EPA

Research, Demonstration, Training, and Fellowship Awards

DISCRIMINATION PROHIBITED

Federal law prohibits discrimination on the basis of race, color, religion, sex, age, or national origin, in all programs and activities receiving assistance from the Environmental Protection Agency.

INTRODUCTION

This publication provides information about the Environmental Protection Agency's (EPA) research, demonstration, training, and fellowship awards during the period April 1977 - September 1977. It is a companion publication to State and Local Grant Awards which lists awards to State and Local agencies.

The data is organized into two sections:

Section One - Georgraphic listing by State and program.

Section Two - Grant Number Index and brief project descriptions arranged in ascending order of the Grant Identification Number.

Project descriptions were, for the most part, prepared by the grantees and are provided only for those grants administered by the EPA Headquarters office. The inclusion of this information has proven to be very useful from a management aspect as well as in meeting and fulfilling requirements for providing information to the public.

The Grant Number Index is provided as an aid for cross-referencing information between the two sections. Locating a grant number in this index, the reader will find the name of the applicant and the State location. By referring to that State's listing(s) in Section One, information on that particular grant will be found.

This material was prepared by Lynn Szedon with the assistance of Sandra Artis and Donna Whitaker. We have made what we feel are a few improvements to this publication. The title, formerly the Awards Register, Volume I, has been changed, as well as the cover design. One of the major improvements is in the format and content of the project descriptions. Additional information, such as the starting and completion dates, amount of funds obligated, and the EPA Task Code has been included. The Smithsonian Science Information Exchange maintains a computerized file of project summaries for use by the general scientific community. We have, with the assistance of the Office of Research and Development, utilized this file for most of the project descriptions listed in Section Two.

Any comments or criticisms should be directed to Lynn Szedon, Grants Operations Branch (PM-216), Grants Administration Division, on (202) 755-3370.

SOURCES OF INFORMATION ON EPA GRANTS AWARDED, REPORTS GENERATED BY GRANTS AND OTHER GRANT-RELATED MATERIALS

Research, Demonstration, Training, and Fellowship Awards

Section I lists research, demonstration, training, and fellowship awards by State, program, and grantee name. Each record provides applicant name, municipality, program element, title, project director, grant identification number, type of grant award, date and dollar amount of award. Section II contains brief project descriptions for research and demonstration projects administered by Headquarters and is arranged in ascending order by the grant identification number. An index is provided for cross-referencing the information between Sections I and II.

1st Half of FY 1977 (October 1976 - March 1977)
EPA-GAD/1-78-01, NTIS Number PB278942, price $7.25

2nd Half of FY 1977 (April 1977 - September 1977)
EPA-GAD/1-78-02, NTIS Number and price to be assigned

State and Local Grant Awards

Lists all State and Local Assistance Awards by State, by program, and by grantee name. Format the same as for Research, Demonstration, Training, and Fellowship Awards listed above.

1st Half of FY 1977 (October 1976 - March 1977)
EPA-GAD/2-78-01, NTIS Number and price to be assigned

2nd Half of FY 1977 (April 1977 - September 1977)
EPA-GAD/2-78-02, NTIS Number and price to be assigned

Volume I. Section I lists research, demonstration, training and fellowship awards by State, program, and grantee name. Each record provides applicant name, municipality, program element, title, project director, Grant Identification Number, type of grant award, date and dollar amount of award. Section II contains brief project descriptions for research and demonstration projects administered by Headquarters and is arranged in ascending order by the Grant Identification Number. An index is provided for cross-referencing the information between Sections I and II. Section III is a cross-walk for use in identifying the program/subprogram area of a grant in accordance with classifications of our Office of Research and Development.

1st Half of FY 1976 (July 1975 - December 1975)
EPA-GAD/1-76-001, NTIS Number PB252893, price $5.25

2nd Half of FY 1976 (January 1976 - June 1976)
EPA-GAD/1-76-003, NTIS Number PB260742, price $9.00

Transition Quarter of FY 1976 (July 1976 - September 1976)
EPA-GAD/1-76-005, NTIS Number PB275407/AS, price $8.00

1st Half of FY 1975 (July 1974 - December 1974)
EPA-GAD/1-75-001, NTIS Number PB241476, price $5.25

2nd Half of FY 1975 (January 1975 - June 1975)
EPA-GAD/1-75-003, NTIS Number PB245575, price $10.75, Microfiche $3.00

Volume II. Lists all State and Local Assistance Awards by State, by program, and by grantee name. Contents and format the same as for Volume I, Section I.

1st Half of FY 1976 (July 1975 - December 1975)
EPA-GAD/1-76-002, NTIS Number PB253091, price $11.00

2nd Half of FY 1976 (January 1976 - June 1976)
EPA-GAD/1-76-004, NTIS Number PB261980, price $11.00

Transition Quarter of FY 1976 (July 1976 - September 1976)
EPA-GAD/1-76-006, NTIS Number PB275408/AS, price $9.00

AWARDS REGISTER, VOLUME II, CONTINUED

1st Half of FY 1975 (July 1974 - December 1974)
EPA-GAD/1-75-002, NTIS Number PB241400, price $9.00, Microfiche, $3.00

2nd Half of FY 1975 (January 1975 - June 1975)
EPA-GAD/1-75-004, NTIS Number PB245576, price $11.75, Microfiche, $3.00.

AWARDS REGISTER, GRANTS ASSISTANCE PROGRAMS OF EPA
Fiscal Year 1974 (July 1973 - June 1974)

Volume I. Lists all awards in Fiscal Year 1974 except Waste Water Treatment Construction and Waste Water Treatment Reimbursement Awards. NTIS Number PB238370, price $8.00, microfiche, $3.00.

Volume II. Lists only Waste Water Treatment Construction Awards in Fiscal Year 1974. NTIS Number PB238371, price $9.25, microfiche, $3.00.

Volume III. Lists only Waste Water Treatment Reimbursement Awards in Fiscal Year 1974. NTIS Number PB238372, price $9.00, microfiche, $3.00.

AWARDS REGISTER, GRANTS ASSISTANCE PROGRAMS OF EPA
Fiscal Year 1973 (July 1972 - June 1973)

The format of this publication has the initial sort by State. Each entry includes grantee, identification number, program area, grant title, award date, and dollar amount. Environmental Protection Agency 220/1-73-004, NTIS Number PB229827, price $15.25, microfiche, $3.00.

The above publications can be purchased from:

National Technical Information Service (NTIS)
Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161
(703) 557-4650

AWARDS REGISTER, GRANTS ASSISTANCE PROGRAMS OF EPA
Fiscal Year 1972 (July 1971 - June 1972)

This publication is currently out of print. It is available for reference at all EPA libraries and at EPA Headquarters, Grants Administration Division, 401 M Street SW, Washington, D.C. 20460

MONTHLY LISTING OF AWARDS FOR CONSTRUCTION GRANTS FOR WASTEWATER TREATMENT WORKS

Awards for the wastewater treatment facilities construction grants under Public Law 92-500 made during a particular month are listed in a monthly publication entitled "Monthly Listing of Awards for Construction Grants for Wastewater Treatment Works." This publication is prepared by the Grants Administration Division and distributed and sold by the National Technical Information Service (NTIS).

The March 1974 issue (PB23130) provides a base listing of all grants awarded under Public Law 92-500. Beginning with the April 1974 issue (PB231300-01), the listings contain awards for one month only and are numbered in sequence. Microfiche (24X) of each copy is also available. The subscription price is $120.00 for 12 issues. Previous issues can be purchased at $10.50 per copy.

The publication is distributed to subscribers approximately six weeks after the close of the awards-listed month. It may be obtained through:

National Technical Information Service
Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161
(703) 557-4650

This publication includes descriptive information about Environmental Protection Agency assistance programs reprinted from the Catalog of Federal Domestic Assistance, which was prepared for the Office of Management and Budget. Similar information on programs of all Federal agencies is included in the Catalog which is available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20420 for $18.00 and includes changes as issued. It is also available for public use in Federal Depository Libraries.

Copies of this publication may be obtained from the Environmental Protection Agency, Grants Operations Branch, Grants Administration Division (PM-216), Office of Planning and Management, Washington, D.C. 20460.

NOTE: All of the preceeding publications are available for examination at the Grants Administration Division and Library of EPA Headquarters and each Regional office.

OTHER GRANT-RELATED INFORMATION

A brief summary of a grant project is available on the majority of research and demonstration grants.

These summaries are available for projects that have received Federal funding. In rare instances, a grant application may contain privileged information and is so designated. For these, only the award data, such as grant number, applicant name, organization, location, grant title, amount awarded, and award date is available. Other information may be available depending on the particular circumstances.

The Smithsonian Science Information Exchange (SSIE), room 300, 1730 M Street, N.W., Washington, D.C. 20036, receives a copy of the summary of a grant and makes it available to the public on a fee basis. The cost of a print-out, if the Agency is identified and the grant or contract number is provided, costs $2.00 per grant number with a $10.00 minimum fee. A search on a subject (topic) is $60.00 per search service for 1 to 50 titles, and an additional charge of 25¢ per title. A search on the investigator's name can also be performed. All inquiries and requests for this service should be addressed to SSIE or phone (202) 381-4211.

REPORTS GENERATED BY GRANT SUPPORTED PROJECTS

Final reports and other program reports generated by grant supported projects are published and made available if merited. Final report information is available from the following program offices:

For solid waste management and resource recovery:

Publication and Distribution Unit
Office of Solid Waste Management
Environmental Protection Agency
Cincinnati, Ohio 45268

For air pollution control:

Library MD-35
Environmental Protection Agency
Research Triangle Park, North Carolina 27711

For pesticide publications:

Information Section WH-569
Office of Pesticide Programs
Environmental Protection Agency
401 M Street SW
Washington, D.C. 20460

For other research and demonstration projects:

Technology Transfer Staff
Office of Research and Development
Environmental Protection Agency
Cincinnati, Ohio 45268

EPA REPORTS BIBLIOGRAPHY QUARTERLY SUPPLEMENT

(sponsored by Library Systems Branch)

The EPA Cumulative Bibliography 1970-1976 published in December 1976 (NTIS Number PB265920, price quote obtained from NTIS) contains a bibliographic citation with abstracts for reports generated by EPA and its predecessor agencies and entered into the NTIS collection through 1976. Access points to this information are by Report Title, Subject (keyword), Corporate or Personal Author, Contract Number, and Accession/Report Number.

Beginning in March 1977, quarterly update supplements will be published listing and indexing EPA technical reports and journal articles entered into the NTIS collection during the preceding quarter. An additional index titled "Sponsoring EPA Office" is included as well. The fourth quarterly issue will cumulate and become the annual index for the year.

To order documents or subscriptions, contact the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Do not order from the U.S. Environmental Protection Agency. If what you have ordered is in stock on hand, you should receive your order within two weeks after it arrives at NTIS. If what you have ordered must be reproduced from a microform, or if all the paper copies have been sold and reprints are in process, you should receive your order within four to six weeks. Infrequently, orders may be further delayed by a contractor's inability to deliver to NTIS. You will be notified if such a delay is expected.

The EPA Reports Bibliography Quarterly Supplement series is available on annual subscription from NTIS at a cost of $45.00 for North American Continent users (single copies, when available, are $12.50 each). For those outside the North American Continent, please write NTIS for prices.

The following EPA Libraries maintain for reference purposes completed sets of EPA reports on microfiche.

R A ANTHES	PENN. STATE UNIVERSITY
A K BLACKADAR	PENN. STATE UNIVERSITY
R L KABEL	PENN. STATE UNIVERSITY
J LUMLEY	PENN. STATE UNIVERSITY
H TENNEKES	PENN. STATE UNIVERSITY

MILE: 03/78 -FINAL REPORT

PREVIOUS WORK IN THE CONTINUING SRG PROGRAM WAS FOCUSED TOWARD DEVELOPMENT OF A COMPREHENSIVE, METEOROLOGICAL MODEL SUITABLE FOR APPLICATION TO URBAN, MESO AND SYNOPTIC SCALE PROBLEMS. THE RESULTING MODEL IS NO W UNDERGOING EXTENSIVE TESTING AND VALIDATION CASE STUDIES. SEVERAL OF THE 1, 2 AND 3-D VERSIONS ARE ALSO BEING APPLIED TO SELECTED AIR POLLUTION TRANSPORT AND DIFFUSION SITUATIONS SUCH AS EAST COAST AIR STAGNATION EPISODES. RESEARCH ALSO CONTINUES INTO IMPROVED PLANETARY BOUND ARY LAYER (PBL) PARAMETERIZATION SCHEMES. SIMPLIFIED II-ND ORDER CLOSE SCH EMES HAVE BEEN VERIFIED AGAINST SODAR AND AIRCRAFT MEASUREMENTS USING OBSE RVATIONAL SYSTEMS DEVELOPED EARLIER IN THE PROGRAM. SEVERAL 1-D PBL MODELS HAVE BEEN INTEGRATED WITH COMMONLY USED DIFFUSION PREDICTION MODELS AND AD APTED FOR GENERAL USE ON DESK TOP CALCULATORS. TESTING OF SURFACE BOUNDARY CONDITION PARAMETERIZATION SCHEMES IS PROCEEDING USING SATELLITE OBSERVATIONS OF THE LOS ANGELES BASIN. SELECTED POLLUTANT DEPOSITION VE LOCITIES ARE BEING DERIVED ON THE BASIS OF AIRBORNE MEASUREMENTS MADE IN P ENNSYLVANIA AND NEW YORK. AIR BORNE MEASUREMENTS MADE DURING THE ST. LOUIS RAPS EXPERIMENT WILL BE PREPARED FOR USE IN URBAN SCALE MODELING STUDIES.

OPTICAL EFFECTS OF ATMOSPHERIC AEROSOL

START/ COMPL DATE : 07/77 - 06/78 : FUNDING : EST. - FY 77 / $ 125000
TASK/EPA CODE :G603A-AG-11 / R800665-13 (GRANT) PRIOR FY76 / $ 360001
PROJECT OFFICER : T ELLESTAD
INVESTIGATORS : A P WAGGONER UNIV. OF WASHINGTON
R J CHARLSON UNIV. OF WASHINGTON
MILE: 06/78 -REPORT ON ANTHROPOGENIC CONTRIBUTION TO VISIBILITY REDUCTION
THIS CONTINUES OUR PAST STUDIES RELATING AEROSOL SOURCES, PHYSICAL AND CHEMICAL PROPERTIES OF THE PARTICLES, EFFECTS OF RELATIVE HUMIDITY TO ATMOSPHERIC OPTICAL PROPERTIES SUCH AS RADIATIVE CLIMATE AND VISIBILITY. INCLUDED WILL BE STUDIES OF THE RELATIONSHIPS OF PARTICLE PROPERTIES AND SYNOPTIC SCALE TRANSPORT.

OPTICAL EFFECTS OF ATMOSPHERIC AEROSOL

START/ COMPL DATE : 10/75 - 12/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :G625B-EA-15 / R800665-13 (GRANT) PRIOR FY76 / $ 350001
PROJECT OFFICER : I I WILSON
INVESTIGATORS : A P WAGGONER UNIV. OF WASHINGTON
R J CHARLSON UNIV. OF WASHINGTON

MILE: 12/78 -FINAL REPORT

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. THIS CONTINUE OUR PAST STUDIES RELATING AEROSOL SOURCES, PHYSICAL AND CHEMICAL PROPERTIES OF THE PARTICLES, EFFECTS OF RELATIVE HUMIDITY TO ATMOSPHERIC OPTICAL PROPERTIES SUCH AS RADIATIVE CLIMATE AND VISIBILITY. INCLUDED WILL BE STUDIES OF THE RELATIONSHIPS OF PARTICLE PROPERTIES AND SYNOPTIC SCALE TRANSPORT.

OUTDOOR SIMULATION OF AIR POLLUTION CONTROL STRATEGIES

START/ COMPL DATE : 02/75 - 01/78 : FUNDING : EST. - FY 77 / $ 119000
TASK/EPA CODE :G603A-AC-05 / R800916-05 (GRANT) PRIOR FY76 / $ 1000001
PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : H JEFFRIES UNIV. OF NORTH CAROLINA
D L FOX UNIV. OF NORTH CAROLINA
MILE: 05/77 -REPORT - EFFECTS OF DILUTION
10/78 -REPORT - TEMPERATURE EFFECTS ON PHOTOCHEMICAL SMOG

IT HAS BEEN THE BELIEF OF OUR RESEARCH GROUP THAT AN UNDERSTANDING OF THE SMOG PRECURSORS AND ITS CONTROL CAN BE MOST EFFECTIVELY ACHIEVED BY THE INTEGRATED USE OF SMOG CHAMBER DATA, PHOTOCHEMICAL MODELING AND AEROMETRIC MEASUREMENTS. WE HAVE DISCOVERED THAT DIRECT AND SIMPLE APPLICATION OF CURRENT SMOG CHAMBER DATA TO REAL ATMOSPHERIC CONDITIONS IS DIFFICULT AT BEST. THIS IS BECAUSE 1.) OXIDANT YIELDS IN CHAMBERS ARE STRONGLY DEPENDENT ON WALL CHARACTERISTICS, NITROGEN-ALDEHYDES CHEMISTRY, CHAMBER LIGHT INTENSITIES AND EXPERIMENTAL TEMPERATURES AND 2.) THE DYNAMIC PROCESSES OF INJECTION, DILUTION AND MIXING IN REAL ATMOSPHERES ARE NOT WELL REPRESENTED BY JUST IRRADIATING MORNING URBAN CONCENTRATIONS IN A SMOG CHAMBER. IT IS OUR HOPE THAT CURRENT AND CONTINUED REFINEMENTS IN OUR PHOTOCHEMICAL MODEL WILL MAKE IT POSSIBLE TO BETTER QUANTIFY THE MOST IMPORTANT REGIONS OF HYDROCARBON NOX-OXIDANT CONTROL STRATEGY DIAGRAMS. SOME OF THE MAJOR IMPROVEMENTS IN THE MODEL WILL COME FROM THE RESULTS OF OUR PROPOSED SMOG EXPERIMENTS WHICH WILL ISOLATE THE INFLUENCE OF NITRIC AND NITROUS ACID, ALDEHYDE, PAN, CARBON MONOXIDE, AROMATICS AND LESS REACTIVE HYDROCARBON MATERIALS ON SMOG SYSTEMS. SINCE MOST OF THIS WORK WILL BE DONE ON STATIC SMOG CHAMBER SYSTEMS, CONTINUED EFFORT WILL BE MADE TO SIMULATE REAL ATMOSPHERIC SMOG CONDITIONS BY USING SOPHISTICATED PATTERNS OF CONTINUED INJECTION AND DILUTION IN THE CHAMBER. SIMULTANEOUSLY, STATIC ANALOG EXPERIMENTS WILL BE CONDUCTED WITH THESE VERY COMPLEX EXPERIMENTS. THIS INFORMATION WILL THEN BE USED TO RECONSTRUCT MODELING RESULTS SO THAT THE DERIVED CONTROL STRATEGY RELATIONSHIPS WILL HAVE IMPLICIT ATMOSPHERIC RELEVANCE.

NITROSAMINE FORMATION

START/ COMPL DATE : 01/76 - 12/79 : FUNDING : EST. - FY 77 / $ 15000
TASK/EPA CODE :G603A-AE-08 / R800916-05 (GRANT) PRIOR FY / 1
PROJECT OFFICER : - BUFALINI
INVESTIGATORS : H JEFFRIES UNIV. OF NORTH CAROLINA
MILE: 12/79 -FINAL REPORT
THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. DETERMINE THE KINETICS OF NITROSAMINE FORMATION AND DEGRADATION.

800938

The aim of the investigation of urban street cleaning is threefold: (a) To identify and analyze activities affecting mechanized street cleaning; to develop mathematical and simulation models with which present practice can be evaluated; (b) To collect data in order to establish an extensive data base for a specific urban district; (c) T o design and evaluate implementable policy changes that would increase the effectiveness of the operation. These objectives are realized in terms of six specific tasks: (1) Creation of a computer data bank for the experimental district (completed); (2) Development of a litter generation model (in progress); (3) Evaluation and modification of the routing of mechanical sweepers (planned); (4) Quantitative evaluation of the effect of illegally parked cars on street sweeping (completed); (5) Design of policies for the enforcement of parking regulations (in progress); (6) Analysis of the overall problem (planned).

MECHANISMS OF PESTICIDE DEGRADATION

START/ COMPL DATE : 05/73 - 05/78 : FUNDING : EST. - FY 77 / $ 51808
TASK/EPA CODE :H615F-7619 / R801060-13 (GRANT) PRIOR FY76 / $ 2399211
PROJECT OFFICER : R F MOSEMAN
INVESTIGATORS : F MATSUMURA UNIV. OF WISCONSIN
MILE: 01/77 -CHLORDIMEFORM EFFECTS ON ENZYME SYSTEMS
05/77 -METABOLISM OF TOXAPHENE IN RATS

THE MAJOR OBJECTIVE OF THIS PROJECT IS TO UNDERSTAND THE DEFENSE MECHANISMS OF ANIMALS TO PESTICIDAL CHEMICALS. THE COMPOUNDS WHICH ARE IMPORTANT FROM THE VIEWPOINT OF ENVIRONMENTAL CONTAMINATION ARE THE PRIMARY TARGET OF THIS RESEARCH PROJECT. EFFORTS WILL BE MADE TO STUDY THE BIOCHEMICAL MECHANISMS BY WHICH ORGANOPHOSPHATE, CARBAMATE AND OTHER INSECTICIDAL CHEMICALS AFFECT LIVING TISSUES. SPECIFIC PROJECTS PROPOSED ARE (1) TO STUDY THE GLUTATHIONE DEPENDENT DEALKYLATING AND DEARYLATING SYSTEMS IN VARIOUS ANIMALS FROM A COMPARATIVE BIOCHEMICAL STANDPOINT, (2) TO STUDY THE ROLE OF MIXED-FUNCTION OXIDASE SYSTEMS, (3) TO STUDY AND CLASSIFY VARIOUS ESTERASES DEGRADING ORGANOPHOSPHATE AND CARBAMATE ESTERS, AND (4) TO STUDY VARIOUS CONJUGATION ENZYMES IN ANIMALS. THE OVERALL AIM IS TO STUDY VARIOUS TARGET SYSTEMS AND DEFENSE MECHANISMS OF ANIMALS, BY BIOCHEMICALLY CHARACTERIZING EACH FACTOR THROUGH ISOLATION PURIFICATION, DIFFERENTIAL INHIBITION AND COMPARISON OF SUBSTRATE SPECTRA.

STRUCTURE AND REACTIVITY OF ADSORBED OXIDES OF SULFUR

START/ COMPL DATE : 12/73 - 12/78 : FUNDING : EST. - FY 77 / $ 10000
TASK/EPA CODE :G625B-EA-21 / R801136-06 (GRANT) PRIOR FY76 / $ 100001
PROJECT OFFICER : J. DURHAM
INVESTIGATORS : J H LUNSFORD TEXAS A & M UNIVERSITY SYSTEM
MILE: 12/78 -FINAL REPORT

OBJECTIVES: THE OVERALL OBJECTIVE OF THIS RESEARCH IS TO DETERMINE THE STRUCTURE AND REACTIVITY OF ABSORBED OXIDES OF SULFUR. RESULTS FROM SUCH A STUDY WILL BE USEFUL IN IDENTIFYING THE PHOTOCHEMICAL AND THERMAL REACTIONS WHICH TAKE PLACE ON ATMOSPHERIC AEROSOLS. THE SPECIFIC GOALS DURING THE CURRENT YEAR WERE (A) TO DEVELOP PHOTOELECTRON INFRARED SPECTROSCOPY AS A TECHNIQUE FOR STUDYING OXIDES OF SULFUR ON AEROSOLS, (B) TO DETERMINE THE MECHANISMS FOR THE OXIDATION OF SO2 TO SO4 ON SURFACES, (C) TO IDENTIFY IONS SUCH AS S2O IONS AND H2S ION WHICH MAY BE PRODUCED DURING THE PHOTOCHEMICAL REACTION OF H2S WITH SO2 ON MAGNESIUM OXIDE. E MPHASIS IN FUTURE WORK WILL BE PLACED ON THE CATALYTIC OXIDATION OF SO2 IN FILMS OF ABSORBED WATER.

DEVELOP SULFURIC ACID GENERATOR FOR ULTRA FINE PARTICLES

START/ COMPL DATE : 06/76 - 12/77 : FUNDING : EST. - FY 77 / $ 15000
TASK/EPA CODE :G6018-CA-35 / R801301-0592(GRANT) PRIOR FY / 1
PROJECT OFFICER : T G DZUBAY
INVESTIGATORS : B Y LIU UNIV. OF MINNESOTA
MILE: 02/78 -DELIVERY OF GENERATOR

OBJECTIVE: DEVELOP GENERATOR FOR SULFURIC ACID PARTICLES IN THE 0.02 TO 0.5 MICRON SIZE RANGE. THE AEROSOL GENERATOR IS TO BE DESIGNED FOR USE IN ANIMAL TEST CHAMBER STUDIES TO SIMULATE EXPOSURES TO SULFURIC ACID FROM CATALYST EQUIPPED VEHICLES. APPROACH: INTRODUCE SULFURIC ACID INTO AN AIR FLOW STREAM USING A SYRINGE PUMP. THE AIR STREAM IS HEATED AND THEN COOLED TO CAUSE EVAPORATION OF THE ORIGINAL DROPLETS AND CONDENSATION INTO SMALLER ONES. PARTICLE SIZE IS CONTROLLED BY ADJUSTING THE AMOUNT OF DIL UTION AND THE RESIDENCE TIME. CURRENT PLANS/PROGRESS: THE SULFURIC ACID IS BEING INSTALLED IN AN 0.33 M3 ANIMAL EXPOSURE CHAMBER, WHERE ITS PERFORMANCE WILL BE EVALUATED. PARTICULAR CARE WILL BE TAKEN TO LIMIT THE CONCENTRATION AND RESIDENCE TIME FOR PARTICLES IN THE 0.02 - 0.05 MICRON RANGE TO PREVENT CHANGE OF PARTICLE SIZE BY COAGULATION.

CAPE COD WASTEWATER RENOVATION AND RETRIEVAL SYSTEM

START/ COMPL DATE : 06/73 - 04/78 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :L611C-45 / S802037 (GRANT) PRIOR FY76 / $ 3884861
INVESTIGATORS : B H KETCHUM WOODS HOLE OCEANOGRAPHIC INST
R F VACCARO WOODS HOLE OCEANOGRAPHIC INST
P E KALLIO WOODS HOLE OCEANOGRAPHIC INST
A MANN WOODS HOLE OCEANOGRAPHIC INST

MILE: 06/74 -COMPLETE CONSTRUCTION OF EXPERIMENTAL IRRIGATION PLOTS AND INST
07/75 -INTERIM REPORT ON 1ST YEAR OF OPERATION
07/76 -INTERIM REPORT ON 2ND YEAR OF OPERATION
07/77 -INTERIM REPORT ON 3RD YEAR OF OPERATION
05/78 -FINAL PROJECT REPORT

THE CAPE COD WASTEWATER RENOVATION AND RETRIEVAL SYSTEM IS EVALUATING ALTERNATIVE MEANS OF WASTEWATER TREATMENT AND DEVELOPING DESIGN CRITERIA FOR THE RECHARGE OF WATER OF POTABLE QUALITY TO THE GROUNDWATER RESERVOIR OF THE COASTAL OUTWASH PLAINS OF CAPE COD. THIS FOUR-YEAR STUDY INVOLVES INVESTIGATION OF THE IN SITU PERFORMANCE OF (1) THE SAND FILTER BEDS AT OTIS AIR FORCE BASE (2) SELECTED VARIETIES OF ANIMAL FORAGE GRASSES, AND (3) VARIOUS RATES OF APPLICATION OF SECONDARY EFFLUENT. THE QUANTITY AND QUALITY OF THE TREATED WATER AND ITS INFLUENCE ON THE QUALITY OF THE RECEIVING GROUND WATER, AND THE CHARACTER OF THE SOIL IS BEING CAREFULLY EXAMINED TO PROJECT EVENTUAL WATER CONDITIONS AFTER MANY YEARS OF OPERATION.

REACTIONS OF SO2 AND TERPENES WITH URBAN AEROSOLS

START/ COMPL DATE : 04/73 - 11/79 : FUNDING : EST. - FY 77 / $ 60000
TASK/EPA CODE :G603A-AE-10 / R802160-0482(GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : - WILSON
INVESTIGATORS : S K FRIEDLANDER CALIF. INST. OF TECHNOLOGY
MILE: 11/79 -FINAL REPORT

MEASURE THE CONVERSION RATE OF SO2, TERPENES, AND AROMATIC COMPOUNDS WITH LOS ANGELES AEROSOLS. THE GROWTH RATE OF THE AEROSOL AND THE INFLUENCE OF SIZE ON THE CONVERSION WILL BE DETERMINED FOR SAMPLES CONTAINED IN TRANSPARENT BAGS.

A GUIDE FOR COMPREHENSIVE PLANNING FOR CONTROL OF URBAN STORM AND COMBINED SEWER RUNOFF

START/ COMPL DATE : 06/73 - 12/78 : FUNDING : EST. - FY 77 / $ 59710
TASK/EPA CODE :C611A-7095 / R802411 (GRANT) PRIOR FY76 / $ 2241841
PROJECT OFFICER : A N TAFURI
INVESTIGATORS : W HUBER STATE UNIVERSITY OF FLA. SYS.
J HEANEY STATE UNIVERSITY OF FLA. SYS.

MILE: 06/73 -START SWMM REFINEMENT
03/75 -SWMM VERSION II COMPLETE
10/76 -DESKTOP PLANNING METHODOLOGY
04/77 -BMP EVALUATION
12/77 -MULTIPURPOSE ANALYSIS AND STORAGE OPTIMIZATION
02/78 -SWMM VERSION III
12/78 -COMPLETION

THIS PROJECT IS AN ONGOING STUDY TO PROVIDE EXTENSIVE REVISIONS/RE FINEMENTS TO THE STORM WATER MANAGEMENT MODEL (SWMM) USER'S MANUAL AS WELL AS THE MODEL ITSELF. THE OBJECTIVES OF THE CONTINUOUS WORK ARE: (1) TO DEVELOP A MULTI-PURPOSE ANALYSIS METHODOLOGY FOR WET-WEATHER POLLUTION CON TROL, AND (2) TO EVALUATE THE COST-EFFECTIVENESS OF THIS ANALYSIS BASED ON RECEIVING WATER IMPACTS. THE METHODOLOGY WILL BE FORMULATED FROM AN ALREADY ACCEPTED TECHNIQUE USED IN THE ELECTRIC UTILITY INDUSTRY FOR SAT ISFYING CONSUMER DEMAND IN THE MOST OPTIMUM MANNER. THIS TECHNIQUE WILL BE ADAPTED TO FINDING THE OPTIMAL MIX OF BEST MANAGEMENT PRACTICES, ST ORAGE-TREATMENT DEVICES, AND TREATMENT PLANTS TO SATISFY A GIVEN RECEIVING WATER CRITERIA (DO).

EXPERIMENTAL STUDY OF AEROSOL FORMATION MECHANISMS IN A CONTROLLED ATMOSPHERE

START/ COMPL DATE : 06/73 - 03/77 : FUNDING : EST. - FY 77 / $ 77000
TASK/EPA CODE :G603A-AC-14 / R802472-03 (GRANT) PRIOR FY76 / $ 620001
PROJECT OFFICER : J DURHAM
INVESTIGATORS : D L FOX UNIV. OF NORTH CAROLINA
P C REIST UNIV. OF NORTH CAROLINA

MILE: 06/78 -LABORATORY DATA FOR TEST OF INTEGRATED CHEMICAL AND PHYSICAL MO

OBJECTIVES OF THIS PROJECT DURING THE THIRD BUDGET PERIOD, THIS PROGRAM HAS DESIGNED AND BUILT AN OUTDOOR CHAMBER FACILITY FOR THE INVESTIGATION OF AEROSOL FORMATION PROCESSES SIMILAR TO THOSE OCCURRING IN THE AMB IENT ATMOSPHERE. DURING THE SECOND BUDGET PERIOD, EXPERIMENTAL METHODS AND PROCEDURES WERE DEVELOPED OR ADAPTED FOR THIS PROJECT AND AN EXPERIMENTAL PROGRAM IS NOW IN PROGRESS. THE OVERALL OBJECTIVES OF THIS BUDGET PERIOD WILL BE TO INVESTIGATE GAS TO PARTICLE CONVERSION PROCE SSES. THIS WILL BE ACCOMPLISHED BY CONDUCTING CHAMBER EXPERIMENTS IN THREE AREAS: SULFATE AEROSOL FORMATION IN HYDROCARBON-NOX SYSTEMS, SO2-NOX PLUME SYSTEMS AND SYSTEMS CONTAINING METALLIC SEED NUCLEI. DURING THIS COMING PERIOD ADDITIONAL EXPERIMENTS WILL BE CONDUCTED ON THIS SYSTEM. AEROSOL PARAMETERS TO BE OBTAINED INCLUDE CONDENSATION NUCLEI COUNT, SIZE DISTRIBUTIONS BY ELECTRIC AEROSOL ANALYZER AND FILTER SAMPLES FOR SULFATE ANALYSIS BY X-RAY FLUORESCENCE AND FLASH VAPORIZATION FLAME PHOTOMETRIC D ETECTION. THE HYDROCARBON-NOX-SO2 SYSTEM IS AN ANALOG OF AEROSOL FORMATION IN URBAN AREAS WITH MULTIPLE SOURCES OF POLLUTION, STATIONARY AND MOBILE. THE SECOND AREA OF RESEARCH INVOLVES THE SO2-NOX SYSTEM AS AN ANALOG OF THE PROCESSES OCCURRING IN A POWER PLANT PLUME. A SERIES OF EXPERIMENTS WITH VARIOUS INITIAL CONCENTRATIONS OF SO2, NO, NO2 AND WATER VAPOR WILL BE CONDUCTED. THE THIRD MAJOR AREA OF RESEARCH WILL BE GENERATION OF AEROSOLS IN THE PRESENCE OF SEED NUCLEI. EXISTING AEROSOLS PROVIDE AN ALT ERNATE OXIDATION PROCESS FOR CONVERSION OF SO2 TO SULFATE. METALLIC NUCLEI WILL BE INTRODUCED INTO THE CHAMBER AND THE SIZE DISTRIBUTION WILL BE DETERMINED, THEN SO2 WILL BE INTRODUCED AND EVOLUTION OF THE AEROSOL WILL BE MEASURED.

ACOUSTICAL SYSTEM TO PREVENT HAZARDOUS MATERIAL DIKE FAILURES

START/ COMPL DATE : 06/73 - 09/78 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :B610A-191 / R802511-01 (GRANT) PRIOR FY76 / $ 1750001
PROJECT OFFICER : J E BRUGGER

01/77 -ADD FUNDS/TIME EXTENSION
06/77 -ADD FUNDS/TIME EXTENSION
09/78 -FINAL REPORT RECEIVED

DEVICES TO PROVIDE EARLY WARNING OF POTENTIAL SPILLS OF IMPOUNDED H AZARDOUS MATERIALS WILL BE DEVELOPED AND DEMONSTRATED. THE TECHNIQUE TO BE USED IS BASED UPON THE DETECTION OF STRESS WAVES (ACOUSTICAL EM ISSIONS) THAT ARE GENERATED BY INTER-PARTICLE (SHEARING) MOVEMENT WITH THE EARTHEN (SOIL) DIKE MATERIAL AS THE MATERIAL REACTS TO ACCOMMODATE TO THE STRESS APPLIED BY THE PRESSURE OF THE STORED HAZARDOUS MATERIALS. THE ACOU STICAL EMISSIONS ARE MOST INTENSE DURING CHANGE IN STRESS LOADING BUT ALSO CONTINUE DURING THE RATHER LONG PERIODS OF RELAXATION (ACCOMMODATION AND PARTICLE REARRANGEMENT) THAT OCCUR SUBSEQUENTLY TO CHANGES IN STRESS (LOADING). THE BEHAVIOR HAS BEEN CORRELATED WITH STRESS LEVEL FOR MANY TYPES OF SOILS USED TO CONSTRUCT EARTHEN DAMS. METAL ACOUSTICAL "WAVE GUIDES" ARE INSERTED INTO THE DIKES AND THE TRANSMITTED SOUND (RANGE 500 HZ (CYCLES/SEC) TO 2 KHZ) ARE CONVERTED TO ELECTRICAL ANALOGUES BY A PIEZOELECTRIC TRANSDUCER AND RECORDED AND ANALYZED. INTERPA RTICLE FRICTIONAL ACOUSTICAL EMISSIONS IN SANDY SOILS, AS WELL AS COHESIVE BOND BREAKING IN CLAY SOILS, ARE DETECTABLE. THE PROJECT IS DIVIDED INTO TWO CONSECUTIVE PHASES, THE FIRST OF WHICH INCLUDES LABORATORY STUDIES ON SOIL SAMPLES AND PRELIMINARY FIELD TESTING ON ACTUAL EARTHEN D IKES. THE SECOND PHASE CONTINUES THE LABORATORY WORK AND EXPANDS THE FIELD TESTING TO A NUMBER OF DIKES OVER A LONG TIME PERIOD. THE PRODUCT OF THIS PROJECT WILL BE A REPORT AND A PORTABLE, EASY-TO-USE, EARLY WARNING DEVICE TO IDENTIFY PRONE-TO-FAILURE DIKES, OR SECTIONS THEREOF, AND TH EREBY TO WARN OF POTENTIAL HAZARDOUS MATERIAL SPILL SITUATIONS. THE SYSTEM IS NOW OPERATIONAL AND HAS BEEN USED AT TWENTY-FIVE SITES; THREE OF THESE WERE FOUND TO BE UNSTABLE AND PROMPT PREVENTIVE ACTION WAS TAKEN SO THAT SPILLAGES/DIKE FAILURES DID NOT OCCUR. SEVERAL CORPORATIONS IN THE CHEMICAL PROCESSING AND METAL/NON-METAL MINING INDUSTRIES ARE INVESTIGATING/INSTALLING THE SYSTEM.

QUANTITATIVE METHODS FOR VIRUS IN WATER

START/ COMPL DATE : 07/73 - 05/78 : FUNDING : EST. - FY 77 / $ 90000

S FARRAH BAYLOR COLLEGE OF MEDICINE
S M GOYAL BAYLOR COLLEGE OF MEDICINE

MILE: 05/78 -FINAL REPORT

QUANTITATIVE STUDIES WILL BE CONDUCTED TO FURTHER DEVELOP AND IMPROVE METHODS FOR THE EFFICIENT DETECTION OF SMALL QUANTITIES OF ENTERIC VIRUSES (I.E., ENTEROVIRUSES, ADENOVIRUSES, REOVIRUSES AND ROTAVIRUSES) IN LARGE VOLUMES OF RAW AND TREATED POTABLE WATER. THE ENHANCED RESISTANCE OF SOLID-ASSOCIATED VIRUSES TO VARIOUS ENVIRONMENTAL FACTORS AND TO DISINFECTION EMPHASIZE THE NEED TO DEVELOP SYSTEMS FOR THEIR DETECTION IN WATER. THEREFORE, EXISTING VIRUS CONCENTRATION METHODS WILL BE STUDIED AND, IF NECESSARY, MODIFIED FOR THE DETECTION OF SOLID-ASSOCIATED VIRUSES. CURRENT TISSUE CULTURE TECHNIQUES REQUIRE SEVERAL DAYS OR LONGER FOR THE DEMONSTRATION OF VIRUS IN CONCENTRATES FROM WATER. NEW TECHNOLOGY, SUCH AS RADIO-IMMUNOASSAY, ALLOWS THE RAPID IDENTIFICATION OF VIRUSES, IF PRESENT IN SUFFICIENT CONCENTRATION. WE PROPOSE TO PURSUE THE DEVELOPMENT OF THESE METHODS FOR THEIR APPLICATION TO VIRUS CONCENTRATES FROM WATER IN ORDER TO REDUCE THE TIME NECESSARY FOR THE DETECTION OF VIRUSES IN WATER.

MATHEMATICAL METHODS FOR X-RAY ANALYSIS

START/ COMPL DATE : 05/74 - 05/78 : FUNDING : EST. - FY 77 / $ 25000

INVESTIGATORS : L SMITH UNIV. OF MINNESOTA
MILE: 11/77 -FINAL REPORT - VOLUME 1

THE OBJECTIVES OF THIS PROJECT ARE TO DETERMINE THE ACUTE AND CHRONIC EFFECTS OF CYANIDE, CYANIDE COMPLEXES, AND OTHER INORGANIC AND ORGANIC MATERIALS ON FRESHWATER FISH AND INVERTEBRATES. SUBSIDIARY OBJECTIVES ARE (A) TO DETERMINE EFFECTS OF TEMPERATURE, PH, AND OXYGEN ON CYANIDE TOXICITY; (B) TO DETERMINE ADDITIVE OR SYNERGISTIC RELATIONSHIPS BE TWEEN HEAVY METALS AND CYANIDE; (C) TO DETERMINE WHICH LIFE HISTORY STAGES OF FISH AND INVERTEBRATES ARE THE MOST SENSITIVE; (D) TO DETERMINE APPL ICATION FACTORS WHICH CAN BE APPLIED TO SHORT TERM TEST RESULTS TO PREDICT SAFE LEVELS OF CYANIDE OR CYANIDE COMPLEXES; (E) TO DETERMINE CUMULATIVE EFFECTS OF CYANIDE ON SUCCESSIVE GENERATIONS OF FISH; (F) TO DETERMINE THE ACUTE TOXICITY OF VARIOUS COMPOUNDS TO DAPHNIA MAGNA AND FATHEAD MINNOWS; (G) TO DETERMINE THE EFFECTS OF THESE MATERIALS ON THE E MBRYOS AND THE LARVAE OF FATHEAD MINNOWS AND, (H) TO DETERMINE THE EFFECTS OF THESE MATERIALS ON DAPHNIA MAGNA IN A LIFE CYCLE TEST. THESE OBJECTIVES ARE CONSIDERED TO BE IMPORTANT BECAUSE CHRONIC EFFECTS OF CYANIDE AND MANY OTHER TOXICANTS HAVE NOT BEEN DESCRIBED.

IDENTIFY ORGANICS IN CHLORINATED MUNICIPAL WASTES

START/ COMPL DATE : 03/74 - 07/79 : FUNDING : EST. - FY 77 / $ 56300

THE CITY OF DENVER EXPERIENCES OVER 200 ATMOSPHERIC INVERSIONS EACH YEAR WHICH PRODUCE HAZE AND DECREASED VISIBILITY OVER SIGNIFICANT PORTIONS OF DENVER. IN 1973, THE U.S. EPA BEGAN A RESEARCH STUDY TO DETERMINE TH E CAUSE AND SOURCES OF THIS POLLUTION PROBLEM. ONE IMPORTANT ASPECT OF THE STUDY INVOLVES THE IDENTIFICATION OF AEROSOLS COLLECTED FROM THE ATMOSPHERE. IN A PREVIOUS PRELIMINARY STUDY (1972), POLARIZED LIGHT MICROSCOPY WAS USED SUCCESSFULLY TO IDENTIFY MANY OF THE AEROSOL PAR TICLES. THE GOAL OF THIS CURRENT PROPOSED STUDY IS TO TRACE THE SOURCES OF AEROSOL PARTICLES COLLECTED BY THE EPA AND OTHER AGENCIES AT A NETWORK OF SAMPLING STATIONS, BY IDENTIFYING THE TYPES OF PARTICLES AND COMPARING THEM TO REFERENCE SAMPLES. THE PARTICLES WILL BE CHARACTERIZED AND ID ENTIFIED BY POLARIZED LIGHT MICROSCOPY SUPPLEMENTED WITH SCANNING ELECTRON MICROSCOPY AND MASS SPECTROMETRY. THE DATA FROM THESE ANALYSES WILL BE CORRELATED WITH METEOROLOGICAL AND AEROSOL DATA TO DISCOVER THE IMPACT OF INDIVIDUAL SOURCES IN PRODUCING HAZE.

MORPHOLOGY OF ATMOSPHERIC AEROSOLS

START/ COMPL DATE : 07/75 - 10/77 : FUNDING : EST. - FY 77 / $ 10000
TASK/EPA CODE :G603A-AH-05 / R803078-04 (GRANT) PRIOR FY76 / $ 180001

11/78 -FINAL REPORT RECEIVED

OBJECTIVES OF THIS STUDY ARE TO DEMONSTRATE THE EFFECTIVENESS OF SEVERAL SURFACE CONFIGURATIONS IN: CONTROLLING EROSION, RUNOFF, SEDIMENTATION AND POLLUTION OF ADJACENT DRAINAGES; QUICKLY PRODUCING A DESIRABLE STABILIZING VEGETATIVE COVER; CREATING AN EQUILIBRIUM BETWEEN PRECIPITATION ABSORBED AND SOIL MOISTURE EVAPORATED AND TRANSPIRED SO THAT GROUND WATER POLLUTION WILL REMAIN MINIMAL; PRODUCING AN OVERALL DESIRABLE RECLAMATION DESIGN PROVIDING EFFECTIVE DRAINAGE, ESTHETICS, PRODUCTIVENESS A ND USE. DEMONSTRATION AREAS APPROXIMATELY 16 HECTARES IN SIZE WERE LOCATED ON RESHAPED SPOILS OF STRIP MINED COAL MINES NEAR COLSTRIP, MT; SAVA GE, MT; BEULAH, ND; HANNA, WY; AND GLENROCK, WY. FIVE TREATMENTS EVALUATED INCLUDE DEEP CHISELING IN TOPSOIL, DEEP CHISELING NO TOPSOIL, GOU GING IN TOPSOIL, GOUGING NO TOPSOIL AND DOZER BASINS IN TOPSOIL. FIVE 0.21 HECTARE MICROWATERSHEDS HAVE BEEN CONSTRUCTED AT EACH AREA TO AID IN INTENSIVELY EVALUATING EACH TREATMENT. TREATMENT EVALUATION AT EACH AREA I NCLUDE: METEOROLOGICAL MONITORING, SURFACE RUNOFF WATER QUALITY, SOIL MOIS TURE, EVAPOTRANSPIRATION RATE, WATER AQUIFER LEVELS. IMPLEMENTATION OF THE FIVE AREAS HAS BEEN COMPLETED AND DATA IS BEING COLLECTED AND PROCESSED. THE FIRST REPORT WILL BE PUBLISHED DURING 1977. TREATMENT EVALUATIONS ARE SCHEDULED THROUGH SEPTEMBER 12, 1978.

DEVELOPMENT OF PROCEDURES BASED ON HEPATIC TOXICITIES TO EVALUATE EFFECTS OF CHRONIC EXPOSURE OF FISHES TO ENVIRONMENTAL CONTAM

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 23118

MILE: 09/78 -EVALUATION OF ORGAN FUNCTION TESTS WITH FISH TO PREDICT CHRONIC

THE PROPOSED WORK IS TO INVESTIGATE THE FEASIBILITY OF UTILIZING FOR FISHES CLINICAL PROCEDURES WHICH ARE ACCEPTED IN DETERMINING THE STATUS OF SPECIFIC ORGAN FUNCTION IN MAN. THE RELATIVE HEPATOTOXICITY OF TWO CHOLORINATED BENZENE COMPOUNDS, HEXACHLOROBENZENE AND 1, 2, 4, TRICHLOROBENZENE WILL BE INVESTIGATED IN RAINBOW TROUT (SALMA GAIRDNERI). THE HEPATOTOXICITY OF EACH COMPOUND TO TROUT WILL BE ASSESSED THROUGH CLINICAL PROCEDURES WHICH HAVE PREVIOUSLY BEEN ESTABLISHED AS SENSITIVE INDICATORS OF LIVER FUNCTION IN THIS FISH. HISTOPATHOLOGICAL STUDIES WILL BE CONDUCTED TO CORRELATE SPECIFIC LIVER PATHOLOGY WITH THE DEGREE OF APPARENT FUNCTIONAL IMPAIRMENT. THE STUDY WILL EVALUATE LIVER FUNCTION IN THE TROUT FOLLOWING REGIMES OF BOTH SUBACUTE AND CHRONIC EXPOSURE TO THE PROPOSED TOXICANTS.

TECHNIQUES FOR THE MEASUREMENT OF AEROSOL SIZE DISTRIBUTION AND CARBON AND SULFUR CONTENT

START/ COMPL DATE : 10/76 - 10/79 : FUNDING : EST. - FY 77 / $ 50000

MILE: 11/79 -FINAL REPORT

OBJECTIVES AND APPROACH: TO PURSUE WORK IN THREE DISTINCT AREAS OF AEROSOL INSTRUMENTATION AND CHARACTERIZATION. THESE INCLUDE DEVELOPMENT OF (A) A SHAPE SENSITIVE AEROSOL PARTICLE SIZE SPECTROMETER, (B) A NUCLEAR GAMMA-RAY METHOD TO MEASURE THE CONCENTRATIONS OF LIGHT ELEMENTS SUCH AS CARBON, NITROGEN, OXYGEN AND SULFUR AND (C) A PARTICULAR SULFUR ANALYZER. CURRENT PLANS/PROGRESS: DURING THE CURRENT PERIOD THE DEVICE AND TECHNIQUES TO MEASURE PARTICLE SIZE HAVE BEEN DOCUMENTED WITH LABORATORY AEROSOLS. ADDITIONAL MEASUREMENTS ON ATMOSPHERIC AEROSOLS WILL BE MADE IN THE UPCOMING PERIOD. IN THIS PERIOD THE NUCLEAR GAMMA-RAY METHOD WAS BROUGHT INTO ROUTINE OPERATION FOR ALL ELEMENTS EXCEPT O XYGEN, AND THIS ANALYTICAL TECHNIQUE WILL BE DEVELOPED IN THE NEXT PERIOD. SOME WORK HAS ALSO BEEN DONE ON THE IN-SITU ANALYSIS OF SULFATE AEROSOLS USING THERMAL ANALYSIS TECHNIQUES. A MALLOY FPD SULFUR ANALYZER WAS OBTA INED AND LABORATORY TESTED AND CALIBRATED AND WILL BE FIELD TESTED UNDER A VARIETY OF CONDITIONS IN THE NEXT YEAR.

EVALUATION AND TECHNOLOGY TRANSFER OF THE SWIRL CONCENTRATOR PRINCIPLE

START/ COMPL DATE : 01/75 - 10/78 : FUNDING : EST. - FY 77 / $ 28200

THE OVERALL OBJECTIVE OF THIS DEMONSTRATION PROJECT IS TO PROVIDE VEHICLES FOR THE RAPID DISSEMINATION OF INFORMATION CONCERNING THE SWIRL CONCENTRATOR AND THE HELICAL BEND REGULATOR. TECHNOLOGY TRANSFER IN THE FIELD OF PUBLIC WORKS IS BEST ACCOMPLISHED BY EVALUATION OF PRO TOTYPE CONTROL FACILITIES. THE FOUR PARTS OF THIS PROPOSAL ARE DESIGNED TO PROVIDE THE BASIS FOR TRANSFER OF THE TECHNOLOGY TO THE PROFESSION. THE F OUR PARTS ARE: A. EVALUATION OF A SWIRL CONCENTRATOR GRIT CHAMBER; B. EVAL UATION OF A SWIRL CONCENTRATOR PRIMARY TECHNICAL DEVICE; C. PREPARATION OF A TEXTBOOK ON DESIGN OF FACILITIES UTILIZING SECONDARY MOTIONS; D. OPTIMIZE, THROUGH LABORATORY CONFIRMATION, THE SWIRL DESIGN CURVES TO COVER SMALLER TREATMENT INFLOW CAPACITIES THAN NOW EXIST.

CHLORINATED HYDROCARBON PESTICIDE REMOVAL FROM WASTEWATER

START/ COMPL DATE : 05/74 - 03/78 : FUNDING : EST. - FY 77 / $ 94085
TASK/EPA CODE :F610B-02 / S803159 (GRANT) PRIOR FY74 / $ 2218001

12/76 -START-UP OF RESIN SYSTEM
03/77 -SUCCESSFUL REGENERATION OF RESIN BED #1, START-UP ON BED #2
05/77 -ACHIEVEMENT OF LESS THAN 10 PPB IN EFFLUENT ON A ROUTINE BASIS
03/78 -COMPLETION OF PROGRAM AND FINAL REPORT

OBJECTIVES: TO DEMONSTRATE, AT THE PILOT PLANT LEVEL, TWO DIFFERENT CONTROL TECHNOLOGIES, (CATALYTIC REDUCTIVE DEGRADATION AND RESIN SORPTION) FOR THE CONTROL OF ENDRIN, HEPTACHLOR AND OTHER TOXIC CHLORINATED HYDROCARBON INTERMEDIATES IN PESTICIDE MANUFACTURING WASTEWATER. TARGETED EFFLUENT QUALITY IS LESS THAN 1.55 PPB OF PESTICIDES. APPROACH: PILOT SCALE TESTING OF 100 GALLON PER MINUTE CONTROL DEVICES FOR BOTH TECHNOLOGIES TO OPTIMIZE PERFORMANCE AND DETERMINE RELIABILITY AND EFFICIENCIES OF THE CONTROL SYSTEMS. CURRENT PLANS AND PROGRESS: THE XAD RESIN SYSTEM HAS BEEN OPERATED FOR EIGHT MONTHS AND OPTIMIZED TO YIELD EFFLUENTS WHICH ROUTINELY CONTAIN NO MORE THAN 5 PPB. THE RESIN BED HAS BEEN SUCCESSFULLY REGENERATED USING ISOPROPYL ALCOHOL AS THE SOLVENT SEVERAL TIMES. IT IS PLANNED TO OPERATE THE CATALYTIC REDUCTION SYSTEM IN TANDEM WITH THE RESIN SYSTEM TO ESTABLISH IF THE ENDRIN STANDARD OF 1.5 PPB CAN BE ACHIEVED.

DEMONSTRATION OF CONNECTOR WELLS

START/ COMPL DATE : 06/74 - 11/79 : FUNDING : EST. - FY 77 / $ 40000

OBJECTIVE: TO STUDY THE FEASIBILITY AND EFFECTIVENESS OF USING GRAVITY CONNECTOR WELLS TO IMPROVE STREAM QUALITY BY REDUCING DRAINAGE FROM ABAND ONED DEEP COAL MINES. APPROACH: SELECT THE BEST SITE FOR DEMONSTRATING THE EFFECTIVENESS OF GRAVITY CONNECTOR WELLS FOR REDUCING DRAINAGE FROM ABANDONED DEEP COAL MINES, DETERMINE OPTIMUM NUMER AND LOCATION OF GRAVITY DRAINAGE WELLS AND ESTIMATE THE QUANTITY OF DRAINAGE THAT WILL BE ABATED. CURRENT PLANS: CURRENT PLANS ARE FOR CONDUCTING FEASIBILITY STUDY OF AN OPTIMUM DEMONSTRATION SITE AND DEVELOP PLANS AND SPECIFICATIONS FOR A FULL SCALE FIELD DEMONSTRATION OF THE TECHNIQUE. THE SITE WILL BE STUD IED TO DETERMINE ITS HYDROGEOLOGIC AND MINING CONDITIONS AFFECTING GRAVITY DRAINAGE OF RELATED AQUIFERS THAT WILL SIGNIFICANTLY REDUCE DEEP MINE DRAINAGE. THE STUDY WILL CAPITALIZE ON AVAILABLE DATA, BUT ALSO INCLUDE LIMITED DRILLING AND TESTING TO DETERMINE AQUIFER FLOW CHARACTERISTICS. FOLLOWING EVALUATION OF THE DEMONSTRATION SITE, CONTINUOUS MONITORING OF QUALITY AND QUANTITY OF DEEP MINE DISCHARGE WILL COMMENCE. DETAILED DESIGN PLANS FOR THE GRAVITY DRAINAGE WELLS WILL BE DETERMINED BASED ON THE HYDROGEOLOGY AND AQUIFER FLOW CHARACTERISTICS OF THE SITE. THE OPTIMUM LOCATION OF THE WELLS WILL BE DETERMINED BY STUDYING FRACTURE TRACE PATT ERNS AS RELATED TO AQUIFER FLOW CHARACTERISTICS AND HYDROGEOLOGY. BASED ON THE ABOVE, A DETERMINATION WILL BE MADE OF THE NUMBER AND LOCATIONS FOR CONSTRUCTING THE REQUIRED GRAVITY DRAINAGE WELLS. AS MANY AS FOUR CONNECTOR WELLS WILL BE CONSTRUCTED TO STUDY THE MINE DRAINAGE REDUCTION POSSIBLE FROM THIS TECHNIQUE.

Supplemental funding to collect additional data through an additional operating season. Because of the critical importance of this project in the development of the overland-flow system, maximum data collection and evaluation is extremely desirable.

COMBUSTION RESEARCH ON COAL NITROGEN AND PARTICULATE ORGANIC MATTER

START/ COMPL DATE : 08/74 - 10/77 : FUNDING : EST. - FY 77 / $ 20000
TASK/EPA CODE :F624A-012 / R803242 (GRANT) PRIOR FY76 / $ 3550001

MILE: 08/75 -COMPLETE EXPERIMENTAL SYSTEMS AND INITIAL TEST
08/76 -COMPLETE STUDY OF SOOT AND PCAH FORMATION IN TURBULANT DIFFUSIO
08/76 -COMPLETE EVALUATION OF COMPOUND N BEHAVIOR FOR TWO COMMON COALS
10/77 -FINAL REPORT

TASK I, CHARACTERIZATION OF POM FROM DIFFUSION AND PREMIXED FLAMES. THE RESEARCH IS CONCERNED WITH THE QUALITATIVE AND QUANTITATIVE ASSESSMENT OF THE PRODUCTION OF PARTICULATE ORGANIC MATTER IN LABORATORY FLAMES. THE OBJECTIVES ARE TO DETERMINE WITHIN THE FLAME AND IN THE EXHAUST GASES (1) THE SIZE DISTRIBUTION AND CONCENTRATIONS OF SOOT PARTICLES, (2) THE IDENTITIES AND CONCENTRATIONS OF ORGANIC COMPOUNDS, (3) THE RELATIONSHIP BETWEEN SOOT AND ORGANIC COMPOUNDS GENERATED IN THE FLAME. EXPERIMEN TAL METHODOLOGY USED INCLUDES PARTICLE CONCENTRATION AND SIZE DISTRIBUTION BY ELECTRON MICROSCOPY, AND ANALYSIS OF POLYCYCLIC AROMATIC HY DROCARBON BY GAS CHOMATOGRAPHIC MASS SPECTROMETRY AND HIGH RESOLUTION MASS SPECTROMETRY. THE MAJOR EMPHASIS INVOLVES THE APPLICATION OF MOLECULAR BEAM SAMPLER AND ON-LINE MASS SPEC. FOR COMPLETE GAS PHASE ANALYSIS. ADDITIONAL INFORMATION IS OBTAINED BY SAMPLING ATMOSPHERIC PRESSURE TURBULENT DIFFUSION FLAMES AND LAMINAR PREMIXED FLAMES BY WATER-INJECTED SAMPLING PROBES. TASK II. KINETICS OF DEVOLATILIZATION OF NITROGEN COMPOUNDS DURING THE HIGH TEMPERATURE PYROLYSIS OF COAL. THE PROGRAM OBJECTIVES ARE TO OBTAIN A BETTER UNDERSTANDING OF THE PROCESSES CO NTRIBUTING TO THE EMISSION OF NOX FROM COAL FIRED BOILERS TO BETTER DEFINE CONTROL METHODS. FUEL BOUND NITROGEN COMPLICATES DEVELOPMENT OF LOW NOX B URNERS BECAUSE THE NITROGEN IN CHAR MAY PERSIST INTO THE SECOND STAGE OF A STAGED COMBUSTOR. DURING THE PAST TWO YEARS LABORATORY FURNACES HAVE BEEN DEVELOPED FOR THE PYROLYSIS AND OXIDATION OF PULVERIZED COAL UNDER CONDITIONS SIMULATING UTILITY BOILERS. RESULTS ON NITROGEN RETENTION IN CHAR HAVE BEEN DETERMINED FOR TWO COALS AS A FUNCTION OF TEMPERATURE AND TIME. ALSO, THE CONVERSION OF THE FUEL NITROGEN TO NOX HAS BEEN DETERMINED AS A FUNCTION OF FUEL/AIR RATIO FOR ONE FURNACE TEMPERATURE. FIVE ADDIT IONAL COALS WILL BE STUDIED OVER A WIDER RANGE OF TEMPERATURES AND DATA WI LL BE OBTAINED ON THE GAS PHASE CONSTITUENTS OF PYROLYSIS. THE COALS CHARS WILL BE CHARACTERIZED TO DEVELOP MECHANISTIC MODELS FOR EXTRAPOLATION OF DATA TO OTHER CONDITIONS.

WATER QUALITY STUDIES ON RIVER NILE AND LAKE NASSER

OUR STUDY ON THE RIVER NILE IN EGYPT ADDRESSES ITSELF TO THE IMPACTS OF T HE ASWAN HIGH DAM ON WATER QUALITY IN LAKE NASSER RESERVOIR AND DOWNSTREAM PORTIONS OF THE RIVER. THESE IMPACTS ARE BEING MEASURED IN TERMS OF PHYSICAL, CHEMICAL, AND BIOLOGICAL PARAMETERS. IN HUMAN TERMS, THESE IMPACTS ARE EXAMINED WITH SPECIAL REFERENCE TO AGRICULTURE, PUBLIC HEALTH, AND SOCIO-ECONOMIC EFFECTS. DURING 1975 AND 1976, A COUNTRY-WIDE WATER QUALITY MONITORING NETWORK ALONG THE RIVER NILE AND LAKE NASSER WAS ESTA BLISHED. THIS IS SUPPLEMENTED BY FUNCTIONAL STUDIES WHICH INTEGRATE ACROSS THE DISCRETE GEOGRAPHIC BOUNDARIES OF THE SYSTEM AND INCLUDE STUDIES OF PLANKTON, BENTHOS, HYDROPHYTES, AND FISHERIES. THE GATHERED INFORMATION IS BEING FED TO AN ENVIRONMENTAL INFORMATION STORAGE AND RETRIEVAL SYSTEM. PUBLIC HEALTH IMPACTS STUDIES HAVE BEEN SOLELY CONCERNED WITH THE EFFECTS OF CHANGES IN WATER RESOURCES IN RURAL EGYPT. AGRICULTURAL IMPA CTS STUDIES ARE BASED ON LABORATORY AND FIELD ASSESSMENT OF THE EFFECTS OF LACK OF SILT, WATERLOGGING, AND SALINIZATION ON SOIL FERTILITY AND AGRI CULTURAL PRODUCTION. SOCIO-ECONOMIC IMPACTS STUDIES ARE CONCERNED WITH THE ASSESSMENT OF ALTERNATIVE STRATEGIES IN A POLICY CONTEXT USEFUL TO THE DECISION MAKER.

DEVELOPMENT OF METHODS FOR THE DETECTION AND INACTIVATION OF VIRUSES IN VARIOUS WATERS

START/ COMPL DATE : 02/75 - 05/78 : FUNDING : EST. - FY 77 / $ 60000

PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : C E HUNTER HAMPTON INSTITUTE
MILE: 11/77 -REPORT ON SO2 OXIDATION

IT IS PROPOSED TO STUDY THE OXIDATION OF SULFUR DIOXIDE IN THE ATMOSPHERE USING THE TECHNIQUES OF MATRIX-ISOLATION AND MOLECULAR FRAGMENTATION. REACTIONS OF OLEFINS AND OZONE AND THE SUBSEQUENT OXIDATION OF SO2 WILL BE MONITORED WITH A MODEL 12-A FOURIER TRANSFORM INTERFEROMETER. SPECTRA OF MIXTURE OF ETHYLENE AND OZONE SUGGEST THE FORMATION OF AT LEAST TWO REACTION INTERMEDIATES. ARGON DILUTED SAMPLES OF SULFUR DIOXIDE AND I SOTOPIC OZONE REVEALED APPRECIABLE 18OXYGEN EXCHANGE ONLY AFTER THE SAMPLE WAS ALLOWED TO STAND FOR TWO DAYS. DETECTION OF THE REACTIVE SPECIES PRO VIDES THE KINETIC AND STRUCTURAL DATA NECESSARY TO ELUCIDATE THE OXIDATIVE MECHANISM OF SO2 AND OTHER POLLUTANTS SUCH AS NITROGEN OXIDES AND VINYL CHLORIDES.

803524

The primary objective of this project is to evaluate the effectiveness and economic impacts of alternatives for controlling the loss of sediment, nutrients, and other pollutants from irrigated areas. Field work will be conducted in two irrigated areas in southern Idaho to (1) quantify the effect of tillage, irrigation and management practices on the quantity and quality of return flow from irrigated areas and (2) evaluate the effectiveness of settling ponds, vegetated strips, and other devices in removing sediment and other materials from the surface runoff from irrigated fields. Selected fields and pollutant removal systems will be instrumented so that all inflows and outflows can be continuously monitored. Flow samples will be collected at regular intervals and analyzed for sediment, nitrogen, phosphorous, and other constituents. Water, sediment, and nutrient balances will be established for each field site.

Enterprise and farm budgets will be developed to determine the costs and returns for the alternatives considered relative to their effectiveness in controlling surface runoff and pollutant losses. The aggregate effects of reducing the loss of sediment and other pollutants from irrigated areas will also be determined.

COMBINED MEMBRANE AND FREEZING CONCENTRATION BLEACHING WATERS

THE OBJECTIVE OF THIS RESEARCH PROJECT WAS TO DETERMINE THE PRESENCE OF TOXIC RESIN ACIDS, UNSATURATED FATTY ACIDS AND CHLORINATED COMPO UNDS IN PULPING AND BLEACHING WASTES AND TO DETERMINE THEIR DESTRUCTION OR CONTROL BY SECONDARY TREATMENT OR TERTIARY PROCESSES. A TOTAL OF 15 PULP AND PAPER MILLS IN THE U.S. PARTICIPATED IN SUPPLYING SAMPLES FOR ANALYSES BY GC-MS THROUGH THE INSTITUTE. SAMPLES FROM SECONDARY TREATMENT, MEMBRANE PROCESSES AND ALUM TREATMENT ARE TO BE ANALYZED FOR TO XICS CONTROL OR REDUCTION. A FINAL REPORT OF FINDINGS WILL BE PUBLISHED IN THE EPA TECHNOLOGY SERIES FOR DISTRIBUTION TO INDUSTRY, FEDERAL AND STATE AGENCIES AND OTHERS.

DESIGN OF STACK SAMPLING SYSTEM WITH DILUTION

START/ COMPL DATE : 03/75 - 03/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :G712B-BD-16 / R803560-03 (GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : K KNAPP
INVESTIGATORS : R J HEINSOHN PENN. STATE UNIVERSITY
J W DAVIS PENN. STATE UNIVERSITY
MILE: 06/77 -FINAL REPORT

THE SPECIFIC OBJECTIVE OF THE PROPOSAL IS TO DESIGN, DEVELOP AND TEST A STACK SAMPLING SYSTEM IN WHICH THE SAMPLE IS DILUTED WITH AIR IN ORDER TO SIMULATE SOURCE EMISSIONS AT AMBIENT CONDITIONS. THE PERFORMANCE OF THE SYSTEM WILL BE COMPARED DIRECTLY TO THE PERFORMANCE OF A TYPICAL CONVENTIONAL SYSTEM. DIRECT COMPARISON TESTS WILL BE CONDUCTED TO DETERMINE THE EFFECT OF DILUTION ON: (A) MASS OF THE PARTICULATE MATTER; (B) SIZE DISTRIBUTION OF THE PARTICULATE MATTER; (C) CHEMICAL COMPOSITION OF THE PARTICULATE MATTER.

GENETIC AND CELLULAR EFFECTS OF MICROWAVE RADIATION

START/ COMPL DATE : 06/75 - 06/78 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :H628A-7413 / R803561-02 (GRANT) PRIOR FY76 / $ 200001

MILE: 05/76 -ANNUAL REPORT
05/77 -ANNUAL REPORT
05/78 -ANNUAL REPORT

OBJECTIVE: TO DETERMINE WHETHER MICROWAVE RADIATION CAN AFFECT NORMAL CELLULAR PROCESSES ASSOCIATED WITH THE UTILIZATION OF GENETIC INFORMATION. APPROACH: A BATTERY OF CELLULAR SYSTEMS HAVING A VARIETY OF GENETIC S TRUCTURES AND FUNCTIONS, WILL BE USED TO DISTINGUISH BETWEEN PERTURBATIONS CAUSED SOLELY BY TEMPERATURE RISE AND THOSE CAUSED BY OTHER MECHANISMS.PROGRESS: SEVERAL GENETIC SYSTEMS HAVE BEEN ESTABLISHED, S TANDARDIZED, AND CHARACTERIZED OVER A RANGE OF ENVIRONMENTAL TEMPERATURES. THESE INCLUDE STRAINS OF SACCHAROMYCES CEREVISIAE, SALMONELLA TYPHIMURIUM, AND ESCHERICHIA COLI. THESE CELL TYPES HAVE BEEN EXPOSED TO PULSED RADIATION BETWEEN 8.6 AND 9.6 GHZ, AND THE DATA IS CURRENTLY BEING ANALYZED.

POTENTIAL IMPACTS TO GROUND-WATER & SURFACE-WATER QUALITY & QUANTITY
FROM PROPOSED ENERGY DEVELOPMENT ON THE NORTHERN CHEYENNE RES

START/ COMPL DATE : 06/75 - 09/78 : FUNDING : EST. - FY 77 / $ 177000
TASK/EPA CODE :B623B-356 / R803566-03 (GRANT) PRIOR FY76 / $ 4770001

04/76 -FUNDING INCREMENT
03/77 -FUNDING INCREMENT
09/78 -FINAL REPORT RECEIVED

THE NORTHERN CHEYENNE TRIBE, VIA THE NORTHERN CHEYENNE RESEARCH PROJECT, DESIRES TO DEVELOP AN IN-DEPTH KNOWLEDGE OF THE CHEMICAL AND PHYSICAL CHARACTER OF THE RESERVATION WATER RESOURCES, AND THE INTERRELATION OF WATER TO OTHER RESOURCES, SO THAT THE TRIBE CAN MAKE FORMAL CHOICES IN PLANNING COAL DEVELOPMENT. A THREE-YEAR STUDY PLAN HAS BEGUN TO: (1) GATHER AND INTERPRET BASELINE DATA CONCERNING THE WATER RESOURCES AND THE INTERRELATIONSHIPS OF THESE DATA TO LAND, BIOCOMMUNITY, SUPPLY NEEDS, AND ENERGY RESOURCES OF THE RESERVATION; (2) ASCERTAIN POTENTIAL ADVERSE CHEMICAL, PHYSICAL, AND ECONOMIC IMPACTS TO RESERVATION WATER RESOURCES FROM COAL DEVELOPMENT; AND (3) DEVELOP A COMPREHENSIVE WATER RESOURCES MANAGEMENT PLAN THAT WILL AID PRESENT AND FUTURE PLANNING FOR RESOURCES EXPLOITATION. STANDARD FIELD AND LABORATORY METHODOLOGY ARE BEING EMPLOYED IN ASSESSING THE GEOLOGY, SURFACE WATER, AND GROUND WATER OF R ESERVATION LANDS. BASELINE DISCHARGE AND WATER QUALITY DATA COLLECTION HAS BEGUN FOR SIX RESERVATION STREAMS. WELL INVENTORIES, A BASIC GROUND WATER MONITORING PROGRAM, AND COLLECTION OF GROUND WATER QUALITY DATA HAS BEGUN. STRATIGRAPHIC CORRELATION OF THE REGIONAL AND LOCAL GEOLOGY IS COMPLETED AND POTENTIAL DEVELOPMENT PRIORITY AREAS HAVE BEEN SELECTED. DURING THE THIRD BUDGET PERIOD A DESCRIPTION OF POTENTIAL IMPAC TS TO THE SURFACE AND GROUND WATER RESOURCES FROM MINING AND A RESERVATION WATER RESOURCES MANAGEMENT PLAN WILL BE PREPARED.

803592

The objective of the project is to build a true monitor instrument capable of recording the mass distribution of aerosols in the laboratory and in the field. Time constants will range from minutes or less for source emissions to several hours for unpolluted air (background aerosol). A subordinate objective is to facilitate size-selective sampling of particulate matter of very low airborne concentration for subsequent physical and chemical analysis. The design makes use of the concept of the Stöber spiral duct centrifuge for aerosols and incorporates a number of quartz oscillators as size-selective mass sensors along the duct. Current plans anticipate a prototype instrument for continuous sampling and telemetric mass distribution data acquisition in the size range between 0,3 and 5 µm diameter. Preceding studies have shown that the size range can be extended (0,08 to 10 µm) and that the concept of the quartz oscillator as a sensitive piezo-electric microbalance has considerably less restrictions when applied in a spinning spiral duct centrifuge than under normal gravity conditions without size selection.

CONFERENCE ON INTERNATIONAL AIR QUALITY MEASUREMENTS

START/ COMPL DATE : 02/74 - 02/78 : FUNDING : EST. - FY 77 / $ 5000
TASK/EPA CODE :E621A-20 / R803593-03 (GRANT) PRIOR FY76 / $ 100001

04/77 -REPORT ON SLUDGE THICKENING
06/77 -INTERMEDIATE FUNDING
01/79 -REPORT ON ANAEROBIC DIGESTION
01/79 -REPORT ON VACUUM FILTRATION

THE PROJECT OBJECTIVES ARE TO DEVELOP AND DEMONSTRATE AUTOMATED CONTROL SCHEMES FOR SLUDGE HANDLING PROCESSES USED AT WASTEWATER TREATMENT PLANTS AND COMPARE THEIR PERFORMANCE AND COST EFFECTIVENESS WITH CONVENTIONAL C ONTROL METHODS. SPECIFIC OBJECTIVES FOR THE YEAR 6/22/77 TO 6/21/78 ARE AS FOLLOWS: (1) COMPLETE EVALUATION OF THICKENER UNDERFLOW PUMPING CO NTROL SCHEME AND PREPARE PROJECT REPORT, (2) DEMONSTRATE AUTOMATED CONTROL OF A VACUUM FILTER. INITIALLY CONTROL LOOPS THAT DO NOT INTERACT WILL BE INSTITUTED SUCH AS VAT LEVEL CONTROL, VACUUM CONTROL AND PH CONTROL OF BOTH THE FERRIC CHLORIDE AND LIME CONDITIONED SLUDGE. LATER DURING THE YEAR SEVERAL INTEGRATED CONTROL SCHEMES WILL BE INITIATED TO CONTROL CAKE MOISTURE CONTENT AND DRY SOLIDS PRODUCTION RATE, A MINI COMPUTER SY STEM IS CURRENTLY BEING CONSTRUCTED TO MONITOR SYSTEM PERFORMANCE AND TAKE CONTROL ACTION AS REQUIRED. (3) DESIGN AND IMPLEMENT AN INTEGRATED CONTROL SYSTEM FOR THE MULTIPLE HEARTH INCINERATOR USED TO BURN THE CAKE PRODUCED IN (2) ABOVE. ALL WORK WILL BE CARRIED OUT AT TREATMENT FACILITI ES CURRENTLY OPERATING AND UNDER THE CONSTRAINT THAT NO ADVERSE EFFECTS ON EFFLUENT QUALITY ARE ALLOWABLE.

803603

This project proposes to (a) collate and evaluate available information and data on irrigation tailwater production, its quality and reuse potentials, (b) carry out field studies to develop data not now available regarding tailwater flow and salinity and suspended matter in the Sacramento and San Joaquin Valleys of California, (c) determine least cost combination of agricultural production and labor, capital, irrigation water, and tailwater management, and (d) integrate scientific, engineering, and economic appraisals to recommend the best practicable technology for irrigation tailwater management.

CLADOPHORA MEASUREMENTS USING REMOTE SENSING

START/ COMPL DATE : 01/75 - 11/77 : FUNDING : EST. - FY 77 / $ 3980
TASK/EPA CODE :N608A-019 / R803611 (GRANT) PRIOR FY76 / $ 527511
PROJECT OFFICER : M D MULLIN
INVESTIGATORS : C T WEZERNAK ENVIRONMENTAL RES. INST. MICH
MILE: 01/78 -FINAL REPORT DUE

THE OBJECTIVES OF THE PROJECT ARE TO DEVELOP AND/OR DEMONSTRATE REMOTE SENSING TECHNIQUES FOR MAPPING CLADOPHORA USING PASSIVE MULTISPECTRAL SCANNER DATA COLLECTED FROM LOW AIRCRAFT ALTITUDES, AND TO DEFINE THE CA PABILITY OF PASSIVE MULTISPECTRAL REMOTE SENSING FOR ESTIMATING CLADOPHORA BIOMASS. REMOTE SENSING AND SUPPORTING FIELD DATA WILL BE COLLECTED DURING JUNE 1975 OVER A 5 KM STUDY AREA ALONG THE SHORELINE OF LAKE O NTARIO AT A LOCATION NEAR ROCHESTER, NEW YORK. PROCESSING OF MULTISPECTRAL SCANNER DATA WILL INCLUDE BOTH ANALOG AND DIGITAL TECHNIQUES TO SHOW THE DISTRIBUTION OF CLADOPHORA AND TO RELATE SPECTRAL CHARACTERISTICS TO STANDING CROP.

NITROGEN AND PHOSPHORUS REACTIONS IN OVERLAND FLOW OF WASTEWATER

START/ COMPL DATE : 08/77 - 08/78 : FUNDING : EST, - FY 77 / $ 58899
TASK/EPA CODE :L611C-49 / R803612-02 (GRANT) PRIOR FY76 / $ 876501
PROJECT OFFICER : B E BLEDSOE
INVESTIGATORS : W H PATRICK LOUISIANA STATE UNIV, SYSTEMS
R A KHALID LOUISIANA STATE UNIV, SYSTEMS

MILE: 10/78 -FINAL PROJECT REPORT

THE OBJECTIVES OF THIS PROPOSAL ARE TO FIND OUT HOW RAPIDLY, HOW COMPL ETELY, AND BY WHAT MECHANISM NITROGEN IN WASTEWATER IS CONVERTED TO ATMOSP HERIC NITROGEN AND NITROUS OXIDE DURING OVERLAND FLOW OVER GRASSED SOIL SU RFACES, AND TO DETERMINE THE MECHANISMS BY WHICH ORTHOPHOSPHATE IS REMOVED FROM WASTEWATER DURING OVERLAND FLOW. THE APPROACH TO BE USED TO STUDY NITROGEN BEHAVIOR IS TO EMPLOY SMALL-SCALE COMPLETELY ENCLOSED SYSTEMS CONSTRUCTED FROM PLEXIGLAS THAT CONTAIN THE SOIL-PLANT-ATMOSP HERE SYSTEM AND TO ADD N-15 LABELLED AMMONIUM TO THE OVERLAND FLOW WATER A ND TRACE ITS REACTIONS USING AN ISOTOPE-RATIO MASS SPECTROMETER. PHOSPHATE SORPTION UNDER AEROBIC AND ANAEROBIC CONDITIONS WILL BE EVALUATED BY MEANS OF THE LANGMUIR EQUATION. THE KINETICS OF PHOSPHATE SORPTION WILL ALSO BE DETERMINED FOR THE TWO AERATION CONDITIONS. RESULTS TO DATE SHOW THAT LABELLED NITROGEN DOES UNDERGO SEQUENTIAL NITRIFICATI ON-DENITRIFICATION REACTIONS THAT CONVERTS AMMONIUM TO NITRATE AND THEN TO NITROGEN GAS DURING OVERLAND FLOW.

ORGANIC N-CHLORO COMPOUNDS IN CHLORINATION OF WATER SUPPLIES

START/ COMPL DATE : 02/75 - 12/77 : FUNDING : EST. - FY 77 / $ 14000
TASK/EPA CODE :C614A-7190 / R803631 (GRANT) PRIOR FY76 / $ 529151

08/76 -ELUCIDATION OF HALOFORM PRODUCTION IN THESE REACTIONS
01/77 -RATE STUDIES
05/77 -INITIAL PROGRESS IN IDENTITY AND ISOLATION OF CMPS IN WATER SUP

FORMATION OF N-CHLORO COMPOUNDS BY THE REACTION OF AQUEOUS CHLORINE WITH NITROGENOUS ORGANIC MATERIAL IN WATER SUPPLIES IS BEING INVESTIGATED. THE OBJECT IS TO ASSESS AND DETERMINE THE EFFECTS THE FORMATION OF SUCH COMPOUNDS MAY HAVE ON ANALYTICAL DETERMINATIONS OF FREE AND COMBINED CHLORINE IN TREATED WATERS AND RELATIONS OF THEIR FORMATION TO THE DISINFECTING PROCESS ITSELF. TWO APPROACHES ARE BEING USED: (1) REACTIONS OF SINGLE ORGANIC COMPOUNDS THOUGHT LIKELY TO BE PRESENT IN SURFACE WATERS, INCLUDING PYRIMIDINES, PURINES AND PYRROLIC COMPOUNDS, ARE BEING STUDIED INDIVIDUALLY; (2) SEPARATION AND IDENTIFICATION OF NITROGENOUS ORGANIC COMPOUNDS FROM TYPICAL SURFACE WATERS IS BEING ATTEMPTED. THE MOST INTERESTING FINDING TO DATE IS THAT CYTOSINE REACTS TO FORM A MONO N-CHLORO DERIVATIVE WITH REACTIVITY LIKE THAT OF DICHLORAMINE, NHCL2, AND AN N,N-DICHLOR DERIVATIVE WITH REACTIVITY LIKE THAT OF MONOCHLORAMINE, NH2CL.

803634

It is the objective of this project to develop a strategy of insect control in which a complex of closely-related species (apple pests) is controlled with a defined mixture of pheromone components. A number of species, e.g. the redbanded, obliquebanded, threelined and fruittrees leafroller moths, use the same pheromone components but in different ratios and with the addition of other components. Tests will be conducted to define the effect on pheromone trap orientation by permeating the air with each component alone and then in certain mixtures. The best disruptant will be used in pilot studies in which flight orientation and mating efficiency are monitored. If positive results are obtained, the method will be used in a pest management project now underway in New York apple orchards. Pheromone components will be emitted from hollow fibers.

FIELD STUDY OF NUTRIENT CONTROL IN A MULTI-CELL LAGOON

START/ COMPL DATE : 06/75 - 12/78 : FUNDING : EST. - FY 77 / $ 50330
TASK/EPA CODE :C6118-7055 / R803637 (GRANT) PRIOR FY75 / $ 1068221

08/76 -START OF PHOSPHORUS CONTROL, COMPLETE BASELINE DATA
08/77 -START OF AMMONIA CONVERSION TO NITRATE
08/77 -RELOCATE ALUM ADDITION FROM CELL #3 TO CELL #1

THE PRINCIPAL OBJECTIVE OF THIS PROJECT IS THE DEVELOPMENT OF RELIABLE TECHNIQUES CONSISTENT WITH THE BASIC SIMPLICITY OF LAGOON OPERATION FOR REMOVING PHOSPHORUS AND UNOXIDIZED NITROGEN FROM LAGOON EFFLUENTS. TWO IN-CELL INJECTION POINTS WILL BE EVALUATED TO DETERMINE THE POTENTIAL OF ALUM ADDITION FOR EFFICIENTLY REMOVING PHOSPHORUS FROM WASTEWATER BEING PROCESSED IN A THREE-CELL COMBINED AERATED/FACULTATIVE LAGOON. A SIDESTREAM OF EFFLUENT FROM THE LAST CELL OF THIS TEST LAGOON WILL BE DIVERTED THROUGH A PLASTIC-MEDIA TRICKLING FILTER TOWER TO EVALUATE THE POTENTIAL FOR ACHIEVING NITRIFICATION WITH THIS TYPE OF SECOND STAGE BIOLOGICAL TREATMENT. THE SECONDARY OBJECTIVE IS THE ACQUISITION OF RELIABLE LONG-TERM DATA FROM WELL DESIGNED AND WELL OPERATED THREE-CELL COMBINED AERATED/FACULTATIVE LAGOON NOT RECEIVING ALUM ADDITION WHICH WILL BE OPERATED IN PARALLEL WITH THE TEST SYSTEM AND SERVE AS A CONTROL. ASSE SSMENT OF THE EFFECT OF ALUM ADDITION, NOT ONLY ON PHOSPHORUS REMOVAL, BUT ALSO ON SUSPENDED SOLIDS AND ORGANIC REMOVALS, AND DETER MINATION OF ADDITIONAL COST AND OPERATING REQUIREMENTS NECESSITATED BY THE NUTRIENT CONTROL PROCEDURES ARE ADDITIONAL OBJECTIVES.

DETERMINE HEALTH EFFECTS DATA AND PREPARE CRITERIA DOCUMENT RECOMMENDING DRINKING WATER STANDARD FOR MOLYBDENUM

START/ COMPL DATE : 04/75 - 07/75 : FUNDING : EST. - FY 77 / $ 159000

MOLYBDENUM IS AN ELEMENT WHICH IS A MICRONUTRIENT FOR PLANTS IN THAT IT PLAYS A CRUCIAL ROLE IN SOME FLAVOENZYMES, AT SUFFICIENTLY HIGH RATES OF INTAKE MO IS TOXIC TO ORGANISMS; RUMINANTS ARE MUCH MORE SENSITIVE THAN NONRUMINANTS. THE ROCKY MOUNTAIN STATES PRODUCE ESSENTIALLY ALL THE U.S. MOLYBDENUM, MUCH OF THIS PRODUCT IS PROCESSED AND USED IN EASTERN U.S. THE OCCURRENCE OF SIGNIFICANTLY ELEVATED LEVELS OF MO IN DR INKING WATER DUE TO INDUSTRIAL SOURCES HAS BEEN DOCUMENTED AND STORET DATA INDICATES THAT THIS OCCURRENCE IS NOT CONFINED TO THE ROCKY MOUNTAIN REGION. THE OBJECTIVES OF THIS RESEARCH ARE TO CONTINUE TO DETERMINE THE H EALTH EFFECTS OF EXPOSURE TO MO IN DRINKING WATER, FOOD, AND AS RESPIRABLE DUST IN INDUSTRIAL PROCESSING PLANTS, AND TO PREPARE A CRITERIA DOC UMENT RECOMMENDING STANDARDS FOR DRINKING WATER. SPECIFICALLY, THE PROGRAM IS IN THE PROCESS OF DETERMINING THE AVERAGE INTAKE OF MO IN THE TOTAL HUMAN DIET. RANGES SET FROM PREVIOUS RESEARCH ARE BEING USED TO ESTABLISH THE MOST USEFUL SAMPLING AREAS. LABORATORY WORK ON RATS IS BEING DONE TO DETERMINE RELATIVE ABSORPTION OF MO IN FOOD AND WATER, AND THUS ASCERTAIN RELATIONSHIPS BETWEEN TISSUE LEVELS OF MO AND PHYSIOLOG ICAL EFFECTS. METHODS ARE BEING DEVELOPED TO ESTABLISH A CONSTANT THAT CAN BE USED TO TRANSPOSE EXPERIMENTAL RESULTS OF METABOLISM OF MO IN RATS TO THAT OF HUMANS. LEVELS OF RESPIRABLE DUST EXPOSURE OF WORKERS IN MO P ROCESSING MILLS ARE BEING DETERMINED BY STUDYING CONCENTRATIONS IN VARIOUS AREAS OF MO PLANTS. PREDICTIONS OF DEPOSITION AND RETENTION OF INHALATION EXPOSURE ARE PROJECTED. ANALYSES OF METABOLIC DATA ON PLATELETS AND RED BLOOD CELLS FROM CONTROLS AND INDIVIDUALS EXPOSED TO MO IN DIET AND IN INDUSTRIAL MILLS ARE BEING CONDUCTED TO DETERMINE BIOCHEMICAL CHANGES.

IDENTIFICATION AND QUANTIFICATION OF NONVOLATILE ORGANIC SUBSTANCES IN MUNICIPAL DRINKING WATER SUPPLIES

START/ COMPL DATE : 06/76 - 06/78 : FUNDING : EST. - FY 77 / $ 11916

06/77 -YEARLY REPORT, ANALYSIS OF CINCINNATI RO SAMPLE IN PROGRESS
06/78 -FINAL REPORT DUE SHOWING METHODOLOGY FOR CHARACTERIZING NONVOLA

THE MAIN OBJECTIVE OF THIS PROJECT IS TO DEVELOP METHODOLOGY TO ANALYZE WATER SAMPLES FOR THE NONVOLATILE ORGANIC COMPONENTS, NAMELY, THOSE COMPONENTS THAT ARE NOT AMENABLE TO GAS CHROMATOGRAPHY. THE LIQUID CHROMATOGRAPH SYSTEM, WITH THE UV-REFRACTOMETER DETECTOR, WILL BE USED TO ANALYZE RESIDUE SAMPLES RESULTING FROM REVERSE OSMOSIS CONCENTRATES. WATER SUPPLY SAMPLES FROM THE BATON ROUGE SYSTEMS WILL BE ANALYZED FOR THEIR NONVOLATILE ORGANIC CONTENT. IN THE INTERM OF WAITING FOR THE LIQUID CHROMATOGRAPH TO BE DELIVERED AND INSTALLED, BATON ROUGE WATER WAS ANALYZED BY GC USING A CARBON ADSORPTION TECHNIQUE. A SOLUBILITY STUDY OF A REVERSE OSMOSIS (RO) CONCENTRATE WAS INITIATED TO FIND SOLVENT SYSTEMS WHICH WOULD EFFECT TOTAL AND PARTIAL DISSOLUTION OF THE RESIDUE. SUCH SYSTEMS WOULD BE DIRECTLY APPLICABLE TO THE SOLVENT SYSTEMS OF THE LIQUID CHROMATOGRAPH. THE LC WAS DELIVERED AND INSTALLED IN JANUARY 1977. AN UPDATED RO SAMPLE OF CINCINNATI WATER WAS COLLECTED FOR ANALYSIS ON THIS SYSTEM IN MARCH 1977. RESULTS OF ANALYSES ARE IN PROGRESS.

ANALYTICAL SUPPORT (TRACE METAL ANALYSIS) FOR BIOLOGICAL SYSTEMS

START/ COMPL DATE : 07/77 - 09/77 : FUNDING : EST. - FY 77 / $ 12400

MILE: 06/78 -FINAL REPORT
THE INFLUENCE OF CONTINUOUS EXPOSURE TO 5 PPM NO2 ON NITRITE METABOLISM AND NITRIFYING POPULATIONS WILL BE EVALUATED USING SOILS WITH A WIDE RANGE OF PH VALUES. EXPERIMENTS WILL BE CONDUCTED TO ASSESS THE EFFECTS OF CONTINUOUS EXPOSURE OF SOILS TO AN ATMOSPHERE CONTAINING LOW LEVELS OF BOTH SO2 AND NO2 TO DETERMINE IF THERE IS A SYNERGISM. SEVERAL AGRICULTURAL SOILS WILL BE SUBJECTED TO A LONG-TERM EXPOSURE TO 1 PPM SO2 AND POSSIBLY LOW LEVELS OF NO2 TO DETERMINE WHETHER SOLUBILIZATION OF CATIONS TAKES PLACE. THE INFLUENCE OF SO2, NO2, AND THEIR SOLUBILITY PRODUCTS ON AMMONIUM-OXIDIZING AND NITRITE-OXIDIZING AUTOTROPHIC BACTERIA WILL BE EVALUATED. FOR THIS PURPOSE, RESPIROMETRIC TECHNIQUES WILL BE EMPLOYED. ADDITIONAL STUDIES WILL BE PERFORMED TO EVALUATE IN MORE DETAIL THE IMPACT OF BOTH SO2 AND NOX ON THE NITROGEN-FIXING ACTIVITY OF BLUE-GREEN ALGAE INDIGENOUS TO MANY SOILS. SEVERAL NITROGEN-FIXING BACTERIA WILL BE INVESTIGATED TO ESTABLISH WHETHER THESE POLLUTANTS SUPPRESS NITROGEN FIXATION BY HETEROTROPHIC POPULATIONS. FURTHERMORE, THE MECHANISM BY WHICH BISULFITE AND NITRITE INHIBIT BLUE-GREEN ALGAE WILL BE EXPLORED.

STUDY OF INTERFACE PROBLEMS IN SAMPLING AND MEASUREMENT OF PARTICULATE POLLUTANTS IN HOT STACK GASES

START/ COMPL DATE : 00/77 - 05/79 : FUNDING : EST. - FY 77 / $ 30000

PROJECT OFFICER : - KNAPP
INVESTIGATORS : D A LUNDGREN STATE UNIVERSITY OF FLA. SYS.
MILE: 10/77 -FINAL REPORT

OBJECTIVES: THE OBJECTIVE OF THIS RESEARCH IS TO STUDY THE INTERFACE PROBLEMS ASSOCIATED WITH EXTRACTIVE SAMPLING AND MEASUREMENT OF PARTICULATE POLLUTANTS IN HOT STACK GASES. APPROACH: A CAREFUL STUDY AND ANALYSIS OF KNOWN OR SUSPECTED PROBLEM AREAS WILL FIRST BE UNDERTAKEN. C ERTAIN IMPORTANT PROBLEM AREAS WILL BE SELECTED AND STUDIED EXPERIMENTALLY IN ORDER TO DEFINE AND UNDERSTAND THE CAUSES. SOLUTIONS TO OR WAYS TO MINIMIZE THESE PROBLEMS WILL THEN BE FOUND AND DESCRIBED. PRO GRESS: A STUDY OF PROBLEM AREAS HAS BEEN MADE. PARTICULATE SAMPLING ERRORS DUE TO TANGENTIAL FLOW HAVE BEEN EXPERIMENTALLY STUDIED IN THE LABO RATORY. A REPORT ENTITLED "ISOKINETIC SAMPLING OF TURBULENT AND TANGENTIAL FLOW STREAMS" HAS BEEN PREPARED AND SUBMITTED TO E.P.A. AN EXPERIMENTAL EVALUATION OF IN-STACK IMPACTORS IS NOW BEING CONDUCTED.

NEW POTATO STARCH/PROTEIN PRODUCTION PROCESS

START/ COMPL DATE : 07/75 - 03/79 : FUNDING : EST. - FY 77 / $ 21000

03/79 -FINAL REPORT RECEIVED

WORK TO DATE HAS RESULTED IN A PROCESS THAT SEPARATES CULL POTATOES INTO STARCH, PULP, AND PROTEIN MEAL. THE PROCESS DOES NOT GENERATE EFFLUENTS OF HIGH BOD. OBJECTIVES FOR THE FINAL YEAR INCLUDE GENERATION OF A PLANT DESIGN AND COST ANALYSIS AND THE FOLLOWING PROOF-OF-CONCEPT EXPERIMENTS: 1) DEMONSTRATION THAT PULP DRYING IS NOT IMPAIRED BY CODRYING OF PULP AND DEPROTEINATED JUICE, 2) DEMONSTRATION THAT REGENERATION HEATING OF JUICE TO PRODUCE PROTEIN COAGULATION DOES NOT PRODUCE EXCESSIVE HEAT E XCHANGER FOULING, 3) DETERMINATION OF THE EFFECT OF PROTEIN COAGULATION PH (IN THE RANGE OF 4-6) ON THE PROTEIN MEAL SOLANINE CONTENT, 4) CONFIRMAT ION THAT RAPID HEAT COAGULATION OF THE PROTEIN PRODUCES A MEAL WITH LYSINE AVAILABILITY AND PROTEIN DIGESTABILITY COMPARABLE TO SOY BEAN PROTEIN MEAL. THE OBJECTIVES WILL BE ACHIEVED THROUGH PILOT SCALE (ABOUT 1000 POUNDS OF POTATOES PER RUN) PROCESSING OF CULL POTATOES INTO THE VARIOUS OUT MATERIALS.

EVALUATION OF EXISTING GROUNDWATER BASIN MANAGEMENT MODELS

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 10750
TASK/EPA CODE :L609B-62 / R803713-01 (GRANT) PRIOR FY75 / $ 750561
PROJECT OFFICER : J W KEELEY
INVESTIGATORS : F FRENKIEL SCIENTIFIC COMM. ON PROB. ENV
F FRENKIEL U.S. NAVY
R E MUNN ATMOSPHERIC ENVIRON. SERVICE

MILE: 12/77 -GLOBAL GROUNDWATER MODELS EVALUATION

GROUNDWATER BASIN MANAGEMENT ESSENTIALLY MUST RELY ON FOUR ASPECTS OF MODELING WHICH COMBINE TO DESCRIBE THE SUBSURFACE SYSTEM NATURALLY AND AS IT RESPONDS TO STRESSES IMPOSED BY MANAGEMENT. THE FIRST WILL ALLOW THE PREDICTION OF CHANGES IN GROUNDWATER FLOW IN RESPONSE TO ALTERATION TO THE SYSTEM. THE THIRD ASPECT IS CONCERNED WITH THE MOVEMENT OF POLLUTANTS IN RESPONSE TO ALTERNATIONS OF THE HYDRAULIC SYSTEM. THE FOURTH ADDRESSES THE MOVEMENT OF FLUIDS AND CONTAMINANTS IN THE UNSATURATED ZONE. THE OBJECT OF THIS PROJECT IS TO EVALUATE EXISTING MODELS OF EACH OF THESE ASPECTS IN ORDER TO JUDGE THE STATE OF KNOWLEDGE AND TO POINT OUT AREAS ON A SOUND AND LOGICAL BASIS. INDIRECTLY, THE PROJECT MAY PROVIDE GUIDELINES FOR OPTIMIZING THE DESIGN OF MONITORING NETWORK.

DEVELOPMENT OF A USER'S MANUAL FOR THE ARM AND NPS MODELS

START/ COMPL DATE : 06/75 - 09/77 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :K617B-416 / R803722-02 (GRANT) PRIOR FY76 / $ 900001
PROJECT OFFICER : L A MULKEY
INVESTIGATORS : N H CRAWFORD HYDROCOMP INCORPORATED

W H WAGGY HYDROCOMP INCORPORATED
J R HUNT HYDROCOMP INCORPORATED
A S DONIGIAN HYDROCOMP INCORPORATED
D C BEYERLEIN HYDROCOMP INCORPORATED

MILE: 06/75 -START PROJECT
11/77 -PUBLICATION OF USER MANUAL

THE OBJECTIVE OF THIS EFFORT IS THE DEVELOPMENT OF A COMPREHENSIVE USER'S GUIDE FOR RELEASE WITH THE EPA AGRICULTURAL RUNOFF MANAGEMENT MODEL (ARM) AND THE EPA NON-POINT SOURCE MODEL (NPS). THE MANUAL WILL INCLUDE GUIDANCE FOR CALIBRATION, PARAMETER ESTIMATION METHODOLOGIES AND DATA, AND MODEL USE METHODOLOGY. THE MANUAL WILL BE MADE GENERALLY AVAILABLE ALONG WITH COPIES OF THE SOURCE CODE AS REQUESTED.

DEVELOP/DEMONSTRATE GUIDELINES FOR SEDIMENT AND EROSION CONTROL TECHNIQUES FOR HIGHWAY CONSTRUCTION SITES

START/ COMPL DATE : 07/75 - 06/78 : FUNDING : EST. - FY 77 / $ 80991
TASK/EPA CODE :C611A-7104 / S803724 (GRANT) PRIOR FY75 / $ 1890001
PROJECT OFFICER : H E MASTERS
INVESTIGATORS : F T CARUCCIO UNIV. OF SOUTH CAROLINA
MILE: 05/75 -START
02/77 -COMPLETE FIELD DATA COLLECTION
10/77 -COMPLETE SWIRL EVALUATION
06/78 -COMPLETION

THE MAIN OBJECTIVE IS TO DEMONSTRATE THE EVALUATE THE EFFECTIVENESS OF VARIOUS SEDIMENT CONTROL MEASURES IN A REPRESENTATIVE PRISTINE SITE LOCATED IN THE SOUTHEAST PIEDMONT AND SCHEDULED FOR FUTURE DEVELOPMENT. INCLUDED WILL BE THE EVALUATION OF A SWIRL UNIT AT A CONSTRUCTION SITE FOR SAND AND GRID REMOVAL. THE DATA DERIVED FROM THIS STUDY WILL BE PRESENTED IN GUIDELINE FORM, APPLICABLE TO OTHER AREAS IN A LARGE GEOGRAPHIC BELT IN THE SOUTHEAST HAVING SIMILAR GEOLOGIC AND CLIMATIC CONDITIONS.

EVALUATE SURFACE AND GROUNDWATER AT POTENTIAL STRIP MINE SITES

START/ COMPL DATE : 05/75 - 06/78 : FUNDING : EST. - FY 77 / $ 482000
TASK/EPA CODE :B623B-357 / R803727-03 (GRANT) PRIOR FY76 / $ 21410001
PROJECT OFFICER : T G NEWPORT

INVESTIGATORS :	T T	WILLIAMS	MONTANA STATE UNIVERSITY

MILE: 05/75 -FUNDING PACKAGE SUBMITTED
06/75 -AWARD FUNDS FOR PROJECT
07/76 -FUNDING INCREMENT
07/77 -FUNDING INCREMENT
06/78 -FINAL REPORT RECEIVED

MAJOR OBJECTIVE OF THIS PROJECT IS TO IDENTIFY POSSIBLE IMPACTS OF COAL MINING AND DEVELOPMENT IN THE NORTHERN GREAT PLAINS ON THE SURFACE AND GROUNDWATER SYSTEMS OF THE SURROUNDING AREA. SPECIFIC OBJECTIVES ARE: 1) OBTAIN AN EQUATION OF BALANCE FOR ALL WATER INFLOW AND OUTFLOW IN EACH OF THREE STUDY SITES, ONE EACH IN MONTANA, NORTH DAKOTA AND WYOMING; 2) CHARACTERIZE THE OVERBURDEN FROM A PHYSICAL AND CHEMICAL POINT OF VIEW AS WELL AS DETERMINE ITS RELATIONSHIP TO THE WATER COMING TO THE SURFACE; 3) DETERMINE HYDROLOGIC CHARACTER OF SPOILS AT ACTIVE MINE SITES IN MONTANA; 4) CHARACTERIZE THE CHEMICAL FEATURES OF THE MINED SITES. THE PROPOSED WORK IS A KEY EFFORT IN THE EPA PROGRAM TO ASSESS THE SURFACE AND GROUNDWATER PROBLEMS ASSOCIATED WITH WESTERN COAL. THREE SITES ARE BEING STUDIED COMPREHENSIVELY, EACH SITE IS JUST COMMENCING TO HAVE IMPACT, BASE LINE DATA WERE OBTAINED BEFORE IMPACTS BEGAN. IN ADDITION TO THE SITE-SPECIFIC WORK, SOME DATA ARE BEING COLLECTED AT THE TWO ACTIVE MINING SITES IN MONTANA TO PROVIDE ADDITIONAL DATA FOR THE ANALYSES.

CHEMICAL MODELING OF METALLIC WASTE DISPOSAL

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 30610
TASK/EPA CODE :P608C-02 / R803738 (GRANT) PRIOR FY76 / $ 526901
PROJECT OFFICER : E W DAVEY
INVESTIGATORS : F M MOREL MASS. INST. OF TECHNOLOGY
MILE: 05/78 -FINAL REPORT ENTITLED, "CHEMICAL MODELING OF METALLIC WASTE DIS
A METHODOLOGY HAS PREVIOUSLY BEEN DEVELOPED FOR THE STUDY OF METALLIC W
ASTES IN COMBINED DOMESTIC AND INDUSTRIAL SEWAGE. THE METHODOLOGY IS BASED
ON GENERAL CHEMICAL MODELS OF THE WASTE AND OF VARIOUS DILUTIONS OF
THE WASTE WITH SEAWATER AND HAS BEEN APPLIED TO THE SPECIFC CASE OF THE
LOS ANGELES COUNTY WASTEWATER DISCHARGE. IT IS PROPOSED TO EXTEND AND
IMPROVE THIS WORK USING A NEW CASE STUDY SUCH AS THE DUMPING OF CON
CENTRATED ACIDIC METALLIC WASTES. THE PROPOSED WORK WILL INVOLVE INCLUSION
OF NEW CHEMICAL DATA IN THE MODEL, IMPROVEMENT OF EXISTING COMPUTER PR
OGRAM FOR EFFICIENCY AND CONVENIENCE, SIMPLIFICATION AND GENERALIZATION OF
ABSORPTION SUBROUTINES AND, IF NECESSARY, IMPLEMENTATION OF SPECIFIC
KINETIC SUBROUTINES RELATED TO THE ACID WASTES DISPOSAL PROBLEM. THE
GOAL OF THE PROJECT IS TO IMPROVE OUR PREDICTIVE CAPABILITIES FOR ROUTINE
USE IN THE VARIOUS MONITORING, IMPACT ASSESSMENT AND REGULATION
ACTIVITIES ASSOCIATED WITH METALLIC WASTE DISPOSAL.

OPTIMAL SAMPLING STRATEGIES FOR WATER QUALITY IN LARGE LAKES

START/ COMPL DATE : 11/75 - 09/77 : FUNDING : EST. - FY 77 / $ 38552
TASK/EPA CODE :N608A-012 / R803754-02 (GRANT) PRIOR FY76 / $ 311461
PROJECT OFFICER : D M DOLAN
INVESTIGATORS : R P CANALE UNIV. OF MICHIGAN
W F POWERS UNIV. OF MICHIGAN

MILE: 09/76 -METHODOLOGY DEVELOPED, 1ST EXAMPLE PRESENTED
09/77 -2ND EXAMPLE COMPLETED, SAMPLE DELIVERED

THE OVERALL OBJECTIVE OF THE GRANT IS TO DEVELOP A METHODOLOGY THAT WILL SPECIFY THE OPTIMAL SAMPLING STRATEGY FOR LARGE LAKES BY MINIMIZING COSTS AND EXPERIMENTAL ERROR AND MAXIMIZING THE VALUE OF THE SAMPLING INFORMATION OBTAINED.

803735

Objectives: (1) To determine the source, transfer and transformation of potential pollutants on a rangeland watershed grazed by beef cows. (2) To determine and monitor the hydrologic and meteorologic parameters necessary to establish the water budget and movement of potential pollutants from a rangeland watershed in Central Oklahoma. (3) To determine effects of environmental conditions on the rate of degradation of grazing cattle feces on rangeland. (4) To determine effects of cattle waste concentration, chemical composition and distribution on levels of potential pollutants in rangeland soils.

Approach:

The water budget of the 70 hectare watershed will be determined by measuring precipitation, soil water storage, and runoff. Evapotranspiration will be determined by difference and from meteorological data. The source, transfer and transformation of potential pollutants will be determined by measuring selected nutrient levels in soil, plant, precipitation, feces and runoff water and sediment samples. Seasonal rates of degradation will be determined by periodically measuring the quantity and chemical composition of feces and selected soil, plant and microclimatic factors. Forage chemical composition and utilization, cattle diet and grazing behavior, and feces and urine distribution will be also determined periodically.

Current Plans:

The soil, vegetation, and topographic surveys will begin as soon as funding is granted. Soil, plant and cattle studies will begin after the surveys and inventories are completed. Meterological studies will begin after the necessary instruments are purchased and made operational on the watershed. Runoff water and sediment sampling will begin as soon as construction of the weir and installation of the sampler is completed. Laboratory analysis will be conducted with minimum time lapse after collection.

STUDY OF VEGETATION PROBLEMS ASSOCIATED WITH REFUSE LANDFILLS

START/ COMPL DATE : 05/75 - 05/77 : FUNDING : EST. - FY 77 / $ 38783
TASK/EPA CODE :C618A-7030 / R803762-02 (GRANT) PRIOR FY76 / $ 900001
PROJECT OFFICER : R E LANDRETH
INVESTIGATORS : F B FLOWER RUTGERS THE STATE UNIVERSITY
R E LANDRETH U.S. ENVIRON. PROTECTION AGCY

MILE: 01/75 -GRANT AWARDED
08/76 -INTERIM REPORT
05/78 -PROJECT COMPLETED
09/78 -FINAL REPORT

TO EVALUATE THE CAUSE AND EFFECT RELATIONSHIP OF REFUSE LANDFILL GASES ON SURROUNDING LANDFILL VEGETATION BY PERFORMING FIELD AND LABORATORY STUDIES. THE FIRST YEAR'S EFFORT INCLUDED A COMPREHENSIVE LITER ATURE SURVEY RESULTING IN FINDINGS THAT MINIMAL DATA EXIST ON THE SUBJECT. ALSO, A MAIL SURVEY CONDUCTED DURING THE FIRST YEAR INDICATED THAT MOST OF THE PROBLEMS WERE IDENTIFIED IN THE EASTERN PART OF THE UNITED STATES. A COMPREHENSIVE LABORATORY AND FIELD EVALUATION PROGRAM WITH SELECTED VE GETATION IS PLANNED FOR THE SECOND YEAR. THE RESULTS WILL BE COMBINED TO D EVELOP A DESIGN MANUAL FOR THE UTILIZATION OF APPROPRIATE VEGETATIVE COVER FOR LANDFILLS.

NEOPLASTIC AND LIFE SPAN EFFECTS OF LOW LEVEL EXPOSURE TO HTO DURING PREGNANCY IN RATS

START/ COMPL DATE : 06/76 - 06/79 : FUNDING : EST. - FY 77 / $ 0
TASK/EPA CODE :H628A-7450 / R803764 (GRANT) PRIOR FY76 / $ 300001
PROJECT OFFICER : J W LASKEY
INVESTIGATORS : W W JOHNSON ST. AUGUSTINES COLLEGE
MILE: 06/76 -INITIATE ANIMAL EXPOSURES
06/77 -ANNUAL REPORT
08/77 -COMPLETE ANIMAL EXPOSURES
06/78 -ANNUAL REPORT
06/79 -FINAL REPORT

THIS STUDY WAS DESIGNED TO EVALUATE THE EXTENT OF TUMORIGENIC AND LIFE SPAN ALTERATION DUE TO EXPOSURE TO TRITIUM DURING PREGNANCY. LABORATORY RATS ARE EXPOSED TO TRITIUM FROM CONCEPTION THROUGH GESTATION. DAMS ARE ALLOWED TO NURSE THEIR YOUNG FOR 21 DAYS AND ARE THEN PLACED ON LONG TERM OBSERVATION. THEY ARE EXAMINED MONTHLY FOR TUMORS AND OVERALL HEALTH. TO DATE, ALL OF THE 250 ANIMALS HAVE BEEN EXPOSED. LONG-TERM OBSERVATION AND MAINTENANCE IS IN PROGRESS.

The method of digital photo electron auto-correlation technique in Laser Doppler Spectroscopy (LDS) is applied in determining essentially the size of particulates in aerosols and hydrosls in the laboratory. The application of the technique in the characterization of the scattered and transmitted light will be investigated. The results will be compared with the relatively unexplored but reliable conventional scattering measurements based on Specific turbidity and Turbididity spectrum. The validity of the results will be further tested by Electron microscopic measurements.

The development of the above methods and their relative merits with respect to other routine methods in their application to the in-situ monitoring of particulates in stationary source emission will be studied and critically discussed. The results obtained by the proposed research are expected to indicate greater accuracy, speed, and ease of measurement which makes the technique employed potentially important in the field of pollution monitoring, especially in the determination of particulate size in smoke plumes.

803785

The principal objective of this grant is to demonstrate feasibility of on-line pest control which utilizes ecosystem models in pest management programs. Our approach is to use the models synchronized with real time environmental information concerning the abiotic and biotic state of the pest crop ecosystem. This will be accomplished by concurrent developments in eight principal areas: (a) multiterminal interface programs for integrating economic abiotic and biotic information. (b) ecosystem models, (c) algorithms for updating models from field information, (d) microclimatic models, (e) spatial variations in a multispecies ecosystem, (f) determination of biological windows using the models and appropriate management strategies, (g) economic models that determine the economic thresholds using the environmental and biological information of the pest crop ecosystem, market conditions, etc., and (h) evaluation of the different management strategies. Models have been developed for host crop, pest populations, and two parasitoids. Microclimatic models which relate soil temperature at various depths to air temperature were developed.

VEGETATIVE STABILIZATION OF PARAHO SPENT OIL SHALE

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 69000
TASK/EPA CODE :8623B-359 / R803788-03 (GRANT) PRIOR FY76 / $ 1280001
PROJECT OFFICER : E F HARRIS
INVESTIGATORS : W A BERG COLORADO STATE UNIVERSITY
MILE: 03/75 -FUNDING PACKAGE SUBMITTED
07/75 -AWARD FUNDS FOR PROJECT
07/76 -ANNUAL REPORT
09/76 -CONTINUATION AWARDED
12/76 -AMENDMENT
08/77 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THIS RESEARCH PROJECT IS TO STUDY SURFACE STABILITY AND WATER MOVEMENT IN AND THROUGH THE PARAHO SPENT OIL SHALES. IN ADDITION TO THE VEGETATIVE STABILIZATION STUDIES, THE DISTRIBUTIONS OF WATER AND SALTS IN THE PLOTS WILL BE MONITORED WITH THE OBJECTIVE OF QUANTIFYING THE POTENTIAL SALT POLLUTION FROM SHALE RESIDUES. IT IS NOT POSSIBLE TO EXPERIMENTALLY MODEL THE ACTUAL PROTOTYPE DISPOSAL. FOR THIS REASON, DATA FROM PLOT STUDIES WILL BE USED TO DEVELOP AND VERIFY A MATHEMATICAL MODEL OF SALT AND WATER TRANSPORT. THIS MODEL WILL BE USED TO ESTIMATE THE LONG TERM WATER QUALITY ASPECTS OF LARGE SCALE DISPOSAL OF SPENT SHALE RESIDUES.

OXIDANT/PRECURSOR RELATIONSHIPS

START/ COMPL DATE : 07/75 - 09/77 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :G603A-AJ-01 / R803799-02 (GRANT) PRIOR FY76 / $ 400001
PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : E R STEPHENS UNIV. OF CALIFORNIA
O P HELLRICH UNIV. OF CALIFORNIA

MILE: 06/77 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO DEVELOP, DEMONSTRATE, AND USE METHODS AND PROCEDURES FOR CLARIFYING THE RELATIONSHIP BETWEEN OXIDANT PRECURSORS (SPECIFICALLY HYDROCARBONS AND OXIDES OF NITROGEN) AND OXIDANT (OZONE) BASED ON STUDIES OF AMBIENT AIR. UNDERSTANDING OF THIS R ELATIONSHIP IS VITAL TO SOUND DEVELOPMENT OF CONTROL STRATEGY, AIR QUALITY STANDARDS, AND EMISSION STANDARDS. IN PHOTOCHEMICAL SMOG THE MAJOR HEALTH HAZARD (OZONE) IS A SECONDARY PRODUCT OF A VERY COMPLEX REACTION OF P RIMARY POLLUTANTS (HYDROCARBONS AND NITRIC OXIDE) WHICH ARE NOT THEMSELVES HIGHLY TOXIC. A NEW GAS CHROMATOGRAPHIC PROCEDURE HAS BEEN DEVISED WHICH PERMITS DIRECT MEASUREMENT OF AMBIENT CONCENTRATIONS OF METHANE, ETHANE, ETHENE, ACETYLENE AND TOTAL C3 HYDROCARBONS. THIS PROCEDURE IS AUTOMATED TO PROVIDE REPETITIVE SAMPLES AROUND THE CLOCK. THESE DATA WILL BE COMPARED WITH NOX DATA AND OXIDANT LEVELS TO BETTER DEFINE THE RELATIONSHIP BETWEEN OXIDANT AND ITS PRECURSORS, HYDROCARBON AND N ITROGEN OXIDES. THE INTENSIVE DATA COLLECTION PHASE OF THE PROJECT IS JUST BEGINNING.

INFILTRATION LAND TREATMENT OF STABILIZATION POND EFFLUENT

START/ COMPL DATE : 06/75 - 05/78 : FUNDING : EST. - FY 77 / $ 51040
TASK/EPA CODE :L611C-47 / R803804 (GRANT) PRIOR FY76 / $ 790901
PROJECT OFFICER : C G ENFIELD
INVESTIGATORS : J N DORNBUSH SOUTH DAKOTA STATE UNIVERSITY
MILE: 03/77 -EVALUATE 75 CM SOIL FOR WASTEWATER TREATMENT
03/78 -EVALUATE 150 CM SOIL FOR WASTEWATER TREATMENT

THREE PILOT INFILTRATION-PERCOLATION BASINS OF ABOUT 1/6 ACRE EACH HAVE BEEN CONSTRUCTED WITH UNDERDRAINS AT A DEPTH OF 2 1/2 FEET IN SILTY LOAM SOIL. THE NORMAL GROUND WATER DEPTH IS ABOUT 4 FEET. STABILIZATION POND EFFLUENT IS APPLIED AT WEEKLY INTERVALS IN QUANTITIES EQUIVALENT TO A DEPTH OF 18 OR 24 INCHES. SAMPLES COLLECTED FROM THE INFLUENT AND EFFLUENT DRAIN OF EACH BASIN ARE ANALYZED FOR BOD5, SUSPENDED SOLIDS; AMMONIA, NITRATE AND KJELDAHL NITROGEN; ORTHO AND TOTAL PHOSPHORUS, S PECIFIC CONDUCTANCE AND FECAL COLIFORMS. INFILTRATION RATES ARE DETERMINED USING AUTOMATIC FLOAT RECORDERS IN EACH BASIN. GROUNDWATER LEVELS AND QUALITY ARE ALSO MONITORED FOR THE AREA. SPECIFIC PROJECT OBJECTIVES ARE: 1. DEMONSTRATE THE USE OF INFILTRATION-PERCOLATION LAND DISPOSAL AS A MEANS OF UP-GRADING EXISTING SECONDARY TREATMENT TO MEET NEW EFFLUENT STANDARDS. 2. DETERMINE ACCEPTABLE LOADING RATES FOR BOTH A SCARIFIED AND UNDISTURBED SOIL FOR CLIMATIC CONDITIONS SIMILAR TO THOSE AT BROOKINGS, SOUTH DAKOTA. 3. IDENTIFY WINTER OPERATING CONSTRAINTS IMPOSED BY THE CLIMATIC CONDITIONS OF THE SITE. DATA HAS BEEN COLLECTED SINCE JUNE 1975 AND A TECHNICAL PROGRESS REPORT HAS BEEN PREPARED DESCRIBING THE CONSTRUCTION AND OPERATION OF THE UNIT INTO THE SUMMER OF 1976.

803805

The objective of this grant supplement is to allow completion of the research program on hydrolysis and wish-out of the halogenated oxidation products formed from halocarbon pollutants in the air.

REACTIONS OF SULFUR DIOXIDE IN AEROSOLS

START/ COMPL DATE : 08/76 - 07/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :G625B-EA-22 / R803814-02 (GRANT) PRIOR FY76 / $ 200001
PROJECT OFFICER : - DURHAM
INVESTIGATORS : D M HIMMELBLAU UNIV. OF TEXAS
MILE: 06/78 - FINAL REPORT

THE OBJECTIVE OF THIS STUDY IS TO DETERMINE THE RATE AND EXTENT OF REAC TION OF SULFUR DIOXIDE AND OTHER AIR POLLUTANTS AT PPM CONCENTRATIONS WITH AEROSOL DROPLETS OF THE ORDER OF SIZE OF ONE MICRON. IN THE INIT IAL EXPERIMENTS RADIOACTIVE 35SO2 WILL BE TRANSFERRED TO AEROSOLS, AND THE TOTAL RADIOACTIVE SULFUR TRANSFERRED COUNTED. MODELS OF THE MASS TRANSFER AND REACTION WILL BE FIT BY THE EXPERIMENTAL DATA, AND USED TO ELUCIDATE THE EXTENT OF REACTION AND OXIDATION TO SULFATE.

NUTRITIONAL REQUIREMENTS OF MARINE LARVAL AND JUVENILE FISH

START/ COMPL DATE : 07/75 - 07/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :P608C-04 / R803818-03 (GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : A D BECK
INVESTIGATORS : K L SIMPSON UNIV. OF RHODE ISLAND
C O CHICHESTER UNIV. OF RHODE ISLAND
T LEE UNIV. OF RHODE ISLAND

MILE: 07/78 -FINAL REPORT ENTITLED, "NUTRITIONAL REQUIREMENTS OF MARINE LARV
OBJECTIVES: THE PRIMARY OBJECTIVE OF THIS PROPOSAL IS THE DEVELOPMENT OF METHODS AND TECHNIQUES TO FORMULATE LABORATORY DIETS FOR LARVAL AND J UVENILE MARINE FISH. SUCH DIETS ARE NEEDED IN ORDER TO ACHIEVE HIGH LEVELS OF SURVIVAL AND FIELD-COMPARABLE GROWTH OF LABORATORY-CULTURED ANIMALS. IF SUCCESSFUL, THE LABORATORY MARINE FISH WILL EXHIBIT MINIMUM VARI ABILITY IN LAB BIOASSAY DUE TO NUTRITIONAL STRESS. MENIDIA MENIDIA WILL BE USED AS A TEST FISH. APPROACH: TEST DIETS WILL BE EVALUATED FOR P ROTEIN AVAILABILITY AND STORAGE STABILITY. THE NUTRITIONAL STATUS OF FIELD AND DIET-FED POPULATIONS WILL BE COMPARED. THE LIFE HISTORY STAGES WILL INCLUDE EGGS, YOLK-SAC LARVAE, POST-YOLK-SAC LARVAE AND JUVENILES. C URRENT PLANS: APPARENT NUTRITIONAL NEEDS WILL BE DETERMINED BY QUALITATIVE ANALYSIS OF EGGS, YOLK-SAC LARVAE, POST-YOLK-SAC LARVAE AND JUVENILES. THE SOURCES OF NUTRIENTS WILL BE DETERMINED BY QUALITATIVE ANALYSIS OF LABOR ATORY-PREPARED LIVE OR ARTIFICIAL FOOD MATERIALS. THE TEST DIETS FORMULATE D FROM QUALITATIVE INFORMATION WILL THEN BE ASSESSED FOR PROTEIN AVAILABIL ITY AND STORAGE STABILITY USING GROWTH STUDIES WITH THE TEST FISH, RAT AND RAINBOW TROUT. FINALLY, THE NUTRITIONAL STATUS OF THE LARVAE AND JU VENILES WILL BE COMPARED WITH FIELD POPULATIONS USING APPROPRIATE RESPONSE PARAMETERS: SURVIVAL, GROWTH, BIOCHEMISTRY, BEHAVIOR AND STRESS RESPONSE.

