GENERAL INFORMATION

Purpose:

The "Status of Pesticides in Special Review and Reregistration" (also known as the "Rainbow Report") lists those pesticides that are undergoing or have completed EPA's Special Review Process, or the reregistration process mandated by FIFRA '88. It summarizes the current status of each pesticide.

Timing:

The Rainbow Report will be issued annually by the Special Review and Reregistration Division in EPA's Office of Pesticide Programs. Chapter 2 - Special Review - carries information current as of April 1994. Chapter 3 - Reregistration - is current through May 1994.

Comments and Additional Copies:

To request additional copies of the Rainbow Report, receive future editions, or make comments or corrections, please contact:

Rainbow Report
Special Review and Reregistration Division (7508W)
Office of Pesticide Programs
US EPA
Washington, DC 20460

Telephone: 703-308-8000
Fax: 703-308-8005

Additional Information:

Copies of the Special Review Position Documents, Reregistration Eligibility Decision Documents (REDs), and related fact sheets are available for a fee from:

National Technical Information Service (NTIS)
ATTN: Order Desk
5285 Port Royal Road
Springfield, VA 22161

Telephone: 703-487-4650

When requesting a document from NTIS, please provide its name and NTIS Publication Number (PB).

For a complete list of pesticide regulatory documents available from NTIS, please contact:

Document Management Section
Information Services Branch
Program Management and Support Division (7502C)
Office of Pesticide Programs
US EPA
Washington, DC 20460

Telephone: 703-305-5240

Electronic Access:

EPA is in the process of making the Special Review status report available electronically through its Pesticide Information Network, or PIN. If you are interested in gaining access to this free bulletin board, please contact:

Constance Haaser or Leslie Davies-Hillard

703-305-7499

CHAPTER TWO

SPECIAL REVIEW

CHAPTER TWO: SPECIAL REVIEW

This Chapter is organized as follows. The first section explains the Special Review process, including the criteria the Agency uses to initiate a Special Review, the steps the Agency takes in conducting a Special Review, and risk reduction alternatives to the conventional Special Review process. The next section provides an "At a Glance" summary of the dates when Special Review decision documents were published in the Federal

Register. The third section is a comprehensive reference list of all chemicals which have been or are currently in the Special Review program. The chemicals are in alphabetical order within categories of Special Review. The last section lists the chemicals in identical sequence and, in addition, presents the details of Special Review criteria met or exceeded, and outcomes of the reviews.

THE SPECIAL REVIEW PROCESS

The Special Review process is set in motion when EPA has reason to believe that the use of a pesticide may result in unreasonable adverse effects to people or the environment. On November 27, 1985, the Agency promulgated a final rule which established new criteria for the initiation of a Special Review (40 CFR Part 154.7). The criteria for initiating a Special Review of a pesticide use are:

1. Acute toxicity to humans or domestic animals.
2. Potential chronic or delayed toxic effects in humans.
3. Potential hazards to non-target organisms.
4. Risk to the continued existence of any threatened or endangered species.
5. Risk of destruction or other adverse modification of a critical habitat of any threatened or endangered species.
6. Any other adverse effect to humans or the environment which may outweigh the benefits that justify initial or continued registration.

As required by the regulations, the producers of a pesticide, or "registrants", receive private notification that the Agency is considering issuing a Notice of Special Review. This private notification commences the pre-Special Review phase of the process. The registrant has 30 days to dispute the validity of the Agency's concerns.

If, after private notification to the registrants, the Agency tentatively determines that use of the pesticide does not pose a significant risk, a Federal Register (FR) notice is issued which explains the reasons for the Agency's decision. This notice also announces the availability of the public docket, which includes the pre-Special Review notification and all written information received in response to the notification. The FR notice also solicits public comment, after which the Agency makes a final decision on whether to initiate a Special Review.

If the Agency determines that a significant risk may be associated with a pesticide, a Notice of Special Review (Position Document 1) will be published in the FR. This notice describes the Special Review criterion of concern, the assumptions and data used in the analysis and the strength of the conclusions. The notice will also announce the availability of the pre-Special

Review public docket, solicit public comment and request additional information on the pesticide.

After issuance of the Notice of Special Review, the Agency may meet with interested parties to discuss the risk concerns and available options to reduce the potential risks to health or the environment. Commencement of the Special Review process is accompanied by an Agency-conducted, comprehensive risk/benefit analysis of each use of the pesticide subject to Special Review. Potential risks are evaluated by considering factors such as: 1) adverse effects to health or the environment; 2) magnitude of exposure of humans and other non-target organisms; and 3) size of the population at risk. Benefits of use are evaluated by assessing the availability, efficacy and cost of alternative control methods, and impact on users, consumers and other parties (except the registrant) if the pesticide is cancelled.

If, after issuance of a Position Document 1, the risks are determined to be lower than originally believed and acceptable, the Agency may decide that continuation of the Special Review is not warranted. This new risk determination may result from further in-depth risk/benefit analyses or risk reduction actions taken on behalf of the registrants. In these instances after a Position Document 1 has been issued but prior to issuing a Position Document 2/3, the Agency ends the Special Review by publishing a Notice of Decision to Terminate the Special Review (Position Document 2) in the FR.

If the Special Review is not concluded by publishing a Position Document 2, a Notice of Preliminary Determination (Position Document 2/3) is then published in the FR for public comment. If the registrants voluntarily amend their registrations in a manner which would reduce the risks of the pesticide use to acceptable levels, the notice explains the Agency's previous risk concerns and the voluntary resolutions made by the registrants to alleviate the potential risks. If the registrants do not voluntarily amend the conditions of registrations in order to reduce risks to an acceptable level, the notice would include the regulatory measures the Agency believes are required to reduce risks of the pesticide use(s) to acceptable levels and a proposed notice of

intent to cancel, deny or reclassify any registrations which do not comply with these measures.

The Preliminary Determination is then submitted to the FIFRA Scientific Advisory Panel (SAP) for comment on the Agency's scientific rationale. At the same time, the Agency submits the proposed notice to the United States Department of Agriculture (USDA) for comment, especially on the benefits issues and agricultural impacts.

After evaluating all comments received from the USDA, the SAP, and the public on the proposed action, the Agency will modify the proposal where appropriate prior to issuance as a final action. A Notice of Final Determination (Position Document 4) is published in the FR, along with a Notice of Intent to Cancel, Deny, or Reclassify Registration if required to implement the determination. Any such notice becomes effective by operation of law unless the registrant makes the necessary corrections or a hearing is timely requested by a person adversely affected by the notice.

The ultimate goal of the Special Review process is to reduce the risks posed by a pesticide to an acceptable level while taking into consideration the benefits provided by the use of that pesticide. Several alternatives to the conventional process are available that also achieve risk reduction but in a more accelerated manner. They include the following: 1) issuing a Position Document 1/2/3 - A Position Document 1/2/3 may be used when the Agency has sufficient information at the outset of a Special Review to fully assess both the risks and benefits. The Position Document 1/2/3 bypasses the Position Document 1 stage and provides a full discussion of risks, benefits, and proposed decision at the same time. 2) Notice of Intent to Cancel (NOIC) - Under FIFRA section 6(b), the Agency may issue a NOIC when it has been determined that a pesticide poses unreasonable adverse effects. Those uses or registrations posing the risks are cancelled and removed from the market. 3) Suspension Order/Emergency Suspension Order - Under FIFRA section 6(b), the Agency may issue a suspension order or emergency suspension order to quickly remove a pesticide from the market

when it poses an imminent hazard. 4) Negotiated settlements - At any time, a registrant may reach an agreement with the Agency to modify the terms and conditions of a pesticide registration in order to reduce the risk to an acceptable level. The modifications may include, but are not limited to, cancelling uses, changing use patterns, changing application methods and/or rates and imposing protective measures.

These alternatives to the conventional Special Review process do not serve to replace the intensive review process. In many cases they are used concurrently with the conventional process to achieve expeditious risk reduction of critical concerns while the overall review continues. In other cases, the alternatives are used to quickly reduce risk concerns associated with the use of a pesticide before it is placed in the formal Special Review process.

SPECIAL REVIEW DECISION DATES AT A GLANCE

Chemical	Date published in Federal Register				
	Notice Not to Initiate a Special Review	Notice of Special Review PD1	Regulatory action PD2	Proposed regulatory position PD2/3	Final regulatory action
1,3-Dichloropropene		10/08/86			
2,4,5-T/Silvex		04/21/78		07/17/79	12/13/79 (PD 4)
2,4,5-Trichlorophenol (TCP)		08/02/78			04/29/87 (PD 2/3/4)
2,4-D [also 2,4-DB and 2,4-DP] ¹	03/23/88 (proposed)				
Acrylonitrile (3 products cancelled)					06/19/78 6(f) ²
Alachlor		01/09/85		10/08/86	12/31/87 (PD 4)
Aldicarb		07/11/84		06/29/88	
Aldrin					10/18/74
Amitraz		04/06/77		01/12/79	06/07/79 (PD 4)

Chloranil					01/19/77 6(f)
Chlordane					04/08/88
Chlordane/Heptachlor					04/08/88
Chlordecone (Kepone)					07/27/77
Chlordimeform					02/08/89 6(f)
Chlorinated Isocyanurates	05/20/88				
Chlorobenzilate		05/26/76		07/11/78	02/13/79 (PD 4)

¹The Agency issued a Federal Register Notice proposing not to initiate the Special Review. A final decision is yet to be made and will be based on evaluation of expert panel to determine carcinogenicity.

