INTRODUCTION

The Pesticide Data Submitters List is a compilation of names and addresses (and, where available to the Agency, telephone numbers) of registrants who wish to be notified and offered compensation for use of their data. It was developed to assist pesticide applicants in fulfilling their obligation as required by sections 3(c)(1)(D) and 3(c)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and 40 CFR Part 162.9-5 regarding ownership of data used to support registration.

HOW TO USE THE MICROFICHE

The listing consists of two parts: a sequential list of data submitters sorted by chemical code number and an index to the chemical codes arranged alphabetically by chemical name(1 fiche).

Since many chemical names are too long to be handled easily, the Agency has assigned a chemical code number for every active chemical ingredient. This six-digit number (including zeroes) appears under the heading "code number" to the left of the chemical name on fiche number 4. The user should determine the code for a particular chemical from this list and then look in fiches 1 through 3 entitled "Pesticide Data Submitters by Chemical."

When you have located the chemical code number of interest, there is a sequential list by company number of all companies who have submitted data concerning that particular chemical since December 31, 1969. If a chemical does not appear on the Data Submitters List, it is an indication that (a) no data have been submitted for that active ingredient since December 31, 1969, or (b) data submitters have asked to have their names withdrawn from the listing so that no correspondence regarding compensation would be sent to them, or (c) a registration standard identifying data submitters has been issued for that chemical. At the present time, registration standards have been issued for the following chemicals:

#Public comment chemical: draft standards completed (not officially issued) and out for public comment prior to finalization. Copies of draft standard available from Information Services Branch, EPA/OPP (TS-757), Washington D.C. 20460.

Copies of registration standards are being made available through the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Va 22161. When ordering, please provide the NTIS stock number indicated above.

A current copy of the list of registration standards available through NTIS may be obtained from the Registration Support Branch. (See address under the section titled, "Correction of the List.")

Data types are described below. For each chemical for which any data submitted is listed, the listing bears one or more of the following codes: AT, C, EC, Exclusive Use, FE, FW, OT, PM, S, or T. The codes explain the types of data involved. An explanation of these codes follows:

At indicates that the applicant has submitted acute toxicity data where the substance tested was a formulated end-use product rather than a technical grade or manufacturing-use product (including acute oral, dermal, inhalation, primary eye and dermal sensitization).

C indicates a common name for a chemical.

EC indicates that the data submitter has submitted environmental chemistry field studies where the substance tested was required to be the formulated end-use product rather than a technical grade of manufacturing-use product.

Exclusive Use - Where new chemical (new active ingredients) have been registered since September 30, 1978, the listing designates the applicable data as "exclusive use data" in accordance with section 3(c)(1)(D)(i) of FIFRA. The requestor must write directly to the submitter listed for written permission to use the data.

EF indicates that the data submitter has submitted efficacy data.

FW indicates that the data submitter has submitted fish and wildlife field studies, where the substance tested was required to be a formulated end-use product rather than a technical grade or manufacturing-use product.

OT indicates that the data submitter has submitted other data, which may be product or residue chemistry, subacute and chronic toxicity data, acute toxicity data using a technical or manufacturing-use product, and/or other fish and wildlife and environmental chemistry studies than set forth above.

PM with a specific number indicates the product manager in the Registration Division of the Office of Pesticide Programs who is responsible for guiding the registration of that chemical. Information and assistance may be obtained by contacting that particular product manager, or mail may be addressed by product manager number to his attention.

T indicates a trade name. Compounds with T are not acceptable names to be listed on label.

CORRECTION OF LIST

If users find an error or omission in the updated list, they should notify the Agency in writing of the error and what corrections are necessary. Please address such corrections to:
