

Superfund Record of Decision:

Milltown, MT
(Supplement to 04/14/84 ROD)

1. REPORT NO. EPA/ROD/RO8-85/002		2.	3. RECIPIENT'S ACCESSION NO.
4. TITLE AND SUBTITLE SUPERFUND RECORD OF DECISION Milltown, MT (Supplemental ROD)		5. REPORT DATE August 7, 1985	
		6. PERFORMING ORGANIZATION CODE	
7. AUTHOR(S)		8. PERFORMING ORGANIZATION REPORT NO.	
9. PERFORMING ORGANIZATION NAME AND ADDRESS		10. PROGRAM ELEMENT NO.	
		11. CONTRACT/GRANT NO.	
12. SPONSORING AGENCY NAME AND ADDRESS U.S. Environmental Protection Agency 401 M Street, S.W. Washington, D.C. 20460		13. TYPE OF REPORT AND PERIOD COVERED Final ROD Report	
		14. SPONSORING AGENCY CODE 800/00	

15. SUPPLEMENTARY NOTES

16. ABSTRACT

The Milltown Reservoir Sediments site is located in Missoula County, Montana. The site is adjacent to the Milltown Dam where the Big Blackfoot River joins the Clark Fork River. Constructed in 1906, this hydroelectric dam formed a reservoir that trapped sediments from mining, milling and smelting operations in the upper Clark Fork valley. During the years since construction, the reservoir storage has been almost totally filled with arsenic contaminated sediments. In May 1981, Milltown's four community water supply wells were found to be contaminated with arsenic and other heavy metals. The highest arsenic levels measured have been between 0.54 to 0.90 milligrams per liter (mg/l).

The original ROD was signed in April 1984 approving the installation of an alternative water supply, and the flushing of the plumbing system of each house to remove suspended materials from the water system. This supplemental ROD approves the replacement of household water supply appurtenances and on-going sampling of residential water systems to fulfill the intent of the original ROD.

INSTRUCTIONS

1. **REPORT NUMBER**
Insert the EPA report number as it appears on the cover of the publication.
2. **LEAVE BLANK**
3. **RECIPIENTS ACCESSION NUMBER**
Reserved for use by each report recipient.
4. **TITLE AND SUBTITLE**
Title should indicate clearly and briefly the subject coverage of the report, and be displayed prominently. Set subtitle, if used, in smaller type or otherwise subordinate it to main title. When a report is prepared in more than one volume, repeat the primary title, add volume number and include subtitle for the specific title.
5. **REPORT DATE**
Each report shall carry a date indicating at least month and year. Indicate the basis on which it was selected (e.g., *date of issue, date of approval, date of preparation, etc.*).
6. **PERFORMING ORGANIZATION CODE**
Leave blank.
7. **AUTHOR(S)**
Give name(s) in conventional order (*John R. Doe, J. Robert Doe, etc.*). List author's affiliation if it differs from the performing organization.
8. **PERFORMING ORGANIZATION REPORT NUMBER**
Insert if performing organization wishes to assign this number.
9. **PERFORMING ORGANIZATION NAME AND ADDRESS**
Give name, street, city, state, and ZIP code. List no more than two levels of an organizational hierarchy.
10. **PROGRAM ELEMENT NUMBER**
Use the program element number under which the report was prepared. Subordinate numbers may be included in parentheses.
11. **CONTRACT/GRANT NUMBER**
Insert contract or grant number under which report was prepared.
12. **SPONSORING AGENCY NAME AND ADDRESS**
Include ZIP code.
13. **TYPE OF REPORT AND PERIOD COVERED**
Indicate interim final, etc., and if applicable, dates covered.
14. **SPONSORING AGENCY CODE**
Insert appropriate code.
15. **SUPPLEMENTARY NOTES**
Enter information not included elsewhere but useful, such as: Prepared in cooperation with, Translation of, Presented at conference of, To be published in, Supersedes, Supplements, etc.
16. **ABSTRACT**
Include a brief (200 words or less) factual summary of the most significant information contained in the report. If the report contains a significant bibliography or literature survey, mention it here.
17. **KEY WORDS AND DOCUMENT ANALYSIS**
 - (a) **DESCRIPTORS** - Select from the Thesaurus of Engineering and Scientific Terms the proper authorized terms that identify the major concept of the research and are sufficiently specific and precise to be used as index entries for cataloging.
 - (b) **IDENTIFIERS AND OPEN-ENDED TERMS** - Use identifiers for project names, code names, equipment designators, etc. Use open-ended terms written in descriptor form for those subjects for which no descriptor exists.
 - (c) **COSATI FIELD GROUP** - Field and group assignments are to be taken from the 1965 COSATI Subject Category List. Since the majority of documents are multidisciplinary in nature, the Primary Field/Group assignment(s) will be specific discipline, area of human endeavor, or type of physical object. The application(s) will be cross-referenced with secondary Field/Group assignments that will follow the primary posting(s).
18. **DISTRIBUTION STATEMENT**
Denote releasability to the public or limitation for reasons other than security for example "Release Unlimited." Cite any availability to the public, with address and price.
19. & 20. **SECURITY CLASSIFICATION**
DO NOT submit classified reports to the National Technical Information Service.
21. **NUMBER OF PAGES**
Insert the total number of pages, including this one and unnumbered pages, but exclude distribution list, if any.
22. **PRICE**
Insert the price set by the National Technical Information Service or the Government Printing Office, if known.

SUPPLEMENTAL RECORD OF DECISION
REMEDIAL ALTERNATIVE SELECTION
ADDITIONAL MEASURES TO REPLACEMENT POTABLE WATER SUPPLY

Site: Milltown Reservoir Sediments, Milltown, Montana

Analysis Reviewed:

I have reviewed the following documents describing the necessity for additional measures to supplement the Record of Decision selection that was decided on April 14, 1984, for this site.

- Data reports from the testing and flushing of household water systems conducted under the remedial action approved in the 4/14/84 ROD.
- Recommendations by the Montana Department of Health and Environmental Sciences (MDHES).
- Memorandum from John Wardell dated August 6, 1985 with attached staff report titled "Supplementary Analysis of Milltown, Montana Drinking Water Supply."

Description of Selected Options:

- Replacement of household water supply appurtenances that remain a source for persistent arsenic and heavy metal contamination as described in the support documentation referenced above.
- On-going sampling of individual residences to insure that the sources of contamination have been removed.

Declarations:

Consistent with the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), and the National Contingency Plan (40 CFR Part 300), I have determined that the replacement of water supply appurtenances and on-going sampling of residential water systems is necessary to fulfill the intent of the original ROD and therefore are cost-effective remedies, and that they are part of a key action necessary to provide adequate protection for public health, welfare and the environment. The State of Montana has been consulted and agrees with the approved remedy. I have determined that this action is appropriate when balanced against the need to use Trust Fund money at other sites.

The State is conducting additional remedial investigation/feasibility study to evaluate the extent of contamination. If additional remedial actions are determined to be necessary, a record of decision will be prepared for approval of the future remedial action.

John G. Welles
Regional Administrator
