September 28, 1984

FOREWORD

This Report was prepared for the Office of Toxic Substances (OTS), Environmental Protection Agency (EPA) under Work Assignment 02 of Contract 68-01-6750. Dr. John P. Glennon and Mr. Michael J. Kangas are the ICAIR Program and Task Managers, respectively. Additional ICAIR technical staff making major contributions included Dr. Ronald J. Davenport, Mr. Jeffrey S. Heaton, Ms. Betty F. Neustadter, Ms. Lee Ann Smith, Mr. Timothy W. Owens, Dr. Carol Maczka and Mr. John F. Schubert.

Innumerable contributions were made to the Report by EPA personnel. In particular the cooperation of Mr. Gerald Emison, Mr. Edwin Johnson, Mr. Victor Kimm, Mr. Walter Kovalick, Dr. John Skinner, Mr. Steven Schatzow, Mr. Don Clay and Dr. Elizabeth Anderson deserve recognition. Technical direction for completing this Report was provided by Mr. Arnold Edelman, Mr. Robert E. Janney and Mr. Wade Richardson, Chemical Coordination Staff, OTS.

This Report is designed to summarize the status of activities on toxic and hazardous chemicals for the EPA Manager. To remain useful, periodic updates of the Report are planned. Status information in this Report is current as reported by June 1, 1984, the cut-off date necessary to allow compilation and completion of the Report. Status information received after that date is being held for incorporation into planned updates of the Report. Suggestions regarding content, format or organization of the Report are desired and should be forwarded to OTS (TS-777).

DISCLAIMER

This document is intended for internal use by the U.S. Environmental Protection Agency. The contents should not be construed to represent Agency policy. The status of chemical activities presented in the document is consistent with the best information received from the Agency as of June 1, 1984.

## 1.0 INTRODUCTION

The Environmental Protection Agency (EPA) was established in 1970 and charged by Congress to protect the nation's land, air and water resources. The EPA's current organization parallels seven major environmental statutes enacted by Congress since 1970.

Eight EPA Program Offices evaluate and/or regulate specific chemicals under the authority of these environmental statutes. As implementing programs have been established within each Office to carry out the requirements of the environmental statutes, most of the Program Offices have developed separate procedures for listing, assessing and developing regulations for controlling toxic and hazardous chemicals. Each Office adds (and occasionally drops) chemicals to its internal programs, and frequently several Program Offices may perform activities on a chemical simultaneously. Therefore, there is a need to present clearly to EPA management the status of EPA activities on toxic and hazardous chemicals.

The Office of Toxic Substances (OTS) produces several documents, such as the EPA Chemical Activities Status Report (CASR), which provide information that is helpful in tracking the status of chemical activities within the EPA. However, these documents do not provide this information in a concise format for convenient cross-referencing of activities among different Program Offices. Such a format is desirable to help develop pollution control strategies or to evaluate the impacts from multimedia chemical exposures on human health and the environment.

This Report summarizes EPA's chemical activities. A summary of the purpose of each section is provided in Table 1-1. The status information is presented in matrix format to display clearly chemical activities by the eight Program Offices. An Index is provided to assist in locating specific chemicals.

### 1.1 Objective and Scope

#### 1.1.1 Objective

The objective of this Report is to provide the status of EPA activities on toxic and hazardous chemicals to EPA management.

#### 1.1.2 Scope

The Report is limited to the seven major environmental statutes for which EPA is responsible.

Activities within the scope of the Report include those evaluations and regulatory activities that are chemical specific and limit (1) human exposures

TABLE 1-1 SECTION PURPOSES

<u>Section No.</u>	<u>Purpose/Type of Information Presented</u>
1.0	Presents objective and scope of the Report.
2.0	Highlights toxic and hazardous chemicals with current and planned activities under three or more of the seven environmental statutes. Also presents a summary of the major human health and environmental concerns for these chemicals.
3.0	Provides a matrix summarizing all EPA current and planned activities on toxic and hazardous chemicals.
4.0	Provides a matrix summarizing all EPA completed activities on toxic and hazardous chemicals.
5.0	Provides an Index indicating where in the Report activities for a particular chemical appear. The Index also cross-references the chemical nomenclature synonyms most often used by the Program Offices.

to toxic chemicals, (2) actual releases to the environment (i.e., through emission or discharge) and (3) potential exposures or releases (i.e., through manufacturing or uses for special purpose). Activities concerning non-chemical-specific hazardous wastes and other substances as well as general industry standards are not included. Table 1-2 lists the types of regulations and evaluations which are specifically included in or excluded from this Report.

#### 1.1.2.1 Multi-Program Activities

Section 2.0 provides a summary of current and planned activities on toxic and hazardous chemicals that are currently receiving emphasis by EPA and identifies the human health and environmental concerns that serve as the basis for EPA's activities on these chemicals. For this Report, a chemical is emphasized by EPA if there are current and planned activities under three or more of the seven environmental statutes (i.e., activities in three or more respective Program Offices). In this regard, a degree of current emphasis is implied because the chemical is of potential human health and environmental concern in several media (i.e., multiple exposure pathways) and, therefore, may be subject to regulation under several environmental statutes.

Current and planned activities are those occurring or scheduled to occur between October 1, 1982, and September 30, 1985 (Fiscal Year (FY) 1983 through FY 1985). If the current status of a regulation (such as an Advanced Notice of Proposal Rule-making (ANPR)) was published prior to FY 1983, but is not yet final, it has also been included as a current activity. Any available information on chemical activities beyond FY 1985 has also been included. Status information is current as of June 1, 1984.

It should be noted that this section only lists EPA's current and planned chemical activities for those chemicals receiving emphasis as measured by current and planned activities under three or more environmental statutes. Section 3.0 provides a complete listing of all current and planned activities and should be consulted to determine the status of EPA activities on chemicals not included in section 2.0.

