MEMORANDUM

SUBJECT: State Program Advisory #4 -- State Program Changes
for Non-HSWA Cluster IV and HSWA II and Associated
Revisions to the SCRAM

FROM: Sylvia K. Lowrance, Director
Office of Solid Waste

TO: Addresses

Please find attached State Program Advisory (SPA) #4. This SPA's purpose is sixfold:

- (1) It delineates time frames by which States must obtain authorization for non-HSWA Cluster IV and HSWA Cluster II.
- (2) It provides eight additional checklists (Numbers 39 through 46), covering the period July 1, 1987 through June 30, 1988. Revision Checklists 39, 42, and 44 open HSWA Cluster II. Revision Checklists 40, 41, 43, 45, and 46 open and complete non-HSWA Cluster IV.
- (3) It provides revised portions of the SCRAM necessitated by adding eight new checklists. Specifically, these revisions include:
 - o Table A-1 of Appendix A (pages A-2a through 3.3-20).
 - o The Model Attorney General's Statement (pages 3.3-4 through 3.3-20).The new Table A-1 and Model Attorney General's Statement provided in this SPA, should replace these portions of the SCRAM.
- (4) It provides a new version of Revision Checklist 34, necessitated by changes in delegability which are part of the land disposal rule addressed by Revision Checklist 39.

- (5) It provides a new version of Checklist 29 which explains the relationship of this checklist to Checklist 46.
- (6) It outlines corrections to existing checklists that have been uncovered during the authorization review process. The SPA provides corrected versions of these checklists for substitution in Appendix A of the SCRAM.

The SPA itself is organized into three major subsections -- A, B and C, with Section A summarizing each of the Federal Register rules requiring a new revision checklist. Section B presents the revisions to the SCRAM necessitated by these checklists, and Section C outlines the changes and corrections to existing checklists. Attached to the SPA are the eight new revision checklists, the updated portions of the SCRAM, and updated versions of those existing checklists which have been corrected.

STATE PROGRAM ADVISORY # 4

A. STATE PROGRAM CHANGES FOR JULY 1, 1987 - JUNE 30, 1988

1. California List Waste Restrictions

Date: July 8, 1987, as amended Reference: 52 FR 25760-92
October 27, 1987 and 41295-96

Effective: July 8, 1987 and October 27, 1987

Summary: This rule restricts the land disposal of certain "California List" wastes, including liquid polychlorinated biphenyls (PCBs) above specified concentrations, and hazardous wastes containing halogenated organic compounds above specified concentrations. Additionally, this rule (1) codifies the statutory land disposal restrictions on certain California List corrosive wastes and, (2) establishes methods for determining compliance with this rule's prohibitions.

The land disposal restrictions framework, promulgated on November 7, 1986 (Revision Checklist 34), is also modified by this rule. Of particular concern to state authorization is that certain sections (i.e., 268.42(b), and 262.44), which were originally delegable to states are no longer considered delegable. With regard to 268.6--petitions of specific duration--EPA has decided in this rule to require that these be handled at EPA, as the Agency expects few such "no migration" petitions. However, in the future, states may be authorized to grant these petitions. Because the delegability of these sections has changed, states are not required to adopt these sections when Revision Checklist 34 is submitted.

State Authorization: This is a HSWA rule and will be included in HSWA Cluster II. The state modification deadline is July 1, 1991. Both interim and final authorization are available. The state revision application must include a revised program description, an AG statement addendum, an addendum to the MOA (if appropriate), Revision Checklist 39 and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

The addition of a paragraph to the beginning of Revision Checklist 34 is necessary to explain the effect of Revision Checklist 39. This change is addressed in Section C of the SPA.

2. List (Phase 1) of Hazardous Constituents for Ground-Water Monitoring

Date: July 9, 1987

Reference: 52 FR 25942-53

Effective: September 28, 1987

Summary: This rule amends the regulations concerning ground-water monitoring at RCRA land-based TSD facilities. It requires that an analysis of all the constituents in a new Appendix IX to Part 264 be performed on the ground water taken from wells surrounding those facilities.

