Contract Opportunities Under Superfund

Subcontracting opportunities are available under several current Superfund contracts. The contracts fall into five basic categories:

- **Removal Action:** Contracts to provide EPA regional offices with (1) technical and management assistance for the removal action program financed by the Hazardous Substance Response Trust Fund, the corrective action program financed by the Underground Storage Tank (UST) Trust Fund, and the oil spill prevention program under the Clean Water Act and (2) cleanup personnel, equipment, and materials for the removal program and corrective actions financed by the UST Trust Fund.
- **Remedial Response:** Contracts to provide EPA regional offices with technical assistance and resources for cleanup activities, support of enforcement actions, and community relations
- **Support Services:** Contracts to provide special technical support services to EPA regional and Headquarters personnel. Contracts cover safety and technical training, demonstration of new or novel technology, laboratory analysis and sample control, quality assurance, aerial survey and mapping and remote sensing.
- **Technical Enforcement Support:** Contracts to provide technical support to EPA Headquarters and regional personnel to enforce CERCLA and the Resource Conservation and Recovery Act (RCRA).
- **Policy, Program Management, and Administrative Services:** Headquarters contracts to support formulation of Superfund policy and implementation, as well as contracts for development and maintenance of automated data processing (ADP) systems and data handling services at Headquarters and the regional offices.

Listed below are the specific contracts currently under the Superfund program. The contracts listed in each category are those in effect at the date of the publication of this Guide.

BACKGROUND

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, commonly known as "Superfund," was established to clean up hazardous waste sites that threaten human health or the environment. The Superfund Amendments and Reauthorization Act of 1986 (SARA), signed on October 17, 1986, amended CERCLA. The U.S. Environmental Protection Agency (EPA) has the primary responsibility for managing cleanup and enforcement activities under Superfund.

The passage of SARA:

- Reauthorized CERCLA for 5 years. A three-year extension to SARA was signed on November 7, 1990, and authorized CERCLA until 1994. *[The Program was extended by Congress and reauthorization of the Program is currently being debated.]*
- Strengthened and expanded the cleanup program.
- Increased the size of the Hazardous Substance Response Trust Fund. CERCLA authorized \$1.6 billion for cleanup during the first 5 years. SARA provides for \$8.5 billion during the second 5 years.
- Established a new Trust Fund to clean up leaking underground petroleum storage tanks.

Under Section 104 of CERCLA, EPA can act "whenever (a) any hazardous substance is released or there is a substantial threat of such a release into the environment, or (b) there is a release or substantial threat of release into the environment of any pollutant or contaminant that may present an imminent and substantial danger to the public health or welfare, CERCLA broadly defines two types of responses:

- Short-term removal actions involving spills or other emergencies requiring immediate response.
- Longer-term remedial responses aimed at providing more permanent solutions to problems at uncontrolled hazardous waste sites.

EPA's Office of Emergency and Remedial Response (OERR) places a high priority on full implementation of the Superfund program. The task is challenging, requiring a working relationship between the Federal Government and the States, as well as a system of accountability to industry and the American taxpayer for the efficient and effective management of the two trust funds. The private sector has a key role to play in the implementation of CERCLA because much of the work will be performed by private contractors.

New Acquisition Strategy for Superfund

On September 9, 1990, EPA issued its Long-Term Contracting Strategy (LTCS) for the Superfund program. The Agency's objectives in developing the strategy were to analyze the long-term contracting needs of the program, and to design a portfolio of Superfund contracts to meet those needs over a ten year period. This strategic planning effort was recommended by the 1989 Agency report, A Management Review of the Superfund Program.

LTCS was built on several key principles. First, the strategy supported an integrated "One Program" approach to enforcement and site cleanup. Second, the strategy enhanced the competitive environment by reducing the size of contracts and creating more opportunities for small and disadvantaged businesses. Finally, the strategy provided mechanisms for greater flexibility and improved oversight and cost management by giving the regions full responsibility for contracts management.

Since the first of the LTCS contracts begins to expire in 1998, EPA has established an Agency-wide Contracts 2000 Workgroup to develop a new Superfund Acquisition Strategy for the years 2000 and beyond. The central charge of this group is to make recommendations on the appropriate mix of contracts to best meet future program needs.

The workgroup is comprised of program and contracts representatives from EPA's ten Regions, the Office of Solid Waste and Emergency Response, the Office of Administration and Resources Management, and the Office of Enforcement and Compliance Assurance. The group is taking into account what did and did not work well under LTCS and is evaluating the future direction of the Superfund program (including changing budgets, reauthorization, and a increased State role) in order to craft an appropriate suite of contracts for the future. The goal of the group is to promote national consistency and efficiency and effectiveness, while at the same time providing the Regions with adequate flexibility to meet program needs and directions.