²Publication of a 6(f) Notice of Receipt of Request to Cancel Registrations may eliminate the need for continuance of a Special Review action if all of the uses posing the risks of concern are voluntarily cancelled by the registrant. The Agency will grant approval for the cancellation request and therefore, preclude the need for an intensive review since cancellation of the uses will eliminate the risks. This type of action can occur prior to issuance of a PD1 or Grassley-Allen notification.

¹The Agency issued a Federal Register Notice proposing not to initiate the Special Review. A final decision is yet to be made and will be based on evaluation of expert panel to determine carcinogenicity.

²Publication of a 6(f) Notice of Receipt to Cancel Registrations may eliminate the need for continuance of a Special Review action if all of the uses posing the risks of concern are voluntarily cancelled by the registrant. The Agency will grant approval for the cancellation request and therefore, preclude the need for an intensive review since cancellation of the uses will eliminate the risks. This type of action can occur prior to issuance of a PD 1 or Grassley-Allen notification.

REFERENCE LISTS OF PESTICIDES IN SPECIAL REVIEW

The five alphabetical lists below (repeated with more detailed information in the next section) provide information as follows:

1. **Special Reviews in Process** lists chemicals which are now formally in Special Review or which are in pre-Special Review, i.e., chemicals for which it is public knowledge that they are being considered for formal Special Review.
2. **Special Reviews Completed** lists chemicals which have Special Review final determinations;
3. **Final Determinations on Pre-Special Reviews** lists chemicals returned to the registration process after a pre-Special Review determination;
4. **Final Actions/Voluntary Cancellations** lists chemicals which have had final actions such as voluntary cancellations or Notice of Intent to Cancel (NOIC) issued prior to any formal Special Review action; and
5. **Cancellations Issued Prior to RPAR/Special Review Process** lists chemicals cancelled prior to the RPAR and Special Review processes. RPAR stands for Rebuttable Presumption Against Registration, the name used for Special Review prior to 1986.

STATUS OF INDIVIDUAL PESTICIDE REVIEWS

1. Special Reviews in Process

Pesticide and Review Criteria
Possibly Met or Exceeded

Current Status

ALDICARB

Sepehr Haddad (703-308-8027)

- Acute Toxicity
- Ground Water Contamination
- PD 1 published 49 FR 28320 7/11/84; comment period closed 9/11/84: NTIS# PB90-259904.
- PD 2/3 published 53 FR 24630 on 6/29/88; comment period closed 9/29/88: NTIS# PB90-261611.
- Registrant agreed to dietary risk reduction measures on 1/30/92 that included voluntary cancellation of the use on bananas through non-payment of annual maintenance fees and registration amendments to remaining uses posing dietary risk concern (potatoes, sweet potatoes, oranges, and grapefruits).

ATRAZINE

Joe Bailey (703-308-8173)

- Carcinogenicity
- Ground Water Contamination
- Worker Risks (Cardiac effects)
- Chemical is in pre-Special Review Status.
- Grassley-Allen preliminary notification issued 8/17/88 and 8/24/89.
- Docket index of material is available for public use.

2,4-D [also 2,4-DB and 2,4-DP]

Jill Bloom (703-308-8019)

- Carcinogenicity
- Chemical is in pre-Special Review status.
- Proposed decision not to initiate Special Review published 53 FR 9590 published on 3/23/88.
- Final decision may be issued in FY '93 but is contingent upon evaluation of an expert panel to determine carcinogenicity. The panel is expected to meet in April, 1993.
- Industry Task Force on 2,4-D Research Data agreed to risk reduction measures in September, 1992 that included an exposure reduction plan effected through modifications to technical and manufacturing use labels and implementation of a user education program.

1. Special Reviews in Process (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Current Status

1,3-DICHLOROPROPENE

Lisa Engstrom (703-308-8031)

- Carcinogenicity
 - PD 1 published 51 FR 36161 on 10/8/86; comment period closed 12/8/86: NTIS# PB92-114206.
 - PD 2/3 to be issued in FY '95.
 - Registrant agreed to implement risk reduction measures in September, 1992 by label revisions to reduce worker exposure and adding a ground water advisory statement. Registrant also agreed to develop an education/product stewardship program.

DICHLORVOS (DDVP)

Dennis Utterback (703-308-8026)

- Carcinogenicity
- Cholinesterase Inhibition
 - Decision Document published 47 FR 45075 on 10/13/82: NTIS# PB87-181335.
 - PD 1 published 53 FR 5542 on 2/24/88: NTIS# PB92-114297.
 - PD 2/3 to be issued in FY '94.

ETHYLENE OXIDE

Vivian Prunier (703-308-8034)

- Carcinogenicity
- Mutagenicity
- Reproductive Effects
 - PD 1 published 43 FR 3801 on 1/27/78; comment period closed 5/15/78: NTIS# PB80-213903.
 - Petition to revoke Section 409 on spice uses received 12/16/87 (52 FR 47753).
 - Response to petition published 55 FR 35347 on 8/29/90 denying revocation of FFDCA Section 409 food additive tolerances.

1. Special Reviews in Process (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Current Status

LINDANE

David Chen (703-308-8017)

- Kidney effects

- Chemical is in pre-Special Review.
- Grassley-Allen preliminary notification issued 9/18/85.
- Docket index of material is available for public use.
- Proposed Notice Not To Initiate Special Review published 59 FR 12916 on 3/18/94. EPA determined that kidney effects observed are specific to the male rat and are not relevant to human health risk.

OXYDEMETON-METHYL

Phil Poli (703-308-8038)

- Reproductive effects

- PD 1 published 32 FR 37248 on 10/5/87; comment period closed 1/5/88: NTIS# PB91-206581.
- Peer review expected to be completed in FY '93.
- Proposed Notice of Voluntary Cancellation of remaining products published 59 FR 11601 on 3/11/94 with a 90-day comment period. Special Review will be terminated if other parties do not indicate support of registrations during comment period.

PARATHION

Tom Moriarty (703-308-8035)

- Acute human poisoning

- Chemical is in pre-Special Review.
- Negotiated settlement resulted in voluntary cancellation of all but nine field crop uses. Review of risks associated with these remaining uses is currently underway.

PHORATE

Unassigned

- Wildlife adverse effects

- Chemical is in pre-Special Review.
- Grassley-Allen preliminary notification issued 12/12/88 and 8/2/90.
- Docket index of material is available for public use.

1. Special Reviews in Process (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Current Status

PROPOXUR

Ann Sibold (703-308-8033)

- Carcinogenicity
 - Chemical is in pre-Special Review status.
 - Grassley-Allen preliminary notification issued 3/88.
 - Docket index of material is available for public use.

TERBUFOS

Amy Farrell (703-308-8054)

- Wildlife adverse effects
 - Chemical is in pre-Special Review.
 - Grassley-Allen preliminary notification issued 12/12/88 and 8/2/90.
 - Docket index of material is available for public use.

TPTH (Triphenyltin Hydroxide)

Niloufor Nazmi (703-308-8028)

- Developmental Toxicity
 - PD 1 published 50 FR 1107 on 1/9/85; comment period closed 2/22/85: NTIS# PB85-175487.
 - Data call-in for additional data issued 5/88.
 - Registrants submitted registration amendments to provide for mechanical transfer of water soluble packets for all applications in '94 growing season and interim risk reduction measures for '93 season. No settlement agreement of the Special Review was reached.

TRIBUTYL TINS (antifoulant use)

Jill Bloom (703-308-8019)

- Acute and Chronic Toxicity to Non-Target Organisms
 - PD 1 published 51 FR 778 on 1/8/86; comment period closed 2/24/86: NTIS# PB87-186763.
 - PD 2/3 published 52 FR 37510 on 10/7/87: NTIS# PB88-161203.
 - PD 4 published 53 FR 39022 on 10/4/88: NTIS# PB90-261629. Partial conclusion of Special Review; requires compliance with OAPCA release rates and prohibitions, modified labeling, and restricted use classification. Final determination regarding the release of organotin is pending results of major environmental monitoring study.

2. Special Reviews Completed

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ALACHLOR

- Carcinogenicity
 - PD 1 published 50 FR 1115 on 1/9/85; comment period closed 4/9/85: NTIS# PB85-175503. Press release published on 1/3/85.
 - PD 2/3 published 51 FR 36166 on 10/8/86; comment period closed 12/8/86: NTIS# PB92-111889.
 - PD 4 on dietary and applicator risks published 52 FR 49480 on 12/31/87 required restricted use, label warning, closed systems for large-scale mixer/loaders. NTIS# PB92-114248.
 - Groundwater concerns will be handled through a regulatory proposal, the State Management Plan (SMP) rule, under FIFRA section 3.