USE OF SIMULATION FOR CHARACTERIZING TRANSPORT IN SOILS ADJACENT TO LAND DISPOSAL SITES

START/ COMPL DATE : 11/75 - 02/78 : FUNDING : EST. - FY 77 / $ 14295
TASK/EPA CODE :C618A-7031 / R803827-02 (GRANT) PRIOR FY76 / $ 811741
PROJECT OFFICER : M H ROULIER
INVESTIGATORS : G F PINDER PRINCETON UNIVERSITY
W P SAUKIN PRINCETON UNIVERSITY

MILE: 11/75 -PROJECT START
02/78 -PROJECT COMPLETION

OBJECTIVES: DEVELOP AND TEST A SIMULATION TECHNIQUE FOR PREDICTING THE M OVEMENT OF NONCONSERVATIVE SOLUTES IN SATURATED AND UNSATURATED SOILS. APP ROACH: AN EXISTING DIGITAL COMPUTER, GALERKIN-FINITE ELEMENT, TRANSIENT, T WO-DIMENSIONAL, CROSS-SECTIONAL, SATURATED FLOW, CONSERVATIVE SOLUTE MODEL IS BEING MODIFIED TO DESCRIBE MOVEMENT OF A SINGLE, NON-CONSERVATIVE SOLUTE IN BOTH SATURATED AND UNSATURATED SOILS IN LARGE, T HREE-DIMENSIONAL SYSTEMS. THE MODEL WILL BE FIELD TESTED USING CONTAMINANT MONITORING DATA FROM AN EXISTING LANDFILL OR OTHER LAND DISPOSAL SITE. PROGRESS: (9 MONTHS) SOLUTE MOVEMENT PROBLEMS HAVING EXACT SOLUTIONS WERE SOLVED USING A FINITE DIFFERENCE PROCEDURE AND A GALERKIN FINITE ELEMENT PROCEDURE TO CALCULATE THE DERIVATIVES OF CONCENTRATION AND VELOCITY WITH RESPECT TO DISTANCE AND A THIRD ORDER CORRECT FINITE DIFFERENCE PROCEDURE TO CALCULATE THE TIME DERIVATIVES, FOR THE GALERKIN FINITE ELEMENT PROCEDURE THE FOLLOWING WERE TESTED AS BASIS FUNCTIONS: FIRST AND SECOND ORDER CONTINUOUS HERMITEAN POLYNOMIALS AND ZERO ORDER CONTI NUOUS LINEAR, QUADRATIC, AND CUBIC FUNCTIONS. COMPARISON OF THE RESULTS OF THESE VARIOUS CALCULATIONS WITH THE EXACT SOLUTIONS SHOWED THAT THE GAL ERKIN FINITE ELEMENT PROCEDURE USING FIRST AND SECOND CONTINUOUS HERMITEAN POLYNOMIALS AS BASIS FUNCTIONS PROVIDED THE MOST SATISFACTORY COM BINATION OF ACCURACY AND COMPUTATIONAL EFFICIENCY, PARTICULARLY FOR LARGER VALUES OF THE TIME STEP, NODE SPACING, AND DISPERSION COEFFICIENT. BECAUSE THE FIRST DERIVATIVES OF HERMITEAN POLYNOMIALS ARE CONTINUOUS AT ELEMENT BOUNDARIES, USE OF THESE POLYNOMIALS ALLOWS CALCULATION OF A CONTINUOUS FLOW FIELD AND HELPS TO MINIMIZE SOLUTE MASS BALANCE ERRORS WHICH MAY OCCUR WITH OTHER METHODS. FUTURE WORK WILL MODIFY THE MODEL TO ACCOUNT FOR ADSORPTION/DECAY OF SINGLE, NON-CONSERVATIVE SOLUTES AND WILL TEST THE MODEL WITH DATA FROM AN EXISTING LANDFILL.

803828

The primary objective of this demonstration is to demonstrate the technical and economic feasibility of composting raw dewatered municipal sewage sludge by high rate suction aeration under the adverse elimatic conditions typically experienced by many of the municipalities located in the New England, Great Lakes, Midwestern, and Northwestern states. Secondary objectives consist of a wide range of operational and procedural elements all related directly or indirectly to the physical location and climatological conditions of this demonstration.

The sludge will be delivered to the site once per week at a volume of approximately 50 cu. yd. Upon arrival at the site wood chips are mixed with the sludge at a ratio of 3:1, wood chips to sludge by volume. The mixture is then moved to the composting area which is a concrete pad with two twenty feet lengths of pipe connected to a blower. The blower operates at two minute intervals every twenty minutes. The blower draws air through the mixture and assists the composting pile in achieving higher and more even temperature distribution. The wood chips absorb moisture and create voids which also assist in the thermal distribution and assist in keeping a constant oxygen content. Temperatures must exceed 55 degrees Centigrade throughout the pile to insure complete pathogen kill. Therefore, temperature and oxygen content must be monitored daily. The entire process takes approximately fourteen days. An additional thirty days of curing after the pile is removed from the blower area is recommended before use, as the pile will continue to compost naturally. The final product is useful as a supplement to commercial fertilizer and can assist in lowering the cost of maintaining public land. Also the disposal of sludge is eliminated and if successful this process will eliminate the need for expensive digesters presently used in secondary waste water treatment plants.

The demonstration will commence in May 1975.

SUBLETHAL EFFECTS OF OIL ON BEHAVIOR AND CHEMICAL SENSES OF MARINE ANIMALS

START/ COMPL DATE : 11/75 - 10/78 : FUNDING : EST. - FY 77 / $ 57000
TASK/EPA CODE :P608C-06 / R803833-03 (GRANT) PRIOR FY76 / $ 1102481
PROJECT OFFICER : D MILLER

S OLESZKOSZUTS BOSTON UNIVERSITY

MILE: 10/78 -FINAL REPORT, "SUBLETHAL EFFECTS OF OIL ON BEHAVIOR AND CHEMICA
GENERAL OBJECTIVE: TO DETERMINE IF AND HOW PETROLEUM HYDROCARBONS AFFECT CHEMORECEPTION AND CHEMICALLY-STIMULATED BEHAVIOR IN MARINE ANIMALS. CHEMORECEPTION AND BEHAVIOR OF LOBSTERS: A) MEASURE EFFECTS OF 0. 1-1.5 PPM #2 FUEL OIL (WATER ACCOMMODATED FRACTION) ON FEEDING AND GENERAL BEHAVIOR OF LOBSTERS: DETAILED BAHAVIOR ANALYSIS, DETERMINE THE N ARROW RANGE OF EXPOSURE LEVELS THAT CAUSE EFFECTS ON CHEMICALLY STIMULATED BEHAVIOR, WITHOUT CAUSING GROSS NEUROMUSCULAR DEFICIENCIES, B) DOCUMENT STIMULUS EFFECTS OF DIRECT APPLICATION OF 1-10 PPM #2 FUEL OIL (WAF) ON NEUROPHYSIOLOGICAL RESPONSES OF ANTENNULAR CHEMORECEPTORS OF LOBSTERS, C) DETERMINE EFFECTS OF DIFFERENT PETROLEUM HYDROCARBONS FR ACTIONS ON LOBSTER BEHAVIOR AND CHEMORECEPTION USING SELECTED COMPOUNDS FR OM CHEMICAL SEPARATED FRACTIONS, D) DETERMINE CONTRIBUTION OF OIL-AFFECTED CHEMORECEPTION ON BEHAVIORAL DEFICITS: NEUROPHYSIOLOGY AND MORPHOLOGY OF OIL-EXPOSED LOBSTER ANTENNULES, COMPARISON OF OIL EFFE CTS ON LOBSTERS WITH AND WITHOUT ANTENNULES, SYNTHESIS OF PROJECT RESULTS. CHRONIC EFFECTS ON FIELD POPULATIONS: A) COMPARE FEEDING, SUBSTRATE SELECTION, AND ANTI-PREDATOR BEHAVIOR OF THREE INSHORE SPECIES (CRANGON SEPTEMSPINOSUS, FUNDULUS HETEROCLITUS, AND PSEUDOPLEURONECTES AMERICANUS FROM OIL SPILL AND UNCONTAMINATED SITES ALONG BUZZARDS BAY, MASSA CHUSETTS, B) COMPARE FEEDING AND GENERAL BEHAVIOR OF LOBSTERS (HOMARUS AMA ERICANUS) TAKEN FROM OIL SPILL AREAS AND CLEAN HABITATS, IMMEDIATELY AFTER A SPILL, IF ONE OCCURS, C) COMPARE ALARM AND FEEDING RESPONSES OF NAS SARIUS OSBOLETUS TAKEN FROM OILED AND CLEAN HABITATS, APPROACH: BEHAVIORAL AND NEUROPHYSIOLOGICAL BIOASSAYS; FLOW-THROUGH OIL DOSING; CHEMICAL MONIT ORING OF EXPOSURE LEVELS, PROGRESS: LOW SUBLETHAL LEVELS OF NO. 2 FUEL OIL (WAF) INTERFERE WITH LOBSTER FEEDING BEHAVIOR AND OIL ACTS AS A CHEMICAL STIMULUS ON DISTANCE CHEMORECEPTORS.

FATE AND EFFECTS OF ATRAZINE IN SALT MARSH ECOSYSTEMS

START/ COMPL DATE : 07/75 - 06/78 : FUNDING : EST. - FY 77 / $ 40400
TASK/EPA CODE :Q7148-3-03 / R803835-03 (GRANT) PRIOR FY76 / $ 966201
PROJECT OFFICER : F G WILKES
INVESTIGATORS : D E DAVIS AUBURN UNIVERSITY
J D WEETE AUBURN UNIVERSITY

MILE: 06/78 -FINAL REPORT

THE RESEARCH WILL INVESTIGATE THE ACCUMULATION, DEGRADATION, AND EFFECTS OF ATRAZINE ON A SERIES OF MODEL ECOSYSTEMS CONSISTING OF ORGANISMS FROM A SALT MARSH. INITIALLY, THE EFFECTS AND FATE OF ATRAZINE APPLIED TO T HE PRIMARY AUTOTROPH OF A GEORGIA SALT MARSH, SPARTINA ALTERNIFLORA, ROOTE D IN WASHED SAND IN SEA WATER, WILL BE STUDIED. WHEN THAT PHASE OF THE RES EARCH HAS BEEN COMPLETED OTHER ORGANISMS WILL BE ADDED, ONE AT A TIME, AND THE EFFECTS OF ATRAZINE AND ATRAZINE METABOLITES ON THESE ADDITIONAL COMPONENTS OF THE SYSTEM WILL BE ESTABLISHED. THE ORGANISMS TO BE ADDED R EPRESENT DIFFERENT TROPHIC LEVELS AND PATHWAYS IN THE FOOD WEB AND WILL BE SELECTED FROM AMONG SESARMA RETICULATA, PALAEOMONETES VULGARIS, UCA PUGNAX, MODIOLUS DEMISSUS, AND FUNDULUS GRANDIS. THE DATA OBTAINED FROM THE MODEL SYSTEMS WILL BE COMPARED WITH DATA OBTAINED FOR SIMILAR SPECIES HARVESTED FROM ATRAZINE-TREATED PLOTS LAID OUT IN THE SAPELO ISLAND SALT MARSH. A SEPARATE BUT RELATED STUDY WILL BE MADE OF THE EFFECTS OF ATRAZINE ON DIATOMS PRESENT IN THE SALT MARSH. THIS WILL INCLUDE MEASURING THE EFFECTS OF DIFFERENT CONCENTRATIONS OF ATRAZINE ON THE GROWTH AND CARBON FIXATION BY PURE CULTURES OF THE TWO OR THREE OF THE MOST IMPORTANT DIATOM SPECIES IN THE MARSH AND MONITORING POPULATION SHIFTS IN THE MARSH AFTER ATRAZINE TREATMENT.

EFFECTS OF KEPONE ON LARVAL DEVELOPMENT OF CALLINECTES SAPIDUS AND RHITHROPANOPEUS HARRISII

S HERRING DUKE UNIVERSITY

MILE: 07/78 -FINAL REPORT

THE OBJECTIVES OF THE INVESTIGATION WILL BE TO DETERMINE: (1) THE LIMITS OF CONCENTRATION OF KEPONE IN WHICH THE MUD-CRAB, RHITHROPANOPEUS HARRISII GOULD, AND THE BLUE CRAB, CALLINECTES SAPIDUS, CAN BE REARED FROM HATCHING TO THE FIRST CRAB STAGE; (2) SUBLETHAL AND ACUTELY TOXIC CONCENTRATIONS; (3) SUBLETHAL EFFECTS; (4) AND STAGES IN WHICH THE LARVAE ARE MOST SENSITIVE TO KEPONE. RANGE-FINDING AND DEFINITIVE EXPERIMENTS WILL BE CONDUCTED ON FOUR REPLICATE SERIES OF R. HARRISII AND C. SAPIDUS LARVAE EXPOSED TO 0 AND FIVE OR SIX CONCENTRATIONS OF KEPONE. IN THE DEFINITIVE EXPERIMENTS WE SHOULD BE ABLE TO DETERMINE FOUR TO FIVE CONCENTRATIONS OF KEPONE WHICH SHOW DIFFERENTIAL SURVIVAL AND TO ASCERTAIN WHICH OF THESE ARE SUBLETHAL AND ACUTELY TOXIC CONCENTRATIONS. THE PERCENT OF LARVAE WHICH PASS THROUGH ZOEAL AND MEGALOPA DEVELOPMENT WILL BE DETERMINED SEPARATELY. ATTENTION WILL BE GIVEN TO SUBLETHAL EFFECTS WHICH ARE CORRELATED WITH EACH INCREASE IN CONCENTRATION OF KEPONE, SUCH AS PROLONGED DURATION OF ZOEAL AND/OR MEGALOPA DEVELOPMENT, EXTRA ZOEAL STAGES, MORPHOLOGICAL AND BEHAVIORAL ABNORMALITIES AND AUTONOMY OF THE LIMBS OF MEGALOPA. SENSITIVITY OF LARVAE TO KEPONE IN LARVAL STAGES WILL BE DETERMINED BY STATISTICAL ANALYSES OF MORTALITY DATA.

HUMAN ENTERIC VIRUS SURVIVAL IN SOIL FOLLOWING IRRIGATION WITH SEWAGE PLANT EFFLUENTS

START/ COMPL DATE : 07/75 - 07/78 : FUNDING : EST, - FY 77 / $ 112050
TASK/EPA CODE :D6078-021 / R803844-03 (GRANT) PRIOR FY76 / $ 1835421
PROJECT OFFICER : E AKIN
INVESTIGATORS : B P SAGIK UNIV, OF TEXAS

B E MOORE UNIV, OF TEXAS
W W HAMMOND UNIV, OF TEXAS

MILE: 07/78 -FINAL REPORT

OBJECTIVES: THE OVERALL OBJECTIVE OF THIS STUDY IS TO EVALUATE THE SURVIVAL AND TRANSPORT OF ENTERIC VIRUSES AT LAND APPLICATION SITES FOR WASTEWATER FOLLOWING CONVENTIONAL WASTEWATER TREATMENT, SPECIFIC, DETAILED OBJECTIVES ARE: (A) TO DETERMINE THE SURVIVAL OF ENTEROVIRUSES DISTRIBUTED TO THE SOIL FOLLOWING WASTEWATER IRRIGATION; (B) TO FOLLOW THE MOVEMENT OF INDIGENOUS ENTEROVIRUSES AND BACTERIOPHAGES SPECIFIC TO E, COLI THROUGH THE UNSATURATED SOIL TONE VIA LYSIMETERS; (C) TO ASCERTAIN POSSIBLE MOVEMENT OF INDIGENOUS ENTEROVIRUSES AND BACTERIOPHAGES IN THE G ROUNDWATER BENEATH MOVEMENT OF INDIGENOUS ENTEROVIRUSES AND BACTERIOPHAGES IN THE GROUNDWATER BENEATH WASTEWATER LAND APPLICATION SITE BY SAMPLING MONITORING WELLS; (D) TO CONDUCT A MASS BALANCE OF INDIGENOUS ENTEROVIRUSES ENTERING AND LEAVING THE SITE; (E) AND TO INITIATE THE STUDY OF THE PRESENCE IN WASTEWATER OF SPECIFIC PATHOGENS AND TO ASCERTAIN THEIR POSSIBLE PRESENCE IN SOILS AND LYSIMETER AND MONITORING WELL WATER S. APPROACH: SEVERAL SITES WOULD BE EVALUATED AS POTENTIAL STUDY SITES, IT WAS PLANNED TO CHARACTERIZE THE TREATMENT FACILITIES, SOILS, IRRIGATION SYSTEMS AND STREAMS AT THE SITES, ANALYSES WOULD BE CONDUCTED FOR CHEMICAL, PHYSICAL, AND BIOLOGICAL PARAMETERS, METHODS WOULD BE DEVELOPED TO ADEQUATELY PROCESS ALL TYPES OF SAMPLES ENCOUNTERED, THE UN SATURATED SOIL ZONE PERCOLATE WOULD BE EVALUATED FOR VIRUS TRANSPORT BY LY SIMETERS; THE SATURATED ZONE BY MONITORING WELLS, PROGRESS: TWO SITES HAVE BEEN SELECTED FOR STUDY, ONE OF THE SITES WAS SELECTED FOR INTENSE STUDY DUE TO THE FACT THAT IT HAS A RANGE OF SOIL TYPES AND WASTEWATER IRRIGATION HISTORY, ITS WASTEWATER TREATMENT AND SPRAY IRRIGATION SYSTEMS ARE NEW, THUS, 9 LYSIMETERS TO DEPTHS OF 4.5 FT, AND 6 MONITORING WELLS HAVE BEEN INSTALLED, BACKGROUND SAMPLING AND TREATMENT PLANT CHARA CTERIZATION HAS BEEN COMPLETED, SAMPLING AND SAMPLE PROCESSING METHODOLOGY HAS BEEN MODIFIED TO FACILITATE HANDLING OF THE SAMPLES OBTAINED FROM BOTH SITES AND TO OPTIMIZE VIRUS RECOVERY.

REACTIONS OF OXY RADICALS IN THE ATMOSPHERE

START/ COMPL DATE : 06/77 - 06/78 : FUNDING : EST. - FY 77 / $ 35000
TASK/EPA CODE :G603A-AC-11 / R803846-03 (GRANT) PRIOR FY76 / $ 220001

MILE: 12/78 -FINAL REPORT

THE CURRENT STUDY OF THE REACTION OF OH WITH AROMATIC HYDROCARBONS INDICATES THAT IN THE URBAN ATMOSPHERE COMPOUNDS LIKE TOLUENE WILL BE CONVERTED INITIALLY TO AROMATIC ALDEHYDES AND PHENOLIC COMPOUNDS, THEREFORE, THE OBJECTIVE OF THIS PROPOSED GRANT CONTINUATION IS TO STUDY THE REACTIONS OF THESE TYPES OF PRODUCTS WITH OH RADICAL AND OZONE IN ORDER TO DETERMINE THEIR FATE IN THE URBAN ATMOSPHERE. A SECONDARY OBJECTIVE IS TO EVALUATE THE RATE CONSTANTS FOR REACTIONS OF HO2 WITH SIMPLE OLEFINS SUCH AS ETHYLENE, PROPYLENE, AND ISOBUTYLENE.

MILE: 03/77 -FINAL REPORT

AEROSOL SIZE DISTRIBUTIONS HAVE BEEN MEASURED IN THE ST. LOUIS AREA AS PART OF EPA'S PROJECT MISST USING AIRCRAFT AND GROUND-BASED SELF-CONTAINED MOBILE LABORATORIES. THESE MEASUREMENTS WERE MADE WITH A GROUP OF COLLABORATORS SUCH THAT A COMPLETE ARRAY OF CHEMICAL, PHYSICAL, AND METEOR OLOGICAL MEASUREMENTS WERE OBTAINED ON A COAL-FIRED POWER PLANT PLUME. THE UNIVERSITY OF MINNESOTA'S PORTION OF THE PROJECT INCLUDED AEROSOL MEASU REMENTS ABOARD AN AIRCRAFT AND THE OPERATION OF A MOBILE VAN ON THE GROUND UNDER THE PLUMES. THIS MOBILE VAN WAS ALSO OPERATED ON FREEWAYS IN THE LOS ANGELES AREA DURING OCTOBER 1976 AS PART OF AN EPA-SPONSORED PROJECT TO STUDY SULFUR AEROSOLS ON ROADWAYS. MUCH OF THE WORK DURING THE NEXT PROJEC T YEAR WILL BE ANALYSIS AND REPORTING OF THE LARGE AMOUNT OF DATA OBTAINED DURING THE PAST SEVERAL YEARS. ANALYSIS IS BEING DIRECTED TOWARD OBT AINING AEROSOL GROWTH RATES IN THE PLUMES, AEROSOL NUCLEATION RATES IN THE PLUMES AND SURROUNDING ATMOSPHERE, AND TOWARD BETTER DESCRIPTIONS OF THE AEROSOL SIZE DISTRIBUTIONS. LABORATORY WORK TOWARD THE DEVEL OPMENT OF A CONTINUOUS INSTRUMENT FOR THE MEASUREMENT OF AEROSOL SULFUR IS ALSO BEING PARTIALLY SUPPORTED BY THIS PROJECT.

PROPER DISPOSAL OF SEWAGE EFFLUENT FROM RURAL AND ISOLATED HOMES AND B USINESSES IS ONE OF THE MOST DIFFICULT PROBLEMS FACING HEALTH AUTHORITIES. THIS IS PARTICULARLY TRUE IN AREAS WHERE SOIL CONDITIONS ARE U NSUITABLE FOR APPLICATION OF LEACHING FIELDS FOLLOWING SEPTIC TANKS. THESE CONDITIONS ARE IN MANY AREAS HAVING HIGH GROUND WATER TABLES AND IN OTHER AREAS WHERE BEDROCK IS CLOSE TO THE GROUND SURFACE. UNDER THESE CO NDITIONS, AN EVAPORATION TYPE SYSTEM CONCEPT CAN BE USED TO DISPOSE OF THE WASTEWATER WITHOUT ADVERSE EFFECTS ON THE LAND OR GROUND WATER. THE OBJ ECTIVES OF THIS STUDY ARE TO DETERMINE RATIONAL DESIGN CRITERIA, ESTIMATED COSTS AND POTENTIAL APPLICABILITY OF EVAPOTRANSPIRATION (ET) AND MEC HANICAL EVAPORATION (E) SYSTEMS FOR DISPOSAL OF WASTEWATER FROM INDIVIDUAL HOMES. SPECIFIC OBJECTIVES ARE THE QUANTIFICATION OF MAJOR DESIGN PA RAMETERS, SUCH AS SOIL TYPE, SATURATED DEPTH AND VEGETATIVE COVER FOR ET S YSTEMS AND PHYSICAL AND MECHANICAL FACTORS FOR E SYSTEMS, BY THERMODYNAMIC STUDIES, PILOT STUDIES, AND IN THE CASE OF ET SYSTEMS, MONITORING OF EX ISTING FULL-SCALE SYSTEMS, BY USE OF METEOROLOGIC AND HYDROLOGIC DATA FROM APPROXIMATELY FIVE LOCATIONS IN THE UNITED STATES, ESTIMATES OF COST AND APPLICABILITY OF THESE TYPES OF SYSTEMS WILL BE MADE FOR THESE LOCATIONS REPRESENTING A WIDE SPECTRUM OF CLIMATIC CONDITIONS.

EVALUATION OF FULL SCALE WASTEWATER REUSE SYSTEM FOR DOMESTIC GROUNDWATER REPLENISHMENT

THE OBJECTIVES OF THIS STUDY ARE TO EVALUATE ON A FULL PLANT-SCALE BASIS: (1) THE RELIABILITY AND EFFLUENT VARIABILITY OF A 15 MGD ADVANCED WASTEWATER TREATMENT (AWT) SYSTEM PRODUCING A WATER APPROACHING POTABLE QUALITY FOR USE IN GROUND WATER REPLENISHMENT AND PREVENTION OF SEAWATER INTRUSION, AND (2) THE QUALITY OF THE EFFLUENT WITH REGARD TO THE ID ENTIFICATION, MEASUREMENT, AND MONITORING OF TRACE MATERIALS (CHEMICAL, PH YSICAL AND BIOLOGICAL) AND RESIDUES. PARTICULAR EMPHASIS WILL BE PLACED ON THE CHARACTERIZATION OF THE ORGANIC MATERIALS IN THE EFFLUENT USING THE LATEST GAS CHROMATOGRAPHIC/MASS SPECTROPHOTOMETRIC PROCEDURES. THE ANALYSES TO BE CONDUCTED ARE AS FOLLOWS: 1. GENERAL ORGANIC CH ARACTERIZATION; A. VOLATILE ORGANIC ANALYSIS (VOA); B. SOLVENT EXTRACTABLE ANALYSIS (SEA); C. DETAILED CHARACTERIZATION (DC); 2. POLYCYCLIC AROMATIC HYDROCARBONS (PAH); 3. PESTICIDES; 4. POLYCHLORINATED BIPHENYLS (PCBS); 5. TRICHLOROBENZENE. THE AWT SYSTEM TREATS THE EFFLUENT FROM A TRIC KLING FILTER PLANT USING LIME COAGULATION AND SEDIMENTATION, AMMONIA STRIP PING, RECARBONATION, FILTRATION, CARBON ADSORPTION, AND CHLORINATION. THIS EFFLUENT WILL BE BLENDED WITH DESALTED SEAWATER AND/OR A SUPPLY OF DEEP GROUNDWATER FOR INJECTION INTO A DOMESTIC AQUIFER.

MILE: 12/80 -FINAL REPORT

A COMPREHENSIVE STUDY IS BEING CONDUCTED TO CHARACTERIZE THE OCCURRENCE OF SULFUR IN AEROSOL PARTICLES AT SAMPLING STATIONS IN 14 LOCATIONS BETWEEN THE MID-CONTINENT AND EASTERN SEABOARD OF CONTINENTAL U.S.A. ADDITIONAL REMOTE STATIONS IN MARINE AND CONTINENTAL AREAS ARE ALSO BEING OPERATED TO PROVIDE IMPORTANT BACKGROUND INFORMATION. EMPHASIS IS BEING PLACED ON THE CONCENTRATIONS OF SULFUR IN RELATION TO OTHER ELEMENTS PRESENT IN THE AEROSOL AND ON THE TIME VARIABILITY OF THESE CONCENTRATIONS WITH A TIME RESOLUTION OF 2 HOURS. SAMPLING IS BEING CARRIED OUT CONTINUOUSLY AT HEIGHTS FROM GROUND LEVEL TO 30 METERS BY A UNIQUE TIME SEQUENCE FILTER SAMPLER WHICH HAS BEEN DEVELOPED AT FLORIDA STATE UNIVERSITY. ADDITIONAL SAMPLES ARE PLANNED TO BE TAKEN DURING INTENSIVE PERIODS DURING THE YEAR BY CASCADE IMPACTORS AT ABOUT FIVE OF THE FILTER SAMPLING SITES, USING CASCADE IMPACTORS FOR DETERMINATION OF THE PARTICLE SIZE DISTRIBUTION OF SULFUR AND RELATED ELEMENTS. ELEMENTAL ANALYSIS IS PERFORMED USING PROTON INDUCED X-RAY EMISSION, A HIGHLY SENSITIVE TECHNIQUE PERMITTING BOTH THE EXTREMELY SHORT 2-HOUR TIME RESOLUTION ON A CONTINUOUS BASIS FOR FILTER SAMPLES AS WELL AS THE SIZE RESOLUTION OF PARTICLES AS SMALL AS 0.25 MICRON DIAMETER BY CASCADE IMPACTORS. BY MEANS OF THE COMBINATION OF SAMPLING TECHNIQUES, THE IMPACT OF FOSSIL FUEL COMBUSTION AND OTHER ANTHROPOGENIC SOURCES OF SULFUR ON THE NATURAL CHARACTERISTICS OF THE ATMOSPHERE MAY BE PRECISELY DETERMINED.

THE PROPOSED RESEARCH SEEKS TO IDENTIFY THE CHLORINE-CONTAINING AND BROMINE-CONTAINING ORGANIC COMPOUNDS THAT ARE FORMED WHEN CHLORINE IS ADDED TO SEAWATER. INITIAL EMPHASIS WOULD BE PLACED ON STUDY OF REACTION CONDITIONS THAT OCCUR DURING POWER PLANT OPERATION; I.E., UP TO 2 HOURS AT TEMPERATURES UP TO 38 DEGREES C WITH AND WITHOUT SUNLIGHT. TOTAL ORGANIC HALOGENATED COMPOUNDS YIELD WOULD BE MEASURED. THE REACTION PRODUCTS WOULD BE FRACTIONATED, USING SELECTIVE SOLUBILITY AND THIN LAYER CHROMATOGRAPHY. CHARACTERIZATION WOULD BE CARRIED OUT USING GAS CHROMAT OGRAPHIC-MASS SPECTRAL TECHNIQUES AND ADDITIONAL CHARACTERIZATION WOULD BE BASED ON UV AND IR SPECTRA WITH NMR FOR SPECIAL CASES.

SULFUR BUDGET IN LARGE PLUMES

THE OBJECTIVE OF THIS PROGRAM AS A PART OF PROJECT MISTT (MIDWEST INTERSTATE SULFUR TRANSFORMATION AND TRANSPORT) IS THE QUANTITATIVE DETERMINATION OF THE FATE OF ATMOSPHERIC SULFUR, I.E., THE RATE OF SULFATE FORMATION AND THE RATE OF SO2 REMOVAL TO THE GROUND. LARGE PLUMES EMITTED FROM THE ELEVATED (POWER PLANT) AND LOW LEVEL SOURCES (URBAN) WERE STUDIED ON THE REGIONAL SCALE. AIRBORNE MEASUREMENTS IN THE PLUMES AND BACKGROUND AIR OUTSIDE THE PLUME WERE CARRIED OUT FOR SO2 O3 NOX, BSCAT, AEROSOL CHARGE, PARTICULATE SULFUR CONCENTRATION AND SUPPORTED BY EXTENSIVE METEOROLOGICAL MEASUREMENTS. SULFUR BUDGETS OF WELL DEFINED PLUMES WERE ASSESSED. TRANSPORT OF POLLUTANTS IN PLUMES WAS CHARACTERIZED IN TERMS OF HORIZONTAL "LONG RANGE TRANSPORT" AND VERTICAL TRANSPORT. THE IMPORTANCE OF DRY REMOVAL FOR DIFFERENT TYPES OF PLUMES AND METEOROLOGICAL CONDITIONS WAS ASSESSED. SO2 TO PARTICULATE SULFATE CONVERSION RATES WERE DETERMINED FOR THE COAL-FIRED LABADIE POWER PLANT PLUME AND THE DIURNAL VARIABILITY (1-4 PERCENT PER HOUR FOR NOON HOURS AND 0.5 PERCENT PER HOUR FOR NIGHT HOURS) WAS DETERMINED.

SULFUR BUDGET IN LARGE PLUMES

START/ COMPL DATE : 07/75 - 07/78 : FUNDING : EST. - FY 77 / $ 15000

PROJECT OFFICER : W WILSON
INVESTIGATORS : R B HUSAR WASHINGTON UNIVERSITY
MILE: 09/78 -RPT. ON RELATIONSHIP BETWEEN VISIBILITY AND POLLUTANT CONC.
THE THREE MAIN OBJECTIVES OF THIS STUDY ARE: 1) ESTABLISH AND DOCUMENT BY FIELD MEASUREMENTS THE SULFUR BUDGET IN LARGE SINGLE PLUMES, 2) IDENTIFY THE MAJOR PHYSICAL AND CHEMICAL MECHANISMS AND PARAMETERS WHICH GOVERN THE SULFUR BUDGET, 3) FORMULATE AND TEST A DISPERSION-TRANSFORMATION-REMOVAL MODEL FOR SO2 AND AEROSOL. INSTRUMENTED AIRCRAFT AND SURFACE VEHICLES WILL BE USED FOR THE DETAILED PLUME MAPPING OF FIXED DISTANCES FROM THE SOURCE OUTWARD TO 100 KM. USING WIND FIELD DATA FROM PILOT BALLOON MEASUREMENTS, THE HORIZONTAL SULFUR FLUX WILL BE MEASURED IN THE GAS AND AEROSOL PHASE. THE AEROSOL MASS AND SULFUR CONTENT WILL BE MEASURED BY A HIGH RESOLUTION BETA-GAUGE AND VAPORIZATION-FLAME PHOTOMETRIC METHOD, RESPECTIVELY, THESE DATA WILL BE UTILIZED TO ESTABLISH THE AMOUNTS OF SO2 CONVERTED TO AEROSOL AND ITS RATE AND THE AMOUNT OF SULFUR REMOVED BY DRY DEPOSITION. THE DATA WILL BE USED FOR THE IMPROVEMENTS AND EXTENSION OF DISPERSION-TRANSFORMATION-REMOVAL MODELS.

MILE: 06/78 -FINAL REPORT ENTITLED "A FACILITY FOR THE EXPERIMENTAL ANALYSIS OBJECTIVES: A) TO DEVELOP A FACILITY AND METHODOLOGY FOR THE EXPERIMENTAL ANALYSIS OF COASTAL MARINE ECOSYSTEMS AND THEIR RESPONSE TO ENERGY-RELATED ENVIRONMENTAL STRESSES B) TO RELATE THE EXPERIMENTAL RESULTS TO ECOSYSTEM THEORY AND ITS IMPLICATIONS FOR THE MANAGEMENT OF COASTAL M ARINE ENVIRONMENTS. APPROACH: REPLICATE MESO-SCALE EXPERIMENTAL ECOSYSTEMS SIMULATING A VARIETY OF COMMON COASTAL MARINE ENVIRONMENTS WILL BE DEVEL OPED AND MAINTAINED AT A SPECIAL SHORE-BASED LABORATORY. A NUMBER OF STRES SES OR ENVIRONMENTAL PERTURBATIONS ASSOCIATED WITH ENERGY DEVELOPMENT WILL THEN BE APPLIED OVER A RANGE OF INTENSITIES TO THESE SYSTEMS BEFORE, DURING, AND AFTER THE APPLICATION OF STRESS. SIMILAR FIELD EXPERIMENTS MAY ALSO BE CARRIED OUT ON A SMALL SCALE IN SOME ENVIRONMENTS. CURRENT PLAN S: THE FIRST PROJECT WILL INVOLVE 9 SHORE-BASED EXPERIMENTAL WATER COLUMNS (5M DEEP X 2M DIA.) WITH ASSOCIATED BOTTOM SEDIMENTS AND BENTHOS. THE MICROCOSMS WILL FIRST BE STUDIED FOR REPLICABILITY AND FOR DIFFERENCES BETWEEN TANKS THAT ARE RUN AS OPEN OR CLOSED SYSTEMS WITH RESPECT TO SEA-WATER FLOW. AFTER THIS PRELIMINARY WORK IS COMPLETED, A SERIES OF EXP ERIMENTS INVOLVING THE ADDITION OF WATER SOLUBLE PETROLEUM HYDROCARBONS AT CONCENTRATIONS OF 100 AND 1000 UG/1 WILL BEGIN.

EVALUATION OF AMES' WASTE PROCESS - AN ENERGY RECOVERY SYSTEM

START/ COMPL DATE : 02/76 - 02/79 : FUNDING : EST. - FY 77 / $ 250000

09/77 -EXPERIMENTAL EVALUATION COMPLETED
03/78 -FINAL REPORT COMPLETED

THE OBJECTIVES OF THIS PROJECT WERE: 1) TO CONVERT A THREE-PASS DIFFUSED AIR SYSTEM TO A SINGLE-PASS, UNCOVERED REACTOR, PURE OXYGEN ACTIVATED SLUDGE SYSTEM, 2) TO EVALUATE THE PERFORMANCE OF THE PURE OXYGEN SYSTEM AT VARYING FOOD TO MICROORGANISM RATIOS, DETENTION TIMES, AMBIENT TEMPERATURES, AND DIURNAL FLOW CONDITIONS, 3) TO DETERMINE DESIGN CRITERIA FOR A FULL PLANT CONVERSION OF THE EXISTING SECONDARY SYSTEM TO AN UNCOVERED REACTOR PURE OXYGEN SYSTEM, AS THEY RELATE TO OXYGEN UTILIZATION EFFICIENT, SOLIDS SETTLING CHARACTERISTICS, POWER REQUIREMENTS FOR OXYGEN DISSOLUTION, AND RELIABILITY OF OXYGEN DIFFUSION AND CONTROL EQUIPMENT, 4) TO DEMONSTRATE THE FEASIBILITY OF USING THIS TECH NOLOGY AT OTHER OVERLOADED ACTIVATED SLUDGE PLANTS THAT COULD BENEFIT FROM UPGRADING OF EXISTING TANKAGE AND FACILITIES. THE DEMONSTRATION SYSTEM WAS OPERATED FROM MAY 1976 TO SEPTEMBER 1977 AT INFLUENT FLOWS VARYING FROM 6 TO 18 MGD, MAJOR OPERATING DIFFICULTIES WERE ENCOUNTERED DURING THE 1976 AUTUMN, 1976-1977 WINTER, AND EARLY SPRING 1977 SEASONS DUE TO SEVERE INFESTATION OF FILAMENTOUS ORGANISMS. DURING PERIODS WHEN F ILAMENTOUS GROWTHS WERE NOT EXCESSIVE, SATISFACTORY SYSTEM PERFORMANCE WAS OBSERVED AT NOMINAL AERATION DETENTION TIMES DOWN TO SLIGHTLY LESS THAN ONE HOUR.

TOXAPHENE COMPOSITION AND TOXICOLOGY

START/ COMPL DATE : 01/75 - 12/78 : FUNDING : EST. - FY 77 / $ 45000
TASK/EPA CODE :H615F-7624 / R803913-03 (GRANT) PRIOR FY76 / $ 450001
PROJECT OFFICER : R L BARON

MILE: 00/77 -COMPARE TOXAPHENE PRODUCTS FOR UNIFORMITY AS MANUFACTURED FROM
00/78 -COMPARE TOXAPHENE FROM VARIOUS NATIONAL SOURCES
00/78 -FINAL REPORT

THE OBJECTIVES ARE TO DEFINE THE COMPOSITION AND TOXICOLOGY OF TOXAPHENE, THE INSECTICIDE USED IN LARGEST AMOUNTS IN THE UNITED STATES, AN IMPROVED ANALYTICAL METHOD BY OPEN TUBULAR COLUMN GAS CHROMATOGRAPHY ASSIS TED IN ESTABLISHING THE COMPARATIVE COMPOSITION OF 21 SAMPLES OF TOXAPHENE AND RELATED CHLORINATED TERPENES INCLUDING THE SAMPLE EMPLOYED FOR TESTS IN MAMMALS FOR POTENTIAL CARCINOGENIC ACTIVITY. INDIVIDUAL TOXAPHENE COMPONENTS ARE NEEDED FOR USE IN METABOLISM AND ENVIRONMENTAL CHEMISTRY STUDIES AND TO ESTABLISH STRUCTURE-TOXICITY RELATIONSHIPS. THESE CAN NOW BE OBTAINED BY NEW PREPARATION METHODS TO THAT YIELD COMPOUNDS ACCOUNTING FOR 20-25% OF THE COMPOSITION OF TOXAPHENE. THUS, C HLORINATION OF 2-EXO,10-DICHLOROBORNANE PROVIDES A CONVENIENT SOURCE OF 2, 2,5-ENDO,6-EXO,8,9,10-HEPTACHLOROBORNANE (B) WHICH ON FURTHER CHLORINATION GIVES THE 3-EXO-CHLORO,5-EXO-CHLORO-, 8-CHLORO-, 9-CHLORO-, AND 10-CHLORO-DERIVATIVES PLUS TWO NONECHLOROBORNANES. BIOASSAYS IN PROGRESS SUGGEST THAT THE TOXICITY TO MICE, HOUSEFLIES AND GOLDFISH DECREASES ON INTRODUCING CHLORINE SUBSTITUENTS INTO B IN THE ORDER 9-CHLORO GREATER THAN 8-CHLORO GREATER THAN NO ADDED CHLORINE GREATER THAN 3-EXO-CHLORO GREATER THAN 10-CHLORO. PRELIMINARY STUDIES INDICATE THAT B IS RAPIDLY AND EXTENSIVELY METABOLIZED IN RATS, REDUCED PORPH YRIN SYSTEMS AND IN BOVINE RUMEN FLUID TO TWO MAJOR PRODUCTS. THE METABOLI SM AND ENVIRONMENTAL CHEMISTRY OF B AND RELATED CHLOROBORNANES WILL BE EMP

METABOLISM AND TOXIC EFFECTS OF DITHIOCARBAMATE FUNGICIDES IN THE RAT

INVESTIGATORS : D G SHAW UNIV. OF ALASKA
MILE: 05/78 -FINAL REPORT

OBJECTIVE IS TO RELATE A DEFINED CHRONIC INPUT OF PETROLEUM IN AN INTERTIDAL ENVIRONMENTAL TO BIOLOGICAL CHANGES AT THE ORGANISM AND COMMUNITY LEVELS. THE PROJECT WILL INVESTIGATE OIL SEEPS ALONG THE GULF OF ALASKA THAT PROVIDE LONG-TERM, LOW-LEVEL INPUT OF PETROLEUM INTO THE MARINE INTERTIDAL ENVIRONMENT.

A. The overall objective of the project is to demonstrate the effectiveness of a physical-chemical and biological liquid waste treatment plant in treating leachate collected from a land solid waste disposal site. Associated with the overall objective, alternative treatment sequences will be evaluated with regard to technical effectiveness and economics of operation.

B. The specific objectives of this project will be met by two actions. First, the treatment plant will be operated in five (5) modes: 1. Chemical-Physical Treatment followed by an Aerobic Biological Treatment, 2. Chemical-Physical Treatment, 3. Aerobic Biological Treatment, 4. Aerobic Biological Treatment followed by Chemical-Physical Treatment, 5. Activated Carbon Treatment.

Second, bench scale testing will be performed to evaluate chemical dosage and other plant operating procedures, such as sludge return and air rates. The bench scale tests will be performed both on a research scale plant (20 gallons/day) and a batch process. Different organic loadings as well as chemical dosages will be examined. These bench scale tests will be included in the daily work load of the chemist-operator. This will enable potentially desirable process modifications to be studied on a full-scale plant with minimum upset to the plant.

During these bench scale tests, as well as full-scale plant operation, complete documentation of test procedures, chemical dosage, retention time, and result will be generated. Complete documentation will also be provided on daily operatior and plant modifications including startup, operation, maintenance, problems, problen resolution, costs and performance.

EVALUATION OF HIGH-RATE INFILTRATION-PERCOLATION BIDS TO IMPROVE WATER QUALITY

START/ COMPL DATE : 08/77 - 07/78 : FUNDING : EST. - FY 77 / $ 41304

MILE: 01/76 -QUANTIFIED EFFECTS OF COAL LEACHATE ON PERIPHYTON COMMUNITIES
06/76 -IDENTIFIED STIMULARY AND INHIBITORY LEACHATE COMPONENTS
05/78 -IDENTIFY SYNERGISTIC OR AGNOSTIC LEACHATE INTERACTIONS

OBJECTIVE OF THIS PROJECT ARE: 1) TO QUANTIFY THE EFFECTS OF COAL LEACHATE ON SPECIES COMPOSITION AND STRUCTURES OF PERIPHYTON COMMUNITIES; 2) TO IDENTIFY LEACHATE COMPONENTS WITH INHIBITORY OR STIMULATOR EFFECTS; 3) TO ELUCIDATE POSSIBLE SYNERGISTIC OR ANTAGONISTIC INTERACTIONS AMONG LEACHATE COMPONENTS. APPROACH: PERIPHYTON COMMUNITIES ARE GROWN IN L ABORATORY STREAMS ON ARTIFICIAL SUBSTRATES. THE BIOASSAY FACILITY UTILIZES WATER FROM LAKE SUPERIOR AND IS LOCATED AT THE EPA'S NATIONAL ENVIRON MENTAL RESEARCH LABORATORY IN DULUTH, MINNESOTA. IN EXPERIMENTS WHICH LAST FROM 3 TO 8 WEEKS, PERIPHYTON COMMUNITIES ARE DOSED WITH VARIOUS C ONCENTRATIONS OF COAL LEACHARE, COAL DISTILLATE, OR FRACTIONS THEREOF, AND GROWTH RESPONSE IS MEASURED AS CHANGES IN BIOMASS (CHLOROPHYLL AND ASH-FREE DRY WEIGHT). ALGAL COMMUNITIES ARE ALSO EXAMINED MICRO SCOPICALLY TO DETECT CHANGES IN SPECIES COMPOSITION AND DIVERSITY. CURRENT PLANS AND PROGRESS: COAL LEACHATE APPEARS TO STIMULATE THE GROWTH OF ALGAE. CURRENT EFFORTS ARE FOCUSING ON IDENTIFYING THE SPECIFIC CHEMICAL FACTORS RESPONSIBLE FOR THIS EFFECT.

ASSESSMENT OF THE EFFECTS OF BOTTOM DISTURBANCE ON THE ENVIRONMENT OF A CLEAR SUBARCTIC STREAM

START/ COMPL DATE : 07/75 - 07/78 : FUNDING : EST. - FY 77 / $ 33238
TASK/EPA CODE : M625A-004 / R803945-03 (GRANT) PRIOR FY76 / $ 973471
PROJECT OFFICER : E W SCHALLOCK
INVESTIGATORS : J E MORROW UNIV. OF ALASKA
MILE: 07/78 -FINAL REPORT

THE EFFECTS OF A BURIED PIPELINE CROSSING IN THE CHATANIKA RIVER ARE BEING MONITORED. PARAMETERS CONSIDERED ARE 1) TYPE AND RATE OF FLOW; 2) OXYGEN AND CARBON DIOXIDE CONTENT OF WATER; 3) WATER TEMPERATURE; 4) SIZE TYPE AND DISTRIBUTION OF STREAM BOTTOM PARTICLES; 5) INTRA-GRAVEL WATER FLOW AND CHEMISTRY; 6) QUANTITY AND DIVERSITY OF ANIMAL AND PLANT ORGANISMS; 7) ORGANIC DRIFT; 8) PRIMARY PRODUCTIVITY. ITEMS 1) THROUGH 5) ARE HANDLED BY PERSONNEL OF THE ARCTIC ENVIRONMENTAL RESEARCH LABOR ATORY, EPA. RESULTS THUS FAR INDICATE SOME SILTATION DOWNSTREAM FROM THE C ROSSING; LOSS OF SMALL SPAWNING GROUND FOR LONGNOSE SUCKER DOWNSTREAM FROM THE CROSSING; SOME INCREASE IN ORGANIC DRIFT; TEMPORARY INCREASE IN PRIMARY PRODUCTIVITY BELOW AS COMPARED WITH ABOVE THE CROSSING. IT IS PLANNED TO MONITOR THESE FACTORS FOR ANOTHER YEAR TO DETERMINE WHETHER THE OBSERVED EFFECTS ARE PERMANENT OR TEMPORARY.

EFFECTS OF NON-GASEOUS AIRBORNE POLLUTANTS FROM COAL-FIRED POWER PLANTS ON PLANT GROWTH AND METABOLISM

MILE: 08/77 -COMPLETE FIVE REPORTS ON COAL STRIPMINING EFFECTS ON CHEMISTRY
09/77 -REPORTS ON BIOLOGICAL AND CHEMICAL EFFECTS ON COAL COMBUSTION
09/77 -REPORTS ON BASELINE STUDIES FOR OIL SHALE EXTRACTION
01/78 -SYNTHESIS REPORT ON AQUATIC EFFECTS OF COAL STRIPPING
01/78 -SYNTHESIS REPORT ON AQUATIC EFFECTS OF COAL COMBUSTION
01/78 -PRELIMINARY REPORTS ON TOXICITY AND ANALYSES OF COAL GASSIFICAT
12/78 -COMPLETION REPORTS ON AQUATIC EFFECTS OF COAL MINING AND COMBUS

THE OVERALL OBJECTIVE OF THIS RESEARCH PROJECT IS TO PROVIDE PREDICTIVE INFORMATION WITH REGARD TO POTENTIAL TOXICANTS TO THE AQUATIC ENVIRONMENT RESULTING FROM COAL AND OIL SHALE EXTRACTION AND CONVERSION. THE S PECIFIC OBJECTIVES ARE TO IDENTIFY AND QUANTIFY THOSE CHEMICAL PRODUCTS OF COAL AND OIL SHALE EXTRACTION AND CONVERSION WHICH MAY REACH SURFACE W ATERS, AND TO DETERMINE BY BOTH FIELD STUDIES AND LABORATORY BIOASSAYS THE DEGREE TO WHICH THOSE CHEMICALS MAY BE ACUTELY OR CHRONICALLY TOXIC TO FISHES AND AQUATIC INVERTEBRATES, OR MAY BECOME INVOLVED AS PART OF THE FOOD CHAIN. FOUR CATEGORIES OF ENERGY DEVELOPMENT ARE BEING CONSIDE RED: COAL MINING, COAL COMBUSTION, COAL GASIFICATION AND LIQUEFACTION, AND OIL SHALE EXTRACTION AND PROCESSING. POTENTIAL TOXICANTS TO THE AQUATIC E NVIRONMENT ARE BEING IDENTIFIED BY A COMBINATION OF FIELD, LABORATORY, AND LITERATURE STUDIES, AS WELL AS BY INFORMATION GAINED FROM COOPERATIVE INPUT FROM OTHER ENERGY-RELATED RESEARCH PROGRAMS. CONCURRENT CHEMICAL AND BIOLOGICAL LABORATORY AND FIELD BIOASSAYS AS WELL AS AQUATIC DISTRIB UTION STUDIES DICTATE WHAT ADDITIONAL OR ALTERNATE EMPHASIS IS REQUIRED IN THE LABORATORY AND FIELD CHEMICAL STUDIES.

ORGANIC LEACHING AND PARTICULATE DISPERSION FROM COAL

START/ COMPL DATE : 07/75 - 06/78 : FUNDING : EST. - FY 77 / $ 180000

07/77 -A SELECTIVE SYNTHESIS OF POLYMETHYLATED NAPHTHALENES
07/77 -END ON 2ND YEAR PROGRESS REPORT
07/77 -TRANSPORT IN THE DULUTH HARBOR
06/77 -HEPATIC MIXED-FUNCTION OXIDASE ACTIVITY IN RAINBOW TROUT EXPOSE

A MAJOR THRUST OF THIS PROJECT WILL REMAIN THE MONITORING OF POLYNUCLEAR AROMATIC HYDROCARBONS (PAH'S) AT THE MICROPOLLUTANT LEVEL (PPM OR LESS). THE HIGH PRESSURE LIQUID CHROMATOGRAPHY-GAS CHROMATOGRAPHY (HPLC-GC) IDENTIFICATION METHODOLOGY DEVELOPED IN THESE LABORATORIES FOR THE ANALYSIS OF TRACE PAH'S IN COAL LEACHATES, AND IN GENERAL WATER SAMPLES, WILL BE EXTENDED AND APPLIED TO SUCH PROBLEMS AS THE BIOCONCENTRATION OF PAH'S IN FISH TISSUE, AIDING IN THE ANALYSIS OF "SECOND-ORDER" PAH'S (I.E., METABOLITIES, PHOTOCHEMICAL OXIDATION PRODUCTS, AQUEOUS DISINFECTION PRODUCTS), AND IN THE PAH ANALYSIS OF COAL STEAM DISTILLATES. THE ULTIMATE GOAL OF THE PROPOSED INVESTIGATION IS TO DETERMINE THE LONG RANGE INFLUENCE OF A COAL LOADING FACILITY ON A GREAT LAKE HARBOR IN TERMS OF TRANSPORT OF COAL PARTICULATE MATTER, USING PHYSICAL AND CHEMICAL MEASUREMENTS AND APPLICATION OF NUMERICAL MODELING FOR WATER QUALITY TO THE DULUTH-SUPERIOR HARBOR.

CONTROLLED LANDFILL STABILIZATION BY LEACHATE RECYCLE

START/ COMPL DATE : 07/75 - 06/77 : FUNDING : EST. - FY 77 / $ 27024
TASK/EPA CODE :C618A-7032 / R803953-02 (GRANT) PRIOR FY76 / $ 250001
PROJECT OFFICER : D R BRUNNER
INVESTIGATORS : F POHLAND GEORGIA INST. OF TECHNOLOGY
R WISCOVITCH GEORGIA INST. OF TECHNOLOGY
MILE: 02/78 -FINAL REPORT

OBJECTIVES: THE OBJECTIVES OF THE PROPOSED WORK ARE TO CONFIRM LABORATORY STUDIES OF THE LEACHATE RECYCLE CONCEPT WITH LARGER, PROTOTYPE TEST CELLS AND TO ELUCIDATE INFORMATION ON MASS FLUX OF GAS AND LEACHATE COMPONENTS, WITH PARTICULAR ATTENTION TO THE EFFECT OF EVAPOTRANSPIRATION ON THE RATES AND QUANTITIES OF LEACHATE. APPROACH: TWO DOUBLY-LINED TEST CELLS, 12 X 12 X 10 FEET HIGH, ONE COMPLETELY CLOSED FOR QUANTITATIVE GAS MEASUREMENT AND THE OTHER COVERED WITH SOIL AS IS THE USUAL PRACTICE AT LANDFILLS, WILL RECEIVE IDENTICAL VOLUMES OF WATER AND WEIGHT OF SHREDDED SOLID WASTE. THE MOISTURE CONTENT WILL BE BROUGHT TO 60 PERCENT (WET WEIGHT) BY ADDING DIGESTED SEWAGE SLUDGE DURING CONSTRUCTION. GAS WILL BE MONITORED FOR CO2, CH4, AND OTHER CONSTITUENTS AND TOTAL VOLUME; LEACHATE WILL BE MONITORED FOR BOD, COD, TOC, TOTAL AND INDIVIDUAL VOLATILE ACIDS, ALKALINITY, ACIDITY, PH, NITROGEN AND PHORUS, CHLORIDES, SULFIDES OR SULFATES, AND PERTINENT HEAVY AND ALKALINE EARTH METALS. THE SOLID WASTE OF EACH CELL WILL BE SAMPLED AT THE START AND COMPLETION OF THE TESTS FOR VISUAL AND QUANTITATIVE CHARACTERIZATION. OUTPUT: MASS FLUX WILL BE DETERMINED FOR THE CONTAMINANT MONITORED AND ANALYSES MADE TO INTERPRET AND CONTROL THE STABILIZATION PROCESS. MODIFICATIONS TO THE BASIC SYSTEMS OPERATION WILL BE MADE AS REQUIRED. THE ENERGY GENERATION POTENTIAL, METHANE PRODUCTION, WILL BE ASSESSED. RECOMMENDED DESIGN AND CONTROL PROCEDURES FOR LEACHATE CONTAINMENT AND RECYCLE WILL BE DEVELOPED. A RIGOROUS ASSESSMENT OF THE COST/BENEFITS OF THE RECYCLE CONCEPT, IN CONTEXT OF DAILY OPERATION/IMPLEMENTATION, INCLUDING ECONOMIC AND TECHNICAL FEASIBILITY, AND THE EXTENT OF POTENTIAL APPLICATION WILL BE PREPARED.

TOXICITY, INTERACTIONS, AND METABOLISM OF IMPORTANT PESTICIDES IN MAMMALS

START/ COMPL DATE : 07/75 - 06/78 : FUNDING : EST. - FY 77 / $ 68800
TASK/EPA CODE :H615F-7628 / R803965 (GRANT) PRIOR FY / 1

MILE: 08/77 -IDENTIFY SITE OF CDM-INDUCED RESPIRATORY ARREST
10/77 -COMPARE CDM SIMILARITY TO COCAINE
04/78 -CHARACTERIZE ANALGETIC ACTION OF CDM
08/77 -STUDY CDM EFFECT ON GLUCOSE METABOLISM

THERE ARE TWO BASIC OBJECTIVES: (1) TO STUDY THE TOXICOLOGY OF FORMAMIDINE PESTICIDES AND (2) TO INVESTIGATE THE ROLE OF GLUTATHIONE TRANSFERASES IN PESTICIDE METABOLISM, RELEVANT TO THE FIRST OBJECTIVE, NEUROLOGICAL, CARDIOVASCULAR, AND RESPIRATORY FUNCTIONS ARE MONITORED DURING POISONING IN CATS TO ESTABLISH SYMPTOMS AND CAUSE OF DEATH. THE SITE OF ACTION AND THE EFFECT OF METABOLISM ON TOXICITY WILL BE STUDIES. INTERACTIONS WITH DRUGS AND DIETARY AMINES WILL BE INVESTIGATED AND THERAPEUTIC PROCEDURES WILL BE DEVELOPED. RELEVANT TO THE SECOND OBJECTIVE, A SURVEY OF COMMON PESTICIDES AS POTENTIAL SUBSTRATES FOR GLUTATHIONE TRANSFERASES IS PLANNED. FURTHER ASSESSMENT OF THE TOXICOLOGICAL SIGNIFICANCE OF THIS SYSTEM, IN VIVO, WILL BE MADE. SEVERE CARDIAC DEPRESSION ACCOMPANIED BY RESPIRATORY FAILURE HAS BEEN SHOWN TO BE THE CAUSE OF DEATH AND RESPIRATORY ASSISTANCE ALONE WAS NOT THERAPEUTICALLY EFFECTIVE IN RABBITS. THE DEPRESSION EFFECT OF CDM WAS SHOWN TO BE AKIN TO THAT OF LOCAL ANESTHETICS WHILE SECONDA PRESSOR AND CONVULSIVE ACTIONS WERE OF CNS ORIGIN. IT HAS BEEN SHOWN THAT INTERACTION OF ORGANOTIN PESTICIDES WITH OTHER TOXICANTS THROUGH THE INHIBITION OF GLUTETHIONE TRANSFERASES IS UNLIKELY SINCE SIGNIFICANT INHIBITION OCCURRED ONLY AT TOXIC LEVELS. FOUR PUBLICATIONS ARE IN PRESS, ANOTHER IS IN PREPARATION AND TWO HAVE BEEN PUBLISHED. BIBLIOGRAPHIC REFERENCES: CHINN, C., A. E. LUND, AND G. K. W. INVESTIGATORS : W H FULLER UNIV. OF ARIZONA
A W WARRICK UNIV. OF ARIZONA
D M HENDRICKS UNIV. OF ARIZONA

MILE: 08/75 -PROJECT START
10/77 -PROJECT COMPLETION

OBJECTIVES: STUDY THE EFFECTIVENESS OF CONTROLLING FLOW RATE AND OF USING LIME AND HYDROUS OXIDES OF IRON AS POROUS DISPOSAL SITE LINING MATERIALS FOR RETARDING THE MIGRATION OF THE TRACE ELEMENTS AS, BE, CD, HG, NI, PB, SE, V, AND ZN THROUGH SOIL. APPROACH: PASS LANDFILL LEACHATE SPIKED WITH T RACE ELEMENTS THROUGH COLUMNS OF DISTURBED SOILS UNDER ANEROBIC CONDITIONS AT CONTROLLED FLOW RATES. WORK WILL BE SEGMENTED AS FOLLOWS: A. EVA LUATE THE INFLUENCE OF LIME AND IRON HYDROUS OXIDE LINERS ON THE MIGRATION RATE OF SELECTED TRACE ELEMENTS. B. DETERMINE THE INFLUENCE OF SOLUTION FLUX OR FLOW RATE ON ATTENUATION OF SELECTED TRACE ELEMENTS BY SOIL AND BY LINEAR MATERIALS. C. MODIFY AN EXISTING MATHEMATICAL MODEL TO PREDICT CHANGES IN QUALITY OF LEACHATE AS IT PERCOLATES THROUGH LINER MATERIA LS. D. RECOMMEND PROCEDURES FOR FIELD VERIFICATION OF THE EFFECTIVENESS OF THE LINER TECHNIQUES DEVELOPED IN THIS PROJECT. PROGRESS: LININGS OF CRUSHED LIMESTONE RETARD MOVEMENT OF METALLIC, CATION-FORMING TRACE ELEMENTS MORE EFFECTIVELY THAN ANION-FORMING TRACE ELEMENTS. RETARDA TION BY A COMBINATION OF LIMESTONE AND SOIL IS GREATER THAN THE SUM OF THE EFFECT OF EACH ALONE. THOUGH EFFECTIVE IN RETARDATION, HYDROUS IRON OXIDES CREATE ADDITIONAL PROBLEMS DUE TO THE RELEASE OF REDUCED IRON. FLUX DEPENDENT POLLUTANT RETARDATION DOES NOT APPEAR TO BE SIGNIFICANT ENOUGH TO WARRANT SUBSTANTIAL WORK OF FLOW RATE CONTROL.

06/77 -FUNDING INCREMENT
04/79 -FINAL REPORT RECEIVED

OBJECTIVES: A) TO ESTABLISH ANALYTICAL VALUES FOR CITRUS SLUDGE DEHYDRATED BY THE CARVER-GREENFIELD PROCESS THROUGH PROXIMATE ANALYSIS, TRACE MINERAL ANALYSES, DETERMINATION OF SULFUR AMINO ACID AND LYSINE CONTENT AND METABOLIZABLE ENERGY STUDIES, B) TO DETERMINE THE DEGREE OF INTERACTION BETWEEN CITRUS SLUDGE AND VITAMIN D3 IN BROILER DIETS, C) THE EVALUATION OF THE BIOLOGICAL AVAILABILITY OF PHOSPHORUS CONTAINED IN CITRUS SLUDGE, D) TO EVALUATE THE PROTEIN QUALITY OF CITRUS SLUDGE, E) THROUGH THE USE OF LOW-PIGMENT DIETS, TO ATTEMPT TO DETERMINE THE PIGMENTING VALUE OF CITRUS SLUDGE IN EGG YOLKS AND THE BREAST SKIN AND SHANKS OF BROILERS, A SERIES OF BROILER FEEDING TRIALS WILL BE USED TO DETERMINE THE METABOLIZABLE ENERGY CONTENT, PROTEIN QUALITY AND PHOSPHORUS AVAILABILITY OF CITRUS SLUDGE, THE DEGREE OF VITAMIN D DESTRUCTION BY CITRUS SLUDGE WILL ALSO BE STUDIED, THE PIGMENTING VALUE OF THE PRODUCT WILL BE DETERMINED USING WHITE CORN DIETS FOR 4-8 WEEK OLD BROILERS AND LAYING HENS.

ENVIRONMENTAL EFFECT OF UTILIZING SOLID WASTE AS A SUPPLEMENTARY POWER-PLANT FUEL

START/ COMPL DATE : 06/74 - 10/78 : FUNDING : EST. - FY 77 / $ 98000
TASK/EPA CODE :B6248-392 / R804008-02 (GRANT) PRIOR FY76 / $ 5030001
PROJECT OFFICER : R OLEXSEY

INVESTIGATORS : D A VAUGHAN BATTELLE MEMORIAL INSTITUTE
W K BOYD BATTELLE MEMORIAL INSTITUTE
H H KRAUSE BATTELLE MEMORIAL INSTITUTE
R B ENGDAHL BATTELLE MEMORIAL INSTITUTE

MILE: 08/77 -FUNDING SUPPLEMENT
10/78 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO INVESTIGATE THE BENEFITS TO THE ENVIRONMENT RESULTING FROM THE UTILIZATION OF SOLID WASTE AS A SUPPLEMENTARY FUEL IN EXISTING COAL-FIRED POWER PLANTS. THE APPROACH IS TO EVALUATE THE GASEOUS AND PARTICULATE EMISSION PLUS THE CORROSIVENESS OF COMBUSTION PRODUCTS AS A FUNCTION OF REFUSE-COAL RATIO AND AS A FUNCTION OF SULFUR CONTENT OF THE COAL. EXPERIMENTS WILL BE CONDUCTED IN AN OPERATING POWER STATION THROUGH COOPERATION OF THE CITY OF COLUMBUS, OHIO, AND AT THE HARRISBURG (PA.) WATERWALL CO. INCINERATION PLANT. FURNACE AND STACK GAS AND PARTICULATE SAMPLES WILL BE COLLECTED THROUGHOUT THE PERIODS THAT CORROSION PROBES ARE INSERTED AT SEVERAL LOCATIONS IN THE HEAT-RECOVERY PASSES. THESE PROBES WILL BE EXAMINED FOR CORROSION ATTACK AND DEPOSIT COMPOSITION FOR VARIOUS GAS AND METAL TEMPERATURES TO PROVIDE GUIDANCE IN FUTURE UTILIZATION OF SOLID WASTE AS A SUPPLEMENTARY FUEL.

MEASUREMENT OF TROPOSPHERIC AND STRATOSPHERIC TRACE GASES BY GAS CHROMATOGRAPHY

START/ COMPL DATE : 04/77 - 04/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :G603A-AI-01 / R804033-03 (GRANT) PRIOR FY76 / $ 360001
PROJECT OFFICER : P HANST

INVESTIGATORS : D R CRONN WASHINGTON STATE UNIVERSITY
R A RASMUSSEN WASHINGTON STATE UNIVERSITY
E ROBINSON WASHINGTON STATE UNIVERSITY

MILE: 02/78 -FINAL REPORT

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO O THERS. THE OBJECTIVE IS TO MAKE MEASUREMENTS OF THE VERTICAL CONCENTRATION DISTRIBUTIONS OF SELECTED TRACE GAS SPECIES IN THE TROPOSPHERE AND LOWER STRATOSPHERE. EMPHASIS WILL BE PLACED ON DETERMINATIONS OF HALOCARBONS AND NON-METHANE HYDROCARBONS. DETERMINATION OF THE CONCENTRATIONS OF THE HALOCARBON SPECIES WILL BE ACCOMPLISHED BY THE METHODS OF ELECTRON C APTURE - GAS CHROMATOGRAPHY AND GAS CHROMATOGRAPHY - MASS SPECTROMETRY WHI LE GAS CHROMATOGRAPHY WITH FLAME IONIZATION DETECTION WILL BE EMPLOYED FOR THE DETERMINATION OF THE HYDROCARBONS. SAMPLES WILL BE COLLECTED BY AIRCRAFT FLIGHTS IN THE UNITED STATES.

MEASUREMENT OF TROPOSPHERIC AND STRATOSPHERIC TRACE GASES BY GAS CHROMATOGRAPHY

START/ COMPL DATE : 04/77 - 04/78 : FUNDING : EST. - FY 77 / $ 28000
TASK/EPA CODE :G603A-AI-04 / R804033-03 (GRANT) PRIOR FY76 / $ 360001
PROJECT OFFICER : P HANST
INVESTIGATORS : D R CRONN WASHINGTON STATE UNIVERSITY
R A RASMUSSEN WASHINGTON STATE UNIVERSITY

MILE: 01/78 -REPORT ON HALOGENATED COMPOUNDS IN ATMOSPHERE

THE OBJECTIVE IS TO MAKE MEASUREMENTS OF THE VERTICAL CONCENTRATION DISTRIBUTIONS OF SELECTED TRACE GAS SPECIES IN THE TROPOSPHERE AND LOWER STRATOSPHERE. EMPHASIS WILL BE PLACED ON DETERMINATIONS OF HALOCARBONS AND NON-METHANE HYDROCARBONS. DETERMINATION OF THE CONCENTRATIONS OF THE HALOCARBON SPECIES WILL BE ACCOMPLISHED BY THE METHODS OF ELECTRON CAPTURE - GAS CHROMATOGRAPHY AND GAS CHROMATOGRAPHY-MASS SPECTROMETRY -WHILE GAS CHROMATOGRAPHY WITH FLAME IONIZATION DETECTION WILL BE EMPLOYED FOR THE DETERMINATION OF THE HYDROCARBONS. SAMPLES WILL BE COLLECTED BY AIRCRAFT FLIGHTS IN THE UNITED STATES.

CATALYTIC DESULFURIZATION AND DENITROGENATION

START/ COMPL DATE : 08/75 - 07/78 : FUNDING : EST. - FY 77 / $ 70360
TASK/EPA CODE :F623A-14 / R804123-03 (GRANT) PRIOR FY76 / $ 918781
PROJECT OFFICER : T W PETRIE
INVESTIGATORS : C N SATTERFIELD MASS. INST. OF TECHNOLOGY
M MODELL MASS. INST. OF TECHNOLOGY
J F COCCHETTO MASS. INST. OF TECHNOLOGY

MILE: 10/75 -REPORT ON HDS OF THIOPHENE AND HDN OF PYRDINE
09/76 -REPORT ON EXTENSION TO HIGH PRESSURE OF HDS AND HDN
09/77 -REPORT ON EXTENSION TO MORE COMPLEX SUBSTANCES
09/78 -SUMMARY REPORT INCLUDING MODEL OF HDS-HDN INTERACTION

CATALYTIC HYDRODESULFURIZATION (HDS) AND HYDRODENITROGENATION (HDN) REACIONS FOR THE REMOVAL OF ORGANIC SULFUR AND NITROGEN COMPOUNDS FROM LIQUID FUELS ARE BECOMING INCREASINGLY IMPORTANT AS STRICT SULFUR AND NITROGEN OXIDE EMISSION STANDARDS ARE SET, AND "DIRTIER" OILS DERIVED FROM SHALE AND COAL ATTAIN WIDER USE. A QUANTITATIVE DESCRIPTION OF THE INTERFERENCES BETWEEN THESE TWO REACTIONS, WHICH HAVE ONLY RECENTLY BEGUN TO BE STUDIED, IS NECESSARY FOR OPTIMAL DESIGN OF COMMERCIAL PROCESSING UNITS. TO DATE, WE HAVE STUDIED THIOPHENE, PYRIDINE AND QUINOLINE AS REPRESENTATIVE SULFUR AND NITROGEN COMPOUNDS IN A CONTINUOUS FLOW MICROREACTOR TO MODEL BASIC INTERACTIONS. PYRIDINE INHIBITS THIOPENE HDS UNDER ALL EXPERIMENTAL CONDITIONS USED. SULFUR COMPOUNDS EXHIBIT A DUAL EFFORT ON THE HDN OF PYRIDINE; A REACTION RATE INHIBITION GIVES WAY TO AN EHANCEMENT AT MORE SEVERE REACTION CONDITIONS. THEORETICAL CONSIDERATIONS HAVE BEEN PRESENTED TO ACCOUNT FOR EACH OF THESE EFFECTS. REACTIONS OF MORE COMPLEX COMPOUNDS AND THEIR INTERACTIVE REACTION KINETICS ARE CURRENTLY UNDER INVESTIGATION.

ASSESSMENT OF THE APPLICATION OF MULTIVARIATE ANALYSIS IN ECOLOGICAL INVESTIGATIONS OF WATER POLLUTION

START/ COMPL DATE : 11/75 - 11/79 : FUNDING : EST. - FY 77 / $ 105000
TASK/EPA CODE :M608C-030 / R804127-01 (GRANT) PRIOR FY76 / $ 800311
PROJECT OFFICER : R C SWARTZ
INVESTIGATORS : D F BOESCH VIRGINIA INST. OF MARINE SCI.
MILE: 11/77 -ANNUAL REPORT
11/79 -FINAL REPORT

THE OBJECTIVE IS THE FURTHER EVALUATION OF THE NUMERICAL TECHNIQUES OF CLARIFICATION (CLUSTER ANALYSIS) FOR USE IN ECOLOGICAL INVESTIGATIONS OF WATER POLLUTION, EXPANDING THE EXPECTED PRODUCTS OF ONGOING RESEARCH.

804150

This Research Grant involves the study of the technical and economic aspects of preparing and using densified forms of municipal solid waste as a supplementary fuel in industrial and institutional stoker coal fired boilers. Investigations will be conducted to establish methodology for preparing densified refuse derived fuel (d-RDF). Process and product characterizations will be developed to enable establishment of specifications for d-RDF. Densification forms will include pellets, briquettes, and cubettes. Independent boiler burn tests and operations will be conducted in conjunction with this research to fully characterize the concept.

MINERALOGY OF OVERBURDEN AS RELATED TO GROUNDWATER DEGRADATION IN THE STRIP MINING OF COAL

START/ COMPL DATE : 12/75 - 00/00 : FUNDING : EST. - FY 77 / $ 275000
TASK/EPA CODE :L625B-03 / R804162-01 (GRANT) PRIOR FY76 / $ 3000001
PROJECT OFFICER : B NEWPORT
INVESTIGATORS : D L KLOEPPER COLORADO SCHOOL OF MINES
J S FRYBERGER COLORADO SCHOOL OF MINES

MILE: 01/78 -OVERBURDEN MINERALOGY - GROUND WATER QUALITY CORRELATION
OBJECTIVE: THE OBJECTIVE IS TO DEVELOP A METHOD OF PREDICTING POTENTIAL GROUND WATER DEGRADATION IN STRIP COAL MINING ON THE BASIS OF THE MINERALOGY OF THE OVERBURDEN. APPROACH: THE APPROACH IS TO DETERMINE THE MINERALOGY OF CORES IN UNDISTURBED OVERBURDEN ADJACENT TO SPOIL PILES WHICH HAVE UNDERGONE EXTENSIVE CHEMICAL AND BIOLOGICAL WEATHERING. EXTENSIVE GROUND WATER QUALITY DATA WILL BE GATHERED FROM WELLS DRILLED THROUGH AND DOWN-DIP FROM SPOIL PILES. USING THIS DATA BASE, A METHOD OF PREDICTING GROUND WATER QUALITY IN POST COAL STRIP MINING OPERATIONS WILL BE DEVELOPED. CURRENT PROGRESS: THIS PROJECT WAS FUNDED ON DECEMBER 22, 1975. DUE TO ADVERSE CLIMATICAL CONDITIONS IN N.W. COLORADO, INITIAL DRILLING, CORING AND COMPLETION OPERATIONS WERE DELAYED UNTIL MARCH 22, 1976. CORING OPERATIONS HAVE BEEN PARTICULARLY SUCCESSFUL EXCEPT IN SPOIL PILES WHERE HIGH PERCENTAGE CORE RECOVERY IN THIS UNCONSOLIDATED MATERIAL HAS BEEN DIFFICULT TO ATTAIN. PORTABLE WELL PUMPING AND SAMPLING EQUIPMENT UTILIZING EXPANDABLE PACKERS FOR ZONE ISOLATION HAS BEEN SUCCESSFULLY DEMONSTRATED. LYSIMETERS AND ASSOCIATED FLUID RECOVERY SYSTEMS HAVE BEEN INSTALLED IN SELECTED WELLS. WELL SAMPLING WAS BEGUN IN JUNE 1976. ANALYTICAL DATA GENERATED FROM THE INITIAL SAMPLES WILL CONSIST OF OVER 45 PARAMETERS FROM APPROXIMATELY 25 SAMPLES. MINERALOGY OF CORE SAMPLES ARE BEING DETERMINED UTILIZING X-RAY DIFFRACTION AND X-RAY FLUORESCENCE. THE FIRST INTERIM REPORT ON THIS PROJECT IS ON SCHEDULE AND WILL BE FORTHCOMING IN OCTOBER 1976. A GRANT AMENDMENT, R-804162-01-01, IS DIRECTED TOWARD EXPANDING THE "SCOPE OF WORK" OUTLINED IN EXISTING GRANT 804162-01. THIS AMENDMENT WILL PERMIT SEVERAL ADDITIONAL MINING SITES TO BE STUDIED, THUS BROADENING THE DATA BASE TO INCLUDE VARYING MINERALOGICAL AND CLIMATOLOGICAL CONDITIONS AND STRENGTHENING THE ACCURACY AND APPLICABILITY OF THE PREDICTIVE NATURE OF FINDINGS FORMULATED IN THE ORIGINAL GRANT.

A LONGITUDINAL EVALUATION OF LEAD BODY BURDEN IN GROWING CHILDREN

START/ COMPL DATE : 05/76 - 01/79 : FUNDING : EST. - FY 77 / $ 216205
TASK/EPA CODE :D6148-052 / R804168 (GRANT) PRIOR FY76 / $ 1235001
PROJECT OFFICER : G F CRAUN
INVESTIGATORS : A H LUBIN CHILDRENS HOSP.

ASSESSMENT AND CORRELATIONAL ANALYSES OF BIOCHEMICAL, NUTRITIONAL, AND GROWTH PARAMETERS WITH THE AMOUNT OF EXPOSURE OF COMMONLY ACCEPTED SOURCES OF ENVIRONMENTAL LEAD (AIR, DUST, AND WATER) ARE BEING PERFORMED SEQUENTIALLY THROUGHOUT THE MOTHER'S PREGNANCY AND THE SUBSEQUENT OFFSPRING'S FIRST TWO YEARS OF LIFE TO DETERMINE THE RELATIVE EFFECT OF MULTIPLE SOURCES OF LEAD EXPOSURE ON THE MOTHER AND CHILD AND THE LONGITUDINAL CHANGES IN BLOOD LEAD CONCENTRATIONS AND BODY BURDEN OF LEAD IN THE GROWING INFANT AND CHILD. APPROXIMATELY 200 TO 250 WOMEN IN EACH OF THREE CITIES, COLUMBUS, OHIO; BOSTON, MASSACHUSETTS; AND NEW BEDFORD, MASSACHUSETTS, ARE BEING ENROLLED EARLY IN THE SECOND TRIMESTER OF THEIR PREGNANCIES. DIFFERENCES IN SOCIOLOGICAL AND ENVIRONMENTAL ASPECTS WHICH MAY CONTRIBUTE TO UNDUE BODY LEAD BURDEN FROM CITY TO CITY SHOULD BE ELUCIDATED. INITIAL DATA ON APPROXIMATELY 150 PREGNANT WOMEN AND ON APPROXIMATELY 10 OF THEIR OFFSPRING INDICATE A VERY DIRECT CORRELATION BETWEEN LEAD IN BLOOD IN THE MOTHER, CORD BLOOD LEAD DETERMINATIONS, AND NEWBORN INFANT LEAD VALUES. THERE ALSO APPEARS TO BE A SIGNIFICANT DIFFERENCE IN THE VALUES DETERMINED IN THE POPULATIONS OF THE DIFFERENT CITIES. OBSERVATIONS ON ENVIRONMENTAL ASPECTS SHOW A REMARKABLY CONSTANT FIGURE FOR LEAD IN AIR IN ALL CITIES, AND LEAD IN DUST RESULTS CONFIRM DUST TO BE A SIGNIFICANT SOURCE OF LEAD INTAKE FOR CHILDREN.

ELECTROLYTIC TREATMENT OF OILY WASTEWATER

START/ COMPL DATE : 04/77 - 09/78 : FUNDING : EST. - FY 77 / $ 43000
TASK/EPA CODE :B610B-142 / S804174-02 (GRANT) PRIOR FY76 / $ 1000001
PROJECT OFFICER : H B DURHAM
INVESTIGATORS : R L GEALER FORD MOTOR COMPANY
M M WEINTRAUB FORD MOTOR COMPANY
A GOLOVOY FORD MOTOR COMPANY

MILE: 04/77 -FUNDING PACKAGE SUBMITTED
05/77 -AWARD FUNDS FOR PROJECT
09/78 -FINAL REPORT RECEIVED

OBJECTIVE: DEMONSTRATE THE FEASIBILITY AND INVESTIGATE THE DURABILITY AND ECONOMICS OF THE ELECTROLYTIC PROCESS FOR TREATING OILY WASTEWATER FROM A MANUFACTURING PLANT. APPROACH: DEMULSIFICATION IS ACCOMPLISHED BY PASSING PLANT OILY WASTEWATER EMULSION THROUGH PERMEABLE IRON ELECTRODES. CURRENT PLANS AND PROGRESS: DURING THE FIRST YEAR OF THE PROGRAM, A ONE GALLON PER MINUTE ELECTROLYTIC UNIT WAS CONSTRUCTED AND PLACED IN A MANUFACTURING PLANT AND EIGHT BATCHES (ABOUT 3000 GALLONS EACH) OF THE PLANT OILY WASTEWATER WERE PROCESSED THROUGH THE UNIT. THE OIL CONTENT OF THE PROCESSED WATER GENERALLY WAS BELOW 50 PPM AND IN SEVERAL CASES BELOW 10 PPM. THE SECOND YEAR OF THE PROGRAM WILL INCLUDE OPTIMIZATION OF THIS SYSTEM WITH RESPECT TO CURRENT AND FLOW RATES AS A FUNCTION OF PLANT EFFLUENT COMPOSITION, INVESTIGATION OF THE SLUDGE FLOTATION SCHEME, AND A PRELIMINARY EXAMINATION REGARDING UTILIZATION OF THE OIL-RICH SLUDGE.

EVALUATE AN IMPROVED MANUAL PARTICLE SIZE FRACTIONATOR

START/ COMPL DATE : 09/75 - 08/79 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :G712B-BE-36 / R804190-03 (GRANT) PRIOR FY76 / $ 600001
PROJECT OFFICER : C W LEWIS
INVESTIGATORS : A R MCFARLAND TEXAS A & M UNIVERSITY SYSTEM
MILE: 09/78 -FINAL REPORT

OBJECTIVES: TO EVALUATE AND IMPROVE THE PERFORMANCE OF THE DICHOTOMOUS VIRTUAL IMPACTOR AEROSOL SAMPLER. APPROACH: A DICHOTOMOUS SAMPLER IS A DEVICE FOR COLLECTING AMBIENT AEROSOL SAMPLES IN TWO SIZE RANGES, CONSISTING OF PARTICLES WHOSE AERODYNAMIC DIAMETER IS LESS THAN, AND GREATER THAN 3.5 MICRONS. A CRUCIAL FACTOR IN OBTAINING QUANTITATIVE RESULTS WITH SUCH SAMPLERS IS THE KNOWLEDGE OF SAMPLING EFFICIENCY, AS IT DEPENDS ON BOTH PARTICLE SIZE AND WIND SPEED. BOTH MATHEMATICAL MODELLING AND WIND TUNNEL TESTS ARE BEING USED TO OBTAIN THIS INFORMATION. CURRENT PLANS /PROGRESS: A LONG SERIES OF WIND TUNNEL TESTS OF ALTERNATIVE AEROSOL INLET HEADS HAS RESULTED IN A HEAD DESIGN WHICH EXHIBITS THE GENERALLY FAVORABLE CHARACTERISTICS OF HIGH SAMPLING EFFICIENCY UP TO ABOUT 20 MICRONS, AND MINIMAL WIND SPEED DEPENDENCE. A MATHEMATICAL MODELLING STUDY WILL NEXT BE PERFORMED TO BETTER UNDERSTAND THE RESULTS SO FAR OBTAINED LARGELY BY EMPIRICAL MEANS, AND WHICH WILL MAKE POSSIBLE THE DESIGN OF FUTURE INSTRUMENTS EMPLOYING THE DICHOTOMOUS PRINCIPLE AT OTHER FLOW RATES AND CUT-POINTS. IN PARTICULAR AN EXPERIMENTAL INVESTIGATION WILL BE MMDE OF A VIRTUAL IMPACTOR WITH A 0.1 MICRON CUT-POINT.

EFFECTS OF SIZED ASBESTOS FIBERS ON CELL DNA MEMBRANE
STRUCTURE-FUNCTION, METABOLISM & CELL TRANSFORMATION (ABBREV)

START/ COMPL DATE : 06/77 - 06/78 : FUNDING : EST. - FY 77 / $ 130956
TASK/EPA CODE :D614B-059 / R804201-02 (GRANT) PRIOR FY76 / $ 953281
PROJECT OFFICER : R G TARDIFF
INVESTIGATORS : R HART OHIO STATE UNIVERSITY
D K ALLISON OHIO STATE UNIVERSITY
S HAUGHT OHIO STATE UNIVERSITY
MILE: 04/77 -ANNUAL REPORT
04/78 -FINAL REPORT

THE LONG RANGE GOAL OF THIS PROGRAM IS TO ULTIMATELY UNDERSTAND THE MECHANISMS BY WHICH ASBESTOS FIBERS INDUCE CARCINOGENESIS IN MAMMALIAN CELLS AND TO DEVELOP MEANS TO PREVENT, CONTROL OR REVERSE THE PROCESS. THE IMMEDIATE OBJECTIVES OF THIS PROPOSAL ARE: (A) TO DETERMINE WHETHER ASBESTOS FIBERS INDUCE CELLULAR TRANSFORMATION IN VITRO; (B) TO DETERMINE THE ABILITY OF ASBESTOS EITHER TO PRODUCE DNA DAMAGE (PRESUMABLY A PREREQUISITE FOR MANY CHEMICAL AND PHYSICAL CARCINOGENS) OR TO INHIBIT ITS REPAIR; (C) TO DEFINE ANY SYNERGISTIC INTERACTION BETWEEN ASBESTOS, CHEMICAL CARCINOGENS AND/OR ONCOGENIC VIRUSES; (D) USING INTEGRATED VIRUS GENES, TO EXPLORE THE EFFECTS ON GENE EXPRESSION OF SIZED ASBESTOS FIBERS WITH AND WITHOUT CHEMICAL CARCINOGENS AND CO-CARCINOGENS; (E) TO QUANTITATE THE EFFECTS OF ASBESTOS ON MEMBRANE COMPOSITION AND STRUCTURE; (F) TO DETERMINE WHETHER CHANGES IN CELL MEMBRANE FUNCTION AND STRUCTURE ARE SOLELY A CONSEQUENCE OF CARCINOGENESIS OR CONTRIBUTE DIRECTLY TO THE PROCESS AT SOME STAGE; (G) SIMULTANEOUSLY TO QUANTITATE THE EFFECTS OF ASBESTOS ON A NUMBER OF INTERMEDIARY METABOLITES, IN ORDER TO ELUCIDATE THE EFFECTS ON ENZYME REGULATION WITH AND WITHOUT THE CONTRIBUTORY EFFECTS OF SELECTED CARCINOGENS AND CO-CARCINOGENS AND (H) TO ATTEMPT DEVELOPMENT OF A CORRELATION BETWEEN THE VARIOUS PHYSIOLOGICAL PROCESSES STUDIED AND THE SUSCEPTIBILITY OF OUR VARIOUS TEST SYSTEMS TO TRANSFORMATION BY VARIOUS SIZED ASBESTOS FIBERS IN THE PRESENCE AND ABSENCE OF OTHER CARCINOGENIC AGENTS.

STUDIES ON THE MUTAGENICITY OF CHEMICAL CARCINOGENS

START/ COMPL DATE : 05/76 - 05/78 : FUNDING : EST. - FY 77 / $ 41879
TASK/EPA CODE :D6148-057 / R804202-02 (GRANT) PRIOR FY76 / $ 486001
PROJECT OFFICER : G F CRAUN
INVESTIGATORS : R J SHEEHY ATLANTA UNIVERSITY CTR. CORP.

THE OVERALL OBJECTIVES OF THIS RESEARCH PROJECT ARE TO (1) STANDARDIZE A MUTAGEN SCREENING SYSTEM (AMES BACK MUTATION TEST) WHICH IS SENSITIVE AND HAS A HIGH DEGREE OF REPRODUCIBILITY, (2) UTILIZE THIS SYSTEM TO IDENTIFY THE MUTAGENIC CHARACTER OF CHEMICAL CONTAMINANTS IN WATER AND (3) DEVELOP A FORWARD MUTAGENESIS SCREENING SYSTEM TO BE USED IN CONJUNCTION WITH THE BACK MUTAGENESIS SYSTEM. SPECIFICALLY, WE ARE CURRENTLY TESTING KNOWN CHEMICALS PRESENT IN NEW ORLEANS DRINKING WATER SUPPLIES, AS WELL AS TESTING BULK DRINKING WATER IN THE METROPOLITAN ATLANTA AREA. ONE FEATURE OF OUR RESULTS DICTATES THE NEED FOR ANOTHER TEST SYSTEM FOR CHEMICALS THAT PROVE TOO TOXIC FOR TESTING IN THE AMES SYSTEM. THEREFORE, SOME CHEMICALS ARE BEING EVALUATED BY THEIR ABILITY TO PRODUCE SINGLE STRANDED BREAKS IN DNA.

804204

The overall objectives of this research project are to (1) standardize a mutagen screening system (Ames Back Mutation Test) which is sensitive and has a high degree of reproducibility, (2) utilize this system to identify the mutagenic character of chemical contaminants in water and (3) develop a forward mutagenesis screening system to be used in conjunction with the back mutagenesis system. Specifically, we are currently testing known chemicals present in New Orleans drinking water supplies, as well as testing bulk drinking water in the metropolitan Atlanta area. One feature of our results dictates the need for another test sytem for chemicals that prove too toxic for testing in the Ames system. Therefore, some chemicals are being evaluated by their ability to produce single stranded breaks in DNA.

1. To further develop, document and elaborate biological control approaches for urban shade tree pest management.

    a. Survey for natural enemies of urban pest insects, particularly on urban vegetation and shade trees.

    b. Explore for natural enemies of
        1. Pyrrhalta luteola, the elm leaf beetle
        2. Illinoia (Macrosiphum) liriodendri, the tulip tree aphid
        3. Hyphantria cunea, the fall webworm

    c. Complete evaluations of successfully introduced parasites
        1. Trioxys curvicaudus on the linden aphid: Eucallipterus tiliae
        2. Trioxys hortorum on the elm aphid: Tinocallis platani

2. Currently we operate integrated control programs for five cities and one school district. The emphasis in this project is to further develop, document and plan to extend the biological control of urban pest insects.

NATIONAL MARINE POLLUTION MONITORING PROGRAM

START/ COMPL DATE : 12/75 - 12/78 : FUNDING : EST. - FY 77 / $ 56192
TASK/EPA CODE :P608C-12 / R804215-01 (GRANT) PRIOR FY76 / $ 6948191
PROJECT OFFICER : G HOFFMAN
INVESTIGATORS : E D GOLDBERG UNIV. OF CALIFORNIA
MILE: 12/77 -FINAL REPORT ENTITLED, "NATIONAL MARINE POLLUTION MONITORING A SURVEILLANCE OF FOUR COLLECTIVES OF POLLUTANTS IN U.S. COASTAL WATERS IS BEING CARRIED OUT THROUGH THEIR CONCENTRATIONS IN TWO SENTINEL ORGANISMS--MUSSELS AND BARNACLES. THE POLLUTANT SPECIES INCLUDE HEAVY METALS (LEAD, CADMIUM, MERCURY, SELENIUM, ZINC, SILVER AND COPPER), CHLORINATED HYDROCARBONS (DDT RESIDUES, POLYCHLORINATED BIPHENYLS, HEXACHLORBENZENE, DIELDRIN, ENDRIN, HEPTACHLOR, BENZENE HEXACHLORIDE, CIS AND TRANS CHLORDANE AND THE INSECTICIDAL DERIVATIVES OXYCHLORDANE AND HEPTACHLOR EPOXIDE); ARTIFICIAL RADIONUCLIDES (PLUTONIUM-238, PLUTONIUM 239 AND 240; AMERICIUM 241 AND CESIUM-137); AND PETROLEUM HYDROCARBONS (TO INCLUDE MEASURES OF THE CONCENTRATIONS OF ALKANES, CYCLOALKANES AND AROMATICS, INCLUDING 2, 3, 4, AND 5 RING POLYNUCLEAR CONDENSED SPECIES). THE PROGRAM INCUDES SITES OFF THE EAST, WEST AND GULF COASTS OF THE U.S. AS WELL AS OFF ALASKA, GUAM AND SAMOA. OVER TWO HUNDRED AND FIFTY SAMPLES WILL BE TAKEN DURING THE FIRST TWO YEARS OF THE PROJECT AND ANALYZED IN 8 LABORATORIES, TWO FOR EACH SET OF POLLUTANTS. INTER LABORATORY COMPARISONS ARE BEING MADE ON THE POLLUTANT ANALYSES. THE GOALS OF THE PROGRAM WILL BE THE ASSESSMENT TO THE U.S. COASTAL WATERS FOR THE SUPPORT OF MARINE RESOURCES SUCH AS FOOD FROM THE SEA, THE VITALITY OF COMMUNITIES OF MARINE ORGANISMS AND THE CONTINUED USE OF NON-LIVING RESOURCES SUCH AS BEACHES AND HARBORS AND THE PREDICTION OF FUTURE EXPOSURE LEVELS OF POLLUTANTS BASED UPON THE BEST EXISTING INFORMATION AND MODELS.

A STANDARD PROGRAM FOR ENVIRONMENTAL IMPACT ASSESSMENT - PHASE 1
ICHTHYOPLANKTON SAMPLING

START/ COMPL DATE : 12/75 - 03/78 : FUNDING : EST. - FY 77 / $ 10530
TASK/EPA CODE :P608C-05 / R804216-01 (GRANT) PRIOR FY75 / $ 649821
PROJECT OFFICER : A D BECK
INVESTIGATORS : M A HYMAN UNIV. OF RHODE ISLAND
S B SAILA UNIV. OF RHODE ISLAND

MILE: 03/78 -FINAL REPORT ENTITLED, "A STANDARD PROGRAM FOR ENVIRONMENTAL IM
IT IS PROPOSED THAT THE ENVIRONMENTAL PROTECTION AGENCY DEVELOP AN ENVIRO
NMENTAL IMPACT PROGRAM FOR A REPRESENTATIVE ESTUARINE SITE IN NARRAGANSETT
BAY, RHODE ISLAND. THESE STUDIES WOULD BE AIMED AT SELECTING AND MONIT
ORING REPRESENTATIVE IMPORTANT SPECIES, INHERENT VARIABILITY AND BIASES OF
ANY GEAR USED WILL BE DETERMINED, SPECIFICALLY AS RELATES TO THE PROBLEM
OF AVOIDANCE. PRELIMINARY STUDIES OF SMALL SCALE TEMPORAL AND SPATIAL
VARIABILITY WILL BE CONDUCTED BEFORE ESTABLISHING ONGOING MONITOR
ING PROGRAMS. THE STUDY PROPOSED HERE WILL SERVE AS THE FIRST PHASE OF THE
MUCH LONGER DURATION PROGRAM IMPLIED ABOVE. THIS STUDY IS AIMED
PRIMARILY AT UNDERSTANDING THE BIASES AND VARIABILITY INHERENT IN ICHTHYOP
LANKTON SAMPLING. PRESENTLY ACCEPTED STANDARD ICHTHYOPLANKTON GEAR WILL BE
USED TO THE GREATEST EXTENT POSSIBLE TO PERMIT COMPARISONS WITH PAST AND
ONGOING STUDIES.

804232

Work involves a $1.6 million restoration project for eutrophic Lake Lansing, used by 500,000 people. Major objectives include: testing and monitoring effective innovative dredging methods including new cutter heads, hydraulic head loss and consolidation rates for marl, peat, etc. Methods of reducing return to lake of silt and nutrients. Prepare cost curves on dredging process including size, depth, lake location, spoil areas, etc. and do likewise for a rational assessment formula to aid future engineers and contractors. These are to determine economics of storing dry peat and marl for agricultural resale. Demonstrate sandy beaches construction and also document the relationship of dredging to improvement of water quality.

The approach entails superimposing an evaluation program into an innovative dredging program for Lake Lansing. As dredging proceeds, appropriate physical and chemical monitoring would be made using in-house laboratory and soils equipment. Principal investigator will prepare plans and specifications, take bids and then give detailed resident project supervision concurrent and in part with the same personnel, evaluating the project. The project would take 6 months for final plans, 18 months for construction plus 6 months for evaluation report.

BAGHOUSE STUDY AS AN EMISSION CONTROL ON A SOLID WASTE INCINERATOR BOILER

START/ COMPL DATE : 05/76 - 08/78 : FUNDING : EST. - FY 77 / $ 67079
TASK/EPA CODE :F624A-058 / R804233 (GRANT) PRIOR FY76 / $ 650001
PROJECT OFFICER : J H TURNER
INVESTIGATORS : B MCDERMOTT NASHVILLE THERMAL TRANSFER CO
MILE: 05/76 -GRANT AWARD
09/77 -REPORT ON PRELIMINARY PERFORMANCE RESULTS
09/78 -FINAL REPORT

DETERMINE APPLICABILITY AND PERFORMANCE FOR PILOT BAGHOUSE ON WASTE TO ENERGY MUNICIPAL INCINERATOR. OPERATE PILOT BAGHOUSES ON INCINERATOR FLUE GAS FOR ONE YEAR TEST PERIOD. OBTAIN PERFORMANCE AND DURABILITY DATA ON TWO OR THREE BAG STYLES (TEFLON, GLASS). PRELIMINARY PERFORMANCE TESTING ACCOMPLISHED; ENDURANCE TESTING YET TO BE STARTED.

AIR POLLUTION AND CARDIOPULMONARY FUNCTIONS

START/ COMPL DATE : 10/76 - 10/78 : FUNDING : EST. - FY 77 / $ 154000
TASK/EPA CODE :H625F-7166 / R804256 (GRANT) PRIOR FY76 / $ 1620001
PROJECT OFFICER : W B RIGGAN
INVESTIGATORS : R A MOSTARDI UNIV. OF AKRON
B L RICHARDSON UNIV. OF AKRON
G A ATWOOD UNIV. OF AKRON

MILE: 11/76 -GRANT AWARD
11/78 -PROGRESS REPORT
11/79 -FINAL REPORT

THE BASIC STRUCTURE OF THIS EXPERIMENTAL DESIGN IS TO EXAMINE THE EFFECTS OF AIR POLLUTION ON VARIOUS CARDIOPULMONARY PARAMETERS. THE DESIGN WILL INVOLVE BOTH LONGITUDINAL AND CROSS-SECTIONAL APPLICATIONS AND I NCLUDE A NUMBER OF AGE GROUPS. THREE GEOGRAPHIC LOCATIONS WILL BE SELECTED AND INCLUDE: 1) AN AREA OF HEAVY POPULATION, 2) AN AREA OF INTERMEDIATE OR VARYING POPULATION, 3) A CLEAN AREA. IN EACH OF THE AREAS A MINIMUM OF 150 VOLUNTEERS WITHIN EACH AGE GROUP WILL BE TESTED. THE VARIOUS TESTS WHICH WILL BE CONDUCTED AND OTHER DATA COLLECTED INCLUDE: 1) VITAL DATA, 2) PULMONARY FUNCTION TESTING, 3) MAXIMAL EXPIRATORY FLOW VOLUME CURVES, 4) MULTIPLE-LOAD EXERCISE TEST, 5) ALPHA-1-ANTITRYPSIN, 6) METHEMOGLOBIN, 7) CARBOXYHEMOGLOBIN, 8) MERCURY AND CADMIUM IN BLOOD, 9) MERCURY AND ARSENIC IN URINE, 10) TRACE METALS IN HAIR, 11) QUESTIONNAIRE COMPLETION. AEROMETRIC MONITORING WILL BE CARRIED OUT AT MULTIPLE SITES WITHIN EACH OF THE THREE AREAS AND WILL INCLUDE: 1) TOTAL SUSPENDED PARTICULATE, 2) SO2, 3) NOX, 4) HYDROCARBONS, 5) OZONE, 6) TRACE METALS, 7) METEROLOGICAL DATA. THE DATA COLLECTED WILL BE ANALYZED AMONG AND BETWEE N THE AGE GROUPS USING MULTIPLE LINEAR REGRESSION AND ANALYSIS OF VARIANCE MODELS.

RECOVERY STUDIES OF PESTICIDES FROM SURFACE WATERS

START/ COMPL DATE : 03/76 - 03/78 : FUNDING : EST. - FY 77 / $ 24946
TASK/EPA CODE :A614E-17 / R804294-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J J LICHTENBERG
INVESTIGATORS : T F MCGRATH SUSQUEHANNA UNIVERSITY

THE STUDY WILL DETERMINE ACCURACY AND PRECISION DATA FOR A VARIETY OF PESTICIDES IN SURFACE AND DRINKING WATER. THE OFFICIAL EPA METHOD USING LIQUID-LIQUID EXTRACTION AND GAS CHROMATOGRAPHIC TECHNIQUES WILL BE EMPLOYED.

804303

This project is designed to develop the necessary modifications and changes in interpretations of western water laws that will facilitate the implementation of improved water management technologies thereby reducing and controlling salinity and other forms of water pollution resulting from the exercise of irrigation water rights. To accomplish this goal, four major objectives will be satisfied:

1) Describe and define the legal aspects of water quality control programs relevant to irrigated agriculture for the seventeen western states to include: (a) statutes; (b) regulations; and (c) implementing machinery.

2) Describe the degree of interface of the law between: (a) water quantity allocation and management; and (b) water quality control.

3) Relate the characteristics of the physical irrigation system (which consists of three subsystems - water delivery, farm and water removal) and appropriate technological solutions for achieving irrigation return flow quality control to the legal system (which consists of both legal parameters - water quantity and water quality) for each of the seventeen western states.

4) Prepare modifications or enactments for either or both parameters of the legal system in order to achieve irrigation return flow quality control.

The analytical approach, after collection and assimilating material on western states water quality laws and programs (the material on state water quantity laws is already available), is first to describe in general the legal system (both water quantity, and water quality) in each state, and second, to structure the legal system of each state at the three sublevels of an irrigation system.

BIOLOGICAL EVALUATION OF THE BENEFITS OF MAINTAINING A CHLORINE RESIDUAL IN PUBLIC WATER

START/ COMPL DATE : 07/76 - 06/78 : FUNDING : EST. - FY 77 / $ 64549

06/78 -PROJECT COMPLETION
09/78 -FINAL REPORT

THE OBJECTIVES OF THIS STUDY ARE TO EVALUATE THE KIND AND CONCENTRATION OF CHLORINE RESIDUAL THAT MUST BE MAINTAINED IN THE DISTRIBUTION SYSTEM TO NEUTRALIZE SIGNIFICANTLY THE PATHOGENIC ORGANISMS INTRODUCED THROUGH D EFECTS. LABORATORY EXPERIMENTS WILL BE CONDUCTED UTILIZING BACTERIA, VIRUS AND CYST MODELS IN SIMULATED DISTRIBUTION SYSTEMS. THESE ORGANISMS WILL BE ASSAYED FOR SURVIVAL UNDER CONDITIONS OF VARYING CONCENTRATIONS OF F REE AND COMBINED CHLORINE. FIELD EVALUATIONS WILL ALSO BE MADE WITH LONG T ERM, LARGE VOLUME SAMPLING OF WATER FROM DISTRIBUTION SYSTEM WITH AND WITH OUT FREE RESIDUAL CHLORINE. CHLORINE RESIDUAL DETERMINATIONS AND TOTAL AND FECAL COLIFORM ASSAYS WILL BE DONE. THE STUDY WILL, OF NECESSITY, INCLUDE EVALUATION OF CULTURE TECHNIQUES AND MATERIALS.

PATHOPHYSIOLOGY OF CO EXPOSURE IN ISCHEMIC HEART DISEASE

START/ COMPL DATE : 05/76 - 12/79 : FUNDING : EST. - FY 77 / $ 119200
TASK/EPA CODE :H601C-7222 / R804316 (GRANT) PRIOR FY76 / $ 1970001

01/78 -PRELIMINARY REPORT ON DOG DATA
07/78 -INITIATE HUMAN STUDIES
01/79 -FINAL REPORT ON DOG DATA
04/79 -FINAL REPORT ON HUMAN EXPOSURES

THE PURPOSE OF THIS INVESTIGATION WILL BE FURTHER ASSESSMENT OF THE ROLE OF CARBON MONOXIDE (CO) AS AN AGGRAVATING FACTOR IN THE PATHOPHYSIOLOGY OF ISCHEMIC HEART DISEASE AND ACUTE MYOCARDIAL INFARCTION. ANIMAL STUDIES ASSESSING THE EFFECT OF GRADED EXPOSURE TO LOW LEVELS OF CO ON REGIONAL MYOCARDIAL BLOOD FLOW, TISSUE OXYGENATION, AND LEFT VENTRICULAR FUNCTION ARE PLANNED. FURTHER STUDIES ON VENTRICULAR FIBRILLATION THRESHHOLD AND THE GENESIS OF ARRHYTHMIAS WILL BE PERFORMED. HUMAN STUDIES INCLUDE ASSESSMENT OF CO AS A FACTOR LIMITING EXERCISE PERFORMANCE, AGGRAVATING ARRHYTHMIAS AND COMPROMISING LEFT VENTRICULAR FUNCTION WILL BE CARRIED OUT. A LONG-TERM STUDY OF THE RELATIONSHIP OF CARBOXYHEMOGLOBIN LEVEL TO MYOCARDIAL INFARCTION SIZE, MORBIDITY, AND MORTALITY FROM ACUTE MYOCARDIAL INFARCTION IS BEING UNDERTAKEN IN CONJUNCTION WITH THE AREA EMERGENCY MEDICAL SERVICES AND THE OFFICE OF THE STATE MEDICAL EXAMINER.

TECHNICAL AND ECONOMIC EVALUATION OF BATEA GUIDELINES - TEXTILES

START/ COMPL DATE : 01/76 - 01/79 : FUNDING : EST. - FY 77 / $ 238000
TASK/EPA CODE :F610B-04 / R804329 (GRANT) PRIOR FY76 / $ 3400001

10/78 -TESTING OF PLANTS COMPLETE
12/78 -ECONOMIC ANALYSIS COMPLETE
02/79 -REPORT COMPLETE

THE OBJECTIVE IS TO EVALUATE THE TREATMENT EFFICIENCY OF TECHNOLOGICAL PROCESSES DEFINED BY EPA AS BATEA FOR THE TEXTILE INDUSTRY AND TO EVALUATE THE ECONOMIC ACHIEVABILITY AND IMPACT ON THE INDUSTRY RESULTING FROM THE APPLICATION OF THE TECHNOLOGIES. APPROACH IS THE CONSTRUCTION OF TWO MOBILE PILOT UNITS TO USE IN TESTING SIX DIFFERENT TECHNOLOGIES ON TWENTY-FOUR TEXTILE PLANTS REPRESENTING EACH OF THE SEVEN TEXTILE CATEGORIES LISTED IN THE FEDERAL REGISTER. THESE WILL BE ADD-ON TECHNOLOG IES (TERTIARY TREATMENT) FOR PLANTS HAVING SECONDARY TREATMENT SYSTEMS AND WHICH ALREADY MEET BPT REGULATIONS. OUTPUT IS TECHNOLOGY TRANSFER BOTH TO THE INDUSTRY AT LARGE AND THE INDIVIDUAL PLANTS.

A COMPARISON OF FOUR DAIRY MANURE MANAGEMENT SYSTEMS

START/ COMPL DATE : 02/76 - 02/79 : FUNDING : EST. - FY 77 / $ 33299
TASK/EPA CODE :L617D-33 / R804349 (GRANT) PRIOR FY76 / $ 989011

INVESTIGATORS : R O MARTIN AGWAY INCORPORATED
MILE: 02/76 -PROJECT INITIATION
02/79 -FINAL REPORT PUBLICATION

OBJECTIVES: THIS PROJECT WILL STUDY AND COMPARE FOUR DIFFERENT MANAGEMENT SYSTEMS FOR DAIRY MANURE OVER A 3-YEAR PERIOD. TOTAL COST, ENERGY USE, NUTRIENT LOSS, EFFICIENCY OF NUTRIENT UTILIZATION FOR CORN PRODUCTION, AND ENVIRONMENTAL EFFECTS OF EACH SYSTEM WILL BE COMPARED FROM THE DATA COLL ECTED DURING THIS STUDY PERIOD. APPROACH: FIVE 3-ACRE TREATMENT AREAS WILL BE UTILIZED WITH ONE DEFINED MANURE MANAGEMENT SYSTEM ASSIGNED TO EACH AREA. OUTPUT: FINAL PROJECT REPORT.

(1) Objectives: To provide professional and technical assistance; to disseminate information on all aspects of solid waste management; to provide timely input to EPA on programs, regulations, guidelines, and legislation; to facilitate the sharing of information on solid waste management between cities; to provide information to EPA on successful solid waste practices and the degree to which they exist.

(2) Approach: (a) Three group technical assistance working sessions will be held; (b) ICMA will publish three issues of Refuse Report, a newsletter of the latest happenings in solid waste management; (c) four technical assistance transfer team visits will occur responding to cities with specialized needs; (d) a special index on solid waste practices and resources will be developed; (e) ICMA's solid waste clearinghouse will be further developed and expanded.

OPTICAL DETECTION OF ASBESTIFORM PARTICLES IN FINISHED DULUTH DRINKING WATER

START/ COMPL DATE : 03/77 - 03/78 : FUNDING : EST. - FY 77 / $ 57000

R S PAFFENBARGER UNIV. OF CALIFORNIA

MILE: 04/77 -ANNUAL REPORT
04/78 -FINAL REPORT

THE OBJECTIVE OF THE PROJECT IS TO DETERMINE THE ASSOCIATION BETWEEN THE PRESENCE OF ASBESTOS FIBERS IN DRINKING WATER AND THE INCIDENCE OF CANCER IN THE POPULATION SERVED BY SUCH WATER SUPPLIES. THE STUDY WILL BE DIVIDED INTO THREE OVERLAPPING PHASES: THE FIRST PHASE DEALS WITH THE IDENTIFICATION AND DESCRIPTION OF SAN FRANCISCO BAY AREA WATERSHED AND WATER DISTRIBUTION SYSTEMS, WHICH WILL INCLUDE: THE SITE OF WATER SOURCES, THEIR GEOMORPHIC COMPOSITION, GEO-POLITICAL AREA SERVED, METHOD OF WATER TREATMENT AND MEANS OF DISTRIBUTION. THE SECOND PHASE WILL BE DIRECTED TOWARDS THE DETERMINATION OF NUMBER, SIZE AND TYPE OF ASBESTOS FIBERS PRESENT IN THE VARIOUS WATER SUPPLIES BEFORE AND AFTER TREATMENT AND AFTER DISTRIBUTION. THE THIRD PHASE WILL INVOLVE A TABULATION OF TUMOR INCIDENCE AND CANCER MORTALITY DATA FROM THE 3RD NATIONAL CANCER SURVEY CONDUCTED IN THE FIVE SAN FRANCISCO BAY AREA COUNTIES UNDER CONSIDERATION. CORRELATIONS BETWEEN THE OBSERVED OCCURRENCE OF ASBESTOS IN DRINKING WATER AND THE INCIDENCE OF HUMAN CANCER WILL BE DETERMINED USING THE INFORMATION GATHERED IN THE THREE PHASES OF THIS STUDY.

DEMONSTRATION OF ULTRAFILTRATION AND CARBON ADSORPTION FOR TREATMENT OF INDUSTRIAL LAUNDRY WASTEWATER

START/ COMPL DATE : 01/76 - 09/78 : FUNDING : EST. - FY 77 / $ 20000
TASK/EPA CODE :B610B-050 / S804367-01 (GRANT) PRIOR FY76 / $ 1300001

03/78 -END OF PROJECT PERIOD
06/78 -DRAFT FINAL REPORT
09/78 -RECEIVED FINAL REPORT

THE PURPOSE OF THIS PROGRAM IS TO INVESTIGATE ON A PILOT SCALE THE EFFECTIVENESS OF ULTRAFILTRATION (UF) AND CARBON ADSORPTION FOR THE TREATMENT OF INDUSTRIAL LAUNDERING WASTEWATERS. A FIELD DEMONSTRATION SYSTEM WITH A NOMINAL CAPACITY OF 5000 GPD WILL BE OPERATED FOR A FOUR-MONTH PERIOD ON ACTUAL LAUNDERING EFFLUENT. THE SYSTEM WILL UTILIZE FULL-SIZE SPIRAL WOUND ULTRAFILTRATION MEMBRANE MODULES. THE UF PERMEATE WILL BE FURTHER TESTED BY PASSAGE THROUGH A 2" DIAMETER CARBON COLUMN. THE PROJECT WILL ESTABLISH THE UF/CARBON ADSORPTION SYSTEM'S ECONOMICS, EFFICIENCY OF REMOVAL AND OPTIMUM OPERATING CONDITIONS. THE ECONOMICS FOR FULL-SCALE SYSTEMS OF VARYING DAILY CAPACITIES WILL BE DETERMINED. ALSO DURING THIS PROGRAM, THE POSSIBLE PRESENCE AND FATE (AFTER UF/CARBON) OF TOXIC SUBSTANCES IN INDUSTRIAL LAUNDERING WASTEWATER WILL BE INVESTIGATED. THESE STUDIES WILL BE BASED ON THE EPA LISTING OF 65 TOXIC SUBSTANCES. ANALYSES WILL BE PERFORMED BY GC/MS, SPARK SOURCE MS AND A.A.

EFFECTIVENESS OF ACTIVATED CARBON FOR REMOVAL OF TOXIC AND/OR CARCINOGENIC COMPOUNDS FROM WATER SUPPLIES

START/ COMPL DATE : 04/76 - 07/79 : FUNDING : EST. - FY 77 / $ 99158
TASK/EPA CODE :C614 -7172 / R804369-02 (GRANT) PRIOR FY76 / $ 1000001

MILE: 04/76 -GRANT AWARDED
07/77 -INTERIM REPORT
07/78 -INTERIM REPORT
07/79 -PROJECT COMPLETED AND FINAL REPORT PUBLISHED

THE COMPLEX PROBLEM OF TRACE ORGANICS CONTAMINANTS IN WATER SUPPLIES CAN BE BROADLY DIVIDED INTO TWO MAJOR CATEGORIES: 1) NATURALLY OCCURRING O RGANIC SUBSTANCES THAT ARE TRANSFORMED TO POTENTIALLY MORE HARMFUL SPECIES BY WATER TREATMENT OPERATIONS SUCH AS CHLORINATION; AND, 2) COMPOUNDS OF INDUSTRIAL, AGRICULTURAL, AND OTHER MAN-RELATED ORIGIN THAT ARE NOW INDIGENOUS TO MANY RAW WATER SUPPLIES AND WHICH RESIST REMOVAL BY CONV ENTIONAL WATER TREATMENT PRACTICE. SUBSTANTIAL EFFORT IS BEING DIRECTED BY THE U.S.E.P.A. TO RESOLUTION OF PROBLEMS ASSOCIATED WITH THE FIRST CATEGORY OF COMPOUNDS; ONE POTENTIAL SOLUTION IS TO USE ACTIVATED CARBON TREATMENT IN ADVANCE OF CHLORINATION TO ELIMINATE THE PRECURSOR COMPOUNDS. THE PROPOSED RESEARCH WILL BE DIRECTED TO REMOVAL OF THE SECOND CATEGORY OF CONTAMINANTS, TO AN EVALUATION OF THE COMPETITIVE EFFECTS THAT NATURALLY OCCURRING ORGANICS HAVE ON THE EFFECTIVENESS OF CARBON FOR REMOVAL OF THE SECOND CATEGORY OF CONTAMINANTS ON A LONG TERM CONTINUOUS BASIS, TO THE EFFECTS THAT OTHER MAJOR WATER TREATMENT OPERATIO NS HAVE ON THIS EFFECTIVENESS, AND TO QUANTIFICATION OF THE ASSOCIATED ADS ORPTION DYNAMICS TO FACILITATE OPTIMUM DESIGN AND APPLICATION METHODOLOGY.

MONITORING FOR PATHOGENIC NAEGLERIA

START/ COMPL DATE : 05/76 - 04/78 : FUNDING : EST. - FY 77 / $ 84000
TASK/EPA CODE :D607A-012 / R804375-02 (GRANT) PRIOR FY76 / $ 763001
PROJECT OFFICER : W JAKUBOWSKI
INVESTIGATORS : F M WELLINGS STATE OFF. OF LAB. SERVICES
A L LEWIS STATE OFF. OF LAB. SERVICES

MILE: 05/78 -FINAL REPORT

THE OBJECTIVE OF THIS CONTINUATION GRANT IS TO DEFINE THE DISTRIBUTION OF PATHOGENIC NAEGLERIA IN THE STATE OF FLORIDA. MULTIPLE ISOLATES HAVE B EEN MADE FROM FRESHWATER LAKES AS WELL AS A THERMALLY POLLUTED ONE. OVERWI NTERING APPEARS TO BE CONFINED TO LAKE BOTTOM SANDS AND/OR SEDIMENTS. OVER THE NEXT YEAR THIS ASPECT WILL BE OR SHOULD BE CONFIRMED. A RAPID METHOD FOR IDENTIFICATION HAS BEEN DEVELOPED BUT REQUIRES ADDITIONAL TESTING THE SPECIMENS FROM VARIOUS AREAS. IMMUNOLOGICAL AND PHYSICOCHEMICAL ASPECTS OF PATHOGENIC NAEGLERIA AND SEROPOSITIVE NONPATHOGENIC NAEGLERIA WILL BE INVESTIGATED TO DETERMINE THEIR RELATIONSHIP.

Rapid quantitative determination of beryllium via proton scattering will be investigated as a function of both scattering angle and bombarding energy. Simultaneous observation of other elements using wavelength dispersive X-ray analysis will also be evaluated. Extension of the X-ray technique in order to determine oxidation states by measurement of chemical shifts and differential population of satellite lines will be examined.

DEVELOP PATTERN RECOGNITION COMPUTER PROGRAM AND DATA BANK FOR GAS PHASE FTIR SPECTRA

START/ COMPL DATE : 01/76 - 11/78 : FUNDING : EST. - FY 77 / $ 113000
TASK/EPA CODE :K7138-122 / R804381 (GRANT) PRIOR FY76 / $ 638001

PUBLIC TECHNOLOGY, INC., IN COOPERATION WITH THE AMERICAN WATER WORKS ASSOCIATION RESEARCH FOUNDATION AND THE NATIONAL WATER WELL ASSOCIATION, WILL CONDUCT A FACT FINDING, STATE-OF-THE-ART SURVEY OF MUNICIPAL WATER TREATMENT PRACTICES INVOLVING THE USE OF OZONE AND CHLORINE DIOXIDE OVERSEAS, IN CANADA, AND THOSE INSTALLATIONS THAT ARE OPERATING IN THE UNITED STATES. THE OBJECTIVES ARE TO DOCUMENT SPECIFIC DATA ON THE KNOWN APPLICATION OF OZONE AND CHLORINE DIOXIDE FOR DRINKING WATER TREATMENT, INCLUDING DATA ON ENGINEERING DESIGN, EFFECTIVENESS, HEALTH AND SAFETY ASPECTS, AND COSTS OF USE OF BOTH CHEMICALS. FOR OZONE, SPECIFIC EMPHASIS WILL BE PLACED ON DOCUMENTING WHAT IS CURRENTLY KNOWN AND PRACTICED ON THE USE OF OZONE FOR REMOVING DISSOLVED ORGANIC MATERIALS PRIOR TO THE DISINFECTION STEP, AND ON IDENTIFICATION OF OXIDATION PRODUCTS FORMED BY TREATMENT WITH OZONE. IN THE CASE OF CHLORINE DIOXIDE, INFORMATION WILL BE GATHERED RELATED TO COSTS, METHODS OF APPLICATION, PROBLEMS, SUCCESSES, METHODS OF ANALYSIS, AND BY-PRODUCT FORMATION. ALSO, A COMPILATION OF PLANTS THAT USE C/02 BOTH AS A DISINFECTANT AND FOR TASTE AND ODOR CONTROL WILL BE MADE. THE PROJECT WILL BE ONE YEAR IN DURATION AND WILL CONSIST OF IDENTIFYING EXISTING FACILITIES WORLDWIDE CURRENTLY EMPLOYING OZONATION OR CHLORINE DIOXIDE AS PART OF THEIR WATER TREATMENT PROCESS. INFORMATION WILL BE GATHERED BY QUESTIONNAIRE AND BY SITE VISITS TO SELECTED FACILITIES IN EUROPE, CANADA, JAPAN, AND THE UNITED STATES.

HALOGENATED MATERIALS IN AN URBANIZED WATER SUPPLY

START/ COMPL DATE : 05/76 - 04/78 : FUNDING : EST. - FY 77 / $ 62595

08/77 -REPORT ON THE MICROSOMAL EFFECT WITH STRAIN IA 1538
01/78 -REPORT ON PRELIMINARY RESULTS OF MUTAGENESIS SCREENING OF URINE

OBJECTIVES: THE PROPOSED PROGRAM OF RESEARCH IS DESIGNED TO IMPROVE THE RELIABILITY AND SENSITIVITY OF THE BACTERIAL MUTAGENESIS TECHNIQUES AS A SCREEN FOR THE DETECTION OF ENVIRONMENTAL CARCINOGENS, IN ORDER TO ACHIEVE THIS OBJECTIVE THE RESEARCH IS CONCENTRATING ON ELUCIDATING THE MECHANISM OF MICROSOMAL ACTIVATION WHICH OCCURS IN THIS TECHNIQUE AND OF IMPROVING THE SPECIFICITY OF THIS PROCESS. APPROACH: THE BASIC APPROACH EMPLOYED IN THIS RESEARCH PROGRAM IS TO ANALYZE THE BIOCHEMICAL MECHA NISMS INVOLVED IN MICROSOMAL ACTIVATION. CURRENT PLANS: CURRENT RESEARCH P LANS ARE DESIGNED TO ELUCIDATE FURTHER OUR RECENT DISCOVERY THAT MICROSOME PREPARATIONS ARE THEMSELVES CAPABLE OF INDUCING A SIGNIFICANT INCREASE IN THE MUTATION RATES OF TWO STRAINS OF SALMONELLA, TA-1533 AND TA-98. SPECIFICALLY, WE PLAN TO DESCRIBE THE BIOCHEMICAL PROCESSES CARRIED OUT BY THE MICROSOMES THAT MEDIATE THIS EFFECT AND THE SUBSTANCES IN THE BACTERIAL CELLS THAT ARE ACTED UPON.

NUTRITIONAL ECOLOGY OF GREAT LAKES CLADOPHORA SP.

START/ COMPL DATE : 05/76 - 05/78 : FUNDING : EST. - FY 77 / $ 37456
TASK/EPA CODE :N608A-036 / R804402 (GRANT) PRIOR FY76 / $ 374911
PROJECT OFFICER : N A THOMAS
INVESTIGATORS : G C GERLOFF UNIV. OF WISCONSIN
MILE: 05/77 -ANNUAL REPORT
05/78 -FINAL REPORT

THE PRIMARY OBJECTIVES OF THIS PROJECT ARE TO CARRY OUT LABORATORY STUDIES ON THE NUTRITIONAL REQUIREMENTS AND CHARACTERISTICS OF CLADOPHORA GLOMERATA, TO EVALUATE ITS NUTRITION UNDER FIELD CONDITIONS, AND TO UTILIZE THE RESULTS IN EXPLAINING THE OCCURRENCE OF NUISANCE CLADOPHORA GROWTHS IN THE GREAT LAKES AND IN DEVELOPING MEASURES TO REDUCE THE GROWTHS. EMPHASIS IN THE LABORATORY ASPECTS WILL BE IN EVALUATING THE EFFECTIVENESS OF CLADOPHORA GLOMERATA IN COMPETING WITH DIATOMS AND OTHER ORGANISMS FOR P AND OTHER NUTRIENTS LIKELY TO BE CRITICAL IN THE ABUNDANT GROWTHS OF C. GLOMERATA. C. GLOMERATA AND OTHER LAKE MICHIGAN ORGANISMS WILL BE GROWN IN MIXED CULTURES AND MADE TO COMPETE FOR GROWTH-LIMITING AMOUNTS OF CRITICAL NUTRIENTS. THE MINIMUM SOLUTION CONCENTRATIONS AT WHICH C. GLOMERATA CAN ABSORB ADEQUATE P AND OTHER KEY NUTRIENTS ALSO WILL BE ESTABLISHED AND COMPARED WITH SIMILAR VALUES FOR OTHER COMPETING ORGANISMS. THE EMPHASIS IN THE FIELD WORK WILL BE TO ESTABLISH WHETHER THE AVAILABLE SUPPLY OF A SPECIFIC INORGANIC OR ORGANIC NUTRIENT IS A KEY FACTOR IN CONTROLLING NUISANCE CLADOPHORA GROWTHS IN LAKE MICHIGAN AND PARTICULARLY GREEN BAY. THESE EVALUATIONS WILL BE BY VARIOUS BIOLOGICAL ASSAYS WITH EMPHASIS ON THE TECHNIQUES OF PLANT ANALYSIS.

UTILIZATION AND/OR STABILIZATION OF PYROLYTIC OIL FROM PYROLYSIS OF AGRICULTURAL, MUNICIPAL AND OTHER WASTES

START/ COMPL DATE : 06/76 - 06/78 : FUNDING : EST. - FY 77 / $ 61750
TASK/EPA CODE :C624A-7034 / R804416-02 (GRANT) PRIOR FY76 / $ 650001

12/77 -INTERIM REPORT ON PHYSICAL PROCESSING OF PYROLYTIC OILS 2ND PRO
03/78 -COMPLETE BASIC PROCESS OPTIMIZATION
06/78 -GRANT COMPLETED
09/78 -FINAL REPORT

THE BROAD OBJECTIVE OF THIS PROGRAM IS TO MAXIMIZE THE VALUE OF PYROLYTIC OILS OBTAINED BY PYROLYSIS OF AGRICULTURAL, MUNICIPAL, FORESTRY AND OTHER WASTES SO THAT MAXIMUM RESOURCE RECOVERY AND ECONOMICAL UTILIZATION CAN BE REALIZED FROM THESE MATERIALS. IN ORDER TO ACCOMPLISH THIS OBJECTIVE, AN EXTENSIVE SEARCH AND DEVELOPMENT PROGRAM IS PROPOSED WHICH WILL DEVELOP A DATA BASE FOR EVALUATION OF THE OILS FOR USES OTHER THAN AS A FUEL. PYROLYTIC OILS HAVE POTENTIAL AS A SOURCE OF CHEMICALS, AS A CHEMICAL FEEDSTOCK, AND FOR SPECIALTY USES FOR SPECIFIC FRACTIONS OBTAINED FROM THE OILS. THIS PROGRAM WAS INITIATED JUNE 21, 1976, AND TO DATE, THE TECHNICAL LITERATURE HAS BEEN SURVEYED; A VARIETY OF DISTILLATION EXPERIMENTS HAVE BEEN CARRIED OUT WITH PYROLYTIC OIL PRODUCED FROM A CONTINUOUS LARGE SCALE PYROLYSIS OPERATION; AND A LARGE NUMBER OF BOTH PHYSICAL AND CHEMICAL TECHNIQUES AND METHODS HAVE BEEN UTILIZED IN CHARACTERIZING THE OIL AND OIL FRACTIONS. PARTICULAR ATTENTION HAS BEEN GIVEN TO LIQUID AND GAS CHROMATOGRAPHY AS TECHNIQUES FOR "FINGERPRINTING" THE OIL SAMPLES. DURING THE NEXT PROJECT PERIOD, THE MAJOR EMPHASIS OF THE RESEARCH WILL BE TO CONTINUE THE INVESTIGATION OF PROCESSING METHODS FOR PYROLYTIC OIL. BOTH PHYSICAL AND CHEMICAL METHODS WILL BE INVESTIGATED AND THESE INCLUDE EXTRACTION, COLUMN CHROMATOGRAPHY, HYDROGENATION AND THERMAL CRACKING. PYROLYTIC OIL WILL BE PRODUCED WITH A 6 INCH TUBE FURNACE UNDER CONTROLLED CONDITIONS FOR USE ON THE PROGRAM. CONCURRENT WITH THIS EFFORT, THE OIL PRODUCTS WILL BE CHARACTERIZED BY BOTH CHEMICAL AND PHYSICAL ANALYTICAL METHODS. LIQUID AND GAS CHROMATOGRAPHY WILL BE USED EXTENSIVELY AS ANALYTICAL TECHNIQUES. THE CURRENT LITERATURE WILL BE SEARCHED FOR TECHNICAL INFORMATION THAT IS RELEVANT TO THIS PROGRAM AND FOR ADDITION TO OUR LITERATURE BASE.