The objective of the Contracts 2000 Workgroup is to complete the new contracting strategy by January 1998. At that time, Headquarters and Regional Superfund Offices will begin to draft implementation plans to execute the strategy in the most effective and efficient way possible.

January 8, 1997

PROCUREMENT POLICY NOTICE NO. 97-01

SUBJECT: Required Practices Concerning Subcontracts

FROM: Betty L. Bailey, Director /S/
Office of Acquisition Management

TO: OAM Division Directors
Regional Contracting Officer Supervisors
Howard Corcoran, OGC

SYNOPSIS

SUMMARY: This Procurement Policy Notice (PPN) provides guidance on required procedures when consenting to subcontracts. This guidance addresses issues pertinent to both preaward and postaward subcontracts.

EFFECTIVE DATE: Date of issuance (shown above).

EXPIRATION DATE: Upon cancellation or until superseded.

FOR FURTHER INFORMATION CONTACT: Paul Schaffer on (202) 260-9032, or GroupWise Schaffer-Paul. [NOTE: As of August 19, 1997, Paul Schaffer's phone number is (202) 564-4366; e-mail address is Schaffer.Paul@epamail.epa.gov]

DETAIL

BACKGROUND

In response to an Office of Inspector General (OIG) audit of subcontract awards by EPA prime contractors and EPA's oversight of prime contractors' use and control of these subcontracts, the Office of Acquisition Management (OAM) agreed to issue guidance reminding contracting officers (COs) of required practices when consenting to subcontract. This guidance addresses issues pertinent to the preaward and postaward review of subcontracts. Subcontracts represent a unique contractual instrument in which the Government has no direct legal relationship with subcontractors, sometimes referred to as no "privity of contract" (defined as that relationship which exists between two contracting parties). There is essentially no relationship between the Government and its subcontractors. The prime contractor is selected for its technical and management abilities, including the right to manage the contract and subcontractors used in the performance of the contract. Prime contractors are responsible for planning, awarding, and administering subcontracts. However, COs play a key role in subcontract oversight, since they are responsible for the overall prime contract price and performance. COs are responsible for assessing the need for subcontracts, and the additional cost of subcontracting before granting consent. Before granting consent to a subcontract, COs review the adequacy of the prime contractor's cost and price analysis, and determine whether the proposed subcontract costs are realistic for the work to be done. Finally this PPN addresses consenting to subcontracts. Specifically, this PPN clarifies and supersedes three practices identified in a June 8, 1994, OAM memorandum concerning subcontracting: consenting by letter, ceilings, and increasing the estimated amount of subcontracts. In addition, two other practices regarding subcontracting consent are discussed: the role of the procuring contracting officer (PCO) and the administrative contracting officer (ACO) in the consent process, and the review of the proposed subcontract document. COs should refer to FAR Part 44 and this PPN for policies and procedures before granting consent to subcontract.

ROLES AND RESPONSIBILITIES

Before consenting to a subcontract, the CO reviews the request and supporting data and considers such factors as: technical need for services, compliance with the prime contract's goals for subcontracting with small disadvantaged business and women-owned business concerns, adequacy of competition, responsibility of the proposed subcontractor, proposed type and terms and conditions of the subcontract, and adequacy and reasonableness of cost or price analysis performed. The project officer (PO) reviews the prime contractor's request for subcontract consent, and provides comments to the CO on the technical need and appropriateness of the supplies or services, the reasonableness of the subcontract estimate in terms of level of effort, and types and quantities of proposed other direct costs; location, duration, number of travelers and purpose of proposed travel; skill level, labor mix, and direct labor hours to be expended; and the capabilities of the proposed subcontractor.

REVIEW OF PREAWARD SUBCONTRACTS

Preaward Team Subcontractors

Preaward team subcontractors are competed as part of the original prime contractor's proposal, which is subject to the competitive evaluation process. During preaward competition, the technical capability and costs of each prime and its subcontract teams are evaluated as a combined entity, which is evaluated against other prime offerers' contract teams. Selection for award is based on the management abilities of the prime contractor, and the combined technical capabilities and price of the prime and its subcontract teams. The CO does not need to comply with FAR Subpart 44.2 at the time of contract award, since team subcontracts are competed for subcontract consent purposes as part of the contractor's proposal, which is subject to the competitive evaluation process prior to award. Collusive Team Arrangements COs must be alert for restrictive bidding patterns where contractors may have agreements with other contractors not to compete or bid against each other for a prime contract to be awarded. In return, the contractor submitting a prime proposal may include other contractors as team subcontractors. For example, EPA contractors who are technically qualified to bid on the prime contract may choose to be proposed as a team subcontractor, perhaps at higher rates, and avoid the preparation of expensive prime proposals. Restrictive competition reduces the Agency's assurance that it is obtaining the most technically qualified prime contractor at the best price to the Government. Whenever such an arrangement is suspected, it should be referred to the OIG, since such practices may be a violation of the Antitrust Act.

