requirements.

If you *manufacture* or *import* any of the listed toxic chemicals, the threshold quantity will be:

- **25,000 pounds per toxic chemical or category over the calendar year.**

If you *process* any of the listed toxic chemicals, the threshold quantity will be:

- **25,000 pounds per toxic chemical or category over the calendar year.**

If you *otherwise use* any of the listed toxic chemicals (without incorporating it into any product or producing it at the facility), the threshold quantity is:

- **10,000 pounds per toxic chemical or category over the calendar year.**

What is meant by the terms "**manufacture**," "**process**," or "**otherwise use**?"

- **Manufacture** - means to produce, prepare, import, or compound one of the toxic chemicals on the list. For example, if you make a dye for clothing by taking raw materials and reacting them, you are manufacturing the dye. You would also be covered if you were a textile manufacturer who imported a dye on the list for purposes of applying it to fabric produced at your plant.
- **Process** - in general, is the incorporation of a toxic chemical into a product and includes making mixtures, repackaging, or using a chemical as a feedstock, raw material, or starting material for making another chemical.

Examples of processing include:

- Adding a solvent as a diluent when making a paint, coating, or other mixture;
- Using a chemical as reactant in the manufacture of a pesticide (e.g., using chemical A to make chemical B).

- **Otherwise Use** - applies to any use of a toxic chemical at a covered facility that is not covered by the terms "manufacture" or "process" and includes use of a toxic chemical contained in a mixture or trade name product. A toxic chemical that is *otherwise used* by a facility is not intentionally incorporated into a product distributed in commerce.

Examples include:

- Using a metal cutting fluid that contains diethanolamine;
- Using a heat transfer fluid containing biphenyl;
- Using trichloroethylene to degrease tools;
- Using chlorine in waste water treatment;
- Using Freon 113 as a refrigerant to cool process streams.

Section 313 defines a "facility" as all buildings, equipment, structures, and other stationary items which are located on a single site or on contiguous or adjacent sites and which are owned or operated by the same person. Warehouses on the same site as covered facilities are covered at the threshold levels given above. Stand-alone warehouses that do not support a manufacturing operation are not currently covered.

The reporting thresholds apply to toxic chemicals known by the owner or operator to be used in amounts above the thresholds. Section 313 requires suppliers of mixtures and trade name products to notify customers of the presence of Section 313 listed toxic chemicals in their products above certain *de minimis* concentrations (these cutoffs are discussed under "Exemptions"). This supplier notification requirement has been in effect since January 1, 1989.

EXEMPTIONS

Under certain circumstances, some or all of the reporting requirements under Section 313 may not apply to a facility. The following are the major exemptions:

◆ **De minimis** concentrations of a toxic chemical in certain mixtures. In determining whether the amount of a toxic chemical used at your facility exceeds the reporting threshold listed on page 3, you are not required to count the amount of chemical present in a mixture *if* its concentration is less than 1 percent of the mixture, or

its concentration is less than 0.1 percent of the mixture when the chemical is defined by the Occupational Safety and Health Administration (OSHA) as carcinogenic; the chemical list beginning on page 15 identifies these chemicals.

◆ **Articles.** In considering whether a reporting threshold has been exceeded, you are not required to count toxic chemicals present in articles processed or used at your facility. An "article" is a manufactured item: (1) which is formed to a specific shape or design during manufacture; (2) which has end use functions dependent in whole or in part upon its shape or design during end use; and (3) which does not release a toxic chemical under normal conditions of processing or use of that item at the facility or establishments.

◆ **Specified Uses.** In considering whether a reporting threshold has been exceeded, you are not required to count toxic chemicals that are used at your facility for any of the following purposes:

As a structural component of the facility;

in routine janitorial or facility grounds maintenance;

In foods, drugs, cosmetics, or other items for personal use, including supplies of such items (for example, in a facility-operated cafeteria);

In motor vehicle maintenance (including motor fuel); or

In process water and non-contact cooling water as drawn from the environment or from municipal sources, or in air used either as compressed air or as part of combustion.