AMITRAZ

- Carcinogenicity
 - PD 1 published 42 FR 18299 on 4/6/77; comment period closed 7/18/77: NTIS# PB80-212046.
 - PD 2/3 published 44 FR 2678 on 1/12/79; comment period closed 2/12/79: NTIS# PB80-211436.
 - PD 4 published 44 FR 32736 on 6/7/79, 44 FR 59938 on 10/7/79 (correction): NTIS# PB80-211428. Conditional registration approved for pears but not for apples.
 - Tolerance for pears approved 12/6/79.

AMITROLE

- Carcinogenicity
 - PD 1 published 49 FR 20546 on 6/15/84; comment period closed 7/11/84: NTIS# PB87-187175.
 - Preliminary determination to terminate the Special Review published 57 FR 46488 on 10/8/92 based on Agency decision that benefits of use outweigh risks. Final determination published 58 FR 5858 on 1/22/93.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

BENOMYL

- Reduction in Non-target Organisms
- Mutagenicity
- Developmental Toxicity
- Reproductive Effects
- Hazard to Wildlife

- PD 1 published 42 FR 61788 on 12/6/77; comment period closed 1/23/78: NTIS# PB80-216856.
- PD 2/3 published 44 FR 51166 on 8/30/79; comment period closed 9/28/79: NTIS# PB87-119087.
- PD 4 published 47 FR 46747 on 10/20/82: NTIS# PB83-148189. Requires use of either cloth or commercially available disposable dust masks by mixer/loaders of benomyl intended for aerial application and that registrants of benomyl products conduct field monitoring studies to identify residues that may enter aquatic sites after use on rice.
- Registrant completed field monitoring study and submitted to Agency 11/84. Study not accepted. New study required by Registration Standard issued 6/87.

CADMIUM

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Acute and chronic kidney toxicity

- PD 1 published 42 FR 56574 on 10/26/77; comment period closed 2/10/78: NTIS# PB87-181376.
- PD 2/3 published 51 FR 36524 on 10/10/86; comment period closed 11/24/86: NTIS# PB90-261603.
- PD 4 published 52 FR 31076 on 8/19/87: NTIS# PB87-228490. Golf course fairway and home lawn uses cancelled. Golf course green and tee area uses modified.
- 6(f) notice published 55 FR 31227 on 8/1/90. Last remaining cadmium chloride registration for use on golf course tees and greens was voluntarily cancelled.
- Proposed decision to terminate the Special Review published 55 FR 49697 on 11/30/90. Final decision published 56 FR 14522 on 4/10/91.

CAPTAFOL

- Carcinogenicity
- Acute and Chronic Wildlife Effects

- PD 1 published 49 FR 1103 on 12/9/84; comment period closed 1/31/85: NTIS# PB85-175495. Press release published on 1/3/85.
- All registrations voluntarily cancelled as of 5/15/87.
- Proposed decision to terminate Special Review published 52 FR 27576 on 7/22/87.
- Final decision published 53 FR 33535 on 8/31/88.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

CAPTAN

- Carcinogenicity
 - PD 1 published 45 FR 54938 on 8/18/80; comment period closed 12/1/80: NTIS# PB81-109449.
 - PD 2/3 published 50 FR 25885 on 6/21/85; comment period closed 8/5/85: NTIS# PB87-118014.
 - PD 4 published 54 FR 8116 on 2/24/89: NTIS# PB90-261579. Certain food use registrations cancelled.

CARBOFURAN (granular)

- Wildlife Effects
 - PD 1 on granular formulations published 50 FR 41938 on 10/16/85; comment period closed 12/2/85: NTIS# PB87-186771.
 - PD 2/3 published 54 FR 3744 on 1/25/89; comment period closed 3/27/89: NTIS# PB90-261587.
 - 6(f) notice published 55 FR 42266 on 10/18/90. Granular formulations of eight uses voluntarily cancelled.
 - Settlement agreement to phase out most uses was reached on 5/14/91.
 - 6(f) notice implementing label changes for settlement agreement published 56 FR 33286 on 7/19/91.
 - PD 4 concluding Special Review published 56 FR 64621 on 12/11/91.

CARBON TETRACHLORIDE

- Carcinogenicity
- Toxic Effect on Liver and Kidneys
 - PD 1 published 45 FR 68534 on 10/15/80; comment period closed 11/24/80: NTIS# PB81-121782.
 - Voluntary cancellation of many products published 50 FR 42997 on 10/23/85.
 - Cancellation of remaining products published 54 FR 41004 on 11/12/86.
 - Proposed exemption revocation published 52 FR 38200 on 10/14/87.
 - Expiration date of 7/31/90 for the tolerance exemption on grains published 54 FR 6126 on 2/8/89.

CHLOROBENZILATE

- Carcinogenicity
- Testicular Effects
 - PD 1 published 41 FR 21517 on 5/26/76; comment period closed 7/28/76: NTIS# PB92-114313.
 - PD 2/3 published 43 FR 29824 on 7/11/78; comment period closed 8/10/78: NTIS# PB80-213887.
 - PD 4 published 44 FR 9547 on 2/13/79: NTIS# PB80-213929. All uses except citrus cancelled.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

CHLOROFORM

- Carcinogenicity
 - PD 1 published 41 FR 14588 on 4/6/76; comment period closed 7/23/76. (NTIS# not available).
 - The Agency determined that applicator exposure had been reduced to a minimum as a result of label amendments. Also, registrants were required to submit data to establish tolerances of permissible residues on raw agricultural commodities.

COAL TAR AND CREOSOTE (non-wood use)

- Carcinogenicity
- Mutagenicity
 - PD 1 published 43 FR 48154 on 10/18/78; comment period closed 12/4/78: NTIS# PB80-213879.
 - PD 2/3 published 49 FR 33328 on 8/22/84; comment period closed 10/20/84: NTIS# PB87-178851.
 - PD 4 published 50 FR 41943 on 10/16/85: NTIS# PB87-180485. Cancellation of all uses except gypsy moth egg masses; deferral on coal tar neutral oil (CTNO) use pending receipt of additional data.
 - Cancellation of all remaining uses published 5/15/86.

CREOSOTE (wood use)

- Carcinogenicity
- Mutagenicity
 - PD 1 published 43 FR 48154 on 10/18/78; comment period closed 2/12/79: NTIS# PB80-213879.
 - PD 2/3 published 46 FR 13020 on 2/19/81; comment period closed 5/20/81: NTIS# PB82-229956.
 - At 4/14/83 public meeting, proposed conclusion presented; comment period closed 5/13/83.
 - PD 4 published 49 FR 28666 on 7/13/84: NTIS# PB84-241538. Requires label changes including a restricted use classification.
 - Subsequently, two FR notices published: 49 FR 43772 on 10/31/84, and 50 FR 4269 on 1/30/85.

CYANAZINE

- Developmental Toxicity
 - PD 1 published 50 FR 6560 on 4/10/85; Toxicity comment period closed 5/27/85: NTIS# PB87-117982.
 - PD 2/3 published 52 FR 589 on 1/17/87; comment period closed 3/9/87: NTIS# PB87-181400.
 - PD 4 published 53 FR 795 on 1/13/88. Requires label warning and protective clothing: NTIS# PB90-261595.
 - Hearing requested 2/88. Settlement reached 5/88 revising hazard warning statement and extending existing stocks provision.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

DAMINOZIDE

- Carcinogenicity
 - PD 1 published 49 FR 29136 on 7/18/84; comment period closed 8/31/84: NTIS# PB92-114222.
 - Draft PD 2/3/4 issued 9/12/85.
 - Data Call-in Notice issued 2/10/86.
 - PD 2/3 proposing to cancel food uses only published 54 FR 22558 on 5/24/89: NTIS# PB92-114214.
 - Registrant voluntarily halted sale of daminozide food use products on 6/2/89.
 - Proposed tolerance revocation published 54 FR 37277 on 9/7/89.
 - PD 4 announcing close of Special Review for food uses, and impending risk assessment for workers published 54 FR 47492 on 11/14/89: NTIS# PB92-114198.
 - Final tolerance revocation published 55 FR 10218 on 3/19/90.
 - PD 4 announcing close of Special Review for non-food uses published 57 FR 46436 on 10/8/92. Determination made to retain non-food uses without requiring label modifications. Agency also revised dietary risks and concluded that the risks posed in 1989 were unreasonable and the Agency's decision at that time concerning dietary risks will not be changed.

DBCP

- Carcinogenicity
- Reproductive Effects
- Mutagenicity
- Ground Water
 - PD 1 published 42 FR 48026 on 9/22/77; comment period closed 11/7/77: NTIS# PB87-181368.
 - Suspension order and notice of intent to cancel all food uses published Contamination 42 FR 57543 on 11/3/77.
 - Amended notice of intent to cancel and PD 2/3/4 published 43 FR 40911 on 9/13/78: NTIS# PB80-213853.
 - Notice of intent to suspend all products published 44 FR 43335 on 7/24/79.
 - Suspension order for all uses except pineapples published 44 FR 65161 on 10/29/79.
 - Notice of intent to cancel all uses published 44 FR 65170 on 11/9/79.
 - Withdrawal of the notice of intent to cancel use on pineapples published 46 FR 19592 on 3/31/81.
 - Proposed intent to cancel use on pineapples published 49 FR 1556 on 1/12/84; comment period closed 3/12/84.
 - Press release published on 1/3/85.
 - Final PD 4 published 50 FR 1122 on 1/9/85. Cancellation of remaining registrations. (NTIS# not available).

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

DIALATE

- Carcinogenicity
- Mutagenicity

- PD 1 published 42 FR 27669 on 5/31/77; comment period closed 9/9/77: NTIS# PB80-212863.
- PD 2/3 published 45 FR 38437 on 6/9/80; comment period closed 7/9/80: NTIS# PB80-216849.
- PD 4 published 47 FR 27109 on 6/23/82: NTIS# PB87-118006. Restricted use to certified applicators wearing protective clothing.

DIAZINON

- Avian Hazard

- PD 1/2/3 published 51 FR 1842 on 1/15/86; comment period closed 3/3/86; extended to 3/28/86 (51 FR 8813): NTIS# PB87-101853.
- PD 4 published 51 FR 35034 on 10/1/86: NTIS# PB90-261645. Cancellation of golf course and sod farm uses.
- Amendment to PD 4 published 52 FR 5656 on 2/25/87.
- Registrant-requested hearing confirmed PD 4 decision in 4/88.
- Registrants appealed; PD 4 remanded to the Administrator on 6/2/89.
- 6/19/90 press release announced the Administrator's Remand Decision upholding the 1988 final decision to cancel all use on golf courses and sod farms.

DICOFOL

- Ecological Effects

- PD 1 published 49 FR 10569 on 3/21/84; comment period closed 5/5/84: NTIS# PB84-160084.
- PD 2/3 published 49 FR 39820 on 10/10/84; comment period closed 11/26/84: NTIS# PB85-134153.
- Amendment to PD 2/3 published 50 FR 33008 on 8/15/85.
- PD 4 published 51 FR 19508 on 5/29/86: NTIS# PB90-260431. Requires a reduction in the level of DDT_r contamination, and modified labeling.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

DIMETHOATE

- Carcinogenicity
 - Mutagenicity
 - Fetotoxicity
 - Reproductive Effects
- PD 1 published 42 FR 45806 on 9/12/77; comment period closed 1/6/78: NTIS# PB87-181343.
 - PD 2/3 published 44 FR 66558 on 11/19/79; Effects comment period closed 12/19/79: NTIS# PB80-213846.
 - PD 4 published 46 FR 5364 on 1/19/81: NTIS# PB81-172413. Denies applications for dust formulations, and requires modified labeling.

DINOCAP

- Developmental Toxicity
- PD 1 published 50 FR 1119 on 1/9/85; comment period closed 2/22/85. (NTIS# not available).
 - PD 2/3 published 51 FR 39577 on 10/29/86; comment period closed 12/29/86: NTIS# PB87-178844.
 - PD 4 published 54 FR 5908 on 2/6/89. Requires health hazard label statement and additional protective clothing.

DINOSEB

- Developmental Toxicity
 - Reproductive Effects
 - Acute Effects
- Emergency Suspension Order/Notice of Intent to Cancel published 51 FR 36634 on 10/14/86: NTIS# PB87-225041.
As a result of a Subpart D hearing, the Agency modified the 10/7/86 Suspension Order to permit use of dinoseb on dry peas, lentils, and chick peas in Idaho and Washington during the 1987 and 1988 growing season. A subsequent court order permitted use on the same crops in certain counties in Oregon. A second District Court ruling permitted dinoseb use on caneberries, cucurbits, green peas, and snap beans in the States of Idaho, Oregon, and Washington. A final cancellation order was issued on 6/9/88. Besides cancelling all remaining uses, it permitted limited use on certain crops in the Pacific Northwest during the 1988 and 1989 growing seasons.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

EBDCs (Ethylene bisdithiocarbamates: Maneb, Mancozeb, Metiram, Nabam, Zineb, Amobam)

- Carcinogenicity
 - PD 1 published 41 FR 40618 on 8/10/77; comment period closed: NTIS# PB87-228482.
 - Decision Document and Final Determination published 47 FR 47669 on 10/27/82: NTIS# PB87-181350. Requires modified labeling and additional toxicological data.

- Carcinogenicity
 - PD 1 published 52 FR 27172 on Thyroid Effects on 7/17/87; comment period closed 9/30/87: NTIS# PB87-117990.
- Developmental Toxicity
 - The sole Nabam registrant requested voluntary cancellation of all food uses in 3/89.
 - Registrants announced on 9/6/89 that they will drop all but 13 registered food uses.
 - PD 2/3 published 54 FR 52158 on 12/20/89 proposing to cancel all uses for zineb and 45 food crop uses of mancozeb, maneb, and metiram. 10 crop uses proposed to be retained. Comment period closed 3/20/90: NTIS# PB90-143025.
 - Notice published 55 FR 15018 on 4/20/90 reopening comment period on PD 2/3 for 48 of 55 food uses (mancozeb, maneb, and metiram). Comment period for narrative information closed 6/30/90 and for new data on 9/30/90.
 - Notice published 55 FR 20416 on 5/16/90 proposing to reduce and/or revoke tolerances and food/feed additive regulations.
 - Notice published 55 FR 40206 on 10/2/90 reopening comment period on 5/16/90 proposal; new comment period closed 1/2/91.
 - PD 4 published 57 FR 7484 on 3/2/92. EBDC products (mancozeb, maneb, and metiram) for 11 food crop uses cancelled. EBDC products registered for 45 other food crops continue upon required modifications being made to avoid cancellation. Industrial uses of nabam continue. Home garden uses of mancozeb on turf and fruit are cancelled. Other homegarden uses remain registered subject to certain conditions. All registrations of zineb were previously voluntarily cancelled by the registrant.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ENDRIN

- Carcinogenicity
 - Developmental Toxicity
 - Reduction in Endangered and Non-Target Species
- PD 1 published 41 FR 31316 on 7/27/76; comment period closed 11/4/76: NTIS# PB81-112690.
 - PD 2/3 published 43 FR 51132 on 11/2/78; comment period closed 12/4/78: NTIS# PB87-119921.
 - PD 4 published (including cancellations) 44 FR 43631 on 7/25/79: NTIS# PB81-109480.
 - PD 4 follow-up notice sent 8/28/80.
 - Cancellations by Velsicol of one technical and two end-use products effective 11/23/84.
 - Velsicol's last end-use product was voluntarily cancelled as of 8/1/85.
 - All but one remaining uses were voluntarily cancelled effective 9/12/85.

EPN (Ethyl (p-nitrophenyl)thiobenzene phosphonate)

- Neurotoxicity
 - Hazard to Aquatic Organisms
- PD 1 published 44 FR 54384 on 9/19/79; comment period closed 12/29/79; NTIS# PB80-216815
 - Determination to conclude RPAR published in 48 FR 39494 on 8/31/83. Mosquito larvicide use cancelled. New label requirements imposed for all other uses to reduce exposure to applicators and non-target organisms, and reassess tolerances, chronic toxicity and reentry.
 - Proposed Decision Not To Initiate Special Review published 52 FR 27453 on 7/21/87.
 - Final Decision Not to Initiate Special Review published 52 FR 48574 on 12/23/87.
 - All registrations voluntarily cancelled as of 7/24/87.

ETHALFLURALIN

- Carcinogenicity
- PDs 1, 2/3, and 4 published 49 FR 511 on 1/4/84; comment period closed 12/1/85: NTIS# PB92-114263. Benefits of conditional registration exceeded risks. Submission of additional data required by 12/1/85.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ETHYLENE DIBROMIDE (EDB)

- Carcinogenicity
- Mutagenicity
- Reproductive Effects

- PD 1 published 42 FR 63134 on 12/14/77; comment period closed 4/3/78: NTIS# PB80-109456.
- PD 2/3 published 45 FR 81586 on 12/10/81; comment period closed 3/9/82: NTIS# PB81-157851.
- PD 4 published 48 FR 45956 on 10/7/83: NTIS# PB85-238004.
- Emergency Suspension published 49 FR 4452 on 2/6/84: NTIS# PB85-235919. Uses to fumigate grain and grain milling equipment were suspended. Proposed tolerances for EDB in grains published 49 FR 6697 on 2/22/84.
- Proposed tolerances for EDB in citrus and papayas published 49 FR 8407 on 3/6/84.
- Amendment to Notice of Intent to Cancel registrations of pesticide products containing EDB published 49 FR 14182 on 4/10/84.
- Final tolerances for EDB in grains published 49 FR 17144 on 4/23/84.
- Final revocation of tolerances and establishment of interim tolerances for EDB in citrus and papaya published 49 FR 22082 on 5/25/84.
- Proposed revocation of tolerances for miscellaneous commodities published 49 FR 32085 on 8/10/84.
- Interim tolerance for EDB in mangoes was published 9/29/86. Tolerance expired 9/30/87.
- Papaya registration voluntarily cancelled as of 3/87.
- Use on citrus for export terminated at end of 1988/1989 harvest season.
- Only remaining uses are vault fumigation, and quarantine fumigation of nursery stock.

