FOREWORD

The importance of collecting and making available the information pertaining to solid-waste-related research, demonstration projects, and other activities was emphasized by the specific authorization contained in Section 204(b) of the Solid Waste Disposal Act, Public Law 89-272. The present booklet lists publications that have been collected or published by the Bureau in response to this directive.

Bureau of Solid Waste Management

INTRODUCTION

The publications available from the Bureau of Solid Waste Management are from various sources. There are Bureau publications reporting on results of the research, development, and demonstrations in progress as authorized by the Solid Waste Disposal Act of 1965. This far-reaching Federal grants and contracts program has generated solid-waste-related research in many fields. The reports from the grantees and contractors are being published by the Bureau as soon as available. Results of intramural research and technical investigations conducted by members of the Bureau staff are printed by the Bureau or submitted to professional journals so that the reports will reach the largest possible audience. In the latter case, reprints are frequently purchased and distributed by the Bureau. Certain conference proceedings, findings of various commissions and study groups, and other collateral literature are also available.

For convenience in ordering and to expedite distribution, each publication has been assigned a permanent number. Those that are followed by (L) are held in limited quantities and available only as supplies permit.

In gathering together and making available this body of information on solid waste management, the Bureau hopes to assist those engaged in

the task of finding ways to manage the Nation's burden of solid wastes. We hope, too, that by indicating the breadth of the solid waste management field, additional professionals may be attracted into the field--as investigators, as engineers, as managers--wherever their talent fits. And finally, we hope that the American citizen will see in the publications available, the significant progress made in response to the solid-waste-related legislation enacted by the Congress.