◆ **Laboratory Activities.** In considering whether a reporting threshold has been exceeded, you are not required to count toxic chemicals that are manufactured, processed, or otherwise used for research or quality control in a laboratory at a covered facility under the supervision of a technically qualified individual. This exemption does not apply to production, processing, or the use of toxic chemicals in pilot plant scale operations and laboratories for distribution in commerce.

◆ **Owners of Leased Property.** The owner of a covered facility is not subject to reporting under Section 313 if the owner's only interest in the facility is ownership of the real estate upon which the facility is operated. However, the operator of the facility must report if the criteria are met.

HOW TO REPORT

The owner or operator of a covered facility must report annually. Reports must be submitted on or before July 1 and cover activities that occurred at the facility during the previous calendar year.

EPA will provide a reporting form (EPA Form R) with instructions and technical guidance on how to calculate toxic chemical releases or emissions from your facility. For information on how to obtain the reporting form and instructions, contact the Emergency Planning and Community Right-to-Know Information Hotline. For other technical guidance, write a letter or check the boxes for those publications on the back cover, detach the cover, and mail it to: Emergency Planning and Community Right-to-Know Document Distribution Center, Attn: NCEPI, P.O. Box 42419, Cincinnati, OH 45242-2419; or any of the EPA regional offices listed on pages 13-14.

You are not required to measure or monitor releases for purposes of Section 313 reporting. You may use readily available data to report the quantities of chemicals that you use and the amounts released into the environment. If you have no data available, the law permits you to report reasonable estimates. EPA's technical guidance on calculating releases can help you in making estimates.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) GROUPS SUBJECT TO SECTION 313

WHAT YOU MUST REPORT

You must report on EPA Form R the following information for each listed toxic chemical manufactured, imported, processed, or otherwise used at your facility in yearly amounts which exceed the threshold:

- The name and location of your facility;
- The identity of the listed toxic chemical (unless you claim its identity to be a trade secret);
- Whether you manufacture, import, process, or otherwise use the toxic chemical;
- The maximum quantity of the toxic chemical on-site at any time during the year;
- The total quantity of the toxic chemical released during the year, including both accidental spills and routine emissions - separate estimates must be provided for releases to air, water, land and injected underground;
- Off-site locations to which you shipped wastes containing the toxic chemical and the quantities of that toxic chemical sent to those locations for recycling, energy recovery, treatment, or disposal;
- On-site recycling, energy recovery, treatment, or disposal methods used for wastes containing the toxic chemical and estimates of the treatment efficiency for each toxic chemical;
- Quantities of the toxic chemical recycled, combusted for energy recovery, treated, and released on-site and off-site; and
- Source reduction activities involving the toxic chemical.

For purposes of Section 313, a release is defined as any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles) of any "toxic chemical" (i.e., any of the chemicals or chemical categories on pages 15-35).

PUBLIC ACCESS TO REPORTS

The law requires facilities covered by Section 313 to send toxic chemical release reports both to EPA and to the state in which the facility is located. At EPA, the Office of Pollution Prevention and Toxics is responsible for receiving and processing the data. The agency designated to receive reports in your state is listed in the instructions for Form R.

EPA is required by law to make the data in the reports available to the public through a computer database. (You can claim the toxic chemical identity to be a trade secret, but you must justify the claim to EPA. The final Trade Secret rule was published in the Federal Register on July 29, 1988.) The database is intended to help answer citizens' questions about toxic chemical releases in their community. The users of the data are also likely to include researchers from the government or universities conducting environmental analyses. EPA expects to use the data in a variety of ways, including targeting problem pollution areas and as a screening tool for developing standards and regulations.

WHAT YOU CAN DO NOW

You can begin planning now to make compliance with Section 313 as easy and inexpensive as possible. The steps are as follows:

- [1] Check that you have 10 or more full-time employees (that is, if the total annual hours worked by all employees is at least 20,000 hours).
- [2] Check the SIC code list on page 9 to determine whether your facility is covered (i.e., has an SIC code of 20-39).
- [3] Check the list of toxic chemicals covered by Section 313 (pages 15-35) to see if any are manufactured, imported, processed, or otherwise used by your facility. Your chemical supplier is required to inform you if any of the Section 313 toxic chemicals are contained in mixtures sold to you. Also, the document "Common Synonyms for Section 313 Chemicals" can assist you in identifying toxic chemicals.
- [4] Determine whether you handle any toxic chemical on the list in an amount greater than the thresholds on page 3.
- [5] If you meet the criteria, request copies of the reporting form, instructions, and any of the appropriate guidance documents listed on page 37 and 38.
- [6] Begin to develop the appropriate information to report your releases and your source reduction and recycling activities.
- [7] Maintain a recordkeeping system that will help you estimate releases for future years.