State Authorization: This is a non-HSWA rule and will be included in non-HSWA Cluster IV. The state modification deadline is July 1, 1989 (note: the date given for authorization in the Federal Register is incorrect). Only final authorization is available. The state revision application must include a revised program description, an AG Statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 40, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

3. Identification and Listing of Hazardous Waste

Date: July 10, 1987

Reference: 52 FR 26012

Effective: July 10, 1987

Summary: This technical correction clarifies that it is the residue remaining in a container (or an inner liner) that may be a hazardous waste, not the container or the liner itself.

State Authorization: This is a non-HSWA rule and will be included in non-HSWA Cluster IV. The state modification deadline is July 1, 1989. Only final authorization is available. The state revision application must include a revised program description, an AG Statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 41, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

4. Exception Reporting for Small Quantity Generators of Hazardous Waste

Date: September 23, 1987

Reference: 52 FR 35894-99

Effective: March 23, 1988

Summary: On March 4, 1986, EPA promulgated final regulations for small quantity generators (addressed by Revision Checklist 23). This present rule modifies this previous rule, specifically imposing modified exception reporting requirements for generators of between 100 and 1000 kilograms of hazardous waste in a calendar month.

State Authorization: This is a HSWA rule and will be included in HSWA Cluster II. The state modification deadline is July 1, 1991. Both interim and final authorization are available. The state revision application must include a revised program description, an AG Statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 42, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

5. Liability Requirements for Hazardous Waste Facilities; Corporate Guarantee

Date: November 18, 1987

Reference: 52 FR 44314-21

Effective: December 18, 1987

Summary: Through an Interim Final Rule, effective September 9, 1986 and addressed by Revision Checklist 27, EPA allowed the use of a corporate guarantee as an additional financial responsibility mechanism. That rule is now being finalized with a number of minor revisions, including allowing use of the guarantee by firms incorporated outside the United States.

The standards promulgated in the July 11, 1986 (51 FR 25350) rule are less stringent than preexisting Federal requirements; thus, authorized states are not required to adopt them. However, authorized states that have already adopted or choose to adopt the July 11, 1986 Interim rule, addressed by Revision Checklist 27, must revise their program and adopt this present rule, as this rule is more stringent, in some respects, than the interim final rule.

State Authorization: This is a non-HSWA rule and will be included in non-HSWA Cluster IV. Only those authorized states that have already adopted or choose to adopt the July 11, 1986 (Checklist 27) Interim Final Rule must revise their program to reflect the changes in this checklist. The state modification deadline is July 1, 1989. Only final authorization is available. The state revision application must include a revised program description, an AG Statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 43, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

6. HSWA Codification Rule 2

Date: December 1, 1987

Reference: 52 FR 45788-99

Effective: December 1, 1987 for 264.100(e) introductory text,
264.100(e)(1) and (2), and 264.101(c)
December 31, 1987 for the remainder of the rule

Summary: This is a companion rule to EPA's July 15, 1985 final rule (Revision Checklist 17) codifying those HSWA requirements that took effect immediately or shortly after the enactment of these amendments. This present rule codifies further changes to existing corrective action and permitting provisions for RCRA facilities. Also included are provisions implementing corrective action requirements for releases beyond the facility boundary and for waste injection wells.

Since HSWA provides that states may seek authorization for selected provisions (instead of having to adopt all provisions simultaneously), this checklist has been divided into seven subsections: 44A Permit Application Requirements Regarding Corrective Action, 44B Corrective Action Beyond the Facility Boundary, 44C Corrective Action for Injection Wells, 44D Permit Modification, 44E Permit as a Shield Provision, 44F Permit Conditions to Protect Human Health and the Environment, and 44G Post-Closure Permits.