PYROGENIC ACTIVITY OF CARBON-FILTERED WATERS

START/ COMPL DATE : 03/76 - 05/78 : FUNDING : EST, - FY 77 / $ 58999
TASK/EPA CODE :D6148-063 / R804420-02 (GRANT) PRIOR FY76 / $ 685901
PROJECT OFFICER : H R PAHREN
INVESTIGATORS : H W WOLF TEXAS A & M UNIVERSITY SYSTEM
F SLOWEY TEXAS A & M UNIVERSITY SYSTEM
MILE: 07/78 -COMPLETE STUDY

THE OBJECTIVES OF THIS PROPOSED RESEARCH ARE 1) TO QUANTIFY THE PYROGENIC ACTIVITY OF CARBON-FILTERED DRINKING WATER SUPPLIES, AND EVALUATE THIS ACTIVITY WITH RESPECT TO A) THE GRAM-NEGATIVE ENDOTOX IN CONTENT OF THE WATER AND B) THE TOTAL AND COLIFORM COUNTS OF THE WATER, AND 2) TO FURTHER STUDY THE INHALATION ROUTE OF ADMINISTRATION OF PYROGEN-CONTAINING AEROSOLS. THIS WILL BE ACCOMPLISHED BY 1) OBTAINING S AMPLES OF WATER FROM EXISTING WATER TREATMENT PLANTS THAT UTILIZE GRANULAR ACTIVATED CARBON BEDS IN THEIR TREATMENTS AND EXAMINING SAMPLES TAKEN BEFORE THE CARBON BED, IMMEDIATELY AFTER, AND AGAIN AFTER A DISINFECTING TREATMENT. PART 2) WILL BE ACCOMPLISHED BY EXPOSING TEST ANIMALS IN A DYNAMIC CHAMBER TO INTENSELY-LADEN PYROGEN-CONTAINING AEROSOLS THUS ALLOWING QUANTITATION OF EXPOSURES. CURRENT WORK USING HIGHLY TREATED WASTEWATER EFFLUENTS HAS DEMONSTRATED AN EXTREMELY HIGH CORRELATION OF GRAM-NEGATIVE ENDOTOXIN CONTENT WITH TOTAL COUNT, A DEFINITE DECREASE IN ENDOTOXIN CONTENT THROUGH THE CARBON ADSORPTION PROCESS, A GREATER DECREASE IN ENDOTOXIN CONTENT WHEN DISINFECTED BY HIGH-PH AND OZONE AS COMPARED TO CHLORINATION AND UV IRRADIATION, AND MIXED RESULTS ON ANIMALS WHICH ARE EXPOSED TO HIGH PYROGEN-CONTAINING WATERS VIA AEROSOL OR INGESTION ROUTES -- SUGGESTING A POSSIBLE DIFFERENCE OF RESPONSE AMONG INDIVIDUAL ANIMALS.

OBJECTIVES: TO DEVELOP AN AMBIENT AEROSOL PARTICLE SIZE SPECTROMETER CAPABLE OF MEASURING IN REAL-TIME THE AERODYNAMIC SIZE DISTRIBUTION IN THE RANGE 0,05 TO 25 MICRONS IN DIAMETER, APPROACH: THE MEASUREMENT METHOD CONSISTS OF (1) CAUSING INDIVIDUAL AEROSOL PARTICLES TO OSCILLATE IN A SINUSOIDALLY VARYING ACOUSTICAL FIELD, AND (2) MEASURING BY MEANS OF A LASER DOPPLER TECHNIQUE THE PHASE LAG OF EACH PARTICLE'S MOTION RELATIVE TO THE ACOUSTICAL EXCITATION, WITH THE PHASE LAG BEING DIRECTLY RELATED TO THE AERODYNAMIC SIZE OF THE PARTICLE, CURRENT PLANS/PROGRESS: AT THE END OF THE FIRST YEAR'S WORK A FIRST PROTOTYPE SPECTROMETER HAS BEEN BUILT WHICH IS ABLE TO MEASURE AERODYNAMIC SIZE DISTRIBUTIONS IN THE 0,3 TO 5 MICRON RANGE, DURING THE SECOND YEAR THE PROTOTYPE'S PERFORMANCE WILL BE EVALUATED, AND BASIC RESEARCH WILL BE PERFORMED TO INVESTIGATE THE MOST FEASIBLE METHOD FOR EXTENDING THE SIZE RANGE, DURING THE THIRD YEAR A SECOND PROTOTYPE WILL BE BUILT WHICH SHOULD MEET THE ORIGINAL OBJECTIVE,

CHLORINATION OF AQUATIC HUMIC SUBSTANCES

START/ COMPL DATE : 07/76 - 07/79 : FUNDING : EST. - FY 77 / $ 112211
TASK/EPA CODE :C614 -7173 / R804430-02 (GRANT) PRIOR FY76 / $ 1190001

07/77 -INTERIM REPORT
07/78 -INTERIM REPORT
04/79 -PROJECT COMPLETED
10/79 -FINAL REPORT PUBLISHED

THE OBJECTIVES OF THIS RESEARCH PROJECT ARE TO A) ESTABLISH THE RELATIVE CONTRIBUTION TO TOTAL TRIHALOMETHANE PRODUCTION OF NATURAL AQUEOUS HUMIC MATERIAL IN WATERS FROM DIFFERENT SOURCES, B) CHARACTERIZE THE C HEMICAL NATURE OF THE REACTIONS THAT OCCUR BETWEEN AQUEOUS HUMIC MATERIALS AND CHLORINE, AND C) ASSESS THE WATER TREATMENT IMPLICATIONS OF P RECHLORINATION OF HUMIC-CONTAINING WATERS WITH RESPECT TO THE FORMATION OF TRIHALOMETHANES AND OTHER CHLORINATED ORGANIC SPECIES. THE EXPERIMENTAL APPROACH INCLUDES LABORATORY STUDIES AND GC/MS IDENTIFICATION OF REACTION PRODUCTS WITH DIFFERENT NATURAL HUMIC WATERS AND VARIOUS MODEL HUMIC STRUCTURES. A WIDE RANGE OF MODEL ORGANIC COMPOUNDS REPRESENTATIVE OF NATURAL HUMIC MATERIAL WILL BE CHLORINATED OVER A RANGE OF PH, CHLORINE TO CARBON RATIOS, AND TEMPERATURES REPRESENTATIVE OF CONDITIONS IN WATER TREATMENT PLANT OPERATIONS. TRIHALOMETHANES AND TOTAL ORGANIC CHLORINE CONCENTRATIONS WILL BE MEASURED. HUMIC FRACTIONS EXTRACTED FROM RAW WATER SUPPLIES WILL ALSO BE CHLORINATED, IN THE PRESENCE AND ABSENCE OF SURFACES AND TREATED IN THE SAME MANNER AS THE MODEL COMPOUNDS.

The Santa Clara Valley Water District is constructing a facility for advanced waste treatment and injection of two million gallons per day of municipal wastewater into an aquifer in the Palo Alto Bayfront area to serve as a barrier against seawater intrusion into the groundwater. As a long-term goal, this facility will be used for research to determine the feasibility of such a system for reclaiming water for potable uses.

The major objectives of the research are as follows:

1. To determine the effects the injected wastewater will have on the chemical, physical, and biological quality of the basin and injected waters.

2. To determine the effect injected wastewater will have on the hydrologic and mineralogic characteristics of the aquifer.

3. To seek the optimum quality for injected water which will result in a high-quality basin water and minimum damage to the hydrologic characteristics of the aquifer.

4. To develop generalized mathematical models for describing the movement of water, the changes in hydrologic characteristics, and resulting changes in water quality from wastewater injection in order to make the results of most value for application in other similar projects.

REMOVAL OF TRACE ORGANICS FROM WATER USING ACTIVATED CARBON AND POLYMERIC ADSORBENTS

START/ COMPL DATE : 06/76 - 06/78 : FUNDING : EST. - FY 77 / $ 15000

K W LEE CRANBROOK INSTITUTE OF SCIENC

MILE: 03/79 -FINAL REPORT

THE DISTRIBUTION OF MAJOR NUTRIENTS AND HAZARDOUS SUBSTANCES IN SAGINAW B AY WILL BE SURVEYED DUPING 15 CRUISES IN 1976. OBJECTIVES OF THE STUDY ARE TO: SUPPORT THE CONTINUING DEVELOPMENT AND VERIFICATION OF NUTRI ENT TRANSPORT AND PRODUCTIVITY MODELS; DEFINE THE DISTRIBUTION AND FATE OF HAZARDOUS SUBSTANCES IN BAY WATER SEDIMENTS, AND BIOTA. SAMPLING AND IN SITU MONITORING WILL BE CONDUCTED AT 15 PRIMARY STATIONS OFFSHORE AND 5 SECONDARY STATIONS INSHORE (I.E., MARSH AND ISLAND LITTORAL ZONES). SAMPLES OF SECTOR, SURFACE FILMS, SEDIMENTS AND AQUATIC ORGANISMS WILL BE ANALYZED FOR METALS (ZINC, COPPER, CADMIUM) AND ORGANIC CONTAMINANTS (CHLORINATED HYDROCARBONS, POLYNUCLEAR AROMATIC HYDROCARBONS, PHTHALATE ESTERS). THESE AND SUPPLEMENTAL DATA WILL BE USED TO DEVELOP A DESCRIPTION OF MASS BALANCE FOR SAGINAW BAY. ALL CRUISES WILL COINCIDE WITH SATELLITE (ERTS) COVERAGE OF THE AREA. THIS WORK IS PART OF A CONTINUING EPA STUDY OF WATER QUALITY DYNAMICS IN SAGINAW BAY, BEGUN IN 1973.

804443

Semi-empirical characteristic time correlations for pollutant emissions developed for simplified aircraft gas turbine combustors will be compared with exhaust emissions data for existing aircraft engines to test their applicability for the latter. The previous work indicates that an optimum geometry for minimum emissions can be defined for given combustor operating conditions and that the optimum simplified turbine combustor cannot meet 1979 Class T2 EPA emissions standards. If the correlations can be extended to more representative aircraft combustors, then it should prove possible to determine if the optimum combustor can satisfy the appropriate EPA aircraft standards; the work should thus prove helpful in exploring the stringency of the standards.

BIOLOGICALLY MEDIATED CORROSION AND DETERIORATION OF WATER QUALITY IN WATER DISTRIBUTION SYSTEMS

START/ COMPL DATE : 04/76 - 03/78 : FUNDING : EST. - FY 77 / $ 61140

04/81 -COMPLETE GUIDELINES DOCUMENT
07/81 -FINAL REPORT PUBLISHED

THE OBJECTIVES OF THE RESEARCH PROJECT ARE TO: 1. DETERMINE THE EXTENT AND NATURE OF WATER QUALITY PROBLEMS ORIGINATING IN WATER DISTRIBUTION SYSTEMS IN THE U.S. 2. CONDUCT LABORATORY STUDIES TO ASSESS THE POTENTIAL FOR A TREATED WATER TO PROMOTE SEDIMENT DEPOSITION AND MICROBIAL GROWTH IN DISTRIBUTION SYSTEMS. 3. DETERMINE THE ROLE OF MICROORGANISMS IN MEDIATING CHEMICAL CHANGES OBSERVED IN DISTRIBUTION SYSTEMS. 4. DETERMINE REMEDIAL MEASURES FOR CONTROLLING SEDIMENT DEPOSITION, ORGANISM GROWTH AND QUALITY DETERIORATION. 5. PREPARE A GUIDELINES DOCUMENT FOR USE BY WATER UTILITIES FOR ASSESSING AND CONTROLLING WATER QUALITY PROBLEMS IN DISTRIBUTION SYSTEMS. A NATION-WIDE MAIL SURVEY, FOLLOWED BY SELECTED SITE VISITS, WILL BE MADE TO DETERMINE THE EXTENT AND NATURE OF WATER QUALITY PROBLEMS IN DISTRIBUTION SYSTEMS. LABORATORY STUDIES WILL BE CONDUCTED USING PIPE LOOPS TO DETERMINE THE WATER QUALITY CHANGES UNDER VARIED CONDITIONS OF INPUT WATER QUALITY. ALTERNATE METHODS TO CONTROL THE WATER QUALITY DETERIORATION IN LABORATORY PIPE LOOPS WILL ALSO BE TESTED.

MODELING FOR 208 AREA-WIDE WASTE MANAGEMENT PLANNING IN NON-DESIGNATED AREAS

START/ COMPL DATE : 05/76 - 05/78 : FUNDING : EST. - FY 77 / $ 35000

10/77 -FINAL REPORT - BASIN-WIDE ASSESSMENT METHODOLOGY
12/77 -FINAL REPORT - COEFFICIENT ESTIMATION TECHNIQUES
12/77 -FINAL REPORT - COMPUTERIZED METHODOLOGY

THE RESEARCH WILL DEVELOP A PLANNING TOOL FOR WATER QUALITY ANALYSIS IN NON-DESIGNATED 208 PLANNING REGIONS. THE TOOL WILL INCLUDE A MODEL FOR PRE LIMINARY SCREENING TO ISOLATE PROBLEMS AREAS OF POINT AND NON-POINT WASTES AND EVALUATE INFORMATION FOR FOLLOW-UP DETAILED MODELING TO ASSESS THE IMPACT OF WASTE MANAGEMENT ALTERNATIVES. THE PLANNING MODEL WILL FUNCTION WITH A LIMITED DATA BASE, AND WILL PROVIDE HIGH AND LOW ESTIMATES FOR SIM ULATION RESULTS. THE OUTPUT WILL BE DESIGNED FOR EASE OF INTERPRETATION BY THE PLANNER. THE NON-POINT SOURCE DATA BASE AND THE LOADING FUNCTIONS DEVELOPED BY MIDWEST RESEARCH INSTITUTE (R804743-01) WILL BE USED TO ES TIMATE POLLUTANT FLUX FROM WATERSHEDS. RIVERS, ESTUARIES, AND IMPOUNDMENTS WILL BE ACCOMMODATED AS WELL AS STORM WATER RUNOFF. SEVERAL APPROACHES TO WATER QUALITY MODELING AND ANALYSIS ARE INCLUDED TO OFFSET THE POTENTIAL BIAS OF ANY SINGLE METHOD. THE PROJECT WILL BE USEFUL TO PROVIDE PRESCRE ENING FOR A LARGE AREA AND TO FOCUS ON REGIONS NOT CONFORMING TO THE GOALS OF PUBLIC LAW 92-500, ESPECIALLY BECAUSE IT WILL BE EASILY APPLIED WITH A LIMITED DATA BASE. SUBSTANTIAL SAVING IN PLANNING COST IS EXPECTED WITHOUT SACRIFICING ACCURACY IN ISOLATING PROBLEM AREAS.

ORIGIN, VIRULENCE, GROWTH, AND CONTROL OF COLIFORMS IN DRINKING WATER EMANATING FROM WOODEN TANKS

MILE: 12/77 -REPORT ON WORKABLE DESIGN TO CONVERT MULTIPLE HEARTH FURNACE FR
09/78 -REPORT ON MATERIAL BALANCE AROUND INCINERATION AND PYROLYSIS UN

THE PRIMARY OBJECTIVE OF THIS PROJECT IS TO DEVELOP A WORKABLE DESIGN FOR CONVERSION OF A PLANT SCALE MULTIPLE HEARTH SLUDGE INCINERATION SYSTE M TO PYROLYTIC OR LIMITED AIR MODE OF OPERATION. THE SLUDGE WILL BE DEWATE RED ON A FILTER PRESS AND PYROLYZED IN A PILOT PLANT 36 INCH I.D. MULTIPLE HEARTH UNIT. FUEL EFFICIENCY, EMISSIONS POTENTIAL AND COST WILL BE EVALUATED. THE PROJECT HAS BEEN EXTENDED TO INCLUDE AN OBJECTIVE OF MAKING A MATERIAL BALANCE FOR INCINERATION OF SLUDGE IN THE MULTIPLE HEARTH FURNACE WHEN IT INCINERATES SLUDGE BY THE STANDARD OPERATION AND BY THE PYROLYTIC SYSTEM OR STARVED AIR MODE OF OPERATION. SPECIAL ATTENTION WILL BE GIVEN TO THE PARTICULATE EMISSIONS TO THE ATMOSPHERE WHICH CAN AFFECT THE RESPIRATORY SYSTEM FOR BOTH METHODS OF OPERATION. PARTICULATES OF THE SIZE RANGE 0-1, 1-3 AND 3-5 AND GREATER THAN 5 MICRONS WILL BE DETERMINED.

AEROSOL MODELING

START/ COMPL DATE : 10/76 - 10/81 : FUNDING : EST. - FY 77 / $ 16535
TASK/EPA CODE :G603A-AH-06 / R804470-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W E WILSON
INVESTIGATORS : G R BROWN CLARK COLLEGE
MILE: 06/78 -REPORT ON GAS AEROSOL REACTIVE RATES
OBJECTIVES: COORDINATE PROGRAMS TO DEVELOP SUB-MODELS FOR CHEMICAL AND PHYSICAL PROCESSES OF AEROSOLS IN THE ATMOSPHERE. APPROACH: COMBINE NUMERICAL SUB-MODELS FOR PROCESSES INCLUDING NUCLEATION, CONDENSATION, GAS-AEROSOL CHEMICAL REACTIONS, COAGULATION, DRY DEPOSITION AND DISPERSION. CURRENT PLANS/PROGRESS: EXTRAMURAL WORK HAS PRODUCED A MODEL THAT INCORPORATES THESE PROCESSES. CALCULATIONS HAVE BEEN PERFORMED FOR THE TRANSPORT OF SULFURIC ACID GENERATED BY CATALYST-EQUIPPED AUTOMOBILES AND THE TRANSPORT OF DUST IN A SOUTHWESTERN CITY. REFINEMENTS TO THE MODEL ARE TO BE MADE AS CHEMICAL RATE DATA FOR GAS-AEROSOL REACTIONS BECOME AVAILABLE.

DEVELOPMENT OF FIELD VIRUS CONCENTRATION TECHNOLOGY

START/ COMPL DATE : 11/76 - 04/79 : FUNDING : EST. - FY 77 / $ 43000

MILE: 04/78 -INTERIM REPORT
04/79 -FINAL REPORT

OBJECTIVES: THE OVERALL OBJECTIVE OF THIS STUDY IS TO OPTIMIZE A FLOW -THROUGH, CLAY-FILTER MEDIA SYSTEM FOR RECOVERING SMALL NUMBERS OF VIRUSES FROM LARGE VOLUMES OF WATER. A HIGH RATE SYSTEM, CAPABLE OF CONCENTRA TING AND RECOVERY OF PARTICULATE-ASSOCIATED AS WELL AS "FREE" VIRUSES FROM AT LEAST 100 GALLON VOLUMES OF A VARIETY OF WATERS, IS SOUGHT. APPROACH: CURRENT EFFORTS WILL CONCENTRATE ON THREE ASPECTS OF THE STUDY: A. CONTINUED EVALUATION OF CANDIDATE FILTER SYSTEMS CAPABLE OF PR OVIDING A SUSTAINED HIGH FLOW RATE IN CONJUNCTION WITH THE USE OF THE BENT ONITE VIRUS CONCENTRATION PROCEDURE. B. EACH CANDIDATE FILTER MEDIA SYSTEM WILL BE EVALUATED IN TERMS OF THE OPTIMAL VIRUS ELUTION SYSTEM REQUIRED. FACTORS TO BE CONSIDERED ARE SYSTEM HYDRAULICS, SYSTEM MATERIALS (COMPOSITION AND AMOUNT) AND VOLUME AND TYPE OF ELUANT. C. SUCCESSFUL BENCH SCALE FILTER-ELUTION SYSTEMS WILL BE UPGRADED IN PROTOTYPE SO THAT MINIMUM TEST VOLUMES OF 100 GALLONS CAN BE PROCESSED. FIELD TESTING IN A VARIETY OF WATERS WILL BE INITIATED. THE COMPARATIVE EVAL UATION OF THE DEVELOPED METHODOLOGY WITH COMMERICAL FLOW-THROUGH VIRUS CON CENTRATION SYSTEMS WHICH CAN HANDLE COMPARABLE VOLUMES OF DIFFERENT WATERS WILL BE CONDUCTED. PROGRESS: THE USE OF THE BENTONITE CONCENTRATION PROCEDURE CONTINUES TO BE THE PROCEDURE OF CHOICE FOR CONCENTRATING PARTICULATE-ASSOCIATED AS WELL AS "FREE" VIRUSES FROM NATURAL WATERS. A FLOW-THROUGH PROCEDURE USING DIATOMACEOUS EARTH AS A FILTER AID HAS BEEN SHOWN TO BE EFFECTIVE. HOWEVER, HARDWARE LIMITATIONS HAVE RESULTED IN LIMITED SUCCESS IN DEALING WITH LARGE VOLUMES. MODIFICATIONS TO THE FILTRATION SYSTEM IS PLANNED ALONG WITH THE EVALUATION OF ALTERNATE PROCESSES.

EFFECTS OF POLLUTANTS ON MICROBIAL ACTIVITIES IN ESTUARINE SURFACE FILMS

START/ COMPL DATE : 05/76 - 05/79 : FUNDING : EST. - FY 77 / $ 40000

MILE: 08/77 -LABORATORY STUDIES COMPLETED
09/77 -GREENHOUSES CONSTRUCTED
08/77 -FINAL REPORT COMPLETED

OBJECTIVES: THE FEASIBILITY OF USING INDUSTRIAL WASTE HEAT TO CONTROL THE ENVIRONMENT OF GREENHOUSES WILL BE EVALUATED RELATIVE TO THREE MAJOR OV ERALL OBJECTIVES: A, TESTING THE CAPABILITIES OF THE ENVIRONMENTAL CONTROL SYSTEM; B, DETERMINING THE EFFECTS OF THE GREENHOUSE ENVIRONMENTS ON THE PRODUCTION OF ORNAMENTAL AND VEGETABLE BEDDING PLANTS, CUT-FLOWERS, AND FOLIAGE PLANTS, AND C, EVALUATING THE OVERALL ECONOMICS OF THE SYSTEM. APPROACH: TWO PLASTIC GREENHOUSES, 27' X 72' QUONSET-TYPE, W ILL BE USED; ONE WILL SERVE AS THE CONTROL AND THE OTHER AS THE WASTE HEAT RESEARCH GREENHOUSE. CONVENTIONAL ENVIRONMENTAL CONTROL WILL BE USED IN THE CONTROL GREENHOUSE WHILE BOTH HEATING AND COOLING OF THE RESEARCH GRE ENHOUSE WILL EMPLOY AIR DRAWN THROUGH A CEL-DEK PAD. HEATING WILL BE EFFEC TED BY PASSING AIR THROUGH THE CEL-DEK PAD CONTAINING COOLING WATER HEATED BY A BOILER PRIOR TO DISTRIBUTING THE AIR IN THE RESEARCH GREENHOUSE. CO OLING WILL BE EFFECTED BY REVERSING THE AIR FLOW DIRECTION. ORNAMENTAL AND CUT-FLOWER, FOLIAGE PLANT, AND VEGETABLE SPECIES, WHICH WERE SELECTED IN EARLIER STUDIES WILL BE GROWN IN THE YEAR-LONG GREENHOUSE PRODUCTION PHASE OF THE STUDY. ECONOMIC STUDIES WILL BE MADE FOR EACH CROP TO ASSESS CUSTOMER ACCEPTANCE AND PRODUCTION COSTS. OUTPUTS: THE FINAL REPORT FOR THE PROJECT WILL PROVIDE DATA, METHODS, AND RESULTS RELATIVE TO THE HORTICULTURAL, ENGINEERING AND ECONOMIC OBJECTIVES OF THE STUDY.

NUTRIENT AND PLANKTON RELATIONSHIPS IN NORTHERN LAKE MICHIGAN

START/ COMPL DATE : 04/76 - 04/78 : FUNDING : EST. - FY 77 / $ 153000
TASK/EPA CODE :N608A-017 / R804503-01 (GRANT) PRIOR FY76 / $ 4355211

J E GANNON UNIV. OF MICHIGAN
R A MOLL UNIV. OF MICHIGAN
M S SIMMONS UNIV. OF MICHIGAN

MILE: 07/78 -FINAL REPORT DUE

THE PURPOSE OF THIS INVESTIGATION IS THE CHARACTERIZATION OF NORTHERN LAKE MICHIGAN IN TERMS OF PHYSICAL, CHEMICAL AND BIOLOGICAL ENVIRONMENTS AND TO PROVIDE DATA FOR COMPARISON WITH FUTURE STUDIES OF THE DEGREE AND RATE OF ENVIRONMENTAL CHANGE. SOME OF THE OBJECTIVES ARE: 1. TO DETERMINE THE VERTICAL, HORIZONTAL AND SEASONAL VARIATIONS IN SELECTED NUTRIENTS AND OTHER CHEMICAL AND PHYSICAL PARAMETERS, 2. TO DETERMINE THE EFFECTS OF ISLANDS AND THEIR ASSOCIATED MORPHOMETRY ON ENVIRO-CONDITIONS AND TO CONTRAST ENVIRONMENTAL CONDITIONS NEAR ISLANDS WITH NEARSHORE ARE AS OF THE MAINLAND, 3. TO ANALYZE PHYTOPLANKTON, ROTIFER, AND CRUSTACEAN Z OOPLANKTON SPECIES COMPOSITION AND ABUNDANCE IN NORTHERN LAKE MICHIGAN, 4. TO UTILIZE DATA ON PHYTOPLANKTON AND ZOOPLANKTON COMMUNITY STRUCTURE AS AN INDICATOR OF THE TROPHIC STATUS OF WATERS IN NORTHERN LAKE MICHIGAN, 5. TO PROVIDE PHYTOPLANKTON AND ZOOPLANKTON DATA THAT WILL BE USEFUL IN C ONJUNCTION WITH OTHER PARTS OF THE STUDY TO ASSESS BIOLOGICAL RESPONSES TO NUTRIENT CONDITIONS IN NORTHERN LAKE MICHIGAN WATERS.

(1) The objectives of this project are to demonstrate a new protein precipitation and by-product recovery process which will establish the feasibility of the meat industry meeting the ammonia limits in National effluent guidelines and to demonstrate the advantages of the process prior to discharging to a municipal treatment system.

(2) The approach is to operate and closely monitor a full-scale treatment plant which will be constructed and owned by Sterling Colorado Beef Company. The operation is to optimize removal of nitrogen and other pollutants and document their use and marketability in by-products.

(3) The Company has selected and ordered several major pieces of equipment made in Europe. Minor pieces of equipment and the solid handling equipment remain to be selected. Installation of the equipment and shakedown operations are to be completed prior to beginning the monitoring.

PROBABILITY BASED MATCHING (PBM) AND SELF TRAINING INTERPRETIVE AND RETRIEVAL SYSTEM (STIRS)

START/ COMPL DATE : 07/76 - 01/79 : FUNDING : EST. - FY 77 / $ 59112

MILE: 07/76 -AWARD GRANT
12/77 -ANNUAL REPORT
01/79 -FINAL REPORT

THE PBM SYSTEM FOR MASS SPECTRAL IDENTIFICATION WAS DEVELOPED AT CORNELL UNIVERSITY, AN IMPROVED VERSION OF THE PROGRAM WAS DEVELOPED AT CORNELL UNDER AN EPA RESEARCH GRANT. THE PRESENT TASK WILL INVOLVE DEVELOPING MINI-COMPUTER PROGRAMS THAT WILL PERMIT EPA MASS SPECTROMETRY LABORATORIES TO UTILIZE PBM ON THEIR OWN DATA SYSTEMS. THE PROGRAMS DEVELOPED WILL BE EVALUATED FOR THEIR ABILITY TO IDENTIFY IMPURE ORGANIC MATERIALS FOUND AS WATER POLLUTANTS. A MAJOR LIMITATION OF THE STIRS IN POLLUTANT IDENTIFICATION IS THE NECESSITY OF THE USERS KNOWING THE MOLECULAR WEIGHT OF THE UNKNOWN. STIRS WILL BE MODIFIED TO CORRECT THIS REQUIREMENT.

DEMONSTRATE & EVALUATE RECLAMATION, STABILIZATION & EROSION CONTROL OF STRIP MINED LAND FOR AGRICULTURAL USE USING MUNICIPAL SEWAGE

START/ COMPL DATE : 07/76 - 11/79 : FUNDING : EST. - FY 77 / $ 100000

MILE: 07/76 -PROJECT START
11/79 -FINAL REPORT PUBLISHED

OBJECTIVES: 1) TO DETERMINE THE FEASIBILITY OF USING MUNICIPAL SEWAGE SLUDGE TO RECLAIM AND VEGETATE LAND DISTURBED BY MINING ACTIVITIES; 2) TO EVALUATE METHODS FOR THE PROCESSING, TRANSPORTATION, SPREADING AND INCO RPORATION OF THE SLUDGE INTO THE LAND; 3) TO DEMONSTRATE APPLICATION RATES THAT WILL MAXIMIZE BENEFITS TO SOILS, IMPROVE WATER QUALITY, AND MAKE L ANDS AGRICULTURALLY PRODUCTIVE; 4) TO EVALUATE THE EFFECT OF VARIED SLUDGE APPLICATIONS ON VEGETATION ESTABLISHMENT AND GROWTH (GRASS, LEGUME AND TREE SPECIES), INCLUDING FOLIAR ANALYSIS TO DETERMINE NUTRIENT UPTAKE AND POTENTIAL HEAVY METAL TOXICITY; 5) TO EVALUATE THE EFFECT OF THE SLUDGE APPLICATIONS ON THE CHEMICAL QUALITY OF PERCOLATING RECHARGE WATER; 6) TO DETERMINE THE DEGREE OF SITE AMELIORATION RESULTING FROM THE SLUDGE APPLICATION BY MONITORING PHYSICAL AND CHEMICAL CHANGES OF THE SURFACE SPOIL OR REFUUE MATERIAL; 7) TO EVALUATE THE EFFECT OF THE SLUDGE APPLICATION ON THE QUALITY OF THE GROUNDWATER AND/OR THE QUALITY OF THE NEAREST RECEIVING STREAM AND/OR SURFACE WATER RUNOFF BY A MO NITORING PROGRAM. PROJECT DESCRIPTION: THE PROPOSED PROJECT CONTAINS THREE PHASES. PHASE I IS CONCERNED WITH THE PROCESSING OF SEWAGE SLUDGE AT THE SEWAGE TREATMENT PLANT AND ITS TRANSPORT TO AND DELIVERY AT THE STRIP MINE SITES. PHASE II CONCERNS THE APPLICATION OF THE SLUDGE TO THE LAND AND THE REVEGETATION MEASURES NECESSARY TO RETURN THE LAND TO PRODUCTIVE USE. PHASE III IS PROJECT EVALUATION.

DEVELOPMENT OF CHRONOEPIDEMIOLOGIC METHODS WITH REFERENCE TO CARDIOPULMONARY CONDITIONS

START/ COMPL DATE : 06/76 - 06/79 : FUNDING : EST. - FY 77 / $ 53000
TASK/EPA CODE : H601C-7280 / R804512 (GRANT) PRIOR FY76 / $ 600001
PROJECT OFFICER : R J HORTON
INVESTIGATORS : F HALBERG UNIV. OF MINNESOTA
A REINBERG UNIV. OF MINNESOTA
E HALBERG UNIV. OF MINNESOTA
L TONG UNIV. OF MINNESOTA
G CORNELISSEN UNIV. OF MINNESOTA
J LEE UNIV. OF MINNESOTA

MILE: 06/76 -GRANT AWARDED
06/77 -PROGRESS REPORT AND GRANT CONTINUATION
06/78 -PROGRESS REPORT AND GRANT CONTINUATION APPLICATION
06/79 -FINAL REPORT

OBJECTIVES: EXISTING DATA FROM SELECTED STUDIES OF CARDIOPULMONARY CONDITIONS (E.G., PANEL STUDIES OF AIR POLLUTION EFFECTS) WILL BE ANALYZED BY METHODS ACKNOWLEDGING THE EXISTENCE OF BIOLOGICAL AS WELL AS ENVIRONMENTAL PERIODICITIES. RECOMMENDATIONS WILL BE DEVELOPED FOR THE DESIGN AND ANALYSIS OF FUTURE EPIDEMIOLOGIC STUDIES SO THAT PREDICTABLE BIOLOGIC VARIABILITY (RHYTHMS AND TRENDS) CAN BE SEPARATED FROM EFFECTS OF ENVIRONMENTAL FACTORS. APPROACH AND PLANS: STATISTICAL METHODS (INCLUDING THE LEAST-SQUARES FITTING OF COSINE MODELS) WILL BE USED TO QUANTITATIVELY DEFINE CHARACTERISTICS OF RESOLVABLE RHYTHMS, PREFERABLY CIRCADIAN, ABOUT-WEEKLY (CIRCASEPTAN), CIRCANNUAL RHYTHMS AS WELL AS RHYTHMS WITH OTHER PERIODS IN CIRCULATORY AND RESPIRATORY FUNCTION OF HEALTHY SUBJECTS LIVING IN RELATIVELY POLLUTION-FREE ENVIRONMENTS. EXTENSIVE TIME SERIES (E.G., MEASUREMENTS OF HEART RATE, BLOOD PRESSURE AND PEAK EXPIRATORY FLOW 5 OR MORE TIMES DAILY FOR SEVERAL YEARS) ARE ALREADY AVAILABLE FOR THIS PURPOSE. MORBIDITY DATA (E.G., FROM APPROPRIATE PANEL STUDIES SPONSORED BY THE ENVIRONMENTAL PROTECTION AGENCY) WILL BE ANALYZED AGAINST THIS BACKGROUND, USING RHYTHMOMETRIC AND OTHER STATISTICAL PROCEDURES (E.G., CROSS SPECTRAL ANALYSIS). ON THE BASIS OF THIS EXPERIENCE, A FLOW CHART WILL BE DEVELOPED INTEGRATING OLD AND NEW COMPUTER PROGRAMS AND PROVIDING INDICATIONS FOR THE DESIGN AND ANALYSIS OF EPIDEMIOLOGIC TIME SERIES IN GENERAL. PRIMARY EMPHASIS WILL BE PLACED ON CHRONOEPIDEMIOLOGIC STUDIES PERMITTING THE INFERENTIAL STATISTICAL ISOLATION OF RHYTHMS. SUCH CHRONOEPIDEMIOLOGIC CRITERIA SHOULD BE PARTICULARLY PERTINENT AND SENSITIVE FOR AIR POLLUTION MONITORING WITH A VIEW OF HEALTH AND DISEASE.

AIR RESPONSE OF PLANTS TO AIR POLLUTANTS

START/ COMPL DATE : 06/76 - 05/78 : FUNDING : EST. - FY 77 / $ 76475
TASK/EPA CODE :M602A-007 / R804513-02 (GRANT) PRIOR FY76 / $ 900001
PROJECT OFFICER : L C RANIERE

MILE: 05/78 -FINAL REPORT

OBJECTIVES: (1) TO DETERMINE WHETHER CONCURRENT EXPOSURE TO MIXTURES OF HYDROGEN FLUORIDE AND OZONE OR HYDROGEN FLUORIDE AND NITROGEN DIOXIDE PRODUCES INTERACTIVE EFFECTS (ANTAGONISM OR SYNERGISM) ON THE GROWTH, YIELD OR ACCUMULATION OF FLUORIDE BY VEGETATION; (2) TO PROVIDE QUANTITATIVE ESTIMATES OF THE EFFECTS OF AMBIENT OXIDANTS ON THE GROWTH, DEVELOPMENT AND YIELD OF ECONOMICALLY-IMPORTANT PLANTS; (3) TO PROVIDE QUANTITATIVE ESTIMATES OF THE EFFECTS OF AMBIENT RAINFALL AND SIMULATED ACIDIC RAIN ON THE GROWTH, DEVELOPMENT AND YIELD OF CROP PLANTS. APPROACHES: FIELD EXPOSURE CHAMBERS, GREENHOUSES AND CONTROLLED ENVIRONMENT CHAMBERS SPECIALLY DESIGNED FOR THESE STUDIES WILL BE USED TO EXPOSE VEGETATION TO CONTROLLED CONCENTRATIONS OF POLLUTANTS. DOSE-RESPONSE RELATIONSHIPS WILL BE DETERMINED TO PROVIDE A BASIS FOR THE DEVELOPMENT OF PREDICTIVE MODELS. PROGRESS: WE HAVE FOUND THAT (1) YIELDS OF BEANS AND TOMATOES ARE REDUCED BY AMBIENT OXIDANTS OCCURRING IN YONKERS, NEW YORK; (2) SULFUR DIOXIDE MAY LOWER OR HAVE NO EFFECT ON THE ACCUMULATION OF FLUORIDE IN PLANTS EXPOSED SIMULTANEOUSLY TO HYDROGEN FLUORIDE AND SULFUR DIOXIDE DEPENDING ON THE PLANT SPECIES AND POLLUTANT CONCENTRATIONS; AND (3) REPEATED EXPOSURE TO SIMULATED ACIDIC RAIN CAUSES NECROTIC LESIONS ON SUSCEPTIBLE HERBACEOUS PLANT SPECIES WHEN PH VALUES ARE LESS THAN 3.4 AND ON NEEDLES OF EASTERN WHITE PINE TREES WHEN PH VALUES ARE LESS THAN 2.6.

DETERMINATION AND PREDICTION OF CHEMICAL FORMS OF TRACE METALS IN SEWAGE SLUDGES AND SLUDGE-AMENDED SOILS

START/ COMPL DATE : 08/76 - 08/79 : FUNDING : EST. - FY 77 / $ 84811

THE OBJECTIVE OF THE PROPOSED RESEARCH IS TO DEFINE THE CHEMICAL EQUILIBRIA BETWEEN TRACE METALS AND THE SOLUBLE AND INSOLUBLE ORGANIC AND INORGANIC FRACTIONS OF SEWAGE SLUDGES AND SLUDGE-AMENDED SOILS. THE RESEARCH INVOLVES THE DEVELOPMENT AND USE OF TECHNIQUES TO DETERMINE THE CHEMICAL FORMS OF TRACE METALS IN SEWAGE SLUDGES AND SEWAGE SLUDGE-AMENDED SOILS, THE IDENTIFICATION OF THE TYPES OF METAL-LIGAND COMPLEXES PRESENT, AND THE DETERMINATION OF STABILITY CONSTANTS FOR THE INORGANIC AND ORGANIC COMPLEXES IDENTIFIED. CADMIUM, ZINC, NICKEL, COPPER AND LEAD ARE THE TRACE METALS THAT WILL BE STUDIED IN THIS RESEARCH.

DENSITY DEPENDENT FACTORS AND THEIR EFFECTS ON GROWTH AND SURVIVAL OF SPOTTED SEATROUT AND LINED SOLE LARVAE (ABBREV)

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 18525
TASK/EPA CODE :P608C-03 / R804519-02 (GRANT) PRIOR FY76 / $ 165051
PROJECT OFFICER : A D BECK
INVESTIGATORS : E D HOUDE UNIV. OF MIAMI
MILE: 05/79 -FINAL REPORT ENTITLED, "DENSITY DEPENDENT FACTORS AND THEIR EFF

LINED SOLES AND SPOTTED SEATROUT ARE BEING REARED IN THE LABORATORY TO HELP DEVELOP TECHNIQUES FOR STANDARDIZED CULTURE OF MARINE FISH LARVAE. PRESENTLY SUPPORTED RESEARCH IS DESIGNED TO INVESTIGATE EFFECTS OF FOOD CONCENTRATION, STOCKING DENSITY AND FOOD TYPES ON SURVIVAL AND GROWTH OF LARVAE. OTHER FACTORS BEING INVESTIGATED INCLUDE FEEDING RATES AND GROWTH EFFICIENCIES IN RELATION TO SIZE OF LARVAE AND TYPE AND CONCENTRATIONS OF FOOD. FOODS THAT ARE BEING USED ARE WILD PLANKTON (COPEPNAUPLII), T HE ROTIFER BRACHINOUS PLICATILIS, AND BRINE SHRIMP ARTEMIA SALINA NAUPLII. SEATROUT AND LINED SOLES CAN BE REARED FROM EGG TO JUVENILE ON EITHER WILD PLANKTON OR ROTIFER-BRINE SHRIMP DIETS. GROWTH DURING THE EARLY LARVAL STAGES IS BETTER ON THE WILD PLANKTON THAN ON RO TIFERS BUT SURVIVAL IS EQUALLY GOOD ON BOTH FOODS. ADDITIONAL PROPOSED STU DIES INCLUDE STUDIES ON LARVAE BEHAVIOR IN RELATION TO FOOD TYPES AND FOOD CONCENTRATIONS. ALSO, A COMPARISON OF REARED AND WILD LARVAE OF BOTH SPECIES WITH RESPECT TO MORPHOMETRICS AND GROWTH CHARACTERISTICS WILL BE INITIATED DURING THE PROPOSED BUDGET PERIOD. THE GOAL OF THE PROJECT IS TO PROVIDE STANDARDIZED PROCEDURE THAT WILL INSURE PRODUCTION OF LARGE NUMBERS OF MARINE FISH LARVAE, WITH PHYSIOLOGICAL CHARACTERISTICS SIMILAR TO WILD LARVAE, THAT COULD BE USED IN POLLUTION AND TOXICANT BIOAS

REMOVING ORGANIC CONTAMINANTS FROM GROUND WATER TO PREVENT FORMATION OF POTENTIAL CARCINOGENS IN DRINKING WATER

START/ COMPL DATE : 06/76 - 03/78 : FUNDING : EST. - FY 77 / $ 111096

OBJECTIVES: TO DEVISE FEASIBLE AND ECONOMIC METHODOLOGY FOR REMOVING EXI STING ORGANIC CONTAMINANTS FROM GROUND WATER AND/OR PREVENT DEVELOPMENT OF POTENTIAL CARCINOGENS IN THE PUBLIC WATER SUPPLIES IN DADE COUNTY, FL ORIDA. APPROACH: VARIOUS TYPES OF ACTIVATED CARBONS AS WELL AS MACRORETICU LATED RESINS WILL BE EVALUATED TO SEE WHICH OF THESE IS THE MOST EFFICIENT AND MOST ECONOMICAL TO USE IN REMOVING ORGANIC CONTAMINANTS FROM DRINKING WATER. CURRENT PROGRESS: THE DRINKING WATER QUALITY LABORATORY, SCHOO L OF TECHNOLOGY, FLORIDA INTERNATIONAL UNIVERSITY, MIAMI, FLORIDA HAS BEEN USING THE TRACOR 222 GAS CHROMATOGRAPH TO STUDY CHLOROFORM CONTENT IN WATERS FROM THE PRESTON WATER TREATMENT PLANT IN DADE COUNTY, FLORIDA. THE RESULTS OF THESE STUDIES ARE IN REPORT NO. 1, "VARIATIONS IN THE CHLOROFORM CONTENT OF WATERS FROM THE JOHN E. PRESTON WATER T REATMENT PLANT, HIALEAH, FLORIDA," REPORT NO. 1 IS FROM THE DRINKING WATER QUALITY LABORATORY AT FLORIDA INTERNATIONAL UNIVERSITY, MIAMI, FLORIDA.

EFFECTS OF PETROLEUM COMPOUNDS ON ESTUARINE FISHES

THE PURPOSE OF THIS PROJECT IS TO STUDY CHEMICALLY INDUCED TUMORS IN TELEOST FISHES. BOTH MARINE AND FRESHWATER SPECIES WILL BE EXPOSED TO LOW LEVELS OF A KNOWN CARCINOGEN FOR 300 DAYS. FISH DEVELOPING TUMORS OR OTHER PATHOLOGIES DURING THIS PERIOD WILL BE SACRIFICED AND TISSUE FROM THE LIVER, KIDNEY, INTESTINE, AND GILLS WILL BE STUDIED HISTOLOGICALLY. TISSUES FROM ALL THE FISH WITH NO GROSSLY APPARENT PATHOLOGIES AT THE SAME TIME THE EXPERIMENT IS TERMINATED WILL BE STUDIED IN THE SAME MANNER IN ORDER TO DETECT ANY NEOPLASIAS OR PRENEOPLASTIC CONDITIONS. IT IS EXPEC TED THAT THIS RESEARCH WILL: 1) PROVIDE EVIDENCE CONCERNING THE QUANTITIES OF BENZOPYRENE NECESSARY TO INDUCE NEOPLASIAS, 2) SUPPLY ADDITIONAL DATA CONCERNING TUMORS IN TELEOSTS, 3) ESTABLISH THE FEASIBILITY O F USING TELEOST FISH AS EARLY INDICATORS OF CARCINOGENIC SUBSTANCES IN THE AQUATIC ENVIRONMENT, AND 4) DEMONSTRATE THAT THIS TYPE SYSTEM COULD BE USED TO SCREEN COMPOUNDS FOR CARCINOGENIC PROPERTIES WITH LESS DIFFICULTY AND EXPENSE THAN THE METHODS CURRENTLY EMPLOYED.

URINARY STONE DISEASE AND WATER HARDNESS

THIS IS A STUDY TO DETERMINE THE RELATIONSHIP BETWEEN THE QUALITY OF D RINKING WATER AND UROLITHIASIS (A MAJOR NATIONAL HEALTH PROBLEM). PREVIOUS STUDIES SUGGEST THERE IS A RELATIONSHIP BETWEEN THE QUALITY OF DRINKING WATER AND UROLITHIASIS; HOWEVER, THE VALIDITY OF THE CONCLUSIONS OF THESE STUDIES REMAINS UNCERTAIN BECAUSE OF UNCERTAINTY ABOUT THE WATER ACTUALLY CONSUMED BY STONE FORMERS. IN THIS STUDY WE INTEND TO SAMPLE THE HOUSE WATER ACTUALLY USED BY PATIENT AND CONTROL SUBJECTS. THE FIRST PHASE OF THIS STUDY IS NOW BEING UNDERTAKEN. THIS INCLUDES A PILOT STUDY INVOLVING STONE CASES AND CONTROLS FROM THREE HOSPITALS IN CENTRAL FLORIDA. INTERVIEWS ARE NOW BEING CONDUCTED USING A QUESTIONNAIRE AND INTERVIEWER PROTOCOL DEVELOPED BY THE RESEARCH TEAM. PROGRESS IS BEING MADE ON SETTING UP CODING AND DATA ANALYSIS TECHNIQUES.

DEWATERING PRINCIPLES AND EQUIPMENT DESIGN STUDIES

MILE: 08/78 -ISSUE FINAL REPORT

ORJECTIVES: DEVELOP MORE ECONOMICALLY FEASIBLE METHODS THAN THOSE CURRENTLY AVAILABLE FOR CONTINUOUS TREATMENT OF FLUE GAS CLEANING (FGC) WASTES. INITIAL EFFORTS ARE TO BE CONCENTRATED ON APPLYING GRAVITY SEDIMENTATION TO RAPIDLY, INEXPENSIVELY DEWATER FGC WASTES. APPROACH: DEVELOP METHODS FOR CHARACTERIZING THE PHYSICAL PROPERTIES AND BEHAVIOR OF FGC WASTES. DEVELOP PROCEDURES BASED ON THE MODELS PRESENTED HEREIN TO ALLOW ACCURATE DESIGN AND ANALYSIS OF GRAVITY SEDIMENTATION UNITS USED IN TREATING FGC WASTES. PERFORM BENCH SCALE AND PILOT TESTS TO EVALUATE THE FEASIBILITY OF USING GRAVITY SEDIMENTATION UNITS FOR TREATING FGC WASTES. PERFORM DEVELOPMENTAL STUDIES TO DETERMINE THE BEST DESIGN FOR CHANNEL PROMOTERS. BENCH SCALE AND CONTINUOUS PILOT TESTS ARE TO BE PERFORMED TO EVALUATE THE FEASIBILITY OF SUCH DEVICES FOR IMPROVING DEWATERING EFFICIENCY WHILE TREATING FGC WASTES. ASSESS FILTERABILITY OF DIFFERENT TYPES OF FGC SLUDGES DEWATERED TO DIFFERENT DEGREES AND PUMPING REQUIREMENTS FOR THE DIFFERENT SLUDGES. PROGRESS: A GRAVITY SEDIMENTATION SYSTEM CAN NOW BE PROPOSED WHICH SHOULD ALLOW RAPID DEWATERING OF FGC WASTE TO HIGH CONCENTRATIONS (35 TO 50 PERCENT SOLIDS) WITHOUT THE NEED FOR CHEMICAL ADDITIVES (FLOCCULANTS). THIS SYSTEM SEPARATES THE CLARIFICATION AND THICKENING FUNCTIONS INTO TWO UNITS WHICH ARE MUCH SMALLER AND LESS EXPENSIVE THAN CONVENTIONAL DEWATERING EQUIPMENT. FURTHER DEVELOPMENT OF THIS CONCEPT IS UNDERWAY.

DEVELOPMENT OF SAFE METHODS FOR DISPOSAL OF EXCESS PESTICIDES USED BY FARMERS AND AGRICULTURAL APPLICATORS

OBJECTIVES: 1. EVALUATE OVERALL EFFECTIVENESS OF THE DISPOSAL PITS CURRENTLY IN USE BASED ON MATERIALS PREVIOUSLY DEPOSITED IN EACH. 2. DETERMINE PRESENCE OR ABSENCE OF ENVIRONMENTALLY HAZARDOUS COMPOUNDS IN EACH. 3. CONTINUE TO SAMPLE EACH PIT DURING TENURE OF STUDY. 4. ESTA BLISH EXPERIMENTAL SYSTEMS FOR STUDYING THE FATE OF SELECTED PESTICIDES IN ISOLATED MICRO-PITS UNDER CONTROLLED CONDITIONS. 5. EVALUATE B IOLOGICAL ACTIVITY IN PRESENT SYSTEMS. 6. DEVELOP PLANS AND SPECIFICATIONS FOR DISPOSAL SYSTEM CONSTRUCTION AND MANAGEMENT. APPROACH: CONDUCT A 5 YR. CHEMICAL AND BIOLOGICAL STUDY OF 2 EXISTING PESTICIDE DISPOSAL SYSTEMS USED AT THE AGRONOMY-AG. ENGINEERING AND HORTICULTURE STATIONS WHICH HAVE BEEN IN USE 10 AND 5 YEARS RESPECTIVELY. ADDITIONAL CONTROLLED MICRO -DISPOSAL SYSTEMS WILL BE ESTABLISHED TO DETERMINE THE FATE AND BIOLOGICAL CONSEQUENCES OF KNOWN QUANTITIES OF SELECTED DISPOSED COMPOUNDS. ACCURATE DATA WILL BE COLLECTED ON IDENTITY, QUALITY AND CONCENTRATION OF UN USUAL DILUTE INSECTICIDES, FUNGICIDES AND HERBICIDES DEPOSITED IN EXISTING AND TWO NEW DISPOSAL PITS. RELIABLE RECOMMENDATIONS FOR DISPOSAL SYSTEMS FOR FARMS AND COMMERCIAL APPLICATION SHOULD BE DEVELOPED AS A RESULT OF THE STUDY. CURRENT PLANS: CHEMICAL AND BIOLOGICAL STUDIES OF THE EX ISTING SYSTEMS WILL BE INITIATED IN MAY, 1976 WITH THE NEW MICRO AND MACRO EXPERIMENTAL PITS BEING DEVELOPED DURING THE SUMMER. BASED ON 1976 STUDIES, AN IMPROVED COMMERCIAL APPLICATOR, RESEARCH-STATION TYPE PIT SYSTEM WILL BE IMPLEMENTED IN 1977 BASED ON THE 1976 RESULTS. CLIMAT OLOGICAL DATA WILL BE COLLECTED DURING THE 5 YR. STUDY AND CORRELATED WITH CHEMICAL AND BIOLOGICAL DEGRADATION IN THE SYSTEMS.

NON-POINT POLLUTION STUDIES ON AGRICULTURAL LAND USE TYPES PREVALENT IN THE COASTAL PLAIN ZONE OF MARYLAND

THE MAJOR OBJECTIVE OF THE STUDIES IS TO FIND OUT THE POSSIBILITY OF THE SAFE USE OF PESTICIDES AND TO ASSURE THAT USE PATTERNS AND HUMAN EXPOSURE ARE BELOW THE LEVELS THAT WILL DETRIMENTALLY AFFECT HEALTH AND WELL-BEING OF HUMANS. THIS OBJECTIVE WILL BE APPROACHED BY EXPANDING THE PRESENT KNOWLEDGE ABOUT THE MECHANISM OF ACTION OF PESTICIDES, AND BY COLL ECTING AND INTERPRETING DATA ON EFFECTS OBSERVED IN INDIVIDUALS AND GROUPS EXPOSED TO PESTICIDES. THE STUDIES WILL COMPRISE THE FOLLOWING ASPEC TS: ASSESSMENT OF BIOCHEMICAL AND CLINICAL EFFECTS OF PESTICIDES IN HUMANS (DETERMINATION OF CHOLINESTERASE ACTIVITIES AND VITAMIN A LEVELS IN BLOOD) EFFECT OF PESTICIDES ON EYE AND VISION, EFFECT OF PESTICIDES ON PSYCHOMOTOR PERFORMANCES, PESTICIDE RESIDUES IN HUMANS, AND STUDIES ON THE INTERACTION BETWEEN ESTERASES AND ORGANOPHOSPHORUS COMPOUNDS.

TOXIC, SUBLETHAL AND LATENT EFFECTS OF SELECTED PETROLEUM HYDROCARBONS AND BARIUM SULFATE ON MARINE ORGANISMS

START/ COMPL DATE : 05/76 - 07/79 ; FUNDING : EST. - FY 77 / $ 85000

THIS INVESTIGATION WILL EXAMINE THE TOXIC, SUBLETHAL AND LATENT EFFECTS OF CERTAIN POLYCYCLIC AROMATIC HYDROCARBONS AND BARIUM SULFATE ON L ARVAL AND ADULT STAGES OF SELECTED INVERTEBRATES AND FISH. EXPERIMENTS ARE DESIGNED TO DETERMINE THE EFFECTS OF THESE COMPOUNDS ON: A) CRUSTACEAN MOLT CYCLES; B) REGENERATIVE LIMB GROWTH; C) RESPIRATION; D) HEART RATE; AND E) HISTOLOGY AND ULTRASTRUCTURE OF SELECTED TISSUES. STUDIES ARE AIMED TO DETERMINE THE UPTAKE BY MARINE ORGANISMS OF THESE POLLUTANTS FROM WATER AND BIOACCUMULATION THROUGH AQUATIC FOOD CHAINS. BY USING A COMBINATION OF AUTORADIOGRAPHIC AND CONVENTIONAL ANALYTICAL TECHNIQUES THE SITES AND EXTENT OF ACCUMULATION OF POLLUTANTS IN MARINE ORGANISMS WILL BE DETERMINED.

MEASUREMENT OF HALOGENATED POLLUTANTS AND OTHER TRACE GASES IN THE TROPOSPHERE IN SITU BY LONG-PATH INFRARED ABSORPTION SPECTROS

START/ COMPL DATE : 06/77 - 05/78 : FUNDING : EST. - FY 77 / $ 76961

MILE: 06/78 -FINAL REPORT

A QUANTITATIVE CHARACTERIZATION OF AMBIENT PRIMARY AND SECONDARY TRACE POLLUTANT AS A FUNCTION OF TIME (BOTH DIURNALLY AND SEASONALLY) AND LOCATION (INCLUDING URBAN AREAS AND DOWNWIND RECEPTOR SITES) IS BEING CONDUCTED USING IN SITU, LONG-PATH, HIGH RESOLUTION FOURIER TRANSFORM INFRARED SPECTROSCOPY IN CONJUNCTION WITH CONVENTIONAL A STATE-OF-THE-ART ANALYTICAL METHODS FOR AMBIENT GAS PHASE AND PARTICULATE POLLUTANTS. RESULTS OF THE FIRST YEAR OF THIS PROGRAM AT RIVERSIDE INCLUDE THE FIRST POSITIVE IDENTIFICATION BY SPECTROSCOPIC TECHNIQUES OF FORMALDEHYDE AND NITRIC ACID IN AMBIENT PHOTOCHEMICAL SMOG, THE MEASUREMENT OF LOW LEVELS OF FORMIC ACID, AMMONIA AND A VARIETY OF HALOCARBONS, AND DETERMINATION OF UPPER LIMITS FOR THE POSSIBLE PRESENCE OF OTHER TRACE CONTAMINANTS. STUDIES WILL CONTINUE AT RIVERSIDE AND AT A MID-BASIN SITE, APPROXIMATELY FOUR TO SIX HOURS UPWIND OF RIVERSIDE, USING THE PART-PER-BILLION SENSITIVITY AFFORDED BY A KILOMETER OPTICAL PATHLENGTH MULTIPLE REFLECTION CELL, AND AN FTS-14 FOURIER TRANSFORM INFRARED SPECTROMETER (BOTH OF WHICH ARE THE PROPERTY OF THE EPA AND ARE ON LOAN TO SAPRC FOR THIS THREE-YEAR PROJECT). PORTABLE INSTRUMENTATION CURRENTLY EMPLOYED IN GAS PHASE AND PARTICULATE AMBIENT AIR MONITORING STUDIES AT SAPRC ARE OPERATED IN CONJUNCTION WITH THE LPIR DURING SELECTED SMOG EPISODES AT THE MONITORING LOCATIONS. THIS PROGRAM IS COORDINATED WITH AMBIENT AIR MONITORING STUDIES AT SAPRC SUPPORTED BY THE CALIFORNIA AIR RESOURCES BOARD AND THE DEVELOPMENT OF AN EXPERIMENTALLY VALIDATED MODEL FOR PHOTOCHEMICAL SMOG, FUNDED THROUGH NSF-RANN. EMPHASIS IS BEING PLACED ON THE QUANTITATIVE DETERMINATION OF PRODUCTS, LABILE INTERMEDIATES, AND PRIMARY POLLUTANTS FOR WHICH LITTLE, IF ANY, RELIABLE AMBIENT AIR DATA ARE CURRENTLY AVAILABLE. THESE NON-CRITERIA POLLUTANTS INCLUDE NITRIC ACID, NITROUS ACID, HALOCARBONS, HALOGENATED ACIDS, HYDROGEN PEROXIDE, NITROSAMINES, ALCOHOLS, EPOXIDES AND ORGANIC ACIDS, ALDEHYDES, AND OTHER CARBONYL COMPOUNDS. THESE ARE OF INTEREST PER SE, MAY BE TOXIC, AND ARE ALSO IMPORTANT FOR VALIDATING COMPUTERIZED KINETIC SMOG MODELS FOR CONTROL STRATEGIES.

09/78 -FINAL REPORT RECEIVED

THE OVERALL OBJECTIVE OF THIS PROJECT CONTINUES TO BE THE BENCH-SCALE INVESTIGATION OF SULFIDE (COMBINATION LIME-SULFIDE) PRECIPITATION WITH SOLUBLE AND SPARINGLY SOLUBLE SULFIDE SALTS AND OF CHARGED MEMBRANE ULTRAFILTRATION WITH COMMERCIALLY AVAILABLE, NEGATIVELY CHARGED, NON-CELLULOSIC MEMBRANES FOR TREATING SPECIFIC WASTE STREAMS FROM THE COPPER AND ZINC INDUSTRIES. THE SPECIFIC WASTE STREAMS (CONTAINING AS, SE, CD, ZN, FE, PB, ETC.) INCLUDE ACID PLANT WASTE-SCRUBBER WASTE AND THE OVERFLOW FROM LIME-SETTLING OPERATIONS. CONTINOUS FLOW, BENCH-SCALE SULFIDE PRECIPITATION STUDIES WILL INCLUDE THE USE OF NA2S AND FE S (OR PYRITES). THE SULFIDE DOSAGE REQUIREMENTS AND PREDICTIONS WITH VARYING WASTE COMPOSITIONS AND OPTIMUM PRECIPITATE SETTLING CONDITIONS WILL BE ESTABLISHED. CHARGED MEMBRANE ULTRAFILTRATION WILL BE EVALUATED IN TERMS OF HIGH WATER RECOVERY, MAXIMUM EXTENT OF METALS REMOVAL WITH SINGLE TO MULTIPLE-PASS WATER RECYCLE, AND THE POSSIBILITY OF OBTAINING 98% WATER RECOVERY BY AN INTERMEDIATE SETTLING STEP. THE STUDIES CONDUCTED DURING THE FIRST BUDGET PERIOD SHOW VERY PROMISING HEAVY METALS SEPARATION IN TERMS OF MEETING BATEA STANDARDS AND/OR FOR IN-PLANT WATER REUSE.

SEWAGE SLUDGE--VIRAL AND PATHOGENIC AGENTS IN SOIL-PLANT-ANIMAL SYSTEMS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 274000

MILE: 07/78 -INTERIM REPORT
10/79 -FINAL REPORT
12/79 -CONDUCT SYMPOSIUM

RECYCLING DIGESTED MUNICIPAL SEWAGE SLUDGE IN AGRICULTURAL SYSTEMS IS AN ATTRACTIVE ALTERNATIVE METHOD IF "SAFE" DISPOSAL MANAGEMENT TECHNIQUES CAN BE DEVISED THAT DO NOT ENDANGER HUMAN HEALTH. SLUDGE MAY CONTAIN HAZARDOUS AMOUNTS OF BACTERIAL AND VIRAL PATHOGENS, HEAVY METALS, CHEMICALS, DRUGS, MYCOTOXINS, AND/OR PARASITES. ANIMALS PRODUCED FROM GRAINS AND/OR FORAGES FERTILIZED WITH SLUDGE OR FROM PASTURES WHICH ALLOW DIRECT INGESTION OF SLUDGE WILL BE EXAMINED REGULARLY FOR THEIR PHYSIOLOGY, BLOOD CHEMISTRY, WEIGHT GAIN, AND PERFORMANCE. ANIMAL CARCASSES, INCLUDING BONE AND ORGANS, WILL BE EXAMINED FOR PATHOGENS, HEAVY METALS, DRUGS, CHEMICALS, AND MYCOTOXINS. ASSESSMENT WILL BE MADE OF POSSIBLE ENTRY OF SUCH DELETERIOUS MATERIALS INTO THE HUMAN FOOD CHAIN AS WELL AS IDENTIFICATION OF MANAGEMENT PRACTICES, RATES OF SLUDGE APPLICATION, AND CUMULATIVE EFFECTS ON CATTLE, SWINE, AND POULTRY, THREE IMPORTANT FOOD ANIMALS. CHARACTERIZATION OF THE SLUDGE PRIOR TO UTILIZATION WILL BE MADE AND MANAGEMENT PRACTICES DEVELOPED TO REDUCE THE POTENTIAL HAZARDS TO ACCEPTABLE LEVELS. PRELIMINARY TRIALS WITH DIRECT FEEDING OF DRIED SLUDGE TO CATTLE REDUCED WEIGHT GAINS SLIGHTLY AND CHANGED THE HEAVY METAL CONTENT OF CERTAIN ORGANS. IN A RELATED TRIAL, 11 BRED GILTS FED RATIONS CONTAINING EITHER 0, 10, OR 20 PERCENT DRIED SEWAGE SLUDGE FOR 10 MONTHS SHOWED NEITHER GROWTH SUPPRESSION, NOR EFFECT ON LITTER SIZE NOR PERFORMANCE. HOWEVER, SIGNIFICANT DIFFERENCES IN HEMATOCRIT AND PROTHROMBIN LEVELS OCCURRED BETWEEN PIGS FROM THE THREE GROUPS.

10/78 -INTERIM REPORT
11/79 -FINAL REPORT

BECAUSE OF GROWING PUBLIC CONCERN OVER THE OCCURRENCE OF TRACE AMOUNTS OF VARIOUS ORGANIC CHEMICALS IN THE AREA POTABLE WATER SUPPLY, THE JEFFERSON PARISH WATER DEPARTMENT HAS RECOGNIZED THE NEED FOR A MORE EFFICIENT AND RELIABLE TREATMENT PROCESS DESIGNED TO REMOVE SUCH CONTAMINANTS. THE MISSISSIPPI RIVER IS THE SOLE RAW WATER SOURCE AVAILABLE TO THE JEFFERSON PARISH WATER SYSTEM. THEREFORE, SINCE THE USE OF ANOTHER LESS POLLUTED SOURCE IS IMPOSSIBLE, THE DEPARTMENT IS FACED ONLY WITH SEEKING OUT NEW METHODS FOR REMOVAL OF TRACE LEVELS OF ORGANIC CONTAMINANTS. ONE SUCH METHOD OFFERS THE MOST PROMISE OF EFFECTING TRACE ORGANIC COMPOUND REMOVAL. IT IS THE USE OF GRANULAR ACTIVATED CARBON (GAC) FILTRATION. GAC FILTRATION WILL BE THOROUGHLY STUDIED IN QUANTITATIVE TERMS AND IN TERMS OF COST EFFECTIVENESS DURING THE COURSE OF THIS STUDY.

IMPACT OF ZOOPLANKTON GRAZING UPON PHYTOPLANKTON IN EUTROPHIC SAGINAW BAY AND WESTERN LAKE ERIE

START/ COMPL DATE : 05/76 - 05/78 : FUNDING : EST. - FY 77 / $ 77600
TASK/EPA CODE :N608A-022 / R804573 (GRANT) PRIOR FY76 / $ 740001
PROJECT OFFICER : N A THOMAS
INVESTIGATORS : D C MCNAUGHT STATE UNIVERSITY OF NEW YORK
MILE: 04/77 -ANNUAL REPORT
04/78 -ANNUAL REPORT
04/79 -ANNUAL REPORT

THE ABILITY OF THE HERBIVOROUS ZOOPLANKTON TO REGULATE ALGAL PRODUCTIVITY IN HIGHLY EUTROPHIC SAGINAW BAY (LAKE HURON) AND WESTERN LAKE ERIE WILL BE DETERMINED. TOTAL GRAZING, AS WELL AS SIZE-SELECTIVE FEEDI NG ON SMALL FLAGELLATES AS WELL AS LARGE DIATOMS AND BLUE-GREEN ALGAE WILL BE MEASURED IN THE FIELD. THIS INFORMATION ON IMPORTANT CARBON FLUXES IS VITAL TO THE MODELING TEAM RESPONSIBLE FOR THE ULTIMATE SYNTHESIS OF DATA ON GREAT LAKES ECOSYSTEMS. FIELD STUDIES OF GRAZING WILL DEPEND ON 14C TAGGING TECHNIQUES. IN THE LABORATORY THE FEEDING HABITS OF ROTIFERS, OFTEN IGNORED, WILL BE INVESTIGATED USING NEW PARTICLE COUNTING TECHNIQUES COMBINED WITH COMPUTER ANALYSIS. ALL OF THESE INVESTIGATIONS WILL BE BASED ON PROGRESS MADE BY AN EXPERIMENTAL TEAM DURING UPPER LAKES REFERENCE STUDY. RESULTS ALREADY SHOW THAT THE CRUSTACEANS CONTROL ALGAL PRODUCTION IN OPEN LAKE ONLY DURING THE FALL MONTHS, BIOLOGICAL CONTROL OF THE GROWTH OF BLUE-GREEN ALGAE FAILED TO DEVELOP IN MID-SUMMER. DISCOVERY OF THE DEGREE OF BIOLOGICAL CONTROL IN THE MOST EUTROPHIC AREAS OF THE GREAT LAKES IS VITAL TO UNDERSTANDING THE FUNCTIONING OF THESE ECOSYTEMS, ULTIMATELY PRODUCING VALIDATED SIMULATION MODELS FOR THEM, AND FINALLY MANAGING ALGAL BLOOM PROBLEMS.

EFFECT OF ETIOLOGICALLY DEFINED RESPIRATORY INFECTIONS ON LUNG FUNCTION AND ITS GROWTH IN AN AREA OF LOW AIR POLLUTION

START/ COMPL DATE : 11/72 - 12/80 : FUNDING : EST. - FY 77 / $ 217000
TASK/EPA CODE :H601C-7221 / R804577 (GRANT) PRIOR FY76 / $ 2000001
PROJECT OFFICER : B T KETCHAM
INVESTIGATORS : A M COLLIER UNIV. OF NORTH CAROLINA
MILE: 01/78 -PUBLICATION OF GROWTH OF LUNG FUNCTION DATA OF PRESENT STUDY PO

OBJECTIVE: THE OBJECTIVE OF THIS STUDY IS TO PROVIDE BASELINE PULMONARY FUNCTION DATA ON CHILDREN LIVING AND GROWING IN AN AREA OF LOW ENVIR ONMENTAL POLLUTION. APPROACH: CHILDREN WILL BE STUDIED LONGITUDINALLY TO C HARACTERIZE PULMONARY FUNCTION CHANGES ASSOCIATED WITH PHYSICAL GROWTH AND DOCUMENTED UPPER RESPIRATORY INFECTIONS. CHILDREN WILL BE CULTURED FOR PATHOGENS AT TWO-WEEK INTERVALS REGARDLESS OF SYMPTOMATOLOGY AND MEASUREMENTS MADE WILL ASSESS THE IMPACT OF THESE INFECTIOUS AGENTS ON PULMONARY FUNCTION. OUTPUT: THIS INFORMATION WILL ENABLE THE DESIGN OF BETTER STUDIES TO ASSESS THE GROWTH OF LUNG FUNCTION AND IMPACT OF RESPIRATORY INFECTIONS ON YOUNG CHILDREN LIVING IN AREAS OF HIGH AIR POLLUTION.

EFFECT OF PARTICULATES ON OZONE DISINFECTION OF BACTERIA AND VIRUSES IN WATER

START/ COMPL DATE : 08/76 - 08/78 : FUNDING : EST. - FY 77 / $ 58555
TASK/EPA CODE :C614A-7184 / R804587-02 (GRANT) PRIOR FY76 / $ 540371

12/77 -ANNUAL REPORT
09/78 -PROJECT COMPLETED
12/78 -FINAL REPORT PUBLISHED

THE PRINCIPAL OBJECTIVE OF THIS PROJECT IS TO DEVELOP A BODY OF INFO RMATION ON THE DISINFECTION POTENTIAL OF OZONE FOR VIRUSES WHICH HAVE BEEN ATTACHED TO OR INCORPORATED WITHIN VARIOUS SOLIDS. THE SOLIDS TO BE USED WILL BE CLAYS, HYDRATED ALUMINUM OXIDE FLOCS, HUMAN EPITHELIOID CARCINOMA CELLS AND FECAL MATERIAL. THE VIRUSES TO BE USED WILL BE POLIOVIRUS 1 (MAHONEY), COXSACKIEVIRUS A9 AND THE F2 BACTERIOPHAGE. ADDITIONALLY, INFORMATION ON THE INACTIVATION OF ESCHERICHIA COLI AND STREPTOCOCCUS FECALIS UNDER CONDITIONS SIMILAR TO THE VIRUSES WILL BE OBTAINED. MODI FICATIONS TO OBTAIN ADDITIONAL INACTIVATION WILL BE MADE WHERE IT IS FOUND THAT ADSORBED OR PROTECTED VIRUSES ARE INACTIVATED AT A SLOWER RATE THAN THE UNPROTECTED VIRUS. THESE MODIFICATIONS WILL INCLUDE LONGER CONTAC T TIMES, INCREASED OZONE CONCENTRATIONS AND DECREASED PARTICLE SIZE IN THE CASE OF THE FECAL MATERIAL AND ALUMINUM OXIDE FLOC PARTICLES.

REHABILITATION EFFECTS IN LONG LAKE, WASHINGTON

START/ COMPL DATE : 07/76 - 06/79 : FUNDING : EST. - FY 77 / $ 68500
TASK/EPA CODE :M412A-08 / R804588-01 (GRANT) PRIOR FY76 / $ 900001
PROJECT OFFICER : S A PETERSON
INVESTIGATORS : E P WELSH UNIV. OF WASHINGTON
MILE: 06/79 -FINAL REPORT
THE PURPOSE IS TO STUDY THE STATUS OF THE PHYTOPLANKTON AND ROOTED M
ACROPHYTE COMMUNITIES, THE NUTRIENT LEVELS IN WATER AND SEDIMENT AND THEIR
INTERCHANGE, AND THE NUTRIENT BUDGETS DURING THE ONE YEAR BEFORE AND
ONE-TO-TWO YEARS FOLLOWING REHABILITATIVE MEASURES IN LONG LAKE.

INVESTIGATION OF NEW TECHNIQUES FOR CONTROL OF SMELTER ARSENIC BEARING WASTES

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 34000

11/77 -AWARD FUNDS FOR PROJECT
08/78 -COMPLETE TECHNICAL WORK
09/78 -COMPLETE REPORT
10/78 -FINAL REPORT RECEIVED

IN JUNE, 1976, THE U.S. ENVIRONMENTAL PROTECTION AGENCY AWARDED A RESEARCH GRANT TO THE MINERAL RESEARCH CENTER TO CARRY OUT A RESEARCH I NVESTIGATION OF NEW TECHNIQUES FOR CONTROL OF SMELTER ARSENIC FLUE DUST WA STES. THE MINERAL RESEARCH CENTER IS STUDYING FIXATION OF ARSENIC FLUE DUST WASTES BY VARIOUS TECHNIQUES SUCH AS ARSENIC FIXATION BY MOLTEN WASTE SLAGS FROM DIFFERENT SMELTING OPERATION, FIXATION AT HIGH TEMPERATURES BY CLAYS, SOME INDUSTRIAL BY-PRODUCTS, AND PHOSPHATE ROCK, FIXATION BY CE MENT AND CONCRETE MIXTURES, AND FIXATION OF ARSENIC AT LOW TEMPERATURES BY CLAYS, PHOSPHATE ROCK, AND SOME INDUSTRIAL BY-PRODUCTS, INITIAL RESULTS OF ARSENIC INCORPORATION IN THESE MEDIA AND THE LEACH TEST RESULTS ARE E NCOURAGING. UNDER SUBCONTRACT, THE ANACONDA COMPANY RESEARCH LABORATORY IN TUCSON IS STUDYING THE EXTRACTION OF ARSENIC, BY CHEMICAL LEACHING, FROM THE FLUE DUST WASTES AND HAS RECENTLY STARTED TESTS ON FIXATION OF E XTRACTED ARSENIC IN AQUEOUS MEDIA. FIRST YEAR: A LITERATURE SEARCH AND REP ORT ON THE GEOCHEMISTRY, CHEMISTRY, AND METALLURGY OF ARSENIC WAS PREPARED TO PROVIDE GUIDANCE FOR THE LABORATORY STUDIES. LABORATORY FEASIBILITY STUDIES HAVE BEEN CONDUCTED TO SCREEN THE EFFECTIVENESS OF SELECTED FI XATION TECHNIQUES. PILOT PLANT STUDIES OF THE REMOVAL OF ARSENIC FROM FLUE DUST WASTES BY CHEMICAL LEACHING WERE ESSENTIALLY COMPLETED. SECOND YEAR: LEACHING TESTS OF THE "FIXED" PRODUCTS RESULTING FROM SEVERAL FIXATION TECHNIQUES WILL BE PERFORMED TO DETERMINE RESISTANCE TO LEACHING UNDER ENVIRONMENTAL CONDITIONS. STUDIES OF SEPARATION BY CHEMICAL LEACHING AND SUBSEQUENT FIXATION WILL BE COMPLETED.

ENUMERATION OF SHIGELLA IN POLLUTED WATERS

START/ COMPL DATE : 00/76 - 00/78 : FUNDING : EST. - FY 77 / $ 19000
TASK/EPA CODE :D607A-042 / R804596 (GRANT) PRIOR FY76 / $ 190001
PROJECT OFFICER : M A LEVIN
INVESTIGATORS : V P OLIVIERI JOHNS HOPKINS UNIVERSITY
C I NOSS JOHNS HOPKINS UNIVERSITY
MILE: 06/78 -DEVELOPMENT AND EVALUATION OF ENUMERATION METHOD
12/78 -APPLICATION IN EPIDEMIOLOGICAL STUDIES

THE OBJECTIVES OF THIS PROJECT IS TO DEVELOP RELIABLE CULTURE PROCEDURES AND TECHNIQUES TO RECOVER AND ENUMERATE SHIGELLA IN POLLUTED WATER. CONVENTIONAL ENRICHMENT MEDIA FOR SHIGELLA HAVE BEEN DEVELOPED TO ISOLATE THESE MICROORGANISMS FROM FECAL SPECIMENS FROM PATIENTS SUSPECTED OF HAVING SHIGELLOSIS. LEVELS OF SHIGELLA UNDER THESE CIRCUMSTANCES ARE GENERALLY HIGH. IN CONTAMINATED WATER, HOWEVER, THE LEVELS OF SHIGELLA RELATIVE TO INTERFERING MICROORGANISMS ARE EXCEPTIONALLY LOW. IN ADDITION, MANY OF THE INTERFERING MICROORGANISMS HAVE A BACTERICIDAL AND BA CTERIOSTATIC EFFECT ON SHIGELLA. ENRICHMENT MEDIA ARE BEING EVALUATED THAT MINIMIZE THE EFFECT OF ANTAGONISTIC MICROORGANISMS.

RESEARCH ON AIR SAMPLING FILTER MEDIA

START/ COMPL DATE : 09/76 - 05/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :G7128-BE-37 / R804600-01 (GRANT) PRIOR FY76 / $ 710001
PROJECT OFFICER : T DZUBAY
INVESTIGATORS : B Y LIU UNIV. OF MINNESOTA
MILE: 12/79 -FINAL REPORT

THE PRIMARY OBJECTIVE OF THIS PROGRAM IS TO STUDY AIR SAMPLING FILTER MEDIA AND TO EVALUATE THE AVAILABLE COMMERCIAL FILTER MEDIA IN TERMS OF THEIR SAMPLING EFFICIENCY, RESISTANCE TO FLOW, DUST HOLDING CAPACITIES, MOISTURE RETENTION CHARACTERISTICS, AND OTHER PHYSICAL PROPERTIES OF INTE REST. ALL MAJOR COMMERCIAL FILTER MEDIA WILL BE STUDIED. THE END RESULT OF THE PROJECT WILL BE THE PREPARATION OF A "FILTER HANDBOOK" IN WHICH THE MAJOR FILTER CHARACTERISTICS ARE DESCRIBED. IN ADDITION, A CONC URRENT STUDY WILL BE UNDERTAKEN TO RELATE THE SAMPLING EFFICIENCY AND FLOW RESISTANCE OF FILTERS TO THOSE PREDICTED BY THEORY. ALSO, THE "SERIES FILTER" METHOD WILL BE STUDIED AS A POSSIBLE ALTERNATIVE TO THE DICHOTOMOUS SAMPLER FOR SEPARATING ATMOSPHERIC PARTICLES INTO A FINE AND A COARSE FRACTION WITH A CUT POINT NEAR 2.0 UM.

INCIDENCE OF CHROMOSOMAL ABERRATIONS IN THE PERIPHERAL LYMPHOCYTES OF COLLEGE STUDENTS AS A FUNCTION OF PHOTOCHEMICAL AIR POLLUTION

START/ COMPL DATE : 08/76 - 06/79 : FUNDING : EST. - FY 77 / $ 133000
TASK/EPA CODE :H601C-7245 / R804606-02 (GRANT) PRIOR FY76 / $ 2500001
PROJECT OFFICER : D CALAFIORE
INVESTIGATORS : A R MAGIE LOMA LINDA UNIVERSITY
W R CENTERWALL LOMA LINDA UNIVERSITY
D E ABBEY LOMA LINDA UNIVERSITY
R L PHILLIPS LOMA LINDA UNIVERSITY
R O WEST LOMA LINDA UNIVERSITY

MILE: 07/76 -AWARD GRANT
07/77 -PROGRESS REPORT AND CONTINUATION
11/78 -FINAL REPORT

OBJECTIVES: TO DETERMINE WHETHER THE EXPERIENCE, AS DETERMINED BY THE INCIDENCE OF PERIPHERAL CHROMOSOMAL ABERRATIONS, OF YOUNG ADULTS EMIGRATING FROM AND IMMIGRATING TO AN AREA WITH PERPETUALLY HIGH LEVELS OF PHOTOCHEMICAL AIR POLLUTANTS DIFFERS SIGNIFICANTLY FROM STUDENTS ALREADY LIVING IN THE RESPECTIVE AREAS. SECONDARY OBJECTIVES INCLUDE THE INFLUENCE OF A CHANGE IN RESIDENCE ON THE INCIDENCE OF CHROMOSOMAL ABER RATIONS, THE PERSISTENCE OF CHROMOSOMAL ABERRATIONS ALREADY PRESENT AT THE TIME OF IMMIGRATION, AND THE EFFECT OF OTHER ENVIRONMENTAL AND LIFESTYLE FACTORS. APPROACH: 400 NON-SMOKING, NON-IMBIBING, NON-DRUG-USING NEW STUDENTS (AGES 17 TO 22) AT TWO SEVENTH-DAY ADVENTIST COLLEGES WERE PRE-SELECTED FOR THIS STUDY. OBJECTIVITY IN PREPARATION OF BLOOD CULTURE AND EVALUATION FOR CHROMOSOMAL ABERRATION IS ASSURRED SINCE NEITHER COLLABORATING LABORATORY KNOWS THE ORIGIN OF THE SAMPLES. CHROMOSOMES OF EACH STUDENT ARE EVALUATED FOR THE FREQUENCY OF BREAKS, GAPS, ISOGAPS, HYPO- AND HYPER-DIPLOIDY, ENDOREDUPLICATIONS, TERMINAL BLEBS, AND STABL E CHANGES SUCH AS DICENTRICS, QUADRIRADIALS, INVERSION, AND TRANSLOCATION. CURRENT PLANS AND/OR PROGRESS: LIFESTYLE AND DEMOGRAPHIC CHARACTER ISTICS OF THE SUBJECTS HAVE BEEN ANALYZED. THREE BLOOD SAMPLING PERIODS HA VE BEEN COMPLETED. THE FREQUENCY OF CHROMOSOMAL ABERRATIONS FROM THE FIRST BLOOD SAMPLES ARE BEING STATISTICALLY EVALUATED. CHROMOSOME SCORING OF THE OTHER SAMPLES IS CURRENTLY IN PROGRESS. IT IS PLANNED TO FOLLOW THIS GROUP OF STUDENTS INTO THEIR CHILD-BEARING YEARS TO DETERMINE IF OBSERVED CHROMOSOMAL ABERRATIONS HAVE ANY CORRELATION WITH THE OUTCOME OF PREGNANCIES.

804607

The objective of this proposal is to ultimately measure HO_x species in air samples. This will be accomplished with the use of chemical amplifiers.

MECHANISM AND CONTROL OF RAINFALL RUNOFF IMPACT FROM LAND APPLICATION SITES

START/ COMPL DATE : 07/76 - 07/78 : FUNDING : EST. - FY 77 / $ 16999
TASK/EPA CODE :L6170-24 / R804608-02 (GRANT) PRIOR FY76 / $ 521721
PROJECT OFFICER : S C YIN
INVESTIGATORS : P W WESTERMAN UNIV. OF NORTH CAROLINA
M R OVERCASH UNIV. OF NORTH CAROLINA
J C BARKER UNIV. OF NORTH CAROLINA
F J HUMENIK UNIV. OF NORTH CAROLINA
MILE: 07/76 -PROJECT INITIATION
07/78 -FINAL REPORT PUBLICATION

THE FOUR MAIN OBJECTIVES EVALUATE RAINFALL RUNOFF FROM PLOTS WHERE ANIMAL MANURE OR LAGOON EFFLUENT HAS BEEN APPLIED. THE OBJECTIVES ARE: 1. TO DETERMINE THE LONG-TERM (5-YEAR) CROP UPTAKE, SOIL ACCUMULATION, AND W ATER-CARRIED MASS MOVEMENT FROM LAND APPLICATION PLOTS SPRINKLER IRRIGATED WITH SWINE LAGOON EFFLUENT; TWO SOIL-CROP SYSTEMS ARE BEING STUDIED. 2. TO DETERMINE THE IMPACT OF SWINE DRYLOT RUNOFF ON STREAM QUALITY IN THE COASTAL PLAIN. 3. TO DETERMINE THE QUANTITY AND QUALITY OF SUBSURFACE FLOW FROM SPRINKLER IRRIGATED PLOTS HAVING A PERMEABLE SURFACE LAYER AND A LOW-PERMEABILITY LAYER BEGINNING AT 25-50 CM. 4. TO DETERMINE THE EFFECTIVENESS OF VARIOUS LENGTHS OF GRASSED BUFFER ZONES IN REDUCING MASS AND CONCENTRATION IN RUNOFF FROM LAND APPLICATION PLOTS. THE RESEARCH APPROACH FOR THE SWINE DRYLOT STUDY IS TO USE AN ACTUAL PRODUCER SITE AND MONITOR STREAM QUALITY. THE OTHER THREE RESEARCH OBJECTIVES INVOLVE VARIOUS APPLICATION RATES AND BUFFER ZONE LENGTHS FOR SMALL PLOTS. DATA IS BEING COLLECTED FOR OBJECTIVE 1 FOR THE FIFTH YEAR AND OBJECTIVE 2 IS IN THE SECOND YEAR. INSTALLATION OF SAMPLERS SHOULD BE COMPLETE BY JUNE 1, 1977 FOR OBJECTIVES 3 AND 4.

NEW APPROACHES TO THE PRESERVATION OF CONTAMINANTS IN WATER SAMPLES

START/ COMPL DATE : 08/76 - 08/79 : FUNDING : EST. - FY 77 / $ 34995
TASK/EPA CODE :A621A-42 / R804609-01 (GRANT) PRIOR FY76 / $ 350001
PROJECT OFFICER : G SIMES
INVESTIGATORS : J SAXENA SYRACUSE RESEARCH CORPORATION
MILE: 09/77 -EVAL. EFFECT. OF ANTIBIOTICS IN CONTROLLING WATER/WASTEWATER SA
09/78 -EVAL. EFFECT. OF PRESERVATIVES IN DETAIL

THE OVERALL OBJECTIVE OF THE THREE YEAR STUDY IS TO DEVISE A NEW, MORE E FFECTIVE AND POLLUTION-FREE METHOD OF PRESERVATION OF WATER AND WASTEWATER SAMPLES. APPROACHES SUCH AS THE USE OF ANTIBIOTICS AND BACTERIOLYTIC EN ZYMES FOR CONTROLLING MICRO-ORGANISMS MAY OFFER A DISTINCT POSSIBILITY AND AN IMPROVEMENT OVER EXISTING PROCEDURES. THE FIRST YEAR OF THE PROJECT WAS DEVOTED TO EVALUATION OF THE EFFECTIVENESS OF SEVERAL ANTIB IOTICS/ANTIBIOTICS MIXTURES AND BACTERIOLYTIC ENZYMES IN CONTROLLING MICRO ORGANISMS IN WATER AND WASTEWATER SAMPLES AS REVEALED BY VIABLE CELL COUNT AND OXYGEN CONSUMPTION RATES. AFTER TESTING A LARGE NUMBER OF A NTIBIOTICS SINGLY AND IN MIXTURE OF 2-4, 5-7 ANTIBIOTIC MIXTURES HAVE BEEN SELECTED BASED ON THEIR EFFECTIVENESS IN CONTROLLING MICROORGANISM S IN WASTEWATER AND NATURAL WATER SAMPLES. COMMERCIALLY AVAILABLE LYSOZYME PREPARATIONS FAILED TO CONTROL MICROORGANISMS WHEN ADDED WITH OR WITHOUT EDTA AND TRIS. ANALYSIS OF NUTRIENTS IN THE PRESENCE OF ANTIBIOTICS HAS REVEALED THAT THE COMBINATIONS WHICH INCLUDE ERYTHR OMYCIN OR AMPICILLIN CAUSE INTERFERENCE IN SOME ANALYTICAL DETERMINATIONS. THE SECOND YEAR OF THE PROJECT WILL BE DEVOTED TO DETERMINATION OF THE RELATIVE EFFECTIVENESS OF THE PRESERVATIVES SELECTED FOR FURTHER STUDY, IN PREVENTING ALTERATION IN SAMPLE TEST PARAMETERS. THE EFFECT OF WATER PARAM ETERS SUCH AS PH, PARTICULATE MATTER, INDUSTRIAL CONTAMINANT, ETC., ON THE PRESERVATION METHOD WILL ALSO BE ASCERTAINED. STUDIES WILL ALSO BE INITIATED TO STUDY THE EFFECTIVENESS OF THE PRESERVATION METHOD AS A FUNCTION OF STORAGE PARAMETERS AND SAMPLE HANDLING.

MAN'S EXPOSURE TO HALOGENATED ORGANICS FROM HIS DRINKING WATER

START/ COMPL DATE : 10/76 - 00/00 : FUNDING : EST. - FY 77 / $ 204645
TASK/EPA CODE :D614B-047 / R804611-02 (GRANT) PRIOR FY76 / $ 1629121
PROJECT OFFICER : J MCCABE
INVESTIGATORS : T M SHAFIK UNIV. OF MIAMI

C D PFAFFENBERGER UNIV. OF MIAMI
A PEOPLES UNIV. OF MIAMI
MILE: 09/77 -REPORT
09/78 -REPORT
09/79 -REPORT

OBJECTIVES: THE OBJECTIVE OF THIS WORK IS TO DETERMINE THE LEVELS OF HALOG ENATED VOLATILE PURGABLES, VOLATILE NON-PURGABLES, AND HALOGENATED PHENOLS IN DRINKING WATER, HUMAN BLOOD, AND HUMAN ADIPOSE TISSUE AND TO CORRE LATE THE CONCENTRATION OF THESE TOXICANTS WITH THE LEVELS FOUND IN MIAMI'S DRINKING WATER. APPROACH: DEVELOP METHODOLOGIES FOR THESE THREE GROUP S OF TOXICANTS IN WATER, BLOOD AND ADIPOSE TISSUE. DOSE EXPERIMENTAL ANIMA LS WITH THESE CHEMICALS TO DETERMINE LEVELS IN BLOOD AND FAT TISSUES TO ES TABLISH IF THESE HALOGENATED CHEMICALS BIOACCUMULATE IN FATTY TISSUES, AND WHAT TYPE OF EQUILIBRIUM OCCURS FOR THESE CHEMICALS BETWEEN BLOOD AND FAT. THE ANIMAL STUDIES WILL LEAD TO THE FINAL PORTION OF THE INVE STIGATION WHICH IS A PILOT EPIDEMIOLOGICAL STUDY TO RELATE LEVELS OF THESE TOXICANTS IN DRINKING WATER WITH THE LEVELS DETECTED IN HUMAN BLOOD AND ADIPOSE TISSUE. CURRENT PLANS AND/OR PROGRESS: THE HALOGENATED PURGABLE VOLATILES AND A FEW HALOGENATED NON-PURGABLE VOLATILES AND NON-PUR GABLE NON-VOLATILES HAVE BEEN DETECTED IN MUNICIPAL WATER, HUMAN SERUM AND ADIPOSE TISSUE. NEGLIGIBLE AMOUNTS OF THESE TOXICANTS WERE FOUND IN WELL AND BOTTLED WATER. IN GENERAL, THE PRELIMINARY DATA INDICATE THAT THE APPROACH IN THIS STUDY IS FEASIBLE, AND THESE TOXICANTS ARE PRESENT IN THE GENERAL POPULATION AT LOW LEVELS.

LIMNOLOGICAL INVESTIGATIONS OF WATER QUALITY AND FISH LARVAE IN LAKE ERIE

START/ COMPL DATE : 04/76 - 04/79 : FUNDING : EST. - FY 77 / $ 165537
TASK/EPA CODE :N608A-006 / R804612 (GRANT) PRIOR FY76 / $ 1384281

INVESTIGATORS : C E HERDENDORF OHIO STATE UNIVERSITY
MILE: 05/77 -ANNUAL REPORT
05/78 -FINAL REPORT

THE OHIO STATE UNIVERSITY, CENTER FOR LAKE ERIE AREA RESEARCH (CLEAR) PROPOSES TO CONDUCT STUDIES OF (1) WATER QUALITY, PARTICULARLY NUTRIENTS/OXYGEN RELATIONSHIPS, IN THE WESTERN AND CENTRAL BASINS OF LAKE ERIE AND (2) FISH LARVAE IN THE WESTERN BASIN AND SANDUSKY BAY. A COMPREHENSIVE STUDY OF THE STATUS OF EUTROPHICATION IN LAKE ERIE IS NOW BEING COMPLETED BY CLEAR IN SUPPORT OF AN ASSESSMENT OF THE EFFECTIVENESS OF NUTRIENT CONTROL PROGRAMS. A SUBPROJECT OF THIS GRANT DEALS WITH POPULATIONS ESTIMATES OF FISH LARVAE IN WESTERN LAKE ERIE. DATA GENERATED BY THESE STUDIES ALSO FORM THE BASE OF DETERMINISTIC MODELS NOW UNDER DEVELOPMENT BY EPA, LARGE LAKES RESEARCH STATION, GROSSE ILE, MICHIGAN. THE PROPOSED PROJECT WILL BUILD ON THE INFORMATION OBTAINED THROUGH THE CURRENT PROJECT. THE GENERAL OBJECTIVES OF THE PROPOSED WORK INCLUDE: 1. TO DETERMINE THE CONCENTRATION AND QUANTITY OF NUTRIENTS, OXYGEN AND BIOMASS INDICATORS IN THE WATERS OF THE CENTRAL AND WESTERN BASINS OF LAKE ERIE. 2. TO DETERMINE THE KINDS AND QUANTITIES OF CONTAMINANTS ENTERING WESTERN LAKE ERIE UNDER "RUNOFF EVENT" CONDITIONS AND TO IDENTIFY DISTRIBUTION PATTERNS IN THE LAKE. 3. TO ESTIMATE FISH LARVAE POPULATIONS IN WESTERN LAKE ERIE AND TO ASSESS THE IMPACT OF INTAKE ENTRAINMENT ON THESE POPULATIONS.

BIO-ORGANIC INDICATORS OF GROUND-WATER POLLUTION

THIS PROJECT IS DESIGNED TO COMPLEMENT U.S. EPA STUDIES OF ORGANIC MATERIALS IN PUBLIC WATER SUPPLIES AND WATER SUPPLY SOURCES THROUGHOUT THE COUNTRY. SPECIFIC OBJECTIVES ARE: 1. TO CONDUCT PLANT-SCALE EVALUATIONS OF THE INFLUENCE OF VARIOUS WATER TREATMENT PROCESSES, OR MODIFICATIONS OF THOSE PROCESSES, ON THE REMOVAL OF ORGANIC MATERIALS FROM THE RIVER WATER AND THE FORMATION OR REMOVAL OF HALOGENATED HYDROCARBONS; 2. TO EVALUATE THE EFFECT OF PRESENT PROCESSES FOR PUBLIC WATER SUPPLY TREATMENT ON THE ORGANICS IN THE TREATED WATER AND THE INFLUENCE OF SEASONAL AND OTHER VARIATIONS IN THE TYPE AND CONCENTRATION OF ORGANIC COMPOUNDS IN THE OHIO RIVER ON THE ORGANICS IN THE TREATED WATER. WITH THE COOPERATION AND FINANCIAL SUPPORT OF SOME PUBLIC WATER SUPPLY UTILITIES USING THE OHIO RIVER OR MAJOR TRIBUTARIES AS THE SOURCE OF WATER, PERIODIC RAW AND FINISHED WATER SAMPLES, GAS CHROMATOGRAPH ANALYSIS OF PURGEABLE AND SOLVENT EXTRACT PORTIONS WILL BE UTILIZED FOR DETECTION OF ORGANIC MATERIALS. TREATMENT PROCESSES IN SELECTED PLANTS WILL BE MODIFIED AND PROCESS SAMPLES WILL ALSO BE ANALYZED FOR ORGANICS. GC/MS EQUIPMENT WILL BE USED FOR IDENTIFICATION OF INDIVIDUAL COMPOUNDS. TOTAL AND FECAL COLIFORM AND TOTAL BACTERIAL DENSITIES WILL BE DETERMINED DURING ALL PLANT MODIFICATION STUDIES TO INSURE THAT THE BACTERIOLOGICAL QUALITY OF THE WATER IS NOT ADVERSELY AFFECTED.

REDUCATION OF SALINE POLLUTION OF THE GROUNDWATER ATTRIBUTED TO DAIRY OPERATIONS

START/ COMPL DATE : 08/76 - 10/78 : FUNDING : EST. - FY 77 / $ 32578

10/77 -CONTINUATION FUNDING
10/78 -FINAL REPORT PUBLICATION

OBJECTIVES: EVALUATION OF GROUNDWATER QUALITY IN THE CHINO HYDROLOGIC B ASIN INDICATES DEGRADATION DUE TO SALINE POLLUTION LEACHED FROM THE WASTES OF DAIRY COWS. THE MANURE OF THESE ANIMALS IS KNOWN TO CONTAIN SOME NUT RITIONAL VALUE. TECHNOLOGY EXISTS BY WHICH THIS FEED CAN BE RECAPTURED. IF THE QUALITY OF THE FOOD PRODUCED IS COMPARABLE TO MORE NORMAL RATIONS A VIABLE MEANS OF WASTE DISPOSAL WILL BE AVAILABLE. THIS PROJECT IS DESIGNED TO TEST AND DEMONSTRATE THE VALUE OF THE FEED PRODUCED FROM COW MANURE. APPROACH: DAIRY COW MANURE WILL BE COLLECTED FROM DAIRIES IN SAN BERNARDIN O COUNTY AND CONVERTED TO FEED PRODUCTS. THIS FEED WILL BE PRESENTED UNDER TEST CONDITIONS TO GROWING DAIRY HEIFERS, BEEF CATTLE AND CHICKENS TO DETERMINE ITS VALUE IN COMPARISON TO STANDARD RATIONS. LABORATORY EVALUATIONS SHALL BE CONDUCTED TO DETERMINE THE ABILITY OF THE FEED TO SUPPORT THE GROWTH OF RUMEN MICROBES AND TO ASSAY THE AMINO ACID CONTENT OF THE FEED. TOXIC METAL DEPOSITS IN THE FECES, TISSUES AND ORGANS OF THE ANIMALS FED IN THE PROGRAM SHALL BE EVALUATED. CURRENT PLANS: THE VAR IOUS WORK PROJECTS OUTLINED IN THE APPROACH HAVE BEEN DELEGATED TO SEVERAL CAMPUSES OF THE UNIVERSITY OF CALIFORNIA AND SAN BERNARDINO STATE COLLEGE WHERE EXPERTS IN THE REQUIRED SCIENTIFIC FIELDS ARE ON STAFF. THESE PEOPLE WILL PERFORM THE WORK AND REPORT THEIR FINDINGS. SCHOOLS IN VOLVED: (A) UNIVERSITY OF CALIFORNIA, DAVIS; (B) UNIVERSITY OF CALIFORNIA, RIVERSIDE; (C) CALIFORNIA STATE COLLEGE, SAN BERNARDINO.

COMBINED TESTING PROTOCOL FOR DETECTING ENVIRONMENTAL MUTAGENIC AGENTS

START/ COMPL DATE : 08/76 - 08/78 : FUNDING : EST. - FY 77 / $ 115000

09/79 -COMPLETE ALL EXPERIMENTAL WORK
10/79 -COMPLETE DRAFT OF FINAL REPORT

THIS RESEARCH HAS THE OBJECTIVE OF DETERMINING THE EFFECTS OF DIELDRIN ON THE DYNAMICS OF POPULATIONS OF GUPPIES AND THEIR PREY ORGANISMS, AMPHIPODS, COPEPODS, AND MICROORGANISMS--I NTERACTING IN LABORATORY ECOSYSTEMS. THE PREY ORGANISMS OF THE GUPPIES ARE SUPPORTED PRIMARILY BY THE ADDITION OF FOOD MATERIAL PREPARED FROM DRIED ALFALFA, AND THE GUPPY POPULATIONS ARE EXPLOITED BY REMOVAL AT DIFFERENT RATES IN DIFFERENT TREATMENT. ANCILLARY AQUARIUM EXPERIMENTS ON THE EFFECTS OF THE PESTICIDE ON SURVIVAL, REPRODUCTION, AND GROWTH OF GUPPIES AND THEIR PREY ORGANISMS ARE CONDUCTED IN ORDER TO BE ABLE TO EV ALUATE, BY COMPARISON TO THE COYSYSTEM STUDY RESULTS, THE ADEQUACY OF SUCH RELATIVELY SIMPLE AND MORE GENERALLY EMPLOYED EXPERIMENTS FOR PREDICTING E FFECTS IN MORE COMPLEX ECOLOGICAL SYSTEMS. THESE AQUARIUM STUDIES WILL, IN ADDITION, PROVIDE INFORMATION OF VALUE IN INTERPRETING THE EFFECTS OF THE PESTICIDE IN THE LABORATORY ECOSYSTEM EXPERIMENTS.

804623

Three major objectives established for this project were: 1) To teach health personnel, particularly those concerned with health of migrant, agricultural, and pesticide chemical workers and their families how to recognize, diagnose, treat and prevent pesticide illness and poisoning; 2) to develop a system to more accurately validate, verify and document the incidence of pesticide toxicology by introducing and making available the use of an acholest screening test; 3) to teach an additional core of individuals in "Train-the-trainer" programs how to use the newly developed training kit so that they, in turn, can teach others about pesticide illness.

A training program, including the text, was prepared and taught in 17 locations in the United States; additionally, 5 "Train-the-trainer" sessions were held to teach others to use the ten-module of slide-tape training kits which was developed. The use of an acholest screening test was demonstrated and kits were distributed to migrant and rural health clinics.

Evaluation summaries document that the programs were well received. Additional sessions are planned for areas not yet covered and where repeat performances are requested. Continued follow-up on the use of the acholest kit is planned.

NEW AMINE CARBAMATE GELATION TECHNIQUES FOR USE IN OIL SPILL RECOVERY OPERATIONS

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 29000
TASK/EPA CODE :B623C-602 / R804628-01 (GRANT) PRIOR FY76 / 1

05/78 -FINAL REPORT RECEIVED

THE MAIN OBJECTIVE OF THIS RESEARCH IS TO DEVELOP FOR "REAL WORLD" SITUATIONS AND AMINE CARBAMATE GELATION TECHNIQUE TO FACILITATE THE REMOVAL OF PETROLEUM DERIVED OIL SPILLED ON OCEAN OR INLAND WATERS. THE SPECIFIC OBJECTIVES ARE: A. DETERMINATION OF PHYSICAL PROPERTIES OF A SELECTED GELLING AGENT (DEHYDROABIETYL AMINE), INCLUDING SOLUBILITY AND DETERGENCY DETERMINATIONS OF THE AGENT IN WATER/OIL MATRICES. B. DEVELOPMENT OF CARBAMATING AGENTS OTHER THAN CARBON DIOXIDE. C. DETERMINE THE FEASIBILITY OF OIL AND AGENT RECOVERY BY CENTRIFUGATION. D. PILOT STUDIES OF GELATION TECHNIQUE IN LARGE LABORATORY WAVE TANKS. E. FIELD TESTS OF GELATION TECHNIQUE AT EPA TEST FACILITIES. F. PRELIMINARY EVALUATION OF AGENT FOR GELLING NON PETROLEUM HAZARDOUS MATERIALS. G. PRELIMINARY EVALUATION OF THE GELATION TECHNIQUE'S UTILITY IN THE PROPHYLACTIC TREATMENT OF BEACH FRONTS.

EFFECT OF PASTURING ON NON-POINT SURFACE RUNOFF

START/ COMPL DATE : 11/76 - 10/79 : FUNDING : EST. - FY 77 / $ 87898
TASK/EPA CODE :L617D-29 / R804631-02 (GRANT) PRIOR FY76 / $ 886281

MILE: 11/76 -PROJECT INITIATED
10/79 -FINAL PROJECT REPORT PUBLISHED

THIS PROJECT WILL OBTAIN HYDROLOGIC AND CHEMICAL DATA FOR RUNOFF EVENTS ON THREE SELECTED WATERSHEDS WITH DIFFERENT LIVESTOCK PASTURING REGIMES. THE HYDROCHEMICAL DATA WILL BE EVALUATED AND COMPARED TO HYDROLOGIC HISTORY OF THE WATERSHEDS TO IDENTIFY HYDROLOGIC FACTORS AND THE LIVESTOCK/AGRONOMIC MANAGEMENT PRACTICES THAT CONTRIBUTE TO OR DECREASE THE CONTRIBUTION OF POLLUTANTS TO NON-POINT SURFACE RUNOFF. ALSO THE DEGREE OF BACTERIAL POLLUTION PRESENT IN NON-POINT SURFACE RUNOFF FROM CATTLE PASTURES WILL BE ESTABLISHED. THIS DATA WILL BE USED IN DEVELOPING RUNOFF-LOADING MODELS FOR PASTURE LAND TO ASSESS NON-POINT SOURCE POLLUTION POTENTIAL. A MEMORANDUM OF UNDERSTANDING BETWEEN THE OHIO AGRICULTURAL RESEARCH AND DEVELOPMENT CENTER (OARDC), WOOSTER, OHIO, AND THE USDA-ARS NORTH APPALACHIA EXPERIMENTAL WATERSHED (NAEW), COSHOCTON, OHIO, ENABLES THESE INSTITUTIONS TO CONDUCT COOPERATIVE RESEARCH. THE WATERSHEDS FOR THIS PROJECT HAVE OVER 30 YEARS OF HYDROLOGIC HISTORY. PASTURING REGIMES TO BE MONITORED ARE: 1) ROTATIONAL PASTURING OF CATTLE IN THE SUMMER AND WINTER FEEDING ON ONE WATERSHED WITH HAY BROUGHT TO IT, 2) SUMMER ROTATIONAL PASTURING ONLY, AND 3) WINTER PASTURE WHERE CATTLE ARE FED SAVED AUTUMN REGROWTH AND HAY HARVESTED ON THE SITE. PERIODIC SAMPLING OF STORM EVENTS HAS BEEN INITIATED FOR THE THREE PASTURED WATERSHEDS. ALSO, A FORESTED, CONTROL WATERSHED IS BEING SAMPLED (COMPOSITE). RUNOFF SAMPLES ARE BEING ANALYZED FOR N (NH3, NO2/NO3 AND TOTAL-N), TOTAL-P, TOC, COD, BOD, SEDIMENT YIELD AND SEDIMENT N AND P. THE PROJECT WAS INITIATED ON 11/1/76 AND WILL LAST THREE YEARS.

WORKER REENTRY IN FLORIDA CITRUS - PESTICIDES IN THE AGRICULTURAL ENVIRONMENT

START/ COMPL DATE : 01/77 - 01/79 : FUNDING : EST. - FY 77 / $ 52000

OBJECTIVES: A) TO CONSTRUCT THE DISLODGEABLE RESIDUE PROFILE OF ETHION (O,O,O',O'-TETRAETHYL S,S'-METHYLENE BISPHOSPHORODITHICATE), CARBOPH ENOTHION S-((P-CHLOROPHENYLTHIO) METHYL) O,O-DIETHYL PHOSPHORODITHIOATE, A ND DIOXATHION S,S'-P-DIOXANE-2,3-DIYL O,O-DIETHYL PHOSPHORODITHIOATE AND T HEIR OXON METABOLITES IN A FLORIDA ROUND ORANGE ECOSYSTEM. B) TO DETERMINE THE INFLUENCE OF ENVIRONMENTAL VARIABLES ON THESE PROFILES.

APPROACH: A) EXPERIMENTS WILL BE CONDUCTED DURING THE PERIODS JUNE-AUG., NOV.-JAN., AND MAR.-JUNE. THESE PERIODS REPRESENT DISTINCTIVE ENVIRONMENTAL CONDITIONS IN FLORIDA. TEMPERATURE, HUMIDITY, FREE WATER ON LEAVES AND FRUIT, RAINFALL, SOLAR INCIDENCE, AND WIND SPEED AND DIRECTION WILL BE MONITORED DURING EACH EXPERIMENT. B) PESTICIDES WILL BE APPL IED WITH CONVENTIONAL MEANS, AND SAMPLING OF AIR, LEAVES, SOIL, FRUIT, AND COVER CROP WITH TIME WILL BE PERFORMED. GLC ANALYSES OF RESIDUE LEVELS WILL BE RUN WITH COMPLETE CHEMICAL CHARACTERIZATION OF CONVERSION PR ODUCTS. C) COMPREHENSIVE STATISTICAL ANALYSES WILL BE RUN ON THE DATA WITH PARTICULAR ATTENTION PAID TO THE CORRELATION OF RESIDUE LEVELS WITH ENVIRONMENTAL VARIABLES.

EFFECTS OF VIRUS PARTICLE AGGREGATION ON THE DISINFECTION OF WATER SUPPLIES

THE SURVIVAL OF VIRUS IN WATER TREATED WITH DISINFECTING AGENTS IS PRACTICALLY DEPENDENT ON THE PHYSICAL STATE OF THE VIRUS PARTICLES IN THE WATER. THIS RESEARCH IS DIRECTED TO REVEAL THE NATURE OF VIRION AGGRE GATION, TO MEASURE IT AS PRECISELY AS CAN BE, AND TO SEEK QUANTITATIVE REL ATIONSHIPS BETWEEN THE DATA SO GATHERED AND THE INACTIVATION RATE OF VIRUS INFECTIVITY TO DIFFERENT DISINFECTING AGENTS OPERATING ON THE AG GREGATED VIRUS. AGENTS OF PRIMARY INTEREST WILL BE VARIOUS ACTIVE FORMS OF CHLORINE AND VIRUSES OF CHIEF CONCERN WILL BE THOSE OF THE ENTERIC GROUP. QUANTITATIVE TECHNIQUES WILL BE USED FOR DIRECT OBSERVATION AND ASSAY OF VIRION AGGREGATION BY ELECTRON MICROSCOPY SUPPLEMENTED BY MORE SENSITIVE BUT LESS DIRECT DIFFERENTIAL ULTRACENTR IFUGATION. COMPLEX FORMATION BETWEEN VIRIONS AND PARTICULATE MATTER IN THE WATER WILL BE EXAMINED AS WELL AS THE EFFICIENCY OF CLUMPS OF VIRIONS TO PLAQUE FORMATION, THE POSSIBILITY THAT VIRUS MAY EXIST IN A CONFORMATIONALLY RESISTANT STATE, AND THE INCREASE OF TITER OF CHLOR INE-TREATED VIRUS THROUGH SUBSEQUENT AGGREGATION. THEN EXPERIMENTS WILL BE DONE BY A GROUP CONSISTING OF 2 HALOGEN CHEMISTS AND 2 VIROLOGISTS WITH O

804639

A literature review was conducted to provide a basis for analyzing the results of previous tests on surface treatment agents, comparing agent effectiveness, and recommending agents for the preliminary field tests. Preliminary field tests of agent effectiveness, toxicity, and application techniques were undertaken on salt-marsh sections and simulated beaches. The surface treatment agents tested were film-forming agents (polyvinyl acetate, xanthan gum, citrus pectin, sodium silicate, and borate-silicate mixture), surfactant/dispersing agents (BP 1100-X, BP 1100-WD, and Exxon Corexit 7664), and a surfactant/collecting agent (Shell Oil Herder). From the results of the preliminary field tests, two film-forming agents, polyvinyl acetate and xanthan gum, and the surfactant/collecting agent, Shell Oil Herder, were recommended for and tested during the full-scale field tests at Sewaren Beach, New Jersey. In addition, a flowing film of water was tested for effectiveness as a surface treatment agent.

OXIDATION OF WATER SUPPLY REFRACTORY SPECIES BY OZONE WITH ULTRAVIOLET RADIATION

START/ COMPL DATE : 09/76 - 08/79 : FUNDING : EST. - FY 77 / $ 88914

THIS PROJECT WILL: A. INVESTIGATE THE FEASIBILITY FOR THE REMOVAL OF CERTAIN REFRACTORY ORGANIC COMPOUNDS FROM WATER AT THE CONCENTRATION LEVELS AT WHICH SUCH COMPOUNDS ARE OFTEN FOUND IN RAW AND TREATED DRINKING WATER SUPPLIES. THE METHOD TO BE EXPLORED CONSISTS OF OXIDATION WITH OZONE/OXYGEN OR OZONE/AIR IN THE PRESENCE AND ABSENCE OF ULTRAVIOLET RADIATION. B. DETERMINE THE RATES OF OXIDATION OF SUCH COMPOUNDS UNDER VARIOUS REACTOR CONDITIONS, I.E. INTENSITY OF ULTRAVIOLET RADIATION, TEMPERATURE, CONCENTRATION, ETC. C. DETERMINE BY MS/GC THE INTERMEDIATE AND FINAL OXIDATION/PHOTOLYSIS PRODUCTS WHICH ARE FORMED FROM THE O3/UV TREATMENT OF A SERIES OF APPROPRIATE COMPOUNDS, INCLUDING: HALOMETHANE PRECURSORS (HUMIC ACIDS), HALOMETHANES INCLUDING PARTICULARLY CHLOROFORM, A POLYCYCLIC AROMATIC HYDROCARBON, POLYCHLORINATED BIPHENYLS, AND OTHER SELECTED ORGANICS WHICH OCCUR IN NATURAL AND TREATED WATERS. D. EVALUATE THE FEASIBILITY OF UTILIZING OZONE/UV TREATMENT AS A PRACTICAL MEANS OF REMOVING REFRACTORY ORGANICS FROM WATER, AND ESTABLISH THE DESIGN PARAMETERS FOR THE PROCESS AT AN APPROPRIATE SCALE.

PRELIMINARY MULTI-MEDIA AND ASSESSMENT OF POLLUTION PROBLEMS IN THE FOOD INDUSTRY

START/ COMPL DATE : 04/77 - 10/77 : FUNDING : EST. - FY 77 / $ 47000

12/79 -FINAL REPORT ON METHOD AND MECHANISM

WE HAVE DEVELOPED AND ARE CONTINUING THE TESTING OF A QUICK, SENSITIVE METHOD OF DETECTION OF WATER-BORN CARCINOGENS USING LABORATORY REARED FISH, AS A PART OF AN OVERALL SCREENING SYSTEM FOR CARCINOGENS. WE HOPE TO EXTEND THE TECHNIQUE TO A TISSUE CULTURE SYSTEM. EARLY APPLICATIONS ARE ALSO PLANNED TO INCLUDE THE EXAMINATION OF THE KINETICS OF TRANSMISSION OF CARCINOGENS ALONG NATURALLY OCCURRING FOOD CHAINS.

PREPARE IDENTIFICATION MANUAL FOR THE ROTIFERS

START/ COMPL DATE : 04/77 - 09/78 : FUNDING : EST. - FY 77 / $ 12500
TASK/EPA CODE :A612A-12 / R804652-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C I WEBER
INVESTIGATORS : J E GANNON UNIV. OF MICHIGAN
MILE: 09/78 -COMPLETE IDENTIFICATION MANUAL FOR THE ROTIFERS
OBJECTIVE: TO DEVELOP AN IDENTIFICATION MANUAL FOR THE COMMON SPECIES OF ROTIFERS IN THE UNITED STATES. APPROACH: THE GRANTEE WILL USE PERSONAL KNOWLEDGE OF ROTIFER IDENTIFICATION AND CONSOLIDATE PUBLISHED INFORMATION ON THE TAXONOMY AND ECOLOGY OF THE ROTIFERS TO PREPARE A KEY FOR THEIR IDENTIFICATION AND SUMMARIZE DATA ON THEIR ENVIRONMENTAL REQUIREMENTS AND POLLUTION TOLERANCE. OUTPUT: AN AGENCY REPORT CONTAINING A KEY TO THE IDENTIFICATION OF THE ROTIFERS AND SUMMARY DATA ON THEIR ENVIRONMENTAL REQUIREMENTS AND POLLUTION TOLERANCE.

(1) Objectives are to (a) develop a "framework" for the systematic analysis in the socioeconomic context of policies to control hazardous wastes, (b) to make a generalized analysis of the majority of existing and potential policies for hazardous waste control, and to array these policies so that the different impacts and trade-offs between alternative policies are demonstrated.

(2) Approach will be to identify the "parties-at-interest" and the nature of the impacts to which they are subjected, together with their possible responses. This will lead to generalized policy analysis using benefit/cost analysis techniques for quantifiable elements. Impacts of each policy-waste combination will be compared. The approach will be demonstrated by the use of one or two case studies in which the analysis is pursued in greater detail.

WATER-QUALITY HYDROLOGY OF SURFACE-MINED WATERSHEDS

START/ COMPL DATE : 09/76 - 09/78 : FUNDING : EST. - FY 77 / $ 39000
TASK/EPA CODE :B623B-419 / R804673-02 (GRANT) PRIOR FY76 / $ 390001
PROJECT OFFICER : R C WILMOTH

MILE: 09/76 -FUNDING PACKAGE SUBMITTED
10/76 -AWARD FUNDS FOR PROJECT
10/77 -CONTINUATION
09/78 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THE PROJECT IS TO DEVELOP A MANUAL OF PROCEDURES FOR QU ANTITATIVELY ASSESSING THE IMPACT OF INDIVIDUAL SURFACE MINING PROJECTS ON THE WATER RESOURES IN THE AFFECTED WATERSHED. ONE APPROACH IS TO GATHER ALL PERTINENT DATA THAT IS AVAILABLE AND DETERMINE THE REQUIRED PARA METERS BY FITTING THE MODEL TO THE DATA. THE SECOND APPROACH IS TO USE A W ATERSHED MODEL TO GENERATE "FIELD" DATA FOR A WIDE VARIETY OF HYPOTHETICAL SITUATIONS AND DETERMINE THE REQUIRED PARAMETERS FOR THE SIMPLER MODEL. A CORRELATION BETWEEN THE PARAMETERS AND CONDITIONS SIMULATED BY THE WA TERSHED MODEL WILL BE MADE. THE CORE OF THE MANUAL WILL BE A WATER-QUALITY HYDROLOGY MODEL DEVELOPED IN A PREVIOUS PROJECT. THIS MODEL HAS BEEN TESTED SUCCESSFULLY ON FOUR WATERSHEDS PREVIOUSLY, AND WILL BE FURTHER TESTED USING DATA NOW BEING COLLECTED AT MANY LOCATIONS IN THE ROCKY MOUNTAIN REGION. DETAILED PROCEDURES FOR TRANSLATING BASIC WATERSHED OBSERVATIONS INTO THE APPROPRIATE MODEL PARAMETERS WILL BE GIVEN.

ENVIRONMENTAL MONITORING & ASSESSMENT OF COAL STRIP MINING & RECLAMATION
IN THE FOUR CORNER AREA

START/ COMPL DATE : 09/76 - 10/79 : FUNDING : EST. - FY 77 / $ 145000
TASK/EPA CODE :B623B-418 / R804679-02 (GRANT) PRIOR FY76 / $ 1960001
PROJECT OFFICER : J F MARTIN
INVESTIGATORS : M M FOGEL UNIV. OF ARIZONA
J L THAMES UNIV. OF ARIZONA

L H HEKMAN UNIV. OF ARIZONA
L DUCKSTEIN UNIV. OF ARIZONA

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDED
09/78 -AWARD CONTINUATION
10/79 -FINAL REPORT RECEIVED

THE OVERALL OBJECTIVE OF THE PROJECT IS TO DEVELOP CRITERIA FOR THE OPT IMAL MANAGEMENT OF LAND THAT HAS BEEN DISTRIBUTED BY COAL STRIP MINING ACT IVITIES. THE CRITERIA WILL BE BASED ON MINIMIZING AIR AND WATER POLLUTION. SPECIFICALLY, THE SECOND PHASE OF THE PROJECT WILL BE DEVOTED PRINCIPALLY TO MONITORING (1) TWO SELECTED GROUNDWATER BASINS, (2) THREE SURFACE WATER SITES AND (3) THREE AIR QUALITY SITES TO DETERMINE THE EFFECTS OF STRIP MINING ON THE ENVIRONMENT. SEVERAL HOLES WILL BE DRILLED, CASED AND MONITORED FOR EACH OF THE SHALLOW GROUNDWATER BASINS, INFILTRATION ST UDIES WILL BE USED TO ASCERTAIN THE MOBILITY OF POLLUTANTS FROM THE LAND S URFACE TO GROUNDWATER. THE SURFACE WATER SITES WILL INVOLVE BOTH MINED AND UNDISTURBED AREAS AS WELL AS REVEGETATED AREAS WHICH ARE EITHER IRRIGATED OR RAINFED. HIGH VOLUME AIR SAMPLERS WILL BE USED TO MONITOR PARTICULATE CONCENTRATIONS BEFORE, DURING AND AFTER MINING DEVELOPMENT.

YERSINIA ENTEROCOLITICA - RESERVOIRS AND IMPORT IN HUMAN DISEASE

START/ COMPL DATE : 00/76 - 00/79 : FUNDING : EST. - FY 77 / $ 31000
TASK/EPA CODE :D607A-044 / R804681 (GRANT) PRIOR FY76 / $ 290001
PROJECT OFFICER : V J CABELLI
INVESTIGATORS : M J PICKETT UNIV. OF CALIFORNIA
S M HARVEY CALIF. STATE UNIV. & COLLEGES
MILE: 06/78 -DEVELOPMENT AND EVALUATION OF ENUMERATION METHOD
09/79 -ECOLOGY OF PATHOGEN IN RELATION TO POLLUTION SOURCES

OUR OBJECTIVES ARE THREEFOLD: (1) REFINEMENT OF A NEW DIFFERENTIAL MEDIUM TO PROVIDE A SENSITIVE METHOD FOR DETECTION AND QUANTIFICATION OF Y ERSINIA ENTEROCOLITIC (2) ELUCIDATION OF THE ECOLOGY OF Y. ENTEROCOLITICA, AND (3) CLARIFICATION OF THE RELATIONSHIP BETWEEN THE WATER STRAINS OF Y. ENTEROCOLITICA AND THE STRAINS OF ANIMAL AND HUMAN ORIGIN. TOWARD THE ACHIEVEMENT OF THESE OBJECTIVES, WE HAVE DEVELOPED A DIFF ERENTIAL MEDIUM FOR Y. ENTEROCOLITICA EMPLOYING MANGANOUS SULFATE AND UREA AS THE INDICATOR SYSTEM. WE ARE PRESENTLY TESTING THE EFFICACY OF THIS MED IUM WITH VARIOUS SELECTIVE AGENTS WHEN USING MEMBRANE FILTRATION ISOLATION PROCEDURES. AFTER EXTENSIVE LABORATORY TESTING OF OUR METHOD, WE WILL DO A FIELD STUDY TO QUANTIFY Y. ENTEROCOLITICA IN WATER AS WELL AS IN OTHER ENVIRONMENTAL SOURCES. TO DATE, USING NON-QUANTITATIVE METHODS, WE HAVE ISOLATED 62 STRAINS OF Y. ENTEROCOLITICA FROM WATER PLUS 2 STRAINS FROM FECAL SWABS OF SQUIRRELS AND 3 STRAINS FROM RODENT BURROWS. OVER THE PAST YEAR, WE HAVE SUBJECTED OUR ISOLATES AND STRAINS COLLECTED FROM OTHERS (A TOTAL OF 200 STRAINS) TO 300 TESTS. THE DATA GENERATED BY THESE TESTS WILL BE STATISTICALLY ANALYZED AND RELATIONSHIPS BETWEEN THE ORGANISMS GRAPHICALLY DEPICTED USING NUMERICAL TAXONOMY METHODS. THESE RELATIONSHIPS WILL BE FURTHER CONFIRMED BY DNA HYBRIDIZATION AND BACTERIOPHAGE TYPING.