FLUOROACETAMIDE

- Acute Toxicity to Mammalian and Avian Species
- Reduction in Endangered Species and Non-Target
- Acute Toxicity without Antidote

- PD 1 published 41 FR 52792 on 12/1/76: NTIS# PB80-216823.
- PD 2 published 45 FR 13189 on 2/28/80: NTIS# PB80-216831.
- Chemical returned to registration process with the restriction that it be used only in sewers.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

GOAL

- Carcinogenicity
 - PD 1/2/3 published 46 FR 23490 on 4/27/81; comment period closed 5/11/81: NTIS# PB82-185133.
 - PD 4 published 47 FR 27118 on 6/23/82: NTIS# PB82-172289.
 - Decision made to continue use of the herbicide subject to certain restrictions (on PCE) pertaining to formulation of product.

INORGANIC ARSENICALS (wood use)

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
 - PD 1 published 43 FR 48267 on 10/18/78; comment period closed 2/12/79: NTIS# PB87-181327.
 - PD 2/3 published 46 FR 13020 on 2/19/81; comment period closed 5/20/81: NTIS# PB82-229956.
 - At 4/14/83 public meeting proposed conclusion presented; comment period closed 5/15/83.
 - PD 4 published 49 FR 28666 on 7/13/84: NTIS# PB84-241538. Requires label changes, including a restricted use classification.
 - Subsequently, two FR notices were published: 49 FR 43772 on 10/31/84, and 50 FR 4269 on 1/30/85.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

INORGANIC ARSENICALS (non-wood use)

• Carcinogenicity
• Mutagenicity
• Developmental
Toxicity

- PD 1 published 43 FR 42867 on 10/18/78; comment period closed 2/12/79: NTIS# PB87-181327.
- PD 2/3 published 52 FR 132 on 1/2/87; comment period closed 2/17/87. Following uses were not included: 1) calcium arsenate use as turf herbicide, 2) lead arsenate use as grapefruit growth regulator, 3) sodium arsenite use as grape fungicide, and 4) arsenic acid use as dessicant: NTIS# PB92-114297.
- PD 4 excluding above 4 uses published 53 FR 24787 on 6/30/88. a) Registrants of ant bait formulations filed hearing request on 7/29/88. Use of sodium arsenate as ant bait cancelled on 7/26/89 upon completion of hearing. b) All registrations cancelled except for arsenic trioxide use as insecticide and mole/gopher control: NTIS# PB92-114305.
- PD 2/3 for remaining four uses published 56 FR 50576 on 10/7/91; however, three of the remaining four uses had already been voluntarily cancelled: a) lead arsenate - 9/87; b) calcium arsenate - 2/89; c) sodium arsenite - 11/90 (56 FR 28154 on 6/19/91).
- Lead/calcium arsenate tolerance revocation proposals published 55 FR 33332 on 8/15/90. Final revocations published 56 FR 13593 on 4/3/91.
- PD 4 published 58 FR 64579 on 12/8/93. Concluded the Special Review for the remaining non-wood uses of inorganic arsenicals: lead arsenate growth regulator on citrus, calcium arsenate herbicide on turf, sodium arsenite fungicide on grapes and arsenic acid desiccant on okra and cotton.

LINDANE

• Carcinogenicity
• Developmental
Toxicity
• Reproductive
Effects
• Other Chronic
Effects
• Acute Toxicity

- PD 1 published 42 FR 9816 on 2/18/77; comment period closed on 6/20/77: NTIS# PB80-213861.
- PD 2/3 published 45 FR 45362 on 7/3/80; comment period closed 9/15/80: NTIS# PB87-165080.
- PD 4 published 48 FR 48512 on 10/19/83: NTIS#PB87-165098. The decision cancelled the indoor use of smoke fumigation devices and the use of dog dips to treat pests other than mites. All other uses will continue with use restrictions and label modifications.
- Negotiated settlement on dog dips published 49 FR 26282 on 6/27/84. A settlement on smoke bombs published 50 FR 5425 on 2/8/85 to end sale of product by 5/31/86 for registrant and by 11/30/86 for retailer.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Current Status

LINURON

- Carcinogenicity
 - PD 1 published 49 FR 37843 on 9/26/84; (rebutted) comment period closed 11/10/84: NTIS# PB85-174654.
 - Preliminary Decision to Conclude Special Review published 53 FR 31262 on 8/17/88.
 - Final Determination to Conclude published 54 FR 4072 on 1/27/89. No regulatory action warranted.

MALEIC HYDRAZIDE

- Carcinogenicity
- Mutagenicity
- Reproductive Effects
 - PD 1 published 42 FR 56920 on 10/28/77; comment period closed 12/14/77: NTIS# PB80-216740.
 - Decision Document published 47 FR 498 on 1/5/82: NTIS# PB82-240300. This action returned maleic hydrazide and salts (K-MH, DEA-MH) to the registration process.
 - All required data have been submitted to the Agency.
 - Registrants decided not to perform similar tests on DEA-MH. Thus, DEA-MH was suspended 11/81.

PCNB

- Carcinogenicity
 - PD 1 published 42 FR 61894 on 10/13/77; comment period closed 2/6/78: NTIS# PB80-216799.
 - Special Review was terminated through negotiated agreement with registrants to reduce levels of the HCB contaminant and to make label changes to reduce exposure. Published 47 FR 18177 on 4/19/82.

PENTACHLOROPHENOL (non-wood use)

- Carcinogenicity
- Developmental Toxicity
 - PD 1 published 43 FR 48443 on 10/18/78: NTIS# PB87-109464.
 - PD 2/3 published 49 FR 48367 on 12/12/84; comment period closed 2/14/86: NTIS# PB87-119095. Special Review on oil well, cooling tower, and pulp and paper uses deferred until exposure data are received. Data call-in issued 8/4/88.
 - PD 4 published 52 FR 2282 on 1/21/87: NTIS# PB87-204707. Non-deferred uses cancelled.
 - Amendment to PD 4 (clarifying uses) published 53 FR 5524 on 2/24/88.
 - PD 4 announcing termination of the Special Review for non-wood uses signed 12/29/92 and will be published 2/93. Registrants either voluntarily cancelled registrations or allowed registrations to be cancelled because of non-payment of required annual registration maintenance fees.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria Possibly Met or Exceeded

Final Determination

PENTACHLOROPHENOL (wood use)

- Carcinogenicity
- Fetotoxicity
- Developmental Toxicity

- PD 1 published 43 FR 48443 on 10/18/78; comment period closed 2/12/79: NTIS# PB81-109464.
- PD 2/3 published 46 FR 13020 on 2/19/81; comment period closed 5/20/81: NTIS# PB82-229956.
- At 4/14/83 public meeting proposed conclusion presented; comment period closed 5/13/83.
- PD 4 published 49 FR 28666 on 7/13/84: NTIS# PB84-241538. Requires label changes including a restricted use classification.
- Subsequently, two FR notices were published: 49 FR 43772 on 10/31/84 and 50 FR 4269 on 1/30/85.
- Amendment to PD 4 published 51 FR1334 on 1/10/86.
- Amendment to amended PD 4 published 52 FR 140 on 1/2/87.

PRONAMIDE

- Carcinogenicity

- PD 1 published 42 FR 32302 on 5/20/77; comment period closed 8/29/77: NTIS# PB81-109472.
- PD 2/3 published 44 FR 3083 on 1/15/79; comment period closed 2/14/79: NTIS# PB80-213911.
- PD 4 published 44 FR 61640 on 10/26/79: NTIS# PB81-112716. The following actions were taken: Cancellation of registration of products allowing hand spray applications, except for use on ornamentals and nursery stock; cancellation of registrations of products unless the registrant modifies the terms and conditions to allow certain uses of wettable powder products only by or under direct supervision of certified applicators; modification of labeling of wettable powder products to include specific general precautions, directions as to protective clothing to be worn, dilution instructions for wettable powder products, and watering instructions for granular products used on turf; and Agency revision of the lettuce tolerance from 2 ppm to 1 ppm from required residue data that was submitted.

