ABSTRACT

A Directory of Personnel in Ocean Waste Disposal And Related Environmental Science Fields

This directory was compiled by the Oceanics Department of Interstate Electronics Corporation while performing research and field surveys on ocean waste disposal. This work was done for the U.S. Environmental Protection Agency, Ocean Disposal Program Office under Contract No. 68-01-0796.

The purpose of the directory is to facilitate communication between managers, engineers and scientists working in the field of ocean waste disposal and related environmental sciences.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
AIR AND WATER PROGRAMS

FOREWORD

The Oceanics Department of Interstate Electronics Corporation, Anaheim, California, is engaged in a study of ocean waste disposal practices in selected geographic areas of the United States. In the performance of their contract, they have contacted an extensive number of managers, engineers and scientists who are working on ocean disposal problems or in closely associated environmental science fields. Realizing that communications are a major problem in any environmental program among those actively involved in the field, the Ocean Disposal Program Office decided to assemble this directory. We realize in presenting any document of this nature that there will be errors and omissions. To correct these, we solicit your cooperation in using the data entry forms provided at the back of the volume. These forms can be used for additions, corrections and suggestions. Material recieved will be considered for incorporation into subsequent issues.

A handwritten signature in cursive script, reading "T. A. Wastler", is positioned above the typed name.