II. REVIEW OF POSTAWARD SUBCONTRACTS

Consent

In general, unless consent requirements are waived as a result of the approval of the contractor's purchasing system pursuant to FAR Subpart 44.3 or otherwise exempted under the applicable FAR subcontract clause, subcontracts awarded after prime contract award require CO consent, and are subject to the requirements of FAR Part 44, "Subcontracting Policies and Procedures." FAR 44.202-2 lists several factors the CO must review and evaluate before granting consent. Reviewing the proposed subcontract is necessary to assure the following:

- ~ Was adequate price competition obtained or its absence properly justified?
- ~ Has the contractor performed adequate cost or price analysis?
- ~ Is there a sound basis for selecting and determining the responsibility of a particular subcontractor?
- ~ Does the subcontract contain required flowdown clauses?

Need For Subcontract

COs responsible for subcontract consent shall confirm with the PO on whether the technical skills provided by the subcontractor are needed, or are already provided under the contract by the prime or a team subcontractor. COs are responsible for reviewing the reasonableness of rates proposed by post-award subcontractors before granting consent to subcontract; prime contractors are accountable for performing cost or price analyses of proposed subcontractors.

Competition

If included in the contract, prime contractors must adhere to FAR Clause 52.244-5, "Competition in Subcontracting," where the contractor shall select subcontractors on a competitive basis to the maximum practical extent consistent with the objectives and requirements of the contract. COs may only accept justifications for sole source awards if the prime contractor provides substantive evidence that no other responsible party exists, or there are circumstances of unusual and compelling urgency. Statements of uniqueness, including requirements for geographical location, site specific experience, or that the offeror is the only available source, are not an acceptable justification for sole source subcontracting unless adequate documentation is submitted by the prime contractor. In addition, EPA experience or incumbent contractor status rarely should qualify as uniqueness under such sole source awards, absent other supporting factors. Further, lack of planning is not an adequate justification for sole source awards. COs are encouraged to work with the PO to allow prime contractors sufficient time to compete post-award subcontracts, if the prime contractor chooses to subcontract.

Subcontract Consent Documentation

One practice affirmed in the June 8, 1994, OAM memorandum, "Required Practices Concerning Subcontracts," was to identify each subcontract in the contract. For some contracts this is not administratively feasible. Because of the volume in Superfund contracts, for example, non-team subcontracts are usually consented to by letter. In recognition of these circumstances, COs may provide consent by letter for non-team subcontractors under any contract. Another practice required under the June 8, 1994, memorandum was to identify the ceiling amount in the contract for each listed subcontract. Some COs instead establish an aggregate ceiling for all subcontracts, rather than identify a ceiling for each subcontract. This raised the broader question of the necessity of establishing subcontract ceilings in Agency subcontracts. Since the estimated amount of the subcontract is covered by the CO's consent, the identification of a ceiling is technically redundant. Therefore, COs are no longer required to identify subcontract ceiling amounts in contracts. This PPN impacts yet another practice in the June 8, 1994, memorandum, of requiring a formal contract modification when consenting to an increase in the estimated amount of a subcontract. Accordingly, COs may now consent to increases in the estimated amount of subcontracts by letter or by contract modification. However, there are circumstances where it may be appropriate for the PCO to forward the contract file to the ACO without taking action on the request for subcontract consent. In cases where action is not taken, the PCO shall annotate the file on the consent request. An example could be the unavailability of an approved indirect cost rate for a subcontractor. Given the time incident to obtaining an audited rate, it would be more appropriate for the PCO to transfer the file to the ACO without taking further action. Another example is when the proposed subcontract will not be available for PCO review within a reasonable period of time after contract award. In such cases the PCO shall annotate the file as to why no action was taken on the consent request. If practicable, the PCO should consent to team subcontractors. Having already evaluated the team subcontracts from a technical and financial standpoint, the PCO is clearly the most appropriate individual to provide or deny subcontract consent in the initial contract, if the proposed subcontract has been included in the proposal. COs should not consent to subcontracts without reviewing the request and supporting data. The review of the subcontract is necessary to assure that the proposed rates, fee, and estimated cost or fixed price amount have been incorporated; the required flowdown clauses have been included; and the payment terms are appropriate. Further, FAR 44.202-2 sets forth factors COs must consider before consenting to subcontracts, some of which require review of the subcontract itself.

