Directory Update Form	100

INTRODUCTION

This publication contains listings of Regional Office and Office of Air Quality Planning and Standards personnel who are either in management positions or are responsible for specific program areas. The publication is to be used as a comprehensive reference directory to locate these personnel.

To ensure the usefulness of this directory, two objectives must be met. First, the directory should contain as many Regional Office contact points as possible. Therefore, we encourage you to submit to us any listing that is not in the directory. Second, routine updating is a necessity. For this purpose, an update form is provided for your convenience at the back of the publication.

The three-hole punch design of the directory is to facilitate the updating process. The format allows easy insertion of new lists or easy replacement of altered lists. Therefore, the directory is flexible, as it can be updated as required with minimal effort.

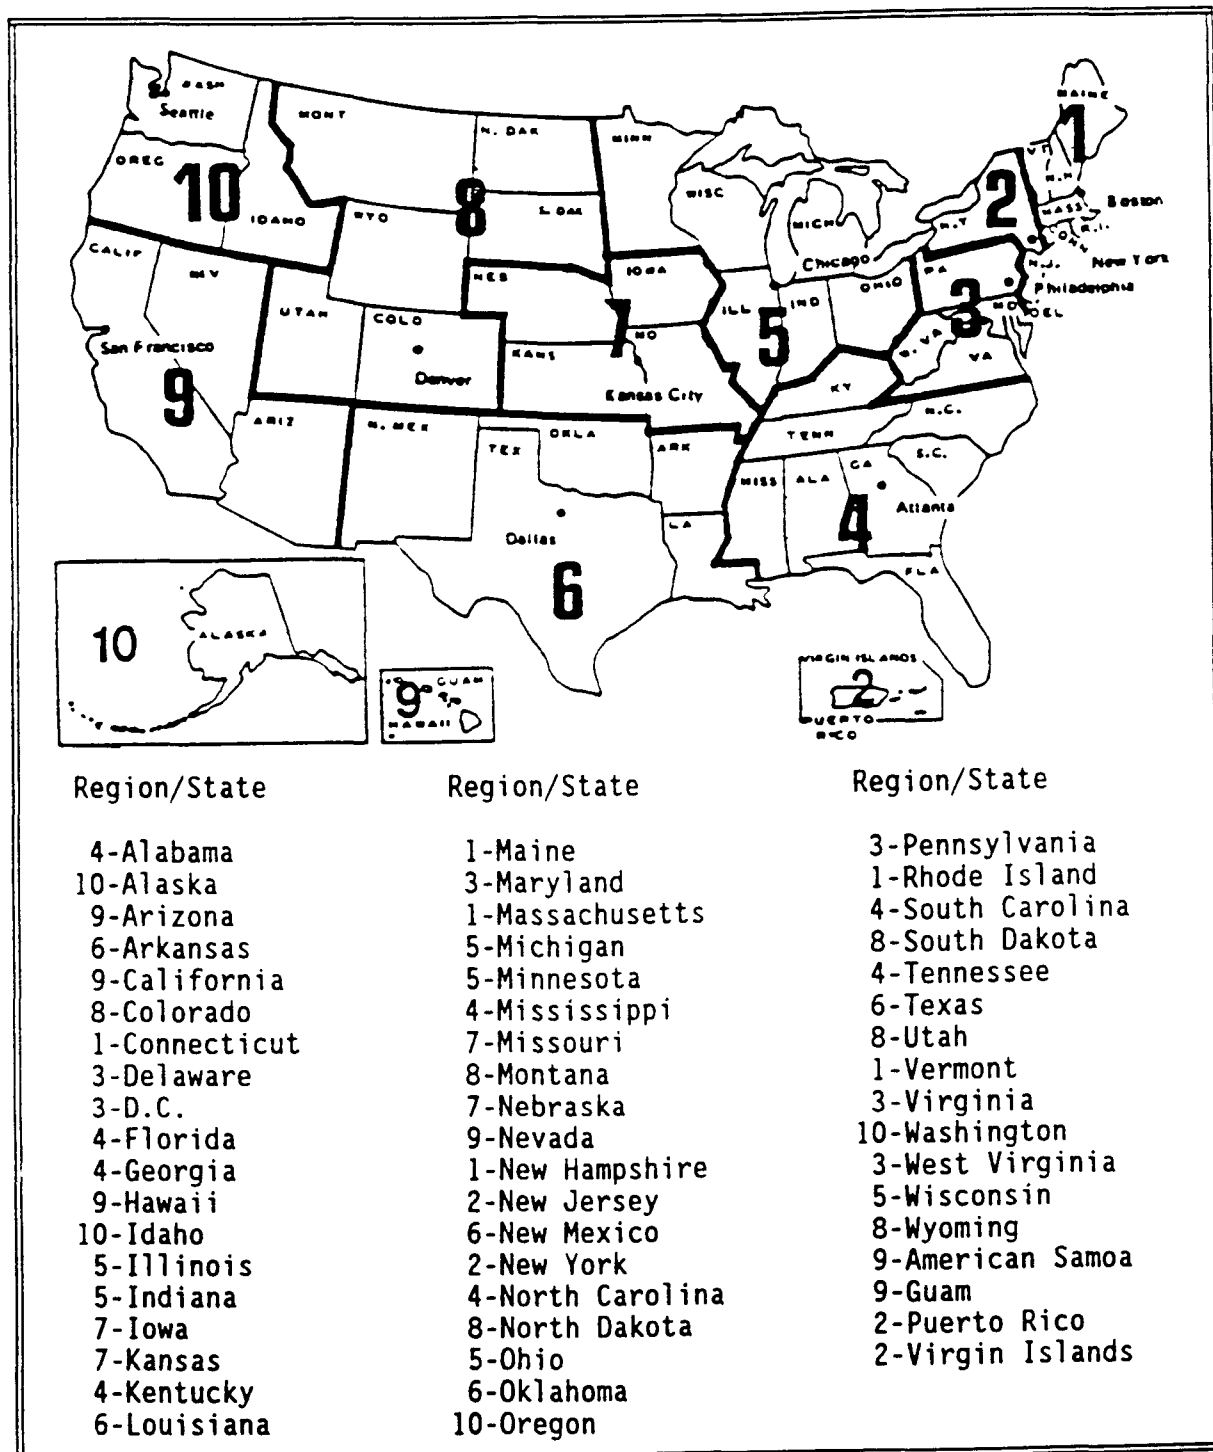

The Regional Operations Branch (ROB) has compiled this directory and will be maintaining the updates. If you have any questions, suggestions, or changes to make, please address them to:

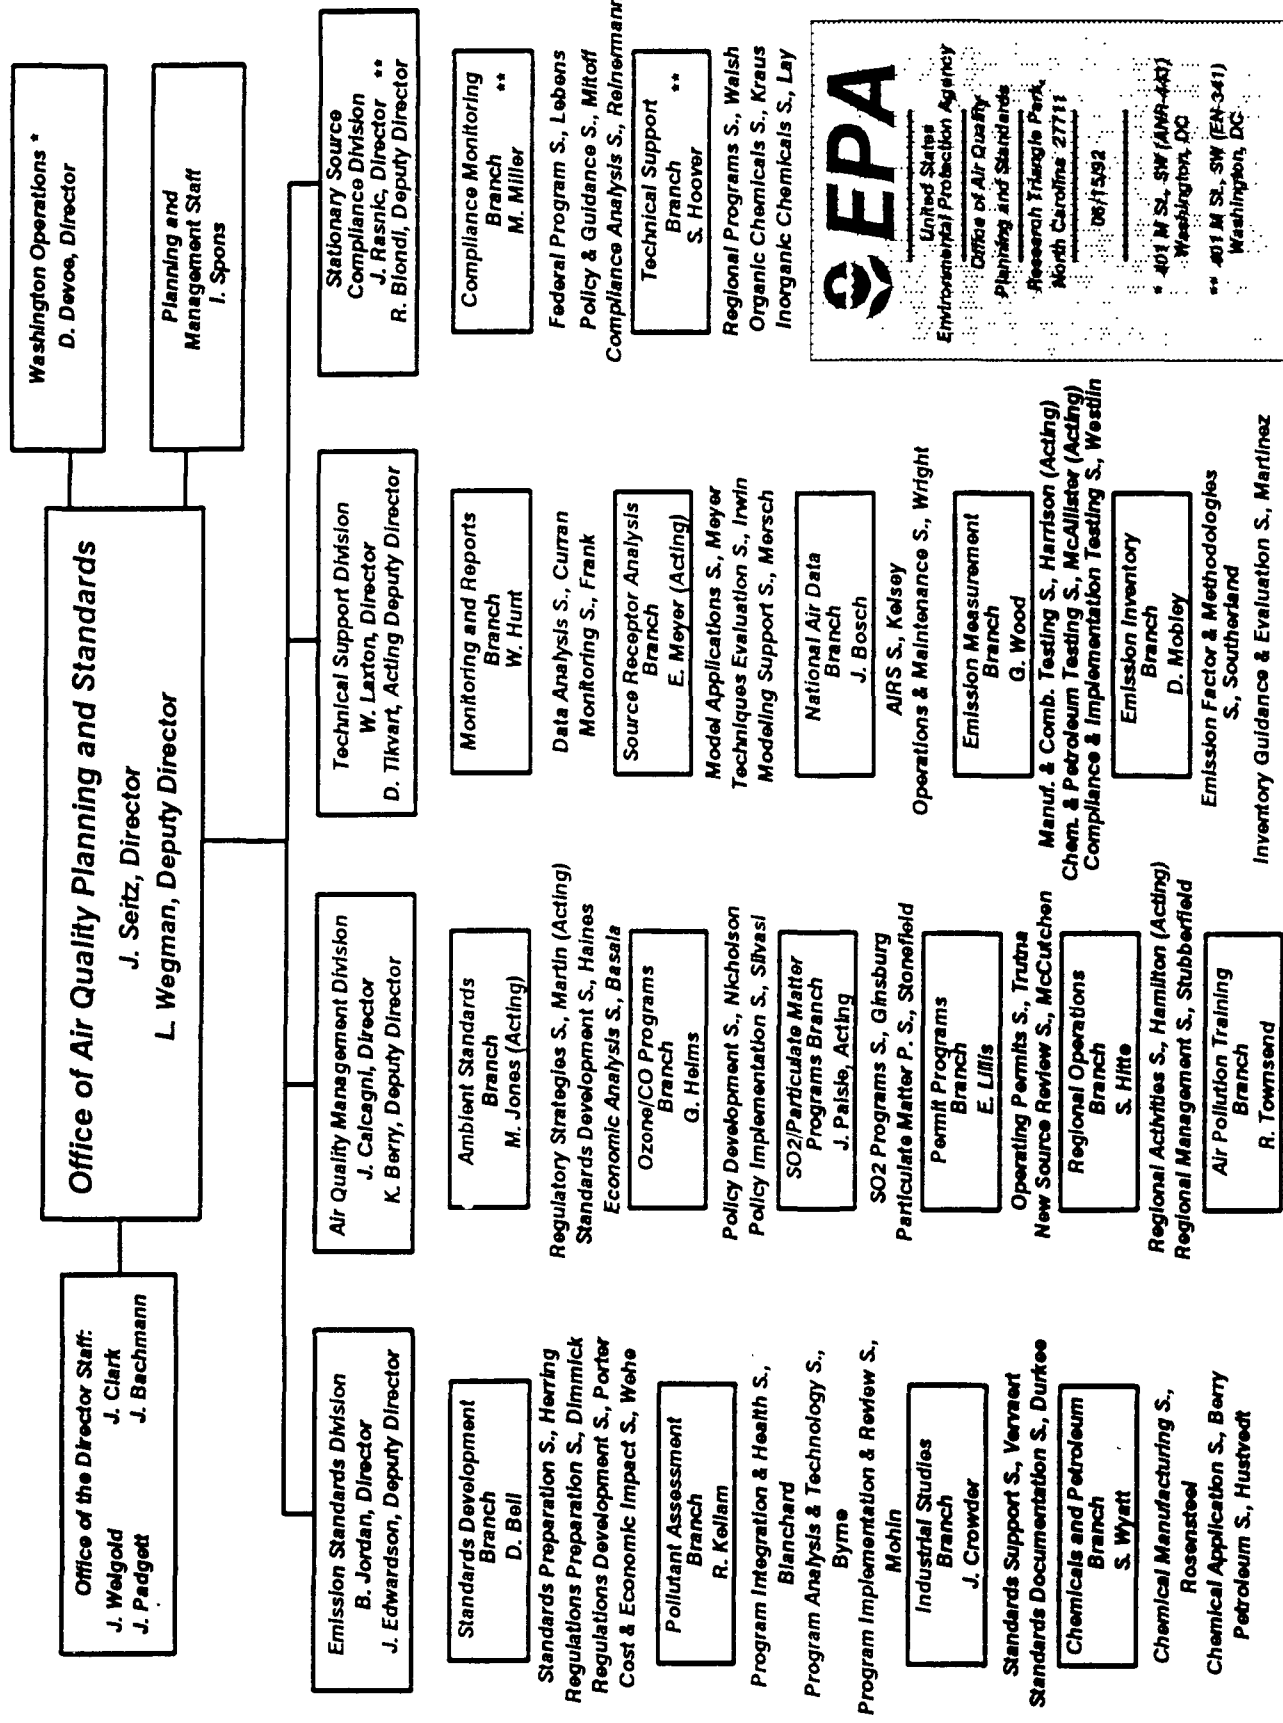

U.S. Environmental Protection Agency
Regional Operations Branch, MD-15
Research Triangle Park, North Carolina 27711

