Environmental Data Guide

Purpose

The purpose of this guide is to provide information to the user to quickly determine the federally administered data systems housed in EPA Region V the availability status for the data systems and the specific location where the systems are housed and/or contact person.

Data Systems Included

- . Manual environmental data systems administered by federal agencies housed outside the EPA Region V library
- . . Other manual federally administered data systems used in environmental assessment housed outside the EPA Region V library
- . Summary of the information and services provided by the EPA Region V library

Data Systems Excluded

- . Computerized data systems
- . Data systems developed on a state level

This information will be available in the NEPA Implementation manuals being produced for each state in Region V and scheduled for completion by end of calendar year 1983.

Use

The index to the various data systems referenced can be found under "List of Federal Data Systems". The list is arranged alphabetically by subject and includes the issuing agency, form of the data, jurisdictional unit, data storage location, whether a status sheet or a sign-out sheet is available and in most cases, the name and phone number of a contact person. The location of the data is given by department, section and floor. Most of the locations referenced are also indicated on floor layout plans in the "Location of Data" section of this manual. When a specific location is not indicated, the contact person listed can provide further information or contact Bobbie Lively-Diebold, 886-0243.

Status sheets are available by state for the wetland inventory maps and for county soil maps and Important Farmland maps. In most cases, EPA will have copies of the maps or documents indicated as available. There will be some instances where EPA will not have the information. If data is indicated to exist and it is not found, please check the sign-out sheets to determine if it has been previously checked out. If not found, please contact Bobbie Lively-Diebold, 886-0243 for further help in acquisition of the needed data.

Please sign out all data removed from its area. This data is for in-house use and is not to be checked out by the general public although it can be used by the public within the building.

Updates

The status sheets for information systems are dated according to when the last update was prepared. These status sheets will be updated on a six month to one year schedule.

DATA SYSTEM FOR FEDERALLY ADMINISTERED PROGRAMS' (HOUSED IN EPA)

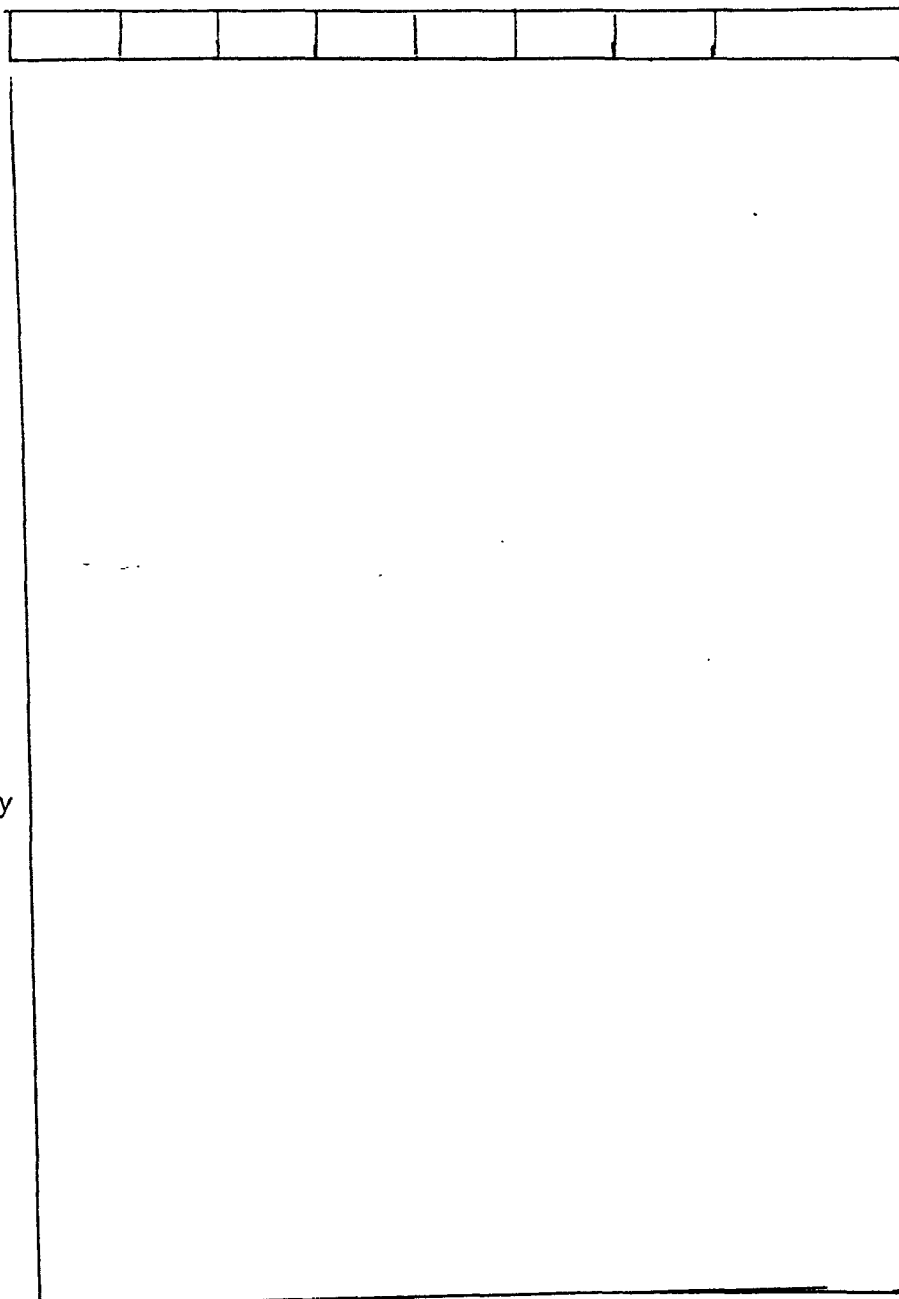

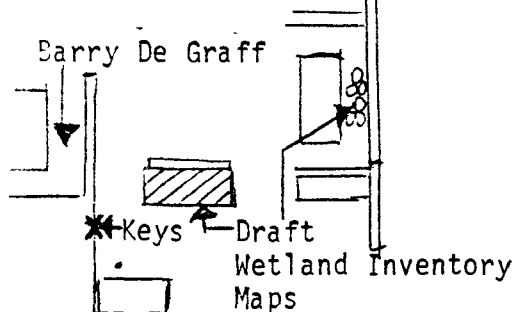

Subject	Issuing Agency	Data Form	Jurisdic. Unit	Data Storage Location	Status Sheet	Signout	Contact Person
Aquifers	EPA	Maps & Studies	State	DW/GW-12th FL	No		Cindy Wakat 6-6192 John Taylor 6-9288
