RCRA PERMIT POLICY COMPENDIUM: USER'S GUIDE

OVERVIEW

The RCRA Permit Policy Compendium is a reference for Regional and State permit writers which consists of Headquarters' permitting policies and procedures. The Compendium volumes include this Users' Guide, a key word index, and reference memoranda, letters, Office of Solid Waste and Emergency Response (OSWER) Directives, and other documents organized chronologically within subject categories.

The Compendium was originally compiled in late 1985. This updated Compendium includes documents issued through December 31, 1991.

For these compilations, the files of EPA Headquarters Office of Solid Waste Divisions and Branches were reviewed to identify memoranda, letters, directives, and other documents that set forth policies and interpretations relevant to the RCRA permit program. The documents identified as relevant were then organized, according to a system based on the structure of the OSWER Directives System. Each document is assigned an unique number which both categorizes the document by general topic area and identifies the year in which the document was written. The numbering system uses the same basic categories as the OSWER Directives System.

KEYWORD INDEX

A key word index is included in Vol. I to assist the user in identifying and locating relevant documents. The index, organized in alphabetical order, lists the topic and the documents which are relevant to the topic, identified by title, document number and date. The key word index groups related topics and cross references topics which may be relevant. Subkey words have been identified as a means to specify groups of titles which may fall within a broader key word category.

Summaries of documents which had been included in the original Compendium have been deleted. Users of the original Compendium did not find them useful.

After a key word listing, there may be a "See _____" or "See also _____." In the "See _____" case, the documents relating to the key word have been grouped into another listing. For example, the listing for "Absorbents" refers the user to "Liquid Waste." Similarly, the listing for "Appeal" refers the reader to "Permit Process," but also reminds the user to "See also 'closure'", since appeals of closure plans also may be relevant.

As an alternative method to search for a specific memo, diskettes with the key word index on dBase III Plus has been included in this package. Additional information on loading, indexing, and searching in this database can be found in Appendix I.

DOCUMENTS INCLUDED

The Compendium incorporates a wide variety of documents that might be useful to staff working in the field of RCRA permitting. The Compendium includes relevant RCRA permitting memoranda, letters, OSWER Directives, Regulatory Interpretive Letters (RILs), Program Interpretation Guidelines (PIGs), RCRA Reauthorization Statutory Interpretations (RSIs), RCRA/Superfund Hotline Monthly Status Reports and Summaries of Permit Assistance Team (PAT) Comments. Although the Compendium includes RILs, PIGs, RSIs, and PATs from the previous years, the Office of Solid Waste no longer issues these documents.

Documents that are internal Headquarters correspondence or express preliminary thoughts or comments were not included in the Compendium. Only those documents providing a clear interpretation of Agency policy or procedures have been compiled.

ORGANIZATION

The RCRA Permit Policy Compendium volumes include this Users' Guide, a key word index, and memoranda, letters, and other documents organized chronologically with subject categories. The source documents include all documents issued through December 31, 1991. OSWER Directives are the first documents in any section. They are ordered chronologically as well.

There are eleven volumes in this reference document:

<u>Volume</u> <u>Number</u>	<u>Document Reference Numbers</u>	<u>Broad Subject</u> <u>Categories</u>
I -		User's Guide, Key Word Index
II -	9420.1980-9434.1991	Hazardous Waste Management
III -	9441.1980-9441.1986	Identification of Hazardous Waste
IV -	9441.1987-9441.1991	Identification of Hazardous Waste (cont'd)
V -	9442.1980-9444.1986	Characteristics and Lists of Hazardous Waste

XI - 9530.1980-9581.1991	Air Emissions, State Authorization, Land Disposal/Restrictions, Subtitle D

NUMBERING SYSTEM

All source documents are identified by a reference number in the upper right hand corner of the page. The document reference number is also in the key word index. This reference numbering system is designed to be consistent with the Office of Solid Waste and Emergency Response (OSWER) Directives System which generally follows the organizational structure of the Code of Federal Regulations.

Each document reference number consists of a prefix of four digits preceding a decimal point and additional numbers in various forms following the decimal point. The basic form used for numbering the Compendium documents is illustrated below:

XXXX.1986(09)

XXXX = Subject category number

1986 = The year of issue of the document

(09) = Chronological number within the year of issue and the subject category.

This document would be the ninth document of 1986 in the category XXXX.

Subject Category Prefix

The first four digits indicates the document reference number to the subject category into which the document has been classified, based on the structure of the RCRA regulations including Subtitles C, D and J. Each subject category refers to a subsection of the RCRA regulations or relevant statutory issue (such as Waste Minimization). Thus, a document is assigned a four digit category number based on the sub-section of the regulations or the issue which is addressed in the document. Appendix II of this Users' Guide lists the subject category numbers and identifies, if appropriate, the 40 CFR Part or subpart associated with each number. As demonstrated in Appendix II, there are a number of sections within the OSWER Directives that are "Reserved." These sections correspond to regulations which do not exist at this time.

