**National Radon Measurement
Proficiency Program**

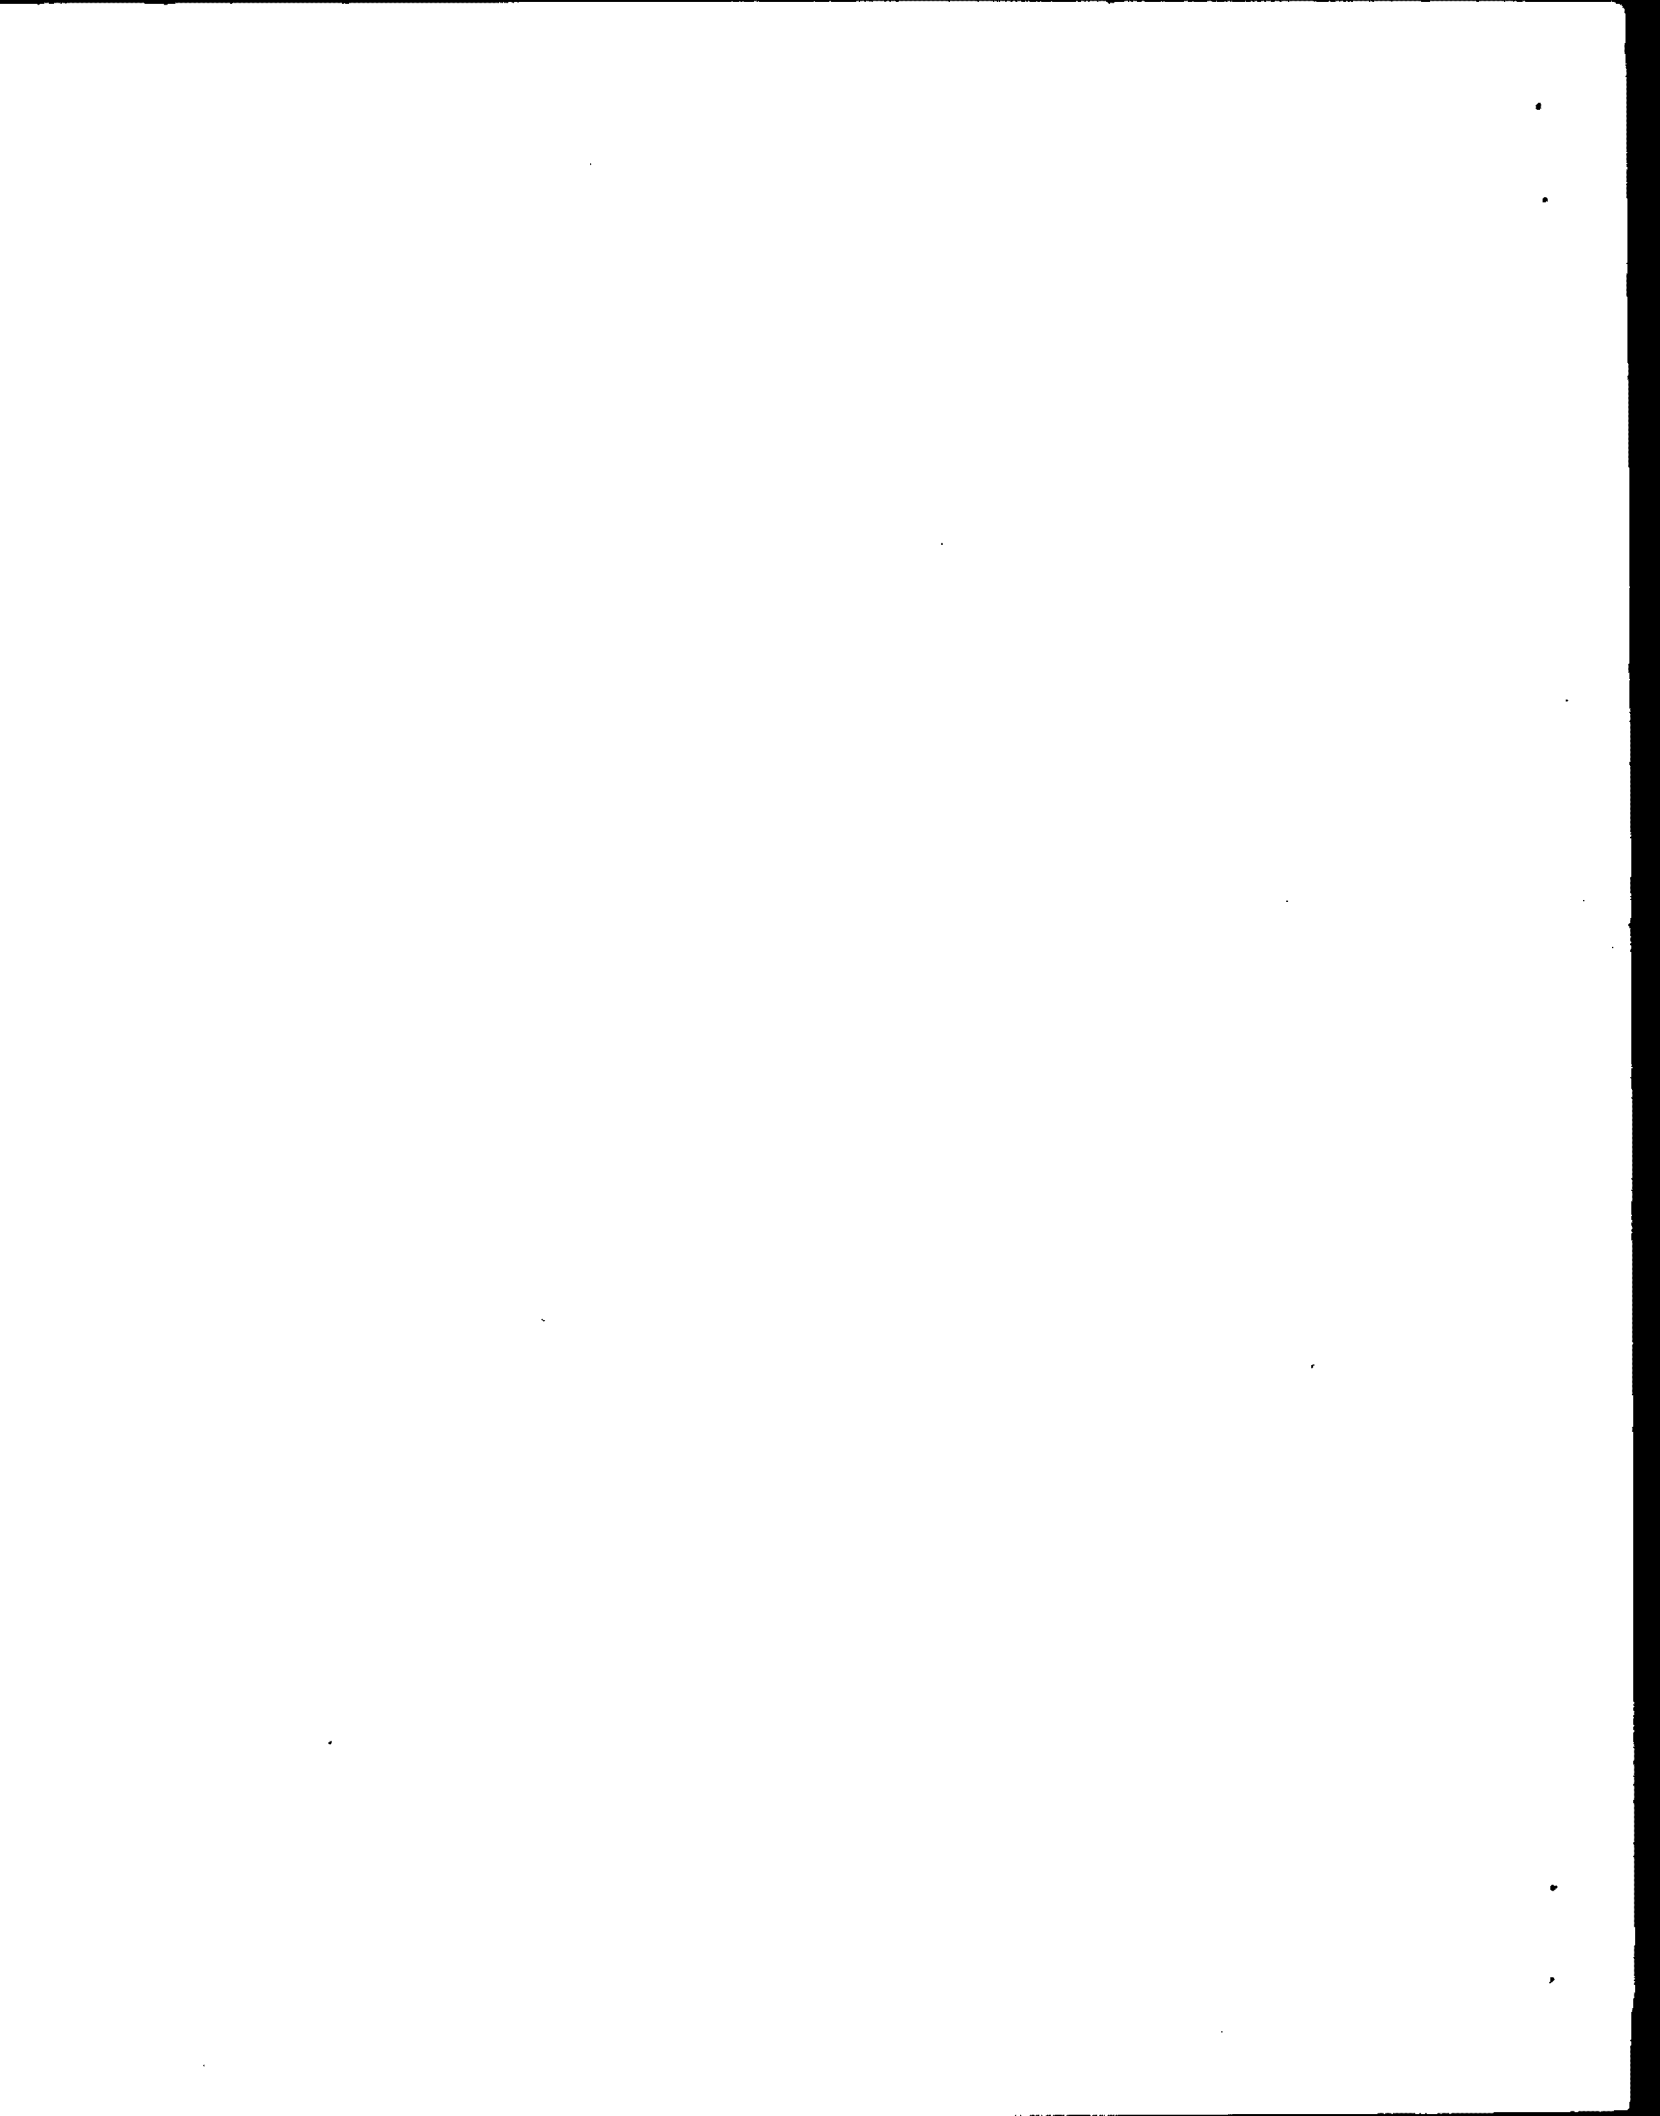

Individual Proficiency Report: Indices

Prepared Under
Contract #68D90170

For
Radon Division (ANR-464)
Office of Radiation Programs
U.S. Environmental Protection Agency
Washington, DC 20460

For use only by States and EPA Regional Offices

May 1992

Preface

This report, a supplement to the RMP Individual Proficiency Report, will further assist government officials in providing advice to the public on the selection of proficient radon measurement contractors. The Report is a listing of 200 individual contractors who have met the requirements of EPA's National Radon Measurement Proficiency (RMP) Program as of April 30, 1992. The Report provides information on each contractor's name, RMP individual and organization identification numbers, company name, address, phone number, and geographic service area.

This report provides two additional indices, indexed by company name and RMP individual identification number. This report is intended to help users quickly identify a proficient contractor if only the company name is known, or to verify which contractor is associated with a particular individual ID number.

Index-1. RMP Program Individual Proficiency Report by Company Name	1
Index-2. RMP Program Individual Proficiency Report by Identification Number	4

HOW TO USE THE INDICES

This report lists proficient radon measurement contractors in two indices. Index 1 is an alphabetical list by company name, and includes the company name, organization ID number, name of the proficient individual contractor, and individual ID number. Index 2 is a list of all proficient contractors, indexed by individual ID number, and includes the name of the contractor, individual and organization identification number and the organization name. These indices are supplements to the two listings provided in the main Report and can be used to more quickly identify proficient measurement contractors if only a company name or individual RMP identification number is known.

Users of these lists should select an individual measurement contractor and ensure that the services are provided by the listed contractor.