AN INVESTIGATION OF THE ECOLOGICAL EFFECTS OF RESIDUAL OZONE TO SELECTED ESTUARINE SPECIES

START/ COMPL DATE : 08/76 - 08/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :9625A-1-08 / R804683-02 (GRANT) PRIOR FY76 / $ 800001
PROJECT OFFICER : W P DAVIS
INVESTIGATORS : D T BURTON PHILA. ACAD. OF NAT. SCIENCES
MILE: 08/78 -FINAL REPORT

A COOPERATIVE EFFORT IS PROPOSED BETWEEN THE ACADEMY OF NATURAL SCIENCES OF PHILADELPHIA AND THE UNIVERSITY OF MARYLAND TO STUDY THE ECOLOGICAL EFFECT OF RESIDUAL OZONE TO SELECTED ESTUARINE SPECIES. WE PROPOSE TO DETERMINE THE TOXICITY OF RESIDUAL OZONE, BOTH LETHAL AND SUBLETHAL E FFECTS, TO SELECTED COMMERCIALLY AND/OR RECREATIONALLY IMPORTANT ESTUARINE FINFISH AND SHELLFISH SPECIES AND THEIR LIFE STAGES UNDER VARIOUS ENVIRONMENTAL CONDITIONS. WE WILL ALSO COMPARE THE TOXICOLOGICAL EFFECTS OF RESIDUAL OZONE TO THOSE OF RESIDUAL CHLORINE WHICH ARE BEING DETERMINED ON THE SAME SPECIES AND LIFE STAGES UNDER THE SAME EXPERIMENTAL REGIMES SET FORTH ABOVE. FINALLY, WE PROPOSE TO EVALUATE THE ENVIRONMENTAL ACCEPTABILITY OF OZONE AS AN ALTERNATIVE TO CHLORINE.

PREDICTING ORGANIC CONTAMINANT REMOVAL BY CLAY MINERALS AND WASTE MATERIALS

START/ COMPL DATE : 07/76 - 06/78 : FUNDING : EST. - FY 77 / $ 75359
TASK/EPA CODE :C618A-7036 / R804684 01 (GRANT) PRIOR FY76 / $ 604951
PROJECT OFFICER : R A CARNES
INVESTIGATORS : R A GRIFFIN UNIV. OF ILLINOIS
R A GRIFFIN U.S. DEPT. OF THE INTERIOR
E S CHIAN UNIV. OF ILLINOIS
R A CARNES UNIV. OF ILLINOIS

MILE: 10/78 -FINAL REPORT

THE PURPOSE OF THE PROPOSED RESEARCH IS TO MEASURE THE CAPACITY OF SEL ECTED CLAY MINERALS AND WASTE COAL CHARS TO ADSORB HAZARDOUS ORGANIC COMPO UNDS FROM PURE AQUEOUS SOLUTIONS OF THE COMPOUNDS AND FROM MANUFACTURING W ASTES THAT CONTAIN THE COMPOUNDS. THE ADSORPTION WILL BE MEASURED AS A FUN CTION OF PH, CONCENTRATION OF ADSORBATE AND ADSORBENT, AND TIME. THE ADSOR PTION OF FAMILIES OF COMPOUNDS WILL BE MEASURED TO SYSTEMATICALLY DETERMIN E THE MECHANISMS RESPONSIBLE FOR ADSORPTION. TO AID IN A SYSTEMATIC EVALUA TION OF MECHANISMS RESPONSIBLE FOR ATTENUATION, A COMPREHENSIVE CRITICAL R EVIEW OF LITERATURE WILL BE UNDERTAKEN. THE VARIOUS ADSORBENTS TESTED WILL BE EVALUATED AS TO THEIR POTENTIAL USEFULNESS AS LINERS FOR LANDFILLS ACCEPTING HAZARDOUS ORGANIC-BEARING WASTES. THE RESULTS OF THIS STUDY SHOULD ALLOW PREDICTIVE MODELS TO BE DEVELOPED THAT WILL AID RE SEARCHERS AND REGULATORY AGENCIES IN PREDICTION OF ADSORPTION BEHAVIOR AND THE RELATIVE POLLUTION HAZARDS OF UNTESTED COMPOUNDS WITH SIMILAR STRUCTURES.

ACCUMULATION AND FATE OF POTENTIALLY HAZARDOUS SUBSTANCES IN RECENT SEDIMENTS OF LAKE HURON AND SAGINAW BAY

START/ COMPL DATE : 01/76 - 07/78 : FUNDING : EST. - FY 77 / $ 60198
TASK/EPA CODE :N608A-014 / R804686-02 (GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : M D MULLIN
INVESTIGATORS : J A ROBBINS UNIV. OF MICHIGAN
K A JOHANSEN UNIV. OF MICHIGAN
J R KREZOSKI UNIV. OF MICHIGAN
K REMMERT UNIV. OF MICHIGAN

MILE: 10/78 -FINAL REPORT DUE

THE AIM OF THIS STUDY IS TWOFOLD: (1) TO OBTAIN PRESENT AND HISTORICAL RATES OF ACCUMULATION OF METALS AND NUTRIENTS IN THE FINE-GRAINED SEDIMENTS OF LAKE HURON AND (2) TO EVALUATE THE ROLE OF RESUSPENSION AND SEDIMENT-WATER EXCHANGE PROCESSES IN THE REGULATION OF WATER QUALITY. TO ACCOMPLISH THE FIRST OBJECTIVE, NULTIPLE UNDISTURBED 50 CM LONG CORES COLLECTED OVER A WIDE AREA OF THE LAKE HAVE BEEN SECTIONED ABOARD SHIP VIA HYDRAULIC EXTRUSION WHICH PERMITS PRECISE CM THICK SECTIONING OF FL UID SEDIMENTS NEAR THE SEDIMENT-WATER INTERFACE. CORE SECTIONS, FROZEN FOR PRESERVATION, ARE SUBSEQUENTLY FREEZE DRIED AND ACID EXTRACTS A NALYZED FOR NA, MG, CA, K, MN, FE, ZN, CU, NI, PB, CR, P AND CD VIA ATOMIC ABSORPTION SPECTROPHOTOMETRY. IN ADDITION, SELECTED SUBSAMPLES OF WHOLE DRY SEDIMENT ARE ANALYZED VIA NEUTRON ACTIVATION ANALYSIS FOR AL, CA, FE, K, MG, NM, FE, NA, TI, AS, BA, BR, CE, CO, CR, CS, CU, EU, HF, LA, LU, RB, SB, SC, SM, TH, U, V, AND YB. SEDIMENTATION RATES ARE DE TERMINED PRIMARILY FROM VERTICAL PROFILES OF LEAD-210 WITH FALLOUT CESIUM-137 PROVIDING SUPPLEMENTARY INFORMATION. CONCENTRATION DATA IN COMBINATION WITH SEDIMENTATION RATES GIVE ESTIMATES OF THE NET FLUX OF ELEMENTS TO SEDIMENTS. TO ACCOMPLISH THE SECOND OBJECTIVE WE WILL INTE NSIVELY STUDY SEASONAL VARIATIONS IN SEDIMENT-WATER EXCHANGE AT ONE OR TWO MARKED LOCATION IN SAGINAW BAY. RESUSPENSION EFFECTS AND PARTICLE SINKING RATES WILL BE DETERMINED FROM STANDARD AND AUTOMATED MICROTRAPS. LO NG TERM RESUSPENSION EFFECTS WILL BE ESTIMATED FROM RESURVEY OF CESIUM-137 FINE-GRAINED DEPOSITS IN THE BAY. DIVER-COLLECTED CORES WILL BE SECTIONED AND SAMPLED FOR PORE WATER UNDER CONDITIONS APPROXIMATING THE IN SITU ENVIRONMENT AND DIRECT FLUX MEASUREMENTS ON RECOVERED CORES WILL COMPLEMENT PORE WATER STUDIES. THE ROLE OF BENTHIC FAUNA ON SEDIMENT-WATER EXCHANGE WILL BE INVESTIGATED BOTH IN THE FIELD AND IN THE LABORATORY. MULTIPLE RADIOTRACER METHODS WILL BE USED TO DETERMINE THE EFFECT OF SELECTED BENTHOS ON THEIR SEDIMENTARY ENVIRONMENT.

FOOD WEBS, POPULATIONS, AND PRODUCTIVITY IN A SOUTHEAST COASTAL MARINE MARSH

START/ COMPL DATE : 09/76 - 08/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :Q625A-1-07 / R804688-02 (GRANT) PRIOR FY76 / $ 700001
PROJECT OFFICER : W P DAVIS
INVESTIGATORS : N A CHAMBERLAIN COLL. OF CHARLESTON
C K BIERNBAUM COLL. OF CHARLESTON

MILE: 08/78 -FINAL REPORT

THE OBJECTIVE OF THIS STUDY IS TO ESTABLISH LIFE HISTORY AND ECOLOGICAL INFORMATION ABOUT SALT MARSH COMMUNITIES IN THE NORTH EDISTO ESTUARY, LEADENWAH MARSH. THIS SITE WAS CHOSEN BECAUSE OF ITS ISOLATION FROM EXC ESSIVE INFLUENCE OF HUMAN ACTIVITIES. ADDITIONALLY THE SITE IS ADJACENT TO THE E.P.A. BEARS BLUFF FIELD STATION. THERE, STUDIES ON EFFECTS OF LOW LEVELS OF HALOGENATED POLLUTANTS UPON MIXED COMMUNITIES OF MARSH ORGANISMS ARE BEING DONE. STUDIES OF THE LIFE HISTORIES OF ORGANISMS ON THE OYSTER BEDS, MUD, AND MARSH GRASS HABITATS WILL SUPPLY VALUABLE BASELINE DATA ABOUT BREEDING CYCLES, ONTOGENY AND TROPHIC RELATIONSHIPS, THEREBY PROVIDING INSIGHT FOR THE ECOSYSTEM MODELS RUN AT AT BEARS BLUFF. THE BASIC STUDY PLAN COMBINES EXPERTISE IN MYCOLOGY, PLANT PHYSIOLOGY, PARASITOLOGY, GENETICS, INVERTEBRATE AND VERTEBRATE ZOOLOGY, AND ECOLOGY.THE SECOND YEAR OF THE STUDY WILL FOCUS MORE CLOSELY ON STUDIES ON PRODUCTIVITY AND TROPHIC RELATIONSHIPS AMONG THE MARSH ORGANISMS. UNDER CONSIDERATION (AMONG OTHER STUDIES) ARE HABITAT SELECTION AND TROPHIC RELATIONSHIPS OF: AMPHIPODS, FISHES, AND FISH LARVAE IN THE UPPER MARSH; INTERTIDAL AND SUBTIDAL BENTHIC CRUSTACEA; AND FISHES OF THE LARGER CREE

COMPARATIVE KINETIC STUDIES OF NUTRIENT UPTAKE AND GROWTH IN THE GREAT LAKES PHYTOPLANKTONS

START/ COMPL DATE : 08/76 - 07/79 : FUNDING : EST. - FY 77 / $ 75000
TASK/EPA CODE :N608A-028 / R804689-02 (GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : V J BIERMAN
INVESTIGATORS : G RHEE STATE DIV. OF LABS. & RESEARC
MILE: 06/77 -MANUSCRIPT ACCEPTED FOR PUBLICATION IN LIMNOLOGY & OCEANOGRAPHY
06/77 -CHAPTER PREPARED FOR ADVANCES IN AQUATIC MICROBIOLOGY

IN FRESHWATER ENVIRONMENTS, LIMITING NUTRIENT FOR BIOLOGICAL PRODUCTION IS FREQUENTLY P FOLLOWED BY N. RECENT STUDIES OF NUTRIENT -LIMITED GROWTH IN PHYTOPLANKTON REVEALED THAT GROWTH RATE IS REGULATED BY INTR ACELLULAR NUTRIENT POOL(S). IN CASE OF P, CELLULAR INORGANIC POLYPHOSPHATE (PPI) IS THE GROWTH REGULATING POOL IN SCENEDESMUS SP. AND THIS POOL ALSO APPEARS TO AFFECT P UPTAKE ALONG WITH EXTERNAL P LEVELS. FOR N, SUCH A RESERVE COMPOUND HAS NOT BEEN INVESTIGATED. THEREFORE, IT WILL BE INVES TIGATED WHETHER THE INVOLVEMENT OF PPI IN P-LIMITED GROWTH AND P UPTAKE IS UNIVERSAL IN ORGANISMS BELONGING TO VARIOUS TAXONOMIC GROUPS AND WHETHER THERE EXISTS N POOL(S) SIMILAR TO PPI FOR N-LIMITED GROWTH AND N UPTAKE. ATTEMPTS WILL BE MADE TO DEVELOP KINETIC MODELS FOR GROWTH A ND N AND P UPTAKE INVOLVING NUTRIENT POOLS. THE TRANSITION BETWEEN N AND P LIMITATION IS AN IMPORTANT ASPECT IN POLLUTED ENVIRONMENTS. GROWTH DURING THIS TRANSITION IS DESCRIBED BY A SIMPLE THRESHOLD EQUATION OF N UTRIENT-LIMITED GROWTH. THIS IMPLIES THAT DIFFERING OPTIMAL N/P RATIO IN C OMPETING SPECIES MAY BE A BASIS FOR COMPETITIVE EXCLUSION AND COEXISTENCE. THEREFORE, THE VARIABILITY OF THE RATIO IN VARIOUS SPECIES WILL BE ST UDIED. IN ADDITION TO THE ABOVE PROBLEMS, THE EFFECT OF THE MAJOR ENVIRONM ENTAL VARIABLES, TEMPERATURE AND LIGHT, ON GROWTH AND NUTRIENT UPTAKE WILL BE INVESTIGATED. EMPHASIS WILL BE PLACED ON THE PHYTOPLANKTERS OF THE GREAT LAKES AND EXPERIMENTAL STUDIES WILL INVOLVE THE EXAMINATION OF KINETICS IN CONTINUOUS CULTURE.

HAZARDOUS WASTE SAMPLING, ANALYSIS, AND COMPATIBILITY STUDY

START/ COMPL DATE : 09/76 - 09/78 : FUNDING : EST. - FY 77 / $ 261000
TASK/EPA CODE :C618A-7037 / R804692-01 (GRANT) PRIOR FY76 / $ 772001

R A CARNES U.S. ENVIRON. PROTECTION AGCY
MILE: 06/77 -HAZARDOUS WASTE COMPATIBILITY OVERVIEW
12/79 -USER MANUALS PUBLISHED

THE OVERALL OBJECTIVES OF THIS RESEARCH PROGRAM ARE TO INVESTIGATE PROCEDURES FOR SAMPLING, CLASSIFYING, ANALYZING, AND HANDLING HAZARDOUS WASTES. A SERIES OF PROCEDURAL FIELD MANUALS WILL RESULT FROM THIS PROGRAM THAT WILL BE PRIMARILY DIRECTED TO PERSONS WHO ARE RESPONSIBLE FOR SAMPLING, HANDLING, AND DISPOSING OF HAZARDOUS WASTES. THE INF ORMATION AND KNOWLEDGE GENERATED BY THIS PROGRAM PROVIDE VITALLY NEEDED GU IDELINES FOR HAZARDOUS WASTE HANDLERS AND ESTABLISH BASE-LINE DATA FOR THE DEVELOPMENT AND REFINEMENT OF FUTURE STATE AND FEDERAL HAZARDOUS WASTE MANAGEMENT REGULATIONS.

HIGH VELOCITY FABRIC FILTRATION

START/ COMPL DATE : 08/76 - 08/79 : FUNDING : EST. - FY 77 / $ 41119
TASK/EPA CODE :F624A-062 / R804700-02 (GRANT) PRIOR FY76 / $ 630311
PROJECT OFFICER : J H TURNER

MILE: 08/76 -GRANT AWARDED
09/77 -YEARLY REPORT
09/78 -YEARLY REPORT
09/79 -FINAL REPORT

IF FABRIC FILTERS CAN BE MADE TO OPERATE AT HIGHER THAN CONVENTIONAL VELOCITY, A PROPORTIONAL REDUCTION IN FILTER SIZE AND INITIAL COST WILL BE POSSIBLE, MAKING THESE EFFICIENT COLLECTORS ATTRACTIVE FOR MANY APPLICATIONS WHERE THEY ARE NOT CURRENTLY USED. FOR EXAMPLE, A HIGH VELOCITY FILTER OPERATING AT A SUPERFICIAL FILTRATION VELOCITY OF 25 CM/S (AIR TO CLOTH RATIO OF 50 CFM/FT2) NEED BE ONLY 10 TO 25 PER CENT AS LARGE AS A UNIT OPERATING AT CONVENTIONAL VELOCITIES. THE OBJECTIVES OF THIS PROJECT ARE: (1) TO STUDY THE PRACTICALITY OF HIGH VELOCITY FABRIC FILTRATION, (2) TO INVESTIGATE PHENOMENA WHICH LIMIT EFFECTIVE HIGH VELOCITY OPERATION, AND (3) TO DEVELOP MATHEMATICAL MODELS TO INTERPRET AND PREDICT FABRIC FILTER PERFORMANCE. THESE OBJECTIVES WILL BE MET USING EXPERIMENTAL WORK WITH A THREE BAG PILOT SCALE FILTER CLEANED BY THE PULSE-JET PRINCIPLE, AND THEORETICAL WORK TO DESCRIBE FILTER PERFORMANCE MATHEMATICALLY.

804708

Project will improve lake water by diverting storm water to ponding areas then onto marsh areas which would serve as nutrient filters.

WATER QUALITY EFFECTS RELATED TO BLENDING WATERS OF DIFFERENT ORIGIN IN DISTRIBUTION SYSTEMS

START/ COMPL DATE : 10/76 - 04/78 : FUNDING : EST. - FY 77 / $ 59000
TASK/EPA CODE :C614 -7178 / R804709-02 (GRANT) PRIOR FY76 / $ 443501
PROJECT OFFICER : R C THURMAN
INVESTIGATORS : W K SCHIMPFF METROP. WATER DIST. OF CALIF.

09/76 -GRANT AWARD
09/77 -INTERIM REPORT
09/77 -CONTINUATION FUNDING PACKAGE PROCESSED
10/78 -FINAL REPORT PUBLISHED

OBJECTIVES: 1. TO EVALUATE THE EFFECTS OF BLENDING TWO OR MORE WATERS OF DIFFERENT ORIGIN AND INORGANIC CHEMICAL CONTENT IN PUBLIC WATER SYSTEMS AS RELATED TO CONSUMER ACCEPTANCE AND CONSUMER COSTS DIRECTLY ATTRIBUTABLE TO WATER QUALITY. 2. TO QUANTIFY CORROSION RATES AND CALCIUM CARBONATE DEPOSITION TENDENCY IN DYNAMIC WATER SYSTEMS BEFORE AND AFTER BLENDING IN ORDER TO DEVELOP CONTROL MEASURES TO MINIMIZE DETERIORATION OF WATER SYSTEM FACILITIES AND HOUSEHOLD PLUMBING. APPROACH: DATA WILL BE GATHERED ON EIGHTEEN WATER QUALITY PARAMETERS TO MEASURE CHANGES IN CHEMICAL COMPOSITION RELATED TO CORROSION AND STABILITY, DISSOLUTION OF METALS FROM WATER SYSTEM FACILITIES AND HOUSEHOLD PLUMBING, AND DETERIORATION IN QUALITY WITH RESPECT TO TURBIDITY, COLOR, AND ESTHETIC ACCEPTABILITY AT THE CONSUMER TAP. CURRENT PLANS: THE EPA MOBILE WATER QUALITY RESEARCH LABORATORY WILL BE DEPLOYED AT SELECTED SITES WITHIN THE SERVICE AREA OF THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA WHERE IMPORTED WATERS FROM THE COLORADO RIVER AND CALIFORNIA AQUEDUCTS ARE BLENDED WITHIN ITS DISTRIBUTION SYSTEM OR MIXED WITH LOCAL GROUNDWATER SOURCES OF ITS MEMBER AGENCIES. CHEMICAL AND PHYSICAL TESTING WILL BE PERFORMED CONTINUOUSLY FOR PERIODS OF 48 HOURS OR LONGER WITH AN ON-BOARD COMPUTER TO TAKE AND STORE DATA WHICH WILL BE TRANSFERRED TO MWD'S COMPUTER CENTER FOR STATISTICAL ANALYSIS AND XY (CONCENTRATION VS. TIME) PLOTTING.

DEVELOP AND EVALUATE A SOLID DEVICE FOR THE COMPLETE COLLECTION OF ATMOSPHERIC POLY-CHLOROBIPHENYLS (PCB)

START/ COMPL DATE : 03/77 - 05/80 : FUNDING : EST. - FY 77 / $ 45000
TASK/EPA CODE :G7128-BE-01 / R804716-02 (GRANT) PRIOR FY76 / $ 410001
PROJECT OFFICER : - MEEKER
INVESTIGATORS : T F BIDLEMAN UNIV. OF SOUTH CAROLINA
MILE: 12/80 -FINAL REPORT

A SOLID STATE SAMPLING DEVICE IS TO BE DEVELOPED, IT SHOULD BE SMALL, EASY TO HANDLE, STABLE BOTH BEFORE AND AFTER COLLECTION, QUANTITATIVELY COLLECT PCBS, AND BE INEXPENSIVE AND STRONG.

804717

Objectives: To devise and evaluate control methods for the imported fire ant utilizing chemical, physical, and biological control techniques and to develop accessory information required to support control methods.

Approach: Field and laboratory experiments will be utilized to study a combination of physical, chemical, biological, preventive, and homeowner controls. Basic biology studies will be concentrated in the area of food transfer, mound development, and foraging areas.

Progress: A complete literature search was conducted in late 1976 with field and laboratory studies being initiated in 1977. All phases of the investigation are currently active.

VEGETATIVE STABILIZATION OF SPENT OIL SHALE

START/ COMPL DATE : 08/76 - 08/79 : FUNDING : EST. - FY 77 / $ 10000
TASK/EPA CODE :B623B-358 / R804719-01 (GRANT) PRIOR FY76 / $ 210001
PROJECT OFFICER : E HARRIS
INVESTIGATORS : W A BERG COLORADO STATE UNIVERSITY
MILE: 08/76 -FUNDING PACKAGE SUBMITTED
09/76 -AWARD FUNDS FOR PROJECT
09/77 -AMENDMENT
00/00 -FINAL REPORT RECEIVED

OBJECTIVE: TO INVESTIGATE SURFACE STABILITY AND SALT MOVEMENT IN SPENT OIL SHALES AND SOIL-COVERED SPENT SHALES AFTER A COVER OF NATIVE VEGETATION HAS BEEN ESTABLISHED BY INTENSIVE TREATMENTS AND THEN LEFT UNDER NAT URAL PRECIPITATION CONDITIONS, APPROACH: THE STUDY IS BEING CARRIED OUT ON TWO DIFFERENT SPENT OIL SHALES, "SOIL" TREATMENTS ARE PLANT ESTABLISHMENT ON: 1, DIRECTLY ON LEACHED AND FERTILIZED SPENT SHALES; 2, SIX INCHES OF SOIL OVER LEACHED SPENT SHALE; 3, ONE FOOT OF SOIL OVER UNLEACHED SPENT SHALE; 4, SOIL, PLOTS HAVE BEEN ESTABLISHED ON 25 PERCENT NORTH AND SOUTH SLOPES AT ALTITUDES OF 5,700 AND 7,200 FEET IN OR NEAR THE PI CEANCE BASIN OF NORTHWESTERN COLORADO, EACH PLOT (28 PER SITE) IS BORDERED WITH WOOD TO FORM INDIVIDUAL RUNOFF PLOTS 11 FEET WIDE AND 22 FEET LONG, SEDIMENT AND RUNOFF CATCHMENTS HAVE YET TO BE INSTALLED, ONE SITE (5,700') HAS BEEN INSTRUMENTED FOR SOIL SALINITY AND SOIL MOISTURE MEASU REMENTS, A COVER OF NATIVE PLANT SPECIES HAS BEEN ESTABLISHED ON THE LOWER ALTITUDE SITE AND WILL BE ESTABLISHED ON THE HIGHER SITE, MEASUREM ENTS ON VEGETATION INCLUDE FREQUENCY, DENSITY AND VEGETATIVE GROUND COVER,

Monthly and semi-monthly physical, chemical and biological parameters will be determined at two-meter intervals from the surface to the bottom of the deepest position of the lake. With this information, a determination will be made of the concentration of aluminum sulfate needed to precipitate the available phosphorus in the lake. The aluminum sulfate applications will be made soon after the ice melts in the spring and again at the height of the water stratification in early fall.

POWDERED CARBON-ACTIVATED SLUDGE - FILTRATION PROCESSES FOR PETROLEUM REFINERY WASTEWATER

START/ COMPL DATE : 01/77 - 12/79 : FUNDING : EST. - FY 77 / $ 211350
TASK/EPA CODE :L610C-18 / R804731-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : F M PFEFFER
INVESTIGATORS : A T KNECHT ATLANTIC RICHFIELD COMPANY
MILE: 07/77 -PRELIMINARY TESTING
07/78 -BENCH TESTING
10/78 -FULL-SCALE DESIGN
10/79 -FULL-SCALE TESTING
12/79 -FINAL REPORT

OBJECTIVES: TO DETERMINE IF DIRECT ADDITION OF POWDERED ACTIVATED CARBON (PAC) TO ACTIVATED SLUDGE UNITS AND CHANGES IN OPERATING PROCEDURES WILL SIGNIFICANTLY IMPROVE EFFLUENT QUALITY AND APPROACH BEST AVAILABLE T ECHNOLOGY. THE ROLE OF ADSORBENTS IN ENHANCING BIOLOGICAL ACTIVITY WILL BE INVESTIGATED, ALONG WITH THEIR ULTIMATE IMPACT ON SLUDGE DISPOSAL BY LAND APPLICATION. PROGRAM: AN INVESTIGATION OF ACTIVATED SLUDGE TREATMENT OF REFINERY PROCESS WASTEWATERS WILL BE CONDUCTED IN LABORATORY BENCH -SCALE SYSTEMS. SIDE-BY-SIDE STUDIES WILL BE MADE TO: 1) DETERMINE ROLE OF ADSORBENTS IN ENHANCING BIOLOGICAL TREATMENT; AND 2) DETERMINE THE IMPACT OF LOADING VARIATIONS ON SYSTEM PERFORMANCE. ADDITIONAL STUDIES WILL BE CONDUCTED TO: 1) IDENTIFY HYDROCARBON TYPES WHICH RESIST REMOV AL BY BIOLOGICAL AND PHYSICAL TREATMENT PROGRAMS EVALUATED; 2) INVESTIGATE THE ULTIMATE FATE OF SLUDGES GENERATED BY TREATMENT PROGRAMS IN LAND APPLICATION TECHNIQUES; 3) FORMULATE A WORK PLAN FOR FULL-SCALE PLANT EVALUATION OF COMBINED ADSORBENT-ACTIVATED SLUDGE TREATMENT BASED ON PILOT STUDIES; AND 4) DEVELOP ROUGH ECONOMIC ASSESSMENT OF TREATMENT PROGRAMS INVESTIGATED.

DETECTION, OCCURRENCE, CHARACTERIZATION, AND PERSISTENCE OF MICROBES IN LANDFILL LEACHATES

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 58000
TASK/EPA CODE :C618A-7038 / R804733 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D R BRUNNER
INVESTIGATORS : P V SCARPINO UNIV. OF CINCINNATI
MILE: 09/79 -FINAL REPORT

OBJECTIVES: THE OBJECTIVE OF THIS PROJECT IS TO DETERMINE THE HEALTH AND ENVIRONMENTAL SIGNIFICANCE OF THE PERSISTENCE OF FECAL STREPTOCOCCI FOUND IN LEACHATE FROM LANDFILL MUNICIPAL REFUSE. THE PROJECT WILL CONSIST OF TWO PHASES. APPROACH: THE INITIAL PHASE WILL VERIFY MICROBIAL ANALYTICAL METHODS AND DETERMINE THE PRESENCE OF STUDY ORGANISMS IN A VARIETY OF LEACHATES. SAMPLES OF LEACHATE FROM DIFFERENT SOURCES OF LANDFILLED WASTE REPRESENTING DIFFERENT STAGES OF WASTE DECOMPOSITION (AGE OF LANDFILL) AND DIFFERENT OPERATIONAL CONDITIONS (BATCH VERSUS CONTINUOUS DISPOSAL, CONTROLLED VERSUS NATURAL MOISTURE INFILTRATION) WILL BE ASSAYED FOR MICROBIAL AND CHEMICAL CONTENT. MICROBIAL ASSAYS WILL INCLUDE TOTAL AEROBIC AND ANAEROBIC PLATE COUNTS, INDICATORS OF FECAL POLLUTION, SELECTED BACTERIAL PATHOGENS (E.G., SALMONELLA, SHIGELLA, KLEBSIELLA, AND MYCOBACTERIA) AND ANAEROBES (E.G., CLOSTRIDIA) AND THE MAJOR FUNGI OF PATHOGENIC SIGNIFICANCE. CHEMICAL ANALYSES WILL BE USED TO DESCRIBE THE LEACHATE ENVIRONMENT. THE SECOND PHASE WILL STUDY THE RELATIONSHIP BETWEEN THE EXTENT OF WASTE DECOMPOSITION AND THE MICROBIAL POPULATION DYNAMICS. THREE EXPERIMENTAL LANDFILLS (SPECIALLY CONSTRUCTED 55-GAL. DRUMS) CONTAINING MUNICIPAL REFUSE, MUNICIPAL REFUSE AND SEWAGE SLUDGE, AND HOSPITAL WASTE WILL BE CONSTRUCTED AND OPERATED AT 16" OF NET INFILTRATION PER YEAR. LEACHATES WILL BE ASSAYED BI-WEEKLY INITIALLY AND LESS FREQUENTLY AS THE RATE OF POPULATION CHANGES DECREASES. OUTPUT: AN ASSESSMENT OF THE HEALTH SIGNIFICANCE OF THE CONTINUED LEACHING OF FECAL STREPTOCOCCI, AND DETERMINATION OF THE PRESENCE OF PATHOGENS IN A VARIETY OF LEACHATES WILL BE MADE IN THE FINAL REPORT.

EVALUATION OF THE ALGAL-MEANDER SYSTEM FOR ABATING POLLUTION FROM SECONDARY LEAD SMELTERS

START/ COMPL DATE : 08/77 - 09/78 : FUNDING : EST. - FY 77 / $ 10000
TASK/EPA CODE :B610C-172 / R804734-02 (GRANT) PRIOR FY76 / $ 260001
PROJECT OFFICER : D L WILSON
INVESTIGATORS : J C JENNETT SYRACUSE UNIVERSITY
J M HASSETT SYRACUSE UNIVERSITY
J SMITH SYRACUSE UNIVERSITY

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
06/78 -DRAFT FINAL REPORT
09/78 -FINAL REPORT RECEIVED

THE ALGAL-MEANDER SYSTEM UTILIZES SHALLOW STREAM ALGAL GROWTH TO TREAT L EAD-ZINC MINING AND MILLING WASTES. THE FIRST YEAR OF THE PROJECT HAS BEEN SPENT IN DEVELOPING VERY RAPID SCREENING TECHNIQUES TO DETERMINE WHICH ALGAL FORM REMOVE METALS AND UNDER WHAT PHYSICAL CONDITIONS. PRINCIPAL OBJECTIVES IN THE SECOND PHASE ARE A) TO SCALE UP ALGAL-MEANDER MODELS FROM MICROCULTURE TO LABORATORY PILOT PLANT; B) TO DETERMINE FEASIBILITY OF CONTINUOUS REMOVAL OF METAL AND ORGANOMETALLIC COMPOUNDS FROM WASTEWATER; C) TO DEVELOP KINETIC EQUATIONS FOR HEAVY METAL AND ORGANOMETALLIC REMOVAL BY ALGAE; AND D) TO EXAMINE THE FEASIB ILITY OF REPLACING LIVING ALGAE IN THE MEANDER SYSTEMS WITH DRIED ALGAE, N ATURAL PRODUCTS OR SYNTHETIC MATERIALS. THE APPROACH WILL BE TO USE CONTIN UOUS FLOW LABORATORY MODELS WITH DEFINED ALGAL POPULATION AND FEEDSTOCK CO NTAINING KNOWN CONCENTRATIONS OF HEAVY METALS AND/OR ORGANOMETALLICS. FROM ANALYSES OF THE EFFLUENTS, THE ADSORPTION KINETICS CAN BE CALC ULATED AND DEVELOPED INTO DESIGN CRITERIA FOR FULL SIZE SYSTEMS. FACTORIAL COMBINATIONS OF METAL TYPE, ALGAL TYPE, TIME OF EXPOSURE, TEMPERATURE, PRESENCE OF ORGANIC POLLUTANTS, ETC., CAN BE EVALUATED. THIS INFORMATION CAN BE USED TO IMPROVE THE DESIGN OF ALGAL-MEANDER SYSTEMS, TO EXTEND THEIR USE FOR INDUSTRIAL WASTEWATER TREATMENT, AND TO ACHIEVE RECOVERY OF USEFUL MATERIALS FROM WASTE.

RENEWAL OF WATER TEMPERATURE STUDIES AT THE USEPA MONTICELLO FIELD STATION

START/ COMPL DATE : 09/76 - 03/78 : FUNDING : EST. - FY 77 / $ 13952
TASK/EPA CODE : N608A-084 / R804736-01 (GRANT) PRIOR FY76 / $ 427511
PROJECT OFFICER : K E HOKANSON
INVESTIGATORS : H STEFAN UNIV. OF MINNESOTA
MILE: 07/75 -INITIATE FIELD MEASUREMENTS
04/77 -COMPLETED DEVELOPMENT OF PHYSICAL MODEL
09/77 -COMPLETED ALL FIELD MEASUREMENTS FOR VERIFICATION
03/78 -COMPLETE DRAFT FINAL REPORT

THE MAIN OBJECTIVE OF THE STUDIES IS TO PROVIDE INFORMATION ON THE WATER TEMPERATURE REGIMES ENCOUNTERED IN EIGHT EXPERIMENTAL FIELD CHA NNELS IN WHICH BIOLOGICAL EXPERIMENTS ARE CONDUCTED. HEATED WATER IS DISCH ARGED THROUGH THESE CHANNELS AT LOW FLOW VELOCITIES. FIELD MEASUREMENTS OF WATER TEMPERATURES AND MATHEMATICAL MODELS ARE USED TO ACHIEVE THE OBJECTIVE. FIELD DATA ARE SUBJECTED TO STATISTICAL AND REGRESSION ANALYSIS TO GIVE INFORMATION ON LONGITUDINAL WATER TEMPERATURE G RADIENTS, DIURNAL WATER TEMPERATURE FLUCTUATIONS, VERTICAL STRATIFICATION, LONGITUDINAL DISPERSION, AND RATE OF SURFACE HEAT LOSS. CORRELATI ON WITH WEATHER PARAMETERS WILL BE PROVIDED. SOIL TEMPERATURE CONDITIONS A

804745

Introduction: Previous studies of the effects of a jet fuel and #2 fuel oil spill into a major soft shell clam, Mya, arenaria, growing area at Long Cove, Searsport, Maine, reported an association between the spilled oil and cancerous tumors in many of the clams. The oil spill occurred in March 1971 and tumors have been found each year since then.

Objectives: The purpose of the proposed study is to determine whether or not there is a causal relationship between the spilled oil and the continuing development of tumors in the surviving clam population.

Approach: Combined studies involving the transplanting of soft shell clams of comparable size and age from a clean area to holding tanks in the Department of Marine Resources laboratory in Boothbay Harbor, Maine. Each tank will have an individual flow-through water system and the clams themselves will be placed in sediments from Long Cove at two different levels of residual petroleum hydrocarbon concentrations: 90-125 ppm and 230-300 ppm. Sediments from the clean control area will be transferred to the laboratory and laced with a known amount of the same oil fractions involved in the 1971 spill. Clams from the control area will be planted in these artificially contaminated sediments. Samples of sediments and of clams before and after exposure to the oiled sediments will be analyzed at the Chemistry Department of Bowdoin College. Clams exposed to clean sediments as well as to the various oil sediments will be examined in triplicate for tumors or other abnormalities: by the Histopathology Section of the EPA Laboratory, Narragansett, Rhode Island; the Smithsonian Institution; and the National Marine Fisheries Service Laboratory, Oxford, Maryland. Carbon flux studies will be conducted by the Bigelow Laboratory at Boothbay Harbor, Maine.

Ocean-outfall disposal of domestic wastes raises pertinent questions concerning prior treatment and preferred outfall location due to a paucity of factual information and data. To resolve these questions, the research in this project is subsumed under three objectives which are to: (1) characterize the plume mixing zone as it relates to the kinds and subsequent dilution of sewage derived solutes, (2) test methods for the sampling and enumeration of viral pathogens and determine the most appropriate treatment procedure, and (3) evaluate outfall-induced (via particulates and pathogens) responses of sessile invertebrates and other important marine animals. Three outfalls in Dade, Broward and Palm Beach counties are designated for comparative sampling; data and samples evaluated by EPA, Corvallis. The project emphasizes laboratory work to evaluate the acute effects of sewage on marine animals and involves cooperation with other ongoing research relating to outfalls as well as interaction with user groups. An array of 50-200 gallon experimental tanks with metered inputs of sewage and seawater will be utilized for the experimental work on fish and certain invertebrates. State-of-the-art scientific methods and quality-assurance techniques used during the two-year study ensure that objectives are met on schedule and that all results are scientifically supported. The results will be of use in evaluating the performance standards of ocean outfalls as a disposal method.

THE CONTINUOUS MONITORING OF PARTICULATE SULFUR COMPOUNDS BY FLAME PHOTOMETRY

START/ COMPL DATE : 10/76 - 10/78 : FUNDING : EST. - FY 77 / $ 35000
TASK/EPA CODE :G6018-CA-21 / R804750-02 (GRANT) PRIOR FY76 / $ 300001
PROJECT OFFICER : D J REUTTER
INVESTIGATORS : J J HUNTZICKER OREGON GRAD. CTR. STU. & RES.
L ISABELLE OREGON GRAD. CTR. STU. & RES.
MILE: 07/77 -PROCURE COMPONENTS
10/77 -ASSEMBLE INSTRUMENTS

OBJECTIVE: TO MAKE A DETAILED STUDY OF THE USE OF A FLAME PHOTOMETRIC DETECTOR FOR THE CONTINUOUS, IN SITU MEASUREMENT OF TOTAL PARTICULATE SULFUR AND FOR THE SELECTIVE MEASUREMENT OF INDIVIDUAL SULFUR COMPOUNDS. APPROACH: THE TECHNIQUE IS BASED ON COUPLING A "DIFFUSION TUBE" SCRUBBER TO A VERY SENSITIVE FLAME PHOTOMETRIC DETECTOR. THE DIFFUSION TUBE SCRUBBER SERVES TWO PURPOSES: FIRST, ALL GASEOUS SULFUR COMPOUNDS ARE REACTED OUT TO PERMIT MEASUREMENT OF PARTICULATE SULFUR ONLY IN THE FLAME PHOTOMETRIC DETECTOR. SECOND, BY HEATING THE AEROSOL UPSTREAM OF THE DIFFUSION TUBE, INDIVIDUAL SULFUR COMPOUNDS CAN BE VAPORIZED OR DECOMPOSED TO GASES WHICH ARE SUBSEQUENTLY REMOVED BY THE DIFFUSION TUBE. THIS RESULTS IN A DECREASE IN THE FLAME PHOTOMETER OUTPUT OVER A TEMPERATURE RANGE WHICH IS SPECIFIC TO THE SULFUR COMPOUND BEING VAPORIZED OR DECOMPOSED. A DETECTION LIMIT OF APPROXIMATELY 2 UG/M3 SULFUR IS ACHIEVED BY ELECTRONIC SIGNAL AVERAGING THE DETECTOR OUTPUT. CURRENT PLANS/PROGRESS: PRELIMINARY STUDIES ON FLASH VOLATILIZATION AT SEVERAL SULFATE COMPOUNDS ARE NEARING COMPLETION. IT IS EXPECTED THAT THESE STUDIES WILL SHOW THE FEASIBILITY AT MEASURING VOLATILE SULFATE CONCENTRATIONS BY HEATING DROPLETS QUICKLY WITH A PLATINUM WIRE AND MONITORING RESULTANT SO2 WITH AN FPD. SEVERAL DIFFUSION SCRUBBERS HAVE BEEN FABRICATED AND ARE NOW BEING EVALUATED FOR THEIR ABILITY TO REMOVE SO2, H2S, CH3SH, AND CH3SSCH3. THE FINAL ASPECT OF THIS WORK IS THE DESIGN, FABRICATION AND TESTING OF PROTOTYPE MONITORS FOR BOTH TOTAL AND INDIVIDUAL PARTICULATE SULFUR COMPOUNDS.

MICROWAVE SYSTEM TO PREVENT HAZARDOUS MATERIAL DIKE FAILURES

START/ COMPL DATE : 09/76 - 07/79 : FUNDING : EST. - FY 77 / $ 37000
TASK/EPA CODE :8610A-192 / R804763-01 (GRANT) PRIOR FY76 / $ 200001

09/77 -DECISION POINT, FUNDING INCREMENT
09/78 -FUNDING INCREMENT
07/79 -COMPLETE PROJECT
07/79 -FINAL REPORT RECEIVED

THE DETECTION AND LOCATION OF WATER LEVELS, WATER POCKETS, VOIDS AND VARIOUS OTHER DISCONTINUITIES BETWEEN DIFFERENT LAYERS OF EARTH OR ROCK IS CRITICAL IN INSURING THE PERFORMANCE AND SAFETY OF EARTH DAMS. SUCH UNDERGROUND ANOMALIES ARE PARTICULARLY UNDESIRABLE IN THE EARTH DAMS AND DIKES THAT CONTAIN HAZARDOUS MATERIALS SINCE THESE RELATIVELY SMALL EMBANKMENTS ARE GENERALLY NOT ENGINEERED OR CONSTRUCTED IN A RIGOROUS AND PROFESSIONAL MANNER. ONE POSSIBLE TECHNIQUE FOR DETECTING AND MONITORING SUCH FAULTS AND WEAK AREAS IS THE USE OF MICROWAVES. BY BEAMING CONTINUOUS OR PULSED MICROWAVES AT THE DIKE AND RECORDING THE RETURN SIGNAL AS IT IS REFLECTED FROM THE ANOMALY, THE LOCATION, TYPE AND DEPTH OF FAULTS CAN BE DETERMINED. A LITERATURE SEARCH (TECHNICAL, EQUIPMENT, LEGAL AND SAFETY) WILL BE UNDERTAKEN AND A NUMBER OF LABORATORY EXPERIMENTS WILL BE PERFORMED TO ASSESS THE PRACTICALITY OF USING MICROWAVES FOR THE NON-DESTRUCTIVE ASSESSMENT OF DIKE STABILITY. BASIC SOIL PROPERTIES SUCH AS DIELECTRIC CONSTANT, CONDUCTIVITY, ATTENUATION, PHASE SHIFT, AND VELOCITY WILL ALSO BE DETERMINED. THE FINAL RESULT OF THIS PROJECT WILL BE THE DETAILED SPECIFICATION FOR AN INEXPENSIVE, MOBILE, MICROWAVE UNIT (WITH KNOWN LIMITATIONS) TO DETERMINE UNDERGROUND WATER, IRREGULARITIES, AND DISCONTINUITIES IN SMALL EARTHEN DIKES.

EVALUATION OF CANDIDATE INTERIM STANDARD LEACHING TEST

START/ COMPL DATE : 06/77 - 09/77 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :C618A-7039 / R804773-010 (GRANT) PRIOR FY / 1

THE OBJECTIVES ARE TO PROVIDE A DATA BASE AND ASSESSMENT METHODOLOGY TO ANALYZE AND MINIMIZE THE IMPACT OF "MEGA-FARMS" AS NONPOINT SOURCES OF NUTRIENTS, PESTICIDES, AND SEDIMENTS TO PRODUCTIVE COASTAL WATERS. THE O BJECTIVES ARE TO BE ACCOMPLISHED BY MONITORING DRAINAGE WATER QUANTITY AND QUALITY FROM THREE PAIRED FIELD SITES CONSISTING OF BOTH DEVELOPED AND UNDEVELOPED LAND ON THE FIRST COLONY (MEGA) FARM LOCATED ALONG THE EASTERN COAST OF NORTH CAROLINA. THE FARM IS LOCATED ON POORLY DRAINED SO ILS IN THE HIGH-RAINFALL TIDEWATER PHYSIOGRAPHIC REGION. CHEMICAL ANALYSES ARE BEING CONDUCTED FOR PESTICIDES, PLANT NUTRIENTS, AND SEDIMENTS IN RUNOFF FROM MINERAL, SHALLOW ORGANIC, AND MUCK SOILS. HYDROLOGIC AND CHEMICAL TRANSPORT MODELS FOR PREDICTING NUTRIENT, PESTICIDE, AN D SEDIMENT MOVEMENT FROM THE LAND AND THROUGH DRAINAGE NETWORKS AS WELL AS PEAK RUNOFF RATES AND TOTAL RUNOFF WILL BE EVALUATED FOR THE TIDEWATER CONDITIONS AND ASSESSMENT OF MEGA-FARM ENVIRONMENTAL IMPACT. MODELS TO BE TESTED INCLUDE EPA'S AGRICULTURAL RUNOFF MANAGEMENT MODEL (ARM) AND A DR AINAGE MODEL (DRAINMOD) DEVELOPED BY NCSU. A FINAL REPORT WILL BE PREPARED AT THE END OF THE PROJECT.

INACTIVATION OF NATURALLY OCCURRING ENTEROVIRUSES

OUR ULTIMATE GOAL IS TO COMPARE NATURALLY SHED ENTEROVIRUSES (VACCINE STRAINS AND WILD VIRUSES) WITH THEIR TISSUE CULTURE GROWN COUNTERPARTS IN RESPECT TO THE KINETICS OF THEIR INACTIVATION BY CHLORINE. TO DO SO, H OWEVER, DEMANDS HIGH CONCENTRATIONS OF VIRUS IN A PURE STATE WITH LITTLE O R NO CHLORINE DEMAND. SINCE THE NATURALLY SHED VIRUS MUST BE OBTAINED FROM FECES, TECHNICS WHICH SEPARATE INORGANIC AND OTHER ORGANIC MATER FROM VIRUSES WITHOUT DEGRADATION OF VIRUS INFECTIVITY IN THE PROCESS ARE NECESSITATED. USING AS A MODEL NORMAL FECES ARTIFICALLY SEEDED WITH TISSUE CULTURE GROWN VACCINE STRAIN OF POLIOVIRUS TYPE 1, WE HAVE ACHIEVED CONSIDERABLE PURIFICATION AND CONCENTRATION BY A COMBINATION OF PROCEDURES, INCLUDING ULTRACENTRIFUGATION, SUCROSE GRADIENT CENTRIFUGATION AND PRECIPITATION OF VIRUS BY POLYETHYLENE GLYCOL 6000.

MODELING TRANSPORT AND BEHAVIOR OF PESTICIDES AND OTHER TOXIC ORGANIC MATERIALS IN AQUATIC ENVIRONMENTS

START/ COMPL DATE : 08/76 - 08/79 : FUNDING : EST. - FY 77 / $ 130000

THE PRINCIPAL OBJECTIVE OF THIS RESEARCH IS TO INVESTIGATE THE BEHAVIOR OF ANIMAL WASTES IN THE SOIL ENVIRONMENT OF IRRIGATED CROPLAND AND THE MOVEMENT OF SALTS, NUTRIENTS AND ORGANICS TO THE GROUNDWATER. THIS PROJECT IS AN INVESTIGATION OF THE ROLE THAT IRRIGATION AND GROUNDWATER SYSTEMS AND THEIR MANAGEMENT HAVE ON LAND DISPOSAL OF ANIMAL WASTES. BOTH THE TECHNIQUES FOR MANAGING THE NITROGEN SYSTEMS AND PROTECTING RECEIVING WATERS FROM HIGH INPUT OF SALT AND NITRATE WOULD BE EXAMINED. THE PROJECT IS DIRECTED TOWARD ESTABLISHING GUIDELINES FOR MANAGING THE SOIL-WATER-PLANT RELATIONSHIPS IN ORDER TO MAXIMIZE THE EFFECTIVENESS OF THE SOIL AS A TREATMENT SYSTEM AND TO MINIMIZE THE MOVEMENT OF POLLUTANTS INTO GROUNDWATERS WHILE AVOIDING DETRIMENTAL ACCUMULATIONS IN THE PLANT ROOT ZONE. PRIMARY EMPHASIS IS PLACED ON EVALUATION OF ALTERNATIVE IRRIGATION SYSTEM DESIGN AND MANAGEMENT PRACTICES WHICH LEND THEMSELVES TO IMPROVING IRRIGATED SOILS AS TREATMENT MEASURES FOR ANIMAL WASTES.

MILE: 08/77 -COMPLETED 2 SLIDE TAPES, TRAINED 5 FIELD OFFICERS, IMPACTED 2 M
08/78 -COMPLETE 2 ADDITIONAL SLIDE TAPES, TRAIN ADDITIONAL OFFICERS AN

OBJECTIVES: (1) IDENTIFY AND SELECT ENVIRONMENTAL PROBLEMS ABOUT WHICH LOCAL LEADERS NEED MORE TECHNICAL INFORMATION FOR WISE DECISION-MAKING, (2) FIND THE TECHNOLOGY AND ADAPT TO THEIR NEEDS, (3) DELIVER IT THRO UGH SELECTED OKLAHOMA COOPERATIVE EXTENSION FIELD AGENTS, (4) EVALUATE THE TECHNOLOGY TRANSFER EFFORT, (5) SHARE THE RESULTS OF THE STUDY, INCLUDING IMPLICATIONS FOR A NATIONAL TECHNOLOGY TRANSFER CAPABILITY.

APPROACH: THE PROJECT IS CONDUCTED WITHIN THE STRUCTURAL FORMAT OF THE OKL AHOMA COOPERATIVE EXTENSION SERVICE, INCLUDING A "USER" ADVISORY COMMITTEE TO IDENTIFY PROBLEMS NEEDING ATTENTION. THE PROJECT STAFF DEVELOPS THE PACKAGES AND CONDUCTS THE EXPERIMENTAL COMPONENTS OF THE PROJECT. FIVE RURAL DEVELOPMENT AGENTS SPEND PART-TIME AS DISSEMINAT ORS. THEY WORK WITH THE PROJECT STAFF TO POLISH THE PACKAGED MATERIALS AND WITH THE COUNTY EXTENSION DIRECTORS TO ORGANIZE APPROPRIATE AUDIENCES. THEY MAKE THE PRESENTATIONS AND SOLICIT FEEDBACK FOR EVALUATION.

PROGRESS AND FUTURE PLANS: THE RESULTS FROM TWO YEARS OF EXPERIME NTATION CONFIRM ALL HYPOTHESES. A NATIONAL EXTENSION VEHICLE IS NEEDED FOR A VARIETY OF NON-AGRICULTURAL INFORMATION. THE COOPERATIVE EXTENSION SERVICE CAN SATISFY MUCH OF THIS NEED IF AN ADEQUATE BUDGET IS PROVIDED. THE PROJECT WILL NOW EXPLORE THE USE OF OTHER EXTENSION AGENTS AS DISSEMINATORS. THE RESULTS OF THE STUDY WILL BE PUBLICIZED.

This set of studies represents a portion of a multi-institutional policy-oriented technology assessment of the socioeconomic and environmental impacts which might result from a proposed increased concentration of energy conversion facilities within the Ohio River Basin.

Utilizing the best available data bases, these studies will attempt to address the broad-scale environmental, institutional, economic and social effects of various future combinations of energy conversion facilities (e.g., coal-based plants producing synthetic fuels, as well as nuclear and coal-fired electric power generating plants) and their required support facilities (i.e., coal mining, processing and transportation; ash and sludge disposal facilities; nuclear fuel and reactor waste transportation facilites; and energy transportation systems, including electrical power transmission systems) that might be built and operated in this region in the future.

The principal objectives of this assessment are (1) to assist in outlining the full range of policy options for dealing with selected kinds of development, alternative levels of development and their possible undersirable effects, and alternative technological levels of environmental controls; and (2) to analyze the probable impacts that would result from implementing each option in its total framework, with special emphasis on the natural environment and its interrelationship with public health and welfare. The full range of primary, secondary, and higher order effects will be considered.

804850

Many local areas in the United States are faced with the problem of cost effective management of numerous small wastewater treatment plants. The Cypress Creek basin, near Houston, in North Harris County, Texas is an example of one of these areas. The objective of this project is to explore the optimum management system consistent with economic and effluent quality requirements through (1) a restructuring of current management and operations, (2) installation of moderate capital intensive modifications (minimum telemetry with inspection), (3) installation of maximum capital intensive modifications (maximum telemetry with minimum inspection), or a combination thereof. The approach to the problem will consist of a detailed analysis of existing data regardi (1) mechanical factors, causes of failures, frequency of failures, etc., (2) personnel factors, operation functions, skills, training, etc., (3) location factors, distances from central operations, special configurations, etc., (4) process factors, configuratio plant condition, effluent quality and quantity, etc., and (5) a cost analysis. Significant factors and relationships will determine system design. Implementation of the design will provide data for optimization.

AN EVALUATION OF THE EMISSION OF NATURAL HYDROCARBONS FROM FOREST VEGETATION BY MICROMETEOROLOGICAL METHODS

START/ COMPL DATE : 07/76 - 06/77 : FUNDING : EST. - FY 77 / $ 44000
TASK/EPA CODE :G603A-AG-10 / R804860-01 (GRANT) PRIOR FY76 / $ 200001
PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : K R KNOERR DUKE UNIVERSITY
F L MOWRY DUKE UNIVERSITY
A C DUDGEON DUKE UNIVERSITY

MILE: 12/78 -FINAL REPORT

THE RESEARCH PROPOSED FOR THIS STUDY WOULD UTILIZE A MICROMETEOROLOGICAL APPROACH TO OBTAIN IMPROVED ESTIMATES OF THE TOTAL AMOUNT AND TIME COURSE OF THE NATURAL EMISSIONS OF HYDROCARBONS FROM THE FOREST VEGETATION. MICROMETEOROLOGICAL MEASUREMENTS, INCLUDING VERTICAL PROFILES OF VARIOUS HYDROCARBONS, WILL BE MADE IN A FORESTED AREA NEAR DURHAM, N.C. AT THE TRIANGLE SITE FOR THE INTERNATIONAL BIOLOGICAL PROGRAM (IBP) PROJECT. THESE MEASUREMENTS WILL ENABLE US TO CALCULATE THE VERTICAL FLUX OF THESE HYDROCARBONS AND THUS THEIR EMISSION RATE FROM THE FOREST VEGETATION. THE PROPOSED RESEARCH WILL BE A COOPERATIVE EFFORT INVOLVING PERSONNEL AND INSTRUMENTATION FROM BOTH THE IBP PROJECT AND THE GAS KINETICS PHOTOCHEMISTRY BRANCH (GKPB) OF THE EPA ENVIRONMENTAL SCIENCES RESEARCH LABORATORY. THE MEASUREMENTS WILL BE MADE FOR SELECTED SAMPLING DAYS OVER A SIX MONTH PERIOD BEGINNING IN JULY, 1976. THEY WILL PROVIDE DAILY AND SEASONAL TIME COURSE ESTIMATES OF THE EMISSION OF NATURAL HYDROCARBONS WHICH CAN BE RELATED TO BOTH THE PHYSIOLOGICAL ACTIVITY AND WATER STATUS OF THE FOREST VEGETATION AND GENERAL CLIMATIC CONDITIONS. THEY WILL GIVE US A BETTER UNDERSTANDING OF THE IMPORTANCE OF VEGETATION IN THE PRODUCTION OF PHOTOCHEMICAL SMOG.

AEROSOL FORMATION AND DEPOSITION IN A FOREST CANOPY

START/ COMPL DATE : 05/77 - 12/77 : FUNDING : EST. - FY 77 / $ 15000
TASK/EPA CODE :G625B-EA-34 / R804860-0183(GRANT) PRIOR FY / 1
PROJECT OFFICER : - DURHAM
INVESTIGATORS : K R KNOERR DUKE UNIVERSITY
MILE: 12/77 -FINAL REPORT

AN EXISTING GRANT (#804860, TASK AG-10) WITH DUKE U. WILL BE SUPPLEMENTED FOR CONTINUED OPERATION THOUGH FALL OF 1977. THIS GRANT WILL PROVIDE INFORMATION ON TURBULENT TRANSFER OF HEAT AND MOISTURE WHICH WILL BE USED WITH POLLUTANT PROFILES TO DETERMINE POLLUTANT EMISSION AND DEPOSITION RATES. GKPB WILL CONTINUE THEIR HC EMISSION STUDIES; ARB WILL PERFORM AERO SOL DEPOSITION STUDIES WITH THE PARTICIPATION OF HICKS (ANL) AND BROCK (U. OF TEXAS).

QUANTITATION OF THE DESORPTION & RECOVERY OF BACTERIA FROM SEDIMENT AND PARTICULATE MATTER IN THE OCEAN

START/ COMPL DATE : 10/76 - 10/79 : FUNDING : EST. - FY 77 / $ 36000
TASK/EPA CODE :D608 -01 / R804865-02 (GRANT) PRIOR FY76 / $ 300001
PROJECT OFFICER : A P DUFOUR
INVESTIGATORS : C D LITCHFIELD COLL. OF MED. & DENT. OF N.J.
M SCHERAGA COLL. OF MED. & DENT. OF N.J.
M HESKILL COLL. OF MED. & DENT. OF N.J.

MILE: 10/78 -COMPLETION

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. THE OBJECTIVE OF THIS STUDY IS TO PROVIDE A RELIABLE, REPRODUCABLE METHOD FOR RECOVERING VIABLE MICROORGANISMS FROM MARINE PARTICULATE MATTER. THE APPROACH HAS BEEN TO ESTABLISH A STANDARD ADSORPTION TECHNIQUE AND THEN TO TEST VARIOUS PHYSICAL AND CHEMICAL MEANS FOR QUANTITATIVELY REMOVING THE ADSORBED ORGANISMS FROM THE MODEL SYSTEM. BECAUSE OF THE DIFFERENT MECHANISMS OF ADSORPTION OR ATTACHEMENT SHOWN BY MOTILE AND NON -MOTILE BACTERIA BOTH TYPES ARE INCLUDED AS PURE CULTURE AND MIXED CULTURE WORK. DURING THE FIRST SEVEN MONTHS OF THE STUDY WE HAVE ESTABLISHED THAT ADSORPTION OCCURS RAPIDLY, IN LESS THAN 1 MINUTE. THIS RATE IS INDE PENDENT OF SEMIMENT TYPE; SLUDGE, SAND OR CLAY. ADSORPTION IS ALSO A RELAT IVELY CONSISTENT PROPORTION OF THE BACTERIAL POPULATION; 20-29% REGARDLESS OF SEDIMENT TYPE. THERE WERE SLIGHT DIFFERENCES MOTED BETWEEN THE BACTERIAL STRAINS USED BUT THE OVERALL PICTURE APPEARED TO BE INDEPENDENT OF BACTERIAL GERMS. COMPARISONS WERE MADE BETWEEN SURFACE SPREAD PLATING OF THE TOTAL COLONY-FORMING UNITS (CFU) AND ATP ANALYSIS OF BOTH THE SUS PENDING MEDIUM AND THE SEDIMENTS. RECOVERY OF CFU INTO DILUTION BLANKS WAS LADE VIA STANDARD SINKING FOR 25 TIMES THROUGH A 90 DEGREES, 18 INCH ARC. ATP ANALYSIS AS CORTICAL PERFORMED IS INSUFFICIENTLY SENSITIVE FOR DETECTION OF THE SLIGHT CHANGES NECESSARY TO THIS STUDY. ATTEMPTS TO IMPRO VE ATP TECHNIQUE ARE UNDERWAY AND INCLUDE CHANGES IN EXTRACTION AND BUFFER MEDIA. DIRECT COUNTS, VIA EPIFLUORESCENCE MICROSCOPY, WERE ALSO COMPARED AND GAVE GREATLY ELEVATED COUNTS AND GREATLY REDUCED ATP/CELL VALUES. PART OF THIS "ERROS" IS DUE TO PROBLEMS IN FIXATION OF THE CELLS AND THIS ASPECT IS CURRENTLY UNDER INVESTIGATION. EVALUATION OF PH, SONICATION, IONIC STRENGTH AND CHEMICAL TREATMENTS FOR IMPROVING THE RECOVERY OF THE MOCROBES FROM PARTICULATE MATTER WILL BE PURSUED. ALSO THE LIMULUS TEST AND FITC WILL BE COMPARED FOR THEIR SENSITIVITY IN ESTIMATING RECOVERED BIOMASS FROM SEDIMENTS AND PARTICULATE MATTER.

IMPACT OF NUTRIENT & SEDIMENTS ON SURFACE WATERS IN THE U.S.

START/ COMPL DATE : 09/76 - 09/78 : FUNDING : EST. - FY 77 / $ 100035
TASK/EPA CODE :K609A-309 / R804868-01 (GRANT) PRIOR FY76 / $ 1000001
PROJECT OFFICER : D L BROCKWAY
INVESTIGATORS : F B GOLLEY UNIV. OF GEORGIA
MILE: 10/78 -REPORT ON NATURE AND MAGNITUDE OF SEDIMENT AND NUTRIENT LOADING
THE OBJECTIVE OF THIS STUDY IS TO ASSESS THE MAGNITUDE AND NATURE OF NUTRIENT AND SEDIMENTS ENTERING SURFACE WATERS OF THE UNITED STATES AND TO PREPARE A RESEARCH PLAN TO FILL GAPS IN THE STATE OF KNOWLEDGE OF THE MAGNITUDE AND NATURE OF NUTRIENTS AND SEDIMENTS ENTERING SURFACE WATERS. A STATE OF KNOWLEDGE REPORT WILL BE DEVELOPED BY TEAMS OF EXPERIENCED RESEARCH WORKERS AND APPLIED SCIENTISTS WHO WILL SURVEY THE AVAILABLE INFORMATION AND SUMMARIZE THESE DATA IN AN APPROPRIATE FORM.

THE VIRUS CARRIAGE STATUS IN THE HARD-SHELL CLAM - THE PRECISION, SENSITIVITY AND ACCURACY OF METHODS FOR ITS DETECTION

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 31000
TASK/EPA CODE :D607A-024 / R80488201-2 (GRANT) PRIOR FY76 / $ 315941
PROJECT OFFICER : M A LEVIN
INVESTIGATORS : T G METCALF UNIV. OF NEW HAMPSHIRE

THE PURPOSE OF THE STUDY IS TO DETERMINE WHETHER AN ACCEPTABLE VIRUS RECOVERY METHOD SPECIFICALLY APPLICABLE TO THE HARD-SHELL CLAM EXISTS OR CAN BE DEVELOPED FOR USE IN EVALUATING THE VIRUS-ASSOCIATED HEALTH HAZARD IN MAN WHICH MIGHT RESULT FROM THE CONSUMPTION OF UNCOOKED OR STEAMED HARD-SHELL CLAMS HARVESTED FROM APPROVED WATERS. AN ACCEPTABLE RECOVERY METHOD WOULD HAVE A PROPOSED PRECISION OF PLUS OR MINUS 20 PERCENT, A SENSITIVITY OF 1-2 PFU PER 100 GRAMS, AND AN ACCURACY OF 70 PERCENT. INFORMATION WILL BE SOUGHT ON THE USEFULNESS OF AN ENTEROVIRUS INDICATOR FOR ASSESSING HEALTH HAZARDS ASSOCIATED WITH HARD-SHELL CLAMS OBTAINED FROM POLLUTED WATERS AND RETAIL MARKET SOURCES. THE STUDY WILL BE COORDINATED WITH A HEALTH EFFECTS RESEARCH LABORATORY PROGRAM CONCERNED WITH POTENTIAL PUBLIC HEALTH PROBLEMS OF BACTERIAL OR VIRAL ORIGIN IN MAN RESULTING FROM THE INGESTION OF HARD-SHELL CLAMS.

DIFFUSION CHAMBER ARRAY FOR AQUATIC ENVIRONMENTAL EXPOSURE

START/ COMPL DATE : 04/77 - 03/78 : FUNDING : EST. - FY 77 / $ 31000
TASK/EPA CODE :0608 -05 / R804886 (GRANT) PRIOR FY76 / $ 250001
PROJECT OFFICER : A P DUFOUR
INVESTIGATORS : J M SIEBURTH UNIV. OF RHODE ISLAND
MILE: 03/78 -COMPLETION

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. OBJECTIVE: TO PROVIDE A TESTED AND WORKING PROTOTYPE OF A BUOYED DIFFUSION CHAMBER ARRAY FOR MULTI-DEPTH ENVIRONMENTAL EXPOSURE OF SEWAGE IN AQUATIC ENVIRONMENTS TO BE USED TO FOLLOW THE RATE OF DECAY OF FECAL INDICATORS AND PATHOGENS OF HUMAN ORIGIN. APPROACH: WELL-AGITATED NUCLEPORE MEMBRANES PERMIT THE FREE DIFFUSION OF SOLUTES THROUGH THE PORES WHILE BOTH RETAINING BACTERIA AND VIRUSES AND MINIMIZING THE NERNST LAYER, PLUGGING AND WALL GROWTH. THE USE OF THESE MEMBRANES IN A SUBMERSIBLE TRANSLUCENT CHAMBER ALLOWS THE TOTAL EFFECT OF IN-SITU TEMPERATURE, SUNLIGHT, INORGANIC AND ORGANIC SOLUTES TO BE OBSERVED ON THE TEST INDICATORS AND PATHOGENS. THE DEPLOYMENT OF DIFFUSION CHAMBERS AT THREE DEPTHS ALLOWS THE EFFECT OF THE CONDITIONS NEAR THE SURFACE, NEAR THE THERMOCLINE AND BELOW THE THERMOCLINE OR PHOTIC ZONE TO BE OBSERVED SIMULTANEOUSLY, AS THE BUOYED ARRAY DRIFTS WITH THE SEWAGE PLUME IN THE TEST AREA. A LIGHT-PROTECTED CLOSED LOOP OF TUBING WITH A MINIMAL VOLUME OF CONSTANTLY PUMPED LIQUID BETWEEN THE CELLS AND THE SURFACE BUOY PERMITS SAMPLING AT INTERVALS OF CHOICE FROM AN INFLATABLE VESSEL WITHOUT RAISING THE ARRAY. CURRENT PLANS: THE PROTOTYPE WILL BE TESTED AND REFINED IN RHODE ISLAND WATERS TO MEET THE SPECIFICATIONS OF THE EPA HEALTH EFFECTS LABORATORY AT WEST KINGSTON, R.I.

PROTECTION OF ASBESTOS-CEMENT PIPE FROM CORROSION IN WATER DISTRIBUTION SYSTEMS BY WATER TREATMENT

START/ COMPL DATE : 11/76 - 10/78 : FUNDING : EST. - FY 76 / $ 11160
TASK/EPA CODE :C614A-7138 / R804888-02 (GRANT) PRIOR FY76 / $ 306001
PROJECT OFFICER : R W BUELOW
INVESTIGATORS : C E GRUBB COMM. OF PUBLIC WORKS
W J ROLLINS COMM. OF PUBLIC WORKS

MILE: 09/76 -GRANT AWARDED
08/77 -TREATMENT STARTED
08/78 -FINAL REPORT

OBJECTIVE: TO COAT ASBESTOS-CEMENT PIPE USED IN POTABLE WATER SYSTEMS TO PREVENT ASBESTOS FIBERS FROM BEING ERODED INTO THE WATER. APPROACH: ALL WATER ENTERING THE DISTRIBUTION SYSTEM WILL BE TREATED WITH AN ANT I-CORROSION AGENT (ZINC-ORTHROPHOSPHATE). PROGRESS: MATERIALS AND SUPPLIES HAVE BEEN ORDERED. PROCESS SHOULD START BY MID-SUMMER.

FULL AND PILOT SCALE EVALUATION AND OPTIMIZATION OF THE ANAEROBIC SLUDGE DIGESTION PROCESS

START/ COMPL DATE : 09/77 - 03/79 : FUNDING : EST. - FY 77 / $ 129261
TASK/EPA CODE :C611B-7066 / R804889-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : B V SALOTTO
INVESTIGATORS : J H MOSER — KENOSHA WATER UTILITY
J H MOSER — ENVIREX INCORPORATED
O F NELSON — KENOSHA WATER UTILITY
G G SELIN — KENOSHA WATER POLLUTION PLANT

MILE: 03/79 -FINAL REPORT

THE OVERALL OBJECTIVE OF THIS PROPOSED WORK IS TO OPTIMIZE OPERATIONAL PERFORMANCE AND SYSTEM COSTS OF ANAEROBIC TREATMENT SYSTEMS. THIS PROPOSAL DESCRIBES TWO APPROACHES WHICH OFFER POTENTIAL FOR OPTIMIZING SYSTEM DESIGN FOR DIGESTION OF MUNICIPAL SLUDGES. OPTIMIZATION OF THE DESIGN AND OPERATIONAL VARIABLES OF A SINGLE-STAGE HIGH-RATE DIGESTER WOULD LEAD TO THE MOST COST-EFFECTIVE DIGESTER DESIGN. OPTIMIZATION OF THE ANAEROBIC TREATMENT PROCESS TRAIN WOULD PROVIDE FOR THE MOST EFFECTIVE AND VIABLE ROUTE FOR DIGESTING SLUDGE SOLIDS, IN TERMS OF BOTH COSTS AND PERFORMANCE. MORE SPECIFICALLY, THE FOLLOWING AREAS WILL BE INVESTIGATED AT THE KENOSHA WATER POLLUTION CONTROL PLANT OVER AN EIGHTEEN-MONTH PERIOD: 1. FULL-SCALE OPTIMIZATION OF OPERATIONAL VARIABLES (SRT AND SO) IN HIGH-RATE DIGESTION, 2. PILOT-SCALE EVALUATION OF SINGLE-STAGE HIGH-RATE DIGESTION/CENTRIFUGATION, 3. PILOT-SCALE EVALUATION OF ANAEROBIC CONTACT PROCESS, 4. PILOT-SCALE EVALUATION OF TORPEY PROCESS,

LONG DISTANCE TRANSPORT OF AIR POLLUTANTS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 53157
TASK/EPA CODE :G603A-AB-37 / R804891-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K DEMERJIAN
INVESTIGATORS : J A FAY MASS. INST. OF TECHNOLOGY
MILE: 09/78 -FINAL REPORT

THIS RESEARCH IS CONCERNED WITH DEVELOPING AN ANALYTICAL TECHNIQUE FOR PREDICTING OR CORRELATING MEASUREMENTS OF AIR POLLUTANT LEVELS RESULTING FROM THE TRANSPORT OF POLLUTANTS OVER LONG DISTANCES (I.E., GREATER THAN 100 KILOMETERS). A HORIZONTAL DIFFUSION MODEL, USING DIFFUSIVITIES BASED UPON THE RANDOM HORIZONTAL CONVECTIVE MOTION OF THE WIND, IS USED TO DETERMINE LONG TIME AVERAGE POLLUTANT CONCENTRATIONS. THE MODEL INCL UDES EFFECTS OF TRANSFORMATION AND DEPLETION AS FIRST ORDER PROCESSES, AND CAN ACCOUNT FOR VERTICAL DIFFUSION WHERE NECESSARY. VARIOUS PARAMETRIC ST UDIES OF SOX TRANSPORT AND DIFFUSION WILL BE CARRIED OUT AND COMPARED WITH AVAILABLE MONITORING DATA IN THE CONTINENTAL U.S.

An aeration project is proposed in the lower portion of the approximately seven mile long 20 billion gallon Loch Raven Reservoir, a key element in the metropolitan Baltimore area water supply system.

Primary objectives are reservoir destratification by aeration, improvement of dissolved oxygen concentrations at lower depths during summer months with concommittant reduction in manganese levels, and a decrease in the number of blue-green algae and also possibly in the total algal count. If these objectives are met, major improvements will occur in raw water quality including elimination of taste and odor problems associated with blue-green algal blooms and reduction in chlorine necessary to mitigate the manganese problem in the fall.

The proposed system involves the feed of compressed air into perforated tubing on the reservoir bottom within a 0.6 mile distance above the dam. Resultant rising air bubbles will achieve destratification. Criteria to be met in the aerated zone are a uniform temperature depth profile ($\pm$ 3°C) and a 2.0 mg/l minimum dissolved oxygen concentration at the reservoir bottom.

Restorative measures involves watershed modifications and purchase of easements. The project specifically includes construction of flood control dams, sediment retention structures and diversion; seeding gulley shaping; and roadside erosion control (SCS).

DETERMINATION OF GIARDIA CYST VIABILITY

START/ COMPL DATE : 10/76 - 10/76 : FUNDING : EST. - FY 77 / $ 41983
TASK/EPA CODE :C614A-7186 / R804898-02 (GRANT) PRIOR FY76 / $ 419831
PROJECT OFFICER : J C HOFF
INVESTIGATORS : E A MEYER OREGON STATE HIGHER EDUC. SYS
MILE: 10/76 -PROJECT START
08/77 -CONTINUATION FUNDING PACKAGE PROCESSED
12/77 -ANNUAL REPORT
09/78 -PROJECT COMPLETED
12/78 -FINAL REPORT PUBLISHED

OBJECTIVES: PRINCIPAL OBJECTIVE IS THE DEVELOPMENT OF A SENSITIVE, STANDARDIZED METHOD OF DETERMINING WHETHER OR NOT GIARDIA CYSTS ARE VIABLE. APPROACH/CURRENT PLANS: A. OBTAINING A SUPPLY OF GIARDIA CYSTS. AS YMPTOMATIC, GIARDIA-INFECTED HOSTS WILL BE IDENTIFIED AND USED AS A SOURCE OF CYSTS. HUMAN HOSTS (FROM THE UNIV. OF ORE. HEALTH SCIENCES CENTER) OR MONKEY HOSTS (OREGON REGIONAL PRIMATE CENTER) MAY BE USED; A SUPPLY OF DOGS IS ALSO AVAILABLE. B. PURIFICATION AND CONCENTRATION OF GIARDIA CYSTS FROM FECAL MATTER. SEVERAL METHODS WILL BE TESTED AND THE MOST SUITABLE ONE ADAPTED. THESE INCLUDE THE FILTRATION OF HOMOGENIZED FECAL SUSPENSION THROUGH GRADED (5, 10, 15 MICRON) NYLON SCREENS, AND THE USE OF SUCROSE DENSITY GRADIENTS. C. DETERMINATION OF CYST VIABILITY WILL BE APPR OACHED IN SEVERAL WAYS: (1) THE POSITIVE/NEGATIVE CULTURE METHOD, IN WHICH THE MINIMUM NUMBER OF CYSTS NEEDED TO ESTABLISH A CULTURE IS DETERMINED. (2) CYST INFECTIVITY: DEVELOPMENT OF A SUITABLE ANIMAL MODEL, NORMAL AS WELL AS IMMUNOSUPPRESSED ANIMALS WILL BE TESTED FOR THIS PURPOSE. PRE LIMINARY EXPERIMENTS SUGGEST THAT THE IMMUNOSUPPRESSED MOUSE IS CAPABLE OF SUPPORTING INFECTIONS OF GIARDIA RECOVERED FROM MAN. (3) QUANTITATED BIO LUMINESCENCE. THIS METHOD INVOLVES DETERMINING WHETHER ATP, PRESENT IN ALL LIVING CELLS, IS DEMONSTRABLE AND QUANTIFIABLE IN GIARDIA CYSTS.

REMOVAL OF VIRUS FROM PUBLIC WATER SUPPLIES

START/ COMPL DATE : 10/76 - 10/78 : FUNDING : EST. - FY 77 / $ 20000
TASK/EPA CODE :D6148-026 / R804903-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : E W AKIN
INVESTIGATORS : J T OCONNOR UNIV. OF MISSOURI
L HEMPHILL UNIV. OF MISSOURI
L LEE UNIV. OF MISSOURI
V STUMP UNIV. OF MISSOURI

MILE: 08/77 -CONTINUATION FUNDING PACKAGE PROCESSED
01/78 -COMPLETE PILOT PLANT CONSTRUCTION
09/78 -PROJECT COMPLETED
12/78 -FINAL REPORT PUBLISHED

THE OBJECTIVE OF THE PROPOSED RESEARCH IS TO DETERMINE THE VIRUS REMOVAL OR DESTRUCTION CAPABILITY OF VARIOUS WATER TREATMENT PROCESSES. THE PROCESSES TO BE TESTED WILL INCLUDE CONVENTIONAL PHYSICAL AND CHEMICAL TREATMENT PROCESSES, AS WELL AS DISINFECTION. PARTICULAR EMPHASIS WILL BE PLACED ON THE VIRICIDAL PROPERTIES OF VARIOUS WATER DISINFECTANTS, INCLUDING CHLORINE, CHLORAMINE, CHLORINE DIOXIDE AND OZONE ON NATURALLY OCCURRING VIRUS. THE PROPOSED STUDY WILL BE CONDUCTED AT THE WATER TREATMENT PLANT IN LEXINGTON, MISSOURI, UTILIZING WATER FROM THE MISSOURI RIVER. THE OVERALL STUDY WILL CONSIST OF THREE PARTS. THE FIRST PART WILL BE A LONGITUDINAL STUDY OF AT LEAST ONE YEAR TO DETERMINE THE VIRAL CONTENT OF THE INFLUENT AND FINISHED WATER FROM THE LEXINGTON WATER TREATMENT PLANT. IN THE SECOND PART, AN ATTEMPT WILL BE MADE TO ASSESS THE CONTINUED EFFECTIVENESS OF WATER DISINFECTION PROCESSES UTILIZING MISSOURI RIVER WATER WHICH HAS BEEN PRESETTLED (UNDERGONE PLAIN SEDIMENTATION) OR SOFTENED BY THE ADDITION OF LIME. FINALLY, A PILOT PLANTS WILL BE CONSTRUCTED TO ASSESS THE EFFECT OF CONVENTIONAL WATER TREATMENT PROCESSES ON THE REMOVAL OF NATURALLY OCCURRING VIRUS. THE PILOT PLANT WILL BE A PORTABLE, 10 GPM TREATMENT UNIT PROVIDING FOR CHEMICAL ADDITION AND MIXING, COAGULATION, SEDIMENTATION AND FILTRATION. THE TREATMENT RESPONSES TO BE MEASURED WILL BE PRIMARILY VIROLOGICAL, BUT WILL INCLUDE OTHER CONVENTIONAL OR TENTATIVE MEASURES OF MICROBIOLOGICAL CONTAMINATION SUCH AS MPN, FECAL COLIFORM, TOTAL COLIFORM, ACID-FAST ORGANISMS AND YEAST. WHERE APPROPRIATE, ADDITIONAL SAMPLES WILL BE COLLECTED FOR ANALYSIS FOR THE FORMATION OF CHLORINATED ORGANIC COMPOUNDS.

Restoration techniques include removal of accumulated sludge and sediment, diversion of storm water, expansion of marshy areas in order to filter and dilute natureal run off, and stabilization of soil around the lake system to prevent erosion.

Renovation consists of draining and dredging the pond, erosion control, pond inlet and outlet improvement and pond bottom repair.

804910

This application is for a Federal matching grant to assist North Marin County Water District to restore Stafford Lake", a 4400 acre foot municipal water supply reservoir constructed in 1950 to serve 45,000 people and also providing fishing and shoreline recreation benefits (golf course, park and picnic areas). Over the years the lake has been the receptical of nutrient laden silt which has accelerated the lake cycle to a eutrophic state. The nutrients stem chiefly from dairy wastes which are in the process of being controlled but the shallow areas created over the years and enriched bottom sediments requires removal to restore lake health. Yet an additional source of pollution is runoff from urban development encroaching on the east perimeter. One key buffer (land) purchase could stem this encroachment. Currently, part of the desired buffer land is also subjected to gross overgrazing which is resulting in rapid erosion which must be halted by erosion control work.

The purpose of this project is to assess the environmental impact of wastewater contaminants originating from the production of synthetic fuels from coal, and to evaluate alternative wastewater treatment technologies for the control of these contaminants. The project is carried out in several phases over a 5-year period consisting of (a) a literature review and survey of pilot- and full-scale coal conversion facilities to identify specific contaminants which might be found in coal processing wastewaters, (b) a study of the biodegradability of selected organic constituents from such wastewaters including an assessment of the aquatic impact of these constituents and biodegradation products, (c) biological and physical-chemical treatability studies of selected organic constituents and identification of the residuals following treatment, (d) animal toxicology studies to evaluate the potential health effects of those wastewater components for which sufficient information is not available in the literature, (e) treatability studies of composite synthetic and real coal-processing waters including analytical characterization and aquatic impact assessment of the treated waters, and (f) development of design criteria for continuous treatment of wastewaters from coal-conversion facilities.

DEVELOPMENT OF BIOASSAY PROCEDURES FOR DEFINING POLLUTION OF HARBOR SEDIMENTS

START/ COMPL DATE : 11/76 - 10/78 : FUNDING : EST. - FY 77 / $ 69940
TASK/EPA CODE :N608A-085 / R804918-01 (GRANT) PRIOR FY76 / $ 1980911
PROJECT OFFICER : R L ANDERSON
INVESTIGATORS : D A BAHNICK — UNIV. OF WISCONSIN
A L BUIKEMA — VIRGINIA POLY. INST. & ST. U.
J CAIRNS — VIRGINIA POLY. INST. & ST. U.
C L RUTHERFORD — VIRGINIA POLY. INST. & ST. U.
W A SWENSON — UNIV. OF WISCONSIN

MILE: 09/78 -FINAL REPORT

THIS PROJECT WILL MEASURE THE EFFECTIVENESS OF SEVERAL BIOASSAY PROCEDURES AND CHEMICAL TESTS FOR DEFINING QUALITY OF HARBOR SEDIMENTS SUBJECT TO REMOVAL BY DREDGING. RESULTS OF CHEMICAL TESTS FOR CONCENTRATION OF VOLATILE SOLIDS, COD, TOTAL KJELDAHL NITROGEN, OIL AND GREASE, PCB'S, SELECTED PESTICIDES AND POLYNUCLEAR AROMATIC HYDROCARBONS IN HARBOR SEDIMENTS AND/OR THEIR INTERSTITIAL WATERS WILL BE DETERMINED AND RELATED TO THE FOLLOWING: 1. CONCENTRATION OF METALS AND ORGANIC POLLUTANTS IN CHIRONOMIDAE REMOVED FROM THE SEDIMENTS. 2. COUGH RESPONSE OF BLUEGILL SUNFISH IN BIOASSAYS USING SEDIMENT INTERSTITIAL WATERS. 3. SURVIVAL OF DAPHNIA SP. IN BIOASSAYS WITH SEDIMENT AND SURFICIAL WATERS. 4. BEHAVIOR AND SURVIVAL OF HEXAGENIA SP. IN HARBOR SEDIMENTS. 5. BIOACCUMULATING POTENTIAL, AS DEFINED BY THE LIPID/WATER PARTITION COEFFICIENT OF ORGANIC CHEMICALS IN INTERSTITIAL WATER WILL BE DEFINED FROM RELATIONSHIPS TO CONCENTRATION IN CHIRONOMIDAE. 6. ACTIVITY OF ENZYMES IN SEDIMENT INTERSTITIAL WATERS. AND (7) BIOCONCENTRATION OF ORGANIC POLLUTANTS BY FISH. THE PROJECT WILL PROVIDE SEVERAL RELIABLE AND INEXPENSIVE SHORT-TERM TESTS FOR ACCURATELY DEFINING THE POLLUTION STATUS OF POTENTIAL HARBOUR DREDGE MATERIALS.

A NUMERICAL STUDY OF HALOCARBON CHEMICAL REACTION ON STRATOSPHERIC &
TROPOSPHERIC OZONE & OTHER PHOTOCHEMICAL PROCESSES (ABBREV)

START/ COMPL DATE : 11/76 - 10/79 : FUNDING : EST. - FY 77 / $ 56000
TASK/EPA CODE :G603A-AI-06 / R804921 01 (GRANT) PRIOR FY76 / $ 340001
PROJECT OFFICER : P HANST
INVESTIGATORS : P J CRUTZEN COLORADO STATE UNIVERSITY
MILE: 06/79 -FINAL REPORT

A SYSTEMATIC DEVELOPMENT OF NUMERICAL MODELS CAPABLE OF EXAMINING THE EF
FECTS OF HALOGENATED GASES ON STRATOSPHERIC PHOTOCHEMISTRY AND THE EARTH'S
OZONE BALANCE WILL BE UNDERTAKEN. BECAUSE THE INDUSTRIAL HALOGENA
TED GASES HAVE THEIR ORIGIN AT THE SURFACE, THIS RESEARCH WILL ALSO BE CON
CERNED WITH THE FATE OF THESE GASES IN THE TROPOSPHERE. TO ACCOMPLISH THIS
GOAL, IT IS IMPORTANT TO SIMULATE ATMOSPHERIC PROCESSES AS
REALISTICALLY AS POSSIBLE. THEREFORE, THE MODEL SHOULD BE DESIGNED SUCH TH
AT EXCHANGE MECHANISMS IN THE PLANETARY BOUNDARY LAYER, AS WELL AS BETWEEN
THE TROPOSPHERE AND STRATOSPHERE, CAN BE PROPERLY SIMULATED. THE
FIRST STEP OF THIS MODELING EFFORT WILL BE THE DESIGN AND EXAMINATION OF
THE RESULTS OF A ONE-DIMENSIONAL, TIME-DEPENDENT MODEL. EVENTUALLY
TWO- AND THREE-DIMENSIONAL MODELS INCORPORATING REALISTIC BOUNDARY CONDI
TIONS WILL BE DEVELOPED. USING THE BEST AVAILABLE CHEMICAL KINETIC DATA, A
DETAILED EXAMINATION OF THE FORMATION OF INTERMEDIATE HALOGENATED GASES
WHICH MAY OR MAY NOT BE REMOVED FROM THE TROPOSPHERE BY HETEROGEN
EOUS PROCESSES WILL BE CONDUCTED. TO OBTAIN A MEASURE OF THE EFFICIENCY OF
THESE PROCESSES, THE NUMERICAL SIMULATIONS WILL BE COMPARED TO
MEASUREMENTS OF THE VARIOUS HALOGENATED GASES IN THE ATMOSPHERE.

PREPARATION OF A MUNICIPAL TECHNOLOGY BULLETIN AND INPUT TO THE WRSIC DATA SERVICE

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 57219

THIS COORDINATION WILL IN PART CONSIST OF ENSURING COMMUNICATION BETWEN THE REVIEW PANEL AND THE CENTERS AT COLU MBIA AND STANFORD; IT WILL ALSO CONSIST OF ENSURING DIRECT COMMUNICATION B ETWEEN THE TWO CENTERS IN THE FORM OF BOTH PERSONAL VISITATIONS BY MEMBERS OF THE STUDY AND SEMINARS AS APPROPRIATE. AS SOON AS ANY TECHNICAL REPORTS AND PAPERS ARE PRODUCED AS A RESULT OF THE STUDY, SIMS WILL SEE TH AT THERE IS SUITABLE DISTRIBUTION. COLUMBIA: THE FIRST STEPS WILL BE TAKEN TOWARDS THE CONSTRUCTION OF A DOUBLY STOCHASTIC POISSON PROCESS AS A MODE L FOR MORTALITY AND MORBIDITY DATA IN WHICH THE RATE PARAMETER IS ITSELF A RANDOM VARIABLE DEPENDING ON TIME, WEATHER, AND POLLUTION. RESEARCH WILL BEGIN TO DEVELOP SOUNDER STATISTICAL METHODS THAN SO FAR EMPLOYED FOR DETECTING GEOGRAPHIC AREAS IN WHICH THERE IS NONRANDOM CLUSTERING OF CA SES OF A CERTAIN DISORDER, WITH PROPER CONTROL FOR SUCH FACTORS AS SIZE OF POPULATION, PROXIMITY TO TREATMENT FACILITIES, AND UTILIZATION OF THOSE FACILITIES. PRINCIPAL COMPONENTS ANALYSIS FOR INDIVIDUAL POLLUTANTS WILL BEGIN OF CORRELATIONS, COVARIANCES, AND RAW CROSS-PRODUCTS BETWEEN READINGS FROM THE 40 MONITORING STATIONS IN THE NEW YORK CITY AEROMETRIC NETWORK. STANFORD: DURING THE FIRST YEAR, RESEARCH WILL INCLUDE THE FOLLOWING: THE EFFECTS OF TIME AVERAGING ON THE DISTRIBUTION OF POLLUTANT CONCENTRATION MAXIMA; THE RELEVANCE OF PROBABILISTIC ASSUMPTIONS TO THE E STIMATION OF SPATIAL POLLUTANT DISTRIBUTIONS; THE RELATION BETWEEN SPATIAL AIR POLLUTION PATTERNS AND SPATIAL HEALTH AND MORTALITY STATISTICS; A RETROSPECTIVE LOOK AT THE EFFECTS OF THE 1974 FUEL CRISIS ON AIR POLLUTION AND MORTALITY STATISTICS.

BEHAVIOR OF DDT AND KEPONE IN SEDIMENT-WATER SYSTEMS UNDER DIFFERENT OXIDATION REDUCTION AND PH CONDITIONS

START/ COMPL DATE : 10/76 - 10/78 : FUNDING : EST. - FY 77 / $ 85416
TASK/EPA CODE :K609A-305 / R804940-01 (GRANT) PRIOR FY76 / $ 992001
PROJECT OFFICER : H W HOLM
INVESTIGATORS : W H PATRICK LOUISIANA STATE UNIV. SYSTEMS
MILE: 01/79 -REPORT TRANSFORMATION OF PESTICIDES IN WATER/SEDIMENT SYTEMS

THE RESULTS OF THIS STUDY SHOULD PROVIDE INFORMATION ON (1) CONDITIONS AFFECTING THE MOVEMENT OF THESE PESTICIDES INTO ESTUARIES AND QUIET WATER AREAS, (2) CONDITIONS GOVERNING MIGRATION OF THE PESTICIDES INTO THE SEDIMENT AFTER REACHING A QUIET WATER AREA, AND (PROBABLY MOST IMPORTANT), (3) THE EFFECT ON THE PHYSICO-CHEMICAL CONDITIONS LIKELY TO BE ENCOUNTERED IN NATURE ON THE DEGRADATION OF THESE TWO BIOLOGICALLY ACTIVE PESTICIDES.

CHAMBERS WORKS WASTEWATER TREATMENT PLANT - REMOVAL OF ORGANIC AND ORGANO-NITROGEN COMPOUNDS FROM WASTEWATER

START/ COMPL DATE : 11/76 - 11/79 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :L610B-19 / S804943-02 (GRANT) PRIOR FY76 / $ 870001
PROJECT OFFICER : J E MATTHEWS
INVESTIGATORS : H W HEATH E.I. DU PONT DE NEMOURS & CO.
MILE: 11/76 -BEGAN STARTUP OF PACT SYSTEM
03/77 -PACT SYSTEM ON LINE
09/77 -REPORT ON STARTUP OF PACT SYSTEM
11/79 -COMPLETE PROJECT-REPORT ON OPERATION OF PACT SYSTEM

THE OBJECTIVE OF THIS PROJECT IS TO OBTAIN ACTUAL OPERATING AND COST DATA FROM LARGE SCALE INDUSTRIAL APPLICATION OF "PACT" TECHNOLOGY. DATA WILL BE GATHERED FROM A WASTEWATER TREATMENT PLANT BEING CONSTRUCTED AT THE DU PONT CHAMBERS WORKS TO TREAT 26,000 GPM COLORED INDUSTRIAL WASTEWATER. NEUTRALIZED EFFLUENT FROM THE PRIMARY TREATMENT SECTION OF THE PLANT WILL BE CONTACTED WITH 100 TO 200 PPM POWDERED ACTIVATED CARBON AND FED TO THREE 4,000,000 GALLON AERATORS IN PARALLEL CONTAINING RECYCLED ACTIVATED SLUDGE. THE "PACT" COMBINED CARBON AND BIOLOGICAL TREATMENT WILL REMOVE OVER 90% OF THE WASTEWATER BOD AS WELL AS NON-BIODEGRADABLE, BUT CARBON ADSORBABLE ORGANICS, TOXIC SUBSTANCES AND COLOR WILL ALSO BE REDUCED. WASTEWATER QUALITY WILL BE SUFFICIENT TO PERMIT CHAMBERS WORKS TOTAL PLANT EFFLUENT TO MEET ALL EFFLUENT LIMITATIONS IN THE PLANT'S NPDES PERMIT. THIS CONTINUATION GRANT WILL COVER THE INITIAL YEAR'S EXPERIENCE WITH START-UP AND OPERATION OF THE WASTEWATER TREATMENT PLANT. PLANT CONSTRUCTION WAS GENERALLY COMPLETED BY NOVEMBER 1976 AND A LENGTHY START-UP PROCEDURE COMMENCED. IT IS EXPECTED THE PLANT WILL BE OPERATING AT FULL CAPACITY BY MAY, 1977.

DILINEATION OF COASTAL MARSH BOUNDARIES IN CENTRAL ATLANTIC COASTAL REGION

START/ COMPL DATE : 10/76 - 01/78 : FUNDING : EST. - FY 77 / $ 1800
TASK/EPA CODE :M608C-011 / R804947-01 (GRANT) PRIOR FY76 / $ 360001
PROJECT OFFICER : H V KIBBY
INVESTIGATORS : J D BOON VIRGINIA INST. OF MARINE SCI.
MILE: 02/78 -FINAL REPORT

PROJECT WILL DEVELOP A SET OF VEGETATIVE CRITERIA AND RELATE THESE CRITERIA TO A TIDAL DATUM IN THE MID-ATLANTIC REGION.

804948

A full cost/benefit analysis of the nuclear fuel reprocessing industry is proposed. The analysis will compare, over time, the costs of reprocessing and associated charges versus the value of the recovered materials, uranium and plutonium. The effects of yellowcake availability, properties of plutonium recycle fuels, safeguard and environmental costs on the value of the recovered products will also be included in the analysis.

The study will predict the timing for entry of a commercial nuclear fuel reprocessing industry.

804949

Project to evaluate efficiency and cost effectiveness of the following nutrient management and lake restoration pilot projects: creation of sod buffer zones along stream banks, construction of residential sedimentation ponds and installation of an aeration system in the reservoir.

STRUCTURE ACTIVITY CORRELATION STUDIES

START/ COMPL DATE : 09/76 - 09/78 : FUNDING : EST. - FY 77 / $ 70000
TASK/EPA CODE :N608A-086 / R804953-02 (GRANT) PRIOR FY / 1
PROJECT OFFICER : G D VEITH
INVESTIGATORS : V R MAGNUSON UNIV. OF MINNESOTA
D K HARRISS UNIV. OF MINNESOTA

MILE: 09/77 -DEVELOP QUIRY LANGUAGE FOR DATA BASE
09/78 -COMPLETE SOFTWARE FOR DATA BASE
07/79 -EXPAND DATA BASE

A COMPUTERIZED DATA BASE DEALING WITH TOXICITY AND BIOACCUMULATION OF COMPOUNDS ALONG WITH RELEVANT PHYSICAL PARAMETERS WILL BE ESTABLISHED. SUBSEQUENTLY, THIS DATA BASE WILL BE USED TO DETERMINE CORRELATIONS AMONG THE PHYSICAL PARAMETERS OF THE COMPOUNDS AND THEIR TOXICITY AND BIOACCUMULATION. SUCH CORRELATION STUDIES WILL ALLOW DEVELOPMENT OF A MODEL TO PREDICT TOXICITY AND BIOACCUMULATION OF OTHER COMPOUNDS NOT IN THE DATA BASE.

804955

This is a study of the performance of electrostatic precipitators for the control of particulate emissions from nonferrous metallurgical smelters, roasters, and furnaces in zinc, lead, copper, and aluminum plants.

The study includes the characterization of airborne emissions from these operations and the preparation of a manual that can be used as a guide for the selection and improvement of control equipment.

Detailed data are to be obtained from operating installations on mass loadings, particle size distribution, and trace metal and gas concentrations. These data are to be combined with laboratory measurements of electrical resistivity of collected particulate matter and wit operating data on the electrostatic precipitator control equipment. Th information will be used in the analysis of precipitator performance by means of a computer model.

The project also includes the development of improved methods for sampling and analysis of effluent gases from metallurgical operations, especially methods of eliminating interferences from chemical reactions during sampling.

804974

This project will determine whether the selected pesticides have reproductive effects in female rats after post-implantation exposure. The effects on letter size and weight and effects on plancental, uterine and ovarian tissues will be examined. Male offspring of the experimental mothers will be tested for sterility effects and the female offspring for fecundity.

The effects of chlordimeform and related compounds as an antagonist of contractions of vascular smooth induced by various vasoactive agents will be determined. The effects of these chemicals on calcium flux in vascular smooth muscle and on the release of norepinephrine from sympathetic nerves will also be determined. Also to be measured is the effect of chlordimeform on cardiovascular responses of the dog, and the interactions of this drug with other vasoactive agents.

DETERMINATION OF THE ENVIRONMENTAL IMPACT OF SEVERAL SUBSTITUTE CHEMICALS IN AGRICULTURALLY-AFFECTED WETLANDS

START/ COMPL DATE : 09/76 - 10/79 : FUNDING : EST. - FY 77 / $ 99250
TASK/EPA CODE :Q608C-1-04 / R804976-02 (GRANT) PRIOR FY76 / $ 997541
PROJECT OFFICER : F G WILKES
INVESTIGATORS : J W DAY LOUISIANA STATE UNIV, SYSTEMS
S P MEYERS LOUISIANA STATE UNIV, SYSTEMS
R P GAMBRELL LOUISIANA STATE UNIV, SYSTEMS

MILE: 10/79 -FINAL REPORT

A STUDY DESIGNED TO DEVELOP A MODEL SYSTEM APPROACH TO ANALYSIS OF BIOCIDE EFFECTS, ESPECIALLY THOSE OF GUTHION AND OTHER ORGANOPHOSPHOROUS PESTICIDES, IN ECOLOGICALLY DIVERSE LOCALITIES IN SOUTH LOUISIANA. PRIMARY OBJECTIVE IS TO ESTABLISH MEANS OF ALLEVIATING LAND USE CONFLICTS BETWEEN CHEMICAL DISCHARGES FROM AGRICULTURE AND WETLAND PRODUCTIVITY. PHASES OF THE STUDY INVOLVE LABORATORY ANALYSES OF TARGET COMPOUND S TABILITY UNDER DIVERSE PHYSICAL, CHEMICAL, AND MICROBIAL CONDITIONS AND FI ELD INVESTIGATIONS OF ORGANOPHOSPHORUS CHEMICAL BEHAVIOR, INCLUDING RUNOFF PATTERNS, BREAKDOWN AND BIOACCUMULATION IN THE AFFECTED AREAS. LABORATORY STUDIES OF THE INFLUENCE OF PH, OXIDATION-REDUCTION CONDITIONS, AND SALINITY ON THE PERSISTENCE OF GUTHION IN WETLAND SOILS ARE UNDERWAY. BASELINE STUDIES TO CHARACTERIZE THE COMMUNITY COMPOSITION OF PLANTS, AQUATIC AND BENTHIC ANIMALS, AND MICROBIAL POPULATIONS AT THE FIELD SITES HAVE BEEN INITIATED. DURING THE SECOND YEAR, LABORATORY STUDIES ON THE EFFECTS OF CONTROLLED PHYSIOCHEMICAL ENVIRONMENTS ON THE FATE OF THE TARGET COMPOUND WILL CONTINUE. FIELD APPLICATIONS OF GUTHION WILL BE INITIATED AND LABORATORY AND FIELD STUDIES OF THE EFFECTS OF THE PESTICIDES ON COMMUNITY COMPOSITION AND METABOLISM WILL BE CONDUCTED.

EVALUATION OF TOXIC COMPONENTS & THEIR CONCENTRATION IN KRAFT & SULFITE MILL EFFLUENTS

START/ COMPL DATE : 10/76 - 09/78 : FUNDING : EST. - FY 77 / $ 61000
TASK/EPA CODE :B610B-411 / R804977-01 (GRANT) PRIOR FY76 / $ 830001
PROJECT OFFICER : V DALLONS
INVESTIGATORS : J M LEACH BRITISH COLUMBIA RES. COUNCIL
A B MCKAUGE BRITISH COLUMBIA RES. COUNCIL
T E HOWARD BRITISH COLUMBIA RES. COUNCIL
C C WALDEN BRITISH COLUMBIA RES. COUNCIL
L T CHUNG BRITISH COLUMBIA RES. COUNCIL

MILE: 07/76 -FUNDING PACKAGE SUBMITTED
08/76 -AWARD FUNDS FOR PROJECT
10/76 -FUNDING INCREMENT
10/78 -FINAL REPORT RECEIVED

OBJECTIVES: DEVELOP A CHEMICAL ANALYSIS PROCEDURE FOR RAPID MEASUREMENT OF TOXIC MATERIALS CONCENTRATION IN BLEACHED AND UNBLEACHED KRAFT WHOLE MILL EFFLUENTS, GROUNDWOOD EFFLUENTS AND SULFITE MILL EFFLUENTS; AND RELATE THE CHEMICAL ASSAY RESULTS TO EFFLUENT TOXICITY MEASURED IN BIOASSAYS USING RAINBOW TROUT. APPROACH: THE EXPERIMENTAL WORK WILL BE CARRIED OUT IN TWO PHASES: A) DEVELOPMENT OF THE ANALYTICAL PROCEDURE AND DEMONSTRATION OF A RELATIONSHIP BETWEEN ANALYTICAL RESULTS AND EFFLUENT TOXICITY. ALSO, TOXIC LOADINGS IN EFFLUENTS FROM VARIOUS TYPES OF PULP MILLS. A FINAL REPORT WILL BE ISSUED DETAILING FINDINGS OBTAINED FROM THIS EFFORT.

NOX EMISSIONS FROM FLUIDIZED COMBUSTION

START/ COMPL DATE : 10/76 - 05/79 : FUNDING : EST. - FY 77 / $ 150000
TASK/EPA CODE :F623A-05 / R804978 (GRANT) PRIOR FY76 / $ 1000001
PROJECT OFFICER : W STEEN
INVESTIGATORS : J M BEER MASS. INST. OF TECHNOLOGY
MILE: 04/77 -INSTALLATION OF 7.5 CM BATCH TYPE COMBUSTOR
09/77 -DESIGN AND INSTALLATION OF 30 X 30 CM AFB AND SAMPLING TRAIN
10/78 -DESIGN AND CONSTRUCT 10 CM PFB
04/79 -COMPLETE DATA ANALYSIS
05/79 -COMPLETE MATHEMATICAL MODEL DEVELOPMENT

OBJECTIVES OF THE PROGRAM ARE: 1. TO DEVELOP A MECHANISTIC MATHEMATICAL MODEL FOR THE PREDICTION OF NO EMISSION FROM COAL BURNING FLUIDIZED BEDS. 2. TO PROVIDE PHYSICAL-CHEMICAL INPUT PARAMETERS FOR THE MODEL BY AN EXPERIMENTAL STUDY OF THE NO FORMATION-DESTRUCTION PROCESSES IN FLUIDIZED BEDS. 3. TO GENERATE INFORMATION NECESSARY FOR THE DEVELOPMENT OF NEW CONTROL TECHNOLOGY OF NOX EMISSION BASED ON DETAILED PILOT PLANT SCALE AND BENCH SCALE STUDIES AT BOTH ATMOSPHERIC AND ELEVATED PRESSURE. 4. TO TEST THE MATHEMATICAL MODELS SEVERELY OVER SUFFICIENTLY WIDE RANGES OF OPERATING VARIABLES. APPROACH TO BE USED: THE EXPERIMENTAL STUDY CONSISTS OF TWO PARALLEL INVESTIGATIONS: 1. THE STUDY OF THE NO FORMATION-DESTRUCTION PROCESSES IN CONTINUOUSLY OPERATED FLUIDIZED COMBUSTORS; 2. BATCH TYPE KINETIC STUDIES CARRIED OUT WITH THE 7.5 CM DIA EXTERNALLY HEATED FLUIDIZED BED AND THE 10 CM DIA PFB. IN THE CONTINUOUS FLUIDIZED COMBUSTION EXPERIMENTS THE SPATIAL DISTRIBUTIONS OF THE GASEOUS AND SOLID SPECIES CONCENTRATIONS AND OF TEMPERATURE WILL BE DETERMINED IN THE FLUIDIZED BED AND THE FREEBOARD FOR THE VARIATION OF OPERATIONAL AND DESIGN PARAMETERS. A BATCH TYPE COMBUSTOR WILL BE USED TO INVESTIGATE THE CHAR OXIDATION REACTION. THE EXPERIMENTAL DATA FROM THE CONTINUOUS COMBUSTOR AND THE BATCH COMBUSTOR WILL BE USED TO TEST THE MODEL FOR THE FORMATION AND DEFORMATION OF NO IN FLUIDIZED BED COMBUSTORS. EXPECTED OUTPUTS ARE: 1. AN UNDERSTANDING OF THE MECHANISM OF FORMATION AND DESTRUCTION OF "FUEL NO" IN FLUIDIZED BEDS. 2. THE MODEL OF NO EMISSION WILL PROVIDE INFORMATION FOR THE SCALING UP AND FURTHER DEVELOPMENT OF FLUIDIZED COMBUSTION PLANTS.

POLLUTANTS FROM SYNTHETIC FUELS PROCESSES

START/ COMPL DATE : 11/76 - 10/81 : FUNDING : EST. - FY 77 / $ 829856
TASK/EPA CODE :F623A-24 / R804979-02 (GRANT) PRIOR FY76 / $ 3000001
PROJECT OFFICER : T W PETRIE
INVESTIGATORS : F O MIXON RES. TRIANGLE INSTITUTE
J CLELAND RES. TRIANGLE INSTITUTE
D WAGONER RES. TRIANGLE INSTITUTE
D ROSENTHAL RES. TRIANGLE INSTITUTE
R ZWEIDINGER RES. TRIANGLE INSTITUTE
C SPARICINO RES. TRIANGLE INSTITUTE

MILE: 07/77 -REACTOR FACILITY AND ANALYSIS EQUIPMENT OPERATIONAL
12/77 -TEST PLAN FORMULATED
12/78 -KINETICS OF POLLUTANT FORMATION SCREENED
10/79 -KINETICS OF POLLUTANT FORMATION MEASURED THOROUGHLY
11/80 -ENVIRONMENTAL ASSESSMENT COMPLETED
07/81 -RECOMMENDATIONS FOR CONTROL STRATEGIES MADE

THE PURPOSE OF THE RESEARCH IS TO DEVELOP A FUNDAMENTAL UNDERSTANDING OF THOSE FACTORS AND CONDITIONS WHICH CAUSE THE PRODUCTION OF ENVIRONMENTAL POLLUTANTS IN SYNFUELS PROCESSES AND TO PROVIDE TO EPA AND TO THE SCIENTIFIC AND TECHNICAL COMMUNITY THE INFORMATION NEEDED TO GUIDE THE CONTROL OF POTENTIALLY HAZARDOUS MATERIALS FROM SYNFUELS PLANTS OF THE FUTURE. THE RESEARCH PLAN INCLUDES BOTH AN EXPERIMENTAL AND AN ANALYTICAL STUDY. THE EXPERIMENTAL STUDY INCLUDES FIRST THE DESIGN, FABRICATION AND OPERATION OF ONE OR MORE LABORATORY REACTORS TO SIMULATE CONDITIONS WHICH MAY BE UTILIZED IN ACTUAL SYNFUELS PLANTS, THE DEVELOPMENT AND IMPLEMENTATION OF CHEMICAL ANALYSIS PROCEDURES FOR THE EVALUATION OF ELEMENTS AND COMPOUNDS THAT RESULT, FOR SCREENING OF THE MAJOR COALS WHICH ARE AVAILABLE IN THE U.S., AND FOR THE DETERMINATION OF THE KINETICS OF FORMATION OF THE POLLUTANTS OF SIGNIFICANCE. THE ANALYTICAL STUDY PROVIDES FOR UTILIZING RESULTS OF THE SCREENING TESTS TO (1) PROJECT POTENTIAL HUMAN EXPOSURE TO EFFLUENTS AND EMISSIONS FROM THESE PLANTS AND (2) ESTABLISH PRIORITY RATINGS FOR THE VARIOUS POLLUTANTS BASED UPON THE EXTENT TO WHICH PROJECTED EXPOSURES ARE HAZARDOUS.

DEVELOPMENT & APPLICATION OF MULTIPLE TRACER TECHNIQUES FOR THE STUDY OF POLLUTANT TRANSPORT AND DISPERSION IN THE ATMOSPHERE
START/ COMPL DATE : 11/76 - 10/77 : FUNDING : EST. - FY 77 / $ 13500
TASK/EPA CODE :06258-EA-18 / R804990-01 (GRANT) PRIOR FY76 / $ 540001
PROJECT OFFICER : - SCHIERMEIER
INVESTIGATORS : F H SHAIR CALIF. INST. OF TECHNOLOGY
MILE: 09/77 -DATA REPORT

THIS IS A PROPOSAL REQUESTING SUPPORT FOR THE FURTHER DEVELOPMENT AND APPLICATION OF MULTIPLE ATMOSPHERIC TRACER TECHNIQUES. THE ANALYTICAL APPROACH IS TO EXTEND THE USE OF ELECTRON CAPTURE GAS CHROMATOGRAPHY. RECENTLY, WITH THE HELPFUL SUGGESTIONS GIVEN TO US BY RAY DIXON, WE HAVE DEVELOPED SYSTEMS WHICH SEPARATE SF6, CBRF3, CCL2F2, O2, AND CBR2F2 INTO SHARP DISTINCT PEAKS, THE LAST OF WHICH ELUTES WITHIN 200 SECONDS FROM THE TIME OF INJECTION. THE REST OF THE SYSTEM DEVELOPMENT IS TO DEVELOP THE CAPABILITY TO ACCURATELY ANALYZE AT LEAST 1000 AIR SAMPLES PER DAY. THE FIRST EXTENDED APPLICATION OF THIS MULTIPLE TRACER TECHNIQUE WOULD BE TO DETERMINE THE TRANSPORT AND EXTENT OF DISPERSION ASSOCIATED WITH: (1) URBAN SOURCES (EMITTED AT LOW LEVELS) AND (2) RURAL POWER PLANT PLUMES EMITTED AT HIGH LEVELS. SPECIFIC EXPERIMENTS ARE PLANNED TO ACCURATELY DETERMINE THE EXTENT OF VERTICAL DISPERSION ASSOCIATED WITH PLUMES TRAVELING OVER RURAL REGIONS AND OVER URBAN REGIONS.

THE ROLE OF SEDIMENTS IN THE STORAGE, MOVEMENT AND BIOLOGICAL UPTAKE OF KEPONE IN ESTUARINE ENVIRONMENTS

START/ COMPL DATE : 10/76 - 09/78 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :Q608C-1-03 / R804993-01 (GRANT) PRIOR FY76 / $ 1775701
PROJECT OFFICER : T T DAVIES
INVESTIGATORS : R J HUGGETT VIRGINIA INST. OF MARINE SCI.
M NICHOLS VIRGINIA INST. OF MARINE SCI.
D S HAVEN VIRGINIA INST. OF MARINE SCI.

MILE: 09/77 -DISTRIBUTION OF KEPONE IN JAMES RIVER SEDIMENT/BIOTA/WATER
09/78 -REPORT ON BIOLOGICAL AND PHYSICAL PROCESSES TRANSPORTING KEPONE

THE PROGRAM WILL STUDY THE FOLLOWING ASPECTS OF KEPONE IN THE JAMES RIVER, VIRGINIA: (1) THE DISTRIBUTION OF KEPONE IN BOTTOM SEDIMENTS OF THE JAMES WILL BE DETERMINED, (2) THE ROUTES OF SEDIMENT TRANSPORT B ELOW HOPEWELL WILL BE DELINEATED, (3) MAJOR SEDIMENT SINKS WILL BE LOCATED AND THE RATES OF SEDIMENT DEPOSITION AT THESE SITES WILL BE DETERMINED, T HE SIZE, LOCATION AND MOBILITY OF THE KEPONE RESERVOIR IN THE JAMES CAN BE DETERMINED FROM THIS INFORMATION, (4) THE EFFECT OF VARYING ENVIR ONMENTAL CONDITIONS OF PH AND SALINITY ON RELEASE OF KEPONE FROM SEDIMENTS WILL BE DETERMINED, THIS DATA WILL PROVIDE ESTIMATES OF WHETHER KEPONE A BSORBED TO SEDIMENTS IS RELEASED TO THE AQUEOUS PHASE AS THE SEDIMENTS ARE MOVED DOWNSTREAM INTO AREAS OF HIGHER PH AND SALINITY, (5) THE ABILITY OF FILTER FEEDING ORGANISMS TO CONCENTRATE KEPONE FROM CONTAMINATED SEDIMENTS WILL BE DETERMINED, DATA FROM THIS STUDY WILL PROVIDE FOR A D ETERMINATION OF THE POTENTIAL HAZARDS WHICH DREDGING POSES TO A VARIETY OF FILTER FEEDING ORGANISMS.

THE GENERALIZATION OF WATER QUALITY CRITERIA USING CHEMICAL MODELS

START/ COMPL DATE : 10/76 - 10/79 : FUNDING : EST. - FY 77 / $ 61317
TASK/EPA CODE :N608A-087 / R804996-02 (GRANT) PRIOR FY76 / $ 462621
PROJECT OFFICER : G E GLASS
INVESTIGATORS : D K HARRISS UNIV. OF MINNESOTA
V R MAGNUSON UNIV. OF MINNESOTA
MILE: 10/78 -COMPLETE DRAFT OF REVISED CHEMICAL SPECIATION MODEL
10/79 -COMPLETE FINAL REVISED CHEMICAL SPECIATION MODEL
10/79 -APPLY MODEL TO REPRESENTATIVE WATER QUALITY CRITERIA

THE FINAL GOAL FOR THIS PROJECT IS THE CORRELATION OF TOXICITY IN A PARTICULAR ECOSYSTEM WITH CHEMICAL SPECIATION AND USE OF THESE CORRELATIONS TO DETERMINE REALISTIC WATER STANDARDS. BIOLOGICAL ACTIVITY MOST COMMONLY CORRELATES BEST WITH SPECIFIC FORMS OR SPECIES OF CONTAM INANTS AND WATER QUALITY STANDARDS WOULD BE MORE SOUNDLY STRUCTURED ON THE PROBABILITY OF AN OFFENDING SPECIES BEING PRESENT OR AVAILABLE. THREE AREAS OF ACTIVITY ARE INVOLVED IN MEETING PROJECT GOALS: A. PREDICTIVE COMPUTER MODELING UTILIZING SPECIATION AND TOXICITY DATA; B. ASSEMBLING A DATA BASE ON SPECIATION FROM LITERATURE, EXPERIMENT, AND ESTIMATION. C. COLLECTION AND INTERPRETATION OF TOXICITY DATA FROM LITERATURE AND E XPERIMENTATION. TO DATE, SUBSTANTIAL PROGRESS HAS BEEN MADE ON PARTS A AND B.

STANDARDS FOR AND METHODS OF ANALYSIS OF RAINWATER FOR ACIDITY

START/ COMPL DATE : 09/76 - 09/78 : FUNDING : EST. - FY 77 / $ 25400
TASK/EPA CODE :E601B-03 / R804998 (GRANT) PRIOR FY76 / $ 159001
PROJECT OFFICER : G D VEITH
INVESTIGATORS : S Y TYREE COLL. OF WILLIAM & MARY
MILE: 09/77 -DEVELOP QUIRY LANGUAGE FOR DATA BASE
09/78 -COMPLETE SOFTWARE FOR DATA BASE
07/79 -EXPAND DATA BASE

PROVIDE A PROCEDURE WHICH WILL SUCCESSFULLY PRODUCE SOLUTIONS WITH SELECTED CHARACTERISTICS OF RAINWATER. EXAMINE THE CHEMISTRY OF POSSIBLE INTERACTIONS OF POTENTIAL INGREDIENTS AND ATTEMPT TO SELECT A SET WHICH WILL REMAIN STABLE UNDER CONDITIONS OF PACKAGING AND PRODUCE DESIRED SOLUTION BEHAVIOR WHEN USED. A RECIPE FOR PREPARING RELEVANT SOLUTION.

INVESTIGATION OF TREATMENT TECHNOLOGIES FOR DYE MANUFACTURE WASTE

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 55000
TASK/EPA CODE : 86108-140 / R805002-01 (GRANT) PRIOR FY76 / $ 800001
PROJECT OFFICER : L WEITZMAN
INVESTIGATORS : T M KEINATH CLEMSON UNIVERSITY
J L GADDIS CLEMSON UNIVERSITY
H G SPENCER CLEMSON UNIVERSITY
T E POLLACK CLEMSON UNIVERSITY

MILE: 06/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT

THE PROPOSED STUDY WILL INVESTIGATE TREATMENT TECHNOLOGIES FOR A TYPICAL DYE WASTEWATER. WET OXIDATION, OZONATION AND HYPERFILTRATION WILL BE INVESTIGATED AS PRETREATMENT STEPS FOR RENDERING REFRACTORY DYE WASTE CONSTITUENTS AMENABLE TO SUBSEQUENT TREATMENT BY BIOLOGICAL, ACTIVATED CARBON, AND COMBINED BIOLOGICAL-ACTIVATED CARBON SYSTEMS. OPTIMUM DESIGN CRITERIA WILL BE DEVELOPED FOR EACH OF THE PRETREATMENT STEPS AND FOR EACH OF THE SUBSEQUENT TREATMENT SYSTEMS. ANALYSES WILL BE MADE FOR SELECTED TOXIC COMPOUNDS ACROSS THE PRETREATMENT STEPS AND ACROSS EACH OF THE TREATMENT SYSTEMS TO DETERMINE THE REMOVAL OF TOXIC SUBSTANCES AND TO INVESTIGATE THE POSSIBILITY OF PRODUCING TOXIC SUBSTANCES IN EACH UNIT PROCESS. A COMPLETE COST ANALYSIS WILL BE MADE FOR EACH TREATMENT MECHANISM. THIS IS IN KEEPING WITH THE EPA GOAL OF DEFINING AND IMPLEMENTING BATEA BY 1983.

DESIGN OF EXPERIMENTS, STATISTICAL ANALYSES, AND EVALUATION OF AQUATIC RESEARCH DATA

START/ COMPL DATE : 10/76 - 10/78 : FUNDING : EST. - FY 77 / $ 45675
TASK/EPA CODE :Q625A-1-09 / R805007-01 (GRANT) PRIOR FY76 / $ 330001
PROJECT OFFICER : W P DAVIS
INVESTIGATORS : R G DOMEY UNIV. OF TEXAS
B A MAASKANT UNIV. OF TEXAS

MILE: 10/78 - FINAL REPORT

OBJECTIVES: CONSULTATION ON DESIGNS OF RESEARCH ANALYSIS OF AQUATIC RESEARCH DATA, INCLUDING EVALUATION AND INTERPRETATION OF RESEARCH RESULTS WHEN REQUIRED. APPROACH: THE APPROACH IS MATHEMATICAL/STATISTICAL ACCOMPANIED BY APPROPRIATE GRAPHIC REPRESENTATION. PROGRESS: CERTAIN PRELIMINARY PILOT STATISTICAL PROGRAMS HAVE BEEN TESTED AND THE RESULTS ARE ON FILE AT THE GULF BREEZE ENVIRONMENTAL RESEARCH LABORATORY, BEARS BLUFF FIELD STATION, P. O. BOX 368, JOHNS ISLAND, SOUTH CAROLINA. CURRENT PLANS: PROCEED, AS REQUIRED; DESIGNS OF EXPERIMENTS, FURTHER DEVELOPMENT OF STATISTICAL METHODS, DATA ANALYSIS, EVALUATION AND INTERPRETATION OF RESULTS, AS NEEDED.

The long-term goal of this program is the development of a chemical model system for the synthesis of potent yet environmentally safe pesticides. As our initial test agents we will use halogenated hydrocarbons belonging to the aldrin and diedrin family. Our studies are designed to: a) differentiate between the carcinogenic vs insecticidal chemical features of these compounds; b) determine the mode of action by which these agents act as chemical carcinogens; c) design a predictive model system for the synthesis of active pesticides wherein the active carcinogenic and mutagenic functional sites of the molecule have been eliminated without sacrificing insecticidal action; d) design new analogs of aldrin and dieldrin which have been chemically modified to make them ecologically less persistent. The immediate goals of this proposal include: a) the synthesis of a series of rationally designed structural analogs of aldrin and dieldrin and its chemically related species; b) the in vitro biological evaluation of the cytotoxic, mutagenic and carcinogenic potentials of these compounds alone and in combination with oncogenic viruses; c) evaluation of the pesticidal effectiveness of the parent compounds and their rationally designed analogs and d) a determination of the mechanism by which radiolabeled pesticides interact with cellular DNA, RNA and protein.

Test compounds with preliminary in vivo activity in our insect test systems, will be analyzed for their ability to a) induce DNA damage, b) inhibit DNA repair processes. Utilizing ^{14}C-labeled compounds of high specific activity we will compare the deoxynucleoside-pesticide (DN-P) profile of these compounds and their differential rate of removal in order to specifically determine the (DN-P) product(s) responsible for any carcinogenic or mutagenic properties of these agents.

STUDY OF PATHOGENIC FREE-LIVING AMOEBA IN FRESH WATER LAKES IN VIRGINIA

START/ COMPL DATE : 11/76 - 10/79 : FUNDING : EST. - FY 77 / $ 44710
TASK/EPA CODE :D607A-013 / R805014-01 (GRANT) PRIOR FY / 1

INVESTIGATORS : J D KEANE STEEL STRUCTURES PAINT. COUN.
J A BRUNO STEEL STRUCTURES PAINT. COUN.
R E WEAVER STEEL STRUCTURES PAINT. COUN.

MILE: 02/77 -FUNDING PACKAGE SUBMITTED
03/77 -AWARD FUNDS FOR PROJECT
09/79 -FINAL REPORT RECEIVED

THE PRIMARY PURPOSE OF THIS STUDY IS TO PROVIDE INFORMATION ON ALTERNATE COATING SYSTEMS DESIGNED TO COMPLY WITH PUBLIC LEGISLATION, POLLUTION RULES, AND OTHER PRESENT AND EXPECTED REQUIREMENTS DURING EACH STAGE OF APPLICATION AND USE. IT IS THEREFORE PROPOSED THAT THE STEEL STRUCTURES PAINTING COUNCIL CONDUCT A RESEARCH AND EVALUATION PROGRAM TO COMPARE THE DURABILITY AND OTHER CHARACTERISTICS OF THESE NEW METHODS AND MATERIALS WITH THOSE OF TYPICAL STANDARD CONVENTIONAL COATING SYSTEMS FOR STEEL. SOME UNIQUE FEATURES OF THIS STUDY INCLUDE: EXTENSIVE CONTROLS, REPEATED PERIODICALLY; OPEN EVALUATIONS TO PROVIDE WIDE CHOICES OF PAINT SYSTEMS AT EACH LEVEL OF PERFORMANCE; CHOICE AND RATING OF CANDIDATE PRODUCTS GUIDED BY A BALANCED COMMITTEE OF SPECIALISTS, REPRESENTING BOTH PRODUCERS AND USERS; EARLY PREPARATION OF A "STATE-OF-THE-ART REPORT"; RESULTS EXPRESSED IN GENERIC TERMS, WHEN POSSIBLE, FOR MAXIMUM APPLICABILITY; OUTSTANDING PROPRIETARY PERFORMERS CAN LATER BE IDENTIFIED, WITH SUPPLIERS' FULL WRITTEN APPROVAL.

Grant will improve lake quality by increasing lake depth, removing emergent vegetation, establishing buffer zones, street sweeping and a public eduction program.