You should designate someone at your facility to be responsible for reporting under Section 313. That person should obtain reporting forms and instructions and should be aware of the reporting deadline: July 1 of each year.

For information on how to obtain the reporting form and instructions, contact the Emergency Planning and Community Right-to-Know Information Hotline. Additional guidance documents can be obtained by mailing the order form on the inside back cover or by calling one of the EPA regional offices listed on pages 13-14.

CHEMICAL CATEGORIES

Section 313 requires reporting on the toxic chemical categories listed below, in addition to the specific toxic chemicals listed above. The de minimis concentration for each category is provided in parentheses.

CHEMICAL CATEGORIES

Antimony Compounds (0.1)

Includes any unique chemical substance that contains antimony as part of that chemical's infrastructure.

Arsenic Compounds (inorganic compounds: 0.1; organic compounds: 1.0)

Includes any unique chemical substance that contains arsenic as part of that chemical's infrastructure.

Barium Compounds (0.1)

Includes any unique chemical substance that contains barium as part of that chemical's infrastructure.

This category does not include: Barium sulfate
CAS Number 7727-43-7

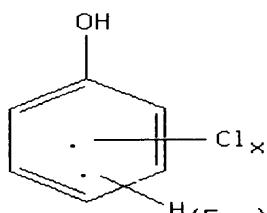

Beryllium Compounds (inorganic compounds: 0.1; organic compounds: 1.0)

Includes any unique chemical substance that contains beryllium as part of that chemical's infrastructure.

Cadmium Compounds (inorganic compounds: 0.1; organic compounds: 1.0)

Includes any unique chemical substance that contains cadmium as part of that chemical's infrastructure.

Chlorophenols

Where $x = 1$ to 5

CHEMICAL CATEGORIES

Chromium Compounds (chromium VI compounds: 0.1; chromium III compounds: 1.0)

Includes any unique chemical substance that contains chromium as part of that chemical's infrastructure.

Cobalt Compounds (1.0)

Includes any unique chemical substance that contains cobalt as part of that chemical's infrastructure.

Copper Compounds (1.0)

Includes any unique chemical substance that contains copper as part of that chemical's infrastructure.

This category does not include copper phthalocyanine compounds that are substituted with only hydrogen, and/or chlorine, and/or bromine.

Cyanide Compounds (1.0)

X^+CN^- where $X = H^+$ or any other group where a formal dissociation may occur. For example KCN or $Ca(CN)_2$

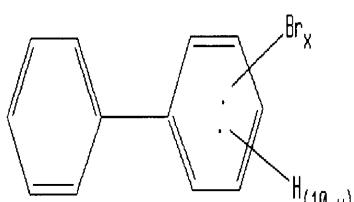

Diisocyanates (1.0)

This category includes only those chemicals listed below.

38661-72-2	1,3-Bis(methylisocyanate) cyclohexane
10347-54-3	1,4-Bis(methylisocyanate) cyclohexane
2556-36-71	4-Cyclohexane diisocyanate
134190-37-7	Diethyl diisocyanato benzene
4128-73-84	4'-Diisocyanatodiphenyl ether
75790-87-32	4'-Diisocyanatodiphenyl sulfide
91-93-0	3,3'-Dimethoxybenzidine-4,4'-diisocyanate
91-97-4	3,3'-Dimethyl-4,4'-diphenylene diisocyanate
139-25-3	3,3'-Dimethyl diphenylmethane-4,4'-diisocyanate
822-06-0	Hexamethylene-1,6-diisocyanate
4098-71-9	Isophorone diisocyanate
75790-84-0	4-Methyldiphenylmethane-3,4-diisocyanate
5124-30-1	1,1-Methylene bis(4-isocyanato cyclohexane)
101-68-8	Methylenebis(p-henylisocyanate) (MDI)
3173-72-6	1,5-Naphthalene diisocyanate
123-61-5	1,3-Phenylene diisocyanate
104-49-4	1,4-Phenylene diisocyanate
9016-87-9	Polymeric diphenylmethane diisocyanate

