

Open the Door to Clean Lakes!

Clean lakes need healthy lakeshores!

- Grow native plants and trees along the lakeshore.
- Keep fallen trees and logs in shallow waters – fish need them!
- Mow tall and fertilize less to keep out pollutants.
- Plant a rain garden to absorb rain water.
- On driveways and paths, use surfaces that allow rain to soak in.

Healthy lakeshores need you!

Make a Difference!

**Planting native plants,
trees, and flowers along
the water's edge:**

- Protects lakes from pollution
- Provides habitat for bass, trout, and other fish
- Helps property values
- Prevents erosion
- Reduces your carbon footprint
- Increases aesthetic beauty