SODIUM FLUOROACETATE

- Reduction in Non-Target and Endangered Species

- PD 1 published 41 FR 52792 on 12/1/76; comment period closed
- No Antidote 3/15/77: NTIS# PB80-216823.
- PD 2/3 signed on 11/11/82; re-signed on 6/29/83; published 48 FR 50935 on 11/4/83: NTIS# PB87-182226. Issuance of PD delayed to coincide with document addressing predator issues.
- SAP reviewed PD 2/3 and issued a final report on 7/3/84, following 6/12/84 SAP meeting.
- PD 4 published 50 FR 31012 on 7/31/85: NTIS# PB87-116471. Modified labeling and certain bait concentration reductions required.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

STRYCHNINE/STRYCHNINE SULFATE

- Reduction in Non-target and Endangered Species
 - PD 1 published 42 FR 2713 on 1/13/77; comment period closed 3/15/77: Endangered NTIS# PB80-216807.
 - PD 2/3 published 45 FR 73602 on 11/5/80; comment period closed 9/30/81: NTIS# PB81-123960.
 - PD 4 published 48 FR 48522 on 10/19/83: NTIS# PB87-182234. Decision cancelled use of strychnine for control of prairie dogs and several other rodents and small mammals. All other uses will require label modifications.
 - Notice published 52 FR 6762 on 3/4/87 withdrawing partial cancellation of strychnine active ingredient pesticides for prairie dog, ground squirrel, and meadow mouse control if certain modifications of terms and conditions of registration are made. Terms and conditions include: establishment of a State program for exclusive distribution and monitoring of strychnine for use on prairie dogs; compliance with Black-Footed Ferret Survey Guidelines; and use of certain label statements.

2,4,5-T/SILVEX

- Carcinogenicity
- Fetotoxicity
- Developmental Toxicity
 - 2,4,5-T PD 1 published 43 FR 17116 on 4/21/78; comment period closed 6/5/78: NTIS# PB80-212665.
 - 2,4,5-T: PD 2/3 published 44 FR 41536 on 7/17/79; comment period closed 8/16/79: NTIS# PB87-117685.
 - Silvex: PD 1/2/3 published 44 FR 41536 on 7/17/79; comment period closed 8/16/79: NTIS# PB80-213895.
 - Emergency Suspension Order and Notice of Intent to Cancel published 44 FR 15874 on 3/15/79. 2,4,5-T: NTIS# PB80-225923; Silvex: PB80-226376.
 - 2,4,5-T/Silvex--PD 4 published 44 FR 72316 on 12/13/79: NTIS# PB87-181384.
 - Cancellation hearings began 3/14/80.
 - On 10/11/84, the Administrative Law Judge gave Union Carbide 30 days to determine if they wanted to defend 2,4,5-T/Silvex uses. Union Carbide and remaining companies withdrew from the hearing and all registrations were cancelled on 1/2/85.

2. Special Reviews Completed (continued)

Pesticide and Review Criteria Possibly Met or Exceeded

Current Status

THIOPHANATE-METHYL

- Mutagenicity
- Carcinogenicity
- Reduction in Non-target Species (Rebutted)
- PD 1 published 42 FR 61970 on 12/7/77; comment period closed 3/27/78: NTIS# PB80-216856.
- PD 2/3 published 44 FR 58798 on 10/11/79; comment period closed 11/12/79: NTIS# PB87-119087.
- PD 4 published 47 FR 46747 on 10/20/82: NTIS# PB83-148189. No regulatory action warranted.

TOXAPHENE

- Carcinogenicity
- Population Reduction in Non-Target Animal Species
- Acute Toxicity to Aquatic Organisms
- Chronic Effects to Wildlife
- PD 1 published 42 FR 26860 on 5/27/77; comment period closed 6/13/77: 5/27/77; comment period closed NTIS# PB80-216732.
- PD 2/3/4 published 47 FR 53784 on 11/29/82: NTIS# PB83-144204. Cancellation of registrations for most uses and continued registration of certain uses under specific terms and conditions. The continued uses are: corn, cotton, and small grain for specific insect infestation (emergency use only); pineapples and bananas for specific insects in Puerto Rico and the Virgin Islands only; and scabies treatments of cattle and sheep.

2,4,5-TRICHLOROPHENOL (TCP)

- Carcinogenicity
- Fetotoxicity
- PD 1 published 43 FR 34026 on 8/2/78; comment period closed 11/17/78: NTIS# PB81-103111.
- Action temporarily deferred pending 2,3,5-T/Silvex proceedings.
- 3(c)(2)(B) letter issued on May 7, 1985 requesting updated Confidential Statement of Formula, analysis for dioxin contamination, and teratology data. Most products were voluntarily cancelled in response.
- PD 2/3/4 published 52 FR 15549 on 4/29/87: NTIS# PB87-203113. Cancellation of all uses.

TRIFLURALIN

- Carcinogenicity
- Mutagenicity
- PD 1/2/3 published 44 FR 50911 on 8/30/79; comment period closed 11/13/79: NTIS# PB80-213937.
- PD 4 published 47 FR 33777 on 8/4/82: NTIS# PB82-263252. Registration allowed to continue if total N-nitrosamine contamination is kept below 0.5 ppm for technical products, and below a figure based on trifluralin content for formulated products.

3. Final Determinations on Pre-Special Reviews

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

CACODYLIC ACID AND SALTS

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Insufficient evidence to issue a Special Review.
- Decision Document published 47 FR 20376 on 5/12/82: NTIS# PB91-234278. Returned to the registration process in 12/81 with the stipulation that pursuant to section 3(c)(2)(B), data on the rate of dermal absorption be submitted, knapsack/hand sprayer applicators treating ditch banks and rights-of-way will wear respirators or masks, and labels recommend masks for home users employing knapsacks or hand sprayers. The data has been submitted and the Agency has not imposed labeling changes.

CARBARYL

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Decision Document published 45 FR 81869 on 12/12/80: NTIS# PB87-181301. The Agency has returned this compound to the registration process with the stipulation that the following measures be considered: (1) a section 3(c)(2)(B) action that registrants remedy data gaps identified in pre-special review and (2) appropriate label changes be made to minimize exposure to carbaryl. Both measures were considered in the reregistration review of this chemical.

CHLORINATED ISOCYANURATES

- Kidney Effects
- The Agency concluded in the Registration Standard (5/20/88) that chlorinated isocyanurates do not exceed the risk criteria for adverse effects in 40 CFR 154.7.

DIFLUBENZURON

- Hazard to Wildlife
- RPAR action completed and Decision Document issued on 3/26/79: NTIS# PB87-187191. Registrant consented to restricted use.
- Agency concluded that existing evidence does not support issuance of a Special Review.

3. Final Determinations on Pre-Special Reviews (continued)

Pesticide and Review Criteria

Possibly Met or Exceeded

Final Determination

METHANEARSONATES

(includes Amine Methanearsonate, Calcium Acid Methanearsonate (CAMA), Monosodium Methanearsonate (MSMA), Disodium Methanearsonate (DMSA))

- Carcinogenicity
- Mutagenicity
- On 6/28/83, the pre-Special Review for methanearsonate chemicals was completed and a decision memorandum approved returning these chemicals to the registration process. The existing evidence was inadequate to initiate a Special Review.
- 3(c)(2)(B) letter sent 9/26/83 requiring a chronic feeding, oncogenicity, teratology, and applicator exposure studies in order to determine if there are any risk concerns.

NALED

- Mutagenicity
- Fetotoxicity
- Reproductive Effects
- Chemical returned to the registration process on 6/30/83, based on a review of all available data which indicated that no Effects valid tests or definitive evidence existed which met or exceeded the Special Review risk criteria.

OBPA (10,10'-Oxybisphenoxarsine)

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Decision Document issued 4/9/79. (NTIS# not available). Returned to the registration process due to lack of Toxicity evidence of oncogenicity in the suspected arsenical compound.

PARAQUAT DICHLORIDE

- Emergency Treatment
- Chronic Effects
- Decision Document published 47 FR 45075 on 10/23/82: NTIS# PB87-181392. Outlined data gaps and voluntary cancellation of certain non-crop use sites.

PIPERONYL BUTOXIDE

- Carcinogenicity
- Decision Document published 47 FR 20376 on 5/12/82: NTIS# PB83-137901. Chemical returned to the registration process and a section 3(c)(2)(B) notice requesting additional data issued on 9/30/82.
- Studies received 8/87 and reviewed 4/8/88 by Toxicology Branch.

3. Final Determinations on Pre-Special Reviews (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ROTENONE

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Reproductive Effects
- Chronic Effects
- Significant Wildlife Population Reductions
- Acute Toxicity to Aquatic Wildlife

- Decision Document published 46 FR 36745 on 7/15/81 (NTIS# not available).
Chemical returned to the registration process based on a finding of no unreasonable adverse effects.

TERBUTRYN

- Carcinogenicity
- Mutagenicity
- Reproductive Effects

- Decision Document published 47 FR 20376 on 5/12/82: NTIS# PB91-206573.
- Chemical returned to the registration process. Registrants agreed to change label to reduce applicator risk to acceptable levels.