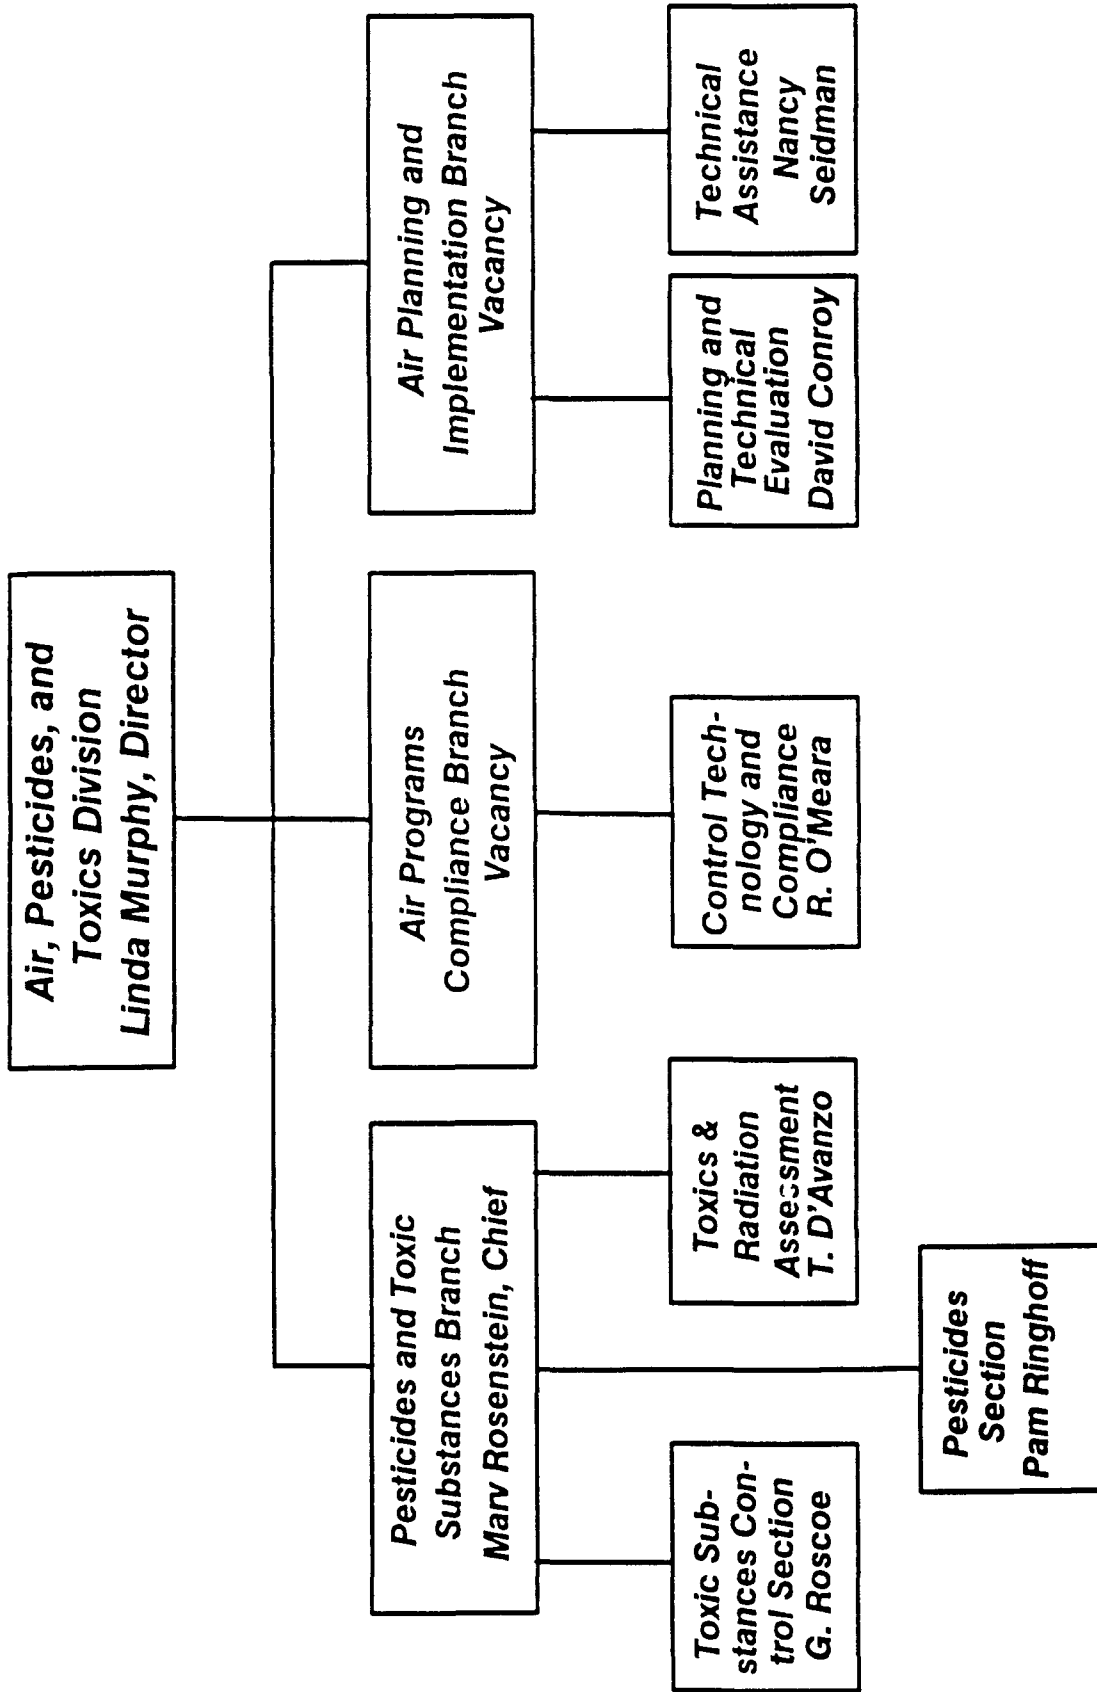

COMPUTERIZED VERSION OF THE CONTACT POINTS DIRECTORY

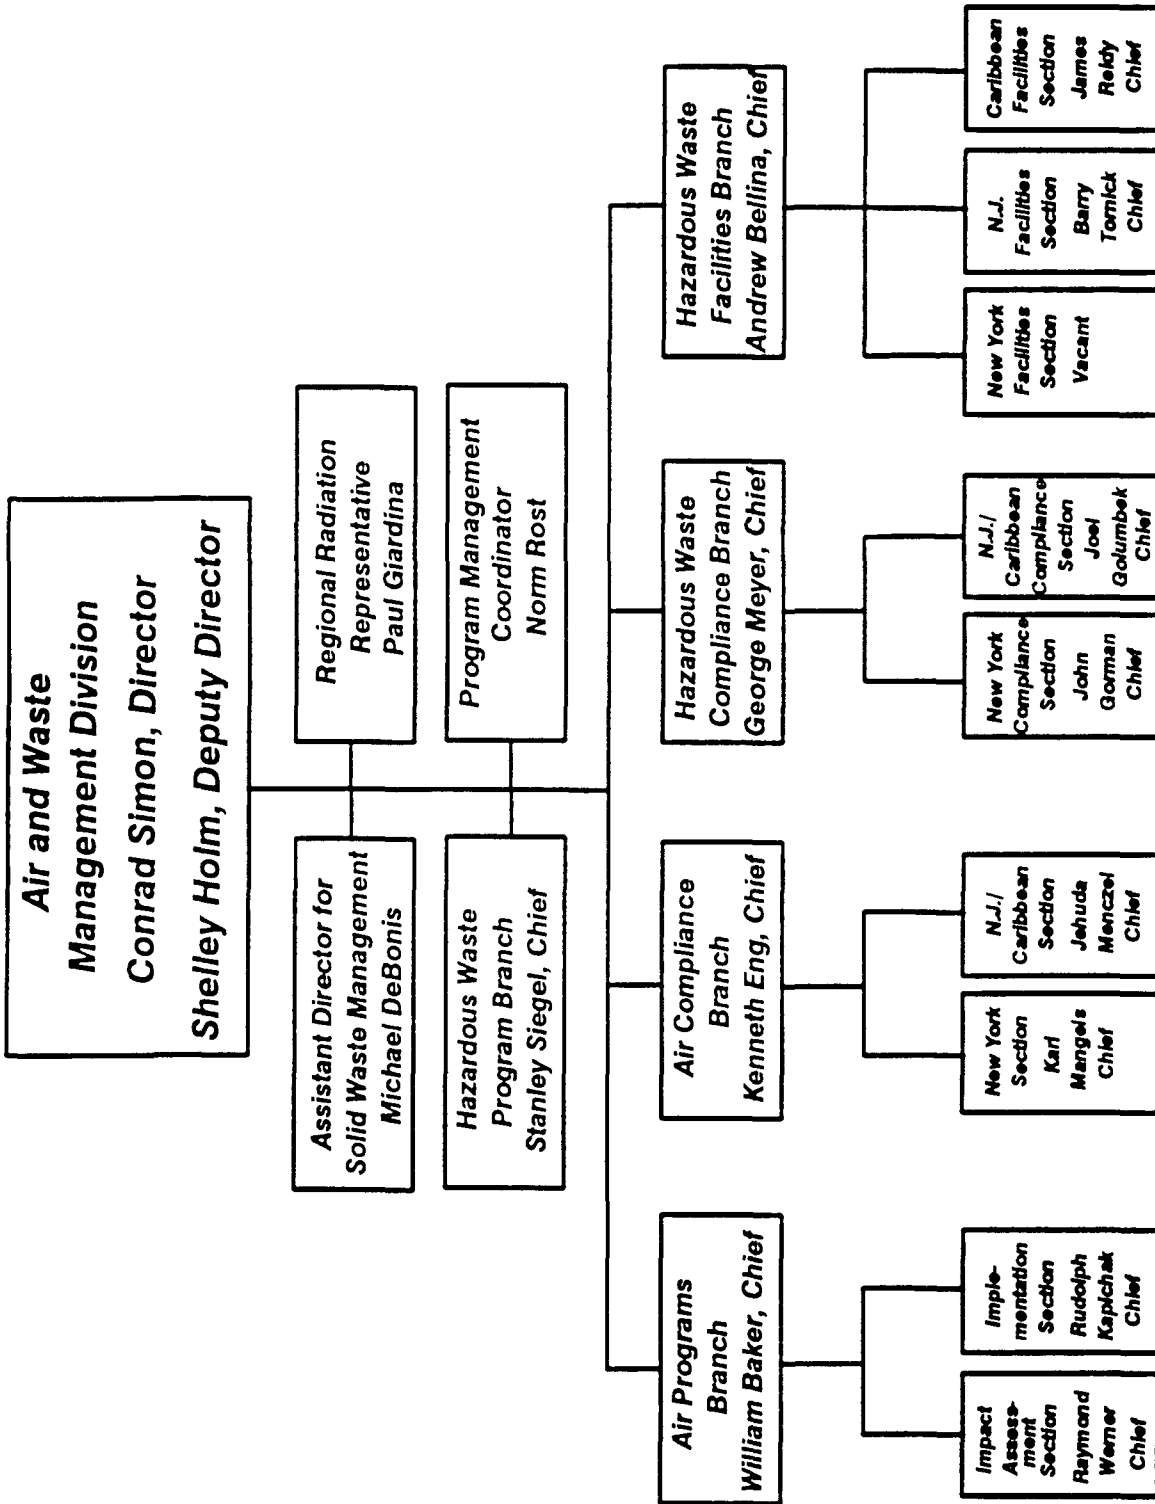

The Regional Operations Branch has developed a computerized version of this directory which is LAN accessible. Special instructions on the operation of this version is available to all Headquarters, OAR and RTP Offices. The computerized version became available for use November 1, 1991.