CHEMICAL CATEGORIES	
16938-22-0	2,2,4-Trimethylhexamethylene diisocyanate
15646-96-5	2,4,4-Trimethylhexamethylene diisocyanate
Ethylenebisdithiocarbamic acid, salts and esters (1.0) Includes any unique chemical substance that contains and EDBC or an EDBC salt as part of that chemical's infrastructure.	
Certain Glycol Ethers (1.0) R-(OCH ₂ CH ₂) _n -OR' Where n = 1, 2, or 3 R = alkyl C7 or less; or R = phenyl or alkyl substituted phenyl; R' = H, or alkyl C7 or less; or OR' consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.	
Lead Compounds (inorganic compounds: 0.1; organic compounds 1.0) Includes any unique chemical substance that contains lead as part of that chemical's infrastructure.	
Manganese Compounds (1.0) Includes any unique chemical substance that contains manganese as part of that chemical's infrastructure.	
Mercury Compounds (1.0) Includes any unique chemical substance that contains mercury as part of that chemical's infrastructure.	
Nickel Compounds (0.1) Includes any unique chemical substance that contains nickel as part of that chemical's infrastructure.	
Nicotine and salts (1.0) Includes any unique chemical substance that contains nicotine or a nicotine salt as part of that chemical's infrastructure.	
Nitrate compounds (water dissociable; reportable only when in aqueous solution) (1.0)	
Polybrominated Biphenyls (PBBs) (0.1)	

Where x = 1 to 10

CHEMICAL CATEGORIES	
Polychlorinated alkanes (C10 to C13) (0.1) $C_xH_{2x+2y}Cl_y$ where x = 10 to 13; y = 3 to 12; and the average chlorine content ranges from 40 - 70% with the limiting molecular formulas $C_{10}H_{19}Cl_3$ and $C_{13}H_{16}Cl_{12}$	
Polycyclic aromatic compounds (PACs) (0.1) This category includes only those chemicals listed below.	
56-55-3	Benz(a)anthracene
205-99-2	Benzo(b)fluoranthene
205-82-3	Benzo(j)fluoranthene
207-08-9	Benzo(k)fluoranthene
189-55-9	Benzo(rst)pentaphene
218-01-9	Benzo(a)phenanthrene
50-32-8	Benzo(a)pyrene
226-36-8	Dibenz(a,h)acridine
224-42-0	Dibenz(a,j)acridine
53-70-3	Dibenz(a,h)anthracene
194-59-2	7H-Dibenzo(c,g)carbazole
5385-75-1	Dibenz(a,e)fluoranthene
192-65-4	Dibenz(a,e)pyrene
189-64-0	Dibenz(a,h)pyrene
191-30-0	Dibenz(a,l)pyrene
57-97-6	7,12-Dimethylbenz(a)anthracene
193-39-5	Indeno[1,2,3-cd]pyrene
3697-24-3	5-Methylchrysene
5522-43-0	1-Nitropyrene
Selenium Compounds (1.0) Includes any unique chemical substance that contains selenium part of that chemical's infrastructure.	
Silver Compounds (1.0) Includes any unique chemical substance that contains silver part of that chemical's infrastructure.	
Strychnine and salts (1.0) Includes any unique chemical substance that contains strychnine or a strychnine salt as part of that chemical's infrastructure.	
Thallium Compounds (1.0) Includes any unique chemical substance that contains thallium as part of that chemical's infrastructure.	
Warfarin and salts (1.0) Includes any unique chemical substance that contains warfarin or a warfarin salt as part of that chemical's infrastructure.	
Zinc Compounds (1.0) Includes any unique chemical substance that contains zinc as part of that chemical's infrastructure.