State Authorization: This is a HSWA rule and will be included in HSWA Cluster II. The state modification deadline is July 1, 1991 (note: the date given for authorization in the Federal Register is incorrect). Both interim and final authorization are available. The state revision application must include a revised program description, an AG statement addendum, an addendum to the MOA (if appropriate), Revision Checklists 44A-G (as appropriate) and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

7. Hazardous Waste Miscellaneous Units

Date: December 10, 1987

Reference: 52 FR 46946-65

Effective: January 11, 1988

Summary: This rule promulgates a new set of standards under Subpart X of Part 264 that are applicable to owners and operators of new and existing

hazardous waste management units not covered under the existing regulations. This rule will allow the Agency, and states adopting equivalent authorities, to issue permits to miscellaneous waste management units.

State Authorization: This is a non-HSWA rule and will be included in non-HSWA Cluster IV. The state modification deadline is July 1, 1989. Only final authorization is available. The state revision application must include a revised program description, an AG Statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 45, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. These revisions are addressed in Section B of this SPA.

8. Technical Corrections; Identification and Listing of Hazardous Waste

Date: April 22, 1988

Reference: 53 FR 13382

Effective: January 11, 1988

Summary: This rule makes technical corrections to the list of commercial chemical products that are hazardous wastes when discarded (261.33(e) and (f)), and to the lists of hazardous constituents (Appendix VIII of Part 261). In addition EPA has added hazardous waste numbers corresponding to substances listed in Appendix VIII that are also listed in 261.33(e) or (f).

Since this checklist makes extensive corrections to the lists which are part of Revision Checklist 29, states are advised to follow Revision Checklist 46 when revising their code, to avoid 1) making two separate revisions and 2) incorporating the extensive misspelling, CAS numbering, and format errors which are part of the lists given in the August 6, 1986 Federal Register (51 FR 28296) addressed by Revision Checklist 29.

State Authorization: This is a non-HSWA rule and will be included in non-HSWA Cluster IV. The state modification deadline is July 1, 1989. Only final authorization is available. The state revision application must include a revised program description, an AG statement Addendum, Addendum to MOA (if appropriate), Revision Checklist 46, and associated state regulations.

SCRAM Update: Updates to Table A-1 of Appendix A and to the Model Attorney General's Statement are necessary to reflect the addition of this checklist. Also, the existing Revision Checklist 29 has been changed to include a paragraph on its first page outlining this checklist's relationship to Revision Checklist 46. These revisions are addressed in Section B and C of this SPA.

3. REVISIONS TO SCRAM

The addition of eight new checklists necessitates revisions to Table A-1 of Appendix A, and to the Model Attorney General's Statement. These sections are included in Attachment B and should replace these parts in the most recent SCRAM.

Specifically, the revisions are as follows:

- The revised Table A-1 should replace pages 2-2a through A-2e of the SCRAM. Table A-1 was revised by adding non-HSWA Cluster IV and HSWA Cluster II to the cluster list on page A-2a as well as by adding these two clusters to the main body of the Table (i.e., pp. 2-2b through 2-2e). Revision Checklists 40, 41, 43, 45 and 46 were placed in non-HSWA Cluster IV. These are the only checklists in this cluster as these are the only non-HSWA Checklists occurring during the period July 1, 1987 through June 30, 1988. Revision Checklists 39, 42, and 44 open HSWA Cluster II. This cluster has two more years, and will close on June 30, 1990.
- The revised Model Attorney General's Statement should replace pages 3.3-4 through 3.3-20 of the SCRAM. Sections I-A(8), XV-G, and XV-H were revised and Sections VII-B & C; XII-C; XIII-C, D, E, & F; XV-J; XVI-K, L, M, N, & O; and XXI-B were added to reflect the addition of eight new revision checklists.