EVALUATION OF SOCIO-ECONOMIC MEASURES

START/ COMPL DATE : 08/77 - 04/78 : FUNDING : EST. - FY 77 / $ 65000
TASK/EPA CODE :K609A-415 / R805036-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W FALCO
INVESTIGATORS : J KUHNER META SYSTEMS INCORPORATED

R P BURDEN META SYSTEMS INCORPORATED
R J DELUCIA META SYSTEMS INCORPORATED
D F LUECKE META SYSTEMS INCORPORATED

MILE: 08/77 -START PROJECT
04/78 -FINAL REPORT SUMMARIZING RESULTS OF STUDY

THE OBJECTIVES OF THIS WORK ARE THE DETERMINATION OF THE FEASIBILITY OF DEVELOPING A METHODOLOGY TO ASSESS THE SOCIO-ECONOMIC IMPACTS OF INSTITUTING VARIOUS WATER POLLUTION CONTROL STRATEGIES, AND THE IDENTIFICATION OF INSTITUTIONAL PROBLEMS ASSOCIATED WITH ZONING POLICIES ESTABLISHED TO CONTROL CONVERSION OF NONURBAN TO URBAN LAND. THE OBJECTIVES OF THIS STUDY WILL BE ACCOMPLISHED BY A LITERATURE SURVEY AND ANALYSIS OF AVAILABLE METHODS. THE STUDY WILL BE ORGANIZED INTO FOUR TASKS THAT SURVEY AVAILABLE TECHNOLOGY, DETERMINE COSTS AND RELATIONSHIPS OF COSTS TO ENVIRONMENTAL SETTING, ENUMERATE AVAILABLE FINANCING METHODS, AND IDENTIFY MONITORING, ENFORCEMENT AND INCENTIVES POSSIBILITIES. THE RESULTS OF THE STUDY AND RECOMMENDATIONS FOR FURTHER RESEARCH IN SOCIO-ECONOMICS RESEARCH WILL BE PUBLISHED AT THE END OF THE PROJECT.

INTERNATIONAL SYMPOSIUM ON SULFUR IN THE ATMOSPHERE, DUBROVNIK, YUGOSLAVIA

START/ COMPL DATE : 03/77 - 03/78 : FUNDING : EST. - FY 77 / $ 43000
TASK/EPA CODE :G6258-EA-19 / R805043-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W E WILSON
INVESTIGATORS : R B HUSAR WASHINGTON UNIVERSITY
J D HUSAR WASHINGTON UNIVERSITY

MILE: 03/78 -PUBLICATION OF PROCEEDINGS

THIS SYMPOSIUM SHOULD BRING TOGETHER AMERICAN, EUROPEAN AND OTHER PARTICIPANTS TO REPORT AND DISCUSS THE CURRENT ISSUES ON THE ATMOSPHERIC SULFUR PROBLEMS. IT IS ESTIMATED THAT THE GLOBAL EMISSION FROM ANTHROPOGENIC SOURCES ARE OF THE SAME ORDER OF MAGNITUDE AS EMISSION FROM NATURAL SOURCES. HOWEVER, MORE THAN 90% OF ANTHROPOGENIC SO2 EMISSIONS ARE IN THE NORTHERN ATMOSPHERE. IT HAS BEEN RECOGNIZED THAT THE ANTHROPOGENIC SULFUR PROBLEM IS A REGIONAL ONE ON THE SPATIAL SCALE OF THOUSANDS OF KILOMETERS. THE HORIZONTAL AND VERTICAL DISPERSION MECHANISMS, REMOVAL RATES BY DRY AND WET DEPOSITION, SO2 OXIDATION RATES AND MECHANISMS, THE PARTICULATE SULFUR SIZE DISTRIBUTION, SPATIO-TEMPORAL DISTRIBUTION AND CHEMISTRY OF AEROSOL SULFUR COMPOUNDS AND ASSOCIATED MEASUREMENT TECHNIQUES WILL BE DISCUSSED. THE SYMPOSIUM IS CO-SPONSORED BY UNITED NATIONS ENVIRONMENT PROGRAMME, ELECTRIC POWER RESEARCH INSTITUTE, U.S. ENVIRONMENTAL PROTECTION AGENCY, U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, AMERICAN METEOROLOGICAL SOCIETY UNDER THE AUSPICES OF YUGOSLAV ACADEMY OF SCIENCES AND ARTS.

EVALUATION OF DREDGING AS A LAKE RESTORATION TECHNIQUE

START/ COMPL DATE : 07/77 - 06/80 : FUNDING : EST. - FY 77 / $ 211913
TASK/EPA CODE :M412A-15 / R805046-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : S A PETERSON
INVESTIGATORS : C D MCNABB MICHIGAN STATE UNIVERSITY
MILE: 06/80 -FINAL REPORT

THE PROJECT WILL ASSESS THE EFFECTS OF LAKE RESTORATION VIA DREDGING AT L AKE LANSING. IT PROPOSES TO DO THIS BY EVALUATING CHANGES IN PRODUCTION OF PLANTS, INVERTEBRATE ANIMALS, AND FISH AS A RESULTS OF DREDGING, BY CORRE LATING CHANGES IN PRODUCTION WITH CHANGES IN PHYSICAL AND CHEMICAL ASPECTS OF THE LAKE, BY DEVELOPING AN ANNUAL NUTRIENT BUDGET TO MAKE MEASUREME NTS AGAINST, AND BY DETERMINING THE ECOLOGICAL IMPACTS OF DREDGED MATERIAL ON THEIR DISPOSAL SITES.

ADAPTATION OF AQUATIC ECOSYSTEM MODEL FOR APPLIED USES

START/ COMPL DATE : 01/77 - 12/78 : FUNDING : EST. - FY 77 / $ 124680
TASK/EPA CODE :K609A-405 / R805047-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T O BARNWELL
INVESTIGATORS : R A PARK RENSSELAER POLYTECHNIC INST.
MILE: 01/77 -START PROJECT
12/77 -INTERIM REPORT
12/78 -FINAL REPORT

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. AN ECOLOGICAL LAKE MODEL WILL BE MODIFIED TO INCORPORATE TRANSPORT CHARACTERISTICS NECESSARY TO DESCRIBE THE MOVEMENT OF MATERIAL IN A LAKE ECOSYSTEM. MODIFICATIONS WILL ALSO BE DEVELOPED TO INCLUDE LUXURY UPTAKE OF NUTRIENTS AND LIGHT ADAPTATION PHENOMENA. DEVELOPMENT WILL PROCEED W ITH INTERFACE REQUIREMENTS INTO THE HYDROLOGIC UNIT MODEL IN MIND -- ALSO, INTERFACE WITH APPROPRIATE NPS MODELS FOR SHORE DEVELOPMENT ANALYSIS. THE LAKE ECOSYSTEM MODEL, CLEANER, WILL BE MODIFIED AS OUTLINED ABOVE. THE PROJECT IS ON SCHEDULE. A DRAFT FINAL REPORT IS EXPECTED 1 JULY 1978.

ENVIRONMENTAL AND TECHNOLOGICAL ANALYSIS OF THE USE OF SURPLUS WOOD AS AN INDUSTRIAL FUEL

START/ COMPL DATE : 07/77 - 05/78 : FUNDING : EST. - FY 77 / $ 57000
TASK/EPA CODE :86248-546 / R805050-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : H M FREEMAN
INVESTIGATORS : E H HALL BATTELLE MEMORIAL INSTITUTE
W T LAWHON BATTELLE MEMORIAL INSTITUTE
C M ALLEN BATTELLE MEMORIAL INSTITUTE

MILE: 07/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT
05/78 -FINAL REPORT

THERE IS A WIDESPREAD INTEREST IN THE USE OF SURPLUS WOOD AS AN INDUSTRIAL FUEL BECAUSE IT DOES NOT CONTAIN SULFUR, IT IS A RENEWABLE RESOURCE, AND THE TECHNOLOGY FOR ITS USE IS AVAILABLE. THERE ARE, HOWEVER, SOME UNRES OLVED QUESTIONS WHICH MUST BE ADDRESSED AT THIS TIME IN ORDER TO BE SURE T HAT NO LONG-RANGE DETRIMENTAL EFFECTS WOULD RESULT FROM A GREATLY EXPANDED WOOD-FUEL INDUSTRY. THE OBJECTIVES OF THIS PROJECT ARE: 1, TO ANA LYZE THE POTENTIAL AVAILABILITY OF SURPLUS WOOD BY REGION AND COMPARE THAT AVAILABILITY WITH POTENTIAL REGIONAL DEMAND FOR WOOD FUEL. 2. TO ASSESS THE CURRENT STATE OF THE TECHNOLOGY FOR THE PROCUREMENT AND UTILIZATION OF SURPLUS WOOD FUEL, TO PROJECT POTENTIAL CONSUMPTION OF WOOD FUEL ON THE BASIS OF EXISTING TECHNOLOGY, AND TO IDENTIFY ANY TEC HNOLOGY-RELATED RESEARCH AND DEVELOPMENT NEEDS. 3. TO ASSESS THE ENVIRONME NTAL/ECOLOGICAL IMPACTS WITH RESPECT TO SO2 EMISSIONS, AND WITH RESPECT TO POTENTIAL LONG-RANGE IMPACTS ON OUR FORESTS.

TECHNICAL AWARENESS IN THE NONFERROUS METALS INDUSTRY - PILOT STUDY
-TANMIPS

START/ COMPL DATE : 02/77 - 11/77 : FUNDING : EST. - FY 77 / $ 42000
TASK/EPA CODE :B604C-560 / R805095-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : A B CRAIG
INVESTIGATORS : E S BARTLETT BATTELLE MEMORIAL INSTITUTE
R H CHERRY BATTELLE MEMORIAL INSTITUTE
MILE: 02/77 -FUNDING PACKAGE SUBMITTED
03/77 -AWARD FUNDS FOR PROJECT
11/77 -FINAL REPORT RECEIVED

THE OBJECTIVE IS TO PILOT A SIMPLE, INEXPENSIVE SYSTEM TO PROVIDE, MAINTAIN, AND COMMUNICATE TO IERL/CINCINNATI AN UP-TO-DATE AWARENESS AND ASSESSMENT OF TECHNOLOGICAL DEVELOPMENTS IN THE NONFERROUS METALS IN DUSTRIES THAT ARE BELIEVED TO HAVE SIGNIFICANT ENVIRONMENTAL IMPACT. APPRO ACH - INFORMATION WILL BE GATHERED BY REVIEW OF THE PERIODICAL LITERATURE, SPECIAL REPORTS, AND LIMITED TRAVEL VISITS, AND INTERVIEWS. OUTPUT - THE PRODUCT OF THIS PROPOSED PROGRAM WILL BE SIX BIMONTHLY AWARENESS BULL ETINS WHICH WILL BE GIVEN LIMITED DISTRIBUTION WITHIN IERL-CINCINNATI. THE OUTPUT WILL BE ARRANGED IN A PHYSICAL MANNER AND FORMAT SO AS TO PERMIT RAPID METHODICAL STORAGE AND RETRIEVAL OF THE INFORMATION.

METHODOLOGY FOR ABATEMENT OF COMBINED SEWER OVERFLOWS FOR AN URBAN LAKE

START/ COMPL DATE : 05/77 - 04/78 : FUNDING : EST. - FY 77 / $ 18860
TASK/EPA CODE :C611A-7097 / R805096 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R FIELD
INVESTIGATORS : P E MOFFA ONONDAGA CO. DEPT. OF DRAINAG
J M KARANIK ONONDAGA CO. DEPT. OF DRAINAG
J C BYRON ONONDAGA CO. DEPT. OF DRAINAG

MILE: 05/77 -START PROJECT
04/78 -FINAL REPORT PUBLISHED

THE OBJECTIVE OF THIS STUDY IS TO DEVELOP A METHODOLOGY FOR DETERMINING THE NECESSARY STEPS A COMMUNITY MIGHT TAKE, AND FACILITIES REQUIRED, TO ABATE COMBINED SEWER OVERFLOWS ADVERSELY AFFECTING AN URBAN LAKE. DATA REQUIREMENTS FOR THIS PROJECT WILL BE TAKEN ENTIRELY FROM OTHER PROJECTS EITHER COMPLETED OR IN PROGRESS. EXISTING INFORMATION WILL BE REVIEWED FROM THOSE AREAS THAT HAVE DEFINED THE CHARACTERISTICS OF THEIR COMBINED SEWER OVERFLOWS AS WELL AS THE IMPACT OF THESE DISCHARGES ON RECEIVING WATERS. A GROUP OF "TEST" DATA WILL BE SELECTED FROM INFORMATION REVIEWED AND USED TO ILLUSTRATE THE STEP BY STEP PROCEDURE IN DETERMINING THE RELATIVE SIGNIFICANCE OF COMBINED SEWER OVERFLOWS WITH RE SPECT TO ENVIRONMENTAL IMPACT. THE METHODOLOGY WILL ESSENTIALLY ADDRESS MU NICIPAL/INDUSTRIAL DISCHARGES, NON-POINT SOURCE RUNOFF, AND COMBINED SEWER OVERFLOW DISCHARGES, AND SHOW THEIR RELATIONSHIP WITH RESPECT TO ENVIRONMENTAL IMPACT, FROM WHICH OVERFLOW CRITERIA CAN BE DERIVED.

IDENTIFY AND QUANTIFY FACTORS AFFECTING POTW SYSTEM, SUBSYSTEM AND PROCESS RELIABILITY

START/ COMPL DATE : 02/77 - 04/79 : FUNDING : EST. - FY 77 / $ 74990
TASK/EPA CODE :C6118-7121 / R805097-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J H BENDER
INVESTIGATORS : E D SCHROEDER UNIV. OF CALIFORNIA
G TCHOBANOGLOUS UNIV. OF CALIFORNIA

MILE: 02/77 -FUND
02/77 -PROJECT START
04/78 -INTERIM REPORT
04/79 -PROJECT COMPLETE
10/79 -REPORT AVAILABLE DATE

THE OBJECTIVES OF THIS PROJECT ARE TO STUDY BIOLOGICAL TREATMENT RELIABILITY IN THREE STEPS. THE FIRST STEP CONSISTS OF COLLECTING AND STATISTICALLY ANALYZING OPERATIONAL AND PERFORMANCE DATA FROM APPROXIMATELY 200 BIOLOGICAL WASTEWATER TREATMENT PLANTS OF VARIOUS TYPES HAVING FLOWS RANGING FROM 0.1 TO 100 MGD. VARIOUS EVALUATION PARAMETERS SHALL BE USED SO AS TO ACCURATELY RELATE VARIABILITY OF PLANT PERFORMANCE TO CAUSATIVE DESIGN AND OPERATIONAL FACTORS. THE SECOND STEP CONSISTS OF PERFORMING A THEORETICAL ANALYSIS OF THE INHERENT RELATIVE STABILITY/RELIABILITY OF THE BIOMASS TO WITHSTAND EXTREME LOADING RATE CHANGES, TEMPERATURE EFFECTS, TOXIC OR INHIBITORY SUBSTANCES AND OTHER COMMONLY RECOGNIZED STRESS FACTORS THAT AFFECT PHYSIOLOGICAL RESPONSES AND SYSTEM PERFORMANCE. THE THIRD STEP CONSISTS OF SELECTING FULL-SCALE PLANTS, PILOT PLANTS OR LABORATORY STUDIES APPROPRIATE FOR EVALUATING AND VERIFYING THE STABILITY/RELIABILITY RELATIONSHIP DEVELOPED.

QUANTITY QUALITY SIMULATION (QQS) - A DETAILED SIMULATION FOR URBAN RUNOFF CONTROL

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 16500
TASK/EPA CODE :C611A-7100 / R805100-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R FIELD
INVESTIGATORS : W F GEIGER DORSCH CONSULT LIMITED
MILE: 09/77 -GRANT AWARD
10/78 -FINAL REPORT PUBLISHED

THE METHODOLOGY AND APPLICATION OF THE QUANTITY-QUALITY-SIMULATION MODEL (QQS) WILL BE REPORTED. THIS METHOD IS A MATHEMATICAL SIMULATION MODEL TO SHOW AND TO PREDICT THE EFFECT OF THE INTERMITTENT LOADINGS OF COMBINED AND STORM SEWER SYSTEMS ON RECEIVING WATERS. ON BEHALF OF THE RANDOM NATURE OF THE PROCESS GOVERNING URBAN RUNOFF POLLUTION, THE MODEL ALLOWS FOR CONTINUOUS SIMULATION AND SUBSEQUENT STATISTICAL ANALYSIS OF SEWER OVERFLOW PROPERTIES SUCH AS DURATION OF OVERFLOWS, TOTAL OVERFLOWING VOLUME, PEAK AND AVERAGE OVERFLOWING RATES AS WELL AS THEIR POLLUTANT LOADS OR CONCENTRATIONS. BOD, TOTAL SUSPENDED SOLIDS, SETTABLE SOLIDS AND FECAL COLIFORM WERE SIMULATED TO DATE. PRESENTLY COD, HEAVY METALS, PHOSPHORUS, CHLORIDE AND NUTRIENTS ARE INVESTIGATED. HOWEVER, THE MODEL CAN HANDLE ANY CONSERVATION POLLUTANT. THE COMPLETE PROGRAM PACKAGE CONSISTS OF 30,000 STATEMENTS WRITTEN IN STANDARD FO RTRAN IV ALLOWING COMPUTATIONS ON BATCH PROCESSING SYSTEMS WITH FORTRAN IV COMPILERS. THE METHOD IS FULLY DEVELOPED, TESTED ON EIGHT DIFFERENT CATCHMENTS AND APPLIED TO TWO LARGE SCALE PROJECTS SHOWING THE IMPACT ON RECEIVING WATERS OF THE COMBINED SEWER SYSTEMS OF THE CITY OF ROCHESTER, N.Y., U.S.A., AND THE CITY OF AUGSBURG, GERMANY. APPLICATIONS TO THE SEWER SYSTEMS OF THE CITIES OF VANCOUVER, B.C., CANADA, AND MUNICH, GERMANY, ARE UNDER WAY.

COREHOLE SPACING MODELS DEFINING POTENTIAL TOXIC ROCK BODIES IN COAL SURFACE MINING

START/ COMPL DATE : 02/77 - 02/79 : FUNDING : EST. - FY 77 / $ 109000
TASK/EPA CODE :B6238-503 / R805101-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : T G NEWPORT
INVESTIGATORS : J C HORNE UNIV. OF SOUTH CAROLINA
J C FERM UNIV. OF SOUTH CAROLINA

MILE: 01/77 -FUNDING PACKAGE SUBMITTED
02/77 -AWARD FUNDS FOR PROJECT
10/78 -FINAL DRAFT REPORT
02/79 -FINAL REPORT
03/79 -FINAL REPORT RECEIVED

WITH THE RECENT INCREASE IN STRIP MINING AND THE IMPENDING PASSAGE OF FEDERAL SURFACE MINING LEGISLATION, IT IS IMPERATIVE THAT A COREHOLE SPACING PROGRAM BE DEVELOPED THAT DEFINES THE POTENTIALLY TOXIC SP OIL MATERIALS IN ADVANCE OF SURFACE MINING. ONE OF THE PRODUCTS OF CURRENT RESEARCH IS A COLOR PHOTOGRAPHIC BOOK ILLUSTRATING 28 OF THE STANDARD ROCK TYPES FOUND IN THE COAL MEASURES OF EASTERN KENTUCKY AND SOUTHERN WEST VIRGINIA. BY ASSOCIATING THESE ROCK TYPES WITH THEIR GEOCHEMICAL AND WEATHERING CHARACTERISTICS, THE TOXICITY POTENTIAL OF EACH LITHOLOGY WAS APPRAISED, AND POTENTIAL PROBLEM ROCK TYPES WERE ISOLATED. USING THESE RESULTS AS A BASE, IT IS PROPOSED TO DETERMINE THE SHAPE, THICKNESS, AND LATERAL EXTENT OF THE POTENTIALLY TOXIC ROCK TYPES WITH THE VIEW THAT, IF DIMENSIONS OF SOME OF THESE ROCK BODIES ARE KNOWN, CORE HOLE SPACING REQUIRED TO DELINEATE THE DIMENSIONS OF OTHER SIMILAR BODIES CAN BE DETERMINED. KNOWLEDGE OF THIS TYPE WILL AID IN THE PLANNING FOR HYDRAULIC MANIPULATIONS AND SEGREGATION AND BURIAL OF POTENTIALLY TOXIC MATERIALS DURING OVERBURDEN HANDLING IN SURFACE MINES. THE DATA BASE FOR THE PROPOSED STUDY INCLUDE DETAILED (20' EQUALS 1" VERTICAL, .1 MILE EQUALS 1" HORIZONTAL) GEOLOGIC CROSS SECTIONS OF MORE THAN 400 MILES OF PRE-SPLIT HIGHWAY EXPOSURES AND OVER 5000 COREHOLE RECORDS IN EASTERN KENTUCKY AND SOUTHERN WEST VIRGINIA. BY COMPARING THE ROCKS FOUND TO BE POTENTIALLY TOXIC IN THE CORE BOOK EXPERIMENT WITH THOSE FOUND IN THE HIGHWAY CUTS AND ADJOINING BORE HOLES IN THE DIMENSIONS OF THE POTENTIALLY PROBLEM ROCKS CAN BE DELINEATED. THE TOXICITY OF THESE ROCK TYPES WILL BE ANALYZED TO DETERMINE THE TYPE AND AMOUNT OF PYRITE AND THE ACIDITY, ALKALINITY, SULFATE CALCIUM, MAGNESIUM ALUMINUM AND IRON CONTENTS OF EFFLUENTS LEACHED FROM THEM. FROM THESE DATA, MODELS WILL BE DEVELOPED TO EVALUATE THE IDEAL CORE HOLE SPACING IN ADVANCE OF MINING THAT IS NECESSARY TO DELINEATE POTENTIALLY TOXIC LITHOLOGIES.

PARASITIC CONTAMINATION OF WASTE SLUDGES AND TREATMENT ALTERNATIVES

START/ COMPL DATE : 04/77 - 07/78 : FUNDING : EST. - FY 77 / $ 44173
TASK/EPA CODE :D607A-011 / R805107 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H R PAHREN
INVESTIGATORS : R S REIMERS TULANE UNIVERSITY OF LOUISIAN
N D LITTLE TULANE UNIVERSITY OF LOUISIAN
A J ENGLANDE TULANE UNIVERSITY OF LOUISIAN
J W MASON TULANE UNIVERSITY OF LOUISIAN
P C BEAVER TULANE UNIVERSITY OF LOUISIAN

MILE: 07/78 -COMPLETE STUDIES

THIS INVESTIGATION IS TO SURVEY MUNICIPAL WASTE SLUDGES FROM THE S OUTHEASTERN STATES FOR POSSIBLE CONTAMINATION. THE CHOICE OF THE SOUTHEAST REGION IS PREDICATED ON THE EXPECTED PREVALENCE OF PARASITES. THE AIM OF THE PROPOSED SURVEY IS THREE-FOLD: (1) TO ASSESS PROBLEMS WHICH COULD R ESULT FROM PARASITIC CONTAMINATION IN THE DISPOSITION OF MUNICIPAL WASTE S LUDGE (PRIMARILY WITH SECONDARY OR BIOLOGICAL SLUDGES), (2) TO INVESTIGATE THE EFFECTIVENESS OF LIME STABILIZATION IN THE INHIBITION OF P ARASITES, AND (3) TO STUDY POSSIBLE WASTE WATER AND SLUDGE TREATMENT TECHN IQUES ON DESTRUCTION AND INHIBITION OF PARASITES IN MUNICIPAL SLUDGES. THE STUDY WILL AID IN EVALUATING PARASITIC CONTAMINATION OF MUNICIPAL S LUDGES IN THE SOUTHEASTERN UNITED STATES. THE SECOND PORTION OF THIS STUDY WILL INVESTIGATE VARIOUS TECHNIQUES AND PROCESSES ON THE REDUCTION OF PARASITES IN SLUDGES. RESULTS OF THIS INVESTIGATION SHOULD BE USEFUL IN DELINEATING FURTHER AREAS OF NEEDED RESEARCH.

STORM AND COMBINED SEWER STORAGE - TREATMENT THEORY COMPARED TO COMPUTER SIMULATION

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 6000
TASK/EPA CODE :C611A-7101 / R805109 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A N TAFURI
INVESTIGATORS : C D HOWARD CHARLES HOWARD & ASSOC. LTD.
W C HUBER STATE UNIVERSITY OF FLA. SYS.

MILE: 09/77 -START PROJECT
09/77 -FINAL REPORT PUBLISHED

THE OBJECTIVES ARE TO DEMONSTRATE AND FURTHER DEVELOP A MATHEMATICAL D ESK-TOP METHOD FOR DESCRIBING HOW RUNOFF MAY BE CONTROLLED AND POLLUTION M INIMIZED THROUGH ECONOMICALLY OPTIMUM COMBINATIONS OF STORAGE CAPACITY AND TREATMENT FACILITIES. THE WORK WILL PROVIDE A DIRECT COMPARISON WITH THE COMPUTER SIMULATION ASPECTS OF "STORM WATER MANAGEMENT MODEL: LEVEL I - PRELIMINARY SCREENING PROCEDURES, EPA-600/2-76-275, OCTOBER, 1976", AND THE STATISTICAL ASPECTS OF "AREAWIDE ASSESSMENT PROCEDURES MANU AL, EPA-600/9-76-014, JULY, 1976". THE WORK WILL INCLUDE STEPS TO MAKE THE MATHEMATICAL METHOD MORE EASILY USABLE IN PRACTICE, IDENTI FICATION OF RAINFALL PARAMETERS FOR SEVERAL MAJOR CITIES AND COMPARISON OF MATHEMATICAL RESULTS WITH EXISTING COMPUTER SIMULATIONS. THE BASIS FOR THE APPROACH IS "THEORY OF STORAGE-TREATMENT PLANT OVERFLOWS, BY C.D.D. HOWARD, JN HYD DIV., ASCE, AUG., 1976."

WATER SOURCE AND CHARACTERISTICS AND MALIGNANCY RATES OF SELECTED SITES
IN SELECTED PARISHES IN LOUISIANA

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 0
TASK/EPA CODE :D6148-116 / R805110-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K CANTOR
INVESTIGATORS : M S GOTTLIEB TULANE UNIVERSITY OF LOUISIAN
F J MATHER TULANE UNIVERSITY OF LOUISIAN

MILE: 05/78 -REPORT

TO EXAMINE THE POSSIBLE RELATIONSHIP OF THE SOURCE OF DRINKING WATER IN SELECTED LOUISIANA PARISHES TO THE OCCURRENCE OF CANCER OF SITES WHICH APPEAR TO BE SIGNIFICANTLY ELEVATED AND PARTICULARLY FOR CANCER OF THE PAN CREAS, STOMACH, BLADDER, LUNG AND COLON CANCER, EXCLUDING RECTUM, PARISHES HAVE BEEN SELECTED BY SOURCE OF DRINKING WATER AND OTHER ENVIRONMENTAL CH ARACTERISTICS. TO DATE RELATED STUDIES HAVE PRIMARILY CONCERNED THEMSELVES WITH MORTALITY DATA. MORTALITY DATA DOES NOT DISTINGUISH BE TWEEN INCIDENCE AND PREVALENCE. THIS IS PARTICULARLY CRITICAL WHEN LOOKING FOR ETIOLOGY OF CANCERS WITH LONG SURVIVAL FROM TIME OF DIAGNOSIS, IE. BLADDER AND LARGE INTESTINE (COLON). IN THE FIRST PHASE MORTALITY RATES FOR THE SELECTED MALIGNANCIES WILL BE COMPARED FOR THREE TIME PERIODS FOR THE SELECTED PARISHES. THIS PROJECT WILL SYSTEMATICALLY USE MORTALITY DATA TO MEASURE INCIDENCE WHERE APPLICABLE (CANCER OF THE LUNG, PANCREAS AND STOMACH). ALSO, BY COMPARING SELECTED HOSPITAL DATA FOR CANCERS WITH SHORT SURVIVALS DETERMINE THE REPRESENTATIVENESS OF THE H OSPITAL DATA OF THE TOTAL MORTALITY AND DETERMINE THE USEFULNESS OF INCIDE NCE DATA (DATE OF DIAGNOSIS) FROM THESE HOSPITALS FOR CANCERS OF THE LARGE INTESTINE AND BLADDER. THE NULL HYPOTHESIS IS THAT DRINKING WATER SOURCE HAS NOTHING TO DO WITH CANCER RATES. ORLEANS PARISH IS ONE OF THE PARIS HES THAT WILL BE CONSIDERED. OTHER VARIABLES THAT WILL THEN BE EXAMINED TO LOOK AT DIFFERNCES IN RATES NOT ATTRIBUTABLE TO DRINKING WATER ARE THE PRESENCE OF PARTICULAR INDUSTRIES, AND THE PROXIMITY OF THE RESIDENCE OF THE CASES TO THE INDUSTRY, AS WELL AS PARTICULAR OCCUPATIONS. MORTALITY OR INCIDENCE RATES FOR THE SPECIFIC SUBGROUPS WILL BE CALCULATED AND COMPARED TO EXPECTED NUMBERS (EXPECTED DEATHS BASED ON AGE-TIME SPECIFIC DEATH RATES FOR LOUISIANA RESIDENTS, AND INCIDENCE RATES BASED O N THE NATIONAL CANCER INCIDENCE SURVEYS MOST APPROPRIATE TO THE PARTICULAR YEARS BEING CONSIDERED). STANDARDIZED RATIOS WILL BE CALCULATED IN ORDER TO COMPARE GROUPS AND SUB-GROUPS.

The fundamental objective of the burn tests is to develop data that may be translated into design criteria for the fabrication of equipment to be used for the incineration of kepone and kepone contaminated waste. The activities required to fulfill the objective are indicated below:

- .determine the time/temperature relationship of the incineration process in order to destroy kepone and its hazardous by-products.
- .develop the thermal requirements for complete decontamination of waste products containing kepone
- .to substantiate the findings by D.S. Duvall and W.A. Rubey in their technical report entitled "Laboratory Evaluation of High Temperature Destruction of Kepone and Related Pesticides." This work was done under flameless conditions.

Technical grade kepone in concentrated form will be transported to Toledo, Ohio, to be burned in the research facilities of Surface Division, Midland-Ross Corp. This equipment includes a high temperature afterburner capable of reaching temperatures in access of 2600 degrees F and a rotary kiln continuous feed or batch feed unit. Analysis will be made of off-gases, scrubber liquor, air samples taken within the test facility and outside of the building, wash water and any other materials subject to contamination. The initial runs are designed so that if no conbustion takes place, the emission of stack temperature will not exceed 1×10^{-6} gms/m^3 which will result in an ambient air concentration of less than 2.5×10^{-8} gms/m^3.

EFFECTS OF OZONE ON DNA REPAIR SYNTHESIS IN RABBIT LYMPHOCYTES

START/ COMPL DATE : 10/77 - 08/79 : FUNDING : EST. - FY 77 / $ 47000
TASK/EPA CODE :H601C-7298 / R805114-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : P HU
INVESTIGATORS : S G CHANEY UNIV. OF NORTH CAROLINA
MILE: 03/78 -OPTIMIZE ALL THE TECHNIQUES INVOLVED IN THE MEASUREMENTS OF DNA
11/78 -COMPLETION OF THE DOSE-RESPONSE CURVE
03/79 -COMPLETION OF THE TIME COURSE STUDY. INITIATE STUDIES ON THE M
08/79 -COMPLETION OF THE PROPOSED RESEARCH

THE OBJECTIVES OF THIS WORK ARE THREE (3) FOLD: 1) TO DETERMINE A DOSE RESPONSE CURVE FOR THE AMOUNT OF DNA REPAIR SYNTHESIS INDUCED BY A VARIOUS DOSES OF OZONE, 2) TO DETERMINE WHETHER THAT REPAIR IS "SHORT PATCH" OR "L ONG PATCH" REPAIR, AND 3) TO DETERMINE WHETHER THE EFFECTS OF OZONE ON DNA REPAIR IN VIVO CAN BE MIMICKED BY OZONIDES OR PEROXIDES IN VITRO. T HESE EXPERIMENTS WILL BE CARRIED OUT BY EXPOSING RABBITS TO VARYING LEVELS OF OZONE, RAPIDLY ISOLATING A MIXED LEUKOCYTE POPULATION BY DIFFERENTIAL CENTRIFUGATION, AND MEASURING DNA REPAIR SYNTHESIS IN THE CULTURED CELLS.

PREDICTING ACID POLLUTION POTENTIAL FROM COAL STRIP MINES

START/ COMPL DATE : 04/77 - 02/79 : FUNDING : EST. - FY 77 / $ 86000
TASK/EPA CODE :B623B-606 / R805116-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : T G NEWPORT
INVESTIGATORS : F T CARUCCIO UNIV. OF SOUTH CAROLINA
MILE: 04/77 -FUNDING PACKAGE SUBMITTED
05/77 -AWARD FUNDS FOR PROJECT
02/79 -FINAL REPORT

IF AN ACIDITY INDEX CAN BE DEVELOPED WITH A REASONABLE DEGREE OF PRECISIO N, THE INFORMATION WILL BE VERY VALUABLE TO MINING OPERATORS AND REGULATOR Y OFFICIALS IN THAT THEY WILL HAVE A TOTAL WHICH CAN BE USED TO ACCURATELY PREDICT THE AMOUNT OF ACID POLLUTION TO BE EXPECTED FROM A SITE PROPOSED FOR SURFACE MINING. THIS WILL BE USEFUL IN DETERMINING WHETHER A MINE PERMIT SHOULD BE ISSUED AND IN REVIEWING THE PROPOSED MINING OPERATION TO SEE IF PROPER RECLAMATION PRACTICES ARE EMPLOYED. SIX PROPOSED STRIP MINES UNDERLAIN BY DIFFERENT GEOLOGIES IN THE BITUMINOUS COAL FIELD OF WESTERN PENNSYLVANIA WILL BE CORE DRILLED TO PROVIDE FRESH ROCK SAMPLES, DETAILED GEOLOGY AND GROUND WATER SAMPLING POINTS. THE ROCKS WILL BE RELATED TO THEIR ACID-ALKALINITY PRODUCTION POTENTIALS THROUGH LABORATORY SIMULATED WEATHERING CONDITIONS AND PETROGRAPHIC ANALYSES. THE LEACHATES WILL BE ANALYZED FOR SPECIFIC IONIC SPECIES INDICATIVE OF PARTICULAR CHEMICAL REACTIONS. A REGIONAL AQUEOUS GEOCHEMICAL SURVEY WILL BE COMPL ETED TO EVALUATE THE NATURAL SYSTEM'S NEUTRALIZING AND BUFFERING CAPACITIE S. DURING THE BACKFILLING PHASE OF MINING OPERATION, WATER COLLECTORS WILL BE BURIED IN THE BACKFILL AND MINE DRAINAGE CHARACTERISTICS MONITORED. THE CHEMICAL CHARACTERISTICS OF THE MINE DRAINAGE WILL THEN BE RELATED TO THOSE OF THE LEACHATE TO ASCERTAIN THE CHEMICAL REACTIONS TAKING PLA CE. FURTHER IDENTIFICATION WITH THE PETROGRAPHIC ANALYSES AND PYRITE TYPES OF THE ROCKS OCCUPYING THE MINE SITE AND NOTED TO PRODUCE PARTICULAR ACID-ALKALINE LOADS, PERMITS THE EXTENSIONS OF THIS POLLUTION PREDICTIVE TECHNIQUE TO OTHER AREAS.

CHARACTERIZATION OF HIGH-TEMPERATURE DECOMPOSITION BEHAVIOR OF PESTICIDES AND OTHER ORGANIC MATERIALS

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :C618A-7042 / R805117-01 (GRANT) PRIOR FY / 1

INVESTIGATORS : D S DUVALL UNIV. OF DAYTON
W A RUBEY UNIV. OF DAYTON
N L HECHT UNIV. OF DAYTON
L I BOEHMAN UNIV. OF DAYTON
B L FOX UNIV. OF DAYTON

MILE: 12/80 -PUBLISH FINAL REPORT

THE PRIME OBJECTIVE OF THE PROPOSED RESEARCH EFFORT IS TO DETERMINE THE THERMAL DESTRUCTION CHARACTERISTICS OF A WIDE ASSORTMENT OF P ESTICIDES AND OTHER ORGANIC HAZARDOUS WASTE MATERIALS. THIS OBJECTIVE WILL BE ACCOMPLISHED USING A SPECIALLY DESIGNED LABORATORY TEST SYSTEM CAPABLE OF DETERMINING DESTRUCTION-TEMPERATURE/RESIDENCE TIME DATA FOR A MULTITUDE OF ORGANIC SAMPLES, WHILE SIMULTANEOUSLY ANALYZING THE COMPLETE SPECTRUM OF EVOLVED DECOMPOSITION PRODUCTS. THIS SYSTEM WILL BE CAPABLE OF "QUICK RESPONSE" GENERATION OF DATA; WILL OPERATE IN EITHER THE FLAME OR NONFLAME THERMAL DESTRUCTION MODE; AND WILL INCORPORATE A DEDICATED GC-MS FOR ANALYSIS OF EVOLVED PRODUCTS.

CONTAMINANT FLUX FROM MARINE SEDIMENTS AND DREDGE SPOIL DEPOSIT

START/ COMPL DATE : 05/77 - 04/80 : FUNDING : EST. - FY 77 / $ 60718
TASK/EPA CODE :P608C-13 / R805129-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R PAYNE
INVESTIGATORS : M L BENDER UNIV. OF RHODE ISLAND
MILE: 04/80 -FINAL REPORT ENTITLED, "CONTAMINANT FLUX FROM MARINE SEDIMENTS
THE OBJECTIVES OF THE PROPOSED WORK ARE: 1) TO GATHER INFORMATION NEEDED
FOR DEVELOPING GUIDELINES FOR DREDGE SPOIL AND SEWAGE SLUDGE DISPOSAL W
HICH WILL MINIMIZE THE ENVIRONMENTAL IMPACT OF THESE WASTES WITH REGARD TO
HEAVY METAL AND ORGANIC CHEMICAL POLLUTANTS, AND 2) TO DETERMINE
CIRCUMSTANCES UNDER WHICH THE POLLUTANT OF SEDIMENTS INHIBITS REGEN
ERATION OF NUTRIENTS. TO THESE ENDS, WE PROPOSE THREE PROJECTS: 1) A STUDY
OF BENTHIC FLUXES AND PORE WATER CHEMISTRY ON AND AROUND A DREDGE
SPOIL TO ASSESS THE IMPACT OF POLLUTANTS ON PORE WATER CHEMISTRY, METAL
RELEASE BY SEDIMENTS, AND NUTRIENT REGENERATION. 2) FURTHER STUDIES OF BEN
THIC FLUXES AND PORE WATER CHEMISTRY IN NARRAGANSETT BAY TO UNDERSTAND HOW
SEDIMENT POLLUTANT AND CHEMICAL PROPERTIES AFFECT TRACT METAL RELEASE. 3)
COMPARISON OF METAL, HYDROCARBON AND PCB CONTENTS OF DREDGE SPOILS AND
SURROUNDING SEDIMENTS TO ASSESS THE FEASIBILITY FOR USING METALS AS
TRACERS FOR HARD-TO-MEASURE ORGANIC POLLUTANTS.

ROTATING DISC BIOLOGICAL TREATMENT OF AMD

START/ COMPL DATE : 04/77 - 04/78 : FUNDING : EST. - FY 77 / $ 63000
TASK/EPA CODE : 86238-514 / R805132-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : R G WILMOTH
INVESTIGATORS : R F UNZ PENN. STATE UNIVERSITY
H OLEM PENN. STATE UNIVERSITY

MILE: 03/77 -FUNDING PACKAGE SUBMITTED
04/77 -AWARD FUNDS FOR PROJECT
04/78 -FINAL REPORT RECEIVED

THE PROJECT IS CONCERNED WITH EVALUATING THE FERROUS (FEII) IRON OXIDIZING CAPACITY OF THE ROTATING BIOLOGICAL CONTACTOR IN THE TREATMENT OF ACID MINE DRAINAGE. THE PROCESS IS DEPENDENT UPON THE LITHOTROPHIC CAPACITY OF IRON-OXIDIZING BACTERIA WHICH COLONIZE THE AVAILABLE SURFACE AREA OF ROTATING DISCS IMMERSED IN ACID MINE WATER FLOWING THROUGH THE RBC UNIT. THE OXIDATION OF THE FERROUS IRON TO THE FERRIC STATE REDUCES THE POLLUTION POTENTIAL OF THE DRAINAGE. THE SPECIFIC OBJECTIVES OF THE PROJECT ARE TO DETERMINE THE TREATMENT OF MINE DRAINAGES OF DIFFERING CHEMICAL NATURE AND THE REQUIREMENTS FOR TREATMENT OF CERTAIN SPECIFIC DRAINAGES BY THE UNIT TO ACCOMPLISH DESIRED EFFLUENT QUALITY. A FULL SIZE RBC TREATMENT UNIT, WITH 2 METER DIAMETER DISCS, WILL BE SPECIALLY MODIFIED FOR DEMONSTRATION PURPOSES AND OPERATED AT THREE FERROUS IRON-CONTAINING ACID MINE DRAINAGE LOCATIONS. THESE LOCATIONS ARE IN PENNSYLVANIA AND WEST VIRGINIA AND INCLUDE ONE ACTIVE AND TWO ABANDONED COAL MINES. PERTINENT WATER QUALITY PARAMETERS WILL BE ANALYZED TO DETERMINE THE EFFECTIVENESS OF THE UNIT. PARTICULAR ATTENTION WILL BE PAID TO THE POPULATION DYNAMICS OF THE IRON OXIDIZING ORGANISMS AT VARIOUS STAGES OF TREATMENT. ANALYTICAL DATA WILL BE UTILIZED TO AID IN THE DESIGN OF OTHERS UNITS AND THE ASSESSMENT OF CAPITAL AND OPERATING COSTS. ECONOMICS OF THE UNIT WILL BE COMPARED TO THOSE OF OTHER IRON OXIDIZING PROCESSES IN USE OR PLANNED.

A SHORT COURSE ON THE APPLICATION OF COMPUTER PROGRAMS IN PRELIMINARY DESIGN OF WASTEWATER TREATMENT FACILITIES

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 30678
TASK/EPA CODE :C619A-7110 / R805134-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R G EILERS
INVESTIGATORS : J W MALE ILLINOIS INST. OF TECHNOLOGY
S GRAEF ILLINOIS INST. OF TECHNOLOGY

MILE: 08/77 -WORKSHOP WAS HELD AND A USER'S MANUAL WAS COMPLETED

THE OBJECTIVE OF THE SHORT COURSE WILL BE TO FAMILIARIZE THE PARTICIPANTS WITH THE CONCEPTS OF PRELIMINARY TREATMENT PLANT DESIGN BY DIGITAL COMPUTER AND PROVIDE HANDS ON EXPERIENCE IN APPLYING EXISTING COMPUTER PROGRAMS FOR RESOLVING WASTEWATER FACILITY PLANNING, DESIGN AND SIMULATION PROBLEMS. THE PRINCIPAL COMPUTATIONAL BASIS OF THE WORKSHOP WILL BE THE CURRENT USEPA EXECUTIVE PROGRAMS FOR THE PRELIMINARY DESIGN OF WASTEWATER TREATMENT FACILITIES DEVELOPED BY EILERS AND SMITH. P ARTICIPANTS ARE ANTICIPATED FROM CONSULTING FIRMS, REGULATORY AGENCIES AND MUNICIPAL OPERATING AGENCIES HAVING SPECIAL INTEREST IN QUANTITATIVE COST/PERFORMANCE COMPARISONS AMONG MULTIPLE TREATMENT FACILITY DESIGNS. A FIVE-DAY WORKSHOP IS SCHEDULED AT THE ILLINOIS INSTITUTE OF TECHNOLOGY F OR MARCH 1977. GUEST SPEAKERS, FROM CONSULTING FIRMS, REGULATORY AGENCIES, ACADEMIA AND OPERATING AGENCIES, EXPERIENCED IN THE APPLICATION OF THE EILERS-SMITH PROGRAM TO ENGINEERING PROBLEMS, WILL PRESENT SEMINAR TYPE LECTURES. EACH LECTURER WILL PRESENT AN EXAMPLE OF HOW HE HAS USED THE USEPA PROGRAMS TO SOLVE AN ENGINEERING PROBLEM AND THEN OUTLINE AN ABB REVIATED ANALOGOUS PROBLEM FOR THE PARTICIPANTS TO SOLVE. THE LECTURER AND THE ENTIRE STAFF WILL ASSIST THE PARTICIPANTS WITH EACH PROBLEM AND THEN CRITIQUE THE SOLUTION. A DETAILED USER'S GUIDE WHICH IDEN TIFIES AND SIMPLIFIES THE INPUT, OUTPUT AND COST/PERFORMANCE RELATIONSHIPS IN EACH EXEC PROGRAM PROCESS SUBROUTINE IS BEING PREPARED. THIS WILL ENA BLE THE PARTICIPANTS TO UNDERSTAND AND JUSTIFY THE ANSWERS PRODUCED BY THE EXEC PROGRAMS. A SET OF NOTES ACCOMPANIED BY THE WORKED OUT EXAMPLES BY T HE LECTURERS WILL BE DISTRIBUTED WITH THE USER'S GUIDE TO EACH PARTICIPANT PRIOR TO THE WORKSHOP. FURTHERMORE, ONE OF THE LECTURES PRESENTED WILL DISCUSS THE STEPS FOR ADDING THE USEPA PROGRAMS TO THE PARTICIPANTS' HOME COMPUTER FACILITY (IN-HOUSE OR TIME-SHARED TERMINAL).

INFLUENCE OF PARTICULATE PHYSICO-CHEMICAL CHARACTERISTICS ON PULMONARY CELL SYSTEMS

START/ COMPL DATE : 10/76 - 10/79 : FUNDING : EST. - FY 77 / $ 165000

03/78 -ANNUAL REPORT
08/78 -AEROSOL METHODOLOGY ESTABLISHED
03/79 -ANNUAL REPORT
10/79 -IN VIVO EXPOSURES FOR MACROPHAGE STUDIES COMPLETED
03/80 -INFECTIVITY STUDIES COMPLETED
06/80 -FINAL REPORT

THE PURPOSE OF THIS PROJECT WILL BE TO DETERMINE THE COMPARATIVE TOXICITY OF PARTICULATES TO MACROPHAGES WHEN EXPOSED IN VITRO AND IN VIVO. CHEMICALLY CHARACTERIZED CRUDE PARTICULATES FROM INDUSTRIAL PROCESSES OF RESPIRABLE SIZE AND OTHER PARTICULATE SAMPLES WILL INITIALLY BE SCREENED FOR RELATIVE CYTOTOXICITY TO THE ALVEOLAR MACROPHAGE EXPOSED IN VITRO. FROM THIS INITIAL SCREENING IN VITRO, PARTICULATE SAMPLES OF HIGH, MODERATE AND LOW TOXICITY WILL BE SELECTED FOR IN VIVO INHALATION EXPOSURES. MACROPHAGES ISOLATED FROM THESE EXPOSED ANIMALS WILL THEN BE EXAMINED FOR A NUMBER OF PARAMETERS INCLUDING TOTAL NUMBERS, VIABILITY, ATP CONTENT, PHAGOCYTIC ABILITY, AND BACTERIOCIDAL ACTIVITY. RESULTS FROM IN VIVO EXPOSURES WILL BE CORRELATED WITH RESULTS FROM STRICTLY IN VITRO EXPOSURES IN ORDER TO VALIDATE IN VITRO FINDINGS. FURTHERMORE, IN VIVO STUDIES, WHEN WARRANTED, WILL EXAMINE THE EFFECT OF THESE PARTICULATES ON ANIMALS SUBSEQUENTLY CHALLENGED WITH A BACTERIAL INFECTION.

SYNOPTIC METEOROLOGY AND AIR QUALITY PATTERNS IN THE ST. LOUIS RAPS PROGRAM

START/ COMPL DATE : 04/77 - 04/78 : FUNDING : EST. - FY 77 / $ 15442
TASK/EPA CODE :G603A-AD-09 / R805142-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T KASL
INVESTIGATORS : E ROBINSON WASHINGTON STATE UNIVERSITY
MILE: 12/77 -REPORT ON SYNOPTIC WEATHER TYPING OF THE WEATHER PATTERNS I
05/78 -RPT. ON RELATIONSHIP OF AIR QUALITY AND WEATHER TYPES
05/80 -FINAL REPORT

THIS RESEARCH PROGRAM HAS 2 OBJECTIVES: (1) TO DEVELOP AN OBJECTIVE CLA SSIFICATION SYSTEM FOR THE SYNOPTIC WEATHER PATTERNS THAT AFFECT THE ST. L OUIS, MISSOURI AREA; AND (2) TO DETERMINE GENERAL OR AVERAGE AIR QUALITY P ATTERNS USING THE RAPS DATA FILE FOR ST. LOUIS AS A FUNCTION OF PREVAILING SYNOPTIC WEATHER AS IDENTIFIED IN THE PATTERN CLASSIFICATION STUDY.

METABOLISM OF CARBAMATE INSECTICIDES

START/ COMPL DATE : 06/77 - 05/82 : FUNDING : EST. - FY 77 / $ 64845
TASK/EPA CODE :H615F-7623 / R805143-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D JACKSON
INVESTIGATORS : H W DOROUGH UNIV. OF KENTUCKY

IN VIVO AND IN VITRO METABOLISM EXPERIMENTS WILL BE CONDUCTED WITH C ARBAMATE INSECTICIDES IN BOTH ANIMAL AND PLANT SYSTEMS. COMPOUNDS SELECTED WILL BE THOSE ALREADY IN USE HAVING SPECIFIC METABOLISM PROBLEMS STILL EVIDENT, AND NEW PRODUCTS OF HIGH COMMERCIAL POTENTIAL AND/OR OF U NUSUAL CHEMICAL CONFIGURATION. METABOLITES WILL BE ISOLATED, IDENTIFIED WH ENEVER POSSIBLE, AND SUBJECTED TO STUDIES DESIGNED TO ESTIMATE THEIR TOXIC OLOGICAL SIGNIFICANCE. THESE LATTER STUDIES WILL INCLUDE DETERMINATIONS OF ACUTE TOXICITY TO RATS/MICE, ANTICHOLINESTERASE ACTIVITY, BIOAVAILABILITY AND FATE IN ANIMALS, AND MUTAGENIC/CARCINOGENIC POTENTIAL AS IND ICATED BY BACTERIAL ASSAY SYSTEMS. OTHER STUDIES WILL BE UNDERTAKEN TO DET ERMINE FACTORS WHICH SIGNIFICANTLY ALTER AN ANIMAL'S ABILITY TO DEGRADE CA RBAMATE TOXICANTS. PLANS ARE TO EVALUATE EFFECTS OF OTHER CHEMICALS, DIET, AND VARIOUS FORMS OF STRESS.

TRACE AND POTENTIALLY TOXIC ELEMENTS ASSOCIATED WITH URANIUM DEPOSITS IN SOUTH TEXAS

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 60000
TASK/EPA CODE :86238-523 / R805147-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : S J HUBBARD
INVESTIGATORS : C D HENRY UNIV. OF TEXAS
C G GROAT UNIV. OF TEXAS

MILE: 04/77 -FUNDING PACKAGE SUBMITTED
05/77 -AWARD FUNDS
07/78 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THIS STUDY IS TO EVALUATE POTENTIAL PROBLEMS OF TOXIC ELEMENTS ASSOCIATED WITH URANIUM MINERALIZATION AND MINING IN SOUTH TEXAS. SAMPLING OF SOILS AND VEGETATION IN (1) AREAS THAT ARE WITHIN OR IMMEDIATELY ADJACENT TO MINING AREAS OR HAVE HAD ORE STORED ON THEM; (2) AREAS UNDERLAIN BY IDENTIFIED URANIUM MINERALIZATION BUT WHICH HAVE NOT BEEN MINED; AND (3) AREAS OF SIMILAR SUBSTRATE AND SOILS AWAY FROM ANY KNOWN MINERALIZATION OR PREVIOUS MINING WILL ACCOMPLISH THIS OBJECTIVE. THE THIRD LOCALITY WILL ESTABLISH BACKGROUND LEVELS; THE FIRST TWO WOULD INDICATE THE EXTENT OF MAN-CAUSED OR "NATURAL" CONTAMINATION. SAMPLING WILL BEGIN EARLY IN 1977.

PREVENTING HALOFORM FORMATION IN DRINKING WATER

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 74999
TASK/EPA CODE :C614A-7162 / R805149-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D T LOVE
INVESTIGATORS : L L HARMS SOUTH DAKOTA SCHOOL OF MINES
R W LOOYENGA SOUTH DAKOTA SCHOOL OF MINES

MILE: 05/77 -AWARD GRANT
08/77 -IDENTIFY SOURCES CONTRIBUTING TRIHALOMETHANE PRECURSOR(S) IN JA
02/78 -COMPLETE STUDIES ON COMBINED CHLORINE
08/78 -FINAL REPORT

THE OBJECTIVES OF THE PROPOSED STUDY ARE TO (1) STUDY THE USE OF CHLORAM INES AS A DISINFECTANT ON A FULL-SCALE WATER TREATMENT PROCESS IN ORDER TO REDUCE THE TOTAL HALOFORM CONCENTRATION, (2) ESTABLISH REASONS FOR HALOFORM AFTERGROWTH WITHIN THE DISTRIBUTION SYSTEM, (3) IDENTIFY THE PRIMARY SOURCE OF PRECURSORS, AND (4) SUBSTANTIALLY REDUCE THE BROMODICH LOROMETHANE CONCENTRATION IN THE FINISHED WATER. LABORATORY AND FIELD WORK WILL BE CONDUCTED TO EVALUATE THE DISINFECTION CAPABILITIES OF THE CHLORAMINES IN CONJUNCTION WITH THE REDUCTION OF HALOGENATED HYDRO CARBONS. THE TREATMENT PROCESSES AND THE DISTRIBUTION SYSTEM WILL BE MONIT ORED. VARIATIONS IN RAW WATER QUALITY WILL BE ASSOCIATED WITH POTENTIAL HA LOFORM FORMATION IN THE DRINKING WATER. PHYSICAL, CHEMICAL, AND BACTERIOLO GICAL QUALITY WILL BE MONITORED AS WELL AS HYDROLOGIC INFORMATION. SPECIAL ATTENTION WILL BE DIRECTED DURING PERIODS OF SURFACE RUNOFF TO ASCERTAIN PRECURSOR CONTRIBUTIONS FROM NON-POINT SOURCES OF POLLUTION.

A STUDY OF THE MECHANISM AND RATES OF VOLATILIZATION OF CONTAMINANTS FROM WATER BODIES

START/ COMPL DATE : 09/77 - 12/80 : FUNDING : EST. - FY 77 / $ 60000
TASK/EPA CODE :K609A-206 / R805150-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : S W KARICKHOFF
INVESTIGATORS : D MACKAY UNIV. OF TORONTO
MILE: 09/77 -START
09/78 -ANNUAL REPORT
09/79 -ANNUAL REPORT
12/80 -ANNUAL REPORT

OBJECTIVES: THE OBJECTIVE OF THIS PROJECT IS TO DEVELOP A DEEPER QUANTITATIVE UNDERSTANDING OF THE PROCESSES BY WHICH SOME ENVIRONMENTAL CONTAMINANTS VOLATILIZE FROM WATER BODIES TO THE ATMOSPHERE, SUCH A PREDICTIVE CAPABILITY WILL BE USEFUL IN CONTRIBUTING ONE COMPONENT TO THE OVERALL PROCESS OF MODELLING ENVIRONMENTAL SYSTEMS. APPROACH: WORK WILL BE UNDERTAKEN IN A WIND-WATER TANK TO MEASURE VOLATILIZATION RATES AND IN PARTICULAR MEASURE LIQUID PHASE TRANSFER COEFFICIENTS AND CORRELATE THESE COEFFICIENTS WITH WIND SPEED AND OTHER FLUID FLOW CHARACTERISTICS. HENRY'S LAW CONSTANTS WILL BE MEASURED FOR SELECTED CONTAMINANTS, NOTABLY HYDROCARBONS AND CHLORINATED HYDROCARBONS IN AQUEOUS SYSTEMS, PURE, WITH ELECTROLYTES AND WITH ADSORBING SPECIES SUSH AS MINERAL CLAYS, WHICH ARE ENCOUNTERED NATURALLY. THIS WORK WILL BE INITIATED IN 1977, THUS, NO PROGRESS REPORT IS APPROPRIATE AT THIS TIME.

DETECTION OF VIRAL GASTROENTERITIS AGENTS

START/ COMPL DATE : 05/77 - 05/79 : FUNDING : EST. - FY 77 / $ 48525
TASK/EPA CODE : D6148-035 / R805169-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E W AKIN
INVESTIGATORS : N R BLACKLOW UNIV. OF MASSACHUSETTS
G CUKOR UNIV. OF MASSACHUSETTS

MILE: 05/79 -FINAL REPORT

ACUTE INFECTIOUS NONBACTERIAL GASTROENTERITIS IS CHARACTERISTICALLY AN EPIDEMIC DISEASE BUT IT ALSO PERSISTS IN AN ENDEMIC FORM THAT IS RESPONSIBLE FOR SPORADIC CASES OR LOCALIZED OUTBREAKS, POSING A MAJOR RECURRING PROBLEM IN PUBLIC HEALTH. THE MAJOR OBJECTIVE OF THIS PROJECT IS TO ASSESS THE CONTRIBUTION OF PARVOVIRUS-LIKE AGENTS TO ENVIRONMENTALLY TRANSMITTED ENTERITIS. WE PLAN A TWO-FOLD APPROACH TO THE PROBLEM, ONE IS TO DESIGN, DEVELOP AND TEST A SENSITIVE ASSAY METHOD FOR THE DETECTION OF THESE AGENTS IN STOOL AND WATER SPECIMENS WITHOUT THE NECESSITY OF PROPAGATING THE VIRUSES. THE SECOND APPROACH IS TO CULTIVATE THE VIRUSES IN QUESTION IN VITRO UTILIZING METHODOLOGIES THAT HAVE PROVEN SUCCESSFUL FOR OPTIMAL GROWTH OF OTHER KNOWN PARVOVIRUSES. SUCCESSFUL COMPLETION OF THIS PROJECT WILL RESULT IN 1) A RELIABLE METHOD FOR THE RAPID DIAGNOSIS OF THIS TYPE OF VIRAL ENTERITIS AND 2) A RAPID WAY OF TESTING ENVIRONMENTAL SAMPLES (E.G. LARGE QUANTITIES OF WATER) FOR THE PRESENCE OF ENTERITIS AGENTS.

DEVELOPMENT OF DYNAMIC TWO-LAYER MODEL FOR STRATIFIED ESTUARIES

START/ COMPL DATE : 04/77 - 12/78 : FUNDING : EST. - FY 77 / $ 98000
TASK/EPA CODE :K609A-406 / R805170-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W FALCO
INVESTIGATORS : S G CHAMBERLAIN RAYTHEON COMPANY
P V TAWARI RAYTHEON COMPANY
W COMERY RAYTHEON COMPANY

MILE: 04/77 -START PROJECT
01/78 -INTERIM REPORT WHICH SUMMARIZES HYDRODYNAMICS ESTUARY MODEL
12/78 -FINAL REPORT WHICH SUMMARIZES ESTUARY MODEL INCLUDING WATER QUA

THE PRIMARY OBJECTIVE OF THE PROJECT IS TO DEVELOP A TWO-LAYER DYNAMIC MODEL OF ESTUARINE HYDRODYNAMICS AND WATER QUALITY. THE MODEL IS TO BE COMPATIBLE FOR LINKAGE WITH APPROPRIATE RIVER AND LOADING MODELS TO PROVIDE A BASIN PLANNING METHODOLOGY IN COASTAL AREAS. A SECOND OBJECTIVE IS TO TEST THE ESTUARY MODEL ON A FIELD DATA SET TO DEFINE ITS P ERFORMANCE CHARACTERISTICS. THE APPROACH IS TO COMPLETE THE DEVELOPMENT OF RAMSES HYDRODYNAMIC AND WATER QUALITY MODEL. THE HYDRODYNAMIC CODE WILL BE TESTED AS A FIRST PHASE IN THIS STUDY. TESTING WILL INCLUDE SENSITIVITY ANALYSIS OF RAMSES MODEL PARAMETERS. THE SECOND PHASE OF THIS STUDY WILL BE DIRECTED TOWARD QUALITY MODEL DEVELOPMENT. AN INTERIM REPORT WILL BE SUBMITTED IN JANUARY 1978 WHICH WILL SUMMARIZE THE PROGRESS OF THE PROJECT. THIS REPORT WILL INCLUDE DISCUSSIONS OF HYDRODYNAMIC MODEL DE VELOPMENT. A FINAL REPORT WILL BE SUBMITTED AT THE END OF THE PROJECT THAT WILL PRESENT THE DEVELOPMENT OF THE WATER QUALITY MODEL.

ATMOSPHERIC INPUT OF TRACE METALS TO LAKE MICHIGAN

START/ COMPL DATE : 04/77 - 04/78 : FUNDING : EST. - FY 77 / $ 21409
TASK/EPA CODE : N608A-010 / R805172-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D MULLIN
INVESTIGATORS : S J EISENREICH UNIV. OF MINNESOTA
MILE: 07/78 -FINAL REPORT DUE

THE OBJECTIVE OF THE RESEARCH PROJECT IS TO DETERMINE LOADINGS AND D EPOSITION RATES OF SELECTED TRACE METALS TO LAKE MICHIGAN FROM ATMOSPHERIC SOURCES. THE TRACE METAL CONTENT OF MONTHLY-INTEGRATING, BULK PRECIPITATION SAMPLES COLLECTED AT 22 LAND-BASED STATIONS, 2 IN-LAKE BUOY COLLECTORS AND 2 WET/DRY UNITS WILL BE MEASURED. THE BULK PRECIPI TATION SAMPLES WERE COLLECTED AT SITES IN WISCONSIN, ILLINOIS, INDIANA AND MICHIGAN BORDERING LAKE MICHIGAN FROM JULY, 1975 TO DECEMBER, 1976. T RACE METALS (ZN, CD, PB, CU, NI, FE, CO AND MN) WILL BE ANALYZED BY ATOMIC ABSORPTION SPECTROPHOTOMETRY (AAS) WITH A PERKIN-ELMER MODEL 360 AAS EQUIPPED WITH AN HGA-2100 GRAPHITE FURNACE AND A DEUTERIUM BACKGROUND CORRECTOR. TRACE METAL DATA WILL BE REPORTED IN CONCENTRATION UNITS (MICROGRAM/L), DEPOSITION RATES (MICROGRAM/CM2/MONTH) AND IN TOTAL LOADINGS TO THE LAKE ON AN ANNUAL BASIS. STATISTICAL TECHNIQUES WILL BE USED TO IDENTIFY SOURCES WHERE POSSIBLE.

EPIDEMIOLOGICAL STUDY OF DISEASE ASSOCIATED WITH WASTEWATER SPRINKLER IRRIGATION

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 73580
TASK/EPA CODE :D607A-007 / R805174-01 (GRANT) PRIOR FY / 1
INVESTIGATORS : H I SHUVAL HEBREW UNIVERSITY OF JERUSALE
E KATZENELSON HEBREW UNIVERSITY OF JERUSALE
A M DAVIES HEBREW UNIVERSITY OF JERUSALE

MILE: 08/77 -BEGIN EPIDEMIOLOGICAL STUDY
09/78 -INTERIM REPORT
08/79 -FINAL REPORT

OBJECTIVES: A) TO DETERMINE THE DEGREE OF ADDED RISK OF COMMUNICABLE DISEASE INCIDENCE AMONG RESIDENTS OF AGRICULTURAL COMMUNITIES (KIBBU TZIM) PRACTICING WASTEWATER UTILIZATION AS COMPARED TO THOSE NOT UTILIZING WASTEWATER, B) TO DETERMINE WHETHER THE ADDED RISK IS ASSOCIATED WITH SPR INKLER IRRIGATION WITH WASTEWATER AND INFLUENCED BY PROXIMITY OF IRRIGATED AREAS TO RESIDENTIAL ZONES AND DOMINANT WIND DIRECTIONS, C) TO DETERMINE WHETHER THE DEGREE OF ADDED RISK IS ASSOCIATED WITH THE DEGREE OF WA STEWATER PURIFICATION AND CAN BE REDUCED AS A RESULT OF IMPROVED TREATMENT INCLUDING DISINFECTION OF EFFLUENT. APPROACH: RETROSPECTIVE DISEASE DATA FROM SOME 80 KIBBUTZIM (COLLECTIVE AGRICULTURAL SETTLEMENTS) PRACTICING SPRINKLER IRRIGATION WITH PARTIALLY TREATED NON-DISINFECTED OXIDATION PO ND EFFLUENT WILL BE COLLECTED AND COMPARED WITH DISEASE DATA FROM 130 CONT ROL KIBBUTZIM NOT PRACTICING ANY FORM OF SEWAGE UTILIZATION. ENVIRONMENTAL FACTORS SUCH AS DISTANCE FROM SEWAGE IRRIGATED FIELD, WIND DIRECTION AND DEGREE OF WASTEWATER TREATMENT WILL BE STUDIED.

The purpose of this investigation is to determine the ability of young goats to dispose of combinations of non-toxic doses of selected toxic elements. The elemental compounds to be studied will be enclosed in gelatinous capsules and administered daily via gastric intubation with the aid of a balling gun. Control goats will be given the capsule containing only the "filler" or diluent, if any are used in preparing the elemental preparations. At the end of the first four weeks of flushing the treated and control goats will be sheared and the hair collected for analysis. Approximately 200 days after the initial treatment with the toxic elements all animals will be sacrificed, tissues(whole blood, kidneys, brain, liver, hoofs, teeth, hair, skeletal muscle and bones) will be collected. All tissues will be processed for storage and samples analyzed for the appropriate elements. The remainder of the tissues will be shipped to EMSL-LV to be used as reference materials in subsequent studies.

TRANSPORT WATER CONTAMINATION IN COAL-SLURRY PIPELINES

START/ COMPL DATE : 03/77 - 04/78 : FUNDING : EST. - FY 77 / $ 80000
TASK/EPA CODE :B6238-525 / R805176-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : J L KENNEDY
INVESTIGATORS : H S PEAVY MONTANA STATE UNIVERSITY

P W JENNINGS MONTANA STATE UNIVERSITY

MILE: 03/77 -FUNDING PACKAGE SUBMITTED
04/77 -AWARD FUNDS FOR PROJECT
08/77 -COMPLETE FIRST PUMP TESTS
04/78 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THIS RESEARCH PROJECT WILL BE TO QUALIFY AND QUANTIFY ANY CONTAMINATION OF WATER USED AS A TRANSPORT MEDIA IN COAL-SLURRY PIPELINES. A SLURRY OF WATER AND COAL WILL BE PUMPED CONTINUOUSLY FOR SEVERAL DAYS AROUND A 2,400 FOOT, CLOSED LOOP PIPELINE. SAMPLES WILL BE DRAWN OFF PERIODICALLY AND ANALYSIS WILL BE PERFORMED ON THE WATER PHASE FOR VARIOUS DISSOLVED AND SUSPENDED MATERIAL. TEST PARAMETERS WILL BE DETERMINED BY PRIOR ANALYSIS OF THE COAL AND WATER USED TO MAKE UP THE SLURRY. IT IS ANTICIPATED THAT THESE PARAMETERS WILL INCLUDE SEVERAL METALS AS WELL AS SEVERAL ORGANIC CARBON COMPOUNDS. BOTH FRESH WATER AND SALINE WATER WILL BE USED AS A TRANSPORT MEDIA. SOME ORGANIC ANALYSIS OF WATER WHICH HAS CONTRACTED COAL HAS ALREADY BEEN DONE AT M.S.U. THIS WORK INDICATES THAT DISSOLVED ORGANIC CARBON OF UP TO 100 PPM CAN RESULT UNDER SOME CONDITIONS.

WOOD PRESERVING WASTE RECYCLE AND INCINERATION SYSTEM

START/ COMPL DATE : 04/76 - 01/79 : FUNDING : EST. - FY 77 / $ 50000

04/78 -QUARTERLY REPORT
07/78 -QUARTERLY REPORT
10/78 -DRAFT FINAL REPORT
01/79 -FINAL REPORT RECEIVED

THE OBJECTIVE IS TO EVALUATE A FULL SIZED RECYCLE SYSTEM FOR LIQUID WASTES FROM A WOOD PRESERVING PLANT WHERE THE WASTES ARE CONCENTRATED BY ULTRAFILTRATION AND REVERSE OSMOSIS WITH THE CONCENTRATE INCINERATED AND THE PERMEATE CONSUMED AS BOILER FEED WATER. THE APPROACH CONSISTS OF COLLECTING DATA ON THE FEED, REJECT, AND PRODUCT AND MAINTAINING A LOG OF SYSTEM PERFORMANCE, QUANTITIES PROCESSED, OPERATING AND MAINTENANCE EXPENSE, AND OPERATING PROBLEMS. THE DATA WILL BE TABULATED AND PUBLISHED IN THE AMERICAN WOOD PRESERVERS ASSN. (AWPA) PROCEEDINGS. ALSO THE RESULTS WILL BE PUBLISHED IN EPA TECHNICAL REPORT SERIES. THE PHYSICAL FACILITY IS UNDER CONSTRUCTION AS OF THIS DATE. START-UP IS SCHEDULED FOR APRIL, 1977.

JOINT CENTRAL WASTE TREATMENT FACILITY FOR TAUNTON SILVER PLATES

START/ COMPL DATE : 03/77 - 10/77 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :B6108-461 / S805181-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : M K STINSON
INVESTIGATORS : H C GILL REED & BARTON SILVERSMITH
MILE: 03/77 -FUNDING PACKAGE SUBMITTED
04/77 -AWARD FUNDS FOR PROJECT
08/77 -DRAFT FINAL REPORT
10/77 -FINAL REPORT RECEIVED

OBJECTIVE: TO DEMONSTRATE THE FEASIBILITY OF BUILDING AND OPERATING A J OINT WASTE TREATMENT PLANT BY THREE ELECTROPLATING COMPANIES IN TAUNTON, M ASSACHUSETTS. APPROACH: TO MAKE AN ASSESSMENT OF THE PRESENT STATE OF EACH PARTICIPATING COMPANY, THEN CONDUCT AN EVALUATION AND SELECTION OF TREAT MENT AND RECOVERY ALTERNATIVES FOR THE WASTE STREAMS PRODUCED. A PLAN WILL THEN BE CHOSEN ACCORDING TO THE MOST ECONOMICAL APPROACH. CURRENT P LANS: IF JOINT TREATMENT IS PROVEN FEASIBLE, THEN DESIGN WOULD BE THE NEXT STAGE.

FULL-SCALE DEMONSTRATION OF HYPERFILTRATION FOR CLOSED-CYCLE OPERATION IN TEXTILE

START/ COMPL DATE : 06/77 - 04/81 : FUNDING : EST. - FY 77 / $ 324000
TASK/EPA CODE :8610F-374 / S805182-01 (GRANT) PRIOR FY76 / 1

09/80 -OPERATION COMPLETE
12/80 -DRAFT REPORT
04/81 -FINAL REPORT RECEIVED

SUMMARY OF PROPOSED WORK - THE OBJECTIVES OF THIS PROJECT ARE TO DEMONSTRATE THE ECONOMIC AND TECHNICAL ADVANTAGES TO A FULL SCALE REVERSE OSMOSIS (HYPERFILTRATION) SYSTEM FOR CLOSED CYCLE OPERATION OF A TEXTILE DYING AND FINISHING PLANT. INVOLVED IS THE DESIGN, INSTALLATION, AND TWELVE-MONTH OPERATION OF A REVERSE OSMOSIS TREATMENT SYSTEM FOR THE HOT WASTEWATER FROM EITHER A CONTINUOUS DYE RANGE OR A GROUP OF TEN ATMOSPHERIC DYE BECKS. THE TWO TYPES OF EQUIPMENT ARE TYPICAL OF THE TWO BROAD CATEGORIES OF TEXTILE PROCESSING: CONTINUOUS AND BATCH. A CONCEPTUAL DESIGN WILL BE DEVELOPED FOR EACH PROCESS AND THE ONE APPEARING TO BE THE MOST ECONOMICALLY VIABLE WILL BE DEMONSTRATED. OUTPUTS FROM THIS PROGRAM CONSIST OF: A DETAILED DESIGN FOR TEXTILE WASTEWATER TREATMENT BY REVERSE OSMOSIS, DETAILED OPERATIONS AND CAPITAL COSTS, DOCUMENTATION OF ENERGY SAVINGS OF THE REVERSE OSMOSIS SYSTEM COMPARED TO CONVENTIONAL WASTE TREATMENT METHODS AND EVALUATION OF CHEMICAL (DYES, SALT) RECYCLE IN THE DYING PROCESS.

MILE: 10/77 -PROJECT ORGANIZATION DETAILS
07/78 -TEXTILE PROCESS SELECTION
10/78 -DESIGN AND COST QUANTIZED
07/79 -EQUIPMENT PROCUREMENT AND INSTALLATION AND MEMBRANE FOR
10/79 -MEMBRANE PERFORMANCE OPTIMIZATION
01/80 -INITIAL EQUIPMENT OPERATION
10/80 -FULL SCALE CLOSED CYCLE DEMONSTRATION
07/81 -PREPARATION OF FINAL REPORT

THE OBJECTIVE IS TO DEMONSTRATE THE USE OF CLOSED-CYCLE OPERATION IN A CONTINUOUS DYE RANGE AND TO ACCURATELY DETERMINE THE COST EFFECTIVENESS OF HYPERFILTRATION FOR THIS APPLICATION. IT IS EXPECTED THAT ENERGY, WATER AND MATERIALS WILL THUS BE RECOVERED. THE PROJECT INVOLVES THE DESIGN, INSTALLATION, AND TWELVE-MONTH OPERATION OF A FULL-SCALE HYPERF ILTRATION (REVERSE OSMOSIS) SYSTEM FOR CLOSED-CYCLE OPERATION OF A TEXTILE DYEING OPERATION AT LAFRANCE INDUSTRIES. THE CLOSED OPERATION OF A CONTINUOUS DYE RANGE AND THE GROUPS OF TEN ATMOSPHERIC DYE BECKS WILL BE INVESTIGATED. BOTH TYPES OF EQUIPMENT ARE CURRENTLY BEING USED AT LAFRANCE FOR DYEING HEAVY COTTON VELOUR FABRICS. THE TWO TYPES OF EQUIPMENT ARE REPRESENTATIVE OF THE TWO BROAD CATEGORIES OF TEXTILE PROCESSING - CONTINUOUS AND BATCH. THE FULL-SCALE MEMBRANE SYSTEM WILL BE DESIGNED FOR ONE OF THESE TEXTILE PROCESSES THAT IS SELECTED BASED ON THE EVALUATION OF CONCEPTUAL SYSTEM DESIGNS DEVELOPED FOR EACH. THE OUTPUT IS TECHNOLOGY TRANSFER TO THE TEXTILE INDUSTRY AT LARGE BOTH IN THE FORM OF AN EPA REPORT AND A FULL-SCALE DEMO UNIT.

INTERACTIONS OF METAL IONS WITH ORGANIC LIGANDS IN NATURAL WATERS

START/ COMPL DATE : 04/77 - 04/80 : FUNDING : EST. - FY 77 / $ 65000

MILE: 06/77 -FUNDING PACKAGE SUBMITTED
07/77 -AWARD FUNDS FOR PROJECT
03/78 -AWARD CONTINUATION
02/80 -FINAL REPORT RECEIVED

THERE ARE BASICALLY FIVE OBJECTIVES FOR THE STUDY: (1) TO DEFINE THE MECHANISMS INVOLVED IN THE HYDROLOGY OF THE ALLUVIAL SYSTEM, (2) TO I NVESTIGATE THE STRATIGRAPHIC RELATIONSHIP OF THE STREAM DEPOSITS, (3) TO I DENTIFY THE SOIL TYPES REPRESENTED, (4) TO DETERMINE REPRODUCTIVITY OF THE NATIVE PLANT COMMUNITY, AND (5) TO PROVIDE INFORMATION RELEVANT FOR STATE AND FEDERAL REGULATORY AGENCIES. IT IS INTENDED THAT THIS STUDY DELINEATE THE PROBLEMS, MINEABILITY, TREATABILITY, ETC. OF POTENTIAL ALLUVIAL VALLEY MINE SITES. THIS EFFORT IS TO DEFINE THE CRITICALLY IMPORTANT PHYSICAL FEATURES OF ALLUVIAL VALLEYS WHICH HAVE MAJOR IMPACTS TO THE HYDROLOGIC CYCLE. AFTER AN EXTENSIVE LITERATURE REVIEW, THREE SITES IN MONTANA AND WYOMING WILL BE SELECTED FOR FIELD STUDY.

DEMONSTRATION PROGRAM TO SHOW LANDOWNERS AND MUNICIPALITIES ACCEPTABLE SYSTEMS FOR APPLYING SLUDGE ON LAND

START/ COMPL DATE : 08/77 - 08/80 : FUNDING : EST. - FY 77 / $ 195681

MILE: 09/77 -GRANT AWARD
09/80 -PROJECT COMPLETED
02/81 -FINAL REPORT PUBLISHED

THE OBJECTIVE IS TO DEMONSTRATE SAFE BENEFICIAL USE OF WASTEWATER SLUDGE AS A SOIL AMENDMENT ON AGRICULTURAL LAND. INSTITUTIONAL ARRANGEMENTS T O PERMIT OBJECTIVE EVALUATIONS AND DECISIONS BY BOTH RURAL AND URBAN RESID ENTS WILL BE DEMONSTRATED. THE EFFECT OF PROPER APPLICATION AND MANAGEMENT OF A LAND APPLICATION OF SLUDGE ON PUBLIC HEALTH AND THE ENVIRONMENT WILL BE DETERMINED. FOUR COMMUNITIES IN OHIO THAT ALREADY DISPOSE OF SLUDGE BY SPREADING IT ON FARM LAND WILL SUPPLY SLUDGE FOR APPLICATION T O SELECTED FARMS IN A CAREFULLY PLANNED AND MANAGED SYSTEM. IN ADDITION TO SLUDGE APPLICATION ON FIELDS, SLUDGE WILL BE APPLIED TO CAREFULLY SELECTED PLOTS FOR MEASUREMENT OF ITS EFFECT ON YIELD AND COMPOSITION OF CROP, COMPOSITION SOIL, AND CONSUMPTION OF GROUND AND SURFACE WATER. AN EPIDEMIOLOGICAL STUDY OF LIVESTOCK AND PEOPLE WHO COME IN CONTACT WITH SLUDGES WILL MEASURE THE HEALTH EFFECTS OF SLUDGE SPREADING.

CHRONIC BIOASSAYS WITH DAPHNIDS AS A TOOL FOR PREDICTING THE TOXICITY OF COMPLEX INDUSTRIAL EFFLUENT TO THE BIOTA OF A RECEIVING STRE

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 21063
TASK/EPA CODE :N608A-089 / R805193-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W B HORNING
INVESTIGATORS : R W WINNER MIAMI UNIVERSITY
MILE: 06/78 -CREATE A MODEL FOR USING DAPHNIA BIOASSAYS TO PREDICT THE IMPAC
06/79 -TEST RELIABILITY OF MODEL AND COMPLETE A FINAL REPORT

OBJECTIVES: TO DETERMINE WHETHER CHRONIC EFFLUENT BIOASSAYS WITH DAPHNIDS CAN BE USED TO DETERMINE HOW MUCH THAT EFFLUENT MUST BE DILUTED BEFORE IT WILL NOT HAVE AN UNACCEPTABLE EFFECT ON THE BIOTA OF THE RECEIVING S TREAM. APPROACH: FIVE-WEEK BIOASSAYS WILL BE CONDUCTED WITH DILUTIONS OF A COMPLEX INDUSTRIAL EFFLUENT USING DAPHNIA MAGNA AND D. PARVULA. THESE WILL BE COMPARED TO CHRONIC BIOASSAYS RUN IN UNDILUTED STREAM WATER COLLECTED FROM STATIONS DOWNSTREAM FROM THE POINT OF EFFLUENT DISCHARG E. BOTH KINDS OF BIOASSAYS WILL BE COMPARED TO MACROINVERTEBRATE, FISH AND PERIPHYTIC COMMUNITIES AT DOWNSTREAM STATIONS IN THE RECEIVING WATERS. TOXICANT CONCENTRATIONS AT THE SAMPLING STATIONS WILL BE COMPARED TO EFFLUENT DILUTIONS CAUSING NO ADVERSE EFFECT ON BIOASSAY TEST ORGAN ISMS TO DETERMINE WHETHER THE BIOASSAYS CAN PREDICT WHERE THE STREAM BIOTA WILL HAVE RECOVERED FROM THE EFFLUENT STRESS.

Permeabilities, diffusivities and solubilities of major hydrocarbon pollutants and of oxygen in a variety of polymeric materials will be measured as functions of temperature, pressure, and pollutant concentration. The results of these measurements will be used to design interfaces for source monitoring of hydrocarbons, but their utility should extend well beyond this particular application. Potential applications include the design of hydrocarbon permeation tubes for calibrating ambient hydrocarbon analyzers, and the evaluation of plastic bag materials for storing grab samples to be analyzed for hydrocarbon concentrations.

Membranes will be sought which are either selectively permeable or impermeable to oxygen, with the object of reducing or eliminating the oxygen effect in flame ionization detection.

A portable interface-analyzer system for continuous unattended monitoring of hydrocarbon emissions will be designed, assembled, and field tested in a variety of source enviornments.

GENETIC VARIATION AND RESISTANCE TO CARCINOGENS IN NATURAL WATERS

START/ COMPL DATE : 06/77 - 06/80 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :Q625F-1-02 / R805195-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : R J SCHULTZ UNIV. OF CONNECTICUT
MILE: 01/78 -COMPLETE TOXICITY TESTS, BEGIN CARCINOGEN EXPOSURE
06/79 -PRELIMINARY EVALUATION OF CARCINOGEN METHODOLOGY
06/80 -EVALUATION OF METHOD FOR CARCINOGEN BIOASSAY

THE OBJECTIVE OF THIS GRANT IS TO EVALUATE THE FEASIBILITY OF USING ISOGENIC FISH TO DETECT CARCINOGENS. THE VALIDATED BIOASSAY SYSTEM WOULD BE USED TO TEST THE CARCINOGENIC PROPERTIES OF COMPOUNDS FROM PETROLEUM AND SHALE OIL.

CHLORINATION OF PUBLIC WATER SUPPLIES AND CANCER

START/ COMPL DATE : 10/76 - 10/77 : FUNDING : EST. - FY 77 / $ 33602
TASK/EPA CODE :D6148 046 / R805198-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L J MCCABE
INVESTIGATORS : C W KRUSE JOHNS HOPKINS UNIVERSITY
G W COMSTOCK JOHNS HOPKINS UNIVERSITY
J A TONASCIA JOHNS HOPKINS UNIVERSITY

MILE: 04/78 -REPORT

THE OBJECTIVE IS TO CONFIRM OR DISPROVE THE SUGGESTED ASSOCIATION BETWEEN VOLATILE ORGANIC COMPOUNDS PRODUCED BY THE CHLORINATION OF DRINKING WATER AND CANCER RISK. THIS HYPOTHESIS WILL BE TESTED IN A POPULATION-BASED ST UDY CARRIED OUT IN THE TRAINING CENTER FOR PUBLIC HEALTH RESEARCH IN WASHI NGTON COUNTY, MARYLAND. THE APPROACH IS TO PARTITION THE POPULATION INTO T HOSE DRINKING CHLORINATED WATER AND THOSE NOT DRINKING CHLORINATED WATER A ND COMPARING CANCER MORTALITY AND MORBIDITY EXPERIENCES. THE STUDY WILL FO CUS ON CHLOROFORM AND SEVERAL SITE-SPECIFIC NEOPLASMS, LIVER AND KIDNEY IN PARTICULAR. THE UNIQUE CENSUS DATA AVAILABLE PERMITS ADJUSTMENTS FOR CONFOUNDING VARIABLES SUCH AS SEX, AGE, MARITAL STATUS, EDUCATION, HOUSING, CIGARETTE SMOKING, YEARS OF RESIDENCE AND CHURCH ATTENDANCE (A LCOHOL) AS WELL AS DRINKING WATER. THE SECOND PHASE WILL BE A CASE-CONTROL STUDY BETWEEN CHLOROFORM LEVEL IN DRINKING WATER AND LIVER CANCER INCIDENCE.

REMOVAL OF CONTAMINANTS FROM DRINKING WATER BY REVERSE OSMOSIS

START/ COMPL DATE : 08/77 - 08/79 ; FUNDING ; EST. - FY 77 / $ 232950
TASK/EPA CODE :C614 -7170 / R805207 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T SORG
INVESTIGATORS : W D DARBY CHARLOTTE HARBOR WATER ASSN.
V B PICKETT CHARLOTTE HARBOR WATER ASSN.
P L CULLER CHARLOTTE HARBOR WATER ASSN.

MILE: 01/78 -REVERSE OSMOSIS EQUIPMENT INSTALLED
07/78 -STUDIES ON INORGANIC CONTAMINANT REMOVAL WITH DEEP WELL WATER C
11/78 -REPORT COMPLETED ON DEEP WELL WATER STUDIES
01/79 -STUDIES ON INORGANIC AND ORGANIC CONTAMINANT REMOVAL WITH SHALL
08/79 -FINAL REPORT COMPLETED

THE OBJECTIVES OF THIS RESEARCH PROJECT ARE TWO: (1) EVALUATE THE EFFECTIVENESS OF LOW AND HIGH PRESSURE REVERSE OSMOSIS SYSTEMS TO REMOVE ARSENIC, BARIUM, CADMIUM, CHROMIUM, LEAD, MERCURY, SELENIUM, SILVER, F LUORIDE, AND NITRATE FROM GROUND WATER; (2) DETERMINE THE ENERGY AND OTHER OPERATING COSTS OF EACH SYSTEM; AND (3) EVALUATE THE EFFECTIVENESS OF THE TWO SYSTEMS TO REMOVE ORGANIC PRECURSOR MATERIAL THAT FORMS TRIHALOMETHANES WHEN CHLORINATED. TWO FULL SCALE REVERSE OSMOSIS UNITS EACH PRODUCING ABOUT 40,000 GALLONS OF WATER PER DAY WILL BE SET UP IN PARALLEL OPERATION. RAW WATER FROM DEEP WELLS (1400-1800 IDS) AND SHALLOW WELLS (600-1000 TDS AND HIGHLY COLORED) WILL BE SPIKED WITH THE SPECIFIC CANTAMINANTS AND THE RAW, REJECT, AND PRODUCT WATER SAMPLED TO DETERMINE REMOVAL EFFICIENCIES. OPERATING COST RECORDS WILL BE ALSO MAINTAINED ON BOTH UNITS.

IMPROVED SCORING OF CHEMICAL TRANSFORMATION OF C3H/10T1/2 CELLS

START/ COMPL DATE : 10/77 - 09/80 : FUNDING : EST. - FY 77 / $ 270000
TASK/EPA CODE :H625F-7153 / R805208 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D WATERS
INVESTIGATORS : C HEIDELBERGER UNIV. OF SOUTHERN CALIFORNIA
S MONDAL UNIV. OF SOUTHERN CALIFORNIA
R F BAKER UNIV. OF SOUTHERN CALIFORNIA

MILE: 08/77 -PROJECT TO BE FUNDED

WE PLAN TO IMPROVE THE QUANTITATIVE ONCOGENIC TRANSFORMATION BY CHEMICAL CARCINOGENS AND SCORE FOR TRANSFORMATION AT EARLIER TIMES SO THAT THE SYSTEM CAN BE USEFUL AS A RAPID PRE-SCREEN FOR ENVIRONMENTAL POLLUTI ON. INDIVIDUAL COMPOUNDS, AS WELL AS MIXTURES, WILL BE STUDIED. THE USE OF SINGLE CELLS IN INDIVIDUAL DISHES AS THE BASIC SYSTEM WILL BE IMPROVED, AND THE INHIBITORY INFLUENCE OF CELL DENSITY ON TRANSFORMATION FREQUENCY WILL BE ACCURATELY QUANTITATED. TRANSFORMED C3H/10T1/2 CELLS HAVE A DIFFERENT MORPHOLOGY IN THE SCANNING ELECTRON MICROSCOPE. THIS PROPERTY WILL BE USED TO DEVELOP AN ALTERNATIVE ASSAY FOR TRANSFORMATION AND TO DETERMINE AT WHAT TIME AFTER CARCINOGEN TREATMENT CELLS BECOME TRANSFORMED.

ENVIRONMENTAL CONTAMINANTS - EFFECTS ON TUMOR GROWTH AND IMMUNITY

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 105475
TASK/EPA CODE :D607A-027 / R805210 (GRANT) PRIOR FY / 1
PROJECT OFFICER : P HEFFERNAN
INVESTIGATORS : L D KOLLER OREGON STATE HIGHER EDUC. SYS
N I KERKVLIET OREGON STATE HIGHER EDUC. SYS

MILE: 09/77 -PROJECT BEGAN
03/79 -EFFECTS OF CD ON TUMOR GROWTH & IMMUNITY COMPLETE
08/80 -EFFECTS OF AS ON TUMOR GROWTH & IMMUNITY COMPLETE

TO DETERMINE THE EFFECTS OF CADMIUM AND ARSENIC ON THE IMMUNE RESPONSE OF ANIMALS TO A GROWING TUMOR AND TO DETERMINE THE EFFECTS OF CONTAMINANT-INDUCED IMMUNE ALTERATION ON THE INCIDENCE AND GROWTH RATE OF TUMORS IN INTOXICATED ANIMALS. SEVERAL PARAMETERS OF IMMUNITY WILL BE ASSESSED, INCLUDING LYMPHOCYTE-MEDIATED CYTOTOXICITY, LYMPHOKINE PRODUCTION, AND SERUM BLOCKING ACTIVITY, IN ORDER TO DETERMINE THE SITE OF ACTION OF THE CONTAMINANT ON IMMUNE RESPONSES TO TUMOR GROWTH.

MANUAL OF WATER WELL MAINTENANCE AND REHABILITATION TECHNOLOGY

START/ COMPL DATE : 07/77 - 06/79 : FUNDING : EST. - FY 77 / $ 91848
TASK/EPA CODE :L6098-18 / R805211-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M R SCALF
INVESTIGATORS : J H LEHR NATL. WATER WELL ASSOCIATION
H HEISS NATL. WATER WELL ASSOCIATION
MILE: 07/79 -MANUAL OF WATER WELL MAINTENANCE AND REHABILITATION
OBJECTIVES: TO DEVELOPMENT OF A MANUAL ON WATER WELL REHABILITATION AND MAINTENANCE TECHNOLOGY THAT WOULD DESCRIBE IN DETAIL THE FACTORS THAT WOULD AFFECT WELL PROBLEMS AND THE TECHNOLOGY AND METHODOLOGY OF WELL SERVICING. APPROACH: A) SURVEY OF LITERATURE RELATING TO WATER WELL AND PETROLEUM AND GAS WELL TECHNOLOGY, B) SURVEY NWWA MEMBERSHIP FOR WELL MAINTENANCE AND REHABILITATIVE METHODS COMMONLY USED AND HIGHLIGHT INNOVATIVE TECHNOLOGY, C) EVALUATE PROCEDURES USED BY COMPANIES WHO SPECIALIZE IN WELL MAINTENANCE AND REHABILITATION, D) EVALUATE METHODS USED BY PETROLEUM INDUSTRY TO DETERMINE APPLICABILITY TO WATER WELL INDUSTRY, E) FIELD TESTING OF NEW METHODOLOGIES AND EQUIPMENT TO INSURE VALIDITY OF PERFORMANCE CLAIMS.

A COMPARATIVE SELECTIVITY STUDY OF THE NITROGEN OXIDE ELECTRODE AND THE SOLID STATE NITRATE ELECTRODE FOR DETERMINATION OF NITRATE

START/ COMPL DATE : 09/77 - 03/79 : FUNDING : EST. - FY 77 / $ 47880
TASK/EPA CODE :A612A-02 / R805212-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M GALES
INVESTIGATORS : R F WILSON TEXAS SOUTHERN UNIVERSITY
MILE: 07/78 -COMPLETE EVAL. OF NITROGEN OXIDE AND SOLID STATE NITRATE ELECTR
12/78 -COMPLETE ENVIRONMENTAL SAMPLE ANALYSIS
12/79 -FINAL REPORT

THE PRIMARY OBJECTIVE OF THIS PROPOSED STUDY IS TO EVALUATE THE SEL ECTIVITY OF THE NITROGEN OXIDE AND THE NITRATE ION SELECTIVE ELECTRODES BY INVESTIGATING POTENTIAL INTERFERENCES OF OTHER IONS. THE DATA AND PERCENTA GE EFFICIENCY OBTAINED USING THE NITROGEN OXIDE SELECTIVE ELECTRODE, AFTER A CADMIUM REDUCTION OF NITRATE TO NITRITE, WILL BE COMPARED WITH THOSE OBTAINED USING THE NITRATE ION SELECTIVE ELECTRODE FOR WATER AND WASTE W ATER SAMPLES. UPON COMPLETION OF THE COMPARATIVE STUDY OF THE EXPERIMENTAL VARIABLES THAT AFFECT THE ELECTRODES, A METHOD FOR THE DETERMINATION OF NITRATE USING THE ELECTRODE THAT GIVES THE BEST ACCURACY WILL BE PROPOSED AND ITS VALIDITY TESTED ON WATER AND WASTE WATER SAMPLES. THE SUCCESSFUL COMPLETION OF THIS PROJECT SHOULD PROVIDE A RESERVOIR OF USEFUL DATA ON THE QUANTITATIVE DETERMINATION OF NITRATE NITROGEN VALUES.

A COMPARATIVE SELECTIVITY STUDY OF THE NITROGEN OXIDE ELECTRODE AND THE SOLID STATE NITRATE ELECTRODE FOR DETERMINATION OF NITRATE

START/ COMPL DATE : 10/77 - 10/79 : FUNDING : EST. - FY 77 / $ 28000
TASK/EPA CODE : A625C-20 / R805212-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : M E GALES

INVESTIGATORS : R F WILSON

TEXAS SOUTHERN UNIVERSITY

THE OBJECTIVE OF THIS STUDY IS TO EVALUATE THE NITRATE ELECTRODES AND OPTIMIZE CONDITION FOR THE ANALYSIS OF NITRATE IN A VARIETY OF WATER AND WASTE WATER SAMPLES. THE COMPLETION OF THIS RESEARCH SHOULD PROVIDE EPA WITH A SELECTIVE, EFFICIENT AND ECONOMICAL METHOD FOR THE QUANTITATIVE DETERMINATION OF NITRATE.

CROSS TRANSMISSION OF GIARDIA

START/ COMPL DATE : 02/77 - 01/78 : FUNDING : EST. - FY 77 / $ 29300
TASK/EPA CODE :D6148-037 / R805215-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T H ERICKSEN
INVESTIGATORS : C P HIBLER COLORADO STATE UNIVERSITY
R B DAVIES COLORADO STATE UNIVERSITY

MILE: 05/78 -REPORT
IN SEVERAL INSTANCES THE SOURCE OF ACUTE GIARDIOSIS IN MAN HAS BEEN TRACED TO WATER SUPPLIES, BUT THE SOURCE OF THE WATER CONTAMINATIONS IS RARELY DISCOVERED. WILD OR DOMESTIC ANIMALS OFTEN HAVE BEEN SUSPECTED OF CONTAMINATING THE WATER. GIARDIA HAS BEEN FOUND IN SEVERAL FREE-RANGING MAMMALS BUT IT IS NOT KNOWN IF THESE WILL CAUSE INFECTION IN MAN. THEREFORE, ISOLATES OF HUMAN GIARDIA LAMBLIA WILL BE GIVEN TO AS MANY SPECIES OF WILD AND DOMESTIC ANIMALS AS POSSIBLE (AT LEAST 22 SPECIES AND POSSIBLY AS MANY AS 33). ADDITIONAL CROSS TRANSMISSION STUDIES WILL BE DONE BY INFECTING AS MANY OF THE 33 SPECIES AS POSSIBLE WITH GIARDIA RECOVERED FROM ANY FREE-RANGING OR DOMESTIC ANIMAL. AS HUMAN GIARDIA WILL INFECT DOGS, SPECIFIC PATHOGEN FREE (SPF) BEAGLE PUPPIES WILL BE USED TO SCREEN ALL POSITIVE SPECIES. IF THE PUPPIES BECOME POSITIVE FOR GIARDIA, IT WILL BE ASSUMED THAT ANIMAL GIARDIA WILL INFECT HUMANS. SUBSEQUENT PROOF (HUMAN INFECTIONS) MUST BE UNDERTAKEN BY A MEDICAL SCHOOL OR THE NATIONAL CENTER FOR DISEASE CONTROL OR THE ENVIRONMENTAL PROTECTIO

WET/DRY COOLING TOWER TEST MODULE PROGRAM

START/ COMPL DATE : 08/77 - 07/78 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :F624A-043 / R805220 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T G BRNA
INVESTIGATORS : W C MARTIN SOUTHERN CALIF. EDISON COMPAN
T P FITZPATRICK SOUTHERN CALIF. EDISON COMPAN

MILE: 09/77 -COMPLETION OF CONSTRUCTION OF COOLING TOWER TEST MODULE
10/77 -START OF COOLING TOWER TEST PROGRAM
10/78 -COMPLETION OF COOLING TOWER TEST PROGRAM
04/79 -PUBLICATION OF FINAL REPORT FOR WET/DRY COOLING TEST MODULE PRO

OBJECTIVES: IN THIS MULTI-SPONSORED PROJECT, THE PROGRAM OBJECTIVES ARE: A. TO DETERMINE THE WATER CONSERVATION AND OPERATIONAL CHARACTERISTICS OF THE WET/DRY COOLING TOWER TEST MODULE IN AN ELECTRICAL POWER PLANT SITUATION, AND B. TO DEVELOP AND CONFIRM A MATHEMATICAL MODEL FOR A CCURATELY DESCRIBING AND PREDICTING THE PERFORMANCE OF THE WET/DRY COOLING SYSTEM. APPROACH: A FULL-SIZE WET/DRY COOLING TOWER CELL WILL BE INST ALLED AND TESTED AT A PLANT SITE OVER A ONE-YEAR PERIOD. TEST DATA WILL BE USED TO CONFIRM THE MATHEMATICAL MODEL. OUTPUTS: TEST MODULE, COOLING S YSTEM AND AMBIENT DATA WILL BE COLLECTED DURING THE TESTING PHASE WHICH IS SCHEDULED FOR COMPLETION IN OCTOBER 1978. THESE DATA WILL BE I NCLUDED IN THE COMPREHENSIVE REPORT FOR THE TEST PROGRAM, THE REPORT TO BE COMPLETED IN APRIL 1979.

DEVELOP TAPERED ELEMENT OSCILLATING MICRO BALANCE (TEOM) FOR AMBIENT MASS MEASUREMENT

START/ COMPL DATE : 08/77 - 08/80 : FUNDING : EST. - FY 77 / $ 19040
TASK/EPA CODE :G712B-BE-47 / R805222-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C LEWIS
INVESTIGATORS : H PATASHNICK DUDLEY OBSERVATORY
G RUPPRECHT DUDLEY OBSERVATORY

MILE: 06/77 -PHOTOTYPE COMPLETED

OBJECTIVES: TO DEVELOP AN INSTRUMENT FOR REAL-TIME MEASUREMENT OF AMBIENT AEROSOL MASS ASSOCIATED WITH RESPIRABLE AEROSOL PARTICLES. APPROACH: A NEWLY DEVELOPED DEVICE - TAPERED ELEMENT OSCILLATING MICROBALANCE (TEOM) - SIMILAR TO A CLASSICAL QUARTZ CRYSTAL MICROBALANCE, BUT WITHOUT MANY OF THE LATTER'S PROBLEMS, WILL BE MATED TO A DICHOTOMOUS VIRTUAL IMPACTOR. THE IMPACTOR SEGREGATES PARTICLES WHOSE AERODYNAMIC DIAMETER IS LESS THAN 3.5 MICRONS, AND WHOSE ACCUMULATED MASS IS SUBSEQUENTLY ME ASURED WITH THE TEOM. CURRENT PLANS/PROGRESS: WORK IS EXPECTED TO BEGIN BY AUGUST 1977. DURING THE FIRST YEAR OF WORK A TEOM ESPECIALLY SUITED TO INCORPORATION IN A DICHOTOMOUS IMPACTOR WILL BE DEVELOPED. A COMPLETED TEOM-IMPACTOR SYSTEM IS EXPECTED TO BE AVAILABLE AND LABORATORY TESTED BY THE END OF THE SECOND YEAR.

1978 NATIONAL CONFERENCE ON CONTROL OF HAZARDOUS MATERIAL SPILLS

START/ COMPL DATE : 03/77 - 04/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :B610A-491 / R805223-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : I WILDER
INVESTIGATORS : D USHER HAZARDOUS MTL. CONT. RES. INS
M SHAYE HAZARDOUS MTL. CONT. RES. INS

MILE: 03/77 -FUNDING PACKAGE SUBMITTED
03/77 -AWARD FUNDS FOR PROJECT
04/78 -HOLD 1978 NATIONAL HAZARDOUS SPILLS CONFERENCE

A CONFERENCE WILL BE CONVENED IN MARCH 1978 ON CONTROL AND PREVENTION OF HAZARDOUS MATERIAL SPILLS. THE TOPICS TO BE PRESENTED INCLUDE; LEGISLATION AND REGULATIONS; CLEAN-UP SYSTEMS; INTERNATIONAL PROGRAMS; CONTINGENCY PLANNING; PREVENTION; GOVERNMENT POLICIES AND PROGRAMS; PERSONNEL SAFETY; SPILL RETRIEVAL DATA SYSTEMS; ULTIMATE DISPOSAL; DETE CTION-MONITORING-REPORTING; RESPONSE CAPABILITIES; RISK ANALYSIS; CASE HIS TORIES; EFFECTS AND IMPACTS; SPILL MOVEMENT; RESEARCH AND DEVELOPMENT; AND TRAINING.

"THIRTY-THREE TONS PER ACRE," A 23 MINUTE, 16MM SOUND FILM IN COLOR

START/ COMPL DATE : 05/77 - 07/78 : FUNDING : EST. - FY 77 / $ 52007
TASK/EPA CODE :L617A-03 / R805226 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A G HORNSBY
INVESTIGATORS : R MORGAN UNKNOWN INST. OR INDIV. GRANT
MILE: 08/78 -FILM MASTER

"THIRTY-THREE TONS PER ACRE," IS AN INSTRUCTIONAL FILM FOR FARMERS AND IRRIGATORS ABOUT TOPSOIL EROSION ON IRRIGATED FARMLAND. THE PURPOSE OF THE FILM IS TO PROMOTE THE USE OF IRRIGATION METHODS AND CULTURAL PRACTICES THAT ARE EFFECTIVE IN CONTROLLING FURROW EROSION AND THE POLLUTION OF RECEIVING STREAMS. THE FILM IS TWENTY-THREE MINUTES LONG AND IN COLOR WITH SOUND. THE WORKING TITLE, THIRTY-THREE TONS PER ACRE, IS A REFERENCE TO THE AMOUNT OF SEDIMENT ERODED FROM A SINGLE FIELD SHOWN IN THE FILM DURING THE COURSE OF ONE IRRIGATING SEASON. THE PRIMARY TARGET AUDIENCE TO WHICH THE FILM IS DIRECTED IS MADE UP OF FARMERS, IRRIGATORS, IRRIGATION DISTRICTS, CANAL COMPANIES, AND AGRI-BUSINESS INTERESTS. A SECONDARY TARGET AUDIENCE IS COMPOSED OF REPRESENTATIVES OF GOVERNMENTS, PRIVATE AND PUBLIC FINANCIAL INSTITUTIONS, AND AGRICULTURAL RESEARCH AND DESIGN CONCERNS. THE FILM HAS FOUR MAJOR OBJECTIVES: 1) TO INFORM THE TARGET AUDIENCE OF THE MAGNITUDE AND SIGNIFICANCE OF TOPSOIL LOSS AND RECEIVING STREAM POLLUTION DUE TO SURFACE IRRIGATION, 2) TO DEMONSTRATE INDIVIDUAL FINANCIAL LOSS RESULTING FROM IRRIGATION RELATED TOPSOIL EROSION, 3) TO STIMULATE FARMERS AND IRRIGATORS TO USE AVAILABLE TECHNOLOGY TO ESTABLISH EROSION CONTROL IRRIGATION PROGRAMS, 4) TO INFORM THE TARGET AUDIENCE OF CURRENT RESEARCH AND DEVELOPMENT IN EROSION CONTROL IRRIGATION METHODS AND TO ENCOURAGE RECEPTIVE ATTITUDES TOWARD IMPROVED IRRIGATION TECHNOLOGY.

SULFUR DIOXIDE OXIDATION IN SCRUBBER SYSTEMS

START/ COMPL DATE : 07/77 - 06/79 : FUNDING : EST. - FY 77 / $ 79641
TASK/EPA CODE :F624A-046 / R805227-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R H BORGWARDT
INVESTIGATORS : J L HUDSON UNIV. OF VIRGINIA
MILE: 09/77 -CONSTRUCT REACTOR AND ASSEMBLE APPARATUS
11/77 -LOW LEVEL CATALYST STUDIES IN FLOW REACTOR
02/78 -BISULFITE OXIDATION IN BATCH REACTOR
06/78 -BISULFITE OXIDATION WITH MULTIPLE CATALYSTS
09/78 -EFFECT OF OXIDATION INHIBITORS
10/78 -CONCENTRATION EFFECTS
09/78 -DEVELOP MODEL FOR OXIDATION IN SLURRIES
06/79 -VERIFY MODEL
08/79 -FINAL REPORT

OBJECTIVES: 1) TO INVESTIGATE THE EFFECT OF CONTROLLABLE SYSTEM PARAMETERS IN LIME/LIMESTONE SCRUBBING SYSTEMS IN ORDER TO SUGGEST METHODS OF LIMITING OXIDATION TO PERMIT UNSATURATED OPERATION, SYSTEM PARAMETERS INCLUDE THE CONCENTRATION AND TYPE OF INHIBITORS AND CATALYSTS AS WELL AS PHYSICAL FACTORS WHICH CONTROL MASS TRANSFER, 2) TO INVESTIGATE THE POSSIBILITY OF MAXIMIZING THE EFFICIENCY OF OXIDATION IN A HOLD TANK WHEN OXIDATION IS FORCED BY AERATION, FACTORS IMPORTANT HERE ARE MASS TRANSFER (PARTICULARLY AS INFLUENCED BY AIR BUBBLE SIZE AND CONTACT TIME) AND THE KINETICS OF THE OXIDATION REACTION. APPROACH: CHEMICAL KINETICS AND MASS TRANSFER WILL BE STUDIED IN BOTH CLEAR SOLUTIONS AND SLURRIES USING STIRRED REACTORS AND FLOW REACTORS IN BENCH SCALE EQUIPMENT. THE RESULTS WILL BE INCORPORATED INTO A MATHEMATICAL MODEL TO PRODUCE METHODS OF MINIMIZING OR MAXIMIZING OXIDATION IN SCRUBBERS. PLANS: CONSTRUCT REACTOR AND ASSEMBLE APPARATUS, STUDY OXIDATION OF BISULFITE AT PH 4-6 IN FLOW REACTOR AND BATCH REACTOR WITH SINGLE AND MULTIPLE CATALYSTS. EVALUATE OXIDATION INHIBITORS, STUDY OXIDATION OF SULFITE WITH HIGH CATALYST CONCENTRATIONS, DEVELOP MODEL FOR OXIDATION IN SLURRIES INCLUDING MASS TRANSFER AND KINETICS.

THE USE OF ELECTROSTATICALLY CHARGED FOG FOR CONTROL OF DUST FROM OPEN SOURCES

START/ COMPL DATE : 06/77 - 06/79 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :F623A-34 / R805228 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D C DREHMEL
INVESTIGATORS : S A HOENIG UNIV. OF ARIZONA
MILE: 06/77 -GRANT AWARD
06/78 -COMPLETE LABORATORY STUDY OF CONTROLLING PARAMETERS
06/79 -COMPLETE FIELD TESTS

OBJECTIVE: TO CONTINUE THE STUDIES OF INDUSTRIAL DUSTS AND FUMES AND THE DEVELOPMENT OF APPARATUS FOR INDUCING THESE POLLUTANTS TO AGGLOMERATE AND FALLOUT. ALSO TO INVESTIGATE THE PHENOMENA INVOLVED IN DUST/FUME CHARGING WITH THE HOPE OF PROVIDING BETTER DUST CONTROL SYSTEMS.
APPROACH: THE STUDIES WILL BE PRIMARILY EXPERIMENTAL AND WILL GENERATE THE APPROPRIATE DUSTS AND FUMES UNDER CONTROLLED CONDITIONS TO DETERMINE THE PARAMETERS INVOLVED IN CHARGING PHENOMENA. UNIVERSITY OF ARIZONA WILL MAKE APPROPRIATE INDUSTRIAL MEASUREMENTS AND STUDIES TO EVALUATE CHARGING AND DUST CONTROL TECHNIQUES IN THE FACTORY ENVIRONMENT. CURRENT STATUS: UNIVERSITY OF ARIZONA HAS INVESTIGATED THE CHARGING BEHAVIOR OF A VARIETY OF DUSTS AND FUMES. MOST MATERIALS SEEM TO HAVE NEGATIVE CHARGES, AT LEAST FOR THE RESPIRABLE MATERIAL, BUT THERE ARE SOME NOTABLE EXCEPTIONS, I.E., MAGNETITE. IT HAS BEEN DEMONSTRATED THAT THESE DUSTS AND FUMES CAN BE INDUCED TO AGGLOMERATE AND FALLOUT WHEN EXPOSED TO PRO PERLY CHARGED WATER FOG. A NUMBER OF INDUSTRIAL TESTS ARE UNDERWAY TO TEST PROTOTYPE FOG GENERATORS AS MECHANISMS FOR DUST CONTROL. UNIVERSITY OF ARIZONA HAS DONE SOME PRELIMINARY WORK ON CONTROL OF POWER PLANT FLY ASH AND COAL TAR VOLATILES (FROM COKE OVENS). HERE AGAIN IT APPEARS THAT THE CHARGED FOG SYSTEM HAS SIGNIFICANT POTENTIAL AS A CONTROL TECHNIQUE.

ANALYSIS OF NUTRIENT AND TOXIC CHEMICAL FLUXES IN GREAT LAKES SEDIMENT

START/ COMPL DATE : 03/77 - 03/80 : FUNDING : EST. - FY 77 / $ 124253
TASK/EPA CODE :N608A-009 / R805229 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W L RICHARDSON
INVESTIGATORS : D M DITORO MANHATTAN COLLEGE
J S JERIS MANHATTAN COLLEGE
W MATYSTIC MANHATTAN COLLEGE

MILE: 03/78 -FINALIZE QUANTITATIVE FRAMEWORK FOR MASS TRANSPORT IN SED.
06/79 -APPLICATION OF FRAMEWORK TO LAKE ERIE EUTROPHICATION
12/79 -INCORPORATE TOXIC SUBSTANCES IN MODEL
03/80 -CONTINUE VERIFICATION AND IMPROVEMENT OF GREAT LAKE EUTROPHICAT
06/80 -PREPARE FINAL PROJECT REPORT

THE ANALYSIS OF NUTRIENT AND TOXIC CHEMICAL FLUXES IN SEDIMENT REQUIRE A SET OF MATHEMATICAL EQUATIONS WHICH DESCRIBE BOTH THE MASS TR ANSPORT OF THE MATERIAL VIA THE DISPERSION OF THE PORE WATERS AND THE DISS OLVED SPECIES AND THE SOLID PHASES OF THE SEDIMENT. IN ADDITION, IT IS NEC ESSARY TO FORMULATE AND TEST THE PROPER CHENICAL MODELS WHICH DESCRIBE THE INTERACTIONS BETWEEN THE DISSOLVED SPECIES AND SOLID PHASES, WHETHER THEY BE PRECIPITATIONS/DISSOLUTIONS OR ADSORPTIONS/DESOR PTIONS. IT IS THESE UNDERLYING THEORETICAL PROBLEMS AND THEIR APPLICATIONS TO GREAT LAKES PROBLEM SETTINGS WHICH ARE THE SUBJECT OF THE PROPO SED RESEARCH. THE GENERAL APPROACH WILL BE TO FORMULATE THE MASS TRANSPORT EQUATIONS TOGETHER WITH THE REVERSIBLE REACTIONS IN A GENERAL WAY. THE EQUATIONS WILL BE TRANSFORMED INTO A SET OF MUCH SMALLER AND SIMPLER EQUATIONS WHICH DO NOT EXPLICITLY CONTAIN THE REVERSIBLE REACTION KINETIC TERMS WHICH CAUSE COMPUTATIONAL DIFFICULTIES. THE TRANSFORMED EQUATIONS CAN THEN BE SOLVED NUMERICALLY OR ANALYTICALLY IN A SIMPLE AND S TRAIGHTFORWARD MANNER AND THE CHEMICAL EQUILIBRIA CALCULATIONS CAN ALSO BE DONE IN A STRAIGHTFORWARD MANNER USING CHEMICAL EQUILIBRIUM.

DEVELOPMENT OF IMPROVED ENUMERATION METHODS BASED ON PHYSIOLOGICAL STUDIES OF INDICATOR BACTERIA DEBILITATION IN NATURAL WATERS

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 52000
TASK/EPA CODE : A612A-40 / R805230-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R BORDNER
INVESTIGATORS : D G STUART MONTANA STATE UNIVERSITY
J E SCHILLINGER MONTANA STATE UNIVERSITY
G A MCFETERS MONTANA STATE UNIVERSITY

MILE: 10/78 -PRELIMINARY REPORT
10/79 -FINAL REPORT

AQUATIC INJURY AND STRESS WILL BE INVESTIGATED IN FECAL AND NON-FECAL ESCHERICHIA COLI. PHYSIOLOGICAL STUDIES OF CELL FUNCTIONS WILL BE PERFORMED TO DETERMINE THE MODE OF ACTION OF BACTERIAL DEBILITATI ON. THIS INFORMATION WILL BE USED TO IMPROVE OR DEVISE ENUMERATION METHODS FOR BACTERIAL INDICATORS. EFFORTS WILL ALSO BE MADE TO RELATE DIFFERENT DEBILITATION POTENTIALS OF AQUATIC ENVIRONMENTS TO THEIR BIOPHYSICAL OR BIOCHEMICAL CAUSES. IMPROVED BACTERIAL INDICATOR METHODS WILL BE USED TO SHED LIGHT ON BACTERIAL COUNT COMPARISONS, BACTERIAL DIE-OFF RATES IN STREAMS PATHOGEN-INDICATOR CORRELATIONS, AND MAY LEAD TO NEW PATHOGEN RECOVERY TECHNIQUES AND STUDIES OF THE INFECTIVITY AND PATHOGENICITY OF STRESSED BACTERIA.

The development and application of identification and detection technology is proposed for evaluating the genetics of baculoviruses pesticides for recombination and mutation. This is being accomplished by use of restriction endonuclease fragment analysis, SDS-polyacrylamide gel electrophoresis and radioimmunoassay. With such techniques the ability to identify and monitor for baculovirus-host interaction and potential to undergo genetic change can be accomplished.

ARSENIC & SELENIUM IN INDUSTRIAL & DOMESTIC EFFLUENTS - APPLICABILITY OF
THE PARR ACID DIGESTION BOMB TECHNIQUE FOR SAMPLE PRETREATME
START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 42306
TASK/EPA CODE :A6228-03 / R805237-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M GALES
INVESTIGATORS : J T KINARD BENEDICT COLLEGE
MILE: 09/78 -EVALUATE FIVE METHODS FOR ARSENIC AND SELENIUM
06/79 -TEST SELECTED AND MODIFIED METHOD ON INDUSTRIAL SAMPLES
08/79 -DRAFT FINAL REPORT
09/79 -FINAL REPORT

THIS RESEARCH COMPRISES A COMPARATIVE STUDY OF A NUMBER OF LEADING METHODS FOR THE DETERMINATION OF ARSENIC AND SELENIUM, AND SERVES TO DEMONSTRATE THE APPLICABILITY OF EACH FOR COMPLEX MATRICES THAT EXIST FOR SAMPLES SUCH AS INDUSTRIAL AND DOMESTIC EFFLUENTS. BY UTILIZING THE TECHNIQUES OF FLAME AND FLAMELESS ATOMIC ABSORPTION SPECTROPHOTOMETRY IT SHOULD BE POSSIBLE TO EFFECT THE APPRAISAL OF VARIOUS SAMPLE PRETREATMENT PROCEDURES INCLUDING THE PARR ACID DIGESTION BOMB TECHNIQUE FOR THE DETERMINATION OF TOTAL ARSENIC AND SELENIUM IN EFFLUENTS CHARGED WITH A VARIETY OF THEIR ORGANIC AND INORGANIC SPECIES. AT THE CONCLUSION OF THIS INVESTIGATION THE MOST APPLICABLE HYDRIDE GENERATION-FLAME ATOMIC ABSORPTION S PECTROPHOTOMETRIC METHOD FOR DETERMINING ORGANIC AND INORGANIC ARSENIC AND SELENIUM IN AN INDUSTRIAL DOMESTIC-EFFLUENT MATRIX WILL HAVE BEEN IDENTIFIED. IN ADDITION, THE ADVANTAGES OF THIS METHOD AND THE GRAPHITE FU RNACE METHOD, WHEN EMPLOYED FOR ROUTINE DETERMINATION OF TOTAL ARSENIC AND SELENIUM IN EFFLUENTS, WILL HAVE BEEN DETERMINED AND COMPARED. ALTHOUGH THIS INVESTIGATION IS HIGHLY SPECIFIC, IT ADDRESSES THE DETERMINATION OF TWO ELEMENTS THAT HAVE TOXICOLOGICAL AND PERHAPS CARCINOGENIC CHARACTERISTICS, AND EXIST IN FORMS THAT HAVE ELUDED TOTAL ANALYTICAL CHARACTERIZATION.

NEW RESIDENTIAL DEVELOPMENTS AND THE QUANTITY AND QUALITY OF RUNOFF

START/ COMPL DATE : 07/77 - 11/78 : FUNDING : EST. - FY 77 / $ 52117
TASK/EPA CODE :C611A-7102 / R805238 (GRANT) PRIOR FY / 1

S J ROBINSON META SYSTEMS INCORPORATED
P ROGERS META SYSTEMS INCORPORATED
M SHAPIRO META SYSTEMS INCORPORATED

MILE: 07/77 -START NEW COMMUNITY PLANNING STUDY
08/78 -SUBMIT PLANNING GUIDELINE

THE OBJECTIVE OF THE WORK IS THE DETERMINATION OF THE FEASIBILITY OF DEVELOPING SIMPLE PRODUCTION FUNCTIONS AND COST FUNCTIONS FOR CONTROL OF RUNOFF AND RESIDUALS ASSOCIATED WITH NEW RESIDENTIAL DEVELOPMENTS. THERE A RE SIX TASKS: 1. ESTIMATING RESIDUALS ACCUMULATION RATES AND ASSESSING THE RELATIONSHIP BETWEEN ACCUMULATION AND WASH OFF RATE. 2. IDENTIFYING OPTIONS FOR CONTROLLING STORM WATER QUALITY AT THE SUBDIVISION LEVEL. 3. EVALUATING METHODS FOR OBTAINING COST ESTIMATES (AND FUNCTIONS) FOR C ONTROL OPTIONS. 4. EVALUATING COMMONLY USED HYDROLOGIC EVENTS AND PLANNING EVENTS USED IN SELECTING CONTROL OPTIONS AND SIZING CONTROL STRUCTURES. 5. REVIEWING THE USE OF RAINFALL-RUNOFF SIMULATION MODELS AS DATA GENERATORS. 6. DEVELOPING AN APPROACH TO CONSTRUCTING SIMPLE PRODUCTION FUNCTIONS AND COST FUNCTIONS.

CONTINUOUS TWIN SCREW ACID HYDROLYSIS REACTOR DEVELOPMENT AND
OPTIMIZATION FOR ONE-TON DAY WASTE CELLULOSE GLUCOSE PILOT PL

START/ COMPL DATE : 06/77 - 06/80 : FUNDING : EST. - FY 77 / $ 212500
TASK/EPA CODE :C624B-7043 / R805239-01 (GRANT) PRIOR FY76 / $ 630001
PROJECT OFFICER : C ROGERS
INVESTIGATORS : W BRENNER NEW YORK UNIVERSITY
B RUGG NEW YORK UNIVERSITY

MILE: 06/77 -GRANT AWARDED
07/77 -IDENTIFY ALL PERTINENT ACID HYDROLYSIS EQUIPMENT
09/77 -PROCUREMENT AND INSTALLATION
06/78 -OPTIMIZATION OF OPERATING CONDITIONS
06/78 -PRODUCT QUALITY ANALYSIS
09/78 -SCALE TO 10 TPD OPERATION
06/79 -COMPLETE SCALED UP STUDIES
09/79 -FINAL REPORT

SOLID WASTE IS NOW RECOGNIZED AS BOTH A MAJOR PROBLEM AND A UNDERUTILIZED RENEWABLE RESOURCE FOR MATERIALS AND ENERGY RECOVERY, WHILE ACID HYDROLYSIS OF WASTE CELLULOSE IS POTENTIALLY VERY ATTRACTIVE BECAUSE CHEAP GLUCOSE WOULD BE A MOST USEFUL INTERMEDIATE FOR CHEMICALS AND ENERGY PRODUCTION, TECHNICAL PROBLEMS SUCH AS LOW GLUCOSE YIELDS AND LONG REACTION TIMES HAVE PREVENTED LARGE SCALE USAGE. EXPERIMENTS CARRIED OUT OVER THE LAST TWO YEARS AT NEW YORK UNIVERSITY HAVE DEMONSTRATED THAT SELECTED PRETREATMENT OF CELLULOSIC WASTES FOLLOWED BY A RAPID HIGH T EMPERATURE ACID HYDROLYSIS CAN READILY PRODUCE GLUCOSE YIELDS IN THE ORDER OF 50 PER CENT BASED ON THE AVAILABLE CELLULOSE CONTENT. EXPLOR ATORY STUDIES HAVE ALSO BEEN PERFORMED WITH A CONTINUOUS TWIN SCREW ACID H YDROLYSIS REACTOR. THE RESULTS STRONGLY SUPPORT THE TECHNICAL AND ECONOMIC VIABILITY OF THIS TYPE OF CONTINUOUS REACTOR FOR CARRYING OUT LARGE SCALE CONVERSION OF WASTE CELLULOSE TO GLUCOSE. A 3 YEAR PROGRAM OF EXPERIMENTAL INVESTIGATIONS IS HEREWITH PROPOSED ON THE ADDITIONAL DEVELOP MENT AND OPTIMIZATION OF THE CONTINUOUS TWIN SCREW ACID HYDROLYSIS REACTOR FOR THE ESTABLISHMENT AND OPERATION OF A ONE-TON/DAY WASTE CELLULOSE-GLUCOSE PILOT PLANT. THIS PROGRAM ENCOMPASSES; 1) THE IDENTIFIC ATION OF ALL PERTINENT ACID HYDROLYSIS EQUIPMENT; 2) PROCUREMENT AND INSTA LLATION; 3) OPTIMIZATION OF OPERATING CONDITIONS INCLUDING WASTE CELLULOSE FEED PREPARATION AND GLUCOSE RECOVERY; 4) PRODUCT QUALITY ANALYSIS; AND 5) DETERMINATION OF ENVIRONMENTAL IMPACT WITH MAXIMUM ENERGY CO NVERSION. FOR MOST EFFECTIVE UTILIZATION OF TIME AND MONEY, A PREVIOUSLY E VALUATED TWIN SCREW MACHINE WILL BE LEASED ON AN ANNUAL BASIS FOR THE ACID HYDROLYSIS REACTOR. INITIAL OPTIMIZATION WILL BE CARRIED OUT WITH WASTE NEWSPAPERS. THE EXPERIMENTAL WORK WILL BE SUPPLEMENTED BY A DETA ILED ECONOMIC COST ANALYSIS WITH SUBSEQUENT PROJECTIONS FOR VARIOUS LARGER PRODUCTION SCALE-UPS.

