The AP series of reports is published by the Technical Publications Branch of the Information Services Division of the Office of Administration for the Office of Air Programs, Environmental Protection Agency to report the results of scientific and engineering studies, and information of general interest in the field of air pollution. Information reported in this series includes coverage of intramural activities and of cooperative studies conducted in conjunction with state and local agencies, research institutes, and industrial organizations. Copies of AP reports are available free of charge to Federal employees, current contractors and grantees, and nonprofit organizations - as supplies permit - from the Air Pollution Technical Information Center, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, or from the Superintendent of Documents.

Publication No. AP-47

GUIDE TO RESEARCH IN AIR POLLUTION

SECTION 1. INTRODUCTION

This eighth edition of the Guide to Research in Air Pollution was compiled by the Center for Air Environment Studies of The Pennsylvania State University for the U.S. Environmental Protection Agency. Included in this document are projects that were active in Calendar Year 1972.

The Guide is presented in three parts: an alphabetical list of projects in which each domestic project is listed by state and each foreign project is listed by country, a list of projects by subject category, and a list of projects by name of principal investigator.

In Section 2, the following information is presented for each project: project number, name and location of the performing research organization, project title, name and address of the principal investigator, name of sponsor, and type of support. As an added convenience, EPA-sponsored projects are designated by a ▼.

Section 3 is a listing of projects by subject category and project number.

Section 4 contains the name of the principal investigator (when available), the project number, and titles of publications and presentations resulting from the project.

Because the information contained in this Guide was collected by questionnaire, neither the U.S. Environmental Protection Agency nor The Pennsylvania State University can assume any responsibility for the accuracy of the information provided by the respondents.

This Guide has been issued periodically by the U.S. Department of Health, Education, and Welfare; Public Health Service; and Environmental Health Service as Public Health Service Publication No. 981. The present effort is the second edition published in the AP series of reports, which is being perpetuated by the Environmental Protection Agency.