C. CORRECTIONS TO EXISTING REVISION CHECKLISTS

In reviewing state authorization packages, several errors in existing revision checklists have come to the attention of the State Programs Branch. This section addresses these areas. Additionally, two of the new checklists (Nos. 39 and 46) have a complicated and confusing relationship to existing checklists (Nos. 29 and 34); consequently, a paragraph was added to these existing checklists to explain this relationship. Revision checklist pages for substitution in the existing SCRAM are provided in Attachment C.

The specific revisions are as follows:

- Revision Checklist 4, page 1, 261 Appendix VII. In the last line of the F024 listing "tetracholoethylene" was changed to "tetrachloroethylene", so that this substance was spelled correctly. On the second page, 261 Appendix III, the common names were not included with the chemical names. The descriptions for this change were corrected to include the common names.
- Revision Checklist 14, page 2, 261.33f. The instruction following this citation is incorrect. It says to remove these chemicals from the list. The FR's instruction is to revise the hazardous waste numbers to reference F027. The revised page 2,

included in Attachment C, gives the instruction as shown in the FR. On page 7 of Revision Checklist 14, 270.17(i) and 270.18(i) have been corrected to read 270.17(j) and 270.18(j), to accurately reflect the FR addressed by this checklist.

- Revision Checklist 17L, 270.60(c)(3). This citation was changed to more correctly read 270.60 (c)(3)(vii).
- Revision Checklist 28, page 5. This checklist omits stating that 246.200 was removed. Page 5 of this checklist was changed to reflect this.
- Revision Checklist 29, page 1. A paragraph has been added to the first page of this checklist to explain that Revision Checklist 46 supercedes it, and that there are many spelling and other errors in the lists which were promulgated in the Federal Register addressed by Revision Checklist 29. The Federal Register addressed by Checklist 46 makes these corrections.
- Revision Checklist 34, page 1. A paragraph has been added to the first page of this checklist to explain that several of the paragraphs which were delegable in this checklist are no longer delegable, due to changes to the land disposal rules addressed by Revision Checklist 39. Footnotes have been added to those sections which are no longer delegable.

NOTE: The Agency is solely responsible for granting a national capacity variance to the prohibition effective date under 268.32. The procedures for granting case by case extensions are found in 268.5. Therefore, states cannot be authorized for this aspect of the program. Similarly, variances under 268.42(b) and 268.44 for waste-specific variances from a treatment standard are not delegable to the states. (Note: 268.44 is not addressed by this checklist, but is addressed by Revision Checklist 34. The Federal Register (November 4, 1986, FR 40572) addressed by Revision Checklist 34 implied that this section was delegable. However, the preamble to this present checklist changed the delegability of this section, so that it is not delegable.)

Under 268.6, EPA may grant petitions of specific duration to allow land disposal of certain hazardous wastes provided certain criteria are met. States that have the authority to impose land disposal prohibitions may ultimately be authorized under RCRA Section 3006 to grant petitions for such exemptions. However, because the Agency expects few such petitions, EPA is currently requiring that these petitions be handled at EPA headquarters. (Note: This is a change from the November 7, 1986, FR 40572 addressed by Revision Checklist 34.)

³ Chemical Abstracts Service registry number. Where "Total" is entered, all species in the ground water that contain this element are included.

⁴ CAS index names are those used in the 9th Cumulative Index.

⁵ Suggested Methods refer to analytical procedure numbers used in EPA Report SW-846 "Test Methods for Evaluating Solid Waste", third edition, November 1986. Analytical details can be found in SW-846 and in documentation on file at the agency. CAUTION: The methods listed are representative SW-846 procedures and may not always be the most suitable method(s) for monitoring an analyte under the regulations.

⁶ Practical Quantitation Limits (PQLs) are the lowest concentrations of analytes in ground waters that can be reliably determined within specified limits of precision and accuracy by the indicated methods under routine laboratory operating conditions. The PQLs listed are generally stated to one significant figure. CAUTION: The PQL values in many cases are based only on a general estimate for the method and not on a determination for individual compounds. PQLs are not a part of the regulation.

⁷ Polychlorinated biphenyls (CAS RN 1336-36-3); this category contains congener chemicals, including constituents of Aroclor-1016 (CAS RN 12674-11-2), Aroclor-1221 (CAS RN 11104-28-2), Aroclor-1232 (CAS RN 11141-16-5), Aroclor-1242 (CAS RN 53459-21-9), Aroclor-1248 (CAS RN 12672-29-6), Aroclor-1254 (CAS RN 11097-59-1), and Aroclor-1260 (CAS RN 11096-82-5). The PQL shown is an average value for PCB congeners.

⁸ This category contains congener chemicals, including tetrachlorodibenzo-p-dioxins (see also 2,3,7,8-TCDD), pentachlorodibenzo-p-dioxins, and hexachlorodibenzo-p-dioxins. The PQL shown is an average value for PCDD congeners.

⁹ This category contains congener chemicals, including tetrachlorodibenzofurans, pentachlorodibenzofurans, and hexachlorodibenzofurans. The PQL shown is an average value for PCDF congeners.

The standards addressed by Revision Checklist 27 (July 11, 1986, 51 FR 25350) are less stringent than existing Federal requirements; thus, authorized states are not required to adopt them. However, authorized states that have already adopted or choose to adopt the changes addressed by Revision Checklist 27 must revise their program and adopt Revision Checklist 43's changes, as they are more stringent, in some respects, than those addressed by Revision Checklist 27.

HSWA Codification Rule 2
52 FR 45788-45799
December 1, 1987
(HSWA Cluster II)

This codification rule is a companion to the initial codification rule of July 15, 1985 (Revision Checklist 17) and incorporates logical outgrowths of the 1984 HSWA amendments into the existing RCRA regulations. Since HSWA provides that states may seek authorization for selected provisions (instead of having to adopt all provisions simultaneously), this checklist has been divided into logical subgroupings. There are seven subsections to this checklist.

- Checklist 44A - Permit Application Requirements Regarding Corrective Action
- Checklist 44B - Corrective Action Beyond the Facility Boundary

- Checklist 44D - Permit Modification

NOTE: This checklist makes technical corrections to the lists of commercial chemical products that are hazardous wastes when discarded [40 CFR 261.33(e) and (f)] and to the list of hazardous constituents (Appendix VII-I of 40 CFR Part 261). Because these same lists are also addressed by Revision Checklist 29, states are advised to follow this checklist rather than Checklist 29 when revising their code, in order to avoid two separate revisions.

FOR CHANGES TO THE FEDERAL RCRA PROGRAM FROM
JANUARY, 1983 THROUGH JUNE, 1988

I hereby certify, pursuant to my authority as _____ and in accordance with Section 3006(b) of the Resource Conservation and Recovery Act, as amended by the Hazardous and Solid Waste Amendments of 1984 (42 USC 6901 *et seq.*), and 40 CFR 271 that in my opinion the laws of the State [Commonwealth] of _____ provide adequate authority to carry out the revised program set forth in the revised "Program Description" submitted by the [State Agency]. The specific authorities provided are contained in statutes or regulations lawfully adopted at the time this Statement is signed and which are in effect now [shall be fully effective by _____], as specified below.

I. IDENTIFICATION AND LISTING

NOTE: The Administrator of EPA is responsible for granting national variances for the effective date of land disposal prohibitions. The procedures for granting the case-by-case extensions are in 40 CFR §268.5. Since the granting of these variances is based on national concerns, States cannot be authorized for this aspect of the program. States should also note that a number of paragraphs addressed by this checklist are superceded by changes made in Revision Checklist 39 (The California List, July 8, 1987, 52 FR 25760). Additionally, the delegability of certain paragraphs have changed in that checklist. Specifically, 268.6, 268.42(b), and 268.44 were made not delegable to the states. Thus, states are not required to adopt these sections when applying for Revision Checklist 34.