TREATMENT COMPATIBILITY OF MUNICIPAL WASTES AND BIOLOGICALLY HAZARDOUS INDUSTRIAL COMPOUNDS

START/ COMPL DATE : 07/77 - 07/79 : FUNDING : EST. - FY 77 / $ 174887
TASK/EPA CODE :L610F-17 / R805242 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T E SHORT
INVESTIGATORS : A F GAUDY OKLA. ST. UNIV.
D F KINCANNON OKLA. ST. UNIV.

MILE: 07/77 -START PROJECT
07/79 -COMPLETE PROJECT, FINAL REPORT WRITTEN

THE LIST OF INDUSTRIAL CHEMICALS PRESENTLY IDENTIFIED AS POTENTIALLY HAZARDOUS TO EFFLUENT QUALITY OF MUNICIPAL TREATMENT PLANTS IS RATHER LONG AND WILL PROBABLY GET LONGER, IT IS THE OBJECTIVE OF THIS RESEARCH TO DEVISE AND TEST METHODOLOGY FOR DETERMINING WHETHER VARIOUS LEVELS OF SUCH COMPOUNDS ARE COMPATIBLE WITH OR INTERFERE WITH THE TREATMENT OF MUNICIPAL WASTES BY THE ACTIVATED SLUDGE PROCESS, ANOTHER OBJECTIVE IS TO SCREEN COMPOUNDS FOR POTENTIAL INTERFERENCE AND/OR COMPATIBILITY. FOR EACH COMPOUND FULLY TESTED TWO LABORATORY SCALE CONTINUOUS FLOW PILOT PLANTS WILL BE FED SETTLED MUNICIPAL SEWAGE, AFTER ESTABLISHING IDENTICAL PERFORMANCE IN EACH SYSTEM ONE WILL SERVE AS A CONTROL WHILE THE OTHER WILL RECEIVE VARYING CONCENTRATIONS OF THE TEST COMPOUND IN ADDITION TO THE SEWAGE FEED, MANY TYPES OF ANALYTICAL DETERMINATIONS WILL BE EMPLOYED TO COMPARE BIOCHEMICAL PERFORMANCE AND SLUDGE SETTLEABILITY OF EACH SYSTEM, BATCH STUDIES USING BOTH SLUDGES WILL BE RUN TO DETERMINE IF IDENTICAL CONCLUSIONS AS TO COMPATIBILITY CAN BE DRAWN FROM BATCH AND CONTINUOUS FLOW PILOT PLANT STUDIES, SUCH COMPARISONS MAY LEAD TO MORE EASILY FACILITATED TESTING PROCEDURES, THE RESULTS OF THIS INVESTIGATION WOULD PROVIDE POSITIVE METHODS FOR MAKING REGULATORY DECISIONS REGARDING COMPATIBILITY AND/OR PRETREATMENT NEEDS.

The project is designed to organize and direct an International Conference on the Effects of Pollutants on High Risk Groups during the spring of 1978 at the University of Massachusetts, Amherst. Recognized authorities in the various areas will be invited to present their latest research concerning the identification and quantification of individuals at high risk to the toxic and/or carcinogenic effects of environmental/occupational pollutants. The following four specific objectives will be addressed:

1. The biological factors which predispose individuals to the toxic and/or carcinogenic effects of pollutants.

2. The role of high risk groups in both environmental and occupational standard setting.

3. The efficacy of screening tests.

4. Practical applications in environmental/occupational health policy.

(1) Objectives: (a) to remove aquatic plants from Lake Bomoseen thereby making the lake more attractive for water related recreation activity, and (b) to permanently remove excessive amounts of nutrients thereby significantly reducing the growth of aquatic plants in the future and improving both the chemical and aesthetic properties of the lake water.

(2) Approach: The Town of Castleton has purchased a weed harvesting machine which will be used to harvest aquatic plant growth during mid and late summer months. This application is for partial financial assistance for operating the machine for the first 3 years of the planned 5 year program.

(3) Plans/Progress: During the summer of 1975 the Town contracted with a private firm to harvest aquatic plant growth. The program was a great success and the lake property owners and the Vt. Dept. of Water Resources encouraged the Town to undertake a 5 year program to reduce nutrient loading. With the assistance of the Vt. Dept. of Water Resources which will conduct water quality studies/ monitoring, the Town plans on conducting two cuttings of the entire lake for a five year period.

DEVELOPMENT OF A MANUAL ON ALTERNATIVE IRRIGATION MANAGEMENT PRACTICES AND THEIR EFFECTS ON THE ENVIRONMENT IN THE CENTRAL PLAINS

START/ COMPL DATE : 07/77 - 12/78 : FUNDING : EST. - FY 77 / $ 78382
TASK/EPA CODE :L617A-04 / R805249-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A L WOOD
INVESTIGATORS : M W HALL UNIV. OF NEBRASKA
MILE: 12/78 -FINAL REPORT

THE OBJECTIVE OF THE PROPOSED PROJECT IS TO PRODUCE A MANUAL PROVIDING TECHNICAL GUIDANCE ON THE BEST AVAILABLE PRACTICES FOR CONTROLLING NON-POINT POLLUTION ASSOCIATED WITH IRRIGATION AGRICULTURE IN THE CENTRAL PLAINS. SPECIAL EMPHASIS WILL BE GIVEN TO THE IMPACT OF MANAGEMENT PRACTICES ON SUBSURFACE POLLUTION. THE MANUAL WILL CONSIDER: (1) THE IMPACT OF CURRENT PRACTICES IN IRRIGATION AGRICULTURE ON WATER POLLUTION, SPECIFICALLY NUTRIENTS, PESTICIDES AND SEDIMENT; (2) THE EFFECTS OF MANAGEMENT ALTERNATIVES TO CURRENT PRACTICES ON THE DISTRIBUTION OF THESE POLLUTANTS; AND (3) SOCIAL, LEGAL, INSTITUTIONAL, ECONOMIC AND PLANNING CONSIDERATIONS IN IMPLEMENTING MANAGEMENT ALTERNATIVES FOR CONTROL OF THESE POLLUTANTS IN IRRIGATION AGRICULTURE. INITIALLY, THE WORK WILL INVOLVE GATHERING EXISTING INFORMATION ON CURRENT PRACTICES AND PROCEDURES IN IRRIGATION AGRICULTURE IN RELATION TO NUTRIENT AND SEDIMENT LOSS. THE SECOND TASK WILL BE TO DEVELOP MANAGEMENT ALTERNATIVES TO CURRENT PRACTICES DESIGNED TO OPTIMIZE THE CONTROL OF POLLUTION FROM IRRIGATION AGRICULTURE. FOR EXAMPLE, THESE ALTERNATIVES MIGHT INCLUDE IRRIGATION SCHEDULING, WATER ALLOCATION, FERTILIZER APPLICATION SCHEDULING, CULTURAL MODIFICATIONS SUCH AS CONSERVATION TILLAGE, LAND SUITABILITY AND LAND USE CLASSIFICATION, AND THE ECONOMIC CONSIDERATIONS OF THESE ALTERNATIVES. THE THIRD PHASE OF THIS PROJECT WOULD ENCOMPASS THE DEVELOPMENT OF SOCIAL, LEGAL, INSTITUTIONAL, ECONOMIC AND PLANNING CONSIDERATIONS FOR ASSISTING IN THE IMPLEMENTATION OF THESE MANAGEMENT ALTERNATIVES.

CANCER CAUSING IMPLICATIONS OF WATER CHLORINATION

START/ COMPL DATE : 01/77 - 01/78 : FUNDING : EST. - FY 77 / $ 88382
TASK/EPA CODE :06148-045 / R805254-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L J MCCABE
INVESTIGATORS : G KUPCHIK CITY UNIVERSITY OF NEW YORK
M ALAVANJA CITY UNIVERSITY OF NEW YORK

MILE: 07/78 -REPORT

BASED ON PREVIOUS RESEARCH WHICH INDICATED THAT FEMALES RESIDING IN AREAS SERVICED BY CHLORINATED WATER HAD HIGHER RISKS OF DYING OF GASTROINTESTINAL AND URINARY TRACT CANCER THAN THEIR COUNTERPARTS RECEIVING NON CHLORINATED WATER, IN THIS 10 YEAR RETROSPECTIVE CASE-CONTROL STUDY WE WILL LOOK AT A LARGER POPULATION TO FURTHER EXAMINE THIS IMPLIED RELATIONSHIP AND TO SEE IF GASTROINTESTINAL AND URINARY TRACT CANCER MORTALITY CAN BE RELATED TO URBAN OR RURAL RESIDENCE, MEAN INCOME, POPULATION DENSITY, RAW WATER QUALITY, PH AND NITRATE CONCENTRATION AND COLOR OF THE FINISHED WATER.

805256

To rehabilitate Ellis Lake by applying herbicide chemicals to eliminate excessive growth of hydrilla, dredging bottom sediments to deepen the lake and eliminate nutrients, and diverting storm water flow from the lake and bringing in higher quality river water.

805257

The objective of this project is to hold a national Agri-medical conference the need for which has arisen from a growing concern about the impart of pesticide regulations upon agricultural production, environmental protection, public health and welfare, and the involvement and interrelationships of the respective state and federal agencies. The primary objective of the conference is to provide an increased awareness, understanding and communication among the public agencies concerned.

SOIL AND CROP MANAGEMENT SYSTEMS FOR TREATMENT, UTILIZATION, AND DISPOSAL OF MUNICIPAL WASTE WATER AND SLUDGES

START/ COMPL DATE : 06/77 - 05/79 : FUNDING : EST. - FY 77 / $ 133050

MILE: 05/78 -PROGRESS REPORT
05/79 -FINAL REPORT

A LONG-RANGE TRANSPORT MODEL SUITABLE TO KEEP TRACK OF POLLUTANTS AT DISTANCES FROM 10 TO THE SECOND POWER TO 10 TO THE THIRD POWER KM DOWNSTREAM OF LARGE INDUSTRIAL COMPLEXES IS UNDER DEVELOPMENT. IT IS THE PURPOSE OF THIS RESEARCH PROPOSAL TO MAKE OUR TRANSPORT MODEL MORE COMPREHENSIVE AND TO STUDY VERTICAL TRANSPORT PROCESSES OF POLLUTANTS. OUR OBJECTIVES IN THIS STUDY ARE: 1) REFINEMENT OF THE LAGRANGIAN TRAJECTORY MODEL, INCLUDING CHEMICAL TRANSFORMATION TERMS AND IMPROVING PRECIPITATION SCAVENGING TERMS BASED ON A CLOUD-MODELING STUDY; (2) CLOUD-MODELING STUDY TO INVESTIGATE THE VERTICAL TRANSPORT OF POLLUTANTS BY CONVECTIVE CLOUDS AND THE DISTRIBUTION OF POLLUTANTS IN CLOUD AIR AND CLOUD WATER DROPLETS; 3) INCORPORATION INTO OUR MODEL OF POLLUTION TRANSPORT BY "DRY" CONVECTION INTO THE LAYERS ABOVE THE MEAN MIXING LAYER HEIGHT.

DESIGN AND PERFORMANCE OF HEAD-OF-HOLLOW FILLS--A SURFACE MINING &
RECLAMATION METHOD

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 67000

07/79 -AWARD CONTINUATION
07/80 -FINAL REPORT RECEIVED

THE OBJECTIVE IS TO DESIGN AND CONSTRUCT HEAD-OF-HOLLOW FILLS USING ECONOMIC ENGINEERING CRITERIA AND TO DETERMINE THE EFFECTS OF THIS M INING/RECLAMATION METHOD ON THE ENVIRONMENT. THE STUDY INVOLVES MONITORING ENVIRONMENTAL PARAMETERS PRIOR TO DISTRIBUTION, DURING DISTURBANCE, AND A FTER COMPLETION OF CONSTRUCTION. THE PROGRAM WILL INVOLVE HILL-TOP REMOVAL AND VALLEY FILLS, EACH OF VARYING DESIGN. COST ANALYSES WILL BE CONDUCTED FOR EACH FILL DESIGN. SOILS ENGINEERING PARAMETERS INCLUDING SETTLEMENT AND STABILITY WILL BE DETERMINED AND ANALYZED DURING AND AFTER CONSTRUCTION.

VENTILATORY RESPONSES OF FISH TO FLUCTUATING APPLICATIONS OF TOXICANTS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 49525
TASK/EPA CODE :N608A-090 / R805274-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W B HORNING
INVESTIGATORS : J CAIRNS VIRGINIA POLY. INST. & ST. U.

W H VANDERSCHALIE VIRGINIA POLY. INST. & ST. U.

MILE: 07/78 -FINAL REPORT

MUCH OF THE PUBLISHED INFORMATION ON THE EFFECTS OF TOXICANTS ON AQUATIC LIFE HAS BEEN DERIVED FROM EXPERIMENTS WHICH EXPOSED ORGANISMS TO CONSTANT TOXICANT LEVELS, EVEN THOUGH FEW TOXICANT SOURCES, SUCH AS INDUSTRIAL EFFLUENTS, STAY AT CONSTANT LEVELS FOR LONG PERIODS OF TIME. THE PRINCIPLE OBJECTIVE OF THIS PROJECT IS TO DETERMINE HOW THE EFFECTS OF A SUB LETHAL AMOUNT OF TOXICANT ON FISH VENTILATORY BEHAVIOR VARIES WITH THE PAT TERN OF ITS APPLICATION. A MICROCOMPUTER WILL BE USED TO PRECISELY CONTROL TOXICANT LEVELS AND MONITOR FISH RESPONSES, INCLUDING BREATHING AND COUGHING RATES. FISH WILL BE EXPOSED IN DIFFERENT TESTS TO A PREVIOUSLY DETERMINED SUBLETHAL QUANTITY OF TOXICANT OVER A 96 HOUR TEST PERIOD. THE PATTERN OF APPLICATION OF THIS FIXED AMOUNT OF TOXICANT WILL BE EI THER CONSTANT, CONTINUALLY INCREASING, CONTINUALLY DECREASING, OSCILLATING ABOUT A MEAN LEVEL, OR INTRODUCED IN SHORT BURSTS OF HIGHER CONCENTRATION. THE CHANGE IN VENTILATORY ACTIVITY OF EACH FISH FROM ITS LEVEL PRIOR TO EXPOSURE TO THE TOXICANT WILL BE EVALUATED STATISTICALLY. CO NCLUSIONS WILL BE DRAWN ON THE IMPLICATIONS OF THIS DATA FOR SETTING WASTE EFFLUENT DISCHARGE STANDARDS AND THE OPERATION OF BIOLOGICAL MONITORING SYSTEMS.

INFLUENCE OF METALLURGICAL & OPERATING VARIABLES ON SCALING & CORROSION IN WATER REUSE, RECYCLING, & TREATMENT SYSTEMS IN STEEL PLANT

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 47915
TASK/EPA CODE :F610C-03 / R805278 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N PLAKS
INVESTIGATORS : G R ST. PIERRE OHIO STATE UNIVERSITY
MILE: 09/77 -START GRANT
09/78 -COMPLETE GRANT

OBJECTIVE: THE OBJECTIVE OF THIS STUDY WILL BE TO OBTAIN INFORMATION NECESSARY FOR THE DEVELOPMENT AND EVALUATION OF NEW AND IMPROVED METHODS FOR THE PRACTICAL PREVENTION OF SCALING AND CORROSION IN STEELPLANT WASTEWATER REUSE, RECYCLING, AND TREATMENT SYSTEMS. APPROACH: THE PRINCIPAL INTERRELATIONSHIPS BETWEEN PROCESS VARIABLES, WATER QUALITY AND TEMPERATURE, SCALING AND CORROSION POTENTIALS, AND PRODUCT QUALITY WILL BE SUMMARIZED. AN EXPERIMENTAL PROGRAM WILL BE CONDUCTED TO DETERMINE THE NECESSARY THERMODYNAMIC, KINETIC, AND MORPHOLOGICAL DATA TO ANALYZE VARIOUS CONTROL METHODS. BASED ON THESE RESULTS, SEVERAL PROPOSED METHODS FOR THE CONTROL OF SCALING AND CORROSION IN STEELPLANT WASTEWATER WILL BE TESTED AND EVALUATED. THE RESULTS OF THIS STUDY WILL BE COMBINED WITH THOSE OF OTHER RELATED EFFORTS TO SUGGEST PRACTICAL PROCEDURES FOR PREVENTION OF SCALING AND CORROSION UNDER STEELPLANT WASTEWATER CONDITIONS. OUTPUT: A FINAL REPORT SUMMARIZING ALL EXPERIMENTAL RESULTS, TESTING, EVALUATION, AND RECOMMENDATIONS WILL BE PRESENTED.

RESEARCH STUDY FOR CONTINUING DOCUMENTATION OF PURIFYING DOMESTIC SEWAGE BY USE OF AQUATIC PLANTS - KNOWN AS THE MPI SYSTEM

START/ COMPL DATE : 09/77 - 08/79 : FUNDING : EST. - FY 77 / $ 65000
TASK/EPA CODE :C611B-7056 / R805279-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R F LEWIS
INVESTIGATORS : J E OCONNOR MOULTON NIGUEL WATER DISTRICT
J E OCONNOR BIOLOGICAL WATER PURIF. INC.

MILE: 07/77 -GRANT PACKAGE PROCESSED
09/77 -GRANT AWARDED (TENTATIVE)
06/78 -SUPPLEMENT AWARDED (TENTATIVE)
06/79 -EXPERIMENTAL WORK COMPLETED
12/79 -PROJECT COMPLETION
03/80 -FINAL REPORT PUBLISHED

OBJECTIVES OF THE PROJECT: 1. OBTAIN AND MONITOR PERFORMANCE DATA FOR A 12 MONTH PERIOD OF A PROPERLY DESIGNED AND WELL OPERATED BIOLOGICAL WATER PURIFICATION PROCESS KNOWN AS THE MAX PLANCK INSTITUTE SYSTEM (MPI SYSTEM) FOR TREATMENT OF DOMESTIC WASTE SEWAGE. 2. ATTEMPT TO SATISFY HIGHEST LEVELS FOR THE QUALITY FOR WASTEWATER THAT ARE NOW ESTABLISHED BY THE FEDERAL GOVERNMENT AND THE CALIFORNIA WATER QUALITY CONTROL BOARD. 3. OBTAIN AND COLLECT DATA FOR THE EVALUATION OF THE RELIABILITY AND EFFECTIVENESS OF THE MPI SYSTEM IN (A) PURIFICATION OF RAW DOMESTIC SEWAGE, (B) TRANSFORMATION OF SLUDGE, AND (C) REMOVAL OF NUTRIENTS FROM SECONDARY TREATMENT EFFLUENT. DATA WILL BE COLLECTED AND DOCUMENTED ON THE OPERATION AND PERFORMANCE OF A MULTI-TRENCH FACILITY, USING THE AQUATIC PLANTS KNOWN AS PHRAGMITES (REED) AND SCIRPUS (BULRUSH) AS FOLLOWS: 1. RECORD SEWAGE INFLUENT AND EFFLUENT DAILY SHOWING VARIATIONS IN FLOW, AIR TEMPERATURE, SUNLIGHT, AND PRECIPITATION. 2. RECORD WATER QUALITY WITH COMPOSITE SAMPLING EQUIPMENT AT 3 LOCATIONS DESIGNATED: INFLUENT FROM DOMESTIC SEWAGE LINES, EFFLUENT FROM FILTER TRENCHES, AND EFFLUENT FROM ELIMINATION TRENCHES. CERTIFIED LABORATORY TESTS WILL DETERMINE THE ABILITY OF THE MPI SYSTEM TO REMOVE ORGANIC, INORGANIC, AND PATHOGENIC POLLUTANTS, INCLUDING BOD AND TSS. RESULTS WILL BE EVALUATED TO DETERMINE RELIABILITY OF THIS SYSTEM IN THIS TRANSFORMATION OF SLUDGE AND RECLAMATION OF DOMESTIC WASTEWATER FOR FUTURE INSTALLATIONS BY SMALL MUNICIPALITIES AND OUTLYING AREAS OF LARGE COMMUNITIES.

PHOSPHORUS INTERNAL LOADING IN SHAGAWA LAKE

START/ COMPL DATE : 06/77 - 06/79 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :M608A-016 / R805281-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D W SCHULTS
INVESTIGATORS : D E ARMSTRONG UNIV. OF WISCONSIN
MILE: 06/79 -FINAL REPORT

THIS INVESTIGATION IS TO EVALUATE THE FACTORS AND MECHANISMS CONTROLLING THE INTERNAL LOADING OF PHOSPHORUS IN SHAGAWA LAKE, AND TO ASSESS THE APPLICABILITY OF THE INFORMATION ON THE RESPONSE OF THE LAKE TO REDUCTION OF EXTERNAL PHOSPHORUS LOADING TO OTHER LAKES OF VARYING MORPHOMETRY AND SEDIMENT COMPOSITION.

EFFECTS OF CHROMIUM & NUTRIENT POLLUTANTS ON NATURAL PHYTOPLANKTON POPULATIONS

START/ COMPL DATE : 07/77 - 07/79 : FUNDING : EST. - FY 77 / $ 126989
TASK/EPA CODE :M608C-017 / R805282-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D T SPECHT
INVESTIGATORS : L F SMALL OREGON STATE HIGHER EDUC. SYS
MILE: 07/79 -FINAL REPORT

THE OBJECTIVES OF THE PROPOSAL ARE TO STUDY THE RESPONSES OF ENDEMIC ESTUARINE AND NEARSHORE PHYTOPLANKTON POPULATIONS TO A VARIETY OF P OLLUTANT ADDITIONS (EXCESS MAJOR AND MICRO-NUTRIENTS AND CHROMIUM) USING A SPECIAL ALGAL ASSAY TECHNIQUE PREVIOUSLY DEVELOPED BY THE PRINCIPAL INVESTIGATORS. SPECIFICALLY, THE FOLLOWING PRORLEMS WILL BE ADDRESSE D: 1) DETERMINING FACTORS WHICH GOVERN GROWTH RATES, FINAL BIOMASS YIELDS, AND SPECIES COMPOSITION OF PHYTOPLANKTON POPULATION ENDEMIC TO YAQUI NA BAY, OREGON, AND ENVIRONS; 2) RESPONSES OF THESE ENDEMIC POPULATIONS TO CHROMIUM AND EXCESS NUTRIENT LEVELS; 3) EFFECTS ON PHYTOPLANKTON POPULATIONS FROM REDUCED ZOOPLANKTER GRAZING DUE TO CHROMIUM TOXICITY; 4) BIOACCUMULATION OF CHROMIUM BY PHYTOPLANKTON AND ZOPLANKTON, AND, 5) THE EXTENT OF SEASONAL AND YEARLY BIOLOGICAL, CHEMICAL, AND PHYSICAL FLUCTUATION IN YAQUINA BAY AS A BASE FOR COMPARISON OF THE ABOVE RESULTS.

EFFECTS OF CHROMIUM AND NUTRIENT POLLUTANTS ON NATURAL PHYTOPLANKTON POPULATIONS

MILE: 08/77 -INITIATE FIELD MEASUREMENT OF ELECTROMAGNETIC RADIATION SYSTEM
05/78 -INITIATE BIOLOGICAL ASSESSMENT OF PROTOTYPE TRANSDUCERS
08/79 -PROJECT DRAFT FINAL REPORT

THIS PROPOSAL SPECIFIES RESEARCH AND DEVELOPMENT WHICH WILL BE CARRIED OUT AT THE MONTICELLO ECOLOGICAL RESEARCH STATION, MONTICELLO, MINNESOTA, WHICH WILL BE DEVOTED TOWARDS THE INSTRUMENTATION OF CONTROLLED ENVIRONMENTAL CHANNELS WITH AUTOMATIC DATA RECORDING EQUIPMENT. THIS RESEARSCH AND DEVELOPMENT WILL PROVIDE INSTRUMENTATION TO POSITION FISH IN THE CHANNELS TO THE NEAREST 50 FEET. ADDITIONALLY, DATA ON ENVIRONMENTAL MEASUREMENTS SUCH AS TEMPERATURE AND OTHER POLLUTANT STRESSES, AS MAY BE SPECIFIED, WILL BE RECORDED SIMULTANEOUSLY WITH THE POSITION OF THE FISH. POSITIONING WILL REQUIRE ATTACHMENT OF MINIATURE RADIO TAGS TO THE EXPERIMENTAL ANIMALS. SUBSEQUENT TO THE DEVELOPMENT OF THE AUTOMATIC DATA RECORDING SYSTEM THE PROPOSAL OUTLINES WORK TO EVALUATE THE EFFECTS OF THESE MINIATURE TRANSMITTERS ON THE FISH. WE PLAN TO COMPARE VARIOUS BEHAVIORAL AND PHYSIOLOGICAL PARAMETERS BETWEEN CONTROL AND RADIO TAGGED FISH USING SEVERAL ATTACHMENT PROCEDURES. IT IS IMPORTANT THAT THIS WORK BE EXECUTED SINCE AT THE CURRENT TIME IT IS IMPOSSIBLE TO COMPLETELY SEPARATE EFFECTS OF INSTRUMENTATION FROM THE EFFECTS OF PO

INFLUENCE OF EXTERNAL FACTORS OF TOXICITY OF IRON AND COPPER CYANIDE FORMS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 31544
TASK/EPA CODE :N608A-092 / R805291-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J E POLDOSKI
INVESTIGATORS : L L SMITH UNIV. OF MINNESOTA
S J BRODERIUS UNIV. OF MINNESOTA
I R ADELMAN UNIV. OF MINNESOTA

MILE: 07/78 -FINAL REPORT

THE OBJECTIVES OF THE PROPOSED RESEARCH ARE TO DETERMINE THE TOXICITY OF METALLOCYANIDE SOLUTIONS WITH SPECIAL REFERENCE TO IRON AND COPPER COMPOUNDS OF CYANIDE AS THEY ARE AFFECTED BY ENVIRONMENTAL PARAMETERS. A SECOND OBJECTIVE IS TO GIVE SPECIAL ATTENTION TO PHOTODECOMPOSITION. A THIRD OBJECTIVE WILL BE TO INVESTIGATE THE CHEMISTRY OF COPPER-CYANIDE COMPLEX SOLUTIONS TO HELP EVALUATE THE TOXICITY OF VARIOUS COPPER-CYANIDE COMPLEX FORMS. THE PLAN OF WORK WILL BE DIVIDED INTO TWO PHASES: THE FIRST WILL BE AN INVE3TIGATION OF PHOTOLYSIS REACTIONS OF IRON CYANIDE AS AFFECTED BY VARIOUS FACTORS; THE SECOND WILL DEAL WITH THE CHEMISTRY OF CUPROUS AND CUPRIC CYANIDE COMPLEXES AND THE TOXICITY OF THE DICYANOCUPRATE ION TO THE FATHEAD MINNOW. AFTER THE EFFECT OF PHOTODEGENERATION IS DETERMINED CHEMICALLY, THE TOXICITY OF RESULTING COMPONENTS WILL BE DETERMINED. THE CHEMISTRY OF COPPERCYANIDE COMPLEX SOLUTIONS WILL BE INVESTIGATED BY SETTING SOLUTIONS IN WHICH CUPRIC OR CUPROUS COPPER AND SODIUM CYANIDE ARE COMBINED. THE RATES OF DISSOCIATION AND FORMATION OF THE CUPROUS CYANIDE COMPLEX ION AND THE HCN EQUILIBRIUM LEVELS IN SOLUTIONS OF VARYING TOTAL CYANIDE CONCENTRATION, OF PH, AND CYANIDE-TO-COPPER MOLAR RATIUS WILL THEN BE EXAMINED IN DETAIL.

MOVEMENT AND FATE OF VIRUSES AND ORGANIC POLLUTANTS IN GROUNDWATER
DURING THE LAND TREATMENT OF WASTEWATER

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 149557
TASK/EPA CODE :L609B-10 / R805292-10 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J F MCNABB
INVESTIGATORS : C P GERBA BAYLOR COLLEGE OF MEDICINE
J L MELNICK BAYLOR COLLEGE OF MEDICINE

C H WARD RICE UNIVERSITY
F L ROE RICE UNIVERSITY
J E HUDSON RICE UNIVERSITY

MILE: 07/80 -FINAL REPORT

THE PURPOSE OF THIS PROJECT IS TO INVESTIGATE THE MOVEMENT OF VIRAL PATHOGENS AND ORGANIC POLLUTANTS FROM WASTEWATER INTO GROUND WATER DURING THE LAND APPLICATION OF WASTEWATER IN ORDER TO DEVELOP INFORMATION REQUIRED TO CONFIRM OR ADJUST EXISTING DESIGN AND OPERATION CRITERIA TO ASSURE THE PROTECTION OF GROUNDWATER ASSOCIATED WITH SOIL TREATMENT FACILITIES. SPECIFIC OBJECTIVES INCLUDE: (1) THE IDENTIFICATION AND QUANTIFICATION OF ORGANIC POLLUTANTS IN GROUNDWATER UNDERLYING SELECTED LAND APPLICATION SITES; (2) DETERMINATION OF THE EXTENT OF SLOW CHROMATOGRAPHIC MOVEMENT OF ORGANIC POLLUTANTS AND VIRUSES THROUGH SOIL INTO GROUNDWATER USING COLUMN STUDIES; (3) DETERMINATION OF THE MECHANISMS OF VIRUS REMOVAL DURING PASSAGE OF WASTEWATER THROUGH SOIL USING BATCH AND COLUMN STUDIES AND A VARIETY OF VIRUSES AND SOILS; (4) DETERMINATIONS OF THE SURVIVAL OF VIRUSES IN SOIL UNDER VARIETY OF ENVIRONMENTAL CONDITIONS; AND (5) EVALUATION OF THE USE OF ENTEROVIRUS-LIKE BACTERIOPHAGES AS INDICATORS OF ANIMAL VIRUS BEHAVIOR IN GROUNDWATER.

REACTION OF ACTIVATED CARBON WITH AQUEOUS CHLORINE AND OTHER DISINFECTING AGENTS

START/ COMPL DATE : 07/77 - 06/80 : FUNDING : EST. - FY 77 / $ 56435
TASK/EPA CODE :C614 -7174 / R805293-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A A STEVENS
INVESTIGATORS : V L SNOEYINK UNIV. OF ILLINOIS
W H PIRKLE UNIV. OF ILLINOIS

MILE: 06/77 -GRANT AWARDED
06/78 -INTERIM REPORT
06/79 -INTERIM REPORT
06/80 -PROJECT COMPLETED
09/80 -FINAL REPORT PUBLISHED

ACTIVATED CARBON IS A REDUCING AGENT AND WHEN IT IS USED IN TREATMENT OF WATER SUPPLIES IT READILY REACTS WITH THE PREDISINFECTANT CHLORINE. IT IS LIKELY THAT IN ADDITION TO THE CHLORIDES WHICH RESULT FROM THIS REA CTION, SOME TRACE CHLORINATED ORGANICS ALSO ARE PRODUCED OWING TO REACTION WITH ORGANICS ADSORBED ON THE CARBON AND THE CARBON ITSELF. THE OBJECTIVE OF THIS RESEARCH IS TO DETERMINE 1) THE NATURE OF THE CHLORINATED ORGANICS WHICH FORM WHEN CHLORINE IS CONTACTED WITH CARBON, 2) THE NA TURE OF THE ORGANICS WHICH FORM WHEN OZONE AND CHLORINE DIOXIDE REACT WITH CARBON BECAUSE THESE DISINFECTANTS MAY REPLACE CHLORINE, AND 3) WAYS IN WHICH THE PRODUCTION OF HARMFUL COMPOUNDS CAN BE ELIMINATED IF SUCH ARE FORMED. LABORATORY SCALE EXPERIMENTS WILL BE CONDUCTED WITH GAS CHROMAT OGRAPHY, LIQUID CHROMATOGRAPHY AND MASS SPECTROMETRY BEING USED TO ANALYZE THE ORGANICS. INITIAL EXPERIMENTATION WILL DEAL WITH THE CARBON-CHLORINE REACTIONS ONLY.

REVIEW OF CONTROL TECHNOLOGIES FOR OPEN SOURCES OF PARTICULATE EMISSIONS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :F623A-30 / R805294-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D C DREHMEL
INVESTIGATORS : D W COOPER HARVARD UNIVERSITY
D W MOELLER HARVARD UNIVERSITY

MILE: 07/77 -AWARD GRANT
07/78 -COMPLETE RANKING OF CONTROL TECHNOLOGY

OBJECTIVE: TO ASSESS CONTROL TECHNOLOGY FOR OPEN SOURCES, APPROACH: THIS WORK WILL IDENTIFY, DESCRIBE, AND ANALYZE EXISTING METHODS FOR THE CONTROL OF OPEN SOURCES OF PARTICULATE EMISSIONS, FROM THE ANALYSIS OF THE STATE OF THE ART AND OF THE AREAS OF NEED, THE INVESTIGATORS WILL DETERMINE PRIORITIES FOR RESEARCH, DEVELOPMENT, AND APPLICATION IN THE CONTROL OF OPEN SOURCE EMISSIONS. OUTPUT: REVIEW AND RANKING OF OPEN SOURCE CONTROL PROCEDURES AND DEVICES.

LAGOON EFFLUENT POLISHING USING PHASE ISOLATION PONDS

START/ COMPL DATE : 09/77 - 06/79 : FUNDING : EST. - FY 77 / $ 65000
TASK/EPA CODE :C6118-7044 / R805296-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R F LEWIS
INVESTIGATORS : E C MCGRIFF CLINTON CITY GOVERNMENT
E C MCGRIFF ENVIRONMENTAL PROT. SYST. INC

06/78 -SUPPLEMENT AWARDED (TENTATIVE)
06/79 -EXPERIMENTAL WORK COMPLETED
12/79 -PROJECT COMPLETION
03/80 -FINAL REPORT PUBLISHED

THE OBJECTIVE OF THIS RESEARCH PROJECT IS TO TEST THE "PHASE ISOLATION" CONCEPT FOR REMOVAL OF ALGAE FROM SEWAGE LAGOON EFFLUENT THAT WAS NOTICED AT THE WOODLAND, CALIFORNIA WASTEWATER TREATMENT PLANT. RESEARCH ON ALGAE WASTEWATER TREATMENT SYSTEMS IN THE LABORATORY AND SOME FIELD OBSERVATIONS HAVE SHOWN THAT WHEN ALGAE AGE WITHOUT NUTRIENTS THEY TEND TO CLUMP AND SEPARATE FROM THE LIQUID BY SEDIMENTATION. THIS FULL-SCALE PROJECT WILL USE TWO ALTERNATIVELY LOADED FOUR ACRE RADIATION PONDS FOLLOWING A TWO-CELLED LAGOON WASTEWATER TREATMENT SYSTEM. THE PROJECT WILL CONSIST OF A CONSTRUCTION PHASE IN WHICH THE PRESENT FOUR CELLED LAGOON SYSTEM WILL BE MODIFIED TO ENABLE THE ALTERNATE LOADING, ISOLATION, AND DISCHARGE OF THE TWO CELLS TO BE USED AS "PHASE ISOLATION" CELLS AND A TEST PERIOD WHERE THE ISOLATION METHOD WILL BE USED WHILE EXTENSIVE SAMPLING AND ANALYTICAL WORK WILL BE CARRIED OUT TO DETERMINE THE EFFECTIVENESS OF THIS METHOD AND FACTORS THAT WILL INFLUENCE THE PROCESS.

FIELD DEMONSTRATION OF NEW R.O. MEMBRANES FOR PLATING WASTE-TREATMENT

START/ COMPL DATE : 05/77 - 10/78 : FUNDING : EST. - FY 77 / $ 83000
TASK/EPA CODE :B610B-453 / R805300-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : M STINSON
INVESTIGATORS : J H SCHUMACHER AMER. ELECTROPLATERS SOC. INC
MILE: 05/77 -FUNDING PACKAGE SUBMITTED
06/77 -AWARD FUNDS FOR PROJECT
10/78 -FINAL REPORT RECEIVED

OBJECTIVE: THE OBJECTIVE OF THE PROPOSED PROGRAM IS TO DEMONSTRATE CLOSED-LOOP RECOVERY OF RINSEWATERS FROM BATHS WITH EXTREME PH'S OR HIGH OXIDANT LEVELS USING THE MOST PROMISING MEMBRANES IN FULL-SCALE MODULAR FORM. A MOBILE DEMONSTRATION SYSTEM WILL BE ASSEMBLED AND FIELD TESTED AT TWO DIFFERENT SITES. A COMBINED REVERSE OSMOSIS/EVAPORATION SYSTEM WILL BE USED TO PERMIT CLOSED-LOOP RINSEWATER RECOVERY FOR LOW TEMPERATURE BATHS. APPROACH: THE PROPOSED PROGRAM CONSISTS OF FOUR MAJOR TASKS: TASK 1: DESIGN AND ASSEMBLE MOBILE DEMONSTRATION SYSTEM. SYSTEM WILL BE SKID-MOUNTED FOR EASY TRANSPORTATION. COMMERCIAL EVAPORATOR WILL BE LEASED AND ADDED TO RO SYSTEM. TASK 2: DEMONSTRATE CLOSED-LOOP RECOVERY OF ALKALINE ZINC CYANIDE RINSEWATER, AT THE SELECTED PLATING FACILITY. DEMONSTRATION TO BE CONDUCTED OVER FOUR-MONTHS PERIOD. DATA TO BE OBTAINED FOR ASSESSING SYSTEM PERFORMANCE AND ECONOMICS. TASK 3: RETURN OF MOBILE DEMONSTRATION SYSTEM TO ABCOR, INC. FOR REFURBISHING AND MODIFICATION. TASK 4: DEMONSTRATE CLOSED-LOOP RECOVERY OF ACIDIC ACID COPPER RINSE WATER AND, IF POSSIBLE, OF CHROMIC ACID RINSEWATER AT THE SELECTED PLATING FACILITY. DEMONSTRATION TO BE CONDUCTED OVER FOUR-MONTHS PERIOD. DATA TO BE OBTAINED FOR ASSESSING SYSTEM PERFORMANCE AND ECONOMICS.

805301

The major objective of this research is to study the effects of prenatal exposure to one or more pesticides, herbicides and/or fungicides on the cardiovascular physiology of rats. Specifically, (1) rate of heartbeat; (2) electrocardiogram; (3) blood pressure; and (4) blood chemistry (hematocrit, Na, K, glucose, osmotic pressure and other items as indicated) will be studied in rat embryos, fetuses and newborns. Testing will begin shortly after maternal exposure to test for immediate effects and at later intervals to test for prolonged effects. The proposed program would provide more subtle and sensitive indicators of developmental toxicity than most of the standard teratological tests now generally used. Another objective of this research is to obtain some basic information on possible mechanisms of the physiological action of pesticides on fetuses.

The agents used initially will be those which have been shown to have some teratogenic potential in mammals. Particular emphasis will be given to Maneb, Mirex, 2,4,-D, Dioxin and Kepone which have also been reported to induce edematous changes in fetuses, an obvious sign of fluid imbalance.

ORGANIC EMISSIONS FROM SINTER PLANTS - DETERMINATION OF CAUSES AND METHODS OF ABATEMENT

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 9456
TASK/EPA CODE :F604C-07 / R805304 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N PLAKS
INVESTIGATORS : R A STOEHR UNIV. OF PITTSBURGH
MILE: 07/77 -START GRANT
07/78 -COMPLETE GRANT

OBJECTIVE: PROVIDE BASIC DATA ON THE MECHANISMS AND POTENTIAL CONTROL OF ORGANICS AND HYDROCARBONS FROM SINTERING IN THE STEELMAKING INDUSTRY. APPROACH: THIS WORK WILL SYSTEMATICALLY EVALUATE AT BENCH-SCALE APPROACHES TO ELIMINATING ORGANIC AND HYDROCARBON EMISSIONS FROM SINTERING BY: (A) RECYCLE OF GASES THROUGH A SECOND SINTER BED; (B) ELIMINATION OF PREVIOUSLY IDENTIFIED ORGANICS AND HYDROCARBONS FROM THE SINTER CHARGE; (C) CONTROL OF COMBUSTION CONDITIONS TO ACHIEVE MORE COMPLETE OXIDATION OF THE ORGANICS AND HYDROCARBONS; AND (D) PERIODIC REVERSAL OF AIR FLOW THROUGH THE BED. OUTPUT: THE OUTPUT WILL BE A FINAL REPORT.

EFFECTIVENESS AND COST OF ACTIVATED CARBON ADSORPTION OF TOXIC COMPOUNDS
FROM PETROLEUM REFINERY WASTEWATERS
START/ COMPL DATE : 08/77 - 07/78 : FUNDING : EST. - FY 77 / $ 41746
TASK/EPA CODE :L610C-20 / R805307-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J E MATTHEWS
INVESTIGATORS : S L BURKS OKLA. ST. UNIV.
MILE: 08/77 -START PROJECT
07/78 -COMPLETE PROJECT - FINAL REPORT

A STUDY WILL BE CONDUCTED TO DETERMINE THE ADSORPTION CAPACITY OF ACT IVATED CARBON FOR SPECIFIC TOXIC ORGANIC COMPOUNDS IDENTIFIED IN PETROLEUM REFINERY WASTEWATERS, ADSORPTION ISOTHERMS AND COLUMN BREAKTHROUGH DATA ON THE SPECIFIC TOXIC COMPOUNDS WILL BE UTILIZED TO PREDICT THE EFFECTIVENESS OF CARBON ADSORPTION TREATMENT AND THE PROJECTED COST OF A FULL SCALE TREATMENT PLANT. IN ADDITION, FATHEAD MINNOW AND BENTHIC MACROINVERTEBRATE CONTINUOUS-FLOW BIOASSAYS OF CARBON TREATED PE TROLEUM REFINERY WASTEWATERS WILL BE PERFORMED TO DETERMINE THE CAPABILITY OF CARBON TREATMENT TO PRODUCE A "ZERO-TOXIC-POLLUTANT" DISCHARGE.

TREATMENT OF GASEOUS EMISSIONS FROM STEEL PLANTS CONTAINING SMALL CONCENTRATIONS OF HYDROCARBON VAPORS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 10000
TASK/EPA CODE :F604C-08 / R805311 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N PLAKS
INVESTIGATORS : J SZEKELY MASS. INST. OF TECHNOLOGY
MILE: 07/77 -START GRANT
07/78 -COMPLETE GRANT

OBJECTIVE: DEVELOP TECHNOLOGY FOR THE SELECTIVE ADSORPTION OF STEELMAKING PROCESSES SUCH AS SINTER PLANTS, COKEMAKING, ETC. APPROACH: THE PROJECT PROCEEDS IN A LOGICAL MANNER BY FIRST DEVELOPING ADSORPTION EQUI LIBRIUM FOR SEVERAL ADSORBENTS AND HYDROCARBONS AND THEN BY SYSTEMATICALLY TRYING TO INCREASE THE SPECIFICITY OF ADSORPTION FOR HYDROCARBONS. SIM ULTANEOUSLY, DATA WILL BE DEVELOPED ON REGENERATION OF THE ADSORBENTS. THE CONTROLLING MECHANISMS FOR THE PROCESS, MASS TRANSFER, PORE DIFFUSTION, OR ADSORPTION KINETICS, WILL BE DETERMINED FOR USE IN SCALE-UP PURPOSES. F INALLY, THE RESULTS WILL BE EXTENDED TO ENCOMPASS MULTI-COMPONENT SYSTEMS. OUPUT: THE OUTPUT WILL BE A FINAL REPORT.

CALIBRATION OF 90 DEGREES V-NOTCH WEIRS USING PARAMETERS OTHER THAN WEIR HEAD

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 22328
TASK/EPA CODE :A621A-60 / R805312-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T C COVEW
INVESTIGATORS : R N ELI WEST VA, UNIVERSITY
MILE: 00/00 -FINAL REPORT

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. THE OBJECT OF THE PROPOSED RESEARCH IS TO DEVELOP, BY MEANS OF A LABORATORY INVESTIGATION, A LESS CUMBERSOME AND MORE ACCURATE MEANS OF DETERMINING DISCHARGE OVER A 90 DEGREES V-NOTCH WEIR BY TAKING DIRECT MEASUREMENTS AT THE WEIR PLATE. COMPLIANCE MONITORING IN CONNECTION WITH NPDES PERMITS REQUIRES A PROCEDURE, THAT CAN BE EASILY APPLIED IN TH E FIELD WITH A MINIMUM OF TOOLS OR INSTRUMENTATION. WEIR HEAD, THE LEVEL P OOL HEAD ABOVE THE WEIR CREST, IS A DIFFICULT MEASUREMENT TO MAKE SINCE IT MUST BE MADE SOME DISTANCE UPSTREAM OF THE CREST. THEREFORE, THE MAIN THRUST OF THE INVESTIGATION WILL BE TO SELECT A NEW PARAMETER THAT CAN BE MEASURED IN THE VICINITY OF THE WEIR PLATE. THE NEW PARAMETER IS TO BE RELATED TO DISCHARGE BY DEFINING AN EMPIRICAL RELATIONSHIP BY MEANS OF CAL IBRATION TESTS TO BE CONDUCTED OVER THE DISCHARGE RANGE OF APPROXIMATELY 0 TO 5 CUBIC FEET PER SECOND. DRAWDOWN OF THE WATER SURFACE IN THE VICINITY OF THE WEIR PLATE WILL REQUIRE CAREFUL DEFINITION OF THE NEW MEASUREMENT PARAMETER.

IDENTIFICATION AND PREVALENCE OF YERSINIA ENTEROCOLITICA IN WASHINGTON STATE WATER SUPPLIES

START/ COMPL DATE : 06/77 - 06/80 : FUNDING : EST. - FY 77 / $ 41500
TASK/EPA CODE :D6148-027 / R805313-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W JAKUBOWSKI
INVESTIGATORS : T F WETZLER UNIV. OF WASHINGTON
MILE: 06/78 -ANNUAL REPORT
06/79 -ANNUAL REPORT
06/80 -FINAL REPORT

THE RESEARCH GOALS INVOLVE A STATE-WIDE SURVEY OF SELECTED WATER SOURCES UTILIZED FOR OVER 50 METROPOLITAN/URBAN WATER SYSTEMS. WATERS ARE UNTREATED, TREATED, AND/OR CHLORINATED. SANITARY MICROBIOLOGY WILL BE PERFORMED ON SOME 130 SAMPLES PER MONTHS FOR 12 MONTHS TO INCLUDE: AEROBIC PLATE COUNT, TOTAL COLIFORM, FECAL STREPTOCOCCI AND PRESENCE OF ENTERIC PATHOGENS, ESPECIALLY YERSINIA ENTEROCOLITICA. ISOLATES OF YERSINIA ENTEROCOLITICA WILL BE CAREFULLY IDENTIFIED BIOCHEMICALLY, B IOTYPED BY WAUTER'S SYSTEM AND SEROTYPING. NON-TYPABLE ISOLATES WILL SERVE AS A STARTING POINT FOR THE EXPANSION OF NEW SEROTYPES BEYOND THE 36 RECOGNIZED TODAY. VIRULENCE STUDIES WILL BE CARRIED OUT IN MICE ON ALL ISOLATES; AND SOME LIMITED DATA WILL BE ACCULULATED ON HALGEN DISINFECTION PARAMETERS: IONIC STATE, CONCENTRATION, TIME, TEMPERATURE, ETC. EP IDEMIOLOGIC STUDIES WILL STRIVE TO IDENTIFY HUMAN CASES OF YERSINIOSIS AND CORRELATE DATA TO THE POTENTIAL OF WATER- OR FOOD-BORNE TRANSMISSION.

HELMINTH TRANSMISSION IN ANAEROBICALLY DIGESTED SEWAGE SLUDGE

START/ COMPL DATE : 07/77 - 09/78 : FUNDING : EST. - FY 77 / $ 185885
TASK/EPA CODE :C611B-7082 / R805315-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : G STERN
INVESTIGATORS : P R PITZGERALD UNIV. OF ILLINOIS
R ARTHER UNIV. OF ILLINOIS
B WHEAT UNIV. OF ILLINOIS
MILE: 10/77 -PROJECT STARTED
09/79 -PROJECT COMPLETED
03/80 -REPORT PUBLISHED

OBJECTIVES: 1) DETERMINE THE PRACTICAL SURVIVAL OF RESISTANT PARASITES DISPERSED ON AGRICULTURAL LANDS IN ANAEROBICALLY DIGESTED SLUDGE WITH POSSIBLE INFECTION OF TARGET HOST SPECIES, 2) DETERMINE THE RATES OF SURVIVAL OF HELMINTH PARASITES IN ANAEROBICALLY DIGESTED SLUDGE, AND RESIDUES, E.G., "NU-EARTH," 3) DETERMINE LEVELS OF HEAVY METALS IN SOILS, FEED AND TISSUES OF SWINE EXPOSED TO ANAEROBICALLY DIGESTED SLUDGE SPREAD ON AGRICULTURAL LANDS, 4) DETERMINE THE EFFECTS OF HEAVY METALS AND FLUORIDES IN SEWAGE/SLUDGE ON HELMINTH PARASITE OVA. APPROACH: THE GENERAL APPROACH IS TO DISPENSE ANAEROBICALLY DIGESTED SLUDGE, CONTAINING OVA OF SEVERAL NEMATODES, BUT PARTICULARLY ASCARIS SP., ON STRIP-MINED SOIL WHICH HAS NOT BEEN CONTAMINATED BY LIVESTOCK, AFTER VARIABLE QUANTITIES OF SLUDGE HAVE BEEN PLACED ON PLOTS, WORM-FREE PIGS WILL BE PLACED ON THE EXPERIMENTAL PLOTS WHERE THEY WILL FEED AND LIVE IN A NATURAL ENVIRONMENT WHERE SLUDGE CONTAMINATED WITH OVA HAS BEEN DISPENSED, ANIMALS WILL BE NECROPSIED AT APPROPRIATE TIMES AFTER EXPOSURE TO SLUDGE, APPROPRIATE TISSUES WILL BE SELECTED FOR CHEMICAL ANALYSIS FOR THE HEAVY METALS ZN, CU, CD, CR, NI, PB AND HG, ALSO FLUORIDES AND PCB'S. CURRENT PLANS: CURRENT STUDIES ARE UNDERWAY WHICH INVOLVE POSSIBLE ENHANCEMENT OF PARASITIC INFECTIONS IN CATTLE GRAZING IN SLUDGE IRRIGATED PASTURES. UPTAKE OF HEAVY METALS BY CATTLE WITH POSSIBLE SUBSEQUENT EFFECT UPON HEALTH OF THE ANIMALS IS BEING STUDIED. ANIMALS ARE ALSO BEING MONITORED FOR OCCURRENCE OF OTHER PATHOGENIC ORGANISMS WHICH MAY APPEAR AS A RESULT OF INFECTION WHICH COULD RESULT FROM PATHOGENS DISPERSED IN ANAEROBICALLY DIGESTED SEWAGE SLUDGE.

To better appreciate the ultrastructural alterations that occurred in 71 beagle dogs chronically exposed to air pollutants, transmission electron microscopic morphometry will be used. Ultrastructural quantitation has proven invaluable in delineating the pathogenetic mechansims of gasious-induced pulmonary lesions. Specifically alterations in the thickness of components of the blood-air barrier and in the epithelial cells of the lungs have been statistically appriciated.

It is proposed that both large block plastic sections and ultrathin sections be randomly selected, photographed at 200X and 2500X, respectively, on 35mm film. After transfer of the image to positive 35mm film, the images will be projected on a ground glass screen with interchangeable counting grids. The volumetric density of alveoli, alveolar ducts, and respiratory bronchioles, as well as alveoli located in alveolar ducts or respiratory bronchioles will be calculated. The volumetric density of interstitial tissue (collagen and elastic fibers, fibroblasts, and smooth muscle), type I and type II epithelial cells, epithelial cells, endothelial cells, macrophages, and other migratory cells will be calculated. The numerical and surface densities of alveoli and capillaries will be calculated. The arithmetic mean thickness of the blood-air barrier and all of its components (epithelium, interstitium, and endothelium) will be calculated. The arithmetic mean thickness of vessel and bronchiolar walls will be measured. All of these measurements will use Weibel's methods.

All of the results for each exposure group will be compared to every other group by analysis of variance. Linear regression will be used to examine possible correlations between pulmonary function data reported on these dogs and the morphometric measurements. All significant correlations within a group will be compared to all other groups by analysis of covariance.

EFFECT OF COAL GASIFICATION PRODUCTS ON THE PULMONARY DEFENSE SYSTEM AGAINST INFECTIOUS DISEASE (BACTERIAL)

START/ COMPL DATE : 03/77 - 02/80 : FUNDING : EST. - FY 77 / $ 150000
TASK/EPA CODE :H625F-7162 / R805317 (GRANT) PRIOR FY76 / 1

08/78 -COMPLETE ACUTE EXPOSURES OF 1ST TEST SAMPLE
08/78 -SUBMIT ANNUAL REPORT
08/79 -COMPLETE ACUTE EXPOSURES OF SECOND TEST SAMPLE
10/79 -SUBMIT ANNUAL REPORT
08/80 -COMPLETE CHRONIC EXPOSURES
10/80 -SUBMIT FINAL REPORT

THE IMPACT OF POLLUTANTS FROM ALTERNATE ENERGY SOURCES (PRIMARILY COAL GASSIFICATION) ON PULMONARY DEFENSE SYSTEMS AGAINST INFECTIOUS BACTERIAL DISEASE WILL BE INVESTIGATED. ANIMALS WILL BE EXPOSED TO RESPIRABLE-SIZED AEROSOLS OF THE POLLUTANT IN A MANNER TO ELUCIDATE DOSE RESPONSE RELATI ONSHIPS. THE FOLLOWING PARAMETERS WILL BE USED IN THE INVESTIGATION: (1) M ORTALITY AND MEAN SURVIVAL TIME FOLLOWING AEROSOLS OF PATHOGENIC BACTERIA; (2) PULMONARY BACTERICIDAL RESPONSES; (3) PULMONARY CELL POPULATIONS; AND (4) FUNCTIONING OF ALVEOLAR MACROPHAGES. IF ADVERSE EFFECTS ARE FOUND, THE INFLUENCE OF PARTICLE SIZE AND DURATION OF EXPOSURE WILL BE TESTED USING THE MOST SENSITIVE PARAMETERS. THE TIME REQUIRED FOR RECOVERY FROM ADVERSE EFFECTS WILL ALSO BE DETERMINED.

POLLUTANTS, AERO-ALLERGENS, AND RESPIRATORY DISEASES

START/ COMPL DATE : 08/77 - 08/80 : FUNDING : EST. - FY 77 / $ 99000
TASK/EPA CODE : 601C-7294 / R805318 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C G HAYES
INVESTIGATORS : M D LEBOWITZ UNIV. OF ARIZONA
MILE: 08/77 -AWARD GRANT
08/78 -PROGRESS REPORT
08/79 -PROGRESS REPORT AND CONTINUATION APPLICATION
08/80 -FINAL REPORT

THE PURPOSE OF THE STUDY IS TO DETERMINE THE INFLUENCE OF CERTAIN MACRO AND MICRO-ENVIRONMENTAL FACTORS ON THE DEVELOPMENT OF RESPIRATORY SYMPTOMS AND AIRWAYS OBSTRUCTIVE DISEASES (AOD). THESE FACTORS HAVE BEEN H YPOTHESIZED TO BE RELATED TO AIRWAYS OBSTRUCTIVE DISEASE. THEY INCLUDE AIR POLLUTANTS (INCLUDING DUST AND SUSPENDED PARTICULATE MATTER), AERO-ALLERGENS (POLLEN, MOLD, FUNGI, ALGAE, INSECTS) AND CLIMATE. THE MICRO-ENVIRONMENT IS THE PERSONAL ENVIRONMENT INCLUDING SOME MACRO-ENVIRO NMENTAL (AMBIENT AIR) EXPOSURES. THE FOLLOWING STUDY WILL DETERMINE IF THE RESPIRABLE DUSTS AND OTHER AIR POLLUTANTS (MOSTLY PHOTO-OXIDANTS), AERO-ALLERGENS, COUNTERACT INTERDEPENDENTLY OR INDEPENDENTLY IN PRODUCING RESPIRATORY SYMPTOMS AND/OR AOT. TWO HUNDRED FAMILIES WILL BE STUDIED; WE WILL HAVE A BASELINE AND SUBSEQUENT EVALUATIONS INCLUDING THOROUGH IMMUNOLOGICAL, PHYSIOLOGICAL, AND EPIDEMIOLOGICAL STUDIES. THEY WILL BE MONITORED WITH MICRO-ENVIRONMENTAL MONITORS, AS WELL AS HAVING IN FORMATION AS TO THEIR MACRO-EXPOSURE. THEY WILL BE MONITORED FOR SYMPTOMS, LUNG FUNCTION CHANGES, OR IMMUNOLOGIC CHANGES, IN ASSOCIATION WITH THE AIR EXPOSURES. OTHER ANTECEDENT CONDITIONS, SUCH AS GENETIC AND FAMILIAL FACTORS, OCCUPATIONAL EXPOSURES, SMOKING, ETC., WILL BE CONSIDERED. THEIR SYMPTOMS WILL BE MONITORED ON A DAILY BASIS USING A DIARY AND TELEP HONE INTERVIEW. THEY WILL HAVE REGULAR WORKUPS AS WELL AS HAVE EVALUATIONS DURING ANY EXACERBATION OF PRESENT DISEASE, DURING ACUTE RESPIRATORY ILLNESSES AND DURING ASTHMATIC OR ALLERGIC ATTACKS. MULTI-V ARIATE STATISTICAL ANALYSES WILL BE UTILIZED TO DETERMINE THE INTERACTIONS OF MACRO- AND MICRO-ENVIRONMENTAL FACTORS, AS WELL AS TO DETERMINE THE RELATIONSHIP BETWEEN THE ENVIRONMENTAL FACTORS AND SYMPTOMS, LUNG FUNCTION, THIS FUNCTION, AND/OR DISEASE, IN THIS POPULATION.

1. Take information gained from alfalfa insect research and apply it at the farm operational level.
   There has been some 15 years of data relating to pest management of alfalfa insects accumulated in Utah. These data include the effects of biological control agents, cultural practices, and pesticides.
2. Demonstrate to the alfalfa growers the wisdom of basing control decisions on condition in individual fields.
   This will include reports to the growers based on pest population samples. It will also include cost benefit analyses comparing fields following pest managment practices compared to those not following such a program.
3. A side benefit, but not a true objective, is to train a nucleus of pest management scouts.

Some major approaches will be:

a. Routine monitoring of pest populations.
b. Reporting pest conditions to growers.
c. Analyzing alfalfa yields and quality.
d. Analyzing costs and returns to growers.
e. Correlating insect development with weather data.
f. Using the alfalfa and alfalfa weevil models, developed through other projects.
g. Developing an economic model to augment the two models mentioned in "f".

EFFECTS OF CHRONIC SULFUR DIOXIDE FUMIGATION ON PRIMARY PRODUCERS AND INVERTEBRATE CONSUMERS IN A MIXED PRAIRIE ECOSYSTEM

START/ COMPL DATE : 06/77 - 06/80 : FUNDING : EST. - FY 77 / $ 163070

TASK/EPA CODE : M625A-019 / R805320-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : E PRESTON

INVESTIGATORS : J L DODD COLORADO STATE UNIVERSITY
W K LAUENROTH COLORADO STATE UNIVERSITY

MILE: 06/80 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO ASSESS THE EFFECTS OF CHRONIC SULFUR DIOXIDE FUMIGATION ON PRIMARY PRODUCERS AND INVERTEBRATE CONSUMERS IN A MIXED PRAIRIE ECOSYSTEM. FIELD EXPERIMENTS ARE DESIGNED TO: (1) CHARACTERIZE PHYSIOLOGICAL RESPONSES OF WESTERN WHEATGRASS TO FOUR SO2 EXPOSURE LEVELS, (2) RELATE PHYSIOLOGICAL RESPONSES TO WHOLE PLANT GROWTH AND POPULATION DYNAMICS OF WESTERN WHEATGRASS ON EACH TREATMENT AREA; (3) INVESTIGATE THE RELATIONSHIPS BETWEEN PHYSIOLOGICAL STATUS OF WESTERN WHEATGRASS AND INFRARED REFLECTIONS. LABORATORY EXPERIMENTS SUPPORT AND AMPLIFY THE FIELD EXPERIMENTS. THESE EXPERIMENTS ARE DESIGNED TO: (1) CHARACTERIZE THE PHYSIOLOGICAL RESPONSE OF WESTERN WHEATGRASS TO SO2 FUMIGATION WITHIN A MINOR RANGE OF ENVIRONMENTAL CONDITIONS, AND (2) DETERMINE THE RELATIONSHIP BETWEEN INTERNAL SULFUR STATUS OF WESTERN WHEATGRASS AND PHYSIOLOGICAL RESPONSES. VARIABLES TO BE MEASURED INCLUDE GROSS PHOTOSYNTHESIS, NET PHOTOSYNTHESIS, PHOTOSPIRATION, DARK RESPIRATION, PLANT AND LEAF WATER POTENTIAL, STAMATA DIFFUSION RESISTANCE AND LEAF TEMPERATURES.

805321

Objective - To prepare plant tissue material containing toxic elements via in vivo incorporation. The material will be grown in hydroponics solution containing the toxic elements, harvested, dried, ground, blended, homogenized, and analyzed for use as both reference materials and in upcoming cross-check programs. Attempts will be made to collect and process water hyacinth leaves from sewage ponds containing elevated levels of pollutants and from uncontaminated ponds.

Approach - Water hyacinths will be grown in large ponds or tanks. Combinations of various toxic element compounds will be added to the hydroponics solution, as required, to maintain certain minimum concentrations of the toxic elements in the hydroponics solutions. Aerial water hyacinth leaves are harvested periodically and dried. After removal of the stalks, the leaves are ground and the last water trace removed by freeze-drying. After blending and sieving, if required, the dry powder is analyzed for the toxic elements and shipped to EMSL-LV or a location determined by EMSL-LV. A batch of uncontaminated material of similar size will be prepared similarly, except for the incorporation of the toxic elements. Personnel (2-3 people) from the analytical branch of the contractor institution will come to EMSL-LV to conduct analyses of the produced materials jointly with EMSL personnel. An effort will be made to collect aerial leaves of water hyacinths growing in contaminated ponds of two different sewage plants. The leaves will be processed as described above and shipped to EMSL-LV. Similarly, aerial leaves of water hyacinths will be collected from uncontaminated ponds and processed as described above to a dry powder which will be shipped to EMSL-LV.

STUDY OPERATING CHARACTERISTICS OF HOT-SIDE PRECIPITATORS

START/ COMPL DATE : 10/77 - 10/79 : FUNDING : EST. - FY 77 / $ 148666

MILE: 09/77 -AWARD GRANT
09/79 -ISSUE FINAL REPORT WITH SUGGESTED DESIGN CHANGES

HOT SIDE PRECIPITATORS, THOSE INSTALLED BEFORE THE COMBUSTION PREHEATER IN COAL FIRED GENERATING PLANTS, ARE ONE MEANS OF IMPROVING THE EFFI CIENCY OF COLLECTION OF HIGH RESISTIVITY FLY ASH. THE OBJECTIVE OF THE RES EARCH PROJECT IS TO STUDY THESE HOT SIDE UNITS AND DETERMINE THE CAUSE FOR AN APPARENT DECREASED EFFICIENCY AT HIGH ALTITUDE. A SECOND OBJECTIVE IS TO GAIN A BETTER UNDERSTANDING OF HOT SIDE UNITS IN GENERAL. A SURVEY OF OPERATING HOT SIDE PRECIPITATORS WILL BE CONDUCTED TO D ETERMINE IF ALTITUDE IS CLEARLY A FACTOR IN REDUCED EFFICIENCY. THE SURVEY WILL ALSO PROVIDE DATA THAT WILL BE CORRELATED TO DETERMINE OTHER CAUSES FOR REDUCED EFFICIENCY. THE EXPERIMENTAL WORK TO BE CONDUCTED WILL DEPEND ON THE OUTCOME OF THE SURVEY.

INPUTS OF HAZARDOUS ORGANICS FROM THE ATMOSPHERE TO SAGINAW BAY

START/ COMPL DATE : 07/77 - 06/79 : FUNDING : EST. - FY 77 / $ 41187
TASK/EPA CODE :N608A-030 / R805325-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D MULLIN
INVESTIGATORS : T J MURPHY DEPAUL UNIVERSITY
MILE: 09/79 -FINAL REPORT DUE

THE OBJECTIVES OF THIS PROJECT ARE TO DETERMINE THE ATMOSPHERIC INPUTS OF POLYCHOLORINATED BIPHENYLS (PCBS) ARE POLYCYCLIC AROMATIC HYDROCARBONS (PAHS) TO SAGINAW BAY, IN LAKE HURON. PRECIPITATION AND DRY DEPOSITION SAMPLES WILL BE COLLECTED AT SEVERAL LOCATIONS AROUND THE BAY. THESE SAMPLES WILL BE ANALYZED FOR AROCLOR 1242, 1254 AND 1260, FOR THE MAJOR PAHS PRESENT AND FOR THE PAHS KNOWN TO BE CARCINOGENS.

VERTICAL DISTRIBUTION OF HYDROCARBONS IN AN URBAN ATMOSPHERE DURING CONDITIONS OF LOW LEVEL TEMPERATURE INVERSIONS

START/ COMPL DATE : 06/77 - 12/78 : FUNDING : EST. - FY 77 / $ 8200
TASK/EPA CODE :G603A-AC-21 / R805327-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : - BUFALINI
INVESTIGATORS : COFFEY STATE UNIVERSITY OF NEW YORK
MILE: 12/78 -FINAL REPORT
MEASUREMENT OF DETAILED HC'S IN THE NEW YORK AREA WILL BE MADE.

The chemical reactions which form and degrade iron-cyanides are being investigated under controlled conditions,to determine reaction rates and mechanisms. This will provide basic data for evolution of cyanide control strategies, either by inhibition of complex-forming reactions or by destruction of the complexes, once formed. Experiments will be carried out with actual coking and blast furnace wastewaters to verify reaction mechanisms and evaluate control strategies. Chemical analyses for free and complex cyanides will be modified to eliminate interferences in the wastewater studies.

The stability of solid iron-cyanide complexes (i.e.,slow degradation) in a landfill environment will be investigated. New treatment processes will result in large quantities of solid ferrocyanides requiring final disposal. The stability of these materials under a reducing and acidic environment needs to be demonstrated.

EVALUATION OF THE DIONEX ION-EXCHANGE CHROMATOGRAPH FOR NATURAL WATER SAMPLE ANALYSIS

START/ COMPL DATE : 08/77 - 11/78 : FUNDING : EST. - FY 77 / $ 36056
TASK/EPA CODE : A6228-04 / R805329-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M GALES
INVESTIGATORS : A SCHLUETER CENTRAL STATE UNIVERSITY
MILE: 11/77 -DETERMINE RETENTION TIMES AND SEPARATION PROFILE OF ANIONS
08/77 -ANALYSIS OF ALKALI AND ALKALI-EARTH METALS IN WATER SAMPLES
02/78 -FINAL REPORT

THIS WORK HAS THE OBJECTIVE OF EVALUATING THE DIONEX ION EXCHANGE CHROMATOGRAPH FOR NATURAL WATER SAMPLE ANALYSIS. INITIAL WORK WILL UTILIZE SYNTHETIC LABORATORY SAMPLES APPROXIMATING NATURAL WATER IONIC CONCENTRATION. THE RESPONSE OF THE DIONEX INSTRUMENT TO THESE SOLUTIONS, THE CONSISTENCY OF ION RETENTION TIMES, THE PROPER SUPPORTING ELECTROLYTE AND THE EXTENT OF PEAK OVERLAP WILL BE INVESTIGATED. WITH OPTIMUM EXPERIMENTAL CONDITIONS FOR ION SEPARATION THE APPLICABILITY OF THE INSTRUMENT TO IDENTIFY AND TO QUANTITATIVELY MEASURE NATURAL WATER ION CONCENTRATIONS WILL BE DETERMINED.

EVALUATION OF THE DIONEX ION EXCHANGE CHROMATOGRAPH FOR NATURAL WATER SAMPLES ANALYSIS

START/ COMPL DATE : 08/77 - 01/79 : FUNDING : EST. - FY 77 / $ 28058

PROJECT OFFICER : M E GALES
INVESTIGATORS : A SCHLUETER CENTRAL STATE UNIVERSITY

THE ION-EXCHANGE CHROMATOGRAPH MANUFACTURED BY DIONEX CORP. HAS THE P OTENTIAL OF SEPARATING AND QUANTITATIVELY DETERMINING THE CONCENTRATIONS O F ANIONS AND CATIONS PRESENT IN NATURAL WATERS. THIS PROJECT WILL EVALUATE THE DIONEX ION-EXCHANGE CHROMATOGRAPH TO DETERMINE ITS ABILITY AND LIMITATIONS IN ANALYZING NATURAL WATER SAMPLES FOR ANIONS AND CATIONS

STAGED COMBUSTION FOR NOX CONTROL AND ENHANCED SO3 EMISSIONS

START/ COMPL DATE : 07/77 - 01/78 : FUNDING : EST. - FY 77 / $ 34559
TASK/EPA CODE :F624A-020 / R805330-01 (GRANT) PRIOR FY / 1
INVESTIGATORS : A LEVY BATTELLE MEMORIAL INSTITUTE
MILE: 07/77 -INITIATE GRANT
01/78 -COMPLETE ASSESSMENT OF ENHANCED SULFATE FORMATION FROM STAGE CO
02/78 -COMPLETE FINAL REPORT

PREVIOUS EXPERIMENTAL STUDIES INDICATE THAT STAGED COMBUSTION PROCESSES DESIGNED TO REDUCE NOX EMISSIONS MAY ENHANCE SO3 EMISSION. THE O BJECTIVE OF THIS PROPOSED PROGRAM IS TO INVESTIGATE THE EXTENT TO WHICH SO 3/SO2 RATIOS MAY BE INCREASED WHEN NOX EMISSIONS IS REDUCED UNDER SPECIFIC AND WELL DEFINED CONDITIONS OF STAGED COMBUSTION. FOR THESE STUDIES, A SIMPLE TWO-STAGE LABORATORY BURNER WILL BE USED. MEASUREMENTS OF NOX, SO2, SO3, AND TEMPERATURE WILL BE AT THE EXIT OF EACH STAGE FOR BOTH SI NGLE-STAGE AND TWO-STAGE OPERATION OF THE BURNER UNDER DIFFERENT OPERATING CONDITIONS. RESULTS FROM THESE STUDIES WILL BE USED TO ASSESS THE EXTENT TO WHICH ENHANCED SO3 PRODUCTION CAN BE A PROBLEM IN STAGED COMBUSTION SYSTEMS.

INVESTIGATE INTERFERENCES IN OPTICAL INFRARED MEASUREMENT TECHNIQUES

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 40000

INVESTIGATORS : R R PATTY UNIV. OF NORTH CAROLINA
MILE: 11/79 -IN-SITU MEASUREMENTS OF SULFATES COMPLETE
OBJECTIVES: TO SPONSOR THE DEVELOPMENT OF A RESEARCH EFFORT DIRECTED AT THE IDENTIFICATION AND QUANTIFICATION OF GASEOUS AND PARTICULATE ABSORBERS IN THE INFRARED, PARTICULARLY IN THE SPECTRAL REGION NEAR 9 MICRONS.APPROACH: TO FUND A GRANT EFFORT IN WHICH THE OPTICAL TECHNIQUE OF OPTO-ACOUSTIC DETECTION IS USED TO MEASURE ABSORPTION COEFFICIENTS OF GASEOUS AND PARTICULATE ABSORBERS IN THE INFRARED AND TO QUANTIFY AMBIENT CONCENTRATIONS OF THESE ABSORBERS. THE APPROACH IS SUFFICIENTLY NEW SO THAT SEVERAL FEASIBILITY EXPERIMENTS WILL BE TRIED INITIALLY IN ORDER TO DETERMINE THE MOST EFFECTIVE RESEARCH PLAN. CURRENT PLANS /PROGRESS: CURRENT PLANS INCLUDE: (1) INITIATE EXPERIMENTS TO DETERMINE FE ASIBILITY (TO BEGIN IN THE SUMMER OF 1977); (2) FINALIZATION OF FIRST YEAR RESEARCH OBJECTIVES AS BASED ON INITIAL FEASIBILTY STUDIES (IN THE FALL OF 1977). PROGRESS DURING THE IMMEDIATE PAST HAS CONSISTED OF THE PROCESSING OF A GRANT PROPOSAL.

ASSESSMENT OF NEARSHORE BENTHIC MICROINVERTEBRATES IN LAKE MICHIGAN

START/ COMPL DATE : 06/77 - 05/78 : FUNDING : EST. - FY 77 / $ 75345
TASK/EPA CODE :N608A-026 / R805333-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W R SWAIN
INVESTIGATORS : S C MOZLEY UNIV. OF MICHIGAN
M W WINNELL UNIV. OF MICHIGAN

MILE: 06/77 -START GRANT
05/78 -TERMINATE GRANT
08/78 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO CONSTRUCT A THOROUGH DESCRIPTION OF THE COMPOSITION, DISTRIBUTION AND CORRESPONDENCE TO PROMINENT ENVIRONMENTAL FEATURES (E.G., SEDIMENT TEXTURE, CONCENTRATIONS OF TOXIC CHEMICALS) OF BENTHIC ANIMALS IN LAKE MICHIGAN. A SET OF 302 SAMPLES ARRAYED OVER THE ENTIRE LAKE WAS COLLECTED BY THE CANADA CENTRE FOR INLAND WATERS IN 1975. THESE SAMPLES WILL BE PROCESSED UNDER THE PRESENT CONTRACT AND SUPPLEMENTED BY AN ADDITIONAL 252 SAMPLES CONCENTRATED IN THE NEARSHORE AREAS (LESS THAN 60 M DEEP) OF THE MAIN BASIN IN JULY 1977. DATA FROM BOTH SETS OF SAMPLES WILL BE ANALYZED PARTICULARLY FOR INFORMATI ON ABOUT INDICATOR SPECIES, SO THAT A BENCHMARK FOR FUTURE COMPARISONS AND ASSESSMENTS OF RELATIVE IMPROVEMENT OR DETERIORATION OF THE BENTHIC ENV IRONMENT WILL BE AVAILABLE. DESCRIPTIONS OF OTHER BASIC CHARACTERISTICS OF THE BENTHOS, SUCH AS ARRANGEMENTS OF SPECIES INTO ASSEMBLAGES, AND GEOGRAPHICAL GRADIENTS IN ASSEMBLAGES WHICH ARE RELATED TO CLIMATE OR CIRCULATION PATTERNS IN THE LAKE WILL ALSO BE UNDERTAKEN.

DEVELOPMENT OF A MODEL OF SO2 OXIDATION IN SMOG

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :G625B-EA-04 / R805335-01 (GRANT) PRIOR FY76 / $ 730001
PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : D F MILLER BATTELLE MEMORIAL INSTITUTE
G M SVERDRUP BATTELLE MEMORIAL INSTITUTE
MILE: 06/78 -FINAL REPORT

THE IMMEDIATE OBJECTIVE OF THIS STUDY IS TO PROVIDE A NEW AND MORE C OMPREHENSIVE BODY OF DA¶A USEFUL IN EVALUATING CURRENT THEORIES FOR THE GA S-PHASE OXIDATION OF SO2 IN POLLUTED AIR. THE ULTIMATE GOAL OF THE PROGRAM IS TO DEVELOP AND VALIDATE A MODEL WHICH WILL BE USEFUL IN PREDICTING SO2 OXIDATION RATES FOR A VARIETY OF ATMOSPHERIC CONDITIONS, INCLUDING T HOSE FOR PLUMES FROM COMBUSTION SOURCES, URBAN CORE SMOG AND URBAN PLUMES, AND LONG-RANGE TRANSPORT OF LARGE AIR MASSES. EXPERIMENTS OF SO2 OXIDATION WILL BE CONDUCTED WITH THREE SMOG SYSTEMS: PROPYLENE, A S URROGATE MIXTURE OF URBAN HYDROCARBONS, AND EARLY-MORNING AIR IN COLUMBUS, OHIO. COMPARATIVE DATA FROM THESE THREE SYSTEMS WILL BE USED TO ASSESS THE ADEQUACY OF EXISTING KINETIC MODELS FOR SO2 OXIDATION AND TO FORMULATE MORE UNIQUE MODELS WHERE NECESSARY.

COAL AND THE ENVIRONMENT - ABSTRACT BIBLIOGRAPHIES

START/ COMPL DATE : 05/77 - 10/78 : FUNDING : EST. - FY 77 / $ 33000
TASK/EPA CODE :B623B-320 / R805336-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : R D HILL

MILE: 05/77 -FUNDING PACKAGE SUBMITTED
06/77 -AWARD FUNDS FOR PROJECT
10/78 -FINAL REPORT RECEIVED

THE OBJECTIVE IS TO PROVIDE EASY ACCESSIBILITY TO THE SPECIFIC LITERATURE ON THE ENVIRONMENTAL PROBLEMS RELATED TO COAL PRODUCTION. THE PROBLEMS COVERED ARE COAL MINE DRAINAGE, DISPOSAL OF THE REFUSE MATERIAL GENERATED BY COAL MINES AND COAL CLEANING PLANTS, AND SURFACE MINE RECLAMATION. THIS OBJECTIVE WILL BE ATTAINED BY COLLECTING ALL RELEVANT INFORMATION AND PREPARING, ON AN ANNUAL ROTATING BASIS, ABSTRACT BIBLIOGRAPHIES OF THE LITERATURE FOR EACH SUBJECT AREA. THE REFUSE BIBLIOGRAPHY WILL BE AVAILABLE EARLY IN 1978 AND THE RECLAMATION BIBLIOGRAPHY EARLY IN 1979. EACH BIBLIOGRAPHY WILL CONTAIN A LISTING OF REFERENCES TO THE MINE DRAINAGE BIBLIOGRAPHY PUBLISHED IN 1976. THIS PROJECT IS A CONTINUATION OF WORK BEGUN AT BCR IN 1961. CURRENTLY THE HOLDINGS IN THE BCR LIBRARY ON COAL MINE DRAINAGE ARE THE LARGEST IN THE WORLD. FROM 1964 TO 1975 BCR PREPARED, FOR PUBLICATION BY THE COMMONWEALTH OF PENNSYLVANIA, AN ANNUAL BIBLIOGRAPHY OF ABSTRACTS ON MINE DRAINAGE. IN 1976 EPA AND THE COMMONWEALTH SPONSORED THE PREPARATION BY BCR OF A COMPREHENSIVE MINE DRAINAGE BIBLIOGRAPHY. IN 1975 BCR AND THE NATIONAL COAL ASSOCIATION PUBLISHED A BIBLIOGRAPHY ON COAL MINED-LAND RECLAMATION. COLLECTING OF MATERIAL ON REFUSE DISPOSAL BEGAN IN 1974; NO ABSTRACT BIBLIOGRAPHY HAS BEEN PREPARED.

DEVELOPMENT OF A TISSUE SELECTIVE IN VIVO BIOASSAY FOR ENVIRONMENTAL AGENTS PRODUCING DNA DAMAGE

START/ COMPL DATE : 10/77 - 12/81 : FUNDING : EST. - FY 77 / $ 200000
TASK/EPA CODE :D6148-044 / R805337-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R J GARNER
INVESTIGATORS : R W HART OHIO STATE UNIVERSITY
D T WITIAK OHIO STATE UNIVERSITY

MILE: 03/79 -MOLECULAR QUANTITATION OF EFFECTS OF ETHYL-N-NITROSOUREA
09/79 -PATHOLOGY OF ENU STUDIES
03/80 -MOLECULAR QUANTITATION OF EFFECTS OF 7,12 DIMETHYLBENZO(GAMMA)A
09/80 -PATHOLOGY OF DMBA STUDIES
03/81 -MOLECULAR QUANTITATION OF EFFECTS OF BENZO(GAMMA)PYRENE AND ANA
09/81 -PATHOLOGY OF BP
12/81 -COMPLETION OF STUDY: FINAL REPORT

THE LONG-TERM GOAL OF THIS PROGRAM IS THE DEVELOPMENT AND QUANTITATION OF A RAPID, INEXPENSIVE, TISSUE SPECIFIC IN VIVO BOASSAY SYSTEM FOR ENVIRONMENTAL CARCINOGENS/MUTAGENS. IT IS ANTICIPATED THAT ULTIMATELY THIS ASSAY WILL PERMIT THE QUANTITATIVE AND QUALITATIVE PREDICTION OF THE CARCINOGENIC POTENTIAL OF VARIOUS AGENTS ALONE OR IN COMBINATION ON ANY TISSUE OR ORGAN IN VIVO. SINCE MOST CARCINOGENS DAMAGE CELLULAR DNA, THE ASSAY WILL BE BASED ON AN ANALYSIS OF THIS DAMAGE IN VIVO BY EMPLOYMENT OF ENDONUCLEASE SENSITIVE SITE ASSAYS IN COMBINATION WITH DNA MOLECULAR WEIGHT ANALYSIS (SUCROSE GRADIENT SEDIMENTATION AND GEL ELECTR OPHORESIS). QUANTITATION OF DNA WILL BE ACCOMPLISHED BY A NEWLY DEVELOPED, SENSITIVE SPECTROFLUOROMATIC ASSAY. WE WILL QUANTITATE THIS ASSAY BY (1) USE OF 14C-LABELED CARCINOGENS OF HIGH SPECIFIC ACTIVITY (DMBA, BP, AND ENU) TO MEASURE THE EXTENT OF BINDING TO, AND REMOVAL FROM, DNA, AND (2) BY COMPARING THE EXTENT OF DNA DAMAGE IN VARIOUS ANIMAL MODEL SYSTEMS WITH DIFFERENTIAL TISSUE AND SPECIES SENSITIVITIES TO THE EFFECTS OF THESE CARCINOGENS. FROM SUCH DATA, WE WILL PRODUCE A PREDICTIVE MODEL SYSTEM FOR THE RATIONAL EXTRAPOLATION OF THIS INFORMATION TO CARCINOGENIC POTENTIALS IN MAN.

KINETICS OF EVOLUTION OF SULFUR-BEARING GASES FROM BLAST FURNACE SLAGS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 12100
TASK/EPA CODE :F6108-01 / R805338-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N PLAKS
INVESTIGATORS : J F ELLIOTT MASS. INST. OF TECHNOLOGY
MILE: 07/77 -START GRANT
07/78 -COMPLETE GRANT

OBJECTIVE: INVESTIGATE THE FUNDAMENTAL PHYSICO-CHEMICAL FACTORS AFFECTING THE FORMATION OF SO2 AND/OR H2S FROM A REACTION WITH HOT BLAST FURNACE SLAG AND DESULFURIZATION RESIDUES. APPROACH: INVESTIGATE THE FUNDAMENTAL FACTORS AFFECTING THE FORMATION OF SO2 AND H2S FROM REACTION WITH HOT BLAST FURNACE SLAGS AND DESULFURIZATION RESIDUES. IF THESE REACTIONS ARE BETTER UNDERSTOOD, ONE CAN DEVELOP MEANS TO CONTROL THE EVOLUTION OF SULFUR BEARING GASES INTO THE ATMOSPHERE FROM THIS SOURCE. INCLUDED IS THE STUDY OF THE EFFECTS OF THE COMPOSITION OF THE SLAG ON THE KINETIC PROCESSES. IF THE STUDY IS SUCCESSFUL, THE PRACTICALITY OF PROCESS CONTROL AS A MEANS OF ELIMINATING SULFUR EMISSIONS FROM HOT SLAG CAN BE ASCERTAINED. OUTPUT: THE OUTPUT OF THIS GRANT WILL BE A FINAL REPORT.

DEVELOPMENT OF AN IN VITRO NEUROTOXICITY ASSAY

START/ COMPL DATE : 09/77 - 09/80 : FUNDING : EST. - FY 77 / $ 56900
TASK/EPA CODE :H615F-7612 / R805339 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R L BARON
INVESTIGATORS : R J RICHARDSON UNIV. OF MICHIGAN
MILE: 09/77 -AWARD GRANT

A MEMBRANE BOUND PROTEIN, NEUROTOXIC ESTERASE (NTE), FROM NERVOUS TISSUE OF THE HEN HAS BEEN SHOWN TO BE A MOLECULAR TARGET FOR NEUROTOXIC ORGANOPHOSPHORUS COMPOUNDS. NTE CAN BE ASSAYED BY A DIFFERENTIAL INHIBITI ON PROCEDURE WHICH REMOVES ACITVITY DUE TO IRRELEVANT ESTERASES. THE ASSAY CAN BE USED TO PREDICT THE NEUROTOXIC POTENTIAL OF ORGANOPHOSPHORUS COMPOUNDS. TO ENABLE NEUROTOXICITY ASSESSMENT TO BE CARRIED OUT RAPIDLY ON LARGER NUMBERS OF COMPOUNDS, A COMPLETELY IN VITRO ASSAY SYSTEM WILL BE D EVELOPED. NTE WILL BE PURIFIED FROM THE RICHEST IDENTIFIABLE TISSUE SOURCE AND IMMOBILIZED IN A SOLID MATRIX OR LIQUID MEMBRANE SYSTEM FOR USE IN A CONTINUOUS-FLOW ENZYME REACTOR. SUITABILITY OF THE IMMOBILIZED ENZYME WILL BE DETERMINED BASED ON KINETIC RESPONSE TO DIFFERENT SUBSTRATES AND INHIBITORS COMPARED TO NATIVE ENZYME.

EPIDEMIOLOGICAL-MICROBIOLOGICAL STUDY ON HEALTH EFFECTS AMONG SWIMMERS AT LAKE PONTCHARTRAIN IN NEW ORLEANS

START/ COMPL DATE : 00/77 - 00/78 : FUNDING : EST. - FY 77 / $ 60000
TASK/EPA CODE :D607A-040 / R805341-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : V J CABELLI
INVESTIGATORS : V K KTSANES TULANE UNIVERSITY OF LOUISIAN
A C ANDERSON TULANE UNIVERSITY OF LOUISIAN
J E DIEM TULANE UNIVERSITY OF LOUISIAN

MILE: 10/77 -COMPLETE TRIALS
09/78 -COMPLETE ANALYSIS OF DATA AND PREPARE REPORT

THE PURPOSE OF THIS STUDY IS TO MEASURE THE HEALTH EFFECTS OF SWIMMING IN SUBTROPICAL RECREATIONAL WATERS. IT REPRESENTS ONE APPROACH TO THE DEVELOPMENT OF WATER QUALITY CRITERIA FOR THE RECREATIONAL WATERS AROUND ALL OF THE NATION'S CITIES. SPECIFICALLY, THE OBJECTIVES ARE TO MEASURE THE HEALTH EFFECTS OF SWIMMING UNDER VARIOUS CONDITIONS AND LEVELS OF WATER POLLUTION. A VARIETY OF GASTROINTESTINAL AND RESPIRATORY SYMPTOMS ARE USED AS HEALTH INDICATORS. DAY-TO-DAY VARIATION IN MICROBIAL COUNTS IN LAKE PONTCHARTRAIN PROVIDES THE ENVIRONMENTAL LABORATORY FOR STUDY. DIFFERENCES BETWEEN BEACH-GOERS WHO SWIM AND THOSE WHO DO NOT WILL ALSO BE TESTED. DURING THE SUMMER OF 1977 WEEKEND BEACH-GOERS WHO DO NOT SWIM MIDWEEK WILL BE INTERVIEWED AT THE BEACH CONCERNING THEIR EXPOSURE TO THE WATER. ON THESE DAYS WATER SAMPLES WILL BE TAKEN AND ANALYZED FOR FECAL COLIFORMS, ENTEROCOCCI, KLEBSIELLA, PSEUDOMONAS, AND E. COLI. TELEPHONE CONTACT WITH RESPONDENTS 8-10 DAYS LATER WILL BE MADE FOR REPORTS ON ILLNESS FOLLOWING THE DAY AT THE BEACH. THE ASSOCIATION BETWEEN SWIMMING AND THE DEVELOPMENT OF ILLNESS UNDER THE DIFFERENT POLLUTION LEVELS WILL BE MEASURED BY THE LOG ODDS RATIO, THE DIFFERENCE IN PROPORTIONS, AND THE RELATIVE DIFFERENCE.

EXPERIMENTAL DETERMINATION OF DRY DEPOSITION RATES

START/ COMPL DATE : 06/77 - 06/78 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :G603A-AF-05 / R805342-01 (GRANT) PRIOR FY76 / $ 400001
PROJECT OFFICER : W LONNEMAN
INVESTIGATORS : E ROBINSON WASHINGTON STATE UNIVERSITY
H WESTBERG WASHINGTON STATE UNIVERSITY
MILE: 06/78 -PROGRESS REPORT
12/79 -REPORT ON LIFE TIMES OF POLLUTANTS

THE GOAL OF THIS RESEARCH EFFORT IS TO MEASURE DRY DEPOSITION RATES FOR POLLUTIONS RELATED TO PHOTOCHEMICAL AIR POLLUTION IN TYPICAL FIELD SITUATIONS. A FIELD MEASUREMENT FACILITY FOR MONITORING THE DEPOSITION VELOCITY OF SUCH POLLUTANTS AS SO2, O3, AND NOX WILL BE ASSEMBLED. A PORTABLE TOWER WITH POLLUTANT SAMPLING AND METEOROLOGICAL SENSORS AT FOUR LEVELS BETWEEN THE TOP OF THE UNDERLYING VEGETATION AND A HEIGHT OF 10 M ABOVE THIS SURFACE VEGETATION WILL BE USED TO OBTAIN PROFILE MEASUREMENTS IN THE BOUNDARY LAYER. THE RESULTS OF THESE EXPERIMENTS SHOULD LEAD TO A BETTER UNDERSTANDING OF THE FACTORS AFFECTING DRY DEPOSITION AND TO IMPROVED MODELING PROCEDURES.

RURAL OXIDANT STUDIES AND THE ROLE OF NOX IN RURAL OXIDANT FORMATION

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 70000
TASK/EPA CODE :G603A-AC-08 / R805343-01 (GRANT) PRIOR FY76 / $ 830001
PROJECT OFFICER : W LONNEMAN
INVESTIGATORS : H WESTBERG WASHINGTON STATE UNIVERSITY
E ROBINSON WASHINGTON STATE UNIVERSITY

MILE: 10/78 -FINAL REPORT

THE PURPOSE OF THIS RESEARCH STUDY IS TO INVESTIGATE THE SOURCE OF HIGH OXIDANT LEVELS IN RURAL AREAS. SPECIFIC GOALS INCLUDE MONITORING IND IVIDUAL HYDROCARBONS IN THE C2 - C10 MOLECULAR WEIGHT RANGE, NOX AND OZONE IN NON-URBAN AREAS OF THE WESTERN AND MIDWESTERN UNITED STATES. THE STUDY WILL INVOLVE BOTH GROUND-BASED AND AIRCRAFT MONITORING. WE ALSO PLAN TO CONDUCT A NUMBER OF NATURAL SUNLIGHT IRRADIATION EXPERIMENTS DESIGNED TO PROVIDE INFORMATION ABOUT HOW FRESH INPUTS OF NOX AFFECT PHOT OCHEMICAL BEHAVIOR OF RURAL AIR MASSES. THE FIELD PORTION OF THIS STUDY IS SCHEDULED FOR JULY AND AUGUST OF 1977.

PREPARE STATE-OF-THE-ART REPORT ON TOXIC SUBSTANCES IN AQUATIC ORGANISMS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 20000
TASK/EPA CODE :4612A-13 / R805344-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C I WEBER
INVESTIGATORS : M MCKOWN GULF SOUTH RESEARCH INSTITUTE
MILE: 07/78 -STATE-OF-THE-ART REPORT ON TOXIC SUBSTANCES IN AQUATIC ORGANISM
OBJECTIVE: TO DETERMINE THE CURRENT STATUS OF METHODOLOGY FOR THE COLLECTI ON AND ANALYSIS OF AQUATIC ORGANISMS FOR BIOACCUMULATION OF TOXIC SUBSTANC ES. APPROACH: THE PRINCIPAL INVESTIGATOR WILL SEARCH THE LITERATURE TO OBT AIN INFORMATION ON METHODS OF SAMPLE COLLECTION, PRESERVATION, PREPARATION AND ANALYSIS FOR TOXIC SUBSTANCES. SPECIAL EMPHASIS WILL BE PLACED ON THE TOXIC SUBSTANCES LISTED IN THE "CONSENT DECREE." THE METHODS WILL BE EVALUATED AND THE DATA ON TOXIC SUBSTANCES WILL BE COMPILED AND CODED FOR COMPUTER STORAGE. OUTPUT: STATE-OF-THE-ART REPORT ON TOXIC SUBSTANCES IN AQUATIC ORGANISMS.

The objectives of this research are to produce methane and volatile fatty acids from alkali treated bagasse and other cellulose wastes. A process has been proposed that will be tested for continuous removal of intermediate organic acids formed in the anaerobic generation of methane.

MUCUS GLYCOPROTEINS SECRETED BY TRACHEAL EXPLANTS FROM RATS EXPOSED TO POLLUTANTS

START/ COMPL DATE : 11/77 - 10/80 : FUNDING : EST. - FY 77 / $ 36000
TASK/EPA CODE :H6018-7124 / R805355 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : J A GRAHAM
INVESTIGATORS : J A LAST UNIV. OF CALIFORNIA
MILE: 11/77 -AWARD GRANT
01/78 -BEGIN EXPOSURES
04/79 -COMPLETE INITIAL IN VIVO EXPOSURES TO O3 AND H2SO4
08/80 -COMPLETE EXPOSURES TO COMBINATIONS OF O3 AND H2SO4
10/80 -FINAL REPORT

THE EFFECTS OF EXPOSURE OF RATS OF OZONE AND SULFURIC ACID AEROSOLS, POLLUTANT GASES THAT CAUSE IRRITATION TO THE AIRWAYS, ARE BEING EVALUATED. PRELIMINARY DATA SUGGEST THAT THERE ARE QUALITATIVE AND QUANTITATIVE CHANGES IN GLYCOPROTEINS SECRETED BY CULTURED TRACHEA FROM ANIMALS EXPOSED TO OZONE OR TO MIXTURES OF OZONE AND SULFURIC ACID. INTERESTINGLY, SULFURIC ACID AND OZONE APPEAR TO ACT SYNERGISTICALLY. TO PERFORM AN EXPERIMENT, WE INCUBATE EXCISED TRACHEA IN ORGAN CULTURE IN THE PRESENCE OF ISOTOPICALLY LABELED PRECURSOR SUGARS OR AMINO ACIDS. THE RADIOACTIVE LABEL ALLOWS US TO QUANTITATE SECRETED GLYCOPROTEINS, AND RELATE THOSE QUANTITATIVE DATA TO THE POLLUTANT REGIMEN TO WHICH THE RATS HAD BEEN EXPOSED. IT IS ANTICIPATED THAT THESE STUDIES WILL ADD TO OUR BASIC KNOWLEDGE CONCERNING REACTIONS OF THE RESPIRATORY SYSTEM WITH AIR POLLUTANTS, AND OF TRACHEAL METABOLISM, WITH A FOCUS ON THE MOST IMPORTANT SECRETORY PRODUCTS OF THIS ORGAN, THE MUCUS GLYCOPROTEINS. SUCH KNOWLEDGE IS RELEVANT TO A BETTER UNDERSTANDING OF SEVERAL HUMAN DISEASES, INCLUDING CHRONIC BRONCHITIS, AND TO A RATIONAL EVALUATION OF THE ROLE(S), IF ANY, THAT EXPOSURE TO AIR POLLUTANTS PLAY(S) IN THE DEVELOPMENT OF THESE DISEASES OF THE CONDUCTING AIRWAYS.

MEASUREMENT AND EVALUATION PROCEDURES FOR ENVIRONMENTAL R AND D

START/ COMPL DATE : 07/77 - 06/78 : FUNDING : EST. - FY 77 / $ 136451

MILE: 06/78 -PHASE I FINAL REPORT: RECOMMENDATIONS ON MEASUREMENT AND EVALUA

AS PART OF ITS EFFORTS IN PROMOTING BOTH IMPROVED ENVIRONMENTAL A SSESSMENTS AND POLLUTION CONTROL TECHNOLOGIES FOR INDUSTRIAL PROCESSES AND ENERGY PRODUCTION, IERL-RTP CARRIES OUT FIVE BASIC ACTIVITIES: (1) THE ASSESSMENT OF AREAS WHERE CONTROL TECHNOLOGIES ARE LIKELY TO HAVE SIGNIF ICANT ENVIRONMENTAL IMPACT, (2) THE TRANSLATION OF SUCH ASSESSMENTS INTO S PECIFIC R AND D WORK UNITS AND THE ALLOCATION OF FUNDS NEEDED TO CARRY OUT THIS WORK, (3) THE IDENTIFICATION OF PROJECTS AND FUNDING OF CO NTRACTORS TO ACCOMPLISH THE WORK UNITS PLANNED, (4) THE MONITORING AND EVA LUATION OF THE PROGRESS AND PERFORMANCE ON VARIOUS R AND PROJECTS, AND (5) THE DISSEMINATION OF RESULTS FROM R AND D PROJECTS TO POTENTIAL USERS. THE PRIMARY GOAL OF THE PROPOSED RESEARCH IS TO SUPPORT THESE BASIC ACTIVITIES AT IERL-RTP BY PROVIDING EFFECTIVE METHODS TO: (1) IDENTIFY THE TECHNOLOGICAL, ENVIRONMENTAL, AND RELATED GOALS NEEDED TO DETERMINE HIGH IMPACT AREAS FOR R AND D PLANNING, (2) ESTABLISH PRIORITIES AMONG SUB-OBJECTIVES AND WORK UNITS SO THAT RATIONAL BUDGET ALLOCATION DECISIONS CAN BE MADE, (3) HELP IMPROVE THE DECISION/BUDGETING PROCESS AT VARIOUS ORGANIZATIONAL LEVELS AT IERL-RTP AND AT DIFFERENT POINTS IN THE PLAN NING CYCLE, (4) INVESTIGATE THE END-USES OF R AND D WORK AND ESTABLISH A S YSTEM FOR INFORMATION DISSEMINATION OUTSIDE THE LABORATORY CONSISTENT WITH THE MISSION AND RESOURCES OF IERL-RTP.

PREDICTING RESPONSE OF A NATURAL SYSTEM TO URANIUM EXTRACTION, OAKVILLE AQUIFER SYSTEM, TEXAS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 105000
TASK/EPA CODE :B623B-638 / R805357-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : J HUBBARD
INVESTIGATORS : W E GALLOWAY UNIV. OF TEXAS
C D HENRY UNIV. OF TEXAS
C W KREITLER UNIV. OF TEXAS

MILE: 07/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
00/00 -FINAL REPORT RECEIVED

THE PRINCIPAL OBJECTIVE OF THIS PROJECT IS TO DETERMINE AND DOCUMENT FOR ONE URANIUM-BEARING AQUIFER SYSTEM THE INTERRELATIONSHIPS BETWEEN AQUIFER GEOMETRY, HYDROLOGY, HYDROCHEMISTRY, MINERALOGY, AND URANIUM MINERALIZATION AND TO DETERMINE HOW THIS NATURAL SYSTEM WILL RESPOND TO LOCAL CHEMICAL OR PHYSICAL STRESSES INDUCED BY URANIUM MINING. THE IMPLICATIONS OF PROJECT RESULTS FOR THE DESIGN OF MONITORING SYSTEMS WILL BE EVALUATED. THE PROGRAM IS EXPECTED TO BE STARTED IN 1977.

The National Council on Radiation Protection and Measurements (NCRP) seeks to collect analyze, develop and disseminate information and recommendations on radiation protection and measurements and to foster cooperation among organizations concerned with radiation protection and measurements. After identification of an area in which NCRP recommendations would be useful, the Council initiates research aimed at:

1. Assessment of the available information which is pertinent to the problem.
2. Identification of areas where more information is needed.
3. Synthesis of present knowledge relevant to the problem area into practical recommendations on radiation protection and measurement which also highlight areas in need of further study.

This project is concerned with the following topics (1) quantities, units, measurement techniques, biological effects and exposure criteria for radiofrequency electromagnetic radiation,(2) radiation hazards resulting from the release of radionuclides into the environment(with particular attention directed to examination of the problems associated with the release of iodine-129,(3) bioassay for the assessment of control of intake of radionuclides and(4) radon sources and dosimetry.

Initial work on NCRP Studies are carried out by scientific committees. If preliminary study by a scientific committee justifies it, work is begun on the formulati of draft recommendations. This involves a detailed examination of pertinent information already available, identification of areas in which information is meager or unavailable and an assessment of the scientific thinking on the problem at hand. The final result of the scientific committee's work is usually a draft of a proposed NCRP report. This draft is submitted to the members of the Council for review, modified on the basis of Council Member's comments and finally, after membership approval, published.

805363

The mortality from primary tumors of the skin in the U.S., Canadian, and British populations under the age of 65 has been steadily increasing for many years. This is the result of the increasing incidence of malignant melanoma. The situation is complicated by inadvertant modification of the upper atmosphere by human activities (high flying aircraft, flourocarbons, etc.) which are expected to lead to an increase in the flux of ultra-violet light at ground level. Regulations to control this modification have thus to be made against a background of long term and progressive changes. It is our purpose to examine the existing U.S. data, published and unpublished, and disentangle the components of the rising rates-generation differences, changes in the rate constant, and inter-cohort differences consequent on these factors. When this is done, we can make projections from defined models against which the course of events can be compared.

MARINE PROTOZOAN MICROSOMAL ACTIVATION OF OIL POLLUTANTS TO MUTAGENS

START/ COMPL DATE : 09/77 - 08/78 ; FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :G625F-1-04 / R805364-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : D G LINDMARK ROCKEFELLER UNIVERSITY
MILE: 10/77 -VISIT ERL GULF BREEZE FOR PLANNING SESSION
08/78 -FINAL REPORT

THE PROJECT CONSISTS OF THE ISOLATION OF MICROSOMES FROM VARIOUS MARINE PROTOZOA. WORK WILL BE DONE ON A SMALL SCALE UNDER LABORATORY CONDITIONS.

REMOTE CONTROL HOVERCRAFT OR VEHICLE TO PLUG HAZARDOUS LEAKS

START/ COMPL DATE : 07/77 - 06/80 : FUNDING : EST, - FY 77 / $ 50000
TASK/EPA CODE :B610A-212 / R805365-01 (GRANT) PRIOR FY76 / 1

06/80 -FINAL REPORT RECEIVED

THE GRANTEE HAS PROPOSED A TWO-PHASE EFFORT TO DESIGN, DEVELOP, TEST, AND EVALUATE A REMOTELY PILOTED, CENTRIFUGAL FAN THRUST PROPELLED, JET SKIRT NOZZLE FORWARD/SIDE MOTION CONTROLLED, MODERATE WEIGHT, HOVERCRAFT-TYPE OF VEHICLE FOR MOVING INTO A HAZARDOUS SPILL CONTAMINATED AREA OVER ROUGH TERRAIN AND PIPE RUNS (AS WELL AS OVER FLAT LAND) TO CARRY AN ON-BOARD TV CAMERA AND ONE OR MORE REMOTELY OPERATED DEVICES FOR PLUGGING LEAKS, CRIMPING PIPES, TURNING VALVES, ETC, CLOSE TO THE SITE OR ORIGIN OF THE SPILL AND THEREBY TO REDUCE THE RISK TO RESPONSE PERSONNEL IN ACQUIRING FACTUAL DATA ON THE SPILL OR IN UNDERTAKING CONTROL MEASURES. THE NEED FOR SUCH A SYSTEM IS RECOGNIZED BY ALL CONCERNED WITH THE CONTROL OF HAZARDOUS SPILLS AND THE PROPOSAL DOCUMENTS SOME SPECIFIC INSTANCES WHERE AVAILABILITY WOULD HAVE PREVENTED INJURIES AND EVEN SAVED LIVES. ESPECIALLY ON FIRST-ON-THE-SCENE RESPONSE PERSONNEL. IN PHASE A (DESIGN AND PILOT MODEL), A THOROUGH EVALUATION OF THE PROPULSION OPTIONS AND CAPABILITY TRADE-OFFS WILL BE UNDERTAKEN, FOLLOWED BY THE FABRICATION AND TESTING OF EITHER A PILOT MODEL OR A STRIPPED-DOWN FULL-SCALE SYSTEM, IN PHASE B (ENGINEERING PROTOTYPE CONSTRUCTION AND EVALUATION), A FULL-SCALE SYSTEM--EQUIPPED NOT ONLY WITH A TV CAMERA BUT WITH ONE OR MORE CONTROL DEVICES (PLUG, CRIMPER)--WILL BE CONSTRUCTED, EVALUATED, DEMONSTRATED, AND DELIVERED.

WATER QUALITY AND EUTROPHICATION STUDIES IN SANTA ROSA SOUND IN THE PROXIMITY OF ESCAMBIA AND SANTA ROSA COUNTIES, FLORIDA

START/ COMPL DATE : 09/77 - 08/79 : FUNDING : EST, - FY 77 / $ 28333
TASK/EPA CODE :Q606C-1-02 / R805366-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : G E WALSH
INVESTIGATORS : G A MOSHIRI STATE UNIVERSITY OF FLA, SYS,
MILE: 07/78 -REPORT

THE PROPOSED PROJECT IS INTENDED TO MONITOR WATER QUALITY PARAMETERS OVER A PERIOD OF TWO YEARS THAT WILL GIVE DETAILED INFORMATION CONCERNING THE PRESENT WATER QUALITY STATUS OF SANTA ROSA SOUND, ESCAMBIA-SANTA ROSA COUNTIES, FLORIDA, FROM BI-WEEKLY FIELD SAMPLES, WATER QUALITY PARAMETERS WILL BE MEASURED AGAINST A BACKGROUND OF PHYSICO-CHEMICAL DATA, THESE PARAMETERS INCLUDE B.O.D., INORGANIC AND ORGANIC CARBON, ALGAL CELL COUNTS AND TYPES, AND BACTERIAL NUMBERS AND SIZES, THE MAJOR TYPES OF PHOSPHATE AND NITROGENOUS SPECIES WILL BE DETERMINED AND CORRELATED WITH ALGAL POPULATION COMPOSITION AND PRIMARY PRODUCTION RATES (TO BE MEASU RED IN SITU BY THE 14C TECHNIQUE). THE EFFECTS OF NITROGEN-PHOSPHORUS ENRI CHMENT ON ALGAL PRODUCTIVITY WILL BE DETERMINED BY EMPLOYING THE PRIMARY P RODUCTIVITY MEASUREMENT TECHNIQUE ON IN SITU CULTURES ON A SEASONAL BASIS. IN ADDITION TO THE REGULAR SAMPLING REGIMEN, DUAL STUDIES WILL BE CO NDUCTED TO DELINEATE DAILY TRENDS IN WATER QUALITY PARAMETERS, PILOT INVES TIGATIONS WILL BE CONDUCTED PERIODICALLY TO INDICATE AREAS NEEDING FURTHER INVESTIGATION, IT IS ANTICIPATED THAT THE INFORMATION OBTAINED FROM THE PROPOSED STUDY WILL AID IN THE ESTABLISHMENT OF RECOMMENDATIONS FOR THE IMPROVEMENT OF WATER QUALITY IN SANTA ROSA SOUND,

USE OF LICHENS AS PREDICTORS AND INDICATORS OF AIR POLLUTION FROM A COAL-FIRED POWER PLANT

START/ COMPL DATE : 09/77 - 08/80 | FUNDING : EST. - FY 77 / $ 13604
TASK/EPA CODE : M625A-020 / R805367-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E PRESTON
INVESTIGATORS : S EVERSMAN MONTANA STATE UNIVERSITY
MILE: 07/80 -FINAL REPORT

TWO LICHEN SPECIES NATIVE TO SOUTHEAST MONTANA SHOWED REDUCED RESPIRATION RATES AND ALGAL CELL PLASMOLYSIS AND BLEACHING WHEN EXPOSED TO .02, .04, AND .07 PPM SO2 (GEOMETRIC MEANS) ON A FIELD FUMIGATION SITE. THE MAJOR OBJECTIVE OF THE CURRENT PROJECT IS TO COLLECT THESE SAME TWO LICHEN SPECIES TO BE OBSERVED AS BIOLOGICAL MONITORS OF SO2 EMISSIONS FROM TWO COAL-FIRED POWER PLANTS IN COLSTRIP, MONTANA. LICHEN COMMUNITY INFORMATION IS ALSO BEING COLLECTED IN ORDER TO DETECT ANY CHANGES IN EPIPHYTIC AND SOIL LICHEN COMMUNITIES AS COAL BURNING PROCEEDS IN THIS AREA. ALL THE LICHEN INFORMATION WILL BE INTEGRATED WITH PLANT COMMUNITY DATA GATHERED BY OTHER RESEARCHERS IN THE AREA IN ORDER TO DETERMINE EFFECTS OF SO2 EMISSIONS (AND OTHER COAL-BURNING POLLUTANTS) ON PONDEROSA PINE-GRASSLAND ECOSYSTEMS.

ALGAE IN OPEN, DRINKING WATER RESERVOIRS AND TOXICITY OF SCHIZOTHRIX CALCICOLA

START/ COMPL DATE : 08/77 - 08/78 : FUNDING : EST. - FY 77 / $ 30612

THE OBJECTIVES OF THIS STUDY ARE (1) TO EVALUATE DISTRIBUTION OF ALGAE IN DRINKING WATER TREATMENT PLANTS, (2) INVESTIGATE SOURCES AND OCCURRENCE OF ENDOTOXINS IN DRINKING WATER, (2) PROVIDE USEFUL DATA ON TOXICITY OF ONE SPECIES OF BLUE GREEN ALGA. THE GOAL OF THIS STUDY IS TO PROVIDE GOVERNMENTAL AGENCIES RESPONSIBLE FOR DRINKING WATER QUALITY AND OTHERS WITH VALID AND RELIABLE INFORMATION ON ALGAL TOXICITY AND THUS PROVIDE NEEDED CRITERIA FOR DEVELOPING LIMITS FOR ALGAE AND ENDOTOXINS IN DRINKING WATER. THE PROJECT INCLUDES A FIELD STUDY CONCERNED WITH DISTRI BUTION OF ALGAE AND ENDOTOXINS IN OPEN, FINISHED DRINKING WATER RESERVOIRS AND SELECTED DRINKING WATER TREATMENT PLANTS IN ALLEGHENY COUNTY, PA. THE LABORATORY STUDY FOCUSES ON TOXICITY OF SCHIZOTHRIX CALCICOLA INCLUDING ISOLATION, IDENTIFICATION, BIOASSAYS AND MEASUREMENT OF TOXINS PRODUCED BY THIS SPECIES.

INVESTIGATION OF THE EFFECTS OF COAL-FIRED POWER PLANT EMISSIONS ON TISSUE STRUCTURE OF SELECTED BIRD SPECIES - BIRDS AS INDICATO

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 27154

TASK/EPA CODE :M625A-021 / R805370-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : E PRESTON

INVESTIGATORS : M D KERN COLL. OF WOOSTER

MILE: 07/80 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO IDENTIFY SPECIES OF GRASSLAND BIRDS AND/OR THEIR ORGAN-SYSTEMS WHICH ARE PARTICULARLY SENSITIVE TO THE EM ISSIONS OF COAL-FIRED POWER PLANTS AND CAN BE USED TO MONITOR AND INDICATE AIR QUALITY; AND PREDICT THE IMPACT OF CHRONIC, LOW-LEVEL, NON-LETHAL S TACK EMISSIONS ON THE SURROUNDING ECOSYSTEM. THE STUDY SITE IS A GRASSLAND ECOSYSTEM IN COLSTRIP, MONTANA, IN WHICH TWO COAL-FIRED POWER PLA NTS OPERATE. REPRESENTATIVE GRASSLAND BIRDS SELECTED FOR STUDY AT THE SITE ARE THE WESTERN MEADOWLARK (STURNELLA NEGLECTA), MOURNING DOVE (ZENAIDURA MACROURA), LARK BUNTING (CALAMOSOIZA MELANOCORYS), VESPER SPARROW (PODECETES GRAMINEUS, AND LARK SPARROW (CHONDESTES GRAMMACUS). IN EACH CASE, THE HISTOLOGY OF THE FOLLOWING TISSUES IS EXAMINED BEFORE (197 5-1979) THE POWER PLANTS HAVE GONE ON-LINE; (1) TISSUES WHICH ARE STRESS I NDICATORS; THE ADRENAL AND THYROID GLANDS; (2) TISSUES WHICH BELONG TO THE IMMUNE SYSTEM; THE BURSA OF FABRICIUS, THYMUS, AND SPLEEN; (3) DETOXIFYING TISSUES; THE LIVER, KIDNEY, AND LUNG; AND (4) REPRODUCTIVE TISSUES; THE TESTIS, OVARY, AND OVIDUCT. THIS HISTOLOGICAL INFORMATION WILL BE INT EGRATED WITH (1) MEASURES OF CARCASS AND TISSUE COMPOSITION AND OTHER GROS S MEASUREMENTS MADE ON THE SAME BIRDS, AND (2) INFORMATION ON THE AIR QUAL ITY, WEATHER, AND OTHER ORGANISMS IN THE SAME IMPACTED ECOSYSTEM, IN ORDER TO IDENTIFY RELATIONSHIPS WHICH ARE USEFUL FOR (1) PREDICTING THE BIOLOGICAL EFFECTS OF GIVEN RATES OF POLLUTION CHALLENGE, AND (2) SITING COAL-FIRED POWER PLANTS IN THE GREAT PLAINS REGION.

INVESTIGATION OF A FLUID BED CARBON REGENERATION SYSTEM OF MANCHESTER, NEW HAMPSHIRE

START/ COMPL DATE : 10/77 - 12/80 : FUNDING : EST. - FY 77 / $ 451800
TASK/EPA CODE :C614A-7149 / R805371-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J DEMARCO
INVESTIGATORS : R BEAURIVAGE MANCHESTER CITY WATER WORKS
D PARIS MANCHESTER CITY WATER WORKS
D KITTREDGE MANCHESTER CITY WATER WORKS

MILE: 11/78 -INTERIM REPORT
12/80 -FINAL REPORT

THE OBJECTIVES OF THIS PROJECT WILL BE TO EVALUATE BOTH THE COST AND PERFORMANCE OF A CARBON REGENERATION SYSTEM UTILIZING FLUID BED PR INCIPLES, THE COST AND CAPABILITIES OF A SEMIAUTOMATIC SYSTEM FOR CARBON H ANDLING, AND THE ADSORPTIVE EFFECTIVENESS OF VIRGIN CARBON AND REGENERATED CARBON FOR REMOVAL OF CHLORINATED ORGANIC SUBSTANCES FROM DRINKING WATER. IT HAS RECENTLY BEEN ESTABLISHED THAT THE COMBINATION OF CHLORINE PLUS NATURAL PRECURSOR SUBSTANCES RESULTS IN THE FORMATION OF SU SPECTED HUMAN CARCINOGENS KNOWN AS TRIHALOMETHANES (CHLOROFORM, BROMOFORM, ETC.) GRANULAR ACTIVATED CARBON IS RECOGNIZED AS BEING AN EFFECTIVE MEANS OF REMOVING BOTH TRIHALOMETHANES AND PRECURSORS, BUT LITTLE IS KNOWN ABOUT THE COST AND REMOVAL PERFORMANCE UNDER ACTUAL OPERA TING CONDITIONS. THE GENERAL APPROACH WILL BE TO UTILIZE ONE OF THE FOUR C ARBON FILTERS AT THE TREATMENT PLANT AS A TEST FILTER, TO FILL ONE-HALF OF THE FILTER WITH VIRGIN CARBON, THE REMAINING HALF WITH ONCE-REGENERA TED CARBON, AND THEN TO COMPARE THE RATE OF TRIHALOMETHANE REMOVAL BETWEEN THE FILTERS OVER A REPEATED NUMBER OF REGENERATION CYCLES. CONSTRUCTION OF THE FACILITY IS SCHEDULED TO BEGIN IN APRIL, 1978 AND TO BE COMPLETED IN THE FALL OF 1978. THE CARBON WILL THEN BE REGENERATED ON A NEAR CONT INUOUS BASIS OVER A TWO-YEAR MONITORING AND EVALUATION PERIOD BEGINNING IN JANUARY, 1979. INVESTIGATIVE WORK IS TO BE CARRIED OUT BY THE WATER SUPPLY STAFF OF THE MANCHESTER WATER WORKS WORKING IN CONJUNCTION WITH THE WATER SUPPLY RESEARCH STAFF OF EPA.

CONTINUOUS BIOREACTOR FOR REGENERATION OF ACTIVATED CARBON

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 10316
TASK/EPA CODE :F610C-05 / R805373 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N PLAKS
INVESTIGATORS : S W DREW VIRGINIA POLY. INST. & ST. U.
MILE: 07/77 -START GRANT
07/78 -COMPLETE GRANT

OBJECTIVE: TO DEVELOP, AT LABORATORY SCALE, TECHNOLOGY FOR CONTINUOUSLY REGENERATING, BY BIOLOGICAL ACTION, ACTIVATED CARBON FOR THE CONTROL OF COKE PLANT WASTEWATERS. APPROACH: THE CONCEPT PROPOSED IN THIS PROJECT IS TO SHOW THAT THE CARBON CAN BE REGENERATED CONTINUOUSLY, IN A FLUIDIZED BED REACTOR, BY THE ACTION OF BACTERIA. THE BIOMASS WILL BE OPTIMALLY DEPOSITED AND MAINTAINED BY SHEAR FORCES UPON THE SURFACE OF THE ACTIVATED CARBON SO THAT THERE IS BALANCE BETWEEN DIFFUSION THROUGH THE MICROBIAL SHELL WITH SOME METABOLIC DESTRUCTION OF THE CONTAMINANTS AND SOME ADSORPTION ONTO THE CARBON. THE BENEFITS FROM THIS FLUIDIZED-BED BIO-REACTOR IN COMPARISON TO FIXED-BED ADSORPTION ARE CONTINUOUSLY HIGH ADSORPTIVITY INSTEAD OF DECLINING PERFORMANCE AS IN A FIXED BED AND THE MINIMIZATION OF COSTLY, ENERGY-INTENSIVE THERMAL REGENERATION WITH ITS ATTENDANT ATTRITION. OUTPUT: THE OUTPUT WILL BE IN THE FORM OF A FINAL REPORT.

AMBIENT HYDROCARBON AND OZONE MEASUREMENTS NEAR A REFINERY

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 79000
TASK/EPA CODE :G6258-EA-01 / R805376-01 (GRANT) PRIOR FY76 / $ 650001
PROJECT OFFICER : J J BUFALINI
INVESTIGATORS : H WESTBERG WASHINGTON STATE UNIVERSITY
M W HOLDREN WASHINGTON STATE UNIVERSITY

MILE: 03/79 -FINAL REPORT

THE PRIMARY OBJECTIVE OF THIS STUDY IS TO EXAMINE THE IMPACT OF A PETROLEUM REFINERY ON DOWNWIND AMBIENT AIR QUALITY. MONITORING THE PRODUCTION OF SECONDARY GASEOUS POLLUTANTS SUCH AS OZONE AND OTHER OXIDANTS IN THE PLUME IS AN IMPORTANT GOAL. BOTH GROUND AND AIRCRAFT MONITORING SYSTEMS WILL BE EMPLOYED TO RECORD CHEMICAL AND PHYSICAL CHANGES IN THE PLUME AS IT DISPERSES DOWNWIND OF THE REFINERY. DETAILED ANALYSES FOR HYDROCARBONS, THE OXIDES OF NITROGEN, OZONE, CARBON MONOXIDE, PAN AND SULFUR DIOXIDE WILL BE PERFORMED. THE FIELD PROGRAM WILL CONDUCTED DURING THE SUMMER OF 1977 NEAR A REFINERY THAT IS ISOLATED FROM OTHER MAJOR HYDROCARBON EMISSION SOURCES.

INTERACTIONS OF ACID SULFATES AND THE RESPIRATORY SYSTEM

START/ COMPL DATE : 10/77 - 09/80 : FUNDING : EST. - FY 77 / $ 284900
TASK/EPA CODE :H601D-7367 / R805378-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : - HAZUCHA
INVESTIGATORS : R FRANK UNIV. OF WASHINGTON
T LARSON UNIV. OF WASHINGTON
D COVERT UNIV. OF WASHINGTON
M MORGAN UNIV. OF WASHINGTON
J KOENIG UNIV. OF WASHINGTON
D HOLUB UNIV. OF WASHINGTON
R CHARLSON UNIV. OF WASHINGTON

OBJECTIVES: A) ASSESS THE IMPORTANCE OF NH3 IN NEUTRALIZING INHALED H2SO4 AND IN ALTERING THE IRRITANT EFFECTS ON THE RESPIRATORY SYSTEM, B) COMPARE THE RELATIVE IRRITANCY IN GUINEA PIGS OF TWO SIZES OF H2SO4 AS ENCOUNTERED IN COMMUNITY AIR (ACCUMULATION MODE) ON PULMONARY FUNCTION IN HEALTHY YOUNG ADULTS, ADULTS 55 YEARS AND OLDER AND PATIENTS WITH CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD). APPROACH: A) THE CONCENTRATION OF ENDOGENOUS NH3 IN THE RESPIRATORY SYSTEM AND THE DEGREE AND RATE OF NEUTR ALIZATION OF INHALED H2SO4 AEROSOLS WILL BE MEASURED IN HUMAN SUBJECTS AND DOGS. CATHETER PROBES FOR IN VIVO SENSING OF THESE CHEMICAL PARAMETERS ARE BEING DEVELOPED PRESENTLY. MEASUREMENTS WILL BE MADE ON SUBJECTS IN THE HUMAN EXPOSURE STUDIES: B) SEPARATE GROUPS OF LIGHTLY ANESTHETIZED GUINEA PIGS WILL BE EXPOSED TO TWO SIZES OF H2SO4 AEROSOL; NUCLEI MODE (0.01 TO 1.0 MICRON DIAMETER) AND ACCUMULATION MODE (0.1 TO 1.0 MICRON) AT 100-200 MICRON/CU M, AS A MEASURE OF RESPONSE PLEURAL PRESSURE, TIDAL VOLUME AND FLOW WILL BE MEASURED IN A PLETHYSMOGRAPH USING A PLEURAL CATHETER. ANOTHER GROUP WILL BE EXPOSED DURING CO2-INDUCED HYPERPNEA AS SUBSTITUTE FOR EXERCISE. CLEARANCE OF INSOLUBLE AEROSOLS AS A MEASURE OF RESPONSE WILL BE STUDIED. C) THE GROUPS OF HEALTHY VOLUNTEERS WILL BE EXPOSED TO 100 MICRONS/CU M H2SO4 ACCUMULATION MODE AEROSOL. ELDERLY VO LUNTEERS AND PATIENTS WITH COPD WILL BE EXPOSED TO 1 PPM SO2 AND 1 MG/CU M NACL AEROSOL AT RH APPROXIMATELY 75 PERCENT FOR COMPARISON WITH PREVIOUS STUDIES WITH HEALTHY VOLUNTEERS. EXPOSURE WILL BEGIN AT REST. E XERCISE WILL FOLLOW. EXPOSURE WILL BE VIA MASK. PULMONARY FLOW RESISTANCE, DYNAMIC COMPLIANCE, TOTAL RESPIRATORY RESISTANCE AND PARTIAL FLOW-VOLUME MANEUVERS WILL BE USED TO ASSESS RESPONSE TO THE EXPOSURE.

805379

The principal objective of this project is to estimate the increase of skin cancer that will result from increasing ultraviolet radiation by depleting stratospheric ozone. With the cooperation of the National Center of Health Statistics, we propose to use three new sources of data:

1) cases of skin cancer (largely nonmelanoma) and of keratosis observed by dermatologists in the special Health and Nutrition Examination Survey (HANES) in 65 different localities in the United States.

2) cases of skin cancer, separately melanoma and nonmelanoma by site, observed in the National Ambulatory Medical Care Survey by a sample of physicians in different localities in the United States.

