Innovative Clean-up Approaches: Investments in Technology Development, Results & Outlook for the Future

November 2 - 4, 1999
Indian Lakes Resort, Bloomington, Illinois
(Chicago Metropolitan Area)

Through a number of legislative programs and special initiatives, the US EPA has invested in the development and implementation of characterization and treatment technologies for hazardous waste site remediation. The US EPA has also sponsored and promoted the development, demonstration and commercialization of technologies both directly and with a number of partners in other Federal agencies, academia, and the private sector.

The US EPA Office of Research and Development (ORD) and Technology Innovation Office (TIO) are jointly sponsoring this conference. The conference will provide an opportunity for stakeholders and partners to share the most recent information about the status of these efforts, evaluate success of past efforts, and discuss future research and information needs. Stakeholders will also learn of opportunities to participate in EPA sponsored programs in the future such as those featured in the workshops.

Who Should Attend

- Researchers, Scientists, and Academia
- Developers and vendors of characterization and remediation technologies
- Federal and State remediation officials
- Private cleanup contractors
- Environmental consulting industry

Exhibits

Attendees will have the opportunity to discuss technologies one-on-one with exhibitors and to participate in hands-on demonstrations.

Technical Presentations

- Site Characterization
- Treatment of Recalcitrant Compounds
- Monitored Natural Attenuation
- Dense Non-Aqueous Phase Liquids
- Groundwater Treatment
 - permeable reactive barriers
 - pump and treat enhancements
 - oxidation
- In-situ Soil Treatment:
 - bioremediation
 - phytoremediation
- Metals in Soils

Workshops

- SITE Program
- Brownfields
- EPA Research Grants
 - ScienceTo Achieve Results (STARS) Program
 - Small Business Innovative Research (SBIR) Program
- Electronic Information Resources

For More Information

The conference program and online registration will be available on EPA's home page in July 1999.