All documents assigned to any one category number are located together in the reference volumes under the appropriate category number. Within each category, documents are ordered chronologically.

Document Specific Suffix

The numbers found after the decimal point of the reference number indicate the year and, within the year, the chronological order in which the document was issued.

DELETED REFERENCE DOCUMENTS AND SUMMARIES

Since the original compilation of the Compendium a number of documents have been deleted because they are now out-of-date or replaced by a more recent document. As a result, there will be a missing number in the chronological numbering of the documents and summaries where a document has been deleted.

LOCATING INFORMATION

The Compendium is a reference tool that can be used in two ways, depending on the needs of the user. Information may be found referring to individual subject category sections or by using the key word index.

In reviewing individual subject categories, the user will be able to find all documents concerning a specific subject. Alternatively, by referring to the key word index, the user may locate the exact document of interest without reviewing all documents in the category. As noted earlier, the key word index also serves to remind the user of other topics which may be relevant to the particular issue in question. Appendix III contains a list of available keyword and subkey words that are in the index.

Asterisks

The document titles preceded by an asterisk in the key word index are excerpts from RCRA Hotline summaries. These are so marked so as to clearly differentiate them from the letters and memoranda.

DISCLAIMER

The compilation of documents in this Compendium, as well as the policies, procedures and interpretations outlined in the documents themselves, is intended solely for the guidance of employees of the U.S. Environmental Protection Agency. This compilation may not include all documents discussing Agency views on particular subjects. In addition, these documents are not intended and cannot be relied upon to create any rights, substantive or procedural, enforceable by any party in litigation with the United States. The views expressed in these documents do not necessarily reflect the current position of the Agency, and EPA reserves the right to act at variance with these views or to change them at any time without public notice.

APPENDIX I
Loading, Indexing and Searching
in dBase III Plus

Loading and using the keyword index on dBase III Plus

The keyword index has been divided into 2 files due to size. These files should be merged and saved on the computer hard drive to allow the entire document to be indexed and searched. The following instructions will allow the user to merge the files together and save the files as one file on the computer hard drive.

Insert disk labelled COMP2.DBF into disk drive.

Type: [source drive] > copy COMP2.DBF to [target drive]

Enter dBase III Plus. Typically, this is done by typing either "dBase" or "db" at the prompt.

The system will display a copyright screen and will prompt the user to press [ENTER]

Press [ENTER] key

— Use the menu to retrieve "COMP2.DBF" —

1. The cursor arrows should be used to highlight "SET UP" on the menu
2. Press [ENTER] key to access the database file.
3. Use cursor key to identify the drive where the file is located and Press [ENTER].
4. Highlight "COMP2.DBF" and Press [ENTER]
The computer will ask if the file is indexed? Press [N]

The file is now retrieved.

COMP1.DBF must now be merged with COMP2.DBF. (The COMP2.DBF file should already be open)

Press [ESC] to receive dBase dot prompt

Type: APPEND FROM [source drive]: COMP1.DBF

This will add the records in COMP1.DBF to COMP2.DBF

"COMP2.DBF" will now be the file name for entire keyword index on the hard drive.

The index can now be indexed or searched in its entirety.

INDEXING

dBase III Plus is a management system which allows the user to organized and manipulate data. When "compend.dbf" is retrieved without indexing, it is in the order that the data elements were entered. To manipulate the data fields for each record entry, the file must be indexed.

To index the file as it appears in the key word index of Vol. I

1. Press [ESC] at the menu headings until the dot prompt appears.
2. Type
[INDEX ON SUBSTR[KEYWORD,1,25]+
SUBSTR[SUBKEYWORD,1,25]+
SUBSTR[TITLE,1,30] to KEY.NDX]
The file will index to 100%

3. Press [F2] to return to dBase menu

The file is now indexed and the user can browse through the file in the manner it is presented in Volume I.

Searching

dBase III Plus allows the user to search for particular data elements within the file. Therefore, if the user knows the date of a memo, the file can be searched for all the memos written on a specific date. This can be done for all the data fields (KEYWORD, SUBKEYWORD, IDNUMBER, TITLE AND DOCDATE).

To SEARCH for specific memos:

Press [F2]
Select Retrieve Menu
Select Display
Select Build A Search Condition
Select Field name [options include — KEYWORD, SUBKEYWORD,
IDNUMBER, TITLE, DOCDATE]
Select = Equal to
Type [Search Condition, e.g., 10/02/91], press [ENTER]
Select No More Conditions
Select Execute Command

The system displays the record numbers for all the memos dated 10/02/91

For more information on data manipulation, indexing, and searching consult a dBase III Plus Reference Book.