Directed Subcontracting

Government personnel are prohibited from directing prime contractors to contract with specific firms, or to assist a prime contractor in selecting subcontractors, or personnel to be used on a subcontract. The underlying reason is that prime contractors are selected, in part, for their management abilities, including subcontract selection and management. COs, with PO assistance, are required to review prime contractor consent requests, including the statement of work, for evidence of directed subcontracting and to decline consent where such evidence exists. If evidence exists of directed subcontracting, the CO is responsible for denying the prime contractor's request to subcontract.

Checklist

In order to assist the CO in evaluating a subcontract consent request, a Subcontract Consent Review Checklist (Attachment 1) is provided as suggested guidance for use by the CO. The checklist contains many issues the CO should consider before consenting to subcontract.

Attachment

Attachment 1

SUBCONTRACT CONSENT REVIEW CHECKLIST

Prime Contractor: _____ Contract #: _____
 Proposed Subcontractor: _____
 Type of Subcontract: _____
 Maximum Subcontract Value: _____
 Period of Performance: _____

Note: Subcontract consent may not be required depending on contract type and whether the contractor has an approved purchasing system.(See FAR Subparts 44.2 and 44.3)

<u>Areas of Consideration</u>	<u>YES</u>	<u>NO</u>	<u>N/A</u>	<u>Comments</u>
1. Is the subcontract for special test equipment or facilities that are available from Government sources?	___	___	___	
2. Is the selection of the particular supplies, equipment or services technically justified?	___	___	___	
3. Are the subcontractor skills needed?	___	___	___	
4. Are the rates proposed for subcontractors reasonable?	___	___	___	
5. Will the subcontractor assist the prime contractor in complying with its goals contained in the prime contractor's small business and small disadvantaged business subcontracting plan?	___	___	___	
6. Has the contractor obtained adequate price competition or justified its absence?	___	___	___	
7. Does the contractor have a sound, documented basis for selecting and determining the responsibility of the subcontractor?	___	___	___	
8. Did the contractor adequately assess and dispose of the subcontractor's alternate proposals, if offered?	___	___	___	
9. Is the proposed subcontract type appropriate for the risks involved and consistent with the FAR?	___	___	___	
10. Has the contractor performed adequate cost or price analysis, and obtained current cost or pricing data (if applicable), including the required certificates?	___	___	___	
11. Has adequate consideration been obtained for any proposed subcontract that will involve Government-furnished facilities not previously authorized in the contract?	___	___	___	
12. Has the contractor adequately and reasonably translated prime contract technical requirements into subcontract requirements?	___	___	___	

- 22. General comments:**

In accordance with this review, consent to award the subcontract is hereby recommended.

REMOVAL ACTION

Emergency and Rapid Response Services Contracts

To provide emergency, time-critical removal, and quick remedial response cleanup services for the CERCLA, OPA and UST programs, EPA uses the Emergency and Rapid Response Services (ERRS) contracting network. These contracts may also be called upon to provide cleanup support in instances of natural disasters, such as floods, and to repatriate hazardous wastes from foreign countries. The network currently consists of one zone contracts (Regions VI, VIII, and IX) plus Region-specific ERRS contracts. These contracts provide cleanup personnel, equipment, and materials as directed by the EPA On-Scene Coordinator to, for example, contain, recover, or dispose of hazardous substances, analyze samples, and site restoration.

The broad range of cleanup services needed and the rapid time frame within which the contractors must respond make it likely that the contractors will do substantial subcontracting, particularly in areas such as transportation and disposal of hazardous wastes and analytical services.

The National Designated Lead for ERRS is:

FAX (206) 553-0175, E-mail: sink.gary@epamail.epa.gov

REMOVAL ACTION

Superfund Technical Assessment & Response Team (START) Contracts

The START program was developed under EPA's Long Term Contracting Strategy (LTCS) and combines the previously separate support activities of the Field Investigation Team (FIT) and Technical Assistance Team (TAT) into a single contract. The START contracts provide technical support to EPA's site assessment activities and response, prevention and preparedness activities. This support includes gathering and analyzing technical information, preparing technical reports on oil and hazardous substance investigation and technical support for cleanup efforts. Each Region has one START contract with the exception of Region III. Region III has a similar contract called Site Assessment/Technical Assistance (SAT) contract.

The National Designated Lead for START is:

Patricia Hawkins
Contracts Management Center (5203G)
Office of Emergency and Remedial Response
U.S. Environmental Protection Agency Headquarters
401 M Street, SW
Washington, D.C. 20460
Phone: (703) 603-8714
Fax: (703) 603-9116
E-Mail: hawkins.patricia@epamail.epa.gov

NOTE: Period of Performance reflects Base Period plus any Option Periods, if exercised.

For more information contact:

REMOVAL ACTION

Site Specific Removal Contracts

Occasionally, the removal program has sufficient time to complete the cleanup of a specific release. In such cases, the contract requirement is advertised in the Commerce Business Daily (CBD). All interested contractors may submit a bid or proposal. Resultant contracts are competitively awarded. Subscriptions to the CBD can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402-9371, Phone (202) 512-1800, or accessed via Internet at www.govcon.com.

Region 7 (IA, KS, MO, NE) (US EPA Region 7, 726 Minnesota Avenue, Kansas City, KS 66101)

Contractor: Ecology and Environment, Inc., 6405 Metcalf, Cloverleaf Building #3,
Overland Park, KS 66202
Contract Number: 68-W6-0012
Period of Performance: 12/18/1985 - 12/18/2000

FAX (202) 553-0124, E-mail: sink.gary@epamail.epa.gov

REMEDIAL RESPONSE

Response Action Contracts

The Response Action Contracts (RACs) provide professional architect/engineering services to the U.S. Environmental Protection Agency (EPA) to support response planning and oversight of activities under the Comprehensive Environmental Response Compensation and Liability Act of 1980 (CERCLA) as amended by the Superfund Amendments and Reorganization Act of 1986 (SARA). The contracts are being procured as the Regions deplete capacity of their existing Alternative Remedial Contracting Strategy (ARCS) contracts.

Services provided by RACs include: program support (management); remedial investigation and feasibility studies; engineering services to design remedial actions; engineering evaluations and cost analyses for non-time-critical removal actions, including issuing and managing subcontracts for construction of the selected remedy, and engineering services for construction oversight. RACs services also include enforcement support, including oversight of the remedial investigations/feasibility studies, remedial designs, and remedial actions, and negotiation support; and other technical assistance, including community relations, sampling and analytical support, and pre-design investigations. Services may also include technical and management services supporting EPA's coordination and/or oversight of remedial activities performed by a State, the U.S. Army Corps of Engineer, or responsible parties identified in enforcement actions. RACs services do not include Federal facilities oversight.

The National Designated Lead for RACs is:

Nancy Ortowski
Contracts Management Center (5203G)
Office of Emergency and Remedial Response
U.S. Environmental Protection Agency Headquarters
401 M Street, SW
Washington, D.C. 20460
Phone: (703) 603-8785
Fax: (703) 603-9116
E-Mail: ortowski.nancy@epamail.epa.gov

The RACs procurement for this Region is in the planning process. Please contact: David Boyd,
(202) 564-4472, FAX (202) 565-2557, E-mail: boyd.david@epamail.epa.gov.

SUPPORT SERVICES

Contract Laboratory Program

The Contract Laboratory Program (CLP) provides a range of state-of-the-art chemical analytical services of known and documented quality on a high volume, cost-effective basis to support ongoing Agency enforcement, emergency response and remedial actions, site investigations, and state-lead assessments. The CLP supports the Environmental Protection Agency's Superfund effort. The CLP provides analytical services to support Superfund field activities from a preliminary site inspection to more complex large scale remedial, monitoring and enforcement actions. On the average, the CLP provides over 3,000 sample analyses per month through its routine analytical programs. Each sample processed by the CLP must be properly documented to ensure timely, correct, and complete analysis for all parameters requested. The CLP documentation system provides the means to monitor each sample from the point of collection through final data reporting.

SUPPORT SERVICES

Environmental Response Training Program Contract

EPA provides response, health and safety, and technical training to federal, state, and local government groups. This training is accomplished through the Environmental Response Training Program (ERTP) contract. ERTTP is a dedicated resource and provides ERT with the ability to bring a wide range of training to over five thousand students each year at over 200 presentations of the 18 ERT courses. Many of these courses are given throughout the country, and their curriculum is adapted to the specific needs of their trainees.

SUPPORT SERVICES

Environmental Services Assistance Team (ESAT) and Regional Environmental Services Assistance Team (RESAT) Contracts

The Environmental Services Assistance Team (ESAT) contract structure was developed to expand EPA's existing capabilities for providing hazardous waste sample analysis and related support to Superfund sites. Although primarily a Superfund vehicle, ESAT also supports the Agency's RCRA program and other non-Superfund analytical efforts. These contractors provide multidisciplinary technical teams to each Region within their respective areas. The teams perform chemical and biological analysis, Field Analytical Screen Project activities, specialized analytical services support and data validation/data review support, review of site-specific quality assurance, site investigation and sampling plans support for the development of new analytical methods, and logistical and administrative functions.

The four ESAT contracts provide analytical support within a designated zone or Region. The Eastern and Western Zone contracts are referred to as ESAT contracts while contracts managed by the Regions and Headquarters are called Regional Environmental Services Assistance Team (RESAT) Contract.

The Contracting Officer and the Project Officers for the above Zone Contracts are located in EPA Headquarters. Address is:

U.S. Environmental Protection Agency Headquarters
401 M Street, SW
Washington, D.C. 20460

For more information contact:

SUPPORT SERVICES

Quality Assurance Technical Support

This contract provides quality assurance technical support to the Analytical Operations Branch (AOB)/Superfund, specifically by providing quality assurance reference and performance materials, and evaluation and improvement of quality assurance/quality control and analytical data. The contract has seven task areas:

- Development, testing, and production of Performance Evaluation Materials, Reference Materials and Standards.
- Evaluation, improvement, creation, and standardization of existing and yet-to- be written Analytical and quality assurance/quality control methods and equipment, including equivalency testing.
- Assistance in technical assessment of laboratory performance.
- Creation, development, and review of quality assurance and method guidelines, plans, and documents.
- Statistical evaluation of data and development of models of analytical performance.
- Tape and Data Package Review, for contract compliance and technical acceptability
- Other quality assurance task-related activities.

For more information, contact:

Contractor:	ICF Kaiser, Inc., 2700 Candler Avenue, Las Vegas, NV 89120
Contract Number:	68-D5-0002
Period of Performance:	11/15/1994 - 11/14/1999
Contractor's Point of Contact:	Judith Gebhart, Project Manager, Phone (702) 795-0015, FAX (702) 795-8210, E-mail: JGehart@icfkaiser.com

SUPPORT SERVICES

Remote Sensing and Mapping Support

The EPA's Office of Research and Development has established a nationwide contract program to use remote sensing and mapping technology in support of EPA Regional and Program offices. The program provides operational support to on-going activities of the Agency as well as support to R&D efforts occurring at various EPA laboratories. The contract is overseen by remote sensing scientists and offers remote sensing data acquisition, processing, and analysis support for site-specific regional assessments. EPA offices requiring remote sensing or mapping support fund the activity on a reimbursable basis. The contract offers aerial photo and satellite imagery analysis; thematic mapping and GIS support; photogrammetry (the technique for making highly accurate measurements on aerial photos); emergency response; and enforcement support.

For more information, contact:

Contractor:	Lockheed Environmental Systems and Technology, 1200 Smith Street, Suite 800, Houston, TX 77002
Contract Number:	68-C5-0065
Period of Performance:	9/12/1995 - 9/11/2000
Contractor's Point of Contact:	Dr. William Hodson, Program Manager, 980 Kelly Johnson Drive, Las Vegas, NV 89119, Phone (702) 897-3247, FAX (702) 897-3285, E-mail: whodson@lmepo.com
EPA's Contracting Officer:	Christopher Baker, US EPA, ORD Service Center, Contracts Management Division, 79 T.W. Alexander Drive, Research Triangle Park, NC 27709, Phone (919) 541-4364, FAX (919) 541-0611, E-mail: baker.christopher@epamail.epa.gov
EPA's Project Officer:	Susan Jackson, US EPA, Environmental Sciences, 944 E. Harmon Ave., Las Vegas, NV 89119, Phone (702) 798-2244, FAX (702) 798-2692, E-mail: jackson.susan@epamail.epa.gov

SUPPORT SERVICES

Response Engineering and Analytical Contract

The Response Engineering and Analytical Contract (REAC) is designed to support activities performed by the EPA's Environmental Response Team (ERT) under the authority of CERCLA/SARA, the Resource Conservation and Recovery Act (RCRA), the Toxic Substances Control Act (TSCA), the Clean Water Act (CWA), and other acts.

REAC's function is to provide the most effective use of techniques and technologies for the remediation of hazardous waste sites and spills. Response to releases of hazardous materials at spills and abandoned waste sites is REAC's major function. Response activities include, but are not limited to, field investigations and report writing for the following types of studies: multimedia extent of contamination, bioassessment, treatability, contaminant transport, engineering/feasibility, and risk assessment. These studies are conducted to assist the ERT in providing support to EPA regional On-Scene Coordinators (OSCs) and Remedial Project Managers (RPMs) for removal and remedial actions, respectively.

The REAC contractor also performs evaluation and/or engineering design studies of innovative commercially available technologies. The objective is to confirm and document the performance of these technologies. The contractor performs these studies for regional OSCs and RPMs for removal or remedial actions. The actions of REAC allow the OSCs and RPMs to proceed with chosen treatment options for contaminated wastes.