3) cases of skin cancer, separately melanoma and non melanoma by site, observed in the sample survey of Discharges from Short-Stay Hospital Care in different localities in the United States.

DEVELOPMENTAL EVALUATION OF RAPID MICROBIAL BIOASSAYS FOR AQUATIC HERBICIDES, PESTICIDES AND HEAVY METALS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE : M608A-022 / R805383-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T SHIROYAMA
INVESTIGATORS : G A MCPETERS MONTANA STATE UNIVERSITY
MILE: 07/79 -FINAL REPORT

TWO RECENTLY DEVELOPED ALGAL BIOASSAYS FOR TOXIC CHEMICALS IN WATER WILL BE COMPARED WITH THE STANDARD ALGAL ASSAY PROCEDURE: BOTTLE TEST. TEST CHEMICALS WILL INCLUDE COMMONLY USED HERBICIDES, PESTICIDES AND SOME HEAVY METALS. THE RESULTS FROM THE THREE TESTS WILL BE EVALUATED IN TERMS OF EASE OF PERFORMANCE, COMPARABILITY OF RESULTS, EXPENSE AND THE TIME REQUIRED TO CARRY OUT THE PROCEDURES. THE THREE TEST PROCEDURES ARE AS FOLLOWS: 1. THE ALGAL ASSAY PROCEDURE: BOTTLE TEST, COMMONLY USED AT PRESENT AND RECOMMENDED BY THE USEPA. 2. A TEST THAT USES THE INTENSITY OF BACTERIAL LUMINESCENCE AS AN INDEX OF ALGAL OXYGEN EVOLUTION AND HENCE PHOTOSYNTHESIS WHEN THESE TWO ORGANISMS ARE MIXED IN THE PRESENCE OF TEST CHEMICALS. 3. A PROCEDURE THAT EMPLOYS A POLAROGRAPHIC OXYGEN ELECTRODE TO DETERMINE THE RATE OF ALGAL OXYGEN PRODUCTION AS IN #

SUSCEPTIBILITY OF GENETICALLY DEFINED STOCK OF FISH TO CHEMICAL CARCINOGENS

START/ COMPL DATE : 09/77 - 08/78 : FUNDING : EST. - FY 77 / $ 57143
TASK/EPA CODE :G625F-1-08 / R805389-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : K D KALLMAN OSBORN LABS. FOR MARINE SCIS.
MILE: 09/78 -REPORT PRELIMINARY SCREENING DATA
09/79 -REPORT ON FINAL SCREENING OF FIVE COMPOUNDS

THE EFFECTS OF A NUMBER OF POLYCYCLIC AROMATIC HYDROCARBONS (PAH), WHICH ARE SIGNIFICANT POLLUTANTS IN THE NATURAL ENVIRONMENT, WILL BE STUDIED IN GENETICALLY DEFINED STOCKS OF FISH OF XIPHOPHORUS AND RIVULUS. MANY OF THESE COMPOUNDS ARE INVOLVED IN CHEMICAL CARCINOGENESIS IN MAMMALS. OUR AIM IS TO DETERMINE WHETHER STRAIN DIFFERENCES EXIST IN SUSCEPTIBILITY TO PAH-INDUCED CARCINOGENESIS AND WHETHER THIS CAN BE CORRELATED WITH THE D EGREE OF HETEROZYGOSITY. SOME OF THE GENETICALLY DEFINED STOCKS MAY BECOME SENSITIVE INDICATORS FOR CERTAIN KINDS OF POLLUTANTS.

MONITORING PLANT COMMUNITY CHANGES DUE TO FOSSIL FUEL POWER PLANTS IN SOUTHEASTERN MONTANA

START/ COMPL DATE : 07/77 - 07/80 : FUNDING : EST. - FY 77 / $ 52766
TASK/EPA CODE : M625A-023 / R805391-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E PRESTON
INVESTIGATORS : J E TAYLOR MONTANA STATE UNIVERSITY
MILE: 07/80 -FINAL REPORT

OBJECTIVES: A. TO CONTINUE TO MONITOR AIR POLLUTION EFFECTS UPON NATIVE GRASSLAND VEGETATION IN AREAS AFFECTED BY FOSSIL FUEL POWER PLANTS AND ON AREAS ARTIFICIALLY STRESSED WITH AIR POLLUTANTS; B. TO SUPPLY BASELINE INVENTORY INFORMATION, INCLUDING AERIAL PHOTOGRAPHY AND ITS INTERPRETATION, TO A VARIETY OF SCIENTISTS, LAND USERS AND MANAGERS IN EASTERN MONTANA; C. TO PROVIDE RIGOROUS DATA FOR SIMULATION MODELS WHICH CAN BE USED TO PREDICT BIOENVIRONMENTAL CHANGES DUE TO FOSSIL FUEL POWER GENERATION IN OTHER AREAS. APPROACHES: AERIAL AND GROUND PHOTOGRAPHY, SPECIES DIVERSITY (NUMBER AND COVER), AND PHENOLOGY WILL BE RELATED TO POLLUTION STRESSES AND "NORMAL" VARIATION IN COMMUNITY STRUCTURE. PLANS: TWO YEARS' ADDITIONAL FIELD OBSERVATIONS WILL BE INCORPORATED INTO THE COAL-FIRED POWER PLANT PROTOCOL AND A VEGETATIONAL MONITORING SYSTEM.

CRITICAL REVIEW OF VIRUS REMOVAL BY COAGULATION AND PH

START/ COMPL DATE : 06/77 - 06/78 : FUNDING : EST. - FY 77 / $ 15000

06/78 -INTERIM REPORT
06/78 -CONTINUATION FUNDING PACKAGE PROCESSED
06/79 -PROJECT COMPLETED
09/79 -FINAL REPORT PUBLISHED

THE OBJECTIVE OF THE PROPOSED WORK IS TO DEVELOP A METHOD OF CHEMICAL CONTROL OF POTABLE WATER QUALITY TO PREVENT DEGRADATION DURING PASSAGE THROUGH A DOMESTIC DISTRIBUTION SYSTEM. THE STUDY WILL HAVE TWO PHASES (1) FIELD AND (2) LABORATORY. THE FIELD PHASE WILL EVALUATE CHEMICAL PARAMETERS IN A VARIETY OF POTABLE WATER SUPPLIES AND CORRELATE THESE WITH QUALITY DEGRADATION. OF PARTICULAR CONCERN WILL BE THE RELATIONSHIP OF DEGRADATION WITH THE LANGELIER INDEX AND WITH THE ELECTRODE POTENTIAL. THE LABORATORY PHASE WILL FOLLOW THE SAME PROCEDURES WITH WATERS OF CONTROLLED COMPOSITION.

SOIL FILTRATION OF SEWAGE EFFLUENT OF A RURAL AREA

START/ COMPL DATE : 08/77 - 12/79 : FUNDING : EST. - FY 77 / $ 39802
TASK/EPA CODE :L611C-51 / R805401 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L E LEACH
INVESTIGATORS : B R SABEY COLORADO STATE UNIVERSITY
N A EVANS COLORADO STATE UNIVERSITY

MILE: 08/77 -PROJECT INITIATION
THE WORK PLAN IS PRESENTED IN TWO PARTS: (1) A CONTINUATION OF AN EXPERIMENTAL STUDY BEGUN IN 1976; AND (2) AN INVESTIGATION OF THE FEASIBILITY OF LENGTHENING THE OPERATING SEASON BY UNDER-SNOW FALL AND WINTER APPLICATION. THE FIRST EXPERIMENT IS A PLOT DESIGN TO COMPARE: (1) DRAINED VS. NON-DRAINED SITE TREATMENT; (2) ZERO VS. THREE INCHES OF APPLICATION PER WEEK; AND (3) LAGOON EFFLUENT VS. IRRIGATION DITCH WATER. POLLUTANT MOVEMENT IN THE SOIL PROFILE INTO DRAINAGE PIPE OR INTO GROUNDWATER WILL BE MONITORED. BIOMASS YIELD FROM THE PLOTS WILL BE MEASURED. WINTER IRRIGATION POSSIBILITIES WILL BE INVESTIGATED IN FIELD PLOTS PREPARED WITH RIDGES AND FURROWS OF VARIABLE DEPTH AND SPACING ON WHICH AN ICE COVER WILL BE FORMED AS SUPPORT TO THE SNOW OVERBURDEN. AS IN THE FIRST EXPERIMENTS, MOVEMENT OF POLLUTANTS THROUGH THE PROFILE WILL BE MONITORED.

DETERMINATION OF KINETICS OF PHOSPHORUS MINERALIZATION IN SOILS UNDER OXIDIZING CONDITIONS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 29408
TASK/EPA CODE :L611C-48 / R805403-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C G ENFIELD
INVESTIGATORS : R ELLIS KANSAS STATE UNIVERSITY
Y V SUBBARAO KANSAS STATE UNIVERSITY

THE OBJECTIVES OF THIS RESEARCH ARE TO DETERMINE THE KINETICS OF PHOSPHORUS MINERALIZATION IN SOILS UNDER OXIDIZING CONDITIONS AND TO RELATE THESE FINDINGS TO THE MOVEMENT OF PHOSPHORUS IN SOILS. THE REGENERATIVE CAPACITY OF SOILS TO FIX PHOSPHORUS WILL BE STUDIED BY DETERMINING THE INFLUENCE OF RATES OF APPLICATION OF PHOSPHORUS AND INTERVALS BETWEEN APPLICATION ON PHOSPHORUS COMPOUNDS FORMED AND RATES OF TRANSFORMATION OF COMPOUNDS IN SOILS. THE OBJECTIVES WILL BE ACCOMPLISHED BY THE FOLLOWING TECHNIQUES: 1. DETERMINATION OF PHOSPHATE POTENTIALS AT TIME INTERVALS FOR SOILS TO WHICH DIFFERENT RATES OF PHOSPHORUS HAVE BEEN ADDED. PHOSPHATE POTENTIALS WILL BE USED TO IDENTIFY THE PHOSPHORUS COMPOUNDS FORMED AND CHANGES WITH TIME. 2. PHOSPHORUS WILL BE ADDED TO THE SOILS AT DIFFERENT TIME INTERVALS TO DETERMINE THE BEST TIME INTERVAL TO KEEP THE AMOUNT OF SOLUBLE PHOSPHORUS IN THE SOIL SOLUTION AT A MINIMUM TO MINIMIZE THE MOVEMENT OF PHOSPHORUS IN SOILS. 3. SOURCES AND SOLUBILITIES OF ALUMINUM, IRON, AND CALCIUM IN THE SOILS WILL BE DETERMINED IN ORDER TO OBTAIN DATA FOR THESE CATIONS WHICH ARE INVOLVED IN PRECIPITATING PHOSPHORUS IN SOILS.

RESIDENCE TIME DISTRIBUTIONS, DISPERSION AND REENTRAINMENT IN A PILOT-SCALE ELECTROSTATIC PRECIPITATOR

START/ COMPL DATE : 10/77 - 10/79 : FUNDING : EST. - FY 77 / $ 42992
TASK/EPA CODE :F624A-067 / R805404-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L SPARKS
INVESTIGATORS : R M FELDER UNIV. OF NORTH CAROLINA
J K FERRELL UNIV. OF NORTH CAROLINA
K VERGHESE UNIV. OF NORTH CAROLINA

MILE: 09/77 -AWARD GRANT
09/79 -PUBLISH DESIGN MODEL INCORPORATING RESULTS OF RESEARCH

GAS AND SOLID PHASE RESIDENCE TIME DISTRIBUTIONS IN THE NERC CONTROL SYS TEMS LABORATORY PILOT SCALE ELECTROSTATIC PRECIPITATOR WILL BE MEASURED BY TRACER RESPONSE ANALYSIS. THE RESULTS WILL BE USED TO CHARACTERIZE THE FLOW AND MIXING PATTERNS IN THE UNIT, AND TO PROVIDE A DATA BASE FOR T ESTING AND MODIFYING A MODEL FOR ELECTROSTATIC PRECIPITATION FORMULATED BY THE SOUTHERN RESEARCH INSTITUTE. SPECIFIC SYSTEM PROPERTIES TO BE DETERMINED BY ANALYZING THE TRACER RESPONSES WILL INCLUDE THE FR ACTIONAL SNEAKAGE, EXISTENCE AND EXTENT OF STAGNANT ZONES, EFFECTIVE AXIAL DISPERSION IN EACH PHASE, AND RATES OF REENTRAINMENT DUE TO PARTICLE IMPACTION ON THE COLLECTION PLATES, SWEEPAGE IN THE COLLECTION HOPPER, AND RAPPING. THE RESULTS WILL BE USED TO DETERMINE WHICH OF THE SPECIFIED PHE NOMENA MIGHT ACCOUNT IN PART FOR DISCREPANCIES BETWEEN MEASURED COLLECTION EFFICIENCIES AND EFFICIENCIES PREDICTED BY THE SRI MODEL, AND THE MODEL WILL BE MODIFIED TO ACCOUNT FOR THE PHENOMENA FOUND TO BE SIGNIFICANT.

MONITORING SEPTAGE ADDITION TO WASTEWATER TREATMENT PLANTS

START/ COMPL DATE : 08/77 - 11/78 : FUNDING : EST. - FY 77 / $ 143692
TASK/EPA CODE :C6118-7094 / R805406-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R P BOWKER
INVESTIGATORS : B A SEGALL UNIV. OF LOWELL
C R OTT UNIV. OF LOWELL
W B MOELLER UNIV. OF LOWELL

MILE: 08/77 -GRANT AWARDED
09/78 -COMPLETE DATA COLLECTION AT 3 SITES
11/78 -FINAL REPORT

THE OBJECTIVE OF THE PROJECT IS TO EVALUATE THE EFFECTS OF SEPTIC TANK WASTE ADDITION TO SECONDARY WASTEWATER TREATMENT FACILITIES. RESEARCH WILL DETERMINE THE EFFECTS OF ADDING INCREASING QUANTITIES OF THIS WASTE TO AN EXPERIMENTAL PLANT, A TRICKLING FILTER AND TO AN EXTENDED AE RATION PLANT. THE IMPACT ON SEDIMENTATION, BIOLOGICAL OXIDATION AND SLUDGE HANDLING PROCESSES WILL BE EVALUATED AT EACH LOADING RATE. THE RESEARC H ENTAILS MONITORING WASTE ADDITION TO THE THREE PLANTS. WASTE WILL BE ADD ED CONTINUOUSLY AT THE SEVERAL LOADING RATES, AND IN ADDITION PERIODICALLY AS SHOCK LOADS. PHYSICAL, CHEMICAL AND BIOLOGICAL CHARACTERISTICS OF THE WASTEWATER STREAM ARE TO BE MONITORED THROUGHOUT THE TREATMENT P LANTS. ANALYSES WILL BE PERFORMED AT THE SANITARY ENGINEERING LABORATORIES ON THE CAMPUS OF THE UNIVERSITY OF LOWELL, LOWELL, MASSACHUSETTS.

EFFECT OF ENVIRONMENTAL POLLUTANTS ON SUSCEPTIBILITY OF TROUT TO VIRAL AND BACTERIAL PATHOGENS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 42576
TASK/EPA CODE : M608A-033 / R805407-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D KNITTEL
INVESTIGATORS : J L FRYER — OREGON STATE HIGHER EDUC. SYS
F M HETRICK — UNIV. OF MARYLAND

MILE: 09/79 -FINAL REPORT

THE GENERAL OBJECTIVES OF THE STUDY ARE TO DETERMINE THE EFFECT OF SELECTED ENVIRONMENTAL POLLUTANTS ON SUSCEPTIBILITY OF TROUT TO INFECTIOUS HEMATOPOIETIC NECROSIS VIRUS (IHN), AND TO A BACTERIAL FISH PATHOGEN, SUCH AS FLEXIBACTER COLUMNARIS OR VIBRIO ANGUILLARUM. POLLUTANTS TO BE EXAMINED WILL INCLUDE THE TRIAZINE HERBICIDES, ATRAZINE AND PROMETRYNE, AND PULP MILL WASTES (E.G. SULFITE LIQUOR). SPECIFICALLY, THEY WILL BE EXAMINED FOR (1) THEIR TOXICITY FOR A CULTURED LINE OF SALMONID FISH CELLS AND THEIR EFFECT ON IHN VIRUS REPLICATION IN THESE CELLS, (2) THEIR ABILITY TO ACTIVATE OVERT DISEASE IN JUVENILE TROUT SUSPECTED TO BE CARRIERS OF THE VIRAL OR BACTERIAL PATHOGEN, (3) THEIR ABILITY TO INDUCE DISEASE IN YOUNG TROUT EXPOSED TO SUBLETHAL DOSES OF THE PATHOGENS, (4) THEIR EFFECT ON THE LENGTH OF THE INCUBATION PERIOD IN TROUT INFECTED WITH LETHAL DOSES OF ONE OF THE PATHOGENS, (5) THEIR EFFECT ON VIRUS TITERS OR BACTERIA COUNTS IN TISSUES OF EXPERIMENTALLY INFECTED FISH. FOR THE IN VIVO EXPERIMENTS, JUVENILE TROUT 10-13 CM LONG WILL BE HELD IN TANKS EQUIPPED FOR RECIRCULATION OF WATER AT 10 C. THE POLLUTANT AND/OR THE PATHOGEN UNDER STUDY WILL THEN BE INCORPORATED AT VARIOUS APPROPRIATE CONCENTRATIONS IN THE WATER, AND THE INDICATED OBSERVATIONS AND ASSAYS PERFORMED ON THE FISH TO PROVIDE INFORMATION ON THE STATED OBJECTIVES.

RESPONSE OF BIRDS TO ENVIRONMENTAL STRESS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 29031
TASK/EPA CODE :M625A-024 / R805409-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E PRESTON
INVESTIGATORS : D S FARNER UNIV. OF WASHINGTON
J C WINGFIELD UNIV. OF WASHINGTON
R S DONHAM UNIV. OF WASHINGTON

MILE: 08/78 -FINAL REPORT
MICRO-RADIO COMPETITIVE-PROTEIN-BINDING AND MICRO-RADIOIMMUNOASSAYS FOR CORTISONE IN AVIAN PLASMA HAVE ALREADY BEEN DEVELOPED AND ADAPTED FOR FIELD INVESTIGATIONS IN THIS LABORATORY. SINCE THESE METHOD REQUIRE LESS THAN 100 MICROLITERS OF PLASMA, INDIVIDUAL BIRDS CAN BE SAMPLED, MARKED AND RELEASED FOR SUBSEQUENT CAPTURE AND SAMPLING. THE METHOD HAS BEEN "FIELD-TESTED" EXTENSIVELY ON WHITE-CROWNED SPARROWS, ZONOTRICHIA LEUCOPHRYS GAMBELII AND Z.L. PUGETENSIS. IT IS PROPOSED TO DEVELOP THIS SYSTEM FURTHER AS A MEANS OF "EARLY DETECTION" OF ENVIRONMENTAL STRESS IN POPULATIONS OF BIRDS. USING THESE METHODS, FIRST ON WHITE-CROWNED SPARROWS, THE FOLLOWING ARE PROPOSED: (1) PROCUREMENT OF BASE-LINE DATA ON DAILY CYCLES IN PLASMA CORTICOSTERONE; (2) PROCUREMENT OF ADDITIONAL DATA ON EFFECTS OF HANDLING AND HOLDING IN CAGES; (3) EXAMINATION OF EFFECTS OF INDUCED STRESS IN FIELD (DISTURBANCE OF FLOCKS, HARASSMENT OF TERRITORIAL BIRDS, ARTIFICIAL DISTURBANCE OF HABITAT...); (4) DETERMINATION OF METABOLIC CLEARANCE AND HALF-LIFE OF CORTICOSTERONE IN BIRDS; AND (5) OBSERVATION OF EFFECTS OF "ARTIFICIAL STRESS" (IMPLANTATION OF CORTICOSTERONE IN SILASTIC TUBES IN TERRITORIAL BIRDS). COMPARABLE MICROASSAYS HAVE BEEN DEVELOPED FOR TESTOSTERONE AND ESTRADIOL. THE AVIAN RADIOIMMUNOASSAY OF FOLLETT, SCANES, AND CUNNINGHAM FOR LUTEINIZING HORMONE (LH) HAS BEEN MODIFIED FOR PASSERINE BIRDS. ACCURATE ESTIMATES OF LH, SEX HORMONE AND CORTICOSTERONE CAN BE MADE FROM 200 MICROLITERS OF PLASMA FROM BIRDS THAT CAN BE BANDED AND RELEASED FOR SUBSEQUENT CAPTURE AND SAMPLING. LAPAROTOMY CAN BE PERFORMED ON THESE BIRDS FOR ASSESSMENT OF GONADAL STATE. FOR LH AND SEX HORMONES DATA COMPARABLE TO CORTICOSTERONE (1-3 AND 5) WILL BE OBTAINED, INSOFAR AS POSSIBLE, BY REPEATED SAMPLING OF INDIVIDUAL BIRDS. SAMPLES WILL BE ANALYZED FROM A CARNIVORE, THE WESTERN MEADOWLARK, STURNELLA NEGLECTA, AT THE EPA MONTANA COAL-FIRED POWER PLANT PROJECT, COLSTRIP, TO EVALUATE THE SIGNIFICANCE OF HISTOLOGICAL AND GRAVIMETRIC OBSERVATIONS ON ADRENAL GLANDS.

IMPACT OF OXIDANT AIR POLLUTANTS ON A WESTERN CONIFEROUS FOREST-ECOSYSTEM

START/ COMPL DATE : 07/77 - 05/80 : FUNDING : EST. - FY 77 / $ 262000

MILE: 05/80 -FINAL REPORT

THE PROPOSED WORK IS THE CONTINUATION OF A STUDY, PREVIOUSLY FUNDED BY EPA CONTRACTS, TO DETERMINE THE EFFECT OF LONG TERM EXPOSURE TO OXIDANT AIR POLLUTANTS ON A WESTERN CONIFEROUS FOREST ECOSYSTEM AND TO DEVELOP PREDICTIVE MODELS FOR THE SYSTEM. NINETEEN MAJOR PLOTS WERE ESTABLISHED ALONG A 35 MILE LONG TRANSECT WITH AN OXIDANT POLLUTANT GRADIENT, SEVERAL OTHER SMALLER SATELLITE PLOTS HAVE ALSO BEEN ESTABLISHED FOR SPECIAL STUDIES AND ONE LARGE PLOT IS USED TO STUDY TREE MORTALITY. A MONITORING NETWORK IS ESTABLISHED TO RECORD CLIMATE AND POLLUTANT CONDITIONS. OTHER SUBPROJECTS DESIGNED TO EVALUATE POLLUTANT EFFECTS INCLUDE: TREE GROWTH, RATING OF VISIBLE POLLUTANT INJURY ON MAJOR TREE SPECIES; POPULATION DYNAMICS STUDY WITH BARK BEETLE; MEASURE RATE OF ACCUMULATION AND DECOMPOSITION OF LITTER; MEASURE PRECIPITATION, SOIL MOISTURE, AND SOIL TEMPERATURE; MEASURE REPRODUCTION (CONE AND SEED PRODUCTION) OF MAJOR PINE SPECIES KNOWN TO BE AFFECTED BY THE POLLUTANTS; EVALUATE THE RESPONSE OF PATHOGENIC ORGANISMS TO AIR POLLUTANTS; DETERMINE RATE OF NEW SEEDLING ESTABLISHMENT AND IDENTIFY ORGANISMS RESPONSIBLE FOR DAMPING-OFF; EVALUATE MORTALITY OF TREE SPECIES AND DESCRIBE SUCCESSIONAL PATTERNS. DATA COLLECTED WILL BE STORED IN AN ESTABLISHED DATA MANAGEMENT SYSTEM AND WILL BE USED IN THE DEVELOPMENT AND TESTING OF PREDICTIVE MODELS.

805411

This is a proposal by the Bureau of Business and Economic Research to conduct economic-social-institutional research for EPA under the BACER Program in order to assist the United States to:

a) estimate economic and social consequences of ozone depletion

b) evaluate the benefits and costs of alternative policies for the control of potential anthropogenic reduction of the ozone with special attention to fluorocarbon emissions from the manufacture and use of aerosol sprays, and

c) provide support for the preparation by EPA of reports concerning economic aspects of atmospheric management, and

d) identify gaps and deficiencies, which if corrected would improve the basis for management decisions affecting climate and health.

Phase I will consist of an intensive study of the state-of-the-art to provide the best available information for analysis of alternative policies for limiting damage to the ozone layer and Phase II will identify remedies to reduce uncertainty in decision making.

The research tasks will include assessing available research, updating previous benefit-cost analysis of controlling changes in ozone, comparing the impacts of alternative regulatory instruments, providing an analysis of economic concepts involved, examining intergenerational issues, exploring international implications, evaluating equity and distributional effects and reducing gaps in information needed for decision making.

SULFIDE PRECIPITATION OF HEAVY METALS

START/ COMPL DATE : 09/77 - 11/78 : FUNDING : EST. - FY 77 / $ 93000

09/78 -DRAFT FINAL REPORT
11/78 -FINAL REPORT RECEIVED

OBJECTIVES: TO COMPARE THE SULFIDE AND HYDROXIDE PRECIPITATION PROCESSES FOR THE REMOVAL OF HEAVY METALS, INCLUDING COPPER, CHROMIUM, ZINC, IRON, CADMIUM AND NICKEL, FROM INDUSTRIAL WASTEWATER STREAMS. THE COMPARI SON WILL INCLUDE: THE COMPLETENESS OF REMOVAL, THE FULL SCALE INSTALLATION AND OPERATING COSTS, AND A 12-MONTH EXPOSURE STUDY OF THE LEACHING CH ARACTERISTICS OF THE SLUDGES, BOTH RAW AND ADMIXED WITH BINDING MATERIALS.
APPROACH: PILOT SCALE PLANTS WILL PROCESS UP TO 190 LITER (50 GALLON) SAMPLES OF WASTEWATERS IN THE SULFIDE, HYDROXIDE, AND COMBINED SULFIDE - HYDROXIDE PROCESSES. SAMPLES OF SLUDGE WILL BE COLLECTED FROM THE PILOT SCALE PLANTS, AND FROM INDUSTRIAL TREATMENT PLANTS USING THE PROCESSES. THE SLUDGE SAMPLES WILL BE EXPOSED IN SMALL ROOF-RACK LYSIMETERS, AND IN 0-76 CUBIC METER (1 CUBIC YEAR) LANDFILL-TYPE LYSIMETERS. HEAVY METAL CONCENTRATIONS WILL BE DETERMINED IN THE PILOT SCALE PLANT STREAMS AND IN THE SLUDGE LEACHATES PRINCIPALLY BY FLAMELESS ATOMIC ABSORPTION SPECTROSCOPY.

FUNDAMENTAL CONSIDERATIONS IN THE PREPARATION OF REFUSE DERIVED FUELS

START/ COMPL DATE : 08/77 - 08/79 : FUNDING : EST. - FY 77 / $ 130000
TASK/EPA CODE :C624A-7010 / R805414-01 (GRANT) PRIOR FY76 / 1

G SALVAGE UNIV. OF CALIFORNIA
MILE: 08/77 -INTERIM REPORT ON PRODUCING D-RDF (BASIC THEORY)
08/79 -PROJECT COMPLETED
12/79 -FINAL REPORT PUBLISHED

THE GRANTEE HAS DEVELOPED FUNDAMENTAL RELATIONSHIPS INVOLVED IN THE SIZE REDUCTION OF MUNICIPAL SOLID WASTE (MSW). ADDITIONAL RESEARCH HAS BEEN CONDUCTED ON FINE GRINDING OF MSW. THE OBJECTIVE OF THIS RESEARCH IS TO EXPLORE AND DEVELOP THE THEORETICAL RELATIONSHIPS INVOLVED IN THE PRODUCTI ON OF DENSIFIED FORMS OF REFUSE DERIVED FUELS. THE IMPORTANT DEPENDENT AND INDEPENDENT VARIABLES WHICH WILL FULLY CHARACTERIZE D-RDF FORMATION WILL BE INDENTIFIED. EXPERIMENTS WILL THEN BE PERFORMED TO MEASURE THESE VARIABLES. BASIC RELATIONSHIPS WILL THEN BE DEVELOPED TO HELP DESIGN AND PREDICT THE PERFORMANCE OF A RDF DENSIFICATION PROCESS.

FIELD EVALUATION OF ROCK FILTERS FOR REMOVAL OF ALGAE FROM LAGOON EFFLUENTS

START/ COMPL DATE : 07/77 - 06/79 : FUNDING : EST. - FY 77 / $ 59950
TASK/EPA CODE :C6118-7045 / R805416-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R F LEWIS

MILE: 07/77 -GRANT PACKAGE PROCESSED
09/77 -GRANT AWARDED TENTATIVE
03/79 -FIELD WORK COMPLETED
09/79 -PROJECT COMPLETION
03/80 -FINAL REPORT PUBLISHED

THIS STUDY INVOLVED THE EVALUATION OF THE OPERATIONAL CHARACTERISTICS OF A ROCK FILTER FOR REMOVAL OF ALGAE FROM LAGOON EFFLUENTS, AN OPERATING FILTER AT VENATA, OREGON WAS MAINTAINED OVER A 12-MONTH PERIOD; THE PARAMETERS MONITORED INCLUDED BOD5, TSS, TVSS, TKN, NH4 PLUS OR MINUS N, AND CHLOROPHYLL. FROM THE OPERATING DATA, A COMPUTER MODEL OF THE FILTER WAS DEVELOPED AND VERIFIED. THE MODEL WAS USED TO PREDICT THE LONG-RANGE OPERATIONAL CHARACTERISTICS AFTER SIGNIFICANT BIOLOGICAL SOLIDS HAD COLLECTED.

805417

The Congress will provide a mechanism for bringing together scientists from all over the world to discuss mutual problems concerned with controlling and managing economically important pests. Principles of maintaining or improving our environment while increasing food production will be emphasized. The Congress is being organized by five scientific societies which represent plant pest management (APS, ES, SONY, ACS, WSSA).

The objective of this study is to quantify the biological and water quality changes of a small stream as it passes through the San Jose, California urban area. The selected stream has no industrial or municipal point discharges and the expected stream quality gradient will be a function only of non-point urban runoff. Detailed field measurements will be periodically conducted over a period of one year both upstream of the urban area and at selected locations within the urban area.

Another task of the project is to measure the storm water pollutant removal effectiveness and water quality changes that occur within an idealized catchbasi

This project will be conducted in conjuction with a current EPA sponsored demonstration project in San Jose titled "Demonstration of Non-Point Pollutant Abatement thru Improved Street Cleaning Practices".

POLYNUCLEAR AROMATIC COMPOUNDS - SYNTHESIS AND PURIFICATION

START/ COMPL DATE : 05/77 - 05/78 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :G7128-BE-04 / R805419-01 (GRANT) PRIOR FY76 / $ 400001
PROJECT OFFICER : J MEEKER
INVESTIGATORS : E J EISENBRAUN OKLA. ST. UNIV.
MILE: 05/78 -DELIVERY OF COMPOUNDS
05/79 -DELIVERY OF COMPOUNDS
05/80 -DELIVERY OF COMPOUNDS

THE SYNTHESIS AND/OR PURIFICATION OF HIGH-PURITY (99.9% GOAL) POLYNUCLEAR AROMATIC COMPOUNDS, CHIEFLY HYDROCARBONS, ARE OF THE TYPES FOUND IN THE PRODUCTS OF INCOMPLETE COMBUSTION (AUTOMOBILE EXHAUST GASES, STACK GASES, COKING OPERATIONS), STILL BOTTOMS, AND HEAVY FUEL OIL FROM SPILLS, AND HENCE APPEAR AS ENVIRONMENTAL POLLUTANTS. IN GENERAL, KNOWN SYNTHESIS ROUTES WILL BE USED, BUT THEIR IMPROVEMENT WILL BE SOUGHT THROUGH USE OF NEW REAGENTS AND TECHNIQUES. HIGH-PRESSURE LIQUID CHROMATOGRAPHY AND/OR ZONE REFINING WILL BE INCLUDED IN THE PURIFICATION PROCEDURES. MODERN ANALYTICAL TECHNIQUES (GLC, LC, TLC, NMR, MASS, AND OTHER SPECTROMETRIC TECHNIQUES WILL BE USED FOR IDENTIFYING COMPOUNDS AND ESTABLISHING THE PURITY OF THE SYNTHESIS PRODUCTS.

The objectives of this proposal are to develop and apply a method for assessment of effects of prenatal exposure to pesticides, utilizing postnatal examination of variations in skeletal development in the mouse. Changes in frequency of occurrence or severity of more than 80 normally occurring variants will be examined at 60 days postnatal in alizarin-stained skeletons, both in the articulated and disarticulated state, following exposure in utero to the pesticide under investigation. Preliminary studies with the herbicides Trifluralin and 2,4,5-T have been completed and allow detection of exposure to either of these substance based on parameters of number of traits affected, magnitude of response and specifity of response. Studies with Captan and Thalidomide did not result in an ability to detect prenatal exposure.

APPLICATION OF THE NON-POINT SOURCE MODEL TO AN AGRICULTURAL WATERSHED

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 40000

P IMPERATO RESOURCE MGT. ASSOCIATES

MILE: 10/77 -START OF GRANT
10/78 -FINAL REPORT

THE NON-POINT SOURCE (NPS) POLLUTION LOADING MODEL HAS BEEN DEVELOPED BY EPA (EPA-600/3-76-083, 1976) AS A WATER QUALITY TOOL. THE USEFULNESS OF THE MODEL TO MANAGEMENT AGENCIES MUST BE PROVEN BY APPLICATION OF VA RIOUS PHYSIOGRAPHIC REGIONS AND IN LARGE WATERSHEDS. THE OBJECTIVE OF THIS RESEARCH IS TO APPLY THE NPS MODEL TO A TRIBUTARY SUB-BASIN OF THE SANDUSKY RIVER IN THE TILL PLAIN AREA OF NORTHERN OHIO. EIGHTY PERCENT OF THIS HONEY CREEK WATERSHED (DRAINAGE AREA OF 187 SQUARE MILES) IS DEVOTED TO ROW AND FIELD CROPS. A COMPUTERIZED LAND RESOURCE INFORMATION SYSTEM HAS BEEN DEVELOPED AND WATER CHEMISTRY MONITORED EXTENSIVELY DURING THE PA ST YEAR, FACILITATING CALIBRATION. THE NPS MODEL WILL BE EVALUATED FOR ITS CAPACITY TO PREDICT NUTRIENT, PESTICIDE, AND SEDIMENT TRANSPORT F ROM THE WATERSHED IN TERMS OF EXISTING FARM PRACTICES AND ALTERNATIVE LAND MANAGEMENT OPPORTUNITIES. A REPORT DESCRIBING THE RESULTS OF THE RESEARCH WILL BE PREPARED.

805422

Partial support is requested for the Satellite A of the Statistical Ecology Program of the Second International Ecological Congress. An international group of scientists from various disciplines relating to ecological abundance, diversity, and biomonitoring and assessment of environment will convene for research discussion and collaboration on the quantification and application of ecological concepts.

Modeling has had a strong influence on the development of ecological concepts; statistics has played a major role in ecological applications and management. This program will bring together these parallel lines of development, with the aim of better identification of, and solution of, quantifiable problems in ecology.

Emphasis in the Satellite A portion will be on abundance and diversity: how can mathematical and statistical methods be used to improve the measurement of abundances and diversities, hence improve the empirical foundations of the concepts surrounding these notions? Conversely, how can the concepts better guide the choice and utilization of mathematical formalism to meet the needs of contemporary environmental problems?

One hundred research participants are expected.

PLANS FOR INVESTIGATION OF NONSTEADY STATE PHENOMENA OF STREAM SEDIMENTATION & EFFECTS ON STREAM COMMUNITIES & SALMONID POPU

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 45000
TASK/EPA CODE :M608A-026 / R805423-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : M A SHIRAZI

INVESTIGATORS : C E WARREN OREGON STATE HIGHER EDUC. SYS
W K SEIM OREGON STATE HIGHER EDUC. SYS

MILE: 10/78 -FINAL REPORT

THE GENERAL OBJECTIVE OF THIS PROJECT IS TO DEVELOP A COMPREHENSIVE RESE ARCH PLAN FOR INVESTIGATION OF NONSTEADY STATE PHENOMENA OF STREAM SEDIMEN TATION AND ITS EFFECTS ON BIOLOGICAL COMMUNITIES AND SALMONID POPULATIONS. THE RESEARCH PLANNED WILL BE INTENDED TO PROVIDE THE UNDERSTANDING NECES SARY TO SPECIFY WATERSHED MANAGEMENT PRACTICES THAT WOULD MINIMIZE HARMFUL EFFECTS OF STREAM SEDIMENTATION. INVESTIGATIONS TO BE PLANNED WILL INCLUDE LABORATORY STREAM, EXPERIMENTAL STREAM CHANNEL, AND FI ELD STUDY APPROACHES. EXTANT THEORY AND MODELS WILL BE TAKEN INTO ACCOUNT, AND CONSIDERATION WILL BE GIVEN TO MATTERS OF WATERSHED AND STREAM CLASSIFICATION. A PRELIMINARY RATIONALE FOR INTEGRATION, GENERALI ZATION, AND APPLICATION OF RESULTS OF PLANNED INVESTIGATIONS WILL BE DEVEL

RELATIONSHIP BETWEEN BLACK MANGROVE FOREST AND ESTUARINE WATERS

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 35000
TASK/EPA CODE :M608C-027 / R805424-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H V KIBBY
INVESTIGATORS : A LUGO STATE UNIVERSITY OF FLA. SYS.
MILE: 07/78 -FINAL REPORT

EXPORTS AND IMPORTS OF DISSOLVED AND PARTICULATE ORGANIC MATTER WILL BE MEASURED FROM ELECTED BLACK MANGROVE FORESTS IN THE WEST COAST OF FLORIDA. RESULTS SHOUL SHOW NET EXPORTS OF ORGANIC MATTER FROM BLACK MANGROVES TO ESTUARINE WATERS. THEY SHOULD ALSO SHOW THAT BLACK MANGROVE STANDS THAT ARE APPARENTLY ISOLATED FROM THE SEA DO HAVE PERIODIC EXCHANGES WITH THE SEA AND THAT THESE EXCHANGES ARE IMPORTANT TO THE MAINTENANCE OF REGIONAL PRODUCTIVITY.

RELATIONSHIP BETWEEN BLACK MANGROVE FOREST AND ESTUARINE WATERS

MILE: 07/78 -FINAL REPORT

TIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. EXPORTS AND IMPORTS OF DISSOLVED AND PARTICULATE ORGANIC MATTER WILL BE MEASURED FROM SELECTED BLACK MANGROVE FORESTS IN THE WEST COAST OF FLORIDA. RESULTS SHOULD SHOW NET EXPORTS OF ORGANIC MATTER FROM BLACK MANGROVES TO ESTUARINE WATERS. THEY SHOULD ALSO SHOW THAT BLACK MANGROVE STANDS THAT ARE APPARENTLY ISOLATED FROM THE SEA DO HAVE PERIODIC EXCHANGES WITH THE SEA AND THAT THESE EXCHANGES ARE IMPORTANT TO THE MAINTENANCE OF REGIONAL PRODUCTIVITY.

FEASIBILITY OF USING CHLORINE DIOXIDE IN THE DISINFECTION OF MUNICIPAL WASTEWATER EFFLUENTS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 69030
TASK/EPA CODE :C6118-7057 / R805426-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M C MECKES
INVESTIGATORS : P V ROBERTS STANFORD UNIVERSITY
P L MCCARTY STANFORD UNIVERSITY
M REINHARD STANFORD UNIVERSITY

MILE: 07/77 -PACKAGE PREPARED
09/77 -PROJECT START
06/79 -PROJECT COMPLETED
09/79 - FINAL REPORT
03/80 -FINAL REPORT AVAILABILITY

CHLORINE DIOXIDE WILL BE EVALUATED AS AN ALTERNATIVE TO CHLORINE FOR THE DISINFECTION OF WASTEWATER. PRINCIPAL CRITERIA ARE: (A) EFFECTIVENESS IN KILLING FECAL COLIFORM BACTERIA, AND (B) COST OF GENERATION AND APPLICATION. THE DOSE-KILL RELATIONSHIP WILL BE INVESTIGATED IN LABORATORY-SCALE DISINFECTION EXPERIMENTS, IN WHICH THE EFFECTS OF DOSE TIME, PH AND TEMPERATURE KILL WILL BE STUDIED. BASED ON THESE EXPERIMENTS AND A SURVEY OF THE SCIENTIFIC LITERATURE, USERS' EXPERIENCE, AND COMMERCIALLY AVAILABLE GENERATION TECHNOLOGY, A CONCEPT FOR DISINFECTION FACILITIES WILL BE DEVELOPED AND TESTED AT PILOT SCALE. PRELIMINARY DESIGN AND COST ESTIMATION OF FACILITIES IN THE RANGE OF 1 MGD TO 100 MGD WILL PROVIDE THE BASIS OF AN EVALUATION OF ECONOMIC FEASIBILITY. THE COMPARATIVE EFFECTIVENESS OF CHLORINE AND CHLORINE DIOXIDE IN KILLING COLIFORMS AND VIRUS WILL BE DETERMINED IN A LIMITED NUMBER OF PARALLEL EXPERIMENTS, AS WILL THE FORMATION OF VOLATILE, CHLORINATED ORGANIC SUBSTANCES.

The research work conducted under this project will be dedicated to the development of a reliable, convenient and universally applicable method for the determination of total carbon in atmospheric particulate samples. It is also expected that a qualitative description of the majority of organic species present in atmospheric particulate matter be achieved. This will provide, most immediately, a sound basis for the development of the total carbon method. It will also provide essential information needed to develop other analytical methods as well as in the fundamental understanding of atmospheric chemistry. The work described and the results expected will provide a direct and significant benefit to the development of more effective atmospheric pollution control strategies.

It is planned to attack the proposed research in the following fashion: (1) investigate the use of selective solvent extraction coupled with high performance liquid chromatography and total carbon measurement instrumentation in separating the organic carbon compound fractions of atmospheric samples into classes and subsequently into individual species, and (2) develop and evaluate sensitive instrumental methods of organic carbon measurements for bulk and size separated samples collected on glass and teflon substrates. These techniques will include oxidation by combustion, atomic oxygen and wet chemical procedures (using both extracted and unextracted samples) with subsequent CO_2 detection.

This research effort is to help evaluate the human health risk of prolonged exposures to mineral fibers. The project will employ four different research methodologies to obtain information on the carcinogenicity of mineral fibers as found in the Duluth, Minnesota water supply prior to mineral fiber removal.

Two major classes of investigation will be undertaken:

1. A retrospective epidemiological evaluation of the incidence of cancers from all sites occurring within the target population.

    a. comparative analysis of age and sex

    b. a case-by-case review of all cancers found within the population and evaluation of cancers by site relative to morbidity rates from the Third Naitonal Cancer Survey and the SEEK program of the N.C.I.

These comparisons will be analyzed with consideration given to the environmental monitoring data compiled from the fourth part of the project (Environmental Surveillance.)

2. The second overall method of risk assessment will be an in-vitro study employing the so-called Ames screening method for determination of carcinogenicity followed up by use of mammalian cell cultures in an attempt to develop a dose-response relationship between the level of mineral fibers and degree of mutagenicity.

805429

To improve corn soil insect population assessment and damage prediction capabilities, and develop soil insect pest management strategies for implementation.

RESTORATION OF MOSES LAKE BY DILUTION

START/ COMPL DATE : 08/77 - 07/80 : FUNDING : EST. - FY 77 / $ 110000
TASK/EPA CODE :M412A-28 / R805430-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K W MALUEG
INVESTIGATORS : E B WELCH UNIV. OF WASHINGTON
MILE: 07/80 -FINAL REPORT

THE RESTORATION OF MOSES LAKE IN EASTERN WASHINGTON STATE HAS BEEN PLANNED IN THREE PHASES. THE PRINCIPAL RESTORATIVE TECHNIQUE IS THE REDUCTION OF PHOSPHORUS CONCENTRATION BY DILUTION WITH COLUMBIA RIVER WATER THAT IS LOW IN P (ABOUT 25 MICRON G/1). THE THREE PHASES ESSENTIALLY INVOLVE THREE DIFFERENT SECTIONS OF THE LAKE. THE PURPOSE OF THIS PROJECT IS TO EVALUATE THE EFFECTIVENESS OF DILUTION WATER ADDITION AS A RESTORATIVE TECHNIQUE IN MOSES LAKE AND TO DETERMINE THE OPTIMUM QUANTITY AND TIMING OF THE ADDITION THAT WILL PROVIDE THE MAXIMUM BENEFIT IN TERMS OF REDUCED ALGAL BIOMASS. THE APPROACH IS TO COMPREHENSIVELY DETERMINE NUTRIENT, ALGAL AND CONSERVATIVE PROPERTIES AT SEVERAL SECTIONS OF THE LAKE DURING THREE SUMMER PERIODS WHEN DILUTION WATER IS BEING ADDED TO THE LAKE BY COMPARING OBSERVED WITH EXPECTED AVERAGE CONCENTRATIONS IN THE VARIOUS SECTIONS. THE RELATIVE COMBINED IMPACT OF SUCH NEGATIVE FACTORS AS P RESUSPENSION FROM SEDIMENTS, RELEASE FROM CARP AND UPLAKE RETURN BY WIND CAN BE EVALUATED. EXPECTED CONCENTRATIONS CAN BE ESTIMATED BY A SIMPLE CONTINUITY EQUATION AND PREVIOUS RESULTS FROM A PHYSICAL MODEL. AN AVERAGE CONCENTRATION BETWEEN 50 AND 60 MICRON G/1 P WAS EXPECTED IN THE LAKE SECTION TREATED DURING PHASE ONE. THAT IS COMPARED TO THE NORMAL LEVEL OF ABOUT 180 MICRON G/L. A REDUCTION OF 80 PERCENT IN ALGAL BIOMASS WAS ALSO EXPECTED. THESE CHANGES SHOULD RESULT FROM AN ADDITION OF 1000 CFS OF DILUTION WATER FOR TWO TEN-DAY PERIODS INTERSPERSED WITH TWO 30-DAY, NON-DILUTION PERIODS. ACTUAL TEST CONDITIONS WILL DEPEND TO A LARGE EXTENT ON WATER AVAILABILITY.

BIOSYNTHESIS OF N-NITROSO COMPOUNDS FROM TRACE LEVEL PRECURSORS

START/ COMPL DATE : 09/77 - 12/79 : FUNDING : EST. - FY 77 / $ 35600
TASK/EPA CODE :J601F-05 / R805431-01 (GRANT) PRIOR FY / $ 644001
PROJECT OFFICER : J SANTOLUCITO
INVESTIGATORS : S S EPSTEIN UNIV. OF ILLINOIS
Z M IQBAL UNIV. OF ILLINOIS
MILE: 09/78 -REPORT ON ANALYTICAL METHOD FOR DETECTION OF NITROSAMINES
09/79 -REPORT ON BIOSYNTHESIS OF DIMETHYL NITROSAMINE IN THE MOUSE
12/79 -REPORT ON A STRATEGY FOR CARCINOGEN PRECURSOR EXPOSURE MONIT

OBJECTIVE: TO STUDY THE IN VIVO BIOSYNTHESIS OF N-NITROSO COMPOUNDS FROM TRACE LEVEL PRECURSORS UNDER CONDITIONS REFLECTING ENVIRONMENTAL EXPOSURE. APPROACH: THESE STUDIES ARE BASED ON THE QUANTITATIVE IDENTIF ICATION OF THE BIOSYNTHESIZED N-NITROSO COMPOUNDS USING THE THERMAL ENERGY ANALYZER TECHNIQUES WHICH ARE SENSITIVE TO PPT. LEVELS. INCLUDED ARE TIME- AND DOSE-DEPENDENCE OF DIMETHYL NITROSAMINE FOLLOWING ADMINISTRAT ION OF NITRITE AND DIMETHYLAMINE AND ZIRAM, RESPECTIVELY, AND BIOSYNTHESIS OF DI-N-PROPYLNITROSAMINE, N-NITROSOCARBARYL AND N-NITROSOATRAZINE FOLLOWING GAVAGE WITH NITRITE AND TREFLAN, CARBARYL AND ATRAZINE R ESPECTIVELY. STUDIES ALSO INCLUDED TO INVESTIGATE BIOSYNTHESIS FOLLOWING I NHALATION EXPOSURE OF MICE TO NOX AND GASEOUS AMINES; MODIFYING EFFECTS OF CATALYSTS AND INHIBITORS ON KINETICS OF BIOSYNTHESIS. OUTPUT: ANNUAL PROGRESS REPORTS ON KINETICS OF BIOSYNTHESIS.

FLUVIAL TRANSPORT OF SEDIMENTS AND NUTRIENTS FROM NONPOINT SOURCES

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 88034
TASK/EPA CODE :K609A-445 / R805436 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T O BARNWELL
INVESTIGATORS : D B BAKER HEIDELBERG COLLEGE
F H VERHOFF WEST VA. UNIVERSITY

MILE: 10/77 -START OF GRANT
10/78 -FINAL REPORT

THE OBJECTIVES OF THIS STUDY ARE TO INVESTIGATE THE TRANSPORT AND PROCESSING OF NUTRIENTS AND SEDIMENTS AS THEY MOVE THROUGH THE DRAINAGE NETWORK OF A LARGE AGRICULTURAL RIVER BASIN. THE STUDY WILL UTILIZE A "NESTED" SET OF NINE STREAM GAGING/SAMPLING STATIONS IN THE SANDUSKY RIVER BASIN IN OHIO. DETAILED HYDROGRAPHS, SEDIMENT GRAPHS AND CHEMOGRAPHS WILL BE OBTAINED FOR ALL STORM EVENTS DURING THE STUDY PERIOD. MASS BALANCE COMPUTATIONS WILL BE MADE FOR WATER, SEDIMENT AND NUTRIENTS AS THEY MOVE THROUGH THE NETWORK. THE WAVE FRONT MOVEMENT OF THE HYDROGRAPH WILL BE USED TO SEPARATE SEDIMENT FROM SHEET EROSION FROM RESUSPENDED SEDIMENT. NUTRIENT MASS BALANCES WILL BE USED TO STUDY PROCESSING AND DELIVERY RATIOS ALONG THE RIVER. DELIVERY OF PHOSPHORUS FROM INLAND POINT SOURCES TO LAKE ERIE WILL ALSO BE STUDIED AS WELL AS THE EXTENT OF ANNUAL VARIABILITY IN NUTRIENT AND SEDIMENT YIELDS FROM AGRICULTURAL WATERSHEDS. INDIVIDUAL WATERSHED YIELD WILL BE CORRELATED WITH DETAILED LAND USE/LAND CAPABILITY DATA. A FINAL REPORT WILL BE PREPARED AT THE END OF THE PROJECT.

PRODUCTION IN COASTAL SALT MARSHES OF SOUTHERN CALIFORNIA

START/ COMPL DATE : 09/77 - 08/79 : FUNDING : EST. - FY 77 / $ 24973
TASK/EPA CODE : M608C-029 / R805438-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H V KIBBY
INVESTIGATORS : H P EILERS CALIF. STATE UNIV. & COLLEGES
MILE: 08/79 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO DETERMINE THE ANNUAL NET AERIAL PRODUCTION IN SOUTHERN CALIFORNIA COASTAL SALT MARSHES, TO DETERMINE PRODUCTIVE RESPONSE TO ENVIRONMENTAL FACTORS, AND TO ESTIMATE MARSH CONTRIBUTION TO SECONDARY PRODUCTION IN THE COASTAL SYSTEM. SIX STUDY MARSHES WILL BE SELECTED TO REPRESENT THE VARIETY AND LATITUDINAL EXTENT OF THE SOUTHERN CALIFORNIA COAST. THREE WILL BE CHOSEN FROM THOSE WITH CONTINUOUS OCEAN CONTACT, TWO FROM THOSE WITH SEASONAL CONTACT, AND ONE FROM DIKED MARSH. SAMPLING TO DETERMINE PRODUCTION IN EACH STUDY MARSH WILL BE BY THE HARVEST METHOD WITH SAMPLES COLLECTED AT MONTHLY INTERVALS FOR ONE YEAR. ENVIRONMENTAL MEASUREMENTS WILL INCLUDE TIDAL ELEVATION, INUNDATION FREQUENCY AND DURATION, SOIL SALINITY, SOIL NITROGEN, SOIL AERATION (REDOX), AND SOIL TEMPERATURE. MARSH EXPORT OF ORGANIC DETRITUS WILL BE ESTIMATED BY ANALYZING CREEK WATER SAMPLES FROM EBB AND FLOOD FLOW FOR SUSPENDED ORGANIC PARTICULATES.

EFFECTS OF DRILLING FLUIDS AND OIL IN CORALS OCCUPYING HARD-BANK COMMUNITIES

START/ COMPL DATE : 07/77 - 11/77 : FUNDING : EST. - FY 77 / $ 22561
TASK/EPA CODE : 0625F-1-05 / R805441-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : T J BRIGHT TEXAS A & M UNIVERSITY SYSTEM
J H THOMPSON TEXAS A & M UNIVERSITY SYSTEM

MILE: 07/77 -BEGIN FIELD COLLECTION OF CORALS FOR STUDY
06/78 -REPORT ON EFFECTS OF DRILLING FLUIDS ON CORALS

AN EXPERIMENTAL DESIGN IS PROPOSED IN WHICH THE BEHAVIORAL AND PHYSIOLOGICAL REACTIONS OF SCLERACTINIAN CORALS INDIGENOUS TO HARD BANK COMMUNITIES IN THE GULF OF MEXICO ARE DETERMINED IN RESPONSE TO CHRONIC LOW LEVELS OF DRILLING FLUID COMPONENTS AND SHALE OIL PRODUCTS. THE DESIGN INCORPORATES TIME-LAPSE-MACROPHOTOGRAPHIC AND RESPIROMETRIC TECHNIQUES TO MEASURE THE RESPONSE PARAMETERS. THE CORALS SHALL BE EXPOSED TO THE CONTAMINANTS IN "FLOW THROUGH" AQUARIA ON BOARD A PLATFORM TWELVE MILES OFFSHORE OF PANAMA CITY. CONTROLS SHALL INCLUDE PARALLEL OBSERVATIONS OF CORALS EXPOSED TO UNCONTAMINATED SEA WATER IN IDENTICAL "FLOW THROUGH" AQUARIA, AND OF CORALS TRANSPLANTED TO THE SITE OF THE PLATFORM AT A DEPTH SIMILAR TO THAT FROM WHICH THEY WERE COLLECTED.

FEASIBILITY STUDY OF GRANULAR ACTIVATED CARBON ABSORPTION AND ON-SITE REGENERATION

START/ COMPL DATE : 08/77 - 05/80 : FUNDING : EST. - FY 77 / $ 459000
TASK/EPA CODE :C614A-7169 / R805443-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J DEMARCO
INVESTIGATORS : A A ROSEN CINCINNATI WATER WORKS
R MILLER CINCINNATI WATER WORKS
C COLE CINCINNATI WATER WORKS
E KISPERT CINCINNATI WATER WORKS
MILE: 02/79 -INTERIM REPORT ESTIMATE
05/80 -FINAL REPORT

TO DETERMINE THE FEASIBILITY OF GRANULAR ACTIVATED CARBON ADSORPTION, UTILIZING EITHER DEEP BED CONTACTORS OR CONVENTIONAL DEPTH GRAVITY FI LTERS WITH ON-SITE CARBON REGENERATION, FOR REMOVING SPECIFIC TRACE ORGANI CS FROM OHIO RIVER WATER WHILE TREATING IT FOR HUMAN CONSUMPTION. SIX EXIS TING RAPID SAND FILTERS OF THE CINCINNATI WATER WORKS TREATMENT PLANT WILL BE CONVERTED TO GRANULAR ACTIVATED CARBON BEDS. ORGANIC ADSORPTION FOR THREE CARBON MEDIA DEPTHS WILL BE STUDIED. CARBON CONTACTORS WILL BE INSTALLED TO RECEIVE THE EFFLUENT FROM ONE EXISTING RAPID SAND FILTER AND WILL BE OPERATED INDEPENDENTLY OF THE CARBON FILTERS. ORGANIC ADS ORPTION WILL BE STUDIED. AN ACTIVATED CARBON REGENERATION UNIT WILL BE PRO VIDED TO REGENERATE THE GRANULAR CARBON ON SITE. EFFICIENCY OF REGENERATED CARBON WILL BE STUDIED. TWO CARBON FILTERS OF EACH CARBON MEDIA DEPTH WILL BE PROVIDED SO THAT AT LEAST ONE OF EACH PAIR WILL BE FILTERING AT ALL TIMES WHILE THE OTHER MAY BE OUT OF SERVICE FOR MEDIA REPLACEMENT. ONE OF THE CARBON CONTACTORS WILL SERVE AS A STANDBY UNIT TO ALLOW CARBON RE GENERATION WITHOUT PLANT SHUTDOWN. CARBON WILL BE REMOVED, REGENERATED AND RETURNED AS EFFICIENTLY AS POSSIBLE. THIS WILL ESTABLISH THE OPTIMUM COST OF USING ON-SITE REGENERATED CARBON.

Objectives. To discover why pricing and other incentive schemes for environmental protection, so often proposed by economists, are seldom attractive to legislators, administrators, interest groups and the public. To identify the detailed characteristics of environmental problems that might actually be better handled by such schemes and the critical characteristics of those that are not best handled that way, or not enough better to matter. To synthesize a critical appraisal and guidelines for choosing among alternative systems of environmental management

Approach. Case studies of several environmental problems or sets of problems in sufficient detail to evaluate the relevance of pricing mechanisms. Field work, mostly interviews, to discover the nature of objections to pricing mechanisms and the bases for objections. Examination of the incentives that are the unintended consequence of regulatory mechanisms that are not explicitly oriented toward incentives.

Current plans. To integrate all elements of the study through a regularly meeting seminar that will include all the investigators under this project and others, including students, whose current interests and activities are relevant to this study.

IMPROVEMENT AND EVALUATION OF METHODS FOR SULFATE ANALYSIS

START/ COMPL DATE : 10/77 - 00/00 ; FUNDING : EST. - FY 77 / $ 69300
TASK/EPA CODE :E621A-14 / R805447-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J C PUZAK
INVESTIGATORS : J J WESOLOWSKI STATE DEPT. OF HEALTH
B R APPEL STATE DEPT. OF HEALTH
E L KOTHNY STATE DEPT. OF HEALTH
E M HOFFER STATE DEPT. OF HEALTH

MILE: 10/78 -COMPLETE EVALUATION OF SULFATE METHODS
10/79 -COMPLETE EVALUATION OF H2SO4 METHOD

THE OBJECTIVES OF THIS WORK INCLUDE: 1) OPTIMIZING A SIMPLE ANALYTICAL PROCEDURE FOR SULFATE DETERMINATION AND EVALUATING IT FOR RUGGEDNESS; 2) EVALUATING A SERIES OF SULFATE METHODS; AND 3) EVALUATING TWO TECHNIQUES FOR EXTRACTING SULFATE FROM ATMOSPHERIC SAMPLES. METHODS EVALUATION WILL INVOLVE DETERMINING THE PRACTICAL WORKING RANGE, PRECISION, ACCURACY, COMPARABILITY BETWEEN METHODS AND THE INFLUENCE OF POTENTIAL INTERFERENTS. FOR THIS STUDY, THE PRACTICAL WORKING RANGE OF THE METHODS WILL BE DEFINED AS THE CONCENTRATION RANGE OF ANALYTE YIELDING CONSTANT VARIANCE AND ACCURACY. THE BARIUM SULFATE TURBIDIMETRIC PROCEDURE IS THE METHOD TO BE OPTIMIZED. THE SULFATE METHODS TO BE EVALUATED ARE THE OPTIMIZED TURBIDIMETRIC METHOD, THE COLOVOS AND MIDWEST RESEARCH VERSIONS OF THE AUTOMATED METHYLTHYMOL BLUE METHOD AND THE DIONEX ION CHROMATOGRAPH METHOD.

EFFICIENT ALGORITHMS FOR SOLVING SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS APPLICABLE TO BASIN ECOSYSTEM MODELING

START/ COMPL DATE : 07/77 - 08/78 : FUNDING : EST. - FY 77 / $ 37995
TASK/EPA CODE :K6178-365 / R805452-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R R LASSITER
INVESTIGATORS : H BOUVER STATE UNIVERSITY OF NEW YORK
MILE: 08/78 -USER MANUAL FOR BEST NUMERICAL INTEGRATION SCHEME
EFFICIENT COMPUTER ALGORITHMS FOR INTEGRATION OF SYSTEMS OF GENERAL DIF FERENTIAL EQUATIONS WILL BE COMBINED INTO A PACKAGE TO PERMIT SUBJECT AREA USERS TO MODEL ENVIRONMENTAL SYSTEMS EASILY AND WITH THE OPTION TO RESTRICT STATE VARIABLES TO NON-NEGATIVE VALUES.

The primary objective is to determine the effectiveness of a polyculture of fishes to reduce nutrients and algae in wastewater. The key species to be used are Hypopthalmichthyes molitrix and Aristichthyes nobilis, both are filter feeders. This will be accomplished by stocking the fish at various rates into a six pond series of sewage oxidation lagoons at the State Hospital at Benton, Arkansas. Parameters to be monitored at the outflow of each pond are: dissolved oxygen, biochemical oxygen demand, pH, carbon dioxide, turbidit conductivity, fecal coliform, suspended solids, nutrients, temperature, flow rate, and plankton populations. Methods of harvesting fish from sewage lagoons will also be investigated.

Preliminary studies in sewage lagoons and aquaculture ponds have shown that the presence of these fishes does cause a reduction of nutrients and a significant impact on plankton populations. The purpose of this investigation is to determine proper stocking rates and BOD loading rates for lagoons to affect maximum treatment of the effluent.

805454

Water quality restoration of three eutrophic lakes (Annabessacook Lake, Cobbossee Lake, and Pleasant Pond) by nutrient inactivation in bottom sediments with aluminum, and by nonpoint source control of agricultural wastes by construction of manure storage facilities.

805455

Musk thistle (Carduus nutans) is a serious pest of crop, range and pasture-land in the United States. A cooperative effort among the disciplines of botany, entomology, and remote sensing is proposed to increase the effectiveness of control procedures and thereby reduce pesticide use. Such studies will determine the factors which contribute to the successful spread of musk thistle and develop optimal strategies for detection and control. The resulting data will be used to develop a conceptual framework for general control strategies.

EFFECT OF LIMING, PHOSPHATE, AND ORGANIC MATTER ON HEAVY METAL AVAILABILITY TO PLANTS GROWN IN SLUDGE-AMENDED SOILS

START/ COMPL DATE : 09/77 - 09/80 : FUNDING : EST. - FY 77 / $ 39345
TASK/EPA CODE :U6228-05 / R805456-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J H RYAN
INVESTIGATORS : J W SHUFORD ALABAMA AGRIC. & MECH. UNIV.
L M MUGWIRA ALABAMA AGRIC. & MECH. UNIV.

MILE: 08/78 -EVALUATION OF LIMING TREATMENTS ON HEAVY METAL UPTAKE
08/79 -DETERMINE THE EFFECT OF PHOSPHATE TREATMENT ON METAL UPTAKE

THE PRIMARY OBJECTIVE OF THIS STUDY IS TO DETERMINE THE TREATMENTS BEST SUITED FOR AGRICULTURAL APPLICATIONS OF SEWAGE SLUDGE CONTAINING RELATIVELY HIGH HEAVY METAL CONCENTRATIONS. A POSSIBLE MECHANISM FOR MANAGING THE UPTAKE BY AND TOXICITY OF THE METALS TO PLANTS IS THE CONTROL OF SOIL PH BY PHOSPHATE AND LIME TREATMENT. ORGANIC CHELATE BINDING OF THE METALS MAY ALSO BE INFLUENCED BY THE PH OF THE SOIL. DEVELOPMENT OF A LIMING AND PHOSPHATE MANAGEMENT PROCESS FOR INCREASED SLUDGE APPLICATION TO AGRICULTURAL LAND WOULD PROVIDE A PARTIAL SOLUTION TO THE PROBLEM OF SEWAGE DISPOSAL.

THE EFFECTIVENESS OF VEGETATION BUFFER STRIPS FOR CONTROLLING SEDIMENT
AND OTHER WATER POLLUTANTS FROM DISTURBED WATERSHEDS

START/ COMPL DATE : 09/77 - 09/80 : FUNDING : EST. - FY 77 / $ 183000
TASK/EPA CODE :K617B-427 / R805457-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L A MULKEY
INVESTIGATORS : D B SIMONS COLORADO STATE UNIVERSITY
R M LI COLORADO STATE UNIVERSITY

MILE: 09/77 -START PROJECT
09/78 -REPORT ON EFFECTIVENESS OF BUFFER STRIPS FOR SEDIMENT CONTROL
09/80 -DESIGN CRITERIA FOR STREAM-SIDE MANAGEMENT ZONES

THE PRIMARY OBJECTIVE OF THIS STUDY IS TO DEVELOP A METHODOLOGY FOR EVAL UATING THE EFFECTIVENESS OF VEGETATION BUFFER STRIPS FOR CONTROLLING SEDIM ENT AND OTHER MAJOR WATER POLLUTANTS SUCH AS NITROGEN AND PHOSPHORUS. THIS METHODOLOGY WILL BE DEVELOPED CONSIDERING THE PHYSICAL SIGNIFICANCE OF THE GOVERNING PROCESSES WHICH DOMINATE THE HYDROLOGIC, HYDRAULIC, AND VEGETATIVE ASPECTS OF THE BUFFER ZONE. THE DESIGN OF THE BUFFER STRIP WILL DETERMINE SIZE OF ZONE, SHAPE OF ZONE, AND TYPE OF VEGETATION IN THE BUFFER STRIP. THIS DETERMINATION WOULD BE INDEPENDENT OF THE LAND USE IN OTHER PARTS OF THE WATERSHED. THE HYDROLOGIC ANALYSIS WILL CONSIDER TYPE, DURATION, INTENSITY AND RECURRENCE INTERVAL OF STORMS, INFI LTRATION RATE, WATER, SEDIMENT RUNOFF, AND THE DISTRIBUTION OF OTHER MAJOR POLLUTANTS IN THE WATERSHED. THE HYDRAULIC ANALYSIS WILL CONSIDER THE RATE OF SURFACE RUNOFF, RESISTANCE TO FLOW, SEDIMENT TRAPPING EFFICIENCY, SEDIMENT AND OTHER MAJOR POLLUTANTS RESISTANCE TIME, CHANNELIZATION FROM THE UPSTREAM AND PROGRESSIVE HEAD CUT FROM THE DOWNSTREAM END OF THE STRIP. THE HYDROLOGIC AND HYDRAULIC RESPONSE OF THE BUFFER STRIP IS DEPENDENT ON THE GEOMETRY OF THE WATERSHED. A RANGE OF CONDITIONS FROM FLAT LAND, INTERMEDIATE LAND, AND STEEP LAND WILL BE INVESTIGATED. THE VEGETATION ANALYSIS WILL CONSIDER THE TYPE, HEIGHT, DENSITY STIFFNESS, AND NATURAL AND FLOW-INDUCED VIBRATION FREQUENCY OF THE VEGETATIVE COVER. AN ENGINEERING ANALYSIS OF THE SEDIMENT CONTROL EFFICACY WILL BE MADE INTITALLY AND DOCUMENTED IN AN INTERIM REPORT. FINALLY, DESIGN CRITERIA INCLUDING THE DEVELOPED METHODOLOGY WILL BE PUBLISHED.

DISPOSAL OF HIGH ALKALINE FLY ASH SLUDGE IN A DECOALED MINE SEAM

START/ COMPL DATE : 09/77 - 08/79 ; FUNDING : EST. - FY 77 / $ 236000
TASK/EPA CODE :F624A-048 / R805459 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W JONES
INVESTIGATORS : O E MANZ UNIV. OF NORTH DAKOTA
G H GROENEWOLD STATE GEOL. SURVEY
Y HUNG UNIV. OF NORTH DAKOTA
MILE: 09/78 -ISSUE INTERIM REPORT
09/79 -ISSUE FINAL REPORT

OBJECTIVES: DETERMINE THE ENVIRONMENTAL EFFECTS OF SLUDGE DISPOSAL FROM A LIGNITE FLY ASH SO2 SCRUBBER (AT THE MILTON R. YOUNG POWER STATION, CENTER, NORTH DAKOTA) IN A DECOALED OPEN PIT MINE, MONITOR THE GRO UNDWATER AND LEACHATE IN THE PROXIMITY OF THE BURIED SLUDGE, AS WELL AS AN EXPOSED SURFACE SLUDGE POND, INVESTIGATE THE PROPERTIES OF SLUDGE, ASH AND SOIL, ASSESS THE STABILITY OF MINE SPOIL DEPOSITED OVER THE SLUDGE. APPROACH: (1) STUDY AVAILABLE MINE, SLUDGE, AND SLUDGE DISPOSAL CHARACTE RIZATIONS FROM A 3-YEAR MINING PLAN AND LABORATORY ANALYSES OF PILOT PLANT SLUDGE; (2) CONDUCT ADDITIONAL SLUDGE AND MINE CHARACTERIZATION; (3) CONDUCT EXTENSIVE SAMPLING AND TESTING PRIOR TO AND SUBSEQUENT TO: (A) CONSTRUCTION OF AN EXPOSED SURFACE SLUDGE POND, AND (B) INSTALLATION OF SEVERAL GROUNDWATER AND LEACHATE WELLS IN PROXIMITY OF BURIED SLUDGE IN THE DECOALED MINE SEAM AND SLUDGE POND, ANALYSES OF GROUNDWATER, LEACHATE, SUPERNATANT, SLUDGE AND SOIL FOR 15 MONTH PERIOD; (4) OBTAIN AND COMPILE COST INFORMATION FROM THE POWER PLANT FOR INCLUSION IN AN ECON OMY STUDY BY ARTHUR D. LITTLE, INC. OF DISPOSAL OF SLUDGE IN DECOALED MINE SEAM; (5) ASSESS THE DATA AND PREPARE THE FINAL REPORT, TO BE INCORPORATED IN AN ARTHUR D. LITTLE REPORT FOR CONTRACT 68-03-2334. CURRENT PLANS: PROJECT JUST INITIATED.

ULTRASTRUCTURE AND X-RAY MICROANALYSIS OF MACROPHAGES EXPOSED TO NONCRITERIA POLLUTANTS WITH EMPHASIS ON CERTAIN METAL COMPOUN

START/ COMPL DATE : 10/76 - 09/78 : FUNDING : EST. - FY 77 / $ 75000
TASK/EPA CODE :H601D-7316 / R805460 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D WATERS
INVESTIGATORS : J D SHELBURNE DUKE UNIVERSITY
M D WATERS U.S. ENVIRON. PROTECTION AGCY

MILE: 11/77 -PROJECT NOT YET INITIATED. ANTICIPATED AWARD

A CRITICAL PROBLEM IN CORRELATING THE RESULTS OF CHEMICAL ANALYSES AND BIOLOGICAL SCREENING TESTS WITH RESPECT TO THE POTENTIAL BIOHAZARDS OF A GIVEN CRUDE SAMPLE IS THE DEGREE TO WHICH THE BIOLOGICAL AVAILABILI TY OF THE SAMPLE IS UNDERSTOOD. THAT IS, WE NEED TO KNOW THE NATURE OF SUR FACE CHEMISTRY AND THE POTENTIAL OF A COMPLEX SAMPLE TO RELEASE COMPONENTS TO BIOLOGICAL FLUIDS AND TISSUES. OUR OBJECTIVE IS TO EXPOSE RABBIT ALVEOLAR MACROPHAGES (RAMS) IN VITRO TO A VARIETY OF ELEMENTS (SPECI FICALLY CADMIUM, VANADIUM, NICKEL, MANGANESE, CHROMIUM, IRON, LEAD, COPPER AND ZINC) AT DIFFERING CONCENTRATIONS AND TIMES, AND TO A VARIETY OF PARTI CLES (BOTH FLY-ASH PARTICLES COATED WITH KNOWN ELEMENTS AND REPRESENTATIVE ELEMENTS SELECTED FROM URBAN AIR) IN ORDER TO DEFINE MORPHOLOGICAL LY THE SUBCELLULAR REACTION OF THESE MACROPHAGES TO INJURY. ELECTRON PROBE MICROANALYSIS WILL BE USED TO STUDY THE MORPHOLOGY AND DISTRIBUTION OF THE TOXIC ELEMENTS IN QUESTION. CONSEQUENTLY A PARALLEL AND IMPORTANT OBJECTIVE OF THIS WORK WILL BE TO EXAMINE IN DETAIL THE LIM ITATIONS AND USEFULNESS OF A NUMBER OF MICROHISTOLOGICAL TECHNIQUES FROM A QUALITATIVE AND SEMI-QUANTITATIVE POINT OF VIEW IN ORDER TO OPTIMIZE TECHNIQUES FOR THE IDENTIFICATION, LOCALIZATION AND DISTRIBUTION OF THESE ELEMENTS.

NONPOINT SOURCE SEDIMENT PRODUCTION IN THE COLUSA BASIN DRAINAGE AREA, CALIFORNIA

START/ COMPL DATE : 10/77 - 09/81 : FUNDING : EST. - FY 77 / $ 170000
TASK/EPA CODE :L617A-06 / R805462-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A G HORNSBY
INVESTIGATORS : K K TANJI UNIV. OF CALIFORNIA
J W BIGGAR UNIV. OF CALIFORNIA
D W HENDERSON UNIV. OF CALIFORNIA
M J SINGER UNIV. OF CALIFORNIA
L D WHITTIG UNIV. OF CALIFORNIA

MILE: 10/79 -FINAL REPORT, PHASE I

THIS PROJECT PROPOSES TO IDENTIFY THE POTENTIAL NONPOINT SOURCES OF SU SPENDED MATTER IN THE UPLAND AND VALLEY FLOOR OF THE COLUSA BASIN DRAINAGE AREA IN THE WEST SIDE OF THE SACRAMENTO RIVER BASIN, THE UPLAND AREA CONSISTS OF 1700 SQUARE MILES OF WATERSHED AND THE VALLEY FLOOR IS DEVOTED PRIMARILY TO IRRIGATED AGRICULTURE. A 70-MILE LONG COLUSA BASIN DRAIN CONVEYS FLOOD RUNOFFS AND IRRIGATION RETURN FLOWS, THE DRAIN CONTAINS A SIGNIFICANT SEDIMENT LOAD AND DISCHARGES INTO THE SACRAMENTO RIVER TYPICALLY RAISING THE TURBIDITY IN THIS RIVER TO ABOUT 20 JACKSON TURBIDI TY UNITS (JTU) FROM ABOUT 5 JTU. TO THE BEST OF OUR KNOWLEDGE, THE FACTORS CONTRIBUTING TO OR AFFECTING THE SEDIMENT LOAD IN COLUSA BASIN DRAIN HAVE NOT BEEN FULLY ASCERTAINED AS YET. THE SUSPENDED MATTER PROBLEM IS UNIQUE IN THAT IT DOES NOT SETTLE OUT EVEN UNDER VERY LOW CURRENT VELOCITIES. THIS PROJECT WILL DETERMINE THE PHYSICAL, CHEMICAL, AND MINE RALOGICAL CHARACTERISTICS OF THE SUSPENDED AND BED LOAD MATERIALS AND FLOW VOLUME AND CURRENT VELOCITY TO UNDERSTAND THEIR TRANSPORT, DEP OSITION, AND RESUSPENSION ALONG WITH THEIR PRODUCTION. THE RESULTS OF THIS RESEARCH WILL BE USEFUL TO FORMULATE BEST MANAGEMENT PRACTICES TO CONTROL EROSION AND MINIMIZE SEDIMENT PRODUCTION.

DEVELOPMENT AND APPLICATION OF LABORATORY MICROCOSMS FOR PERTURBATION EXPERIMENTS OF COASTAL MARINE ECOSYSTEMS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 75500
TASK/EPA CODE :P608C-08 / R805463-01 (GRANT) PRIOR FY / 1

K T PEREZ UNIV. OF RHODE ISLAND

MILE: 09/79 -FINAL REPORT ENTITLED, "DEVELOPMENT AND APPLICATION OF LABORATO
OBJECTIVES: 1) TO DEVELOP MARINE MICROCOSM METHODOLOGY, 2) TO COMPARE SMALL AND LARGE MICROCOSM BEHAVIOR, 3) TO ASSESS THE EFFECTS OF SEWAGE ADDITION AND STRESSES OPERATING ALONG ESTABLISHED SEWAGE GRADIENTS AND RECOVERY FROM THESE PERTURBATIONS, 4) TO ASSESS TIME VARYING PERTURBATIONS OF 3, 5) TO USE THE MICROCOSMS TO DETERMINE THE EFFECTS OF MULTIPLE S TRESSES ON ESTUARINE ECOSYSTEMS AND 6) TO USE THE MICROCOSMS TO UNDERSTAND STABILITY AND RESILIENCY IN ESTUARINE ECOSYSTEMS. APPROACH: WE PRO POSE TO CONTINUE WORK WITH 12 EXPERIMENTAL MICROCOSMS WHICH ARE MAINTAINED IN A WATER BATH IN THE EPA ENVIRONMENTAL RESEARCH LABORATORY, NARRAGANSETT, RI. THE TANKS WILL BE FILLED WITH HAND BUCKETED WATER FROM NARRAGANSETT BAY TO PREVENT DAMAGE TO PLANKTON, AND INTERMIXED TO PRODUCED UNIFORM INITIAL CONDITIONS IN ALL OF THE MICROCOSMS, NEW SEDIMENT WILL BE COLLECTED BY BOX CORE AT THE START OF EACH SERIES OF EXPERIMENTS. THE B IOLOGICAL PARAMETERS IN THE MICROCOSM WILL THEN BE FOLLOWED FOR ONE OR TWO WEEKS TO BE SURE THAT THEY ARE NOT DIVERGING BEFORE SPECIFIC EXPER IMENTS ARE BEGUN. CURRENT PLANS: FOUR SERIES OF EXPERIMENTS ARE PLANNED AS FOLLOWS: 1) SCALING EXPERIMENTS WITH LIGHT AND TURBULENT MIXING, 2) COMPA RISON OF THE BEHAVIOR OF SMALL MICROCOSMS WITH LARGE MICROCOSMS, 3) STRESS EXPERIMENTS ON MICROCOSMS WITH DIFFERENT LEVELS OF SEWAGE, AND 4) MIXED OLIGOTROPHIC AND EUTROPHIC EXPERIMENTS.

PREVENTION AND CONTROL OF SPILLAGE OF PESTICIDES FROM AGRICULTURAL OPERATIONS INCLUDING AERIAL AND GROUND APPLICATIONS

START/ COMPL DATE : 09/77 - 03/79 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :B610A-634 / R805466-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : F J FREESTONE

J C NYE PURDUE UNIVERSITY
A C YORK PURDUE UNIVERSITY
R A GREENKORN PURDUE UNIVERSITY

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
12/77 -APPLY INCREMENTAL FUNDING
03/79 -FINAL REPORT RECEIVED

THE OVERALL OBJECTIVE OF THE PROJECT IS TO DEVELOP A UNIVERSALLY ACCEPTABLE SYSTEM TO PREVENT SPILLAGE OF PESTICIDES FROM AGRICULTURAL OPERATIONS. THIS WILL BE DONE IN THE FOLLOWING MANNER: BY EVALUATING EXISTING HANDLING, MIXING, CLEAN-UP AND DISPOSAL METHODS IN USE BY COMMERCIAL AGRICULTURAL APPLICATORS; BY DEMONSTRATING AN EQUIPMENT WASHING SYSTEM WHICH STOPS THE INDISCRIMINATE DUMPING OF THE TOXIC CHEMICALS; BY DEVELOPING AN ECONOMICAL PORTABLE WASHWATER TREATMENT SYSTEM THAT CAN BE OPERATED BY NON-TECHNICAL PERSONNEL; AND EVALUATING FEASIBILITY OF RECYCLING WATER AFTER THE TREATMENT.

805467

Objectives

To determine the extent of understanding of Indian nations regarding the dangers and most efficacious use of pesticides; extent of use; tribal powers of control. To determine options and develop models for pesticide regulation on Indian reservations; to determine possibilities for alternative methods of pest control such as integrated pest management; to determine costs of enforcement programs and to establish effective communication between EPA and the Indian company.

Approach

Conduct informational/research sessions with approximately 200 tribes. Prepare models, reports and provide follow up assistance.

RIVULUS MARMORATUS - AN INVESTIGATION OF ITS POTENTIAL AS A CANCER RESEARCH AND CHEMICAL CARCINOGEN SCREENING ORGANISM

START/ COMPL DATE : 09/77 - 08/79 : FUNDING : EST. - FY 77 / $ 86000
TASK/EPA CODE :Q625F-1-07 / R805469-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W P DAVIS
INVESTIGATORS : C C KOENIG COLL. OF CHARLESTON
B J HART COLL. OF CHARLESTON
A R STARCK COLL. OF CHARLESTON
C MCMILLAN COLL. OF CHARLESTON

MILE: 08/79 -FINAL REPORT

RECENT EVIDENCE SUGGESTS A RELATIONSHIP BETWEEN ENVIRONMENTAL CONTAMINANTS AND CANCER. IT SHOULD BE RECOGNIZED THAT CANCER IS THOUGHT TO BE A MULTISTEP PROCESS WITH GENETIC ALTERATION AS THE INITIAL STEP. THE MUTAGENIC ACTIVITY OF ENVIRONMENTAL CONTAMINANTS MAY THEREFORE GIVE A GOOD INDICATION OF POTENTIAL CARCINOGENICITY AND TERATOGENICITY MAY BE AN INDICATION OF MUTAGENICITY. THE NEED FOR A MARINE VERTEBRATE SENSITIVE TO CHEMICAL CARCINOGENS IS GREAT BECAUSE THERE IS GOOD EVIDENCE THAT THE COASTAL MARINE ENVIRONMENT IS BEING CONTAMINATED AT AN ACCELERATED RATE. THE MARINE FISH RIVULUS MARMORATUS POSSESSES NUMEROUS ATTRIBUTES THAT MAKE IT PARTICULARLY ATTRACTIVE AS A CANCER RESEARCH AND/OR SCREENING ORGANISM. A NUMBER OF MORE OBVIOUS ATTRIBUTES OF THIS FISH INCLUDE: HARDINESS, EASE OF MAINTENANCE, DEVELOPMENTAL ASPECTS, SHORT GENERATION TIME, FECUNDITY AND UNIQUE GENETIC AND REPRODUCTIVE ASPECTS WHICH ARE FOUND IN NO OTHER VERTEBRATES (ISOGENIC, HOMOZYGOUS CLONES OF NATURAL HERMAPHRODITES WHICH REPRODUCE BY INTERNAL SELF-FERTILIZATION). WE PROPOSE TO EVALUATE THE POTENTIAL OF R. MARMORATUS AS A CANCER RESEARCH AND SCREENING ORGANISM. TWO GENERAL APPROACHES WILL BE TAKEN: GENETIC CHARACTERIZATION AND CORRELATION OF EFFECTS WITH KNOWN CHEMICAL CARCINOGENS. INFORMATION GATHERED FROM THE GENETIC CHARACTERIZATION (ELECTROPHORETIC, TRANSPLANTATION AND CYTOGENETIC TECHNIQUES WILL BE USED) MAY BE APPLIED DIRECTLY IN THE ASSESSMENT OF MUTAGENICITY. ALSO, ROUTINE HISTOLOGICAL AND DEVELOPMENTAL ANALYSIS WILL BE MADE TO BROADEN OUR BASE OF POTENTIAL EFFECTS. THUS, CORRELATIVE INFORMATION DEVELOPED FROM MUTAGENIC EFFECTS OF KNOWN CHEMICAL CARCINOGENS MAY BE EXTENDED TO OTHER POTENTIAL CHEMICAL CARCINOGENS.

COMBINED RUNOFF, HYDRAULIC AND WATER QUALITY MODELS

START/ COMPL DATE : 10/77 - 10/79 : FUNDING : EST. - FY 77 / $ 15000
TASK/EPA CODE :K609A-410 / R805471-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W FALCO
INVESTIGATORS : W M SCHOFIELD UNKNOWN INST. OR INDIV. GRANT
MILE: 10/77 -START PROJECT
10/78 -INTERIM REPORT DESCRIBING PROGRESS OF PROJECT
10/79 -FINAL REPORT DESCRIBING RESULTS AND GUIDANCE FOR USE OF LINKED

THE PURPOSE OF THIS PROJECT IS TO COMBINE THE STORM RUNOFF MODEL AND THE EXPLORE-I HYDRAULIC AND WATER QUALITY MODEL IN SUCH A FASHION THAT THE ALLIED FORTRAN PROGRAM CAN BE MADE TO RUN ON A SINGLE PASS. ANOTHER OBJECTIVE IS TO RESTRUCTURE THE COMBINED PROGRAM SO THAT IT CAN BE RUN ON THE SMALLER COMPUTERS USUALLY AVAILABLE TO THE ENGINEERING FIRMS DOING IMPACT STUDIES; SUCH MACHINES SHOULD NOT EXCEED 64K EIGHT-BIT BYTES OF CORE AND HAVE NO MORE THAN ONE TAPE AND ONE DISK PLUS PRINTER AS PER IPHERALS. THE APPROACH IS AS FOLLOWS: (1) REDUCE THE SIZE OF THE CORE REQU IRED FOR DATA STORAGE BY OVERLY METHODS; (2) REDUCE THE NUMBER OF PROGRAMS THAT MUST BE CORE RESIDENT AT ANY ONE TIME; (3) CALIBRATE THE VARIOUS PARTS OF THE COMBINED PROGRAM AT SPECIFIED CHECK POINTS; AND (4) CALIBRATE BOTH THE COMBINED PROGRAM AND A SENSITIVITY STUDY OF THE SAME. THE COMPUTER PROGRAMS FOR THE TWO MODELS HAVE BEEN EXAMINED AND FOUND TO BE F LEXIBLE ENOUGH TO ACCOMPLISH THE NECESSARY OVERLAY WORK. AN INTERDATA 7/16 COMPUTER HAS BEEN CHOSEN AND THE COMPILER AND UTILITY ROUNTINES HAVE BEEN EXAMINED AND FOUND TO BE ADEQUATE. A FINAL REPORT WILL BE PUBLISHED AT THE END OF THE PROJECT DESCRIBING THE RESULTS AND GIVING GUIDANCE FOR THE USE OF THE LINKED MODEL.

CAUSES OF DEATH OF ANESTHETISTS FROM THE CHLOROFORM ERA

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 56425
TASK/EPA CODE :D6148-112 / R805473-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J LUCAS
INVESTIGATORS : H W LINDE NORTHWESTERN UNIVERSITY
P S MESNICK NORTHWESTERN UNIVERSITY

MILE: 10/78 -FINAL REPORT

WE PROPOSE TO STUDY THE MORTALITY OF PHYSICIANS WHO GAVE ANESTHESIA DURING THE PERIOD WHEN CHLOROFORM WAS IN COMMON USE AND TO ASCERTAIN THEIR CAUSES OF DEATH TO DETERMINE IF THERE WERE EXCESSIVE DEATH DUE TO CANCER. TO DO THIS, WE PROPOSE TO DETERMINE THE NAMES OF ANESTHETISTS DYING PRIOR TO 1947 (WHEN OUR PREVIOUS STUDY OF CAUSES OF DEATH AMONG A NESTHESIOLOGISTS STARTED) AND TO OBTAIN THEIR CAUSES 1947-1956, 1957-1966, STUDY AND 1967-1972. WE WILL ALSO STUDY THE LITERATURE AND HISTORICAL RECORDS TO ARRIVE AT AN ESTIMATE OF THE USE OF CHLOROFORM IN AMERICAN ANESTHESIA DURING THE EARLIER PART OF THIS CENTURY.

OPTIMIZATION OF LAND CULTIVATION PARAMETERS

START/ COMPL DATE : 08/77 - 06/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :B623C-621 / R805474 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : J S FARLOW
INVESTIGATORS : K BROWN TEXAS A & M UNIVERSITY SYSTEM
MILE: 07/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT
06/78 -FINAL REPORT RECEIVED

RESEARCH IS TO BE CONDUCTED ON THE LAND DISPOSAL OF TANK BOTTOM AND API SEPARATOR WASTES. THE INVESTIGATION WILL UTILIZE THREE DIVERSE WASTES, AND TESTS WILL BE CONDUCTED ON SEVERAL SOILS REPRESENTING A RANGE OF CHARACTERISTICS. THE INVESTIGATION WILL BEGIN WITH CHARACTERIZATION OF THE WASTES. THIS DATA WILL BE USED TO DECIDE ON THE APPLICATION RATES TO BE USED IN THE STUDIES. MEASUREMENTS WILL BE MADE OF THE DECOMPO SITION RATE OF THE WASTES, THE INFLUENCE OF APPLICATIONS ON PLANT SURVIVAL AND GROWTH, AND THE CONCENTRATIONS OF POTENTIAL POLLUTANTS IN RUNOFF AND LEACHATE WATER. THE FATE AND MOBILITY OF THE WASTES IN THE SOIL WILL BE INVESTIGATED IN THE LABORATORY, IN GREENHOUSE TESTS, AND ULTIMATELY, IN FIELD TESTS. THE RESEARCH SHOULD PROVIDE INSIGHT INTO THE FEASIBILITY OF LAND DISPOSAL OF THIS CLASS OF WASTE, AND THE RESULTS WILL BE USED TO DEVELOP CRITERIA TO BE USED IN THE DESIGN, MANAGEMENT, AND MONITORING OF OILY WASTE DISPOSAL OPERATIONS.

SOIL DISPOSAL OF API PIT WASTES

METHODOLOGIES FOR UTILIZATION OF ENVIRONMENTAL-IMPACT-ASSESSMENT DATA

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 59529
TASK/EPA CODE :F623A-38 / R805476-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C T RIPBERGER
INVESTIGATORS : L R BABCOCK UNIV. OF ILLINOIS
R A WADDEN UNIV. OF ILLINOIS
MILE: 10/78 -COMPLETE RESEARCH RELATED TO HEALTH EFFECT LINKAGES
10/79 -COMPLETE RESEARCH RELATED TO TRANSPORT-TRANSFORMATION
10/80 -COMPLETE INTEGRATION STUDIES

THE PROPOSED RESEARCH SEEKS TO DEFINE METHODOLOGICAL APPROACHES FOR USE WITHIN EPA WHICH WOULD FACILITATE THE IDENTIFICATION OF HAZARDS AND SETTING OF STANDARDS AND CONTROL PRIORITIES. A NEW COMPREHENSIVE TYPE OF ASSESSMENT DATA IS BEING GENERATED WITHIN EPA, AND THE PROPOSED RESEARCH, IN PART, WOULD ATTEMPT TO DEFINE HOW SUCH INFORMATION MIGHT BE BEST UTILIZED BY HEALTH-EFFECTS, ATMOSPHERIC-CHEMISTRY AND OTHER INVOLVED GROUPS IN ORDER TO GENERATE MEANINGFUL CAUSE-EFFECT RESULTS IN THE SHORTEST TIME. THE RESEARCH WILL INCLUDE DEFINITION OF PERTINENT EPA UNITS AND PROCEDURES AND OBSTACLES TO INTERCHANGE OF RESEARCH RESULTS. METHODS FOR IMPROVING KNOWLEDGE TRANSFER WILL BE PROPOSED. C OMPREHENSIVE ALTERNATIVES TO "SINGLE-POLLUTANT" METHODS WILL BE DEVELOPED. SEVERAL APPROACHES WILL BE CONSIDERED INCLUDING, BUT NOT LIMITED TO, THOSE BASED ON PREVIOUSLY-DEVELOPED AIR QUALITY INDEXES, PRIORITIZATION METHODOLOGIES, AND ASSESSMENTS OF HYPERSENSITIVE POPULATIONS. THE FIRST YEAR WILL EMPHASIZE LINKAGES BETWEEN THE INDUSTRIAL ENVIRONME NTAL RESEARCH LABORATORY AND HEALTH EFFECTS AND STANDARDS-SETTING UNITS OF EPA. THE SECOND YEAR WOULD EMPHASIZE LINKAGES WITH TRANSPORT- AND-TRANSFORMATION RESEARCH. THE THIRD YEAR WOULD EMPHASIZE INTEGRATION OF DIVERSE ASPECTS OF THE ENVIRONMENTAL MANAGEMENT SYSTEM.

CHEMICAL STUDIES DIRECTED TOWARDS ECOLOGICAL DAMAGE ASSESSMENT OF PETROLEUM DISCHARGES INTO THE MARINE ENVIRONMENT

START/ COMPL DATE : 09/77 - 09/80 : FUNDING : EST. - FY 77 / $ 64990
TASK/EPA CODE :P608C-11 / R805477-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : P LEFCOURT
INVESTIGATORS : J G QUINN UNIV. OF RHODE ISLAND
E J HOFFMAN UNIV. OF RHODE ISLAND

MILE: 09/80 -FINAL REPORT ENTITLED, "CHEMICAL STUDIES DIRECTED TOWARDS ECOLO

OBJECTIVES: TO CONDUCT ANALYTICAL CHEMICAL STUDIES IN SUPPORT OF ECOL OGICAL DAMAGE ASSESSMENT OF ACUTE AND CHRONIC DISCHARGES OF PETROLEUM INTO THE NEAR-SHORE MARINE ENVIRONMENT. THESE STUDIES WILL INCLUDE THE FO LLOWING: (1) CHEMICAL ANALYSES OF PETROLEUM COMPOUNDS IN SELECTED SAMPLING OF WATER, SEDIMENTS AND ORGANISMS USING A VARIETY OF ANALYTICAL PROCED URES (E.G. COLUMN, THIN-LAYER, LIQUID AND GAS CHROMATOGRAPHY; INFRARED AND FLUORESCENCE SPECTROSCOPY; AND COMBINED GAS CHROMATOGRAP HY-MASS SPECTROMETRY), (2) DEVELOPMENT AND NEW METHODS AND MODIFICATION OF EXISTING PROCEDURES IN SUPPORT OF TOXICOLOGICAL AND FIELD STUDIES, (3) PARTICIPATION WITH OTHER FEDERAL LABORATORIES IN THE DEVELOPMENT AND INTERCALIBRATION OF STANDARD REFERENCE MATERIALS AND METHODS FOR PETROLEUM ANALYSIS.APPROACH: SAMPLES WILL BE COLLECTED FROM SELECTED SPILLS OF OP PORTUNITY AND SITES OF CHRONIC OIL DISCHARGES. THE BASIC ANALYSIS OF THESE SAMPLES WILL INVOLVE EXTRACTION, ISOLATION OF PETROLEUM COMPOUNDS BY COLUMN AND/OR THIN-LAYER CHROMATOGRAPHY, AND ANALYSIS BY GAS CHROM ATOGRAPHY USING PACKED METAL COLUMNS AND GLASS CAPILLARY COLUMNS. SELECTED SAMPLE EXTRACTS WILL ALSO BE ANALYZED BY HIGH PRESSURE LIQUID CHROMATOGRAPHY, INFRARED AND FLUORESCENCE SPECTROSCOPY, AND COMBINED GAS CHROMATOGRAPHY-MASS SPECTROMETRY. IN COMBINATION WITH FIELD EVA LUATION AND LABORATORY TOXICOLOGICAL INVESTIGATIONS, THE PROPOSED RESEARCH WILL ALLOW A HIGHLY INTEGRATED, MULTIDISCIPLINARY STUDY OF THE FATE AND EFFECTS OF OIL ON THE ECOSYTEM.

This work is aimed at developing tools which can be used for relating the configurational changes and the system capacity for a computer system executing the desired workload. A combination of simulation and analytic modelling is proposed here as the basic approach to be used. The validation of the models will be done with respect to the Univac equipment at the University of Maryland.

It is now recognized that animal bioassays are inadequate for monitoring the thousands of environmental agents which require screening as possible carcinogens. Several short-term in vitro tests for mutagenicity and carcinogenicity are currently being evaluated (by governmental agencies, private industry and various research groups). Since many environmental mutagens and carcinogens require prior metabolism or whole cells to exert their effects. Some of these short-term assays use a rat liver microsomal fraction for activation of the chemical being tested. There is a paucity of information, however, on whether or not the activation of a known carcinogen and its covalent binding to cellular DNA in these in vitro systems is quantitatively and qualitatively similar to that which occurs in intact mammalian cells, or in the whole animal. The objective of this proposal is to examine the modified DNA from cells used in these assays after exposure to the ubiquitous carcinogen benzo (a) pyrene (BP). The approach will be to incubate tritium labeled BP with microsomes and Salmonella typhimurium tester strains, or with various mammalian cell lines. Cellular DNA will then be extracted, analyzed for radioactivity and fluorescense, and then hydrolyzed to nucleosides which will be analyzed by high pressure liquid chromatography, utilizing appropriate BP-nucleoside derivatives prepared chemically as markers to determine the nature of the BP-nucleoside adducts present. Parallel assays will be done for mutagenicity and transformation and of aryl hydrocarbon hydroxylase and epoxide hydratase activities. The data will be correlated with our results obtained in intact human tissues where it has been possible to determine the structure of the major adduct formed. This application does not involve recombinant DNA.

805484

PURPOSE

The objective of this proposal is to develop information on the integrated use of pesticides for the home and garden. A brochure will be developed which will be easy to read and use. It will stress the use of an integrated approach to home and garden pest management. Such information should serve to help the consumer through the baffling array of pesticides from which he must choose over the counter. At the same time, the consumer will be given alternate solutions to pest problems such as environmental modification, e.g., litter and trash removal, screening, pest/predator roles in garden culture and mechanical or manual methods of pest control. Brand names will not be used. The overriding objective is to aid in reducing adverse effects of pesticide use.

METHOD

National Audubon proposes to sublet part of the grant to the John Muir Institute in California. The Institute will research and develop the technical materials on integrated home and garden pest management for inclusion in the brochure. The John Muir Institute has developed some information in the subject area outlined previously and the National Audubon will capitalize on this developing technology by expanding the scope of that project's work for incorporation into a nationally pertinent publication.

PHAGE RESISTANCE AS A MEANS OF SEPARATING HUMAN AND ANIMAL E. COLI STRAINS AND DEFINING COLONIZATION

START/ COMPL DATE : 08/77 - 07/79 : FUNDING : EST. - FY 77 / $ 21800
TASK/EPA CODE :D607A-038 / R805488-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : V J CABELLI
INVESTIGATORS : P S COHEN UNIV. OF RHODE ISLAND
MILE: 07/78 -DEVELOP METHODS FOR DISTINGUISHING HUMAN FROM ANIMAL E. COLI ST
07/79 -APPLY METHODS IN DETERMINING THE RELATIVE PROPORTIONS OF HUMAN

THE OBJECTIVES OF THIS PROJECT ARE: (A) TO EXAMINE THE RELATIONSHIP BETWEEN THE COLIPHAGE BIOTYPES OF E. COLI STRAINS AND THEIR ABILITY TO COLONIZE THE GASTROINTESTINAL TRACTS OF WARM-BLOODED ANIMALS, (B) TO DIST INGUISH BETWEEN HUMAN AND ANIMAL FECAL E. COLI STRAINS BY COLIPHAGE BIOTYP ING. IT IS HOPED THAT THESE STUDIES WILL ALLOW US TO DEVELOP RAPID METHODS FOR DISTINGUISHING BETWEEN HUMAN AND ANIMAL FECAL E. COLI STRAINS WHICH, IN TURN, WILL ALLOW RAPID ASSESSMENT AS TO WHETHER NATURAL WATERS ARE POLLUTED WITH LOWER ANIMAL OR HUMAN FECAL WASTES.

805489

The Estuarine Research Federation is making arrangements for the "Fourth International Symposium on Estuaries" to beheld on October 2-5, 1977 at Mt. Airy Lodge, Pennsylvania. The theme is "Estuarine Processes" but conveners have been encouraged to emphasize management problems, e.g., implications of energy development on the coastal and estuarine environment and a better definition of the relationship between primary and secondary productivity. We expect about 1,000 representatives from governmental agencies, universities, and industry.

Thematically the program will address four principal topic areas comprised of about 45 invited papers. These are: Estuarine Development and Resource Management, Estuarine Communities and Ecosystem Relationships, Man-Estuary Interactions and Estuary-Nearshore Interactions. Special interest symposia supplement the program to cover six special topics.

THE NEW ATLANTA - AN URBAN ENVIRONMENTAL FUTURES CONFERENCE

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 20000
TASK/EPA CODE :W619 -01 / R805491-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J GERBA
INVESTIGATORS : R HANIE ATLANTA TWO THOUSAND INC.
E P ODUM UNIV. OF GEORGIA
E GOLDSMITH ECOLOGIST
J P MILTON THRESHOLD INCORPORATED

MILE: 03/79 -FINAL REPORT "ALTERNATIVES FOR GREATER ATLANTA"

OBJECTIVE: THIS PROPOSAL OUTLINES A STUDY CONFERENCE TO EXPLORE THE PROBABLE SHORT (5-10 YEARS), INTERMEDIATE (10-20 YEARS) AND LONG-RANGE (20-30 YEARS) ENVIRONMENTAL FUTURE OF GREATER ATLANTA AND THE SOUTHEAST REGION. ALTHOUGH THE PRIMARY FOCUS IS ON THE METROPOLITAN AREA OF GREATER ATLANTA, ENVIRONMENTAL PROCESSES AFFECTING THE CITY AT BOTH REGIONAL AND NATIONAL LEVELS WILL ALSO BE EXAMINED BY THE CONFERENCE. APPROACH: THE URBAN ENVIRONMENTAL FUTURES CONFERENCE WILL BRING TOGETHER A WIDE RANGE OF INVOLVED CITIZENS, COMMUNITY LEADERS, REGIONAL DECISIONMAKERS AND PLANNERS, AND NATIONAL RESOURCE EXPERTS. THE CONFERENCE STRUCTURE PROPOSED HERE HAS BEEN CAREFULLY DESIGNED TO ALLOW THE CONFEREES TO ACCOMPLISH THE FOLLOWING PURPOSES: TO IDENTIFY AND EXAMINE MAJOR CURRENT TRENDS AND ISSUES AFFECTING THE URBAN ENVIRONMENTAL PLANNING AND MANAGEMENT; TO IDENTIFY COMMON ENVIRONMENTAL GOALS; AND TO DEVELOP NEW APPROACHES FOR ACHIEVING THESE ALTERNATIVE GOALS. LASTLY, A PRIMARY PURPOSE OF THE CONFERENCE IS TO DEMONSTRATE AN IMPROVED PROCESS FOR INVOLVING CITIZENS IN GOAL SETTING AND PLANNING FOR ENVIRONMENTAL QUALITY. CURRENT PLANS: CONFERENCE SCHEDULED FOR SEPTEMBER 22-24, 1977, URBAN LIFE AUDITORIUM, GEORGIA STATE UNIVERSITY, ATLANTA, GA. CONTENT OF CONFERENCE ESTABLISHED. MECHANICS OF CONFERENCE UNDERWAY BY PLANNING TEAM.

805493

A mobile pilot plan consisting of electrochemical coagulation/flotation followed by sand filtration will be designed, constructed and operated at several seafoods processing plants to determine the technical and economic feasibility of the processes. The sludges will be evaluated for possible utilization.

STUDIES RELATED TO THE ORGANIC CHEMICAL ANALYSIS OF INDUSTRIAL SAMPLES

START/ COMPL DATE : 09/77 - 10/79 : FUNDING : EST. - FY 77 / $ 28000
TASK/EPA CODE :F623A-28 / R805494-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L D JOHNSON
INVESTIGATORS : C H LOCHMULLER DUKE UNIVERSITY
MILE: 09/77 -GRANT STARTS
11/79 -FINAL REPORT

OBJECTIVE: THE OBJECTIVE OF THESE STUDIES IS TO PROVIDE A FIRMER U NDERSTANDING OF THE BEHAVIOR OF POROUS POLYMER SORBENTS IN SOURCE SAMPLING EFFORTS. APPROACH: PREVIOUS WORK HAS DEALT WITH THE EFFECTS OF REACTION W ITH ACIDS AND ACID GASES ON THE SORPTION CAPACITY AND SELECTIVITY OF THESE MATERIALS. RESULTS TO DATE INDICATE THAT SULFONATION AND NITRATION CAN INDEED AFFECT BOTH THE AMOUNT AND THE RELATIVE DISTRIBUTION OF REPRESENTATIVE ORGANIC COMPOUNDS ON THESE SORBENTS. THIS EFFECT WILL BE ESPECIALLY SIGNIFICANT IF THE SAMPLING EFFORT IS CARRIED OUT PAST "BREAKTHROUGH"; THAT IS, IF THE SORBENT TRAP CAPACITY IS EXCEEDED BY THE CHALLENGE CONCENTRATION. POROUS POLYMER SORBENTS HAVE BEEN USED TO SAMPLE AMBIENT AIR AND SOURCES AT TEMPERATURES IN WHICH THE PRINCIPAL SORPTION MECHANISM IS GAS-SOLID ADSORPTION. MORE RECENTLY, THESE SORBENTS HAVE BEEN USED IN SOURCE SAMPLING AT TEMPERATURES WHICH CAUSE THE CONDENSATION OF SIGNIFICANT AMOUNTS OF WATER. THIS REDUCES THE PROBABILITY OF ACID-POLYMER MECHANISM. IN THE WORK PROPOSED BOTH DYNAMIC (LIQUID CHROMAT OGRAPHY) AND STATIC METHODS WILL BE EXAMINED AS METHODS FOR THE LABORATORY MEASUREMENT OF SORPTION CAPACITY AND SELECTIVITY AS A FUNCTION OF PH AND TEMPERATURE. IN ADDITION, THE RELATION BETWEEN WATER-BENZENE DIST RIBUTION AND WATER-STYRENE POLYMER (XAD-2) ADSORPTION WILL BE EXAMINED. IN FORMATION OBTAINED FROM LITERATURE VALUES FOR BENZENE-WATER-SOLUTE SYSTEMS AND LABORATORY-MEASURED POLYMER STUDIES WILL BE USED TO ATTEMPT TO DEVELOP A PREDICTIVE MODEL FOR SAMPLING PURPOSES. OUTPUT: FINAL REPORT TO BE ENTERED INTO ORD SYSTEM. OF DIRECT USE TO IERL BUT ALSO OF INTEREST TO SCIENTIFIC COMMUNITY.

DEVELOPMENT OF A WATER QUALITY MODEL FOR FEEDLOT RUNOFF CONTROL SYSTEMS

START/ COMPL DATE : 09/77 - 09/80 : FUNDING : EST. - FY 77 / $ 74659
TASK/EPA CODE :L617D-27 / R805499-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R D KREIS
INVESTIGATORS : J K KOELLIKER OREGON STATE HIGHER EDUC. SYS
J R MINER OREGON STATE HIGHER EDUC. SYS
R B WENSINK OREGON STATE HIGHER EDUC. SYS

MILE: 09/77 -INITIATE PROJECT
01/78 -PRELIMINARY MODEL DESIGN
06/78 -FIRST VERSION MODEL VERIFIED
12/79 -SECOND VERSION MODEL VERIFIED
05/80 -FINAL REPORT COMPLETE

THE OBJECTIVE IS TO DEVELOP A CONTINUOUS WATER QUALITY MODEL TO PREDICT, ON A DAILY BASIS, THE QUALITY OF FEEDLOT RUNOFF CONTAINED IN THE RUNOFF RETENTION BASIN, DISCHARGED BY UNCONTROLLED EVENTS, AND DEPOSITED ON THE INTERCEPTION SURFACE OF THE LAND TREATMENT AREA. PREDICTION EQUATIONS FOR COD, NH3-N, TOTAL N, TDS, TOTAL P, MICROORGANISMS, AND PH BASED UPON PREVIOUSLY REPORTED RESEARCH WILL BE ADDED TO A HYDROLOGIC MODEL DEVELOPED BY THE INVESTIGATORS. INTENSIVE SAMPLING OF A RETENTION BASIN WILL BE DONE TO PROVIDE INPUT TO CALIBRATE THE QUALITY MODEL. FIELD DATA WILL ALSO BE COLLECTED DURING SPRAY IRRIGATION TO DETERMINE QUALITY CHANGES. SUBSEQUENTLY, SAMPLING OF FIVE OTHER BASINS WILL BE MADE TO FIELD TEST AND FURTHER AID IN REFINING THE WATER QUALITY MODEL FOR EACH CONSTITUENT. FIELD WORK AND DEVELOPMENT WILL BEGIN IN AUGUST 1977. THE INITIAL MODEL WILL BE OPERATIONAL ABOUT FEBRUARY 1978, INITIAL CALIBRATION WILL BE FINISHED ABOUT SEPTEMBER 1977.

AIRCRAFT RADIATION MEASUREMENTS OVER ST. LOUIS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 16000
TASK/EPA CODE :G603A-AA-36 / R805500-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : F S BINKOWSKI
INVESTIGATORS : T N CARLSON PENN. STATE UNIVERSITY
MILE: 07/78 -FINAL REPORT

AIRCRAFT RADIATION MEASUREMENTS MADE ON BOARD THE PENN STATE AEROCOMMANDER DURING THE 1976 AND 1974 ST. LOUIS RAPS PROJECT WILL BE PROCESSED AND THE DATA REDUCED FOR THE PURPOSES OF ASSESSING THE EFFECTS OF AEROSOLS IN THE URBAN BOUNDARY LAYER ON TRANSMISSION AND FOR TESTING OF RADIATIVE TRANSFER MODELS.

A SURVEY OF THE USE AND EMISSION OF SELECTED CARCINOGENS IN NEW JERSEY

START/ COMPL DATE : 10/77 - 10/80 : FUNDING : EST. - FY 77 / $ 55000
TASK/EPA CODE :F624A-077 / R805501-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J A MCSORLEY
INVESTIGATORS : P W PREUSS STATE DEPT. OF ENV. PROTECTIO
MILE: 09/77 -GRANT AWARD
09/80 -GRANT COMPLETION

OBJECTIVES OF THE PROJECT: 1. TO ESTABLISH A COMPUTERIZED DATA BASE CONCERNING THE MANUFACTURE, USE, STORAGE, PROCESSING, FORMATION, RELEASE, DISPOSAL AND REPACKAGING IN NJ OF A GROUP OF CARCINOGENIC SUBSTANCES SELECTED ON THE BASIS OF THEIR LARGE VOLUME OF PRODUCTION AND/OR THEIR CARCINOGENICITY. 2. TO IDENTIFY THE AREA OF THE STATE AND POPULATION GROUP THAT ARE SUBJECT TO AN INCREASED CANCER RISK DUE TO EXPOSURE TO CANCER CAUSING SUBSTANCES AND OTHER TOXIC AGENTS IN THE ENVIRONMENT. 3. TO ESTABLISH A BASE FOR THE STUDY OF METHODS OF REDUCING OR ELIMINATING THE RELEASE OF CARCINOGENS INTO THE ENVIRONMENT. THE DATA BASE WILL PERMIT DETERMINATIONS OF THE FOLLOWING: A. A COMPREHENSIVE INVENTORY OF THE SELECTED CARCINOGENS IN NEW JERSEY; B. THE INDUSTRIAL LOCATIONS WHERE THE SELECTED CARCINOGENS ARE USED, MANUFACTURED, STORED, RELEASED, FORMED, REPACKAGED, ETC., AND THE QUANTITY OF THE CARCINOGEN HANDLED AT EACH LOCATION; C. THE PRODUCTS WHICH ARE MANUFACTURED FROM THE SELECTED CARCINOGENS; D. THE QUANTITY OF THE SUBSTANCES EMITTED AND/OR RELEASED TO THE ATMOSPHERE, WATER AND SOLID WASTE STREAM; E. THE POTENTIAL OCCUPATIONAL AND COMMUNITY EXPOSURE TO THE SELECTED MATERIALS.

COLOR REMOVAL FROM NSSC EFFLUENTS BY ULTRAFILTRATION

START/ COMPL DATE : 09/77 - 06/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :B6108-629 / R805502-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : R SCOTT
INVESTIGATORS : M DOSHI INST. OF PAPER CHEMISTRY
H S DUGAL INST. OF PAPER CHEMISTRY
P E PARKER INST. OF PAPER CHEMISTRY

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT
06/78 -FINAL REPORT RECEIVED

THE PRIMARY OBJECTIVE OF THIS PROJECT IS TO DETERMINE WHETHER OR NOT ULT RAFILTRATION CAN BE USED AS A COLOR REMOVING TOOL FROM NSSC EFFLUENTS. THE SECONDARY OBJECTIVE WILL BE TO DEFINE FUTURE WORK IN THE AREA OF COLOR REMOVAL TECHNOLOGY. INDIVIDUAL STREAM(S) IN A SELECTED NSSC MILL WILL BE CHOSEN FOR THIS STUDY. ULTRAFILTRATION TUBULAR MODULAR DESIGN WILL BE USED AT HIGH VELOCITIES TO PREVENT GEL FORMATION AND SUSPENDED SOLIDS PLUGG ING. LABORATORY EXPERIMENTS WILL BE DONE TO DETERMINE FLUX RATES AND COLOR REJECTIONS AS A FUNCTION OF CONCENTRATION, TIME, APPLIED PRESSURE, AND AVERAGE VELOCITY THROUGH THE MODULE. SAMPLES WILL BE ANALYZED FOR COLOR, BOD5, TOC, CARBOHYDRATES AND LIGNIN. LIMITED ANALYSIS FOR POTENTIAL TOXICANTS WILL ALSO BE CARRIED OUT BEFORE AND AFTER ULTRAFILT RATION. A FINAL REPORT WILL BE ISSUED DETAILING PROJECT FINDINGS. IF SO IN DICATED, THE BENCH-SCALE RESEARCH PROJECT WILL BE MOVED TO A MILL SITE FOR ADDITIONAL ON SITE RESEARCH DEPENDENT ON AVAILABILITY OF FUNDS AT THIS POINT IN TIME.

LAKE VANCOUVER, WASHINGTON - SOCIAL IMPLICATIONS OF A LAKE RESTORATION PROGRAM

START/ COMPL DATE : 08/77 - 09/79 : FUNDING : EST. - FY 77 / $ 87901
TASK/EPA CODE :M412A-34 / R805510-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E F MACDONALD
INVESTIGATORS : T C HOGG OREGON STATE HIGHER EDUC. SYS
W D HONEY OREGON STATE HIGHER EDUC. SYS

LAKE VANCOUVER IS A EUTROPHIC URBAN LAKE IN CLARK COUNTY, WASHINGTON, WHI CH IS PRESENTLY UNDERGOING RESTORATION. THE OBJECTIVES OF THIS RESTORATION ARE THE CONTROL OF NON-POINT POLLUTION IMPROVEMENTS IN ITS AESTHETIC QUA LITIES AND THE PROVISION OF RECREATIONAL BENEFITS. THE SOCIAL IMPLICATIONS OF RESTORING LAKE VANCOUVER HAVE NOT BEEN DETERMINED. THE OBJECTIVE OF THIS RESEARCH IS TO WHOLISTICALLY EXAMINE THE RANGE AND TYPE OF SOCIAL IMPACTS THAT MAY BE GENERATED BY OR ASSOCIATED WITH THE RE STORATION PROCESS. IN ADDITION, THE RESEARCH EFFORT WILL TEST AND REFINE A RESEARCH MODEL PREVIOUSLY DESIGNED BY THE PRINCIPAL INVESTIGATORS FOR THE ENVIRONMENTAL PROTECTION AGENCY. THE RESEARCH APPROACH IS ADAPTED FROM THIS MODEL AND EMPLOYS PARTICIPANT OBSERVATION AS WELL AS SOCIAL SURVEY AS METHODS OF DATA COLLECTION. AN INTEGRAL PORTION OF THE RESEARCH DESIGN IS A CULTURAL-ECOLOGICAL FRAMEWORK WHICH ILLUSTRATES THE ABILITY OF HUMAN POPULATIONS TO ADAPT TO THE PRESENCE OF RESOURCE DEVELOPMENTS.

AN ASSESSMENT OF THE RELATIONSHIP BETWEEN CANCER MORTALITY AND POPULATION EXPOSURE TO SELECTED ENVIRONMENTAL AND INDUSTRIAL

START/ COMPL DATE : 11/77 - 00/00 : FUNDING : EST. - FY 77 / $ 73000
TASK/EPA CODE : H601F-7754 / R805526-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K N ELSON
INVESTIGATORS : P W PREUSS STATE DEPT. OF ENV. PROTECTIO
G PAULSON STATE DEPT. OF ENV. PROTECTIO
T BURKE STATE DEPT. OF ENV. PROTECTIO
W COHEN STATE DEPT. OF ENV. PROTECTIO

MILE: 10/77 -AWARD GRANT
10/78 -FINAL REPORT DUE

THE PROPOSED PROJECT WILL CORRELATE THE GEOGRAPHIC PATTERNS OF CANCER MORTALITY WITH ENVIRONMENTAL AND INDUSTRIAL DATA IN THE FOLLOWING MANNER: A. STATEWIDE ENVIRONMENTAL AND INDUSTRIAL DATA WILL BE COLLECTED FOR AS FAR BACK IN TIME AS THE SOURCES PERMIT. B. A LIST OF APPROXIMATELY 600 ENVIRONMENTAL AND INDUSTRIAL VARIABLES WILL BE IDENTIFIED TO BE CORRELATED TO THE CANCER MORTALITY DATA. C. THESE VARIABLES WILL BE CORRELATED WITH THE CANCER MORTALITY DATA. THE MATHEMATICAL TECHNIQUES WILL INCLUDE BIVARIATE CORRELATION AND FACTOR ANALYSIS. BIVARIATE CORRELATION IS A STATISTICAL TOOL FOR MEASURING THE RELATIONSHIP BETWEEN TWO VARIABLES. FACTOR ANALYSIS PROVIDES A MEASURE OF THE EXTENT TO WHICH GROUPS OF DIFFERENT VARIABLES CORRELATE. THROUGH THE USE OF THESE TECHNIQUES, BOTH INDIVIDUAL AND GROUPS OF FACTORS WHICH CORRELATE WITH CANCER MORTALITY WILL BE IDENTIFIED. D. FROM THE RESULTS OF THE CORRELATION OF THE 600 VARIABLES, A LIST OF THOSE 20 TO 40 WHICH CORRELATE MOST STRONGLY WITH CANCER MORTALITY WILL BE GENERATED. E. INTENSIVE DATA SEARCHES WILL BE CONDUCTED IN ORDER TO RECONSTRUCT A 30-YEAR PERIOD OF POPULATION EXPOSURE TO THE 20 TO 40 SELECTED VARIABLES. F. ANNUAL EXPOSURE RATES WILL THEN BE CORRELATED TO ANNUAL MORTALITY DATA TO DETERMINE IF RELATIONSHIPS EXIST BETWEEN EXPOSURE AND MORTALITY. IN PERFORMING THESE CORRELATIONS THE 20-30 YEAR LATENCY PERIOD FOR CANCER WILL BE CONSIDERED. G. A FINAL REPORT WILL BE PREPARED EXPLAINING ALL FINDINGS AND RECOMMENDING FUTURE COURSES OF ACTION.

ON-FARM IMPROVEMENTS TO REDUCE SEDIMENT AND NUTRIENTS IN IRRIGATION RETURN FLOW

START/ COMPL DATE : 10/77 - 03/81 : FUNDING : EST. - FY 77 / $ 287703
TASK/EPA CODE :L617A-07 / R805527-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J P LAW
INVESTIGATORS : L G KING WASHINGTON STATE UNIVERSITY
B L MCNEAL WASHINGTON STATE UNIVERSITY
W H PIETSCH WASHINGTON STATE UNIVERSITY
S MATULICH WASHINGTON STATE UNIVERSITY

MILE: 03/81 -FINAL REPORT

THE OVERALL OBJECTIVES OF THIS PROJECT INCLUDE THE IMPLEMENTATION OF A PROGRAM FOR REDUCING THE NUTRIENT AND SEDIMENT DISCHARGES IN IRRIGATION RETURN FLOW FROM A WELL DEFINED SUB-BASIN OF APPROXIMATELY 2,000 A CRES. THE PROJECT IS INTENDED TO PROVIDE A FRAMEWORK FOR IMPLEMENTATION OF 208 PLANS FOR IRRIGATED AGRICULTURE IN WASHINGTON. A HIGH DEGREE OF FARMER PARTICIPATION WILL BE OBTAINED BY PROVIDING COST SHARING FUNDS FOR CAPITAL IMPROVEMENTS ON INDIVIDUAL FARMS WITHIN THE SUB-BASIN. TECH NICAL HELP WILL BE PROVIDED FOR CHANGES OF PRACTICES NOT INVOLVING CAPITAL IMPROVEMENTS. THE REDUCTION IN NUTRIENTS AND SEDIMENTS AFFECTED BY SPECIFIC PRACTICE CHANGES WILL BE QUANTIFIED. THE BEST FARMING PRACTICES WILL BE IDENTIFIED ON A COST-EFFECTIVENESS BASIS. INFORMATION CONCERNING PROGRESS OF THE PROJECT WILL BE DISSEMINATED THROUGH COUNTY EXTENSION AGENTS, IRRIGATION AND CONSERVATION DISTRICTS, ANNUAL FIELD DAYS ON THE PROJECT SITE, PERIODIC AND FINAL REPORTS TO THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY AND THE U.S. ENVIRONMENTAL PROTECTIO

A STUDY AND ANALYSIS OF THE MUNCIE, INDIANA INDUSTRIAL PRETREATMENT PROGRAM

START/ COMPL DATE : 08/77 - 08/79 : FUNDING : EST. - FY 77 / $ 72500
TASK/EPA CODE :L610F-21 / R805528-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T E SHORT
INVESTIGATORS : J CRADDOCK MUNCIE CITY DIV. OF WATER QUA
MILE: 09/77 -START PROJECT
09/78 -COMPLETE PHASE I -ISSUE INTERIM REPORT
09/79 -COMPLETE PROJECT - ISSUE FINAL REPORT

THE OBJECTIVES OF THIS PROJECT ARE AS FOLLOWS: PROVIDE COMMUNITIES, INDUSTRIES, REGULATORY AGENCIES, CONSULTANTS, AND OTHER INTERESTED PARTIES WITH DESCRIPTIVE INFORMATION WHICH WOULD LEND GUIDANCE IN IMPLEMENTING INDUSTRIAL WASTEWATER PRETREATMENT PROGRAMS. DETERMINE THE ABILITY OF EXISTING MUNCIE ACTIVATED SLUDGE TREATMENT FACILITY TO REMOVE OR ALTER THE CONCENTRATION OF SELECTED TOXIC COMPOUNDS. PROVIDE MUNCIE WITH TOXIC COMPOUNDS DATA RELATIVE TO THE WASTEWATER TREATMENT PLANT INFLUENT AND EFFLUENT. THE COMPLETED PROJECT WILL INCLUDE A DESCRIPTION OF THE MUNCIE AREA, HISTORY OF THE PRETREATMENT PROGRAM, THE SEWER USE ORDINANCE, INDUSTRIAL MONITORING EFFORT, USER SURCHARGE PROCESS, INDUSTRIAL COST RECOVERY PROVISION, SLUDGE APPLICATION PROGRAM, INSTITUTIONAL FACTORS, ADMINISTRATIVE FACTORS, EFFECTS OF PRETREATMENT PROGRAM ON WASTEWATER, AND PRETREATMENT PROGRAM IMPACT ON INDUSTRY.

