Update Form	45

INTRODUCTION

This publication contains listings of Regional Office and Office of Air Quality Planning and Standards personnel who are either in management positions or are responsible for specific program areas. The publication is to be used as a comprehensive reference directory to locate these personnel.

To ensure the usefulness of this directory, two objectives must be met. First, the directory should contain as many Regional Office contact points as possible. Therefore, we encourage you to submit to us any listing that is not in the directory. Second, routine updating is a necessity. For this purpose, an update form is provided for your convenience at the back of the publication.

As you will notice, we have changed the design of the directory from a bound version to a three-hole punch publication. The reason for the change is to facilitate the updating process. The new format allows easy insertion of new lists or easy replacement of altered lists. Therefore, the directory is flexible, as it can be updated as required with minimal effort. We will be sending new lists or changes as we receive them, so update your directory immediately upon arrival in order to keep your copy current.

The Regional Operations Branch has compiled this directory and will be maintaining the updates. If you have any questions, suggestions, or changes to make, please address them to:

Regional Operations Branch, MD-15
U.S. Environmental Protection Agency
Research Triangle Park, North Carolina 27711

* FTS phone #'s w/629 prefix are OAQPS Divisions located at Research Triangle Park, North Carolina 27711. The commercial # is: (919) 541 + last 4 digits of FTS #.

FTS phone #'s w/382 prefix: Stationary Source Compliance Division (SSCD) (EN-341)
Office of Air Quality Planning and Standards

401 M Street, S.W. - U.S. EPA
Washington, D.C. 20460

Commercial phone #: (202) 382 + last 4 digits of FTS #.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for a systematic approach to data collection and the importance of using reliable sources of information.

3. The third part of the document provides a detailed overview of the data analysis process. It describes the steps involved in identifying trends, patterns, and anomalies in the data, and discusses the various statistical techniques used to interpret the results.

4. The fourth part of the document discusses the importance of communication in the data analysis process. It emphasizes that the results of the analysis must be effectively communicated to the relevant stakeholders in a clear and concise manner.

5. The fifth part of the document provides a summary of the key findings and conclusions of the analysis. It highlights the main trends and patterns identified in the data, and discusses the implications of these findings for the organization's future operations.

6. The final part of the document provides a list of references and sources used in the analysis. It includes a list of books, articles, and other documents that were consulted during the research process.

UPDATE FORM

In our effort to keep the Contacts Listing accurate, we ask that you notify us of any changes to the Listing (phone number changes, address changes, or personnel changes). Also, if you think of any new program area or any neglected program area that should be included in the Listing, please inform us. Finally, we recognize that errors may have been made in the gathering or the typing of the information. We would appreciate your bringing any errors to our attention. Please fill out the form below for any of the above cases and send it to:

U.S. Environmental Protection Agency