To support the field and engineering studies, the REAC contractor provides analytical services. This includes on-site and mobile laboratory capability. The REAC contractor conducts rapid analyses of complex waste mixtures and environmental samples and develops analytical methodologies for on-site and field laboratory equipment.

The contract has a base period from June 1, 1994 through May 31, 1996 and three one year options. The option periods are from June 1, 1996 through May 31, 1997, June 1, 1997 through May 31, 1998 and June 1, 1998 through May 31, 1999.

ENFORCEMENT SUPPORT SERVICES
to be added

POLICY, PROGRAM MANAGEMENT AND ADMINISTRATIVE SERVICES

Management and Analytical Support Contracts

The Superfund Management and Analytical Support contracts support EPA in the planning, management, implementation, and evaluation of the Superfund and Oil programs. The scope of work covers a range of technical, economic, regulatory development, and implementation support activities. Specifically the contract Statement of Work encompasses the following areas:

- ~ Strategic Planning
- ~ Interface with ADP Computer Systems
- ~ Superfund Comprehensive Accomplishments Plan (SCAP)
- ~ Budget /Workload Model
- ~ Superfund Response Workload Model
- ~ Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- ~ Oil and Hazardous Material Technical Assistance Data (OMHTADS)
- ~ Communications Outreach
- ~ Data information Collection/Analysis/Survey
- ~ Guidance Support
- ~ Training
- ~ Program Planning
- ~ Seminars/Conference Support
- ~ Regulation/Legislative Analysis
- ~ Graphics Support

POLICY, PROGRAM MANAGEMENT AND ADMINISTRATIVE SERVICES

Technical and Analytical Support Contracts

The Technical and Analytical Support Contracts provide support in engineering analyses, data retrieval, compilation, and evaluation; cost engineering, economic benefit and impact evaluation; and statistical, scientific, statutory and regulatory analyses in support of planning, management, implementation and evaluation of the programs needs. Capabilities include:

- Research and analysis of technical data, and report preparation on issues such as cost pricing, human health, risk, and ecological evaluations, resource utilization remedial engineering and coordination with State and Tribal programs.

- Evaluation of existing policies and procedures in the context of function, effectiveness, and options for improvement; review of guidance documents, user guides and manuals to conduct comparative analyses, integrate and enhance text, and to support the development of new guidance documents.

- Development of technical reports on hazardous substance and oil investigation, assessment remediation, disposal and process activities, problems and trends.

Contractor: Tetra Tech Environmental Management, Inc., 1593 Spring Hill Road, Suite 300, Vienna, VA 22182
Contract Number: 68-W5-0055
Period of Performance: 12/15/94 - 12/14/98
Contractor's Point of Contact: Mark Johnson, Phone (703) 287-8884, FAX (703) 287-8910, E-mail: johnsom@ttemi.com
EPA Contracting Officer: Jewel Carter, US EPA Headquarters, Mail Code 3805R, 401 M St., SW, Washington, D.C. 20460, Phone (202) 564-1048, FAX (202) 565-2557/8, E-mail: carter.jewel@epamail.epa.gov
EPA's Project Officer: Thomas R. DeKay, US EPA Headquarters, Mail Code 5102G, 401 M St., SW, Washington, D.C. 20460, Phone (703) 603-7193, FAX (703) 603-9135, E-mail: deokay.thomas@epamail.epa.gov

OSWER Mission Support Contract

This contract obtains the analytical, technical, and management support services of a contractor to provide technical assistance to various programs of the Environmental Protection Agency's Office of Solid Waste and Emergency Response (OSWER). The contract provides support in the preparing and conducting analytical studies of OSWER program strategies and regulatory initiatives. The overall goal of this effort provides OSWER with the support required to analyze programmatic options and design appropriate systems and potential procedures to improve OSWER programs. This contract also provides for the conduct/delivery of other technology transfer activities, including seminars, formal meetings, electronic bulletin boards, information bulletins, and the OSWER Exhibits program.

Contractor: Environmental Management Support, Inc., 8601 Georgia Avenue, Suite 500, Silver Spring, MD 20910
Contract Number: 68-W6-0014
Period of Performance: 2/1/96 - 1/31/2000
Contractor's Point of Contact: Jan Bassin, President, Phone (301) 589-5318, FAX (301) 589-8487, E-mail: jbassin@emsus.com
EPA Contracting Officer: Eben Greybourne, US EPA Headquarters, Mail Code 3805R, 401 M St., SW, Washington, D.C. 20460, Phone (703) 603-0601, FAX (703) 603-0106, E-mail: greybourne.eben@epamail.epa.gov
EPA's Project Officer: Thomas R. DeKay, US EPA Headquarters, Mail Code 5102G, 401 M St., SW, Washington, D.C. 20460, Phone (703) 603-7193, FAX (703) 603-9135, E-mail: deokay.thomas@epamail.epa.gov

POLICY, PROGRAM MANAGEMENT AND ADMINISTRATIVE SERVICES

RCRA/Superfund Industrial Assistance Hotline

This contract provides a hotline that quickly responds to questions related to the RCRA and CERCLA programs. The hotline is the mechanism for EPA's response to inquiries from the public and regulated community. The contractor is responsible for implementing, updating, and maintaining an automated document list that contains current RCRA and CERCLA documents, and incorporating the EPA library publications in order to accurately accommodate telephone and written document requests.