TRIALATE

- Carcinogenicity
- Mutagenicity

- Decision Document published 45 FR 92349 on 12/15/80: NTIS# PB90-259920. The Agency determined that, in light of the low level of exposure, the chemical should be returned to the registration process stipulating that a section 3(c)(2)(B) action be initiated to obtain necessary toxicity data to evaluate its hazards.
- 3(c)(2)(B) was issued on 6/15/84 to include the data needs.

S,S,S-TRIBUTYL PHOSPHOROTRITHIOATE

- Neurotoxicity

- Decision Document published 47 FR 20376 on 5/12/82: NTIS# PB87-186789.
- Returned to the registration process based on a finding of no unreasonable adverse effects. Registrants agreed to protective clothing requirement.

3. Final Determinations on Pre-Special Reviews (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

TRIBUTYL PHOSPHOROTRITHIOITE

- Neurotoxicity
- Decision Document published 47 FR 20376 on 5/12/82: NTIS# PB87-186797.
- Returned to the registration process based on a finding of no unreasonable adverse effects. Registrants agreed to protective clothing requirement.

TRICHLORFON

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- Reproductive Effects
- Chemical returned to the registration process on 6/30/83 based on a review of all available data which indicated that no valid tests or definitive evidence existed which met or exceeded the Special Review risk criteria.

4. Final Actions/Voluntary Cancellations

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ACRYLONITRILE

- Carcinogenicity
 - Developmental Toxicity
 - Neurotoxicity
- 43 FR 26310 (6/19/78). Three products only.

ARSENIC TRIOXIDE

- Carcinogenicity
 - Mutagenicity
 - Developmental Toxicity
- 42 FR 45944 (9/13/77). Some uses were cancelled.

BENZENE

- Carcinogenicity
 - Mutagenicity
 - Blood Disorders
- All products voluntarily cancelled on 7/31/85.

BHC

- Carcinogenicity
- 43 FR 31432 (7/21/78). NTIS# PB80-216781.

CAPTAFOL

- Carcinogenicity
- All products voluntarily cancelled 5/15/87.

CARBON TETRACHLORIDE

- Carcinogenicity
 - Toxic Effects on Liver and Kidneys
- 50 FR 42997 (10/23/85). Many products cancelled.

4. Final Actions/Voluntary Cancellations (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

CHLORANIL

- Carcinogenicity
- 42 FR 3702 (1/19/77).

CHLORDANE

- Carcinogenicity
- Primary registrant agreed 8/11/87 to cancel some registrations and not to market any remaining registrations in the U.S. unless air-monitoring studies show no detectable, air-borne residues. Any retained uses subject to such air-monitoring data submissions shall be terminated as of 8/11/94 if any conditions of agreement have not been met. Two product registrations remain subject to this condition. 53 FR 11798 4/8/88 announced cancellation of many termiticide products and termination of sale, distribution, and use (except by homeowners) as of 4/15/88.

CHLORDIMEFORM

- Carcinogenicity
- Proposed decision not to initiate Special Review due to voluntary cancellation of all products published 53 FR 36422 on 9/19/88.
- Final decision published 54 FR 6242 on 2/8/89 allowed use of existing stocks by end users until 10/1/89.

COPPER ACETOARSENITE

- Carcinogenicity
- Mutagenicity
- Developmental Toxicity
- 42 FR 18422 (4/7/77).

COPPER ARSENATE

- Carcinogenicity (Basic)
- 42 FR 18422 (4/7/77).

4. Final Actions/Voluntary Cancellations (continued)

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

CYHEXATIN

- Developmental Toxicity
- All products voluntarily cancelled 9/25/87.

ENDRIN

- Reduction in Endangered Species and Non-Target Species
- Cancellation of all uses except one effective 9/12/85.

EPN (Ethyl(p-nitrophenyl)thiobenzene phosphonate)

- Neurotoxicity
- Hazard to Aquatic Organisms
- All products voluntarily cancelled on 7/24/87.

ERBON

- Carcinogenicity
- Developmental Toxicity
- Fetotoxicity
- 45 FR 58770 (10/4/80).

HEPTACHLOR

- Carcinogenicity
- Major registrant Velsicol agreed on 8/11/87 to cancel some termiticide products and withdraw all others unless indoor air monitoring studies showed no detectable levels.
- 53 FR 11798 (4/8/88) announced cancellation of many termiticide products and termination of sale, distribution, and use (except homeowner products) as of 4/15/88. All remaining products are withdrawn or suspended under section 3(c)(2)(B).

4. Final Actions/Voluntary Cancellations (continued)

Pesticide and Review Criteria Possibly Met or Exceeded

Final Determination

MERCURY

- Acute to Subchronic Human Inhalation Exposure Toxicity

- 6(f) notice published 55 FR 26754 on 6/29/90. Negotiated settlement resulted in cancellation of all indoor paint uses.
- 6(f) notice published 56 FR 105 on 5/31/91. Negotiated settlement resulted in cancellation of all exterior paint uses. (Cancellation orders published 56 FR 31403 and 56 FR 31404 on 7/10/91.)

METHAZOLE

- Ocular effects

- Voluntary cancellation/Cancellation order published 58 FR 4167 on 1/3/93. Cancellation order restricts sale and distribution of existing stocks until additional data review is completed. Final decision expected by 5/93.
- Voluntary Cancellation/Cancellation Order published 58 FR 4167 on 1/13/93. Cancellation order amendment published 58 FR 30166 on 5/26/93 allowing conditional distribution, sale and use of existing stocks until 12/31/93. Second amendment to be published 59 FR 15410 on 4/1/94 extending stocks provision date until 12/31/94.

MONOCROTOPHOS

- Avian Effects

- All products voluntarily cancelled on 7/15/88.

MONURON

- Carcinogenicity

- 42 FR 41320 (8/16/77). Some products cancelled.

NITROFEN (TOK)

- Developmental Toxicity
- Carcinogenicity
- Mutagenicity

- All products voluntarily cancelled on 9/15/83.

4. Final Actions/Voluntary Cancellations (continued)

Pesticide and Review Criteria

Possibly Met or Exceeded

Final Determination

OMPA (Octamethylpyrophosphoramidate)

- Carcinogenicity
- 41 FR 21859 (5/28/76).

PARATHION

- Acute Human Poisoning
- Negotiated settlement agreement resulted in voluntary cancellation of all but nine field crop uses. 6(f) Notice published 56 FR 65061 on 12/13/91. Amendment permitting limited use of existing stocks of cancelled products published 57 FR 3500 on 1/29/92.

PERTHANE

- Carcinogenicity
- 45 FR 41694 (6/20/80). Many products cancelled.

PHENARSAZINE CHLORIDE

- None
- 42 FR 59776 (11/21/77).

RONNEL

- Carcinogenicity
- 51 FR 2953 (1/22/86). Many products cancelled.

SAFROLE

- Carcinogenicity
- Mutagenicity
- 42 FR 11039 (2/25/77).
- 42 FR 16844 (3/30/77).
- 42 FR 29957 (6/10/77).

4. Final Actions/Voluntary Cancellations (continued)**Pesticide and Review Criteria
Possibly Met or Exceeded****Final Determination****SODIUM ARSENITE**

- Carcinogenicity
 - Mutagenicity
 - Developmental Toxicity
- 43 FR 48267 (10/18/78). Two products cancelled.

SPORICIDIN

- Ineffective Sterilant Claims
- Stop Sale, Use and Removal Orders were issued in December 1991 due to product inefficacy and misbranding. The registrant requested voluntary cancellation and a 6(f) notice was published 58 FR 37931 on 7/14/93.

STROBANE

- Carcinogenicity
- 41 FR 26607 (6/28/76).

TRYSBEN

- Carcinogenicity
- 43 FR 5782 (2/9/78).

WIPEOUT

- Ineffective Sterilant Claims
- Notice of Intent to Cancel published 58 FR 41779 on 8/5/93 due to sterilant product inefficacy label claims. Registrant requested hearings.

5. Cancellations Issued Prior to RPAR/Special Review Process

Pesticide and Review Criteria
Possibly Met or Exceeded

Final Determination

ALDRIN/DIELDRIN

- Carcinogenicity
 - Bio-accumulation
 - Hazard to Wildlife
 - Other Chronic Effects
- 37 FR 37246 (10/18/74). Cancellation of all but termiticide use.

CHLORDANE/HEPTACHLOR

- Carcinogenicity
 - Reductions in Non-target and Endangered Species
- 43 FR 12372 (3/24/78). Cancellation of all but termiticide use.

CHLORDECONE (KEPONE)

- Carcinogenicity

- Hazard to Wildlife
and Other Chronic Effects

- 41 FR 56703 (12/29/76).

CHAPTER THREE

REREGISTRATION

CHAPTER THREE: REREGISTRATION

This Chapter is organized as follows. The first section explains the reregistration process mandated by FIFRA '88, discussing the four Lists of pesticides, the five phases of reregistration review, and

the overall status of the program. The next section presents each of the List A, B, C, and D pesticides alphabetically by case and describes their current reregistration status.

