TRIAD: A SMARTER SOLUTION TO SITE CLEANUP

The Triad is an innovative approach to decision-making for hazardous waste site characterization and remediation. The Triad approach proactively exploits new characterization and treatment tools, using work strategies developed by innovative and successful site professionals. The Triad Resource Center provides the information hazardous waste site managers and cleanup practitioners need to implement the Triad effectively.

"The NJDEP supports and encourages the use of the Triad for sites undergoing investigation and remediation within the Site Remediation and Waste Management Program where feasible."

*Evan Van Hook
New Jersey Department of Environmental Protection
Assistant Commissioner for Site Remediation and Waste Management*

Triad is a Federal/State Interagency Partnership

- Triad Overview**
Introduction to Triad key concepts, guiding principles, and benefits
- Triad Management**
Triad vs. traditional, cost estimation, procurement, QA/QC, logistics and implementation, and other management concerns
- Regulatory Information**
Legal defensibility, relationship to DQO process, QA/QC, and other regulatory issues

The Triad Resource Center (TRC) is the official interagency website for the Triad approach. The TRC is developed and maintained by a workgroup led by federal and state government partners, with input from academic- and private-sector site professionals. The website provides information describing how the Triad approach restructures projects from technical and project management perspectives.

The Triad Resource Center contains:

- a glossary of terms as they are used within the context of the Triad approach
- FAQs
- links to resources and references
- case studies and example work plans
- e-mail subscription service to receive the latest news and announcement concerning Triad
- news on up-coming conference presentations and training opportunities
- access to archived training materials
- points of contact for the multi-agency Triad workgroup