RETENTION AND TRANSFORMATIONS OF PHOSPHOROUS AND SELECTED PESTICIDES IN SOILS AND SEDIMENTS

START/ COMPL DATE : 10/77 - 09/80 : FUNDING : EST. - FY 77 / $ 182949
TASK/EPA CODE :K617B-417 / R805529-01 (GRANT) PRIOR FY / 1

MILE: 10/77 -START OF GRANT
10/79 -FINAL REPORT

THE PROPOSED RESEARCH PROJECT CONSISTS OF THREE MAJOR PARTS. THE FIRST PART IS TO CONDUCT AN EXHAUSTIVE LITERATURE SEARCH TO COMPILE A PRELIMINARY DATA BASE OF RETENTION AND TRANSFORMATION CHARACTERISTICS OF C OMMON PESTICIDES AND PHOSPHORUS COMPOUNDS IN SOILS. THE SECOND PART OF THE PROJECT DEALS WITH BASIC LABORATORY EXPERIMENTS TO MEASURE EQUILIBRIUM AND KINETIC ADSORPTION-DESORPTION AND BOUND RESIDUE FORMATION CHARACTERISTICS, NONSINGULARITY OR IRREVERSIBILITY IN ADSORPTION-DESORPTION PROCESSES, AS WELL AS MEASUREMENT OF TRANSFORMATI ON RATES UNDER CONTROLLED SOIL ENVIRONMENTAL CONDITIONS. THE THIRD PART OF THE PROJECT INVOLVES ROUTINE MEASUREMENTS OF ADSORPTION-DESORPTION ISOTHERMS AND TRANSFORMATION RATES OF A LARGE NUMBER OF COMMON PES TICIDES USING A BROAD SPECTRUM OF SOIL TYPES FROM THROUGHOUT THE UNITED ST ATES. THE DATA BASE GENERATED BY THE PROPOSED PROJECT WILL THEN BE USED IN DEVELOPING GENERAL MULTIPLE REGRESSION EQUATIONS THAT RELATE RETENTION AND TRANSFORMATION COEFFICIENTS TO FUNDAMENTAL SOIL PROPERTIES. SUCH RE LATIONSHIPS ARE URGENTLY NEEDED TO ESTIMATE MODEL INPUT PARAMETERS FOR THE NONPOINT SOURCE POLLUTION SIMULATION MODELS (SUCH AS EPA'S AGRICULTURAL RUNOFF MANAGEMENT MODEL, ARM) CURRENTLY USED TO IDENTIFY AND RECOMMEND SOIL CONSERVATION AND LAND USE MANAGEMENT PRACTICES CAUSING MINIMUM E NVIRONMENTAL CONTAMINATION. A MULTI-DISCIPLINARY TEAM OF RESEARCHERS (SOIL PHYSICS, SOIL CHEMISTRY, SOIL MICROBIOLOGY, PESTICIDE CHEMISTRY, AND STATISTICS) HAS BEEN ASSEMBLED TO ACCOMPLISH THE SPECIFIED PROJECT GOALS. THE FINAL REPORT WILL BE PREPARED AT THE END OF THE PROJECT.

DESIGN AND MANAGEMENT OF SUBSURFACE SOIL ABSORPTION SYSTEMS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 180651
TASK/EPA CODE :C6118-7133 / R805531-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J F KREISSL
INVESTIGATORS : W C BOYLE UNIV. OF WISCONSIN
B J TYLER UNIV. OF WISCONSIN
J CONVERSE UNIV. OF WISCONSIN
R OTIS UNIV. OF WISCONSIN
R SIEGRIST UNIV. OF WISCONSIN

MILE: 10/77 -START
10/78 -INTERIM REPORT
10/79 -COMPLETE
02/80 -PUBLISH

THIS PROJECT HAS BEEN DIVIDED INTO THREE MAJOR AREAS OF RESEARCH: (1) A FIELD STUDY OF MODIFIED SUBSURFACE SYSTEMS, (2) AN EXAMINATION OF THE E FFECTS OF SOIL ABSORPTION FIELD CONSTRUCTION ON SOIL PERMEABILITY, AND (3) AN EVALUATION OF THE ACCEPTABILITY OF GRAYWATER IN BOTH STRUCTURED AND UNSTRUCTURED SOILS. IN THIS STUDY OF MODIFIED SUBSURFACE SYSTEMS, FIELD INSTALLATIONS ON TWO DIFFERENT SOIL TYPES WILL BE CONSTRUCTED TO COMPARE THE EFFECTS OF ALTERNATING BEDS VS. CONVENTIONAL BED OPERATION; TO COMPARE THE EFFECTS OF UNIFORM DISTRIBUTION VS. CONVENTIONAL GRAVITY DISTRIBUTION; AND TO COMPARE THE EFFECTS OF CHEMICAL OXIDATION VS. BIOLOGICAL OXIDATION ON RESTORATION OF INFILTRATIVE SITES. THE CONSTRUCTION STUDY WILL BE CONDUCTED TO DETERMINE THE EFFECTS OF CONSTRUCTION ON THE RESISTANCE OF THE INFILTRATIVE SURFACE UNDER DIFFERENT MOISTURE CONDITIONS IN SELECTED SOILS; TO DETERMINE BEST CONSTRUCTION TECHNIQUES TO MAINTAIN THE INFILTRATIVE SURFACE; AND TO DETERMINE WHAT TECHNIQUES MIGHT BE EMPLOYED TO RESTORE SOIL TO A HIGHER I NFILTRATIVE CAPACITY AFTER BEING PUDDLED OR COMPACTED. THE GRAYWATER STUDY WILL EVALUATE THE RELATIVE ACCEPTABILITY OF GRAYWATER VS. WHOLE WASTEWATER IN BOTH STRUCTURED AND UNSTRUCTURED SOILS THROUGH THE USE OF LYSIMETERS IN THE FIELD AND COLUMNS IN THE LABORATORY.

CHEMICAL REACTIONS OF ATMOSPHERIC HALOGENATED SPECIES

START/ COMPL DATE : 08/77 - 08/78 : FUNDING : EST. - FY 77 / $ 84770
TASK/EPA CODE :G603A-AI-07 / R805532-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : P HANST
INVESTIGATORS : M J MOLINA UNIV. OF CALIFORNIA
F S ROWLAND UNIV. OF CALIFORNIA
L T MOLINA UNIV. OF CALIFORNIA
R S IYER UNIV. OF CALIFORNIA

MILE: 10/77 -ANNUAL REPORT
10/78 -ANNUAL REPORT
10/79 -FINAL REPORT

THE PURPOSE OF THIS RESEARCH IS THE UNDERSTANDING OF THE VARIOUS ATMOSPHERIC CHEMICAL AND PHOTOCHEMICAL REACTION INVOLVING HALOGENATED SPECIES. THESE INCLUDE THE HALOCARBON COMPOUNDS IN CURRENT TECHNOLOGY, THE INTERMEDIATE HALOGENATED RADICALS RELEASED DURING THEIR ATMOSPHERIC DECOMPOSITION, AND COMPOUNDS FORMED IN SITU BY ATMOSPHERIC REACTIONS. THE ULTRAVIOLET ABSORPTION SPECTRA OF BROMINATED MOLECULES OFTEN EXTEND INTO THE 2900-3100A REGION NEAR THE ATMOSPHERIC CUT-OFF OF STRATOSPHERIC OZONE. LONG-PATH U.V. ABSORPTION SPECTRA WILL BE MEASURED FOR VARIOUS BROMINATED SPECIES (E.G. CBR2F2) TO DETERMINE WHICH MOLECULES CAN UNDERGO APPRECIABLE TROPOSPHERIC SOLAR PHOTODECOMPOSITION. THE CHEMICAL REACTION MECHANISMS OF IMPORTANT "SEMI-STABLE" MOLECULES FORMED IN THE ATMOSPHERE WILL BE STUDIED. FLASH PHOTOLYSIS WILL BE USED TO DETERMINE WHETHER THE HALOGENATED SPECIES RELEASED IN THE PHOTODECOMPOSITION OF CHLORINE NITRATE IS ClO, ClONO, Cl OR ClNO. FLASH PHOTOLYSIS WILL BE USED TO DETERMINE WHETHER ClONO2 IS THE SOLE PRODUCT FROM THE REACTION OF ClO WITH NO2. PEROXYNITRIC ACID (HO2NO2) WILL BE SYNTHESIZED AND ITS U.V. ABSORPTION SPECTRUM WILL BE MEASURED. RADIOACTIVE TRACER TECHNIQUES WILL BE APPLIED TO THE DETERMINATION OF THE CHEMICAL FATE OF HALOGENATED RADICALS REACTING WITH AIR. THESE TRACER RADICALS CAN EFFECTIVELY SIMULATE THE VERY LOW CONCENTRATIONS OF ORGANIC SPECIES IN THE ACTUAL ATMOSPHERE. THE POSSIBLE FORMATION OF ALDEHYDES FROM THE OXIDATION OF HALO RADICALS WILL BE INVESTIGATED, E.G. FOR CH3CCL3, THE FORMATION OF 14CH3CClO FROM 14CH3CCL2 PLUS O2. THE REACTIONS OF THE RESIDUAL RADICALS FROM CH3Br DECOMPOSITION WILL BE TRACED USING RADIOACTIVELY-LABELED CH282Br.

ENVIRONMENTAL MONITORING OF A WASTEWATER TREATMENT PLANT

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 59684
TASK/EPA CODE :D607A-008 / R805533-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H R PAHREN
INVESTIGATORS : D E JOHNSON SOUTHWEST RESEARCH INSTITUTE

H J HARDING SOUTHWEST RESEARCH INSTITUTE
B P SAGIK UNIV. OF TEXAS
C A SORBER UNIV. OF TEXAS

MILE: 10/77 -BEGIN PROJECT
09/78 -COMPLETE PROJECT

OBJECTIVES: TO EXAMINE THE AMBIENT AIR IMMEDIATELY DOWNWIND OF A WASTEWATER TREATMENT PLANT FOR THE PRESENCE OF PATHOGENIC MICROORGANISMS. EXAMINATIONS OF THE WASTEWATER AT SEVERAL POINTS WITHIN THE PLANT WILL ALSO BE MADE. DETERMINATIONS OF WHETHER OR NOT THESE MICROORGANISMS ARE CARRIED INTO POPULATED AREAS NEAR THE PLANT WILL BE PERFORMED. APPORACH: THE STUDY WILL BE INITIATED BY A VISIT TO THE SITE TO ESTABLISH THE REQUIRED LIAISON WITH THE APPROPRIATE STAFF OF THE PROPOSED TREATMENT PLANT LOCAL SCHOOLS AND RESIDENTS, AFTER WHICH SEVERAL LARGE VOLUME SAMPLES OF WASTEWATER WILL BE COLLECTED AND TRANSPORTED TO LABORATORIES IN SAN ANTONIO WHERE THEY WILL BE ANALYZED FOR VIRUSES AND ENTERIC BACTERIA TO CHARACTERIZE THE WASTEWATER FOR LEVELS AND TYPES OF PATHOGENIC MICRO
ORGANISMS. FROM THE PREDOMINATE PATHOGENIC MICROORGANISMS, SEVERAL WILL BE SELECTED FOR MONITORING IN WASTEWATER AND AEROSOL SAMPLES. FOLLOWING COMPLETION OF THESE ANALYSES, THE FINAL DESIGN OF THE MONITORING PROGRAM WILL BE COMPLETED. IN GENERAL, THE MONITORING EFFECT IS EXPECTED TO BE ACCOMPLISHED OVER A THREE-WEEK TIME PERIOD, DURING WHICH TIME SEVERAL AEROSOL RUNS COMPRISED OF ONE UPWIND AND 5 DOWNWIND STATIONS, TOGETHER WITH A COMPOSITE WASTEWATER SAMPLE COLLECTED DURING EACH AEROSOL RUN, WILL BE CARRIED OUT. AEROSOL SAMPLES WILL BE COLLECTED USING HIGH-VOLUME ELECTROSTATIC SAMPLERS (LITTON MODEL M OR LEAP TYPES). WIND SPEED AND DIRECTION WILL BE MONITORED WITH 2-METER AND 10-METER METEOROLOGY WEATHER STATIONS. PROGRESS: A PRELIMINARY VISIT HAS BEEN MADE TO A WASTEWATER TREATMENT PLANT LOCATED NEAR PORTLAND, OREGON, TO ESTABLISH CONTACTS WITH LOCAL PLANT AND SCHOOL OFFICIALS.

MEASUREMENT OF VOLATILE CHEMICAL EMISSIONS FROM WASTEWATER BASINS

START/ COMPL DATE : 08/77 - 10/79 : FUNDING : EST. - FY 77 / $ 94000
TASK/EPA CODE :B604B-618 / R805534-01 (GRANT) PRIOR FY76 / 1

08/79 -FINAL DRAFT REPORT
10/79 -FINAL REPORT RECEIVED

OBJECTIVE: THE OBJECTIVE OF THIS STUDY IS TO DETERMINE THE MAGNITUDE OF BOTH SULFUR AND ORGANIC COMPOUNDS THAT ESCAPE INTO THE AIR FROM WA STEWATER TREATMENT FACILITIES AT PULP AND PAPER MILLS. THE RESULTS OF THIS STUDY WILL HELP TO ESTABLISH WHETHER WASTEWATER TREATMENT FACILITIES ARE A SIGNIFICANT SECONDARY EMISSION SOURCE OF SULFUR AND ORGANIC COMPO UNDS. THE RESULTS CAN ALSO BE USED TO ESTABLISH BASELINE QUANTITIES AND TO SUGGEST POSSIBLE CONTROL METHODS, IF REQUIRED. METHODS: BOTH LABORATORY AND FIELD INVESTIGATIONS WILL BE CONDUCTED. THE LABORATORY STUDY WILL BE DESIGNED PRIMARILY TO PERFECT APPROPRIATE WATER AND AIR SAMPLING TE CHNIQUES. THIS PHASE WILL CONSIST OF RUNNING A LABORATORY SCALE BIOLOGICAL REACTOR AND SAMPLING BOTH THE LIQUID AND AIR PHASES. THE METHODS DEVE LOPED DURING THIS STUDY WILL THEN BE USED TO CONDUCT FIELD INVESTIGATIONS. BOTH PHASES OF THIS PROJECT WILL TAKE APPROXIMATELY ONE YEAR TO COMPLETE. THE FIELD SAMPLING WILL CONSIST OF BOTH WATER AND AIR SAMPLING AT ACTUAL WASTEWATER TREATMENT FACILITIES. LIQUID SAMPLES WILL BE COLLECTED AT THE INFLUENT AND EFFLUENT LOCATIONS OF THE TREATMENT REACTORS AS WELL AS IN THE REACTORS THEMSELVES. AIR SAMPLES WILL BE COLLECTED AT STRATEGIC POINTS UPWIND AND DOWNWIND FROM THE BIOLOGICAL REACTORS AND POSSIBLY ABOVE THE REACTORS THEMSELVES. AIR SAMPLES WILL BE COLLECTED AT D IFFERENT ELEVATIONS SO THAT THE VERTICAL DISTRIBUTION OF POLLUTANTS CAN BE ESTABLISHED. THE RESULTS WILL BE PUBLISHED IN EPA TECHNICAL REPORT SERIES.

EVALUATION OF THE ACCURACY AND VALIDITY OF PHYSICO-CHEMICAL AIR QUALITY MODELS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 110180
TASK/EPA CODE :G603A-AB-36 / R805537-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K DEMERJIAN
INVESTIGATORS : J H SEINFELD CALIF. INST. OF TECHNOLOGY
MILE: 09/78 -FINAL REPORT

PHYSICO-CHEMICAL AIR QUALITY MODELS DESCRIBE ATMOSPHERIC POLLUTANT B EHAVIOR BASED ON FUNDAMENTAL ASPECTS OF ATMOSPHERIC CHEMISTRY AND PHYSICS. THE OBJECT OF THIS RESEARCH PROGRAM IS TO DEVELOP TECHNIQUES FOR ASSES SING THE ACCURACY AND VALIDITY OF PHYSICO-CHEMICAL AIR QUALITY MODELS. THE PROGRAM WILL CONSIST OF TWO PARTS: 1. TO DETERMINE THE RANGE OF VARIABILITY OF KEY PARAMETERS IN PHYSICO-CHEMICAL AIR QUALITY MODELS AND THEN TO ESTABLISH THE RANGE OF VARIABILITY OF THE CONCENTRATION PR EDICTIONS OF SUCH MODELS. 2. TO DEVELOP A CONSISTENT AND GENERAL FRAMEWORK FOR EVALUATING THE PERFORMANCE OF MODELS WITH RESPECT TO THE DEGREE TO WHICH THEIR PREDICTIONS MATCH AMBIENT POLLUTANT CONCENTRATION DATA. THE RESULT OF THE RESEARCH WILL BE A GENERAL FRAMEWORK FOR ASSESSING QUA NTITATIVELY THE ACCURACY AND VALIDITY OF PHYSICO-CHEMICAL AIR QUALITY MODE

805538

OBJECTIVE: The principal objective of the Fourth National Conference on Individual Onsite Wastewater Systems is to continue an established forum for communication between professionals concerned with application and management of onsite wastewater systems. These professionals include engineers and sanitarians responsible for regulation, planners, and attorneys. Manufacturers of conventional as well as the technologically advanced wastewater recycle and water conservation systems, land developers and other users are expected to participate in conference activities.

APPROACH: This the Fourth National Conference organized by NSF to provide for exchange of information between regulatory, manufacturing, and consumer interests concerned with the treatment and disposal of wastes from individual homes. Federal, state, and local responsibilities will be reviewed. Particular emphasis will be placed on presenting effective management plans implemented by state and local agencies to insure the continued workability and adequate maintenance of all onsite systems. In view of EPA's position with respective to considering onsite systems as practical, cost effective alternatives to central sewerage systems in complying with PL 92-500 requirements for areawide wastewater management planning (Section 208), this year's conference is particularly timely.

CURRENT PLANS OR PROGRESS: Arrangements for a meeting of the planning committee on June 15, 1977, have been completed. Representatives of professional organizations with concern for onsite treatment alternatives; federal, state, and local regulatory agencies; researchers; and manufacturers have been invited to plan the Fourth National Conference.

805540

By this study we aim to identify categories of persons at high risk for development of cutaneous malignant melanoma and to isolate behavior patterns which increase the risk of tumor development. The approach utilizes case control techniques including the administration of a detailed questionnaire to both melanoma patients and normal age-sex matched controls. To date preliminary data on 343 melanoma patients compared to 150 controls suggest that melanoma patients sunburn more easily and suntan less well. An indepth exploration of solar exposure patterns and other environmental/occupation exposures is planned.

1978 EPA/SHWRD HAZARDOUS WASTE RESEARCH SYMPOSIUM

START/ COMPL DATE : 08/77 - 07/78 : FUNDING : EST. - FY 77 / $ 30606
TASK/EPA CODE :C618A-7040 / R805544-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R E LANDRETH
INVESTIGATORS : D W SHULTZ SOUTHWEST RESEARCH INSTITUTE
MILE: 07/77 -GRANT AWARDED
08/78 -PROJECT COMPLETED
10/78 -FINAL REPORT

THE OBJECTIVES ARE TO PROVIDE THE FORUM FOR A STATE-OF-THE-ART REVIEW AND DISCUSSION OF CURRENT RESEARCH IN THE MANAGEMENT OF HAZARDOUS WASTES AND MAKE THIS INFORMATION AVAILABLE TO THE PUBLIC, THE APPROACH WILL BE TO BRING RESEARCH AND OTHER INTERESTED PERSONNEL FROM VARIOUS PARTS OF THIS AND OTHER COUNTRIES TO AN ATMOSPHERE CONDUCIVE TO FREE AND U NRESTRAINED DISCUSSIONS AND TO INTERCHANGE, INTERRELATE, AND CIRCULATE NEW INFORMATION THAT IS BEING GENERATED IN THE FIELD OF HAZARDOUS WASTE RESIDUALS MANAGEMENT.

CONFERENCE - ALTERNATIVES IN ANIMAL WASTE UTILIZATION

START/ COMPL DATE : 07/77 - 07/78 : FUNDING : EST. - FY 77 / $ 2000
TASK/EPA CODE :L6170-22 / R805547-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R D KREIS
INVESTIGATORS : J P FONTENOT AMER. SOC. OF ANIMAL SCIENCE
C CRUSE AMER. SOC. OF ANIMAL SCIENCE
MILE: 07/77 -PROJECT FUNDED
07/77 -SYMPOSIUM HELD
06/78 -PROCEEDINGS PUBLISHED

THE MAIN OBJECTIVE OF THE CONFERENCE IS TO EXAMINE IN DEPTH THE FEASIBILITY OF THE VARIOUS ALTERNATIVES IN UTILIZATION OF ANIMAL WASTES. PREVIOUS SYMPOSIA AND CONFERENCES HAVE COVERED ONLY ONE OF THE POTENTIAL USES OF THE WASTE. THE DIFFERENT ALTERNATIVES WILL BE CRITICALLY EVALUATED BY TOP SPECIALISTS IN THE VARIOUS DISCIPLINES. PUBLICATION OF THE DOCUMENTED PAPERS WILL PROVIDE REFERENCE MATERIAL WHICH IS NOT PRESENTLY AVAILABLE. A 1-DAY CONFERENCE WILL BE HELD AT THE ANNUAL MEETING OF THE AMERICAN SOCIETY OF ANIMAL SCIENCE, MADISON, WISCONSIN, JULY 27, 1977. THE CONFERENCE WILL CONSIST OF FORMAL PRESENTATIONS BY SPEAKERS WITH TIME FOR DISCUSSION AFTER EACH MAJOR SECTION. EACH SPEAKER WILL SUBMIT A MANUSCRIPT IN PROPER FORM FOR PUBLICATION IN THE JOURNAL OF ANIMAL SCIENCE. THE PAPERS WILL BE REVIEWED BY THE EDITORIAL BOARD OF THE JOURNAL OF ANIMAL SCIENCE. FOLLOWING APPROPRIATE REVISIONS, THEY WILL BE PUBLISHED AS A GROUP IN ONE ISSUE OF THE JOURNAL. REPRINTS WILL BE AVAILABLE AND SEVERAL WILL BE SUPPLIED TO EPA.

DENITRIFICATION AS AFFECTED BY IRRIGATION FREQUENCY OF A FIELD SOIL

START/ COMPL DATE : 09/77 - 06/79 : FUNDING : EST. - FY 77 / $ 97995
TASK/EPA CODE :L617A-08 / R805550-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : A G HORNSBY
INVESTIGATORS : D E ROLSTON UNIV. OF CALIFORNIA
MILE: 07/79 -FINAL REPORT

THE OBJECTIVES OF THIS PROJECT ARE TO: (A) DIRECTLY MEASURE FLUXES OF N2 AND N2O GASES FROM A FIELD SOIL AS INFLUENCED BY IRRIGATION FREQUENCY AND FERTILIZER SOURCE, (B) COMPARE DENITRIFICATION OBTAINED FROM N2 AND N2O GAS FLUXES WITH DENITRIFICATION OBTAINED BY DIFFERENCE, (C) EVALUATE EXISTING NITROGEN SIMULATION MODELS TO DETERMINE IF SUCH MODELS CAN SIMULATE THE DYNAMIC DENITRIFICATION PROCESS THAT OCCURS DURING AND AFTER A NORMAL IRRIGATION CYCLE, AND (D) EVALUATE NITRATE LEACHING TO THE GROUND WATER AS INFLUENCED BY IRRIGATION FREQUENCY. DENITRIFICATION WILL BE DETERMINED DIRECTLY FROM FIELD-MEASURED FLUXES OF N2 AND N2O GASES EVOLVED FROM FERTILIZER LABELED WITH 15N. SOIL, GRASS, AND LEACHATE SAMPLES WILL BE ANALYZED TO DETERMINE THE AMOUNT OF N IMMOBI LIZATION IN SOIL, PLANT UPTAKE, AND LEACHING LOSS, IN ORDER TO CALCULATE D ENITRIFICATION BY DIFFERENCE. THE RESULTS OF THIS RESEARCH WILL BE USED TO DEVELOP FERTILIZER AND IRRIGATION MANAGEMENT PRACTICES FOR MAXIMAL FERTILIZER USE EFFICIENCY AND MINIMAL LEACHING OF NITRATE TO GROUND WA

EPIDEMIOLOGICAL STUDY OF CANCER AS RELATED TO INDUSTRIAL EMISSIONS IN HEAVILY INDUSTRIALIZED CONTRA COSTA COUNTY (ABBREV)

START/ COMPL DATE : 11/77 - 11/79 : FUNDING : EST. - FY 77 / $ 128000
TASK/EPA CODE :H601F-7750 / R805551-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : - KNELSON
INVESTIGATORS : O H WOOD — CONTRA COSTA CO. HEALTH DEPT.
J R GOLDSMITH — STATE DEPT. OF HEALTH
D F AUSTIN — STATE DEPT. OF HEALTH
M FELDSTEIN — BAY AREA AIR POLL. CONT. DIST
F HESSE — CONTRA COSTA CO. HEALTH DEPT.
M DEANE — STATE DEPT. OF HEALTH

MILE: 11/77 -AWARD GRANT
11/78 -PROGRESS REPORT
11/79 -FINAL REPORT

STATEMENT OF MAJOR OBJECTIVES: PHASE I: ESTABLISH THE SITES AND TYPES OF CANCER FOR WHICH THE RATES DIFFER BETWEEN PREDOMINANTLY INDUSTRIAL AND PREDOMINALTY RESIDENTIAL PARTS OF CONTRA COSTA COUNTY. PHASE II: ESTABLISH THE RELATIONSHIP, IF ANY, BETWEEN SITE AND TYPE OF CANCER AS RELATED TO OCCUPATION FROM MORTALITY AND MORBIDITY DATA FOR THE YEARS 1974 THRU 1976 IN THE HEAVILY INDUSTRIALIZED AND THE RESIDENTIAL PARTS OF THE COUNTY. PHASE III: PROVIDE SUPPORTIVE EVIDENCE OF THE RELATIONSHIP BETWEEN THE INCIDENCE OF SELECTED CANCER SITES VS. DESIGNED VARIABLES AND CONTROLS, THRU THE COMPREHENSIVE INTERVIEWING OF A CASE P OPULATION OF 1000 PATIENTS. PHASE IV: FINAL CONCLUSION AND WRITE-UP OF THE STUDY. MAJOR ACTIVITIES TOWARDS ACHIEVEMENT OF OBJECTIVES: PHASE I: COL LECTION OF 1969-74 DATA OF CANCER INCIDENCE FROM THE CALIF. TUMOR REGISTRY (CTR) FOR CONTRA COSTA CO.; COLLECTION OF DATA AND RESULTS OF INTER VIEWS OF THE 3RD NAT'L CANCER SURVEY FOR CONTRA COSTA CO.; ANALYSIS AND PR OCESSING OF DATA CORRELATING IT TO COUNTY CENSUS TRACT, AGE, SEX, RACE AND OTHER DEMOGRAPHIC CENSUS PARAMETERS AS RELATED TO CANCER SITE AND TYPE; WRITE-UP OF PHASE I REPORT. PHASE II: COLLECTION AND ANALYSIS OF HOSPITAL RECORDS AND DEATH CERTIFICATES FOR CANCER CASES FOR THE YEARS 1974-76; CORRELATING CANCER TYPE AND SITE WITH OCCUPATION AND OTHER VARIABLES. ANA LYZE AND PROCESS THE DATA AVAILABLE TO CORRELATE SITE AND TYPE OF CANCER A GAINST CENSUS TRACT, OCCUPATION, BIRTH PLACE AND OTHER VARIABLES; WRITE UP A FIELD REPORT CLARIFYING THE FINDINGS AND CONCLUSIONS OF THIS PHASE OF ACTIVITY. PHASE III: THE FIELD WORKERS WILL INTERVIEW 1000 CASES WITH SPECIFIC SELECTED SITES BASED ON FINDINGS OF PREVIOUS PHASE; THE COMPREH ENSIVE QUESTIONNAIRE WILL BE ADDRESSED TO CASES DIAGNOSED DURING THE YEARS 1975-76; THE DATA COLLECTED WILL BE PROCESSED AND RELATED TO THE VARIAB LES AVAILABLE IN THE QUESTIONNAIRE FORM; AIR POLLUTION EMISSION PATTERNS W ILL BE ANALYZED; A FINAL REPORT WILL BE SUBMITTED AT THE END OF THIS PHASE ACHIEVING THE OBJECTIVES STATED EARLIER. PHASE IV: THE PROJECT DIRECTOR, IN COORDINATION WITH THE PROJECT STAFF, THE TECHNICAL ADVISORY COMM. AND OTHER CONSULTING AGENCIES OR INDIVIDUALS, WILL PREPARE THE FINAL AND COMPREHENSIVE WRITE-UP OF THE STUDY; SUBMIT SAME TO ALL CONCERNED AGENCIES; PREPARE SUMMARIES OF THE STUDY FOR DISTRIBUTION AND PUBLICATION.

REDUCTION OF POLLUTANT FORMATION IN COAL PARTICLE AND LIQUID FUEL SPRAY FLAMES

START/ COMPL DATE : 10/77 - 10/80 : FUNDING : EST. - FY 77 / $ 200789
TASK/EPA CODE :F624A-003 / R805552-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : G B MARTIN
INVESTIGATORS : UNKNOWN MASS. INST. OF TECHNOLOGY
MILE: 10/77 -INITIATE GRANT
10/78 -IDENTIFY COAL AND OIL PYROLYSIS MECHANISMS
10/80 -COMPLETE DOCUMENTATION

THE OVERALL OBJECTIVE IS TO STUDY THE COMBUSTION OF SOLID AND LIQUID FUELS WITH PARTICULAR EMPHASIS ON NOX, PARTICULATE AND HETEROCYCLIC HYDROCARBON EMISSION. THE FACTORS IN PRACTICAL COMBUSTION SYSTEMS THAT INFLUENCE THE FORMATION AND EMISSION OF THESE POLLUTANTS ARE THE TIME-TEMPERATURE-CONCENTRATION HISTORY OF THE FUEL AND THE CHEMICAL COMPOSITION OF THE ENVIRONMENT. THE APPROACH IS TO SELECT CONDITIONS R EPRESENTATIVE OF THOSE IN INDUSTRIAL FLAMES AND FOLLOW THE TIME RESOLVED B EHAVIOR OF THE FUEL INCLUDING THE EVOLUTION OF NITROGEN BEARING COMPOUNDS, THEIR PYROLYSIS AND OXIDATION REACTIONS AND THE EMISSIONS OF CARBONA CEOUS SOLIDS AND OTHER POLLUTANTS. THE PROPOSED RESEARCH INVOLVES THE FOLL OWING PARALLEL AND SEQUENTIAL INVESTIGATIONS: A) EXPERIMENTS WITH PULVERIZ ED COAL PARTICLES AND MONOSIZE DROPLET STREAMS IN HIGH TEMPERATURE LAMINAR FLOW FURNACES TO DETERMINE THE TIME RESOLVED EVOLUTION AND C HEMICAL TRANSFORMATION OF FUEL-N COMPOUNDS. B) MONOSIZE DROPLET STREAM PYR OLYSIS AND COMBUSTION STUDIES IN WHICH OPTICAL DIAGNOSTICS WILL BE USED TO DETERMINE THE TEMPERATURE DISTRIBUTION AROUND THE REACTING DROPLETS IN A QUARTZ TUBE REACTOR. C) SPRAY PYROLYSIS STUDIES SIMULATING CONDITIONS IN THE FIRST STAGE OF STAGED COMBUSTION SYSTEMS IN WHICH THE FUEL-N EV OLUTION, THE REACTIONS OF NITROGENOUS COMPOUNDS AND THOSE LEADING TO THE F ORMATION OF CARBONACEOUS SOLIDS WILL BE STUDIED IN FUEL RICH ENVIRONMENTS. IT IS EXPECTED THAT RESULTS OF THESE BASIC STUDIES WILL ASSIST IN THE INTERPRETATION OF RESULTS OBTAINED IN PARAMETRIC INVESTIGATIONS AND THUS L EAD TO THE DEVELOPMENT OF CONTROL METHODS CAPABLE OF REDUCING NOX EMISSION FROM COAL AND HEAVY FUEL OIL FLAMES WITHOUT AN INCREASE IN THE EMISSION OF SOOT AND CARBONACEOUS PARTICULATES.

GRADUATE RESEARCH IN AIR QUALITY METEOROLOGY

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 13500
TASK/EPA CODE :G603A-AB-39 / R805554-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : L E NIEMEYER
INVESTIGATORS : W J SAUCIER UNIV. OF NORTH CAROLINA
G F WATSON UNIV. OF NORTH CAROLINA
T L TSUI UNIV. OF NORTH CAROLINA

MILE: 08/78 -ANNUAL PROGRESS REPORT

THE PRINCIPAL OBJECTIVE, BEING BASED ON THE QUALIFICATIONS AND INTERESTS OF THE RESEARCH GROUP AND THE DATA ALREADY AVAILABLE, IS TO INVESTIGATE CERTAIN METEOROLOGICAL TRANSPORT CHARACTERISTICS, OF SCALE LARGER THAN HAS BEEN CUSTOMARY IN MICROMETEOROLOGICAL (LOCALIZED) APPROACHES, IN ORDER TO UNDERSTAND THE BROADER METEOROLOGICAL SCOPE OF AIR QUALITY REQUIRED FOR REFINING TRANSPORT - DISPERSION - DEPOSITION MODELS FOR AIR POLLUTANTS. A SECONDARY OBJECTIVE, WHICH IS CONSISTENT WITH THE UNIVERSITY PURPOSE AND THE PROXIMITY TO EPA LABORATORIES, IS TO ENCOURAGE AND GUIDE MORE AVAILABLE YOUNG SCIENTISTS INTO PURSUING THE PRINCIPAL OBJECTIVE UNDER THE TERM OF THE PROJECT AS WELL AS THEREAFTER. THE APPROACH AND THE WORK ARE STRUCTURED IN WHAT IS BELIEVED A LOGICAL HEIRARCHY OF TASKS WITH INSIGHT OR SOLUTION OF ONE PROBLEM AREA SERVING APPROACH TO THE NEXT. THESE ARE: (1) METEOROLOGICAL ANALYSIS OF REGIONAL AIR POLLUTION STUDY DATA, INVESTIGATING CONTROLS BY THE BROADER SYNOPTIC CONDITIONS, ES PECIALLY BY AIR TRAJECTORIES OVER A DAY AND MORE AND BY VERTICAL GRADIENTS IN THE HORIZONTAL FLUXES. (2) OXIDANT TRANSPORT IN THE LOWER TROPOSPHERE, AS AFFECTED BY DIURNAL VARIATIONS IN THE DEPTH OF THE MIXED LAYER. (3) MESOSCALE TRAJECTORIES, PARTICULARLY IN THE MIXING LAYER, EXAMINED AS DEPARTURES FROM SYNOPTIC-SCALE FLOW DUE TO MESOCALE TEMPERATURE FIELDS PRODUCED BY URBAN AREAS, BY NATURAL SURFACE DIFFERENCES, AND BY PATCHES OF CLOUD COVER OR CLEAR. (4) ATMOSPHERIC DEPOSITION CHEMISTRY (PARTICULATES AND RAINFALL) AS ASSOCIATED WITH THE ABOVE METEOROLOGICAL CHARACTERISTICS AND PROCESSES.

Homeowner attitudes and behavior towards insects and pesticides will be explored by means of a questionnaire in three U.S. metropolitan areas: the San Francisco Bay region (Calif.), Dallas/Ft. Worth area (Texas), and the New Brunswick/Plainfield area (N.J.). Two socioeconomic neighborhoods, lower middle class and upper middle class, will be selected from each metropolitan area. Approximately 100 persons will be interviewed door-to-door, using standard interview technique, from each socioeconomic group of each state (total sample size = 600). The questionnaire survey will be based, in part, on a questionnaire form used in a recent study on upper middle class homeowners in two Texas cities.

The proposed CA-TX-NJ survey will provide a beginning impression of U.S. homeowner attitudes and practices towards insects and and pesticides. In particular, it will produce a great quantity of specific information that earlier studies have failed to provide. It is expected that the study will also shed insight on questions raised by the recent EPA report of von Rumker (1972) regarding the use of pesticides and their impact on U.S. aquatic environments.

EFFECT OF CHLORINE DIOXIDE AND CHLORINE DIOXIDE PLUS NITRITES ON MICE WITH LOW G-6-PD ACTIVITY

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST. - FY 77 / $ 52479
TASK/EPA CODE : D6148-058 / R805557-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : P HEFFERNAN
INVESTIGATORS : G S MOORE UNIV. OF MASSACHUSETTS
E J CALABRESE UNIV. OF MASSACHUSETTS
MILE: 00/77 -BEGIN ANIMAL EXPOSURE
00/78 -PROJECT COMPLETE

THE OBJECTIVE OF THE PROPOSED RESEARCH IS TO DETERMINE (VIA IN VIVO STUDIES) THE EFFECTS OF CHLORINE DIOXIDE AND CHLORINE DIOXIDE PLUS NITRITE ON THE BLOOD OF MICE WITH LOW LEVELS OF GLUCOSE-6-PHOSPHATE DEHYDROGENASE ACTIVITY AS COMPARED TO MICE WITH NORMAL G-6-PD ACTIVITY. THE PARAMETERS TO BE MEASURED INCLUDE HEMATOCRIT, RETICULOCYTE COUNTS, G-6-PD ACTIVITY, MECHANICAL AND OSMOTIC FRAGILITY, AND A C.B.C. (COMPLETE BLOOD COUNT). RECENT PUBLISHED RESEARCH (J. TOXIC. & ENVIRON. HLTH, 1977) BY ONE OF THE INVESTIGATORS (EDWARD J. CALABRESE) HAS INDICATED THAT INDIVIDUALS WITH G-6-PD DEFICIENCY REPRESENT A POTENTIAL HIGH RISK GROUP TO THE TOXIC EFFECTS OF OXIDANT EXPOSURE. THIS STUDY REPRESENTS AN ATTEMPT TO DEVELOP AN ANIMAL PREDICTIVE MODEL FOR A HUMAN HIGH RISK GROUP REPRESENTING 13% OF THE BLACK MALE POPULATION.

THE USE OF MODELS IN ENVIRONMENTAL DECISION MAKING CONCERNING AIR QUALITY

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 107446
TASK/EPA CODE :G603A-AB-38 / R805558-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : K DEMERJIAN
INVESTIGATORS : L E LYNN HARVARD UNIVERSITY
V I NELSON HARVARD UNIVERSITY
MILE: 09/78 -FINAL REPORT

THE STUDY WILL EVALUATE THE ROLE AIR QUALITY MODELS PLAY IN THE REGULATORY DECISION MAKING PROCESS. THE AIM WILL BE TO ASSESS THE NEEDS OF THE ACTUAL AND POTENTIAL MODEL USERS, THE CURRENT STATE OF AIR QUALITY MODELLING AT EPA, AND HOW THE MODELLING PROCESS MIGHT BE CHANGED TO BETTER MEET PRESENT AND FUTURE NEEDS. THE CASE STUDY METHOD WILL BE USED TO IDENTIFY FACTORS THAT MAY HAVE POSED OBSTACLES TO THE INTERACTION BETWEEN MODELLERS AND REGULATORS AND TO HIGHLIGHT CERTAIN PROFITABLE CHANGES THAT MIGHT MAKE IT MORE LIKELY THAT AIR QUALITY MODELLING WOULD MAKE A SIGNIFICANT CONTRIBUTION TO THE ACHIEVEMENT OF NATIONAL AIR QUALITY OBJECTIVE

BEST MANAGEMENT PRACTICES FOR UNCONFINED ANIMAL PRODUCTION

START/ COMPL DATE : 10/77 - 03/79 : FUNDING : EST. - FY 77 / $ 55930
TASK/EPA CODE :L617D-23 / R805559-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : S C YIN
INVESTIGATORS : J W ROBBINS LOUISIANA TECHNOLOGICAL UNIV.
J V ALBRITTON LOUISIANA TECHNOLOGICAL UNIV.

MILE: 09/77 -PROJECT INITIATED
12/77 -SELECTION OF CONSULTANTS
11/78 -CONSULTANT WORKSHOPS TO DETAIL MANUAL CONTENTS
12/78 -FIRST DRAFT OF MANUAL
03/79 -FINAL MANUAL PUBLISHED

THE OBJECTIVE OF THIS PROJECT IS TO PREPARE A MANUAL THAT IDENTIFIES, DEFINES AND STRUCTURES THE FORM AND SEQUENCE OF THE WATER QUALITY MANAGEMENT PROCESS FOR UNCONFINED ANIMAL PRODUCTION SYSTEMS. THE MANUAL WILL PROVIDE INFORMATION TO ASSIST IN CARRYING OUT WATER QUALITY PLANNING AND IMPLEMENTATION RESPONSIBILITIES. IT WILL PRESENT METHODOLOGIES FOR THE DEVELOPMENT OF BEST MANAGEMENT PRACTICES FOR THE VARIOUS TYPES OF SYSTEMS ENCOUNTERED WITH LIVESTOCK ON PASTURE AND RANGE. THE METHODOLOGIES WILL CENTER AROUND INQUIRES INTO THE TECHNICAL ASPECTS OF IDENTIFYING AND ASSESSING UNCONFINED ANIMAL NONPOINT SOURCE PROBLEMS, ANALYZING THE PROBLEMS AND DEVELOPING PROCEDURES NEEDED FOR DESIGNING LOCALIZED BEST MANAGEMENT PRACTICES. ALSO, DESCRIPTIONS AND EXAMPLES OF BEST MANAGEMENT PRACTICES WILL BE PRESENTED FOR DEFINED CONDITIONS/SYSTEMS. THE MANUAL WILL BE DEVELOPED FROM EXISTING LITERATURE, COLLABORATION WITH RANGE MANAGEMENT SPECIALISTS, ANALYSIS OF EXISTING SITES, AND CONTACT WITH ONGOING RESEARCH PROJECTS RELATING TO THE SUBJECT. IT WILL NOT INVOLVE ANY NEW FIELD STUDIES.

NUTRIENTS AND ACIDITY IN WET AND DRY PRECIPITATION

START/ COMPL DATE : 09/77 - 08/79 : FUNDING : EST. - FY 77 / $ 45000
TASK/EPA CODE :M602A-035 / R805560-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : T MALONEY
INVESTIGATORS : P L BREZONIK STATE UNIVERSITY OF FLA. SYS.
D A LUNDGREN STATE UNIVERSITY OF FLA. SYS.
W L CHAMEIDES STATE UNIVERSITY OF FLA. SYS.
MILE: 08/79 -FINAL REPORT

THIS PROJECT ADDRESSES FOUR ASPECTS OF THE ROLE OF THE ATMOSPHERE AS A SO URCE OF NUTRIENTS, ACIDITY, OTHER SUBSTANCES TO WATER AND LAND ECOSYSTEMS: 1) QUANTIFICATION OF LOADINGS OF N, P, ACIDITY AND OTHER SUBSTANCES IN WET AND DRY FALLOUT IN PENINSULAR NORTH FLORIDA; 2) EVALUATION OF THE MECHANISMS OF INPUT-COMPARISON OF DRY AND WET FALLOUT AND MEASUREMENT OF GASEOUS (NH3 AND NO2) ABSORPTION; 3) DOCUMENTATION OF THE ECOLOGICAL EFFECTS OF ACID RAIN ON THE STRUCTURE AND FUNCTIONING AQUATIC ECOSYSTEMS AND OF THE EFFECTS OF ATMOSPHERIC NUTRIENTS ON LAKE P RODUCTIVITY; AND 4) EVALUATION, QUANTIFICATION AND MODELING OF THE FACTORS AFFECTING ATMOSPHERIC FLUXES OF NUTRIENTS AND ACIDITY. A SMALL NETWORK OF SAMPLING STATIONS IS BEING ESTABLISHED FOR OBJECTIVES (1) AND (2). DETAILED STUDIES OF RAINFALL COMPOSITION IN COMPARISON WITH AMBIENT AIR QUALITY (PARTICULARLY FOR ATMOSPHERIC NITROGEN FORMS) WILL PROVIDE THE BASIS FOR MODELS OF NITROGEN TRANSFORMATION AND TRANSPORT THROUG H THE ATMOSPHERE AND DEPOSITION VIA RAINOUT, FALLOUT AND GASEOUS ABSORPTIO N. LAKES IN NORTH CENTRAL FLORIDA WILL BE SAMPLED AND STUDIED TO DETERMINE THE EXTENT OF ACIDIFICATION CAUSED BY ACID RAINFALL (MEAN PH OF RAI NFALL IN GAINESVILLE, FLORIDA FROM JUNE, 1976, TO JUNE, 1977, IS 4.45). ST UDIES WILL BE DONE TO DETERMINE EFFECTS OF ACIDIFICATION ON THE LAKE BIOTA AND ON PRODUCTIVITY, ORGANIC DECOMPOSITION AND MINERAL CYCLING.

WORKSHOP ON WASTE-TO-ENERGY TECHNOLOGY

START/ COMPL DATE : 08/77 - 03/78 : FUNDING : EST. - FY 77 / $ 25000
TASK/EPA CODE :B6248-625 / R805561-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : H FREEMAN
INVESTIGATORS : G R SMITHSON BATTELLE MEMORIAL INSTITUTE
S T DINOVO BATTELLE MEMORIAL INSTITUTE

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT
11/77 -CONFERENCE
03/78 -SUMMARY REPORT
00/00 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THE PROPOSED PROJECT IS TO DEVELOP AND CONDUCT A WORKSHOP WHICH WILL PROVIDE A FORUM FOR REVIEWING THE STATE OF THE ART OF WASTE-TO-ENERGY TECHNOLOGY, FOR ASSESSING PROBLEM AREAS, AND FOR SUGGESTING APPROACHES FOR THE CONTINUED DEVELOPMENT OF THIS TECHNOLOGY. PARTICIPANTS IN THE WORKSHOP WILL INCLUDE REPRESENTATIVES FROM BOTH THE TECHNOLOGICAL AND USER COMMUNITIES. SPECIES DETAILS REGARDING THE FORMAT, SCHEDULING, AND LOCATION OF THE WORKSHOP AS WELL AS THE PREPARATION OF A LIST OF POTENTIAL PARTICIPANTS WILL BE DEVELOPED BY A WORKSHOP COMMITTEE COMPOSED OF REPRESENTATIVES OF U.S. EPA, BATTELLE, AND OTHERS. THIS COMMI TTEE WILL BE SELECTED AND BEGIN ITS WORK IMMEDIATELY UPON THE EXECUTION OF THIS GRANT. A BRIEF REPORT IN WHICH THE FINDINGS AND RECOMMENDATI ONS OF THE WORKSHOP PARTICIPANTS WILL BE PREPARED AT THE CONCLUSION OF THE PROJECT.

A NEW SAMPLING THEORY FOR THE MEASUREMENT OF ECOSYSTEM STRUCTURE AND FUNCTION

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 28500
TASK/EPA CODE :K609A-312 / R805564-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J HILL
INVESTIGATORS : R J MULHOLLAND OKLA. ST. UNIV.
MILE: 09/78 -REPORT ON MODEL FOR ASSESSMENT OF ECOSYSTEM EFFECTS BY THE PROPOSED RESEARCH WILL FORMALIZE A SAMPLING ALGORITHM, WITH DOCUMEN TATION, FOR APPLICATIONS TO ENVIRONMENTAL SAMPLING AND DESIGN OF MICROCOSM EXPERIMENTS.

805569

1. Objectives: The Ohio River Basin Energy Study (ORBES) was initiated to assess changes that may occur in the various sectors of society, industry, and environment as a result of future increases in number of energy conversion facilities. During the second year of this study each participating research group will address itself to one of the areas thought to be affected. The group from the University of Louisville will address aspects of water quality, water quantity, and special aquatic habitats.

2. Approach: The assessments will be made by compilation and analysis of existing data possibly supported by Special Studies of specific areas where existing data is weak or lacking.

3. Current Plans and/or Progress: Participants from seven midwestern universities divided into three assessment teams have submitted independent preliminary first cut assessments of the changes which may occur as a result of these developments. These assessments will be condensed into one major document which is to be submitted to Congress in July 1977.

SAMPLING, CHARACTERIZATION PLUS ANALYSIS MANUAL FOR DREDGED AND FILL MATERIALS

START/ COMPL DATE : 08/77 - 07/79 : FUNDING : EST. - FY 77 / $ 100000
TASK/EPA CODE :N608A-031 / R805572-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : M D MULLIN
INVESTIGATORS : R A SWEENEY STATE UNIVERSITY OF NEW YORK
MILE: 10/79 -MANUAL READY FOR RELEASE

OBJECTIVES: PROVIDE REGULATORY AGENCIES WITH A STATE-OF-THE-ART MANUAL FOR SAMPLING, CHARACTERIZATION, AND METHODS OF ANALYSIS TO INCLUDE QUALITY ASSURANCE PROGRAMS AND REPRESENT AREAS RELATING TO CONTAMINANTS FOUND IN DREDGED AND FILL MATERIAL AND WATER QUALITY ASSESSMENTS FOR AQUATIC DISPOSAL AND CONTAMINANT AREA EFFLUENT OR RUNOFF. FURTHER GOALS ARE TO PROVIDE INTERPRETIVE GUIDANCE CONCERNING IMPLEMENTATION OF RESULTS OF SAMPLING, CHARACTERIZATION, AND ANALYTICAL METHODS AND TO IDENTIFY AREAS WHERE PRESENT INFORMATION OR PROCEDURES ARE INCOMPLETE OR INADEQUATE AND RECOMMEND NECESSARY RESEARCH TO ELIMINATE THESE LIMITATIONS.

APPROACH: MATERIAL WILL BE COMPILED VIA LITERATURE SEARCHES AND CONSULTATION WITH THOSE INVOLVED WITH THE ABOVE ACTIVITIES.

805577

The objective of this project is to develop a technique for the in-situ calibration of particulate mass monitors for stationary sources. A portable generator is to be developed which is capable of producing suspended particulate matter with controlled concentration and particle size distribution. Several particle generation techniques will be critically evaluated and one selected for further study. The operating characteristics of a prototype particle generator will be measured. The feasibility and limitations of this approach to monitor calibration will be assessed.

HEALTH IMPACTS OF ACID MINE DRAINAGE ON DRINKING WATER SUPPLIES IN WESTERN COALS

START/ COMPL DATE : 06/77 - 00/00 : FUNDING : EST. - FY 77 / $ 157800
TASK/EPA CODE :D625F-114 / R805579-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D G GREATHOUSE
INVESTIGATORS : B G WIXSON UNIV. OF MISSOURI
B T KAGEY UNIV. OF MISSOURI
N L GALE UNIV. OF MISSOURI
MILE: 09/78 -EVALUATION OF LITERATURE AND SAMPLING PLAN FORMULATED
10/79 -PROJECT COMPLETED

THE OBJECTIVES OF THIS PROJECT ARE: 1. IDENTIFY COAL MINING AREAS IN WESTERN STATES WHERE ACID MINE DRAINAGE MAY GET INTO DRINKING WATER SUPPLIES. 2. CARRY OUT A LITERATURE REVIEW TO IDENTIFY POSSIBLE COMPOUNDS AND LEVELS OF ORGANICS OR INORGANICS THAT MIGHT CAUSE DISEASE. 3. IDENTIFY HEALTH EFFECTS ASSOCIATED WITH THESE COMPOUNDS AND THEIR POSSIBLE INGESTION . 4. DETERMINE, WHERE POSSIBLE, THOSE COMPOUNDS THAT ARE REMOVED BY DRINKING WATER TREATMENT. 5. EVALUATE THE MORTALITY DATA IN RESPECT TO SPECIFIC DISEASE RELATIONSHIP IN THE WESTERN COAL STATES. 6. PROPOSE A REPRESENTATIVE AREA AND SPECIFY THE ANALYTICAL PROCEDURES, WATER CHARACTERISTICS AND TYPE OF EPIDEMIOLOGICAL STUDIES THAT WILL BE NECESSARY TO ESTABLISH VALID BASELINES, DEFINE PROBLEMS AND SEEK POSSIBLE CONTROL MEASURES. THE INFORMATION COLLECTED AND EVALUATED BY THIS PROJECT SHOULD PLAY A MAJOR ROLE IN DETERMINING THE APPROPRIATE AREA FOR CONCENTRATED STUDIES ON THE PROBLEMS OF ACID MINE DRAINAGE-WATER SUPPLIES AND HEALTH. THIS INFORMATION WILL BE CRITICAL TO THE FUTURE DEVELOPMENT OF WESTERN COALS AND ALLOW FOR THE MAXIMUM UTILIZATION OF FUNDS AND RESEARCH TO ANSWER POSSIBLE QUESTIONS OF HEALTH EFFECTS ASSOCIATED WITH ACID MINE DRAINAGE AND DRINKING WATER SUPPLIES.

SEASONAL CYCLES IN BODY COMPOSITION, ORGAN SYSTEM FUNCTION, AND ENERGETICS OF GRASSLAND BIRDS NEAR COLSTRIP, MONTANA

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 47217
TASK/EPA CODE :M625A-036 / R805581-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E M PRESTON
INVESTIGATORS : M L MORTON OCCIDENTAL COLLEGE
MILE: 09/78 -FINAL REPORT

IN 1974 THE ENVIRONMENTAL PROTECTION AGENCY (EPA) BEGAN A LONG-TERM STUDY OF AIR POLLUTION EFFECTS ON THE GRASSLAND ECOSYSTEM NEAR COAL-FIRED POWER PLANTS AT COLSTRIP, ARIZONA. THIS STUDY IS BROAD IN SCOPE BUT ONE PARTICULAR ASPECT, OF CONCERN HERE, HAS BEEN ON THE POTENTIAL OF BIRDS AS BIOINDICATORS OF POLLUTION. IN THE THREE YEAR PERIOD, 1974-76, MANY AVIAN SPECIMENS WERE COLLECTED IN THE COLSTRIP AREA BY EPA PERSONNEL AND GREAT QUANTITIES OF DATA WERE GATHERED ON SEASONAL CYCLES IN BODY COMPOSITION, ORGAN SYSTEM FUNCTION, AND BIOENERGETICS. SINCE THE POWER PLANTS DID NOT BECOME FUNCTIONAL UNTIL 1975 AND 1976, THESE DATA HAVE THE POTENTIAL OF PROVIDING A SOLID BASE OF INFORMATION THAT CAN BE USED TO QUANTIFY POLLUTION EFFECTS WHICH MAY ACCRUE IN THE FUTURE. AT THIS TIME, HOWEVER, MANY OF THE COLLECTED BIRD SPECIMENS HAVE NOT UNDERGONE LABORATORY PROCESSING NOR HAS EXISTING DATA BEEN PULLED TOGETHER IN USEFUL FORM. IT IS THE PURPOSE OF THE STUDY PROPOSED HEREIN TO COMPLETE THE NECESSARY LABORATORY PROCEDURES ON STORED SPECIMENS, MAKE ADDITIONAL COLLECTIONS, IF NECESSARY, TO FILL INFORMATIONAL GAPS, COMPILE AND EVALUATE ALL PERTINENT DATA, AND CONSTRUCT A FINAL REPORT OF SUFFICIENT SCOPE AND DETAIL THAT WILL CONSTITUTE AN EFFECTIVE DOCUMENTATION OF BIOLOGICAL RELATION IN GRASSLAND BIRDS OF THE COLSTRIP AREA.

FERTILIZER EVALUATION OF DEWATERED, SOLVENT-DRIED SLUDGE

START/ COMPL DATE : 10/77 - 01/79 : FUNDING : EST. - FY 77 / $ 92930
TASK/EPA CODE :C611B-7218 / R805584-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H WALL
INVESTIGATORS : R S DOMENOWSKE MUNICIPALITY OF METRO, SEATTL
R L OLSON RESOURCES CONSERVATION COMPAN
D F BEZDICEK WASHINGTON STATE UNIVERSITY

MILE: 08/77 -FUNDING PACKAGE COMPLETED
10/77 -GRANT AWARDED
12/77 -PROJECT STARTED
04/79 -PROJECT COMPLETED
10/79 -FINAL REPORT PUBLISHED

THE OBJECTIVE OF THIS PROJECT IS TO DETERMINE THE SUITABILITY OF SOLVENT-DRIED MUNICIPAL SLUDGE FOR FERTILIZER. A BATCH OF MUNICIPAL SLUDGE WILL BE PARTLY DRIED BY SOLVENT DRYING AND PARTLY BY HEAT DRYING AND THE TWO PARTS COMPARED AS FERTILIZER USING LABORATORY TESTS AND GREENHOUSE GROWTH TESTS ON VEGETABLE AND FIELD CROPS. THE WORK WILL BE DONE AT SEATTLE, WASHINGTON WHERE THE SLUDGE WILL BE OBTAINED AND DRIED AND THE LABORATORY AND GREENHOUSE TESTS WILL BE CONDUCTED AT WASHINGTON STATE UNIVERSITY, PULLMAN, WASHINGTON.

805585

(1) To collect basic information about the institutional, socio-economic physical, biological, industrial, mining and agricultural make-up of West Virginia and the Ohio River Basin to enable an interdisciplinary technology assessment team to predict the impact of future (1985 and 2000 A.D.) energy demands and production on the economy, social patterns and the environment of the Ohio River Basin, including West Virginia.

(2) Interdisciplinary assessment by 9 public universities in the six state area of Pennsylvania, West Virginia, Ohio, Kentucky, Indiana, and Illinois.

(3) The first of three years, involving data collection, and growth prediction has been completed for all but West Virginia and Pennsylvania, both of which are joining the project in the second year.

The project is called ORBES, Ohio River Basin Energy Study.

805587

1. The Ohio River Basin Energy Study (ORBES), Phase II: An Impact Assessment of Energy Conversion Facilities in the Ohio River Basin, is a continuation of a comprehensive, policy-oriented technology assessment addressing the broad-scale environmental, public health, economic, institutional, and social effects of locating various combinations of energy conversion and support facilities in the Ohio River Basin.

2. The approach is that of integrated technology assessment, conducted by an interdisciplinary, interinstitutional (eight state universities in the six study region states of Illinois, Indiana, Kentucky, Ohio, Pennsylvania, and West Virginia) team, with support research performed by other personnel on a schedule to best fit the research needs of the technology assessment team.

3. Phase I of the study, conducted in 1976-77, was a preliminary, "first-cut" impact assessment. Most impacts identified were first-order. In Phase II, data and assessments made in the first year will be drawn upon, and inadequacies identified will be corrected.

805588

1. Objectives. The Experimental Management Plan for the Ohio River Basin Energy Study (ORBES), Phase II: An Impact Assessment of the Effect of Energy Conversion Facilities in the Ohio River Basin is a continuation of the management of a comprehensive, policy-oriented technology assessment addressing the broad-scale environmental, public health, economic, institutional, and social effects of locating various combinations of energy conversion and support facilities in the Ohio River Basin.

2. Approach. The integrated technology assessment is being conducted by an interdisciplinary, interinstitutional (eight state universities in the six study-region states of Illinois, Indiana, Kentucky, Ohio, Pennsylvania, and West Virginia) team, with support research performed by other personnel on a schedule to best fit the research needs of the technology assessment team. The management of this research will involve a complex arrangement to best coordinate efforts and further the achievement of research goals. A four-person Project Office will perform day-to-day coordination, while a seven-person Management Team consisting of the Experimental Management Plan co-principal investigators and five U.S. Environmental Protection Agency representatives will provide long-term and policy guidance.

3. Current Plans and/or Progress. In Phase I of the study, the Project Office and Management Team coordinated a similar study, although that phase involved three preliminary assessment teams drawn from seven university campuses (whose reports were then integrated by the Project Office). The experience gained during Phase I will be utilized in Phase II. In Phase II, data and assessments made in the first year will be drawn upon and inadequacies identified will be corrected.

This project is the second phase of a technology assessment of energy development in the Ohio River Basin. A core team composed of members from nine different university campuses in six states will direct and delineate research activities in this phase of the program. First, reports from Phase I of the project will be reviewed and key issues for further research identified. The baseline data for the study will be refined and a new set of energy facility siting criteria developed. The core team will then review basic technological, sociological, and demographic assumptions and create a set of energy development scenarios relative to coal mining, transportation, and conversion facilities, and to other types of energy facilities in the study region.

Given these scenarios the impacts of the energy facilities on the physical environment, socio-economic conditions, ecological factors, public health, institutions, land use, and the quality of life will be assessed. The Phase II impact analysis will emphasize the tracing of second and higher-order impacts and the interrelationships among them. Based upon the impact assessment, a range of possible options under each scenario will be determined.

805590

The objective of the ORBES project is to conduct an Integrated Technology Assessment of energy conversion facilities in the Ohio River Basin Region. The past year has seen over one hundred researchers at eight campuses in the Region collecting and analyzing baseline data in relevant areas in order to conduct a first-cut or "mini"-assessment. The second year of the project (Phase II) is to be devoted to identifying, requesting, and supervising research in areas deemed inadequately covered in the first year. The project has been reconstructed so that there is a Core Team of thirteen researchers from ten institutions (the ORBES region has been expanded to include West Virginia and Western Pennsylvania in addition to last year's Ohio, Indiana, Illinois and Kentucky areas) who will perform the Integrated Technology Assessment. The Core Team represents a variety of relevant disciplines capable of taking on the assessment task.

The University of Kentucky's two Core Team members represent the disciplines of sociology and economic geography. In addition, the anthropologist is helping conduct the social impact assessment of increased power production in the ORBES area. Contributions to be expected include a study of the impact of service areas on electric power generation and transmission and further refinement of the social impact assessment analysis. The latter study includes an operationalization of an environmental orientation paradigm, preparation of demographic profiles of counties likely to be impacted by energy conversion facilities, classification of counties by environmental orientation and an impact assessment. This work will be used cooperatively and integratively by the Core Team to perform the Technology Assessment

PILOT STUDY OF ACUTE BRONCHITIS AND ITS RELATION TO AIR POLLUTION

START/ COMPL DATE : 11/77 - 06/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :H601C-7252 / R805593 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D C CALAFIORE
INVESTIGATORS : M DEANE STATE EPIDEMIOL. STUDIES LAB.
J R GOLDSMITH STATE EPIDEMIOL. STUDIES LAB.

MILE: 11/77 -AWARD GRANT
06/78 -FINAL REPORT

OBJECTIVES: THE OBJECTIVES OF THIS PROJECT ARE TO DEVELOP AND COMPARE TWO OR MORE STRATEGIES TO EXAMINE THE POSSIBLE RELATIONSHIP BETWEEN CO MMUNITY AIR POLLUTION AND ACUTE BRONCHITIS. THE PROJECT INCLUDES A PILOT F IELD STUDY IN WHICH THE STRATEGIES WOULD BE COMPARED WITH RESPECT TO WILLI NGNESS OF SUBJECTS TO PARTICIPATE AND EFFECTIVENESS IN MEASURING INCIDENCE OR PREVALENCE OF ACUTE BRONCHITIS. ANALYSIS OF DATA WOULD INCLUDE TESTING, ON A DEMONSTRATION BASIS, THE NULL HYPOTHESIS BASED UPON WHETHER EXPOSURE TO AIR POLLUTION IN THE SOUTH COAST AIR BASIN AFFECTS THE INCIDENCE OR PREVALENCE OF CHRONIC BRONCHITIS. APPROACH: A) AN INTERVIEW S URVEY ASKING ABOUT EPISODES DURING A DEFINED PERIOD, SUCH AS THE PRECEDING SIX OR TWELVE MONTHS, THIS WOULD BE TIMED SO AS TO FOLLOW CLOSELY THE SEASON OF HEAVIEST POLLUTION AND MIGHT BE REPEATED ONE OR MORE TIMES; AND B) ENROLLMENT OF A PANEL OF SUBJECTS WHO WOULD BE ASKED TO RECORD SYMPTOMS ON A DAILY BASIS OR WHO MIGHT BE CONTACTED PERIODICALLY BY TELEPH ONE, MAIL, OR IN PERSON TO ELICIT SYMPTOMS. CURRENT PLANS AND/OR PROGRESS: GEOGRAPHIC AREAS AND POPULATION SAMPLES WILL BE SELECTED. A QUESTIONNAIRE AND DIARY WILL BE DESIGNED AND PRE-TESTED. A PILOT STUDY WILL BE CONDUCTED.

MODELING OF ATMOSPHERIC FLOWS AND POLLUTANT DISPERSAL OVER AND AROUND HILLS AND BUILDINGS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 63000
TASK/EPA CODE :G603A-AB-34 / R805595-01 (GRANT) PRIOR FY76 / $ 500001
PROJECT OFFICER : W SNYDER
INVESTIGATORS : S P ARYA UNIV. OF NORTH CAROLINA
J C HUNT UNIV. OF NORTH CAROLINA
V R LAMB UNIV. OF NORTH CAROLINA

MILE: 09/81 -FINAL REPORT

IT IS PROPOSED TO INVESTIGATE THE ATMOSPHERIC FLOWS OVER AND AROUND HILLS AND BUILDINGS AND THE DISPERSION AND DIFFUSION OF POLLUTANTS IN SUCH FLOWS USING BOTH THE PHYSICAL AND NUMERICAL MODELING APPROACHES. FOR PHYSICAL MODELING, WE SHALL USE THE METEOROLOGICAL WIND TUNNEL, SALT WATER STRATIFIED TOWING TANK OR FLUME AND OTHER SUPPORT FACILITIES OF THE EPA FLUID MODELING FACILITY IN RESEARCH TRIANGLE PARK. THE MODEL HILLS OR BUILDINGS WILL BE PLACED IN THE SIMULATED ATMOSPHERIC BOUNDARY LAYER (IN THE WIND TUNNEL) AND OBSERVATIONS OF MEAN FLOW, TURBULENCE AND DIFFUSION WILL BE MADE WITH THE SPECIFIC OBJECTIVE OF DETERMINING THE TOPOGRAPHICAL EFFECTS ON FLOW AND DIFFUSION. SIMILAR TOPOGRAPHICAL MODELS WILL ALSO BE TOWED IN THE SALT-WATER STRATIFIED TANK AND MEASUREMENTS OF VELOCITY, DENSITY AND CONCENTRATION AS WELL AS FLOW VISUALIZATIONS WILL BE MADE OVER A WIDE RANGE OF FROUDE NUMBERS. THE PROPOSED EXPERIMENTS ARE IN THE NATURE OF CONTINUING OUR BASIC STUDIES OF FLOW AND DIFFUSION OVER SMALL-SCALE TOPOGRAPHY, WHICH ARE BEING CONDUCTED UNDER A GRANT FROM THE ENVIRONMENTAL PROTECTION AGENCY. THE LABORATORY DATA WILL BE USED TO TEST THE EXISTING THEORIES OF FLOW AND DIFFUSION OVER AND AROUND HILLS AND ALSO TO FORMULATE BETTER THEORIES. SINCE ROTATIONAL EFFECTS CANNOT BE SIMULATED IN THESE EXPERIMENTS, WE PROPOSE TO STUDY THEM WITH THE HELP OF NUMERICAL MODELING EXPERIMENTS. IN PARTICULAR, THE STEADY FLOW OF A ROTATING STRATIFIED FLUID OVER AND AROUND A THREE-DIMENSIONAL HILL WILL BE STUDIED FOR THE VARIOUS COMBINATIONS OF THE RELEVANT PARAMETERS (FROUDE NUMBER, ROSSBY NUMBER, ETC.).

DETERMINE THE EFFECTIVENESS OF REGULATIONS AND PRACTICES FOR HANDLING TOXIC STRIP MINE SPOILS TO PREVENT ACID MINE DRAINAGE

START/ COMPL DATE : 09/77 - 03/79 : FUNDING : EST. - FY 77 / $ 112500
TASK/EPA CODE :B6238-508 / R805598-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : J L KENNEDY
INVESTIGATORS : D R THOMPSON STATE BUR. OF SURFACE MINE
M T DOUGHERTY ACKENHEIL & ASSOC. GEO. SYS.

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
09/78 -AWARD CONTINUATION
03/79 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THE PROPOSED RESEARCH PROJECT IS TO DETERMINE IF MODERN REGULATIONS AND PRACTICES GOVERNING HANDLING OF TOXIC STRIP MINE SPOIL MATERIALS HAVE BEEN EFFECTIVE IN CONTROLLING ACID MINE DRAINAGE AFTER MINING AND RECLAMATION HAVE BEEN COMPLETED. THE PROJECT WILL INCLUDE THE EVALUATION OF SIXTEEN STRIP MINES IN THE COMMONWEALTH OF PENNSYLVANIA. THESE MINES WILL HAVE BEEN RECLAIMED FOLLOWING LAWS AND REGULATIONS WHICH REQUIRED THAT TOXIC SPOIL MATERIALS BE SEGREGATED DURING MINING AND THAT THE TOXIC MATERIAL BE BACKFILLED IN ACCORDANCE WITH SPECIFICATIONS DESIGNED TO PREVENT RESIDUAL ACID MINE DRAINAGE. SPOIL SAMPLES WILL BE OBTAINED FROM A TEST BORING PROGRAM. THE POTENTIAL TOXICITY OF THE SPOIL SAMPLES WILL BE DETERMINED BY LABORATORY ANALYSIS. STATISTICAL METHODS WILL BE USED TO DETERMINE THE RELATION BETWEEN ACID MINE DRAINAGE PRODUCTION AND THE PRESENCE OF TOXIC STRIP MINE SPOILS, THEIR CONFIGURATION WITHIN THE RECLAIMED STRIP MINE, AND THE LOCATION OF GROUND WATER WITH RESPECT TO THE TOXIC MATERIALS.

HEALTH EFFECTS OF ENERGY BY-PRODUCTS ON DRINKING WATER

START/ COMPL DATE : 00/00 - 00/00 : FUNDING : EST. - FY 77 / $ 101976
TASK/EPA CODE :D625F-113 / R805599-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D G GREATHOUSE

INVESTIGATORS : M A SHAPIRO — UNIV. OF PITTSBURGH
A A SOOKY — UNIV. OF PITTSBURGH
J L SYKORA — UNIV. OF PITTSBURGH
J B ANDELMAN — UNIV. OF PITTSBURGH

MILE: 10/78 -PROJECT COMPLETION

THE OBJECTIVES OF THIS STUDY ARE (A) EVALUATION OF SOURCES, PRODUCTION AND UTILIZATION OF COAL ENERGY RELATED BY-PRODUCTS, (2) EVALUATION OF HEALTH EFFECTS OF COAL ENERGY BY-PRODUCTS, (3) EVALUATION OF COAL ENERGY BY-PRODUCTS INTRODUCED INTO DRINKING WATER SUPPLIES, (4) EVALUATION OF INFORMATION OBTAINED FROM 1, 2 AND 3 ABOVE TO DEFINE FUTURE RESEARCH NEEDS.THIS STUDY WILL BE BASED ON INFORMATION PUBLISHED IN PERIODICALS, BOOKS, REPORTS OR AVAILABLE RAW DATA, FIVE SEPARATE TASKS WILL COVER ALL T HE ESSENTIAL ASPECTS OF SOURCES AND HEALTH EFFECTS OF CONTAMINANTS DERIVED FROM COAL ENERGY PRODUCTION AS WELL AS THE PATHWAYS THROUGH WHICH THEY ENTER DRINKING WATER SUPPLIES, THE CONCLUSIONS OF THE STUDY WILL ALLOW FORMULATION OF FUTURE RESEARCH AND DEVELOPMENT NEEDS IN THE AREA OF COAL ENERGY UTILIZATION AND PRODUCTION AS RELATED TO DRINKING WATER QUALITY.

FATE AND EFFECTS OF SEDIMENTS FROM COMBINED SEWER AND STORM DRAIN OVERFLOW IN SEATTLE NEARSHORE WATERS

START/ COMPL DATE : 10/77 - 03/79 : FUNDING : EST, - FY 77 / $ 130000
TASK/EPA CODE :C611A-7107 / R805602 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J N ENGLISH
INVESTIGATORS : G D FARRIS SEATTLE WATER QUALITY DIVISIO
R DOMENOWSKE SEATTLE WATER QUALITY DIVISIO

MILE: 10/77 -PROJECT START
03/79 -PROJECT COMPLETION
09/79 -FINAL REPORT

OBJECTIVES: DETERMINE THE DISTRIBUTION PATTERNS AND FATE OF SUSPENDED PARTICULATES EMANATING FROM REPRESENTATIVE COMBINED SEWER OVERFLOWS AND STORM DRAINS IN THE SEATTLE AREA, DETERMINE SEASONAL DIFFERENCES AND CO RRELATE QUANTITATIVE IN-SITU OBSERVATIONS WITH SUSPENDED SOLIDS LOADING FA CTORS AND CURRENT PATTERNS, DETERMINE THE EFFECTS OF THE SETTLED PARTICULA TES AND ASSOCIATED CONTAMINANTS ON THE POPULATION DISTRIBUTIONS OF BENTHIC ORGANISMS, ASSESS THE AREAWIDE DISTRIBUTION OF THE PARTICULATE CONTAMINANTS,

This study is part of a technology assessment of the social, economic and environmental consequences to be expected from an increased concentration of energy facilities within the Ohio River Basin.

DATA BASE LOCATION & EVALUATION FOR HEAVY METALS DISCHARGE INTO
MUNICIPAL WASTEWATER COLLECTION AND TREATMENT SYSTEMS

START/ COMPL DATE : 10/77 - 07/79 : FUNDING : EST. - FY 77 / $ 48813
TASK/EPA CODE :C6118-7220 / R805606-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : S A HANNAH
INVESTIGATORS : R A MINEAR UNIV. OF TENNESSEE
R A BALL UNIV. OF TENNESSEE

MILE: 10/77 -PROJECT START
07/78 -INTERIM REPORT
07/79 -FINAL REPORT

OBJECTIVES: TO LOCATE, SURVEY, TABULATE AND GENERALLY EVALUATE THE DATA BASES AVAILABLE THAT RELATE TO ASSESSMENT OF RELATIVE SOURCE CONTRIBUTION OF HEAVY METALS TO PUBLICLY OWNED WASTEWATER TREATMENT SYSTEMS.
APPROACH: THE PROJECT WILL BE CONDUCTED IN TWO PHASES, PHASE I WILL BE DIR ECTED AT AN INTENSIVE AND COMPREHENSIVE SEARCH FOR DATA BASES RESULTING IN TABULATION ACCORDING TO GEOGRAPHICAL LOCATION, POPULATION AND INDUSTRIALIZATION CLASSIFICATIONS AND EXPRESSED IN TERMS OF EXTENT OF DATA BASE EXISTENCE. PHASE II WILL BE DIRECTED AT QUALIFICATION OF DATA BASE U SEFULNESS IN TERMS OF INCLUSIVENESS, QUANTITY OF DATA, QUALITY OF DATA AND ABILITY TO ASSESS TOTAL METAL DYNAMICS IN A GIVEN SYSTEM. OUTPUTS: PHASE I - INTERIM REPORT ON AVAILABILITY OF DATA SOURCES AND A QUALITATIVE EVALUATION OF USEFULNESS. PHASE II - FINAL REPORT WITH A QUANTITATIVE EVALUATION OF THE DATA BASES LOCATED IN PHASE I.

The objectives of this proposal is to develop an information and data base for the detailed consideration of potential impacts of future energy requirements and conversion activities in the Ohio River Basin. Phase I includes: demography, energy use by source and by sector; electricity exported and imported; energy reserves, electrical generation capability by facility and fuel type; plant ownership; and social and economic data on region residents. In Phase II the baseline data will be completed by additional information on migration, land use projections, induced industry, public health, water and air quality, coal mining, social services, recreational facilities and economics.

The approach will include: 1. collection of available baseline data; 2. Extensive literature search; 3. Data and information analysis; 4. Participation in Core Team and public meetings. The results will be compiled into a complete and comprehensive documents.

Current plans include collection and evaluation of baseline data identical to those already obtained for Illinois, Indiana, Kentucky and Ohio and parallel those to be obtained by all states involved. This includes also participation on Development of Phase II Work Plan, Energy Conversion Configurations, Impact assessment and Definition of Policy Options.

This set of studies represents a portion of a multi-institutional policy-oriented technology assessment of the socioeconomic and environmental impacts which might result from a proposed increased concentration of energy conversion facilities within the Ohio River Basin.

Utilizing the best available data bases, these studies will attempt to address the broad-scale environmental, institutional, economic and social effects of various future combinations of energy conversion facilities (i.e., coal-based plants producing synthetic fuels, as well as nuclear and coal-fired electric power generating plants) and their required support facilities (i.e., coal mining, processing and transportation; ash and sludge disposal facilities; nuclear fuel and reactor waste transportation facilities; and energy transportation systems, including electrical power transmission systems) that might be built and operated in this region in the future.

The principal objectives of this assessment are (1) to assist in outlining the full range of policy options for dealing with selected kinds of development, alternative levels of development and their possible undesirable effects, and alternative technological levels of environmental controls; and (2) to analyze the probable impacts that would result from implementing each option in its total framework, with special emphasis on the natural environment and its inter-relationship with public health and welfare. The full range of primary, secondary, and higher order effects will be considered.

CO-FIRING OF SOLID WASTE WITH COAL IN A CEMENT KILN

START/ COMPL DATE : 07/77 - 12/78 : FUNDING : EST. - FY 77 / $ 200000
TASK/EPA CODE :B6248-626 / R805613-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : R OLEXSEY
INVESTIGATORS : C R WILLEY STATE ENVIRON. SERVICE
MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
12/78 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO INVESTIGATE THE TECHNICAL AND ECONOMIC FEASIBILITY OF CO-FIRING SOLID WASTE WITH COAL IN AN EXISTING FULL-SCALE CEMENT KILN. THIS PROJECT WILL ADDRESS BOTH THE RESOURCE RECOVERY ASPECTS OF USING WASTE AS A SUPPLEMENTARY FUEL AND THE INDUSTRIAL CONSERVATION ASPECTS OF PRESERVING CONVENTIONAL (HIGH-PRICED, HIGH-SULFUR) FOSSIL FUELS. APPROXIMATELY 3000 TONS OF REFUSE-DERIVED FUEL WILL BE CO-FIRED IN THE DIRECT-FIRED KILN. DURING THESE CO-COMBUSTION TEST, ENVIRONMENTAL ANALYSES OF PROCESS EFFLUENTS WILL BE CARRIED OUT.

ROLE OF AQUATIC COMMUNITIES IN EVALUATING STRATEGIES, ESTABLISHING STANDARDS & MONITORING PROGRAMS FOR WATER QUALITY MANAGEMENT

START/ COMPL DATE : 10/77 - 09/79 : FUNDING : EST. - FY 77 / $ 66302
TASK/EPA CODE :C619A-7116 / R805614-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : E T OPPELT
INVESTIGATORS : W U BRIGHAM UNIV. OF ILLINOIS
MILE: 10/77 -PROJECT BEGIN
05/78 -COMPLETE PHASE I CONCEPTS AND PROCEDURES
10/78 -COMPLETE PHASE II STANDARDS
10/79 -COMPLETE PHASE III MONITORING
04/80 -FINAL REPORT

THE PURPOSES OF THIS INVESTIGATION ARE TO INVESTIGATE THE ROLE OF AQUATIC COMMUNITIES IN EVALUATING STRATEGIES FOR WATER QUALITY MANAGEMENT; TO DEFINE THE TERM FISHABLE IN LIGHT OF NON-STEADY-STATE ENVIRONMENTAL EFFECTS; TO EXPLORE & RECOMMEND APPROPRIATE STANDARDS WHICH ACCOUNT FOR THESE EFFECTS, AND; TO DESIGN & TEST A RESPONSIVE MONITORING PROGRAM. IN PURSUING THESE OBJECTIVES, THE RELATIONSHIP BETWEEN AQUATIC BIOLOGICAL COMMUNITIES AND THEIR PHYSICAL AND CHEMICAL ENVIRONMENT WILL BE EXPLORED. THE SURVIVAL OR DEMISE OF COMMUNITIES WILL BE RELATED TO SPATIAL AND TEMPORAL PATTERNS OF PHYSICAL AND CHEMICAL EVENTS. IF POSSIBLE, SURVIVAL WILL BE RELATED TO SUCH STATISTICAL MEASURES AS EXPECTED MAGNITUDE, DURATION, AND RECURRENCE OF CRITICAL CHEMICAL CHARACTERISTICS AND WILL BE RELATED TO NATURAL AND MAN-INDUCED EFFECTS SO THAT, IN THE END, CAUSES AND EFFECTS OF MANAGEMENT CONTROL CAN BE ASSESSED. THE PROJECT WILL BE CONDUCTED IN THREE PHASE: PHASE I WILL ELUCIDATE THE INTERRELATIONSHIP AMONG ABIOTIC AND BIOTIC FACTORS, PHASE II WILL DEMONSTRATE THE USE OF THESE INTERRELATIONSHIPS AS GUIDELINES FOR THE ESTABLISHMENT OF STANDARDS, USING EXISTING CHEMICAL; PHYSICAL AND BIOLOGICAL COMMUNITY DATA FROM THE DUPAGE (ILLINOIS) AND ENOREE (N. CAROLINA) RIVER BASINS IN CONJUNCTION WITH WATER QUALITY MODELLING. PHASE III WILL CONSIDER THE NATURE OF THE MONITORING PROGRAM NECESSARY TO DEVELOP THE PHASE-II STANDARDS (USING THE DUPAGE RIVER AS AN EXAMPLE CASE.)

805615

A proposal is submitted to hold a conference in Cincinnati, Ohio, on the topic: "Intergovernmental Energy and Environmental Cooperation: The Ohio Valley Challenge." About 75 individuals from all levels of government will be convened to discuss the topic and to recommend approaches to various problems.

Recently enacted laws to be administered by the Environmental Protection Agency (EPA) call for regulation of toxic or hazardous materials in both products and waste discharges from manufacturing operations. Because of potential conflicts which may arise from attempts to simultaneously regulate air, water, solid discharges and product contaminants, an approach is needed to obviate toxic chemical generation in manufacturing through feedstock or process modification.

The proposed research effort will evaluate typical toxic discharges and product contaminants for the 16 primary unit processes: nitration, amination by ammonolysis, diazotization, halogenation, sulfonation, oxidation, Friedel-Crafts, acylation, hydrogenation, hydroformylation, esterification, saponification, hydrolysis, alkylation, polymerization, cracking. If toxic discharges and contaminants can be so characterized, and if the unit processes used in a given industry segment or plant are identified, then EPA would have a clearer understanding of potential emissions, and, therefore, would be in a better position to formulate regulatory development activities

The objective of this effort is to characterize toxic discharges and product contaminants for representative manufacturing operations which utilize the 16 unit processes and to assess the needs for new control technologies, feedstock and process modifications to eliminate them.

The City of Chicago Refuse-Derived Fuel Project is one of the first full-scale, second-generation refuse-derived fuel (RDF) project in the country. The Chicago project is owned and operated by the City. It is designed to process 1,000 tons-per-day of waste in two operating shifts and has a completely redundant process line. The system uses two-stage shredding with a vibrating pan-type air classifier in between. The air classifier is designed to recover about 77 percent of the incoming waste as light fraction. The heavy fraction passes under a magnetic drum to recover ferrous metals. After secondary shredding in a wind-swept vertical shaft mill to reduce the particle size to 1½ inches, the RDF is pneumatically transported to storage bins at the adjacent Commonwealth Edison (CE) Crawford Power Station. The RDF will be cofired with coal in two large suspension fired boilers (225 and 357 mw) at a 10 percent heat input rate.

The scope of this project can be divided into four broad sections: a) Development of the Evaluation Plan, b) Collection of Data, c) Analysis of Data, and d) Preparation of Reports.

The purpose of the project is to assist the EPA contractor in the preparation of a comprehensive analysis of the system by data collection, data analysis, and reporting that can be used by both engineers and decision-makers in comparing this system to alternate resource recovery systems. Toward this end, the output of this project is to be well-written, comprehensive evaluation of this project that is suitable for use by other governmental agencies.

BIOLOGICAL ASSESSMENT OF EXPOSURE TO SULFUR DIOXIDE AND ACID SULFATE

START/ COMPL DATE : 06/77 - 12/80 : FUNDING : EST. - FY 77 / $ 105000
TASK/EPA CODE :H625F-7187 / R805622-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : C G HAYES
INVESTIGATORS : K V RAJAGOPALAN DUKE UNIVERSITY
MILE: 11/77 -AWARD GRANT
11/78 -PROGRESS REPORT
11/79 -PROGRESS REPORT - GRANT CONTINUATION APPLICATION
11/80 -FINAL REPORT

THE USE OF HIGH-SULFUR COAL AS A SOURCE OF ENERGY IS EXPECTED TO GENERATE HIGHER ATMOSPHERIC CONCENTRATIONS OF SULFUR DIOXIDE AND ACID S ULFATE. IT IS GENERALLY BELIEVED THAT THESE COMPOUNDS COULD AFFECT THE HEA LTH OF HUMAN POPULATIONS WHICH MAY BE EXPOSED TO THEM. BECAUSE OF THIS, IT IS OF ADVANTAGE TO HAVE AVAILABLE RELIABLE BIOLOGICAL INDICES FOR DETECTION OF EXPOSURE TO THESE CHEMICALS. THE RELEVANT TESTS SHOULD BE APPLICABLE TO BLOOD SAMPLES OBTAINED FROM SAMPLES OF HUMAN POPULATION. IN THE CASE OF SULFUR DIUXIDE, IT IS CONCEIVABLE THAT METABOLITES SUCH AS SULFITE, THIO-SULFATE AND S-SULFOCYSTEINE MAY BE PRESENT IN THE BLOOD OF EXPOSED INDIVIDUALS IN CONCENTRATIONS HIGHER THAN THOSE IN NORMAL POPULATIONS. USING THE RAT AS THE EXPERIMENTAL ANIMAL, THIS PROJECT WILL EXPLORE THE POSSIBILITY OF DEVELOPING SENSITIVE TESTS FOR THE PR ESENCE OF THESE COMPOUNDS IN BLOOD OF ANIMALS EXPOSED TO VARIOUS LEVELS OF SO2. PROCEDURES FOR ASSESSING EXPOSURE TO ACID SULFATE MAY ALSO BE POSSIBLE TO DEVELOP. SINCE SULFITE OXIDASE IS AN ENZYME CAPABLE OF DETOXI FYING SO2, METHODS FOR EPIDEMIOLOGICAL TESTING OF SULFITE OXIDASE IN HUMAN POPULATIONS WILL ALSO BE INVESTIGATED.

NEUTRALIZATION/PRECIPITATION MANUAL OF PRACTICE

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 90000
TASK/EPA CODE :B610C-593 / R805623-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : G F WEESNER
INVESTIGATORS : F ELLERBUSCH MITRE CORPORATION
MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
09/79 -FINAL REPORT RECEIVED

THE PRIMARY EMPHASIS OF THIS MANUAL WILL BE ONE OF REMOVAL OF HEAVY METALS FROM WASTEWATER COMMONLY ASSOCIATED WITH ELECTROPLATING/METAL FINISHING INDUSTRIES. SINCE DATA WILL BE COLLECTED FROM ALL CORNERS OF THE INORGANIC AND METALS INDUSTRY, IT IS FELT THAT THE MOP WILL BE WIDELY APPLICABLE TO THESE AREAS AS WELL. MITRE'S APPROACH WILL BE ONE OF UNIT OPERATION/UNIT PROCESS OPTIMIZATION OF DESIGN CRITERIA, SELECTION, AND OPERATIONS-MAINTENANCE FOR USE UNDER REAL WORLD CONDITIONS. GENERAL AREAS TO BE COVERED INCLUDE: THEORY, DESIGN AND UPGRADING, OPERATION AND EQUIPMENT, COSTING AND ECONOMICS, CASE HISTORIES AND APPLICATIONS, AND BIBLIOGRAPHY.

ECOSYSTEM RESPONSES TO ALTERNATIVE PESTICIDES IN THE TERRESTRIAL ENVIRONMENT - A SYSTEMS APPROACH

START/ COMPL DATE : 10/77 - 09/80 : FUNDING : EST. - FY 77 / $ 116119
TASK/EPA CODE :M714F-37 / R805624-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W GILLETT
INVESTIGATORS : E D GOODMAN MICHIGAN STATE UNIVERSITY
J W BUTCHER MICHIGAN STATE UNIVERSITY
M J ZABIK MICHIGAN STATE UNIVERSITY
R T KON MICHIGAN STATE UNIVERSITY

MILE: 09/80 -FINAL REPORT

THE IMMEDIATE OBJECTIVE IS TO FORMULATE AND VALIDATE A MODEL FOR THE EFFECTS OF AZINPHOSMETHYL (GUTHION) APPLIED TO APPLE ORCHARDS. GENERALIZATION TO OTHER COMPOUNDS AND TERRESTRIAL ECOSYSTEMS IS THE ULTIMATE OBJECTIVE. WORK PLANNED INCLUDES CONTINUATION OF EXPERIMENTAL FIELD TREATMENT AND SAMPLING, LABORATORY CULTURE AND TOXICOLOGICAL TESTING OF SOIL/LITTER INVERTEBRATES, AND MATHEMATICAL MODELING OF PESTICIDE MOVEMENT AND FAUNAL IMPACTS. ONE SEASON'S SAMPLES FROM THE ANTECEDENT GRANT HAVE BEEN ANALYZED TO DETERMINE RAIN-INDUCED VERTICAL MOVEMENT OF PESTICIDE, BUT NO RUNOFF WAS OBTAINED THAT YEAR. A SECOND YEAR'S SAMPLES ARE BEING COLLECTED IN SUMMER, 1977, AND WILL BE ANALYZED TO PROVIDE THE MISSING PARAMETERIZATION DATA. AIRBORNE LOSSES WILL ALSO BE MEASURED IN 1978. COMPUTER PROGRAMS FOR DIRECT MODEL PARAMETERIZATION FROM RAW FIELD DATA ARE BEING DEVELOPED. LABORATORY DATA ARE BEING USED TO AID IN DEVELOPMENT OF ORGANISM SUBMODELS. FIRST VALIDATION WILL BE ATTEMPTED USING 1978 FIELD DATA.

POSSIBLE SUBLETHAL EFFECT OF PETROLEUM HYDROCARBONS ON THE PHYSIOLOGY OF TEMPERATURE ACCLIMATION IN MARINE FISHES (ABBREV)

START/ COMPL DATE : 10/77 - 09/79 : FUNDING : EST. - FY 77 / $ 74000

TASK/EPA CODE : M625A-038 / R805625-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : R M BRICE

INVESTIGATORS : R S CALDWELL OREGON STATE HIGHER EDUC. SYS

E M CALDERONE OREGON STATE HIGHER EDUC. SYS

MILE: 08/79 -FINAL REPORT

THE PROPOSED RESEARCH WILL TEST THE HYPOTHESIS THAT PETROLEUM HYDROCARBON COMPOUNDS CAPABLE OF INDUCING MICROSOMAL MIXED FUNCTION OXIDASES IN FISH TISSUES INTERFERE WITH NORMAL PATTERNS OF FATTY ACID METABOLISM, SPE CIFICALLY MICROSOMAL FATTY ACID DESATURATION, AND THAT SUCH EFFECTS RESULT IN MODIFIED FATTY ACID PATTERNS IN MEMBRANE PHOSPHOLIPIDS OF FISH AND SUBOPTIMAL PHYSIOLOGICAL RESPONSES TO TEMPERATURE. TWO APPROACHES WILL BE TAKEN. IN ONE, FISH WILL BE EXPOSED TO PETROLEUM HYDROCARBONS FOR ONE TO TWO WEEKS AT AN INTERMEDIATE TEMPERATURE. FOLLOWING THIS, TREATED AND CONTROL FISH WILL BE COMPARED WITH RESPECT TO MICROSOMAL CYTOCHROME P450 AND B5 LEVELS, MIXED FUNCTION OXIDASE AND FATTY ACID DESATURASE ACTIVITIES, FATTY ACID COMPOSITION OF MEMBRANE PHOSPH OLIPIDS, AND SEVERAL BIOPHYSICAL CHARACTERISTICS OF MEMBRANES. IN A SECOND APPROACH, FISH WILL BE ACCLIMATED TO EXTREME TEMPERATURES, BOTH IN THE PRESENCE AND ABSENCE OF PETROLEUM HYDROCARBONS, AND COMPARED WITH RES PECT TO ABILITY TO CARRY OUT KNOWN BIOCHEMICAL AND PHYSIOLOGICAL ADAPTIONS TO TEMPERATURE (E.G. TEMPERATURE MEDIATED ADJUSTMENT OF MEMBRANE FATTY ACID COMPOSITION AND THE BIOCHEMICAL AND PHYSIOLOGICAL ADAPTIONS RESULTING FROM SUCH FATTY ACID CHANGES).

EFFECT OF PETROLEUM HYDROCARBONS ON FATTY ACID METABOLISM IN MARINE FISHES (ABBREV)

START/ COMPL DATE : 10/77 - 09/79 : FUNDING : EST. - FY 77 / $ 10757
TASK/EPA CODE :M627 -109 / R805625-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R M BRICE
INVESTIGATORS : R S CALDWELL OREGON STATE HIGHER EDUC. SYS
E M CALDERONE OREGON STATE HIGHER EDUC. SYS
MILE: 09/79 -FINAL REPORT

THIS IS ONE OF A MULTI-PART PROJECT WHOSE SUMMARY MAY BE IDENTICAL TO OTHERS. THE PROPOSED RESEARCH WILL TEST THE HYPOTHESIS THAT PETROLEUM HYDROCARBON COMPOUNDS CAPABLE OF INDUCING MICROSOMAL MIXED FUNCTION OXIDASE IN FISH TISSUE INTERFERE WITH NORMAL PATTERNS OF FATTY ACID METABOLISM, SPECIFICALLY MICROSOMAL FATTY ACID DESATURATION, AND THAT SUCH EFFECTS RESULT IN MODIFIED FATTY ACID PATTERNS IN MEMBRANE PHOSPHOLIPIDS OF FISH AND SUBOPTIMAL PHYSIOLOGICAL RESPONSES TO TEMPERATURE.

APPLICATION OF FIREFLY LUCIFERASE BACTERIAL ATP ASSAY TO MEASURE EFFICIENCY OF WATER SUPPLY TREATMENT

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 59000
TASK/EPA CODE :U6228-06 / R805627-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : D J REASONER
INVESTIGATORS : H OKREND HOWARD UNIVERSITY
M M VARMA HOWARD UNIVERSITY

MILE: 08/78 -AUTOMATED BACTERIAL DETECTION SYSTEM
03/79 -EVALUATION OF DETECTION SYSTEM WITH REAL SAMPLES
08/75 -FINAL REPORT

THE OBJECTIVES OF THE PROPOSED RESEARCH ARE TO DEVELOP A RAPID AND ACCURATE ASSAY OF BACTERIAL BIOMASS IN THE EFFLUENT OF POTABLE WATER TR EATMENT PLANTS BY FIREFLY LUCIFERASE ASSAY FOR ATP. THIS WILL ENABLE PLANT OPERATORS TO CHECK THE EFFICACY OF FINAL DISINFECTION OF THEIR EFFLUENT. A SEMI-AUTOMATED FLOW PROCESS WILL BE DEVELOPED WHICH WILL MIX SAMPLES WITH CHEMICAL EXTRACTANTS AND THEN WITH THE FIREFLY LUCIFERASE ENZYME IN FRONT OF A PHOTOMULTIPLIER TUBE WHICH WILL RECORD THE AMOUNT OF LIGHT EMITTED IN THE REACTION; THE AMOUNT OF LIGHT PRODUCED WILL BE PROPORTIONAL TO THE NUMBER OF BACTERIA PRESENT IN THE SAMPLE. THE FLOW SYSTEM CONS ISTS OF PERISTALTIC PUMPS, A MIXING CHAMBER AND A PHOTOMETER. IN ADDITION, SOME FORM OF CONCENTRATION SYSTEM, SUCH AS A FILTER, MAY BE NECESSARY TO INCREASE THE NUMBER OF MICROORGANISMS PRESENT IN A SAMPLE TO DETECTABLE LEVELS OF THE LUCIFERASE ASSAY. THE FLOW SYSTEM HAS BEEN TESTED USING AXENIC CULTURES OF AQUATIC MICROORGANISMS AND HAS BEEN ABLE TO DETECT APPROXIMATELY 5 X 10 TO THE 5TH POWER BACTERIA PER ML.

ENVIRONMENTAL CHANGES & AGRICULTURAL BENEFITS RESULTING FROM UTILIZATION
OF MUNICIPAL SEWAGE SLUDGE IN THE PRODUCTION OF CROPS (ABBRE

START/ COMPL DATE : 10/77 - 10/80 : FUNDING : EST. - FY 77 / $ 150000
TASK/EPA CODE :C6118-7219 / R805629-01 (GRANT) PRIOR FY / 1

MILE: 09/77 -GRANT AWARD
09/80 -PROJECT COMPLETED
02/81 -FINAL REPORT PUBLISHED

OBJECTIVE: THE GENERAL OBJECTIVES ARE TO COLLECT INFORMATION NEEDED TO DEVELOP METHODS FOR PREVENTING OR MINIMIZING ADVERSE EFFECTS ON SOILS, CROPS, WATER, AND ANIMALS, AND MAXIMIZING BENEFITS FROM USING SEWAGE SLUDGE AS A FERTILIZER AND SOIL CONDITIONER. APPROACH: FIELD PLOTS AND LYSIMETER PLOTS WITH THREE SOIL TYPES AND STRIP-MINED SOIL WILL RECEIVE LIQUID DIGESTED SLUDGE APPLICATIONS AT VARYING RATES (0, 1/4, 1/2 AND MAXIMUM). SOME PLOTS HAVE RECEIVED ANNUAL SLUDGE APPLICATIONS FOR NINE (9) YEARS. MAXIMUM RATE IS EQUIVALENT TO ONE INCH PER WEEK FOR ABOUT SIX TO NINE WEEKS. THE EFFECT OF SLUDGE COMPONENTS ON SOIL, WATER AND CROPS WILL BE DETERMINED BY REGULAR SAMPLING AND ANALYSIS. CORN AND SOY BEANS PRODUCED ON SLUDGE TREATED SOILS WILL BE FED TO LAYING HENS. THE EFFECT ON THE HEALTH, COMPOSITION AND PRODUCTION OF THE HENS WILL BE MEASURED OVER A PERIOD OF 80 WEEKS. CADMIUM ACCUMULATION IN THE HENS AND EGGS WILL BE DETERMINED. A SINGLE APPLICATION OF DEWATERED SLUDGE AT HIGH RATE ON FIELD PLOTS ON STRIP-MINED SOILS WILL BE COMPARED TO INCREMENTAL LIQUID SLUDGE APPLICATIONS ANNUALLY.

REDUCTION OF POLLUTANTS IN MUNICIPAL SEWAGE SLUDGE TO LEVELS CONSISTENT WITH LAND DISPOSAL.

START/ COMPL DATE : 10/77 - 03/79 : FUNDING : EST. - FY 77 / $ 136792

MILE: 10/77 -PROJECT START
10/78 -COMPLETE DATA COLLECTION AND ANALYSIS
03/79 -COMPLETE REPORT

OBJECTIVES - THE PROJECT INVOLVES ESTABLISHING A PROTOCOL TO ASSIST C OMMUNITIES IN IDENTIFYING, QUANTIFYING AND FORMULATING REGULATORY POLICIES RELATIVE TO THE REDUCTION OF METALS AND CYANIDES TO MUNICIPAL TREATMENT PLANTS TO THE POINT THAT LAND DISPOSAL OF DIGESTOR SLUDGE IS FEASIBLE. M ETALS OF INTEREST INCLUDE CU, NI, CRT, CR ION, CD, ZN, HG AND PB. THE TERM "CYANIDES" DENOTES TOTAL CYANIDE AS WELL AS CYANIDE AMENABLE TO CHLORINATION. APPROACH - WASTEWATERS FROM RESIDENTIAL NEIGHBORHOODS, INDUSTRIAL DISCHARGES, MIXED MUNICIPAL WASTEWATERS AND TREATMENT PLANT INFLUENTS, EFFLUENTS AND SLUDGES WILL BE SAMPLED AND ANALYZED TO PERMIT CALCULATION OF RELATIVE SOURCES OF METALS IN MUNICIPAL WASTEWATERS AND SLU DGES IN KOKOMO, IND. POTENTIAL STORMWATER CONTRIBUTIONS WILL BE CALCULATED FROM ANALYSES OF DUSTFALL OVER THE COLLECTION AREA AND WILL BE INCLUDED IN THE ANALYSIS. OUTPUTS - A FINAL REPORT WILL ANALYZE THE SAMPLING RESULTS ON A LOCAL BASIS AND WILL INCLUDE A GENERAL PROTOCOL FOR S AMPLING AND REGULATING DISCHARGES OF METALS AT OTHER LOCATIONS. A COMPUTER PROGRAM TO EVALUATE ALTERNATE CONTROL STRATEGIES ON A COST-BENEFIT BASIS WILL ALSO BE A PRODUCT OF THE GRANT.

USE OF A VEGETATIVE FILTER ZONE TO CONTROL FINE-GRAINED SEDIMENTS FROM SURFACE MINES

START/ COMPL DATE : 11/77 - 05/79 : FUNDING : EST. - FY 77 / $ 119000
TASK/EPA CODE :B6238-506 / S805632-01 (GRANT) PRIOR FY76 / 1

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
09/77 -AWARD FUNDS FOR PROJECT
01/78 -PLANNING AND FEASIBILITY STUDY
04/79 -CONSTRUCTION & DATA COLLECTION
05/79 -FINAL REPORT

PRIMARY OBJECTIVE OF THE PROJECT IS TO DEMONSTRATE THE TECHNICAL, THE ECONOMIC AND ENVIRONMENTAL FEASIBILITY OF USING A VEGETATIVE FILTER ZONE TO ASSIST IN CONTROLLING FINE-GRAINED SEDIMENTS ORIGINATING FROM SU RFACE MINING ACTIVITIES. SPECIFIC OBJECTIVES INCLUDE: (1) EXAMINE SEDIMENT TRAPPING EFFICIENCY OF THE FILTER ZONE, (2) EXAMINE SUITABILITY OF VARIOUS TYPES OF VEGETATION TO USE IN THE FILTER ZONE, (3) EVALUATE THE FILTER'S USEFULNESS IN IMPROVING WATER QUALITY, AND (4) DETERMINE THE COST FEASIBILITY OF USING THE FILTER ON SURFACE MINES IN EASTERN KENTUCKY. BASICALLY, THE PROJECT WILL ENTAIL THE DIVERSION OF SURFACE RUNOFF WATER, WHICH HAS BEEN COLLECTED AT A PARTICULAR POINT ON THE MINING SITE, DOWN A RIPRAP LINED CHANNEL AND THROUGH A VEGETATIVE FILTER ZONE APPRO XIMATELY 20 FEET WIDE AND 200 FEET LONG. IN ORDER TO ASSURE THAT RUNOFF IS ACCURATELY MONITORED, A BERM WILL BE CONSTRUCTED AROUND THE PROJECT S ITE. A FLOW DISTRIBUTION AREA AND A LEVEL SPREADER WILL BE INSTALLED BELOW THE RIPRAP LINED CHANNEL AND ABOVE THE FILTER ZONE. THE PROJECT WILL INCL UDE FOUR TASKS: (1) PLANNING AND FEASIBILITY STUDY, (2) SEDIMENT AND WATER QUALITY MONITORING, (3) CONSTRUCTION AND DEMONSTRATION, AND (4) PROJECT MANAGEMENT.

AMMONIA TOXICITY TO FISHES

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :C619A-7117 / R805636-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W BRUNGS
INVESTIGATORS : R V THURSTON MONTANA STATE UNIVERSITY
R RUSSO MONTANA STATE UNIVERSITY
MILE: 10/77 -PROJECT START
09/78 -PROJECT COMPLETION
03/79 -FINAL REPORT

THE OBJECTIVE OF THIS RESEARCH IS TO DETERMINE THE EFFECT ON FISH OF EXPOSURES TO FLUCTUATING CONCENTRATIONS OF AMMONIA ABOVE THE PROPOSED EPA CRITERION LEVEL OF 0.02 MG/LITER NH3 BUT BELOW ACUTE TOXICITY LEVELS. THIS WILL BE ACCOMPLISHED THROUGH A SERIES OF LABORATORY FLOW-THROUGH BIOASSAYS IN WHICH RAINBOW TROUT AND FATHEAD MINNOWS WILL BE EXPOSED TO FLUCTUATING CONCENTRATIONS OF AMMONIA. TWO DIFFERENT FLUCTUATION REGIMES WILL BE STUDIED: (1) DIURNAL FLUCTUATIONS TYPICAL OF THOSE WHICH MIGHT BE CAUSED BY WASTEWATER TREATMENT PLANT DISCHARGES, AND (2) INTERMITTENT FLUCTUATIONS AS MIGHT BE CAUSED BY "SLUG" DISCHARGES. EXPERIMENTS TO INVESTIGATE THE EFFECT OF FLUCTUATIONS UNDER STRESSFUL CONDITIONS OF TEMPERATURE AND DISSOLVED OXYGEN WILL ALSO BE EXAMINED IN AN EXPLORATORY FASHION.

AMMONIA TOXICITY TO FISHES

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 50000
TASK/EPA CODE :V619 -93 / R805636-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : W BRUNGS
INVESTIGATORS : R V THURSTON MONTANA STATE UNIVERSITY
R C RUSSO MONTANA STATE UNIVERSITY
MILE: 10/78 -FINAL REPORT

THE OBJECTIVE OF THE PROPOSED RESEARCH IS TO DETERMINE THE EFFECT ON FISHES OF EXPOSURE TO FLUCTUATING AMMONIA CONCENTRATIONS ABOVE THE PROPOSED EPA CRITERION LEVEL OF 0.01 MG/LITER HH3(G). LABORATORY BIOASSAYS WILL BE CARRIED OUT EMPLOYING AMMONIA CONCENTRATION FLUCTUATION REGIMES OF TWO TYPES: (1) DIURNAL FLUCTUATIONS, AND (2) INTERMITTENT FLUCTUATIONS. THE EXPERIMENTS TO INVESTIGATE DIURNAL FLUCTUATIONS WILL INVOLVE FLUCTUATIONS IN A PATTERN SIMULATING THE DIURNAL CYCLE TYPICAL OF MANY WASTEWATER TREATMENT PLANT DISCHARGES; I.E. PEAKS DURING MID- AND LATE-DAY, AND A LOW DURING THE EARLY MORNING HOURS. THE EXPERIMENTS TO DETERMINE THE EFFECT OF INTERMITTENT FLUCTUATIONS, SIMULATING ACCIDENTIAL DISCHARGES, WILL INCLUDE SUBJECTING TEST FISH FOR ONLY A FEW HOURS OR DAYS TO DOSES OF AMMONIA AT HIGH CONCENTRATIONS KNOWN TO BE ACUTELY TOXIC. TEST FISHES WILL BE RAINBOW TROUT AND FATHEAD MINNOWS. BIOLOGICAL PARAMETERS TO BE MEASURED INCLUDE MORTALITY/SURVIVAL, BLOOD AMMONIA CONCENTRATIONS, TISSUE DEGENERATION, AND FISH BEHAVIOR. BIOASSAY TEST METHODS WILL CLOSELY APPROXIMATE THOSE RECOMMENDED BY THE EPA COMMITTEE ON METHODS FOR TOXICITY TESTS WITH AQUATIC ORGANISMS.

EVALUATION OF NATURAL INHIBITING FACTORS IN AN AGGRESSIVE DRINKING WATER SUPPLY

START/ COMPL DATE : 10/77 - 02/79 : FUNDING : EST. - FY 77 / $ 31386
TASK/EPA CODE :C614A-7137 / R805638-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : R W BUELOW
INVESTIGATORS : O T ZAJICEK UNIV. OF MASSACHUSETTS
E LAMOTTA UNIV. OF MASSACHUSETTS

MILE: 10/77 -PROJECT STARTED
02/78 -COMPLETE WATER PRESSURE SURVEYS
08/78 -COMPLETE LABORATORY TESTING WATER QUALITY COMBINATIONS
02/79 -PROJECT COMPLETED - FINAL REPORT

OBJECTIVE: TO FIND OUT WHY AMHERST, MASS. WATER IS NOT SEVERELY CORROSIVE TO DISTRIBUTION SYSTEM PIPE MATERIALS WHEN IT TESTS CHEMICALLY TO BE A HIGHLY AGGRESSIVE WATER. APPROACH: ANALYZE AMHERST'S WATER CHEMICALLY AND COMPARE IT TO OTHER KNOWN AGGRESSIVE WATERS THAT CAUSE CORROSION PROBLEMS. ALSO, ADD SUBSTANCES TO AMHERST WATER TO DETERMINE WHAT WILL MAKE IT CORROSIVE. PROGRESS: GRANT APPLICATION IS BEING PROCESSED.

LEVEL 1 PILOT STUDY ON PROCESS AND WASTE STREAMS AND FUGITIVE EMISSIONS FROM NONFERROUS METAL SMELTER

START/ COMPL DATE : 08/77 - 12/78 : FUNDING : EST. - FY 77 / $ 23000
TASK/EPA CODE :B6108-641 / R805644-01 (GRANT) PRIOR FY77 / $ 233091
PROJECT OFFICER : G THOMPSON
INVESTIGATORS : T E CODY UNIV. OF CINCINNATI
K WILLEKE UNIV. OF CINCINNATI
V J ELIA UNIV. OF CINCINNATI
R T CHRISTIAN UNIV. OF CINCINNATI

THE USE OF BIOASSAYS IN COMBINATION WITH CHEMICAL ANALYSIS SHOULD BE AN EFFECTIVE APPROACH FOR EVALUATING THE IMPACT OF INDUSTRIAL EFFLUENTS ON THE ENVIRONMENT AND HUMAN HEALTH. THE INDUSTRIAL ENVIRONMENTAL RESEARC H LABORATORY OF USEPA HAS PREPARED A MANUAL OF PROCEDURES FOR CARRYING OUT A SERIES OF BIOASSAYS TO SCREEN INDUSTRIAL EFFLUENTS. THE OBJECTIVE OF THIS PROPOSAL IS TO PERFORM THESE BIOASSAYS AND EVALUATE THEIR EFF ECTIVENESS AT NONFERROUS METAL SMELTERS UNDER ACTUAL FIELD CONDITIONS. THE WORK IS SEGMENTED INTO THREE PHASES. PHASE I IS A DEVELOPMENT AND PLANNING PHASE DURING WHICH PREPARATIONS ARE MADE FOR SAMPLING, CHEMICAL AN ALYSIS, AND BIOASSAYS. PHASE II IS THE SAMPLING AND ANALYSIS PHASE. DURING PHASE III THE DATA AND PROTOCOLS WILL BE EVALUATED IN TERMS OF FEASIBILITY OF USING THE BIOASSAYS IN THE SMELTER INDUSTRY. RECOMMENDATIONS FOR M ODIFICATIONS IN THE PROGRAM INCLUDING USE OF ALTERNATIVE BIOASSAYS WILL BE INCLUDED IN THE EVALUATION REPORT.

EXPOSURE ASSESSMENTS - STATE-OF-THE-ART REVIEW

START/ COMPL DATE : 10/77 - 03/78 : FUNDING : EST. - FY 77 / $ 13804
TASK/EPA CODE :K609A-444 / R805647-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : J W FALCO
INVESTIGATORS : R ZECKHAUSER HARVARD UNIVERSITY
C MILLER HARVARD UNIVERSITY
MILE: 10/77 -START PROJECT
04/78 -FINAL REPORT - SUMMARIZING RESULTS OF PROJECT

THE OBJECTIVES OF THIS GRANT ARE TO EVALUATE THE STATE-OF-THE-ART OF MATHEMATICAL MODELS FOR APPLICATION TO ASSESSING TOXIC SUBSTANCES EXPOSURE AND TO RECOMMEND RESEARCH NEEDS IN THIS AREA. THE STUDY WILL BE DIRECTED TOWARD THE USE OF MULTIMEDIA MODELS THAT CAN PREDICT INTERPHASE TRANSFER AMONG AIR, LAND, AND WATER ENVIRONMENTS. THE OBJECTIVES OF THIS STUDY WILL BE ACCOMPLISHED BY CARRYING OUT A LITERATURE SURVEY AND CONDUCTING SITE VISITS TO RESEARCH INSTITUTIONS INVOLVED IN RESEARCH PERTAINING TO TOXIC SUBSTANCE EXPOSURE ANALYSIS. A REPORT SUMMARIZING THE RESULTS OF THE STUDY WILL BE PUBLISHED UPON COMPLETION OF THE PROJECT. THE REPORT WILL CONTAIN RECOMMENDATIONS FOR FUTURE RESEARCH IN MULTIMEDIA MODELING NEEDED FOR TOXIC SUBSTANCE EXPOSURE ASSESSMENT.

NOVEL TECHNIQUES FOR CONCENTRATION AND SEPARATION OF TOXIC SUBSTANCES FROM ESTUARINE WATERS

START/ COMPL DATE : 09/77 - 09/79 : FUNDING : EST. - FY 77 / $ 49816
TASK/EPA CODE :Q608C-1-05 / R805656-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : E KLEIN GULF SOUTH RESEARCH INSTITUTE
MILE: 10/78 -REPORT ON METHODOLOGY EVALUATION

THE OBJECTIVE IS TO DEVELOP METHODS FOR THE SEPARATION, CONCENTRATION AND IDENTIFICATION OF XENOBIOTICS WITH MUTAGENIC/CARCINOGENIC PROPERTIES FROM THE ESTUARINE ENVIRONMENT.

ALASKA VILLAGE DEMONSTRATION PROJECT--EMMONAK

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 30000
TASK/EPA CODE :M6118-40 / R805660-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H COUTTS
INVESTIGATORS : D REDFOX EMMONAK CITY GOVERNMENT
MILE: 09/78 -FINAL REPORT

THE OBJECTIVE IS TO PROVIDE FOR TECHNICAL ASSISTANCE AND OPERATION AND MAINTENANCE SUPPORT TO A SMALL NATIVE COMMUNITY FOR THE OPERATION OF A CENTRAL UTILITY TYPE FACILITY (INCLUDING WATER SUPPLY AND WASTE TREATMENT SYSTEMS) FOR EVALUATION OF ENGINEERING PERFORMANCE AND INSTITUTIONAL MANAGEMENT.

ALASKA VILLAGE DEMONSTRATION PROJECT--WAINWRIGHT

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST. - FY 77 / $ 52300
TASK/EPA CODE :M611B-41 / R805661-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H COUTTS
INVESTIGATORS : D BODFISH WAINWRIGHT CITY GOVERNMENT
MILE: 09/78 -FINAL REPORT

THE OBJECTIVE IS TO PROVIDE FOR TECHNICAL ASSISTANCE AND OPERATION AND MAINTENANCE SUPPORT TO A SMALL NATIVE COMMUNITY FOR THE OPERATION OF A CENTRAL UTILITY TYPE FACILITY (INCLUDING WATER SUPPLY AND WASTE TREATMENT SYSTEMS) FOR EVALUATION OF ENGINEERING PERFORMANCE AND INSTITUTIONAL MANAGEMENT.

POLISHING OF INDUSTRIAL WASTE STREAM EFFLUENTS USING FLY ASH-CLAY ABSORBENT

START/ COMPL DATE : 08/77 - 09/78 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :86108-464 / R805666-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : M K STINSON
INVESTIGATORS : J W LISKOWITZ NEW JERSEY INST. OF TECHNOLOG
P CHAN NEW JERSEY INST. OF TECHNOLOG
R B TRATTNER NEW JERSEY INST. OF TECHNOLOG
M S SHEIH NEW JERSEY INST. OF TECHNOLOG

MILE: 08/77 -FUNDING PACKAGE SUBMITTED
08/77 -AWARD FUNDS FOR PROJECT
02/78 -PROGRESS REPORT
05/78 -PROGRESS REPORT
08/78 -PROGRESS REPORT
09/78 -DRAFT FINAL REPORT
10/78 -FINAL REPORT RECEIVED

THE OBJECTIVE OF THIS PROPOSED INVESTIGATION IS TO ESTABLISH THE FEA SIBILITY OF USING INEXPENSIVE FLY ASH AND CLAY COMBINATIONS (ILLITE, VERMI CULITE, KAOLINITE, AND NATURAL ZEOLITE) FOR POLISHING INDUSTRIAL WASTE STR EAM EFFLUENTS SUCH AS FELSPAR MINING AND PROCESSING. THESE SORBENT COMBINA TIONS WERE PROVEN IN OUR STUDIES TO BE EXTREMELY EFFECTIVE FOR TREATING HE AVY METALS, ORGANICS, AND TOXIC ANIONS IN INDUSTRIAL SLUDGE LEACHATES. FOR EXAMPLE, FLUORIDE CONCENTRATIONS RANGING FROM 7 TO 155 PPM ENCOUNTERED IN CALCIUM FLUORIDE SLUDGE LEACHATE WERE REDUCED TO LESS THAN 1 PPM, USING THE ABOVE MENTIONED INEXPENSIVE COMBINATIONS. THE PROPOSED ONE-YEAR STUDY IS DIVIDED INTO TWO PHASES, NAMELY, ANALYTICAL AND LYSIMETER STUDIES. THE ANALYTICAL STUDY PHASE WILL INVOLVE THE IDENTIFICATIO N AND CONCENTRATION MEASUREMENT OF THE HEAVY METALS, TOXIC ANIONS AND ORGA NICS PRESENT IN THE WASTE STREAM EFFLUENT. ONCE THE PROMISING COMBINATIONS HAVE BEEN SELECTED, THE PHASE OF LYSIMETER STUDY WILL BE CARRIED OUT TO ALLOW US TO DEFINE SORBENT COMBINATIONS THAT WILL PROVIDE OPTIMUM REDUCTION.

CONSEQUENCES OF CRUDE OIL CONTAMINATION ON COLD CLIMATE SALT MARSHES AND INSHORE ECOSYSTEMS - PHASE I - FIELD SITE RECONNAISSANCE

START/ COMPL DATE : 10/77 - 09/78 : FUNDING : EST, - FY 77 / $ 34966

TASK/EPA CODE :M608C-042 / R805668-01 (GRANT) PRIOR FY / 1

PROJECT OFFICER : R MCFADDEN

INVESTIGATORS : C P MCROY UNIV, OF ALASKA

MILE: 09/78 -FINAL REPORT

THE GENERAL OBJECTIVE OF THIS RESEARCH IS TO SELECT CRUCIAL FIELD SITES FOR THE STUDY OF THE CONSEQUENCES OF CRUDE OIL CONTAMINATION ON SALT MARSHES AND RELATED ECOSYSTEMS IN ALASKAN WATERS, RESEARCH WILL INCLUDE A PRELIMINARY ANALYSIS OF THE PLANT AND ANIMAL COMMUNITY STRUCTURE, CYCLING OF NUTRIENTS AND PRIMARY PRODUCTIVITY, THE RESULTS WILL BE USED AS THE BASIS FOR DESIGNING AN EXTENSIVE RESEARCH PROJECT TO STUDY THE EFFECTS OF CRUDE OIL CONTAMINATION ON MARSHES,

INVESTIGATION OF ENZYMATIC SCREENING TESTS FOR MUTAGENS IN ENVIRONMENTAL POLLUTANTS

START/ COMPL DATE : 09/77 - 09/78 : FUNDING : EST. - FY 77 / $ 40000
TASK/EPA CODE :Q608C-1-06 / R805671-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : N L RICHARDS
INVESTIGATORS : J SCHMIDTCOLLER UNIV. OF DENVER
MILE: 10/78 -PRELIMINARY EVALUATION OF SCREENING METHOD
01/79 -REPORT ON VALIDATION OF SCREENING METHOD

THE OBJECTIVE OF THIS RESEARCH IS TO STUDY THE FEASIBILITY OF THE IN VITRO ACTIVATION OF MICROSOMAL DRUG-METABOLIZING ENZYME SYSTEMS FOR THE DEVELOPMENT OF A RAPID AND SENSITIVE PRESCREENING TEST FOR MUTAGENICITY OF SYNFUEL RELATED ENVIRONMENTAL POLLUTANTS, THEIR DERIVATIVES AND THEIR METABOLIC PRODUCTS AS THEY MAY OCCUR ON LAND AND IN AQUATIC AND MARINE ENVIRONMENTS.

TECHNICAL STUDIES OF COOK INLET COASTAL WETLANDS

START/ COMPL DATE : 10/77 - 10/78 : FUNDING : EST, - FY 77 / $ 50220
TASK/EPA CODE :M608C-043 / R805690-01 (GRANT) PRIOR FY / 1
PROJECT OFFICER : H V KIBBY
INVESTIGATORS : K MACDONALD UNIV, OF IDAHO
F RABE UNIV, OF IDAHO
MILE: 09/78 -FINAL REPORT

THE OBJECTIVE OF THIS PROJECT IS TO PROVIDE QUANTITATIVE DATA ON THE PRI
MARY PRODUCTION OF A MAJOR COASTAL WETLAND SITE WITHIN COOK INLET, ALASKA,
AND TO IDENTIFY AND ASSESS THE FUNCTIONAL INTERRELATIONSHIPS AM
ONG WETLANDS, THE ADJACENT TERRESTRIAL ECOSYSTEM AND THE ESTUARINE ECOSYST

(a) To construct two earthen sediment dams where Cane Creek and the other unnamed tributary enter the lake, and
(b) to dredge material from existing sediment deposits in the lake, and
(c) to use spoil, rip rap, and spillways to provide two sediment traps that will protect the lake from continuing sedimentation

HEALTH IMPLICATIONS OF COAL RELATED ENERGY DEVELOPMENT - MINING IMPACTS

START/ COMPL DATE : 01/78 - 00/80 : FUNDING : EST, - FY 77 / $ 114279
TASK/EPA CODE :D625 -008 / R805700-01 (GRANT) PRIOR FY76 / 1
PROJECT OFFICER : W GRUBIE
INVESTIGATORS : M A BELL BATTELLE MEMORIAL INSTITUTE
D A SAVITZ BATTELLE MEMORIAL INSTITUTE
V Q HALE BATTELLE MEMORIAL INSTITUTE
M C MATTHEWS BATTELLE MEMORIAL INSTITUTE
R A EWING BATTELLE MEMORIAL INSTITUTE
R W COTE BATTELLE MEMORIAL INSTITUTE
M D KELLER OHIO STATE UNIVERSITY
N A REICHES BATTELLE MEMORIAL INSTITUTE
MILE: 12/78 -PROGRESS REVIEW
12/79 -FINAL REPORT

IN ANALYZING THE CURRENT AND FUTURE ENERGY STATUS OF THE UNITED STATES, IT IS CLEAR THAT THE INCREASED DEVELOPMENT OF COAL MINING MUST BE AN INTEGRAL PART OF THE LONG-TERM PLANS. WESTERN COAL REGIONS ARE EXPECTED TO SUPPLY A GREAT DEAL OF THE COUNTRY'S NEEDS. THE PURPOSE OF THE PROPOSED RESEARCH IS TO ESTABLISH A METHOD FOR PROSPECTIVE EPIDEMIOLOGIC ANALYSIS OF THE HEALTH EFFECTS ASSOCIATED WITH THE DEVELOPMENT OF WESTERN COAL SITES. TWO ASPECTS OF ENERGY DEVELOPMENT WILL BE CONSIDERED IN EV ALUATING HEALTH OUTCOMES: THE INDUSTRIAL ACTIVITY PER SE AND THE EFFECT OF THE UNPLANNED GROWTH WHICH OCCURS AS A RESULT OF RAPID ECONOMIC DEVELOPMENT. THE EMPHASIS IN THIS RESEARCH PROGRAM WILL BE ON THE FORMER, SPECIFICALLY FOCUSING ON WATER POLLUTANT ASPECTS OF MINING ACTIVITY. A LIST OF COAL-DEVELOPMENT IMPACTED COMMUNITIES IN THE WESTERN COAL MINING AREA HAS BEEN PREPARED. AFTER SELECTING A FEW SITES FROM THAT LIST FOR ANALYSIS, AVAILABLE INFORMATION ON THE POPULATION'S HEALTH STATUS AND ENVIRONMENTAL QUALITY WILL BE COMPILED, INCLUDING COMMUNITY AND E NVIRONMENTAL HEALTH SERVICES. THIS INFORMATION WILL BE EVALUATED USING THE CRITERIA OF ITS ADEQUACY AS A BASIS FOR PROSPECTIVE EPIDEMIOLOGIC RESEARC H. IT SHOULD BE NOTED THAT THE INFORMATION DERIVED FROM THIS RESEARCH WILL BE DESCRIPTIVE IN NATURE. NO STATEMENTS REGARDING CURRENT CAUSE -EFFECT RELATIONSHIPS CAN BE MADE; HOWEVER, THE BASIS WILL BE PROVIDED FOR FUTURE QUANTITATIVE ANALYTICAL STUDIES.

16. Abstracts

This publication lists the grant awards offered by EPA during the period of April - September, Fiscal Year 1977, for research, demonstration, training, and fellowship programs.

A brief project description for most of the research and demonstration grants administered by Headquarters is contained in Section Two, arranged in ascending order of the Grant Identification Number. A Grant Number Index is included to assist cross-referencing into Section One material.

17. Key Words and Document Analysis. 17a. Descriptors