Some of the specific tasks conducted under the Hotline contract include the following:

- Preparation of the caller-trend analysis.
- Maintenance of logbooks that record information on the calls received.
- Development and preparation of form letters for dissemination in response to written questions for documents by the public and industry.

For further information, contact:

Contractor:	Booz-Allen & Hamilton, Inc., 1725 Jefferson Davis Highway, Crystal Square 2, Arlington, VA 22207
Contract Number:	68-W6-0016
Period of Performance:	4/1/1997 thru 3/15/2001
Contractor's Point of Contact:	Amy Norgren-Salfi, Program Manager, Phone (703) 412-3367, FAX (703) 412-3333, E-mail: Norgren_Salfi_Amy@bah.com
EPA Contracting Officer:	Eben Greybourne, US EPA Headquarters, Mail Code 3805R, 401 M St., SW, Washington, D.C. 20460, Phone (703) 603-0601, FAX (703) 603-0106, E-mail: greybourne.eben@epamail.epa.gov
EPA's Project Officer:	Judi Kane, US EPA Headquarters, Mail Code 5305W, 401 M St., SW, Washington, D.C. 20460, Phone (703) 308-7893, FAX (703) 308-7904, E-mail: kane.judith@epamail.epa.gov

OTHER CONTRACT VENUES

EPA's OIL SPILL PROGRAM

The Environmental Protection Agency has the Federal Government's authority to prevent, prepare for, and respond to oil spills for the inland areas (fresh water) of the United States. EPA maintains the last line of oil spill response capability when the abilities of the State and local governments are overwhelmed. EPA must also be prepared to act in the event of a disastrous oil spill which may impact public health and safety. The Office of Emergency and Remedial Response's Oil Spill Prevention Program has three areas of responsibility: Prevention, Preparedness; and Response.

PREVENTION: EPA's Oil Spill Prevention Program is also known as the Spill Prevention, Control and Counter measures (SPCC) program. The Clean Water Act (as amended by the Oil Pollution Act of 1990 (OPA)), gives EPA the jurisdiction over non-transportation related facilities to prepare and implement SPCC plans which discuss steps taken to prevent and contain oil spills before they enter waters of the United States. Most facilities are located in environmentally sensitive areas or areas where spills could impact U.S. waters, public health and the environment.

PREPAREDNESS: EPA's Oil Spill Prevention Program was significantly strengthened by OPA which was enacted in the wake of the infamous Exxon Valdez oil spill in Alaska. OPA requires certain improvements to the National Response System to ensure more effective oil spill response. A comprehensive oil spill planning and response system was established under OPA. On a National level, the Federal Government is required to direct all public and private response efforts for large spills. State and local governments, responding to spills in specific geographical areas, participate with federal agencies in Area Committees which are required to develop "Area Contingency Plans". For individual oil storage facilities, OPA requires certain higher risk facilities to develop their own "Facility Response Plans."

RESPONSE: In the aftermath of an oil spill, responders have only hours to consider and determine appropriate cleanup actions. The importance of quick and accurate decisions and actions places a critical reliance on the integrated approach of preventing and preparing for oil spills to improve the effectiveness of oil spill response. The national response system, a cooperative effort involving a broad spectrum of government and private parties, coordinates all such actions. EPA and Coast Guard share Federal response jurisdiction, with EPA handling spills in the inland zone and Coast Guard handling the coastal zone.

OTHER CONTRACT VENUES

State/EPA Cooperative Agreements

Procurement opportunities may be available in States choosing to assume the lead in planning and carrying out the cleanup of a site under a Cooperative Agreement with EPA. The State can perform the work with its own resources, or it can contract for the needed goods and services with private firms. The opportunities are assisted by (FAR) 6.501 and 6.502, Competition Advocates and Duties and Responsibilities.

The types of contracts awarded vary by State. The major business opportunities are in these phases of remedial response: remedial investigation, feasibility study, remedial design, and remedial action.

For information as to potential contracting opportunities in State cleanup activities, contact State Environmental Protection agencies through:
