INTRODUCTION

This Guide was developed to assist EPA staff in identifying and locating journals currently in the EPA Headquarters Library. The journal collection encompasses a wide range of subject areas on various environmental, scientific, and management topics.

Journal titles are arranged under subject categories such as acid rain, conservation, environmental health, law, pollution prevention, and water. A list of subject categories is on pages ii and iii for quick review. A Title Index of all journals can be found at the end of this Guide.

This Guide contains journal titles from the Library's general collection and those titles in special collections such as the Hazardous Waste Superfund Collection (HWSF), the Water Collection (Water), the Information Resources Management Collection (IRM), and the International Collection (International). Journals in special collections are identified with collection location in parentheses in the Title Index.

For more information on journal holdings, please refer to the [EPA Journal Holdings Report](#) which provides detailed information on the EPA Library network's journal holdings. The [Report](#) is an alphabetic listing of titles held by all the libraries in the EPA Library Network and provides information such as total holdings, frequency, and journal publisher. The [Report](#) is available at the reference desk in the EPA Headquarters Library. Articles found in journals not available in the EPA Headquarters Library may be requested through Interlibrary Loan, a special library service that allows libraries to borrow material from other libraries. You may request an Interlibrary Loan from the circulation desk.

We hope you will find this publication useful and would appreciate any suggestions for future editions. Please ask a Reference Librarian or a Ready Reference Technician for further information on locating journals, or call the Headquarters Library at 202-260-5922.
