

**AIR POLLUTION
TECHNICAL PUBLICATIONS
OF THE
U.S. ENVIRONMENTAL PROTECTION AGENCY**

JULY 1974

THIS LISTING PREPARED BY:

**Air Pollution Technical Information Center
Research Triangle Park, North Carolina 27711**

Beginning with the issue of January 1973, this catalog will be printed semi-annually. Each new edition will be updated to contain all new titles that have appeared since the previous edition. We are attempting to inform our readers of new reports as quickly as possible, therefore, some titles are included for which we do not yet have a price or order number. This information, along with titles and prices of new reports, will be furnished to subscribers through periodic announcements as soon as it becomes available. If the reader desires to obtain this information from an announcement, he should retain this catalog to refer to for the title as the announcement will contain only the report number, price, and order number.

Subscriptions are available free of charge from:

This catalog contains a complete listing of the reports issued in the AP and APTD series and selected reports in the EPA-R series and the numbering system adopted in July 1973, an example of which is given below.

The AP group provides information of general interest in the field of air pollution control and is made available to the public through the Government Printing Office (GPO).

The APTD series is issued to report technical data of interest to a limited readership; these reports are sold by the National Technical Information Service (NTIS). The majority of publications following APTD-69-21 are reports of work performed under contract to the Environmental Protection Agency.

The EPA-R series contains reports issued by the EPA Office of Research and Monitoring; these reports are also sold by NTIS. They have numbers such as EPA-R1-72-001 which are abbreviated to R1-72-001 in this catalog. In correspondence regarding EPA-R reports, readers are advised to add EPA- in front of the abbreviated number to avoid confusion.

In July 1973 a new numbering system for all EPA reports went into effect and the AP, APTD, and EPA-R designations were discontinued. All reports related to air pollution that are assigned numbers under the new system will be contained in this catalog. An example of this numbering system is EPA-450/2-72-001 which is abbreviated to 4502-72-001. If it is necessary to refer to these numbers, please restore them to their intended format by adding "EPA-" in front and a slash mark after the third digit.

An index is provided to assist you in locating specific reports.

ORDERING INSTRUCTIONS

1. AP SERIES: Generally, if a price is given, a paper copy can be purchased only from the Government Printing Office using the GPO number (see p.ii). If no price is given, it is no longer for sale at GPO and a paper copy can be purchased from NTIS using the NTIS order number. In such cases, if the NTIS price is known it will be given in parentheses after the NTIS number, otherwise, it will be necessary to contact NTIS to learn the price.

2. APTD AND EPA-R SERIES: Unless otherwise indicated, these reports are for sale at the National Technical Information Service using the NTIS number given. The prices listed are for paper copies. If the NTIS number is given without the price, the reader may learn the price by contacting NTIS. The absence of both NTIS number and price indicates that NTIS processing has not been completed. Inquiries regarding the availability of such reports may be directed to NTIS a month after the date of this catalog; this information will also be provided in periodic announcements sent to subscribers to the catalog as indicated inside the front cover.

3. CURRENT NUMBERING SYSTEM: Some of these reports will be sold by GPO and some by NTIS. The statements above regarding these sales outlets will apply.

NOTE: Any item having an NTIS number can be ordered from NTIS in microfiche at \$1.45 each. Payment must accompany all orders sent to GPO; NTIS will accept orders without payment in advance but will charge an additional 50¢ for each different title that is ordered in paper copy.

INDEX

This index was compiled in an attempt to simplify locating specific reports. It is based on titles only and is therefore not exhaustive.

For brevity, cities are not included; reports concerning specific cities are listed under their respective states.

All entries related to vehicles are listed under mobile sources which is subdivided into specific areas.

The following acronyms and abbreviations are employed:

CAMP	Continuous Air Monitoring Programs
CFSS	Combined File Search System
CHES	Community Health Environmental Surveillance System
EMIS	Ecosystem of Machines Information System
ESSA	Environmental Science Services Administration
LAPPES	Large Power Plant Effluent Study
NASN	National Air Sampling Network
NEDS	National Emission Data System
NERC	National Environmental Research Center
RAPS	Regional Air Pollution Study
RTP	Research Triangle Park, North Carolina
SAROAD	Storage and Retrieval of Aerometric Data
SOCTAP	Sulfur Oxide Control Technology Assessment Panel

NOTE: The entries under each term are in numerical order from left to right.
