Water Quality Management Directory

Fourth Edition

4407768000

U.S. Environmental Protection Agency

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE **MAY 19 1980**

SUBJECT **Directory of Water Quality Management Designated
State & Local Agencies**

FROM **Merna Hurd, Director**
Water Planning Division 

TO **All Regional Water Division Directors**
All Regional WQM Coordinators

INFORMATION MEMORANDUM: INFO: 80-76

The Water Planning Division has prepared this Directory to facilitate the exchange of information about water quality management.

As in past editions, the Directory includes information necessary to contact those agencies and people directly involved in water quality management programs, as well as an appendix of all 208 grant awards.

Although every effort was made to avoid errors, some inevitably slip by. Consequently, we would encourage your corrections. Comments, corrections or suggestions should be addressed to Patti Morris, Operations Branch, Water Planning Division, WH-554, U.S. EPA, 401 M Street S.W., Washington, D.C. 20460 (202-755-6026).

REGION:

HOW TO USE YOUR DIRECTORY

Agency addresses are listed under the State in which they are located, and States are listed alphabetically within the ten Federal Regions. A map is displayed with each State indicating areas undergoing areawide water quality management planning. The agency listing presents the State water quality management agency first, followed by the States agencies. Local agencies are indented five spaces and are generally listed in order of designation. To the right of the agency address are counties included in the planning area. Information on grant awards is presented separately in the appendices.

We have provided a thumb index to facilitate finding the Regions, a table of contents alphabetized by State, a general table of contents and an agency table of contents.

THUMB INDEX: to use the thumb index, bend pamphlet back with your right hand and find the black bar that lines up with the symbol of the Region you are seeking.