THE REREGISTRATION PROCESS

EPA is required by law to reregister existing pesticides that originally were registered years ago when the standards for government approval were less stringent than they are today. This comprehensive reevaluation of pesticide safety is critical to protecting human health and the environment. In 1988, Congress amended the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) to strengthen and accelerate EPA's reregistration program. The nine-year reregistration scheme mandated by "FIFRA '88" applies to each registered pesticide product containing an active ingredient initially registered before November 1, 1984.

List of Pesticides to be Reregistered

In 1988, approximately 600 groups of related pesticide active ingredients, or "cases", representing 1,150 active ingredients in 45,000 formulated products, required reevaluation. As FIFRA '88 directed, EPA divided these 600 cases into four lists: List A, B, C, and D.

- **List A.** List A consists of the 194 chemical cases (or 350 individual active ingredients) for which EPA had issued Registration Standards prior to the effective date of FIFRA '88. Most food use pesticides are included on List A.

The Registration Standards program, begun in 1980, was a systematic process for reevaluating existing pesticides. Each Registration Standard document summarized available information for a given pesticide case, required any additional data needed to support continued registration, and spelled out any product labeling changes needed to meet current standards. During the Registration Standards program, the safety of pesticide use was enhanced through numerous improvements in pesticide labeling and the generation of many new studies.

- **Lists B, C, and D.** The remaining pesticides were divided into three lists based upon their potential for exposure and other factors, with List B being of highest concern and D of least. Some of the classification criteria included potential for residues of concern in food or drinking water, significance of outstanding data requirements, potential for worker exposure, Special Review or restricted use status, and unintended adverse effects to animals and plants.

Reregistration Phases

FIFRA '88 established mandatory reregistration timeframes and duties. The law requires EPA to complete its reregistration review over approximately a 9-year period. The five phases of the reregistration process are described below.

Because EPA already had substantially reviewed the List A chemicals under the Registration Standards program, the List A chemicals moved directly to Phase 5. If pesticide producers or "registrants" fail to comply with the requirements of any of the phases, their products are subject to cancellation or administrative suspension action.

Phase 1: Listing of Active Ingredients

As required, EPA published Lists A, B, C, and D within 10 months of FIFRA '88 (by October 24, 1989) and asked registrants of these pesticides whether they intended to seek reregistration.

Phase 2: Declaration of Intent and Identification of Studies

Phase 2 required registrants to notify EPA whether or not they intended to reregister their products; to identify and commit to providing necessary new studies; and to pay the first installment of the reregistration fee. During this phase, EPA issued guidance to registrants for preparing their Phase 2 and Phase 3 responses. Phase 2 activities were completed in 1990.

Phase 3: Summarization of Studies

During Phase 3, following EPA guidance, registrants were required to submit summaries and reformatted acceptable studies, "flag" studies indicating adverse effects, re-commit to satisfying all applicable data requirements, and pay the final installment of the reregistration fee. Phase 3 ended in October 1990.

Phase 4: EPA Review and Data Call-in's

In Phase 4, EPA must review all Phase 2 and 3 submissions and require registrants to meet any unfulfilled data requirements within four years. Phase 4 was completed in 1993.

Phase 5: Reregistration Decisions

In this phase, EPA reviews all the studies that have been submitted for a chemical case, and decides whether or not to reregister products containing the active ingredients in that case. A pesticide will be considered eligible for reregistration if its data base is substantially complete, and if it does not cause unreasonable adverse effects to people or the environment when it is used according to product label directions and restrictions.

Status of Reregistration

The overall trend for all four reregistration lists is a substantial reduction in the number of pesticides being supported for reregistration by companies manufacturing pesticides. The number of chemical "cases" being considered for reregistration has declined from about 600 in 1988 to about 400. Pesticide product registrations declined from about 45,000 to 20-25,000.

This sharp decline in pesticide product registrations generally has had little impact. In many instances, the pesticides that dropped out had not been produced or marketed for many years. However, the cancellation of some pesticide registrations may have a negative impact on pesticide users who depend on "minor uses," specialty pesticide uses with limited market potential. EPA is participating in joint government, industry and user efforts to help preserve needed minor uses.

EPA has completed 60 Reregistration Eligibility Decision Documents, or REDs, and will issue many more during the next few years. REDs announce that products containing the active ingredient(s) in the chemical case are eligible for reregistration; products actually are reregistered about 14 - 24 months after the last active ingredient in the product is determined to be eligible for

registration, and once product-specific data and revised labeling are submitted to and accepted by the Agency.

Even after a pesticide is reregistered, however, EPA will continue to reassess it based on new information as it becomes available. Reregistration is but one major milestone in EPA's continuing pesticide review process.

STATUS OF INDIVIDUAL PESTICIDES

The following four subsections contain a complete listing of the pesticide cases, and active ingredients within each case, for reregistration Lists A, B, C, and D.

Case-Level Information

Cases are presented in alphabetical order, by list. Information presented for each case includes:

- Case Name and Number;
- CRM - Chemical Review Manager responsible for the case and/or chemical in review;
- Pesticide Type - Indicates that the active ingredients in a case are included primarily in pesticide products that are used as insecticides, fungicides, herbicides, rodenticides, antimicrobials, or any of about 20 more specific sub-types as follows:

Insecticide

Acaricide
Larvicide
Molluscicide
Miticide
Ovicide

Insect Repellent
Insect Growth Regulator
Microbial Insecticide
Piscicide

Fungicide

Nematicide

Wood Preservatives

Herbicide

Algaecide

Plant Growth Regulator

Rodenticide

Repellent

Bird Repellent

Antimicrobial

Bactericide
Microbicide

Soil Microbicide
Nitrification Inhibitor

- Registration Standard Date(s), NTIS Number(s), and Second Round Review Date (SRR) - For List A cases only;
- Status - The status of the case may be summarized using one or more of the following descriptions:

- "RED Approved" (with date and NTIS number) - OPP has reached a decision that some or all uses of the pesticide are eligible for reregistration, and issued a Reregistration Eligibility Decision Document (RED).

...and... "Some Products Reregistered" - After the RED was issued, the registrant sent OPP the necessary product-specific data and revised labeling, and some or all products containing the pesticide were reregistered.

...and..."Amendment Issued" (with date and NTIS number) - OPP received substantive comments on the RED during the public comment period, and issued an Amendment to the RED, incorporating the necessary changes.

- "In Pre-Special Review" or "In Special Review" - The pesticide is in or has completed the reregistration review process. Meanwhile, it also has become the subject of an in depth risk/benefit balancing Special Review, as described further in Chapter Two of this report.

- "Awaiting Data/Data in Review" - OPP awaits data from the pesticide's producer(s) regarding its human health and/or environmental effects, or OPP has received and is reviewing such data, in order to reach a decision about the pesticide's eligibility for reregistration.

- "Unsupported" - None of the active ingredients in the case are being supported for reregistration. All are unsupported, or some are unsupported and some are cancelled.

- "Cancelled" - The pesticide is no longer an active ingredient in any registered pesticide products. Therefore, we are characterizing it as "cancelled." Under FIFRA, pesticide producers may voluntarily cancel their registered products. EPA also may cancel pesticide registrations if registrants fail to pay required fees, to make or meet certain reregistration commitments, or when the Agency reaches findings of unreasonable adverse effects.

- "Not Subject to Reregistration" - The active ingredients in the case actually were initially registered after November 1, 1984, and so are not subject to reregistration.

Active Ingredient Information

Active ingredients are listed under the reregistration case to which each is assigned. (Although some cases have multiple active ingredients, many cases have only one.) Information presented for each active ingredient (AI) includes:

- AI Number - the active ingredient's chemical code;
- AI Name - the active ingredient's common or chemical name;
- DCI Date(s) - Dates of any data call-ins (DCIs) issued for the chemical since December 1968;
- Status - The status of an active ingredient is summarized using one of the following descriptions:

- "RED Completed" - OPP has completed a Reregistration Eligibility Decision Document (RED) for the AI/case. See details in case-level status information.

- "Supported" - The producer(s) of the pesticide has made commitments to conduct the studies and pay the fees required for reregistration, and is meeting those commitments in timely manner.

- "Unsupported" - The producer(s) of the pesticide has not made or honored a commitment to seek reregistration, conduct the necessary studies, or pay the requisite fees. Unless some other interested party makes and meets such commitments, products containing the pesticide will be cancelled.

- "Cancelled" - The active ingredient is no longer contained in any registered pesticide products. Therefore, we are characterizing it as "cancelled." (See definition above.)

CHAPTER FOUR

INDEX

CHAPTER FOUR: INDEX

This index presents an alphabetized list of all the pesticides active ingredient names and unique case names mentioned throughout the report.

For each active ingredient (AI), please see its CAS number, AI number (also known as the PC code, Chemical code, or Shaunessey code), case number, and the page number(s) on which the pesticide appears in this report. For each unique case name (that is, each case name that is different from its active ingredient name(s)), please see its case number and the page number(s) where it is mentioned in this report.
