OFFICE OF RESEARCH AND DEVELOPMENT
U.S. ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

NOTES ON INFORMATION IN COUNTY COAL PROFILES

All production and employment data are from individual state reports for 1976 (see pp. 105-6 in main report for exact references).

Projections for increased production by 1985 are taken from the Bureau of Mines Information Circular 8725, Projects to Expand Fuel Sources in Eastern States (June 1976), not the 1978 update of this report. We have not subtracted a factor for the depletion of existing mines. These projections should thus be viewed as estimates on the high side.

All Illinois coal land ownership data are taken from the study of the Illinois South Project, Who's Mining the Farm. The Kentucky land ownership data on Harlan and Perry Counties are from a special study by Joe F. Childers, Jr. of the Appalachian Center. The West Virginia land ownership data are from Tom Miller, Who Owns West Virginia?, and Davitt McAteer, Coal Mine Health and Safety: The Case of West Virginia. For permission to use copyrighted material, we wish to thank The Illinois South Project, Inc.; The Huntington Publishing Company; and Holt, Rinehart and Winston.

No county breakdowns on producing companies are available for Virginia for 1976 or previous years. Such information may be available beginning with the 1978 Annual Report of the Virginia Department of Labor and Industry.