#### 1.1.2.2 Current and Planned Activities

Section 3.0 presents EPA Program Office activities on toxic and hazardous chemicals which occurred or were scheduled to occur between October 1, 1982, and September 30, 1985 (FY 1983 through FY 1985). If available, information on chemical activities beyond FY 1985 has also been included. Again, status information is current as of June 1, 1984.

TABLE 1-2 CHEMICAL ACTIVITIES INCLUDED/EXCLUDED<sup>(a)</sup>

<u>Included</u>	<u>Excluded</u>
	<u>Regulations:</u> <sup>(b)</sup>
Decision Not to Regulate	FIFRA Tolerances
Effluent Standard	
FIFRA Cancellation	
Hazardous Waste List	
National Ambient Air Quality Standard	
National Emission Standard for Hazardous Air Pollutant	
Primary Regulation	
Reportable Quantity	
Reporting Rule	
Restriction	
Significant New Use Rule	
Suspension of Registration	
Test Rule	
Voluntary Cancellation	
Voluntary Restriction	
	<u>Evaluations</u>
Chemical Hazard Information Profile	Analytical Methods Development

Decision Not to Require Testing	Data Call-In
Engineering Study	Episode Report
Health and Environmental Effects Profile	Errata Document
Health Assessment	For Your Information (FYI) Submission
Health Assessment Document	Monitoring/Levels Measurement
Health Effects Assessment	OWRS Toxic Pollutant or Priority Pollutant List
Interagency Testing Committee List (Test Rule Recommendation)	Scoring
Materials Balance Study	Special Report
Negotiated Testing Agreement	Status Tracking
Preregulatory Assessment	Technical Assistance Data
Rebuttal Analysis	TSCA 8(e) Submission
Registration Standard	Unscored Chemical of Interest
Reportable Quantities Assessment	
Risk Documentation/Assessment	
Source/Exposure Assessment	
Summary Review	
Water Quality Criteria	

(a) Each activity is listed under its respective statute/office on the matrix tables.

(b) Where appropriate, the status of these regulations, such as ANPR, Proposed Rule-making (PRM), Final Rule-making (FRM) and Rebuttal Presumption Against Registration (RPAR), is given.

#### 1.1.2.3 Completed Activities

Section 4.0 presents a record of the accomplishments of the eight EPA Program Offices on toxic and hazardous chemicals completed prior to October 1, 1982. Completed evaluations of chemicals dropped from further regulatory action by EPA (i.e., never regulated and no activity since October 1, 1982) are not included in this record. If the current status of a regulation (such as an ANPR) was published prior to October 1982, but is not yet final, it appears in section 3.0 of this Report as a current activity.

#### 1.1.2.4 Index

The Index provides a cross-reference of regulatory synonyms, CAS numbers and chemical names used in the matrices of sections 2.0, 3.0 and 4.0 of this Report. The Index is particularly useful in locating a chemical which belongs to a chemical group, such as arsenic compounds. The Index is also valuable when the user is familiar with a Program Office synonym other than the chemical name appearing on the matrices.

### 1.2 How Information Was Acquired

Information sources of this Report include current EPA CASR printouts, the Federal Register (FR), recent EPA publications and other information from the eight Program Offices. Each Program Office reviewed the portion of the Report describing the status of that Office's chemical activities. Comments received from these reviews have been incorporated. When comments from the Program Office reviews differed from information published in the Federal Register or in EPA publications, the review comments were used, since they provided the most current status information.

### 1.3 Chemical Activities Matrix

Sections 2.0 to 4.0 present chemical activity status information in matrix format. This status information is arranged by chemical name and Chemical Abstract Service (CAS) registry number in the left column. Chemicals are listed alphabetically by the name under which they are regulated by one or more of the eight EPA Program Offices. The CAS number is provided to eliminate ambiguities in chemical nomenclature.

The seven environmental statutes and the associated EPA Program Offices appear across the top of the matrix. These headings are arranged by the medium (or media) for which each Program Office is responsible (air, water and multiple-media). Statutes and Offices under multiple-media are concerned with toxic substances in all media.

Within each Program Office heading, both evaluations and regulations are presented. Each entry on the matrix consists of an acronym indicating the type of regulation or evaluation, the actual or scheduled date for completion of the activity and, when available, a reference (e.g., EPA publication, FR or

Code of Federal Regulations (CFR) number). The key to the matrix, located opposite the first page of each matrix, lists the types of evaluations and regulations which appear in the matrix and the acronyms used. When more than one regulation or evaluation by an Office is listed for a chemical, the entries are listed in reverse chronological order.

For certain entries, symbols have been used to designate additional information (see Key to Matrix). An "\*" beside an acronym of an evaluation indicates that the evaluation was performed by the Office of Research and Development (ORD), typically OHEA. The symbol "x" after the date on an entry indicates that this activity was scheduled for completion on that date, but completion has not been confirmed.

Other symbols appearing on the matrix pertain to the grouping of chemicals. Under one or more of the statutes certain chemicals are evaluated or regulated by the EPA as members of chemical groups. Chemical groups of this type are indicated on the matrix by the phrase "including, but not limited to" following the group name. This phrase is used to indicate that the activity applies to all possible members of that group. However, other regulations or evaluations may apply only to specific chemicals within the group. In these instances, the symbol "+" is used to indicate that all listed chemicals in the group are not subject to all of the same activities. Lower case letters have been assigned to each chemical in the group, and these letters appear below each entry that applies to that particular chemical.

Wherever all of the evaluations and regulations related to a certain chemical group apply to all members of the group, the individual chemicals are not listed in the matrix. In these instances, "+" is used to indicate that the chemicals in that group appear in Table 3-2 or 4-2, rather than in the matrix.

In cases where the group is large and activities apply to a limited number of chemicals within the group, the symbol " $\Delta$ " indicates that only the chemicals with individual activities different from the activities of the group appear on the matrix. A full listing of the group appears in Table 3-2 or 4-2.

For some of these chemical groups, the group name does not have an associated CAS number; therefore, a CAS number from one of the chemicals within the group has been selected to represent that group. When this has occurred, the symbol ":" is used.

Other chemicals have been grouped together in the matrix in order to efficiently summarize the status of activities related to very similar chemicals.

A full completion date (day, month, year) for each activity is listed in the matrix when available. When only the year (e.g., FY 84) in which the activity is scheduled for completion has been identified, the date is listed on the matrix as "09/84." Where no projected completion date was available, "09/85" is listed on the matrix, since that date is the outside limit of the time frame considered for this edition of the Report.

## 2.0            MULTI-PROGRAM ACTIVITIES

Current and planned activities on toxic and hazardous chemicals by the eight EPA Program Offices involve a total of 909 chemicals and an additional 38 chemical groups; related chemicals are counted as a group only when one or more of the Program Offices is performing evaluations or regulatory efforts for all possible members of the group (e.g., chlorinated benzenes). Many of the 909 chemicals and the 38 chemical groups are addressed by more than one Program Office. Specifically, there are 83 chemicals and six chemical groups being evaluated or regulated by three or more Program Offices. Table 2-1 presents the current and planned activities for these EPA-emphasized chemicals. A key to the acronyms and symbols used on Table 2-1 appears on the next page.

The rationale for the selection of chemicals for inclusion in this section of the Report was developed to meet the objective of providing a summary document for only those chemicals receiving current emphasis within EPA. Chemicals with current and/or planned activities under three or more environmental statutes were selected. Alternative bases for selecting emphasized chemicals that were considered included relative funding levels and the magnitude or severity of the human health or environmental effects concern for each chemical.

The use of magnitude or severity of human health or environmental effects as the basis for selecting emphasized chemicals would have been extremely subjective and have required judgments in cases where the available data are highly variable. For example, one chemical may have been classified as "emphasized" because extensive studies had been completed and the chemical had been found to be a confirmed carcinogen. Another chemical with equal or greater carcinogenic potential may not have been classified as "emphasized" because the health effects or exposure data base was incomplete.

It should be noted that the authors recognized that the rationale selected for identifying emphasized chemicals in the Report is not ideal and may result in the omission of some chemicals that are of high national concern. Therefore, suggestions are requested concerning alternative or supplemental criteria for identifying emphasized chemicals.

Table 2-2 provides a summary of the major health and environmental concerns (i.e., potential health and environmental effects) for each of the chemicals appearing in Table 2-1. The information in this table is drawn chiefly from documents supplied by the Program Offices and from Federal Register listings of regulations. These concerns should not be viewed as an inclusive list. In the case of chemical groups, the concerns listed characterize all members of the group.

## KEY TO MATRIX

### Entries:

Regulations		Evaluations	
CAN	FIFRA Cancellation	CD	Criteria Document
DNR	Decision Not to Regulate	CHIP	Chemical Hazard Information Profile
ES	Effluent Standard	DNT	Decision Not to Require Testing
HWL	Hazardous Waste List	EA	Exposure Assessment
NAAQS	National Ambient Air Quality Standards	ENGS	Engineering Study
NESHAP	National Emission Standard for Hazardous Air Pollutant	HA	Health Assessment
PR	Primary Regulation	HAD	Health Assessment Document
RES	Restriction	HEA	Health Effects Assessment
RQ	Reportable Quantity	HEEP	Health and Environmental Effects Profile
RR	Reporting Rule	ITC	Interagency Testing Committee
SNUR	Significant New Use Rule	MBS	Materials Balance Study
SUSP	Suspension of Registration	NTA	Negotiated Testing Agreement
TR	Test Rule	PA	Preregulatory Assessment
VOL CAN	Voluntary Cancellation	RA	Risk Assessment
VOL RES	Voluntary Restriction	RBA	Rebuttal Analysis
Regulations Status			
ANPR	Advance Notice of Proposed Rule-making	REG STD	Registration Standard
comp	Completed	RQC	Assessment for Reportable Quantities for Carcinogens in Hazardous Wastes
FRM	Final Rule-making	RQT	Assessment for Reportable Quantities for Toxicity in Hazardous Wastes
PRM	Proposed Rule-making	SR	Summary Review
RPAR	Rebuttable Presumption Against Registration	WQC	Water Quality Criteria

### Symbols:

- \* Evaluation performed by ORD, typically OHEA.
- x The completion date indicates that the activity was to have been completed, but actual completion of the activity has not been confirmed.
- † All listed chemicals in the group are not subject to the same activities. Evaluations or regulations which pertain to an individual chemical are followed by that chemical's designated letter. The absence of letters below the entry indicates that the entry applies to all chemicals in the group. For regulated groups (indicated on the matrix by the phrase, "including, but not limited to"), the entry applies to all possible chemicals within the group.
- a),b),c), etc. Individual chemicals within a group which have been separately evaluated or regulated.
- ‡ The listed activities apply to all possible chemicals within the group. Individual chemicals within the group and their CAS Numbers appear in Table 3-2 or 4-2.
- △ All chemicals in the group are not subject to the same activities. Due to the size of the group only those chemicals subject to the individual activities indicated are listed. A full listing of the group appears in Table 3-2 or 4-2.
- The identified CAS Number refers to an individual chemical within the group, but is used to represent the group, since the group itself has no assigned CAS Number. Since the listed activities apply to all possible chemicals within the group, individual chemicals and CAS Numbers appear in Table 3-2 or 4-2.

TABLE 2-2 MAJOR HEALTH AND ENVIRONMENTAL CONCERNS OF  
EPA EMPHASIZED CHEMICALS

Chemical Name	CAS No.	Major Concerns
Acetaldehyde	75-07-0	Carcinogenicity, chronic toxicity, environmental effects, exposure potential, high volume production
Acrolein	107-02-8	Carcinogenicity, toxicity to humans, toxicity to aquatic life, chronic toxicity, health effects, environmental effects, irritation to eyes and respiratory tract
Acrylamide	79-06-1	Carcinogenicity, neurotoxicity, cumulative neurotoxicity, toxicity to aquatic life
Acrylonitrile	107-13-1	Carcinogenicity, mutagenicity, neurotoxicity, toxicity to aquatic life, subchronic toxicity, health effects, environmental effects, high volume production
Alachlor	15972-60-8	Oncogenicity, residues are likely to occur in meat, milk, poultry and eggs
Aldicarb	116-06-3	Carcinogenicity, oncogenicity, health effects, environmental effects, exposure potential
Allyl chloride	107-05-1	Carcinogenicity, chronic toxicity, health effects, environmental effects, exposure potential, high volume production
Antimony	7440-36-0	Carcinogenicity, mutagenicity, teratogenicity, reproductive system effects, cardiovascular system effects, toxicity to humans, toxicity to aquatic life, health effects, other chronic effects, exposure potential, high volume production, pulmonary irritation, dermatitis
Arsenic	7440-38-2	Carcinogenicity, toxicity to aquatic life, health effects, possible factor in epidemoid carcinoma of the skin and lungs and precancerous dermal keratoses

continued-

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Arsenic compounds, inorganic <sup>(a)</sup>	SEQ:2	Carcinogenicity, mutagenicity, oncogenicity, teratogenicity, health effects, environmental effects, exposure potential, high volume production
Asbestos	1332-21-4	Carcinogenicity, gastrointestinal effects, health effects, environmental effects, exposure potential
Atrazine	1912-24-9	Acute toxicity, health effects, environmental effects, reproductive effects on marine algae and diatoms
Benzene	17-43-2	Carcinogenicity, mutagenicity, central nervous system effects, toxicity to aquatic life, chronic toxicity, other chronic effects, environmental effects, exposure potential, high volume production, storage emissions
Beryllium	7440-41-7	Carcinogenicity, toxicity to aquatic life, chronic toxicity, health effects, exposure potential, high volume production
Bromoform	75-25-2	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects, exposure potential
1,3-Butadiene	106-99-0	Carcinogenicity, high potential for occupational exposure in rubber and synthetic fiber industries
Cadmium	7440-43-0	Carcinogenicity, reproductive system effects, central nervous system effects, liver and/or kidney effects, toxicity to humans, toxicity to aquatic life, chronic toxicity

continued-

(a) See Table 2-1 for listing of chemicals in this group.

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Captan	133-06-2	Carcinogenicity, mutagenicity, oncogenicity, health effects, other chronic effects, environmental effects
Carbaryl	63-25-2	Mutagenicity, oncogenicity, teratogenicity, fetotoxicity, possible viral enhancement, exposure potential, high volume production
Carbofuran	1563-66-2	Chronic toxicity, health effects, environmental effects, high volume production, possible residues on raw agricultural products and in meat and milk
Carbon tetrachloride	56-23-5	Carcinogenicity, mutagenicity, oncogenicity, central nervous system effects, liver and/or kidney effects, toxicity to aquatic life, chronic toxicity, health effects, environmental effects, exposure potential, high volume production
Chlorinated benzenes <sup>(a)</sup>	SEQ:23	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects, high volume production, environmental release
Chloroform	67-66-3	Carcinogenicity, oncogenicity, toxicity to aquatic life, health effects, environmental effects
Chlorpyrifos	2921-88-2	Reproductive system effects, toxicity to aquatic life, acute toxicity, chronic toxicity, health effects, environmental effects, exposure potential, high volume production, possible residue in apples, fat, meat and milk
Chromium	7440-47-3	Carcinogenicity, mutagenicity, gastrointestinal effects, liver and/or kidney effects, toxicity to humans, toxicity to aquatic life, health effects, environmental effects, exposure potential

continued-

(a) See Table 2-1 for listing of chemicals in this group.

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Copper	7440-50-8	Carcinogenicity, gastrointestinal effects, toxicity to aquatic life, health effects, environmental effects, exposure potential, high volume production
Cresols: m-Cresol o-Cresol p-Cresol	1319-77-3 108-39-4 75-48-7 106-44-5	Carcinogenicity, mutagenicity, oncogenicity, high volume production, workplace exposure
Cyanide <sup>(a)</sup>	51-12-15	Respiratory effects, toxicity to humans, toxicity to aquatic life, health effects, environmental effects, exposure potential, high volume production
Diallate: cis-Diallate trans-Diallate	2303-16-4 17708-57-5 17708-58-6	Carcinogenicity, health effects, environmental effects, exposure potential, occupational exposure
1,3-Diamino-4-methylbenzene	95-80-7	Carcinogenicity, mutagenicity, oncogenicity, teratogenicity, reproductive system effects, neurotoxicity, toxicity to aquatic life, acute toxicity, chronic toxicity, health effects, environmental effects, exposure potential, high volume production, possible blood and bone marrow effects
1,2-Dichloroethane	107-06-2	Carcinogenicity, central nervous system effects, liver and/or kidney effects, toxicity to aquatic life, chronic toxicity, health effects, environmental effects
1,2-Dichloropropane	78-87-5	Mutagenicity, teratogenicity, reproductive system effects, neurotoxicity, toxicity to aquatic life, acute toxicity, chronic toxicity, health effects, environmental effects, exposure potential, high volume production

continued-

(a) See Table 2-1 for listing of chemicals in this group.

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Dimethoate	60-51-5	Carcinogenicity, mutagenicity, oncogenicity, reproductive system effects, fetotoxicity, health effects, environmental effects, occupational exposure, population exposure through residues
Dimethylnitrosamine	62-75-9	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects
Dinoseb	88-85-7	Carcinogenicity, chronic toxicity, health effects, environmental effects, high volume production, secondary chemicals (alkylamines or alkanolamines) pose N-nitroso problem
Endrin	72-20-8	Carcinogenicity, teratogenicity, toxicity to humans, toxicity to aquatic life, acute toxicity, health effects, environmental effects, high volume production
Epichlorohydrin	106-89-8	Carcinogenicity, mutagenicity, oncogenicity, teratogenicity, reproductive system effects, liver and/or kidney effects, health effects, environmental effects, exposure potential, high volume production
Ethyl 4,4'-dichlorobenzilate	510-15-6	Carcinogenicity, reproductive system effects, health effects, environmental effects, exposure potential
Ethylene dibromide	106-93-4	Carcinogenicity, mutagenicity, oncogenicity, reproductive system effects, health effects, environmental effects, exposure potential, high volume production
Ethylene oxide	75-21-8	Carcinogenicity, mutagenicity, oncogenicity, teratogenicity, reproductive system effects, testicular effects, neurotoxicity, chronic toxicity, exposure potential, high volume production, possible mononuclear cell leukemia

continued-

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Formaldehyde	50-00-0	Carcinogenicity, oncogenicity, environmental effects
Guthion	86-50-0	Carcinogenicity, oncogenicity, chronic toxicity
Hexachlorobutadiene	87-68-3	Carcinogenicity, toxicity to aquatic life, health effects
Hexachlorocyclopentadiene	77-47-4	Carcinogenicity, oncogenicity, cardiovascular system effects, central nervous system effects, liver and/or kidney effects, toxicity to humans, toxicity to aquatic life, environmental effects
Isophorone	78-59-1	Mutagenicity, oncogenicity, teratogenicity, toxicity to humans, toxicity to aquatic life, toxicity, possible DNA damage
Lead	7439-92-1	Carcinogenicity, teratogenicity, gastrointestinal effects, central nervous system effects, liver and/or kidney effects, toxicity to humans, toxicity to aquatic life, health effects, hematopoietic, renal and immunological system effects, lifetime accumulation in human body, cognitive impairment in young children
Lindane	58-89-9	Carcinogenicity, oncogenicity, teratogenicity, reproductive system effects, fetotoxicity, toxicity to aquatic life, acute toxicity, chronic toxicity
Malathion	121-75-5	Mutagenicity, health effects, environmental effects, high volume production
Maleic anhydride	108-31-6	Carcinogenicity; subacute inhalation can cause severe headaches, nosebleeds, nausea and temporary impairment of vision, possible corneal erosion and conjunctivitis, acute irritant of eyes, skin and upper respiratory tract

continued-

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Mercury	7439-97-6	Central nervous system effects, liver and/or kidney effects, toxicity to humans, toxicity to aquatic life, bioaccumulation
Methoxychlor	72-43-5	Health effects, environmental effects, high volume production
Methylene chloride	75-09-2	Carcinogenicity, toxicity to aquatic life, chronic toxicity, health effects, environmental effects, exposure potential, high volume production
Nickel	7440-02-2	Carcinogenicity, gastrointestinal effects, toxicity to humans, toxicity to aquatic life, health effects, possible contact dermatitis
Nitrobenzene	98-95-3	Mutagenicity, oncogenicity, teratogenicity, reproductive system effects, toxicity to aquatic life, acute toxicity, health effects, environmental effects, exposure potential
Parathion	56-38-2	Carcinogenicity, health effects, environmental effects, high volume production
Pentachlorophenol	87-86-5	Carcinogenicity, toxicity to humans, toxicity to aquatic life, health effects, environmental effects, high volume production
Phthalate esters <sup>(a)</sup>	SEQ:31	Carcinogenicity, teratogenicity, reproductive system effects, toxicity to humans, toxicity to aquatic life, health effects, environmental effects
Polychlorinated biphenyls (PCBs)	1336-36-3	Carcinogenicity, teratogenicity, reproductive system effects, fetotoxicity, liver and/or kidney effects, toxicity to aquatic life, toxicity, other health effects

continued-

---

(a) See Table 2-1 for listing of chemicals in this group.

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Polynuclear aromatic hydrocarbon <sup>(a)</sup>	SEQ:6	Carcinogenicity, toxicity to aquatic life, exposure potential, occupational exposure, skin irritant
Propylene oxide	75-56-9	Carcinogenicity, mutagenicity, oncogenicity, teratogenicity, reproductive system effects, neurotoxic effects, environmental effects, exposure potential, high volume production
Radionuclides:	--	Carcinogenicity, radiotoxicity, possible bone cancer and leukemia from lifetime ingestion
Silver	7440-22-4	Toxicity to humans, toxicity to aquatic life, health effects, possible argyria
Silvex	93-72-1	Carcinogenicity, teratogenicity, health effects, environmental effects, high volume production
Simazine	122-34-9	Health effects, environmental effects
Sodium hydroxide	1310-73-2	Hypertension effects, health effects, environmental effects, exposure potential, high volume production
Styrene	100-42-5	Health effects, environmental effects, high volume production
2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)	1746-01-6	Carcinogenicity, toxicity to aquatic life, chronic toxicity, health effects, environmental effects, exposure potential
1,1,2,2-Tetrachloroethane	79-34-4	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects
Tetrachloroethylene	127-18-4	Carcinogenicity, central nervous system effects, liver and/or kidney effects, toxicity to aquatic life

continued-

Table 2-2 - continued

Chemical Name	CAS No.	Major Concerns
Toluene	108-88-3	Carcinogenicity, oncogenicity, teratogenicity, reproductive system effects, toxicity to humans, toxicity to aquatic life
o-Toluidine	95-53-4	Carcinogenicity, mutagenicity, oncogenicity, health effects, environmental effects, exposure potential
o-Toluidine hydrochloride salt	636-21-5	
p-Toluidine	106-49-0	
Toxaphene	8001-35-2	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects, high volume production
1,1,1-Trichloroethane	71-55-6	Carcinogenicity, mutagenicity, teratogenicity, reproductive system effects, toxicity to aquatic life, toxicity, health effects, environmental effects, exposure potential, occupational exposure, bioaccumulation
1,1,2-Trichloroethane	79-00-5	Carcinogenicity, toxicity to aquatic life, health effects, environmental effects, exposure potential
Trichloroethylene	79-01-6	Carcinogenicity, mutagenicity, liver and/or kidney effects, toxicity, health effects, environmental effects
Vinyl chloride	75-01-4	Carcinogenicity, liver and/or kidney effects, health effects, environmental effects, high volume production
Vinylidene chloride	75-35-4	Carcinogenicity, chronic toxicity, health effects, environmental effects, exposure potential
Xylene:	1330-20-7	Carcinogenicity, teratogenicity, reproductive effects, chronic
m-Xylene	108-38-3	toxicity, health effects, environmental effects, high volume production
o-Xylene	95-47-6	
p-Xylene	106-42-3	

### 3.0 CURRENT AND PLANNED ACTIVITIES

Table 3-1 presents chemical-specific current and planned activities by the eight EPA Program Offices. Between FY 1983 through FY 1985, these activities involved 909 chemicals and an additional 38 chemical groups. A key to the acronyms and symbols used on Table 3-1 appears on the next page.

Table 3-2 lists chemical group members for which evaluations and regulations apply to all members of the group. For convenience, these frequently large groups are kept apart from the matrix (Table 3-1), but are referenced in the appropriate locations.

Table 3-3 presents the Program Office activities on related chemical substances.

## KEY TO MATRIX

### Entries:

Regulations		Evaluations	
CAN	FIFRA Cancellation	CD	Criteria Document
DNR	Decision Not to Regulate	CHIP	Chemical Hazard Information Profile
ES	Effluent Standard	DNT	Decision Not to Require Testing
HWL	Hazardous Waste List	EA	Exposure Assessment
NAAQS	National Ambient Air Quality Standards	ENGS	Engineering Study
NESHAP	National Emission Standard for Hazardous Air Pollutant	HA	Health Assessment
PR	Primary Regulation	HAD	Health Assessment Document
RES	Restriction	HEA	Health Effects Assessment
RQ	Reportable Quantity	HEEP	Health and Environmental Effects Profile
RR	Reporting Rule	ITC	Interagency Testing Committee
SNUR	Significant New Use Rule	MBS	Materials Balance Study
SUSP	Suspension of Registration	NTA	Negotiated Testing Agreement
TR	Test Rule	PA	Preregulatory Assessment
VOL CAN	Voluntary Cancellation	RA	Risk Assessment
VOL RES	Voluntary Restriction	RBA	Rebuttal Analysis
Regulations Status			
ANPR	Advance Notice of Proposed Rule-making	REG STD	Registration Standard
comp	Completed	RQC	Assessment for Reportable Quantities for Carcinogens in Hazardous Wastes
FRM	Final Rule-making	RQT	Assessment for Reportable Quantities for Toxicity in Hazardous Wastes
PRM	Proposed Rule-making	SR	Summary Review
RPAR	Rebuttable Presumption Against Registration	WQC	Water Quality Criteria

### Symbols:

- \* Evaluation performed by ORD, typically OHEA.
- ✗ The completion date indicates that the activity was to have been completed, but actual completion of the activity has not been confirmed.
- † All listed chemicals in the group are not subject to the same activities. Evaluations or regulations which pertain to an individual chemical are followed by that chemical's designated letter. The absence of letters below the entry indicates that the entry applies to all chemicals in the group. For regulated groups (indicated on the matrix by the phrase, "including, but not limited to"), the entry applies to all possible chemicals within the group.
- a),b),c), etc. Individual chemicals within a group which have been separately evaluated or regulated.
- ‡ The listed activities apply to all possible chemicals within the group. Individual chemicals within the group and their CAS Numbers appear in Table 3-2 or 4-2.
- △ All chemicals in the group are not subject to the same activities. Due to the size of the group only those chemicals subject to the individual activities indicated are listed. A full listing of the group appears in Table 3-2 or 4-2.
- The identified CAS Number refers to an individual chemical within the group, but is used to represent the group, since the group itself has no assigned CAS Number. Since the listed activities apply to all possible chemicals within the group, individual chemicals and CAS Numbers appear in Table 3-2 or 4-2.

TABLE 3-2 CHEMICAL GROUPS WITH CURRENT  
AND PLANNED ACTIVITIES

Chemical Group/Members of Chemical Group <sup>(a)</sup>	CAS Number
Alkylated phenol sulfides	
Phenol, 3,5-dimethyl-4-(methylthio)-	7379-51-3
Phenol, 3-methyl-4-(methylthio)-	3120-74-9
Phenol, 4,4'-thiobis-	2664-63-3
Phenol, 2,2'-thiobis[6-(1,1-dimethylethyl)- 4-methyl-	90-66-4
Phenol, 4,4'-thiobis[2-(1,1-dimethylethyl)- 5-methyl-	96-69-5
Phenol, 4,4'-thiobis[2-(1,1-dimethylethyl)- 6-methyl-	96-66-2
Phenol, 4,4'-thiobis[3-(1,1-dimethylethyl)- 2-methyl-	3818-54-0
Phenol, 2,2'-thiobis[4-(1,1,3,3-tetramethyl- butyl)-	3294-03-9
Chlorinated naphthalenes SEQ:7	
Chloronaphthalene	25586-43-0
1-Chloronaphthalene	90-13-1
2-Chloronaphthalene	91-58-7
1,2-Dichloronaphthalene	2050-69-3
1,3-Dichloronaphthalene	2198-75-6
1,4-Dichloronaphthalene	1825-31-6
1,5-Dichloronaphthalene	1825-30-5
1,6-Dichloronaphthalene	2050-72-8
1,7-Dichloronaphthalene	2050-73-9
1,8-Dichloronaphthalene	2050-74-0
2,3-Dichloronaphthalene	2050-75-1
2,6-Dichloronaphthalene	2065-70-5
2,7-Dichloronaphthalene	2198-77-8
Heptachloronaphthalene	32241-08-0
Hexachloronaphthalene	1335-87-1
Octachloronaphthalene	2234-13-1
Pentachloronaphthalene	1321-64-8
Tetrachloronaphthalene	1335-88-2
Trichloronaphthalene	1321-65-9
Cyanides 57-12-5	
Barium cyanide	542-62-1
Calcium cyanide	592-01-8
Copper cyanides	544-92-3

(a) Groups may have other chemicals not specifically listed.

Table 3-2 - continued

Chemical Group/Members of Chemical Group	CAS Number
Cyanogen	460-19-5
Cyanogen bromide	506-68-3
Cyanogen chloride	506-77-4
Hydrogen cyanide	74-90-8
Mercuric cyanide	592-04-1
Methyl isocyanate	624-83-9
Nickel cyanide	557-19-7
Potassium cyanide	151-50-8
Potassium silver cyanide	506-61-6
Silver cyanide	506-64-9
Sodium cyanide	143-33-9
Zinc cyanide	557-21-1
2,4-Dichlorophenoxyacetic acid (2,4-D) salts and esters	
2,4-D butoxyethyl ester	1929-73-3
2,4-D butyl ester	94-80-4
2,4-D sec-butyl ester	94-79-1
2,4-D chlorocrotyl ester	2971-38-2
2,4-D isoctyl ester	25168-26-7
2,4-D isopropyl ester	94-11-1
2,4-D methyl ester	1928-38-7
2,4-D propylene glycol butyl ether ester	1320-18-9
2,4-D propyl ester	1928-61-6
Polypropoxypybutyl 2,4-D	53467-11-1
Endosulfan 115-29-7 and metabolites	
α-Endosulfan	959-98-8
β-Endosulfan	33213-65-9
Endosulfan sulfate	1031-07-8
Glycidol 556-52-5 and derivatives	
Alkyl ( $C_6-C_{12}$ ) glycidyl ether	68987-80-4
Alkyl ( $C_8-C_{10}$ ) glycidyl ether	68609-96-1
Alkyl ( $C_{10}-C_{16}$ ) glycidyl ether	68081-84-5
Alkyl ( $CH_{12}-C_{14}$ ) glycidyl ether	68609-97-2
Allyl glycidyl ether	106-92-3
1,3-Bis(5,5-dimethyl-1-glycidylhydantoin-3-yl)-2-glycidyloxypropane	38304-52-8
1,3-Bis[3-(2,3-epoxypropoxy)propyl]tetramethyldisiloxane	126-80-7
1,4-Bis[(glycidooxy)methyl]cyclohexane	14228-73-0
2,2-Bis[p-(glycidyloxy-3-butoxy-propyloxy)phenyl]propane	71033-08-4
Bisphenol A diglycidyl ether	1675-54-3
Bisphenol F diglycidyl ether	54208-63-8
3-[Bis(trimethylsiloxy)methyl]propyl glycidyl ether	7422-52-8
1,4-Butanediol diglycidyl ether	2425-79-8

4.0            COMPLETED ACTIVITIES

Table 4-1 presents completed chemical activities by the eight EPA Program Offices. Activities prior to October 1, 1982 are included. These activities involved 753 chemicals and an additional 33 chemical groups. A key to the acronyms and symbols used on Table 4-1 appears on the next page.

Table 4-2 lists chemical group members for which evaluations and regulations apply to all members of the group. For convenience, these frequently large groups are kept apart from the matrix (Table 4-1), but are referenced in the appropriate locations.

## KEY TO MATRIX

### Entries:

Regulations		Evaluations	
CAN	FIFRA Cancellation	CD	Criteria Document
DNR	Decision Not to Regulate	CHIP	Chemical Hazard Information Profile
ES	Effluent Standard	DNT	Decision Not to Require Testing
HWL	Hazardous Waste List	EA	Exposure Assessment
NAAQS	National Ambient Air Quality Standards	ENGS	Engineering Study
NESHAP	National Emission Standard for Hazardous Air Pollutant	HA	Health Assessment
PR	Primary Regulation	HAD	Health Assessment Document
RES	Restriction	HEA	Health Effects Assessment
RQ	Reportable Quantity	HEEP	Health and Environmental Effects Profile
RR	Reporting Rule	ITC	Interagency Testing Committee
SNUR	Significant New Use Rule	MBS	Materials Balance Study
SUSP	Suspension of Registration	NTA	Negotiated Testing Agreement
TR	Test Rule	PA	Preregulatory Assessment
VOL CAN	Voluntary Cancellation	RA	Risk Assessment
VOL RES	Voluntary Restriction	RBA	Rebuttal Analysis
Regulations Status			
ANPR	Advance Notice of Proposed Rule-making	REG STD	Registration Standard
comp	Completed	RQC	Assessment for Reportable Quantities for Carcinogens in Hazardous Wastes
FRM	Final Rule-making	RQT	Assessment for Reportable Quantities for Toxicity in Hazardous Wastes
PRM	Proposed Rule-making	SR	Summary Review
RPAR	Rebuttable Presumption Against Registration	WQC	Water Quality Criteria

### Symbols:

- \* Evaluation performed by ORD, typically OHEA.
- x The completion date indicates that the activity was to have been completed, but actual completion of the activity has not been confirmed.
- † All listed chemicals in the group are not subject to the same activities. Evaluations or regulations which pertain to an individual chemical are followed by that chemical's designated letter. The absence of letters below the entry indicates that the entry applies to all chemicals in the group. For regulated groups (indicated on the matrix by the phrase, "including, but not limited to"), the entry applies to all possible chemicals within the group.
- a,b,c), etc. Individual chemicals within a group which have been separately evaluated or regulated.
- ‡ The listed activities apply to all possible chemicals within the group. Individual chemicals within the group and their CAS Numbers appear in Table 3-2 or 4-2.
- △ All chemicals in the group are not subject to the same activities. Due to the size of the group only those chemicals subject to the individual activities indicated are listed. A full listing of the group appears in Table 3-2 or 4-2.
- The identified CAS Number refers to an individual chemical within the group, but is used to represent the group, since the group itself has no assigned CAS Number. Since the listed activities apply to all possible chemicals within the group, individual chemicals and CAS Numbers appear in Table 3-2 or 4-2.

TABLE 4-2 CHEMICAL GROUPS WITH COMPLETED ACTIVITIES<sup>(a)</sup>

Chemical Group/Members of Chemical Group	CAS Number
<u>Aryl phosphates SEQ:26</u>	
tert-Butylphenyl diphenyl phosphate	56803-37-3
Butylphenyl diphenyl phosphate, mixed isomers	34364-42-6 <sup>(b)</sup>
Cumylphenyl diphenyl phosphate	34364-42-6
Dibutyl phenyl phosphate	2528-36-1
Diisodecyl phenyl phosphate	51363-64-5
(1,1,-Dimethylethyl) phenyl diphenylphosphate	56803-37-3
2-Ethylhexyl diphenyl phosphate	1241-94-7
Isodecyl diphenyl phosphate	59800-46-3, 29761-21-5
Isopropyl phenyl diphenyl phosphate, mixed isomers	28108-99-8
Methylphenyl diphenyl phosphate	26444-49-5
Nonylphenyl diphenyl phosphate, mixed isomers	64532-97-4
Phenol, 3 methyl-, phosphate (3:1)	563-04-2
Triphenyl phosphate	115-86-6
Tris [4-(1,1-dimethylethyl)-phenyl] phosphate	78-33-1
Tris (2-methylphenyl) phosphate	78-30-8
Tris (4-methylphenyl) phosphate	78-32-0
Tritolyl phosphate	1330-78-5
Trixylyl phosphate	25155-23-1
<u>Asbestos 1332-21-4</u>	
Amosite	12172-73-5
Anthophyllite	17068-78-9
Chrysotile	12001-29-5
Crocidolite	12001-28-4
Tremolite	14567-73-8
<u>Benzidine based dyes SEQ:29</u>	
Benzoic acid, 2-[[2-amino-6-[[4'-[(3-carboxy-4-hydroxyphenyl)azo]-3,3'-dimethoxy[1,1-biphenyl]-4-yl]azo]-5-hydroxy-7-sulfo-1-naphthalenyl]azo]-5-nitro-, trisodium salt	6739-62-4
Benzoic acid, 5-[[4'-[(2-amino-8-hydroxy-6-sulfo-1-naphthalenyl)azo][1,1'-biphenyl]-4-yl]azo]-2-hydroxy-, disodium salt	2429-84-7
Benzoic acid, 5-[[4'-[(7-amino-1-hydroxy-3-sulfo-2-naphthalenyl)azo][1,1'-biphenyl]-4-yl]azo]-2-hydroxy-, disodium salt	2429-82-5

## 5.0 INDEX

Table 5-1 presents the Index for the chemicals in sections 2.0 to 4.0 of this Report. The Index is organized alphabetically by Program Office synonym, CAS number, matrix listing and matrix table(s) where the chemical appears. The list of regulatory synonyms is limited to those chemical names identified by the EPA Program Offices. To find the information in the Report regarding a particular chemical, locate the name of the chemical of interest in the left-hand column of Table 5-1, verify that the CAS Number is the same as the chemical of interest and then read the name under which it is listed in the matrix. The fourth column indicates in which matrix table(s) the chemical can be found under the name shown for the matrix listing.

In each matrix table of the Report, matrix listings appear in alphabetical order. In the alphabetizing process, single letters (i.e., o-, p-) which indicate position and numerals (i.e., 1-, 3-) are ignored. Other prefixes such as bis-, tris-, di-, tetra- and tri- are considered in the alphabetizing process. For instance, 1,2-Dichloroethane is listed under "D," Tetrachloroethane appears under "T," and Bis-(2-chloroethoxy)ethane appears under "B."

TABLE 5-1 CHEMICAL INDEX

Chemical Name	CAS No. (a)	Matrix Listing	Matrix Table(s) (b)
Abietylamine-POE	51344-60-6	Abietylamine-POE	4
Acenaphthene	83-32-9	Acenaphthene	3,4
Acenaphthylene	208-96-8	Polyangular aromatic hydrocarbons	2,3,4
Acephate	30560-19-1	Acephate	3
Acetaldehyde	75-07-0	Acetaldehyde	2,3,4
Acetaldehyde, chloro-	107-20-0	Chloroacetaldehyde	3,4
Acetaldehyde, trichloro	75-87-6	Chloral	3,4
Acetamide, N-(aminothioxomethyl)-	591-08-2	1-Acetyl-2-thiourea	3,4
Acetamide, N-(4-ethoxyphenyl)-	62-44-2	Phenacetin	3,4
Acetamide, 2-fluoro-	640-19-7	Fluoroacetamide	3,4
Acetamide, N-9H-fluoren-2-yl	53-96-3	2-Acetylaminofluorene	3,4
Acetic acid	64-19-7	Acetic acid	3,4
Acetic acid, ethyl ester	141-78-6	Ethyl acetate	3,4
Acetic acid, fluoro-, sodium salt	62-74-8	Sodium compounds	3,4
Acetic acid, lead salt	301-04-2	Lead compounds	3,4
Acetic acid, thallium(I) salt	563-68-8	Thallium compounds	3,4
Acetic anhydride	108-24-7	Acetic anhydride	3,4
Acetimidic acid, N-[ (methylcarbamoyl)oxy]thio-, methyl ester	16752-77-5	Methomyl	3,4
Acetone	67-64-1	Acetone	3,4
Acetone cyanohydrin	75-86-5	Acetone cyanohydrin	3,4
Acetonitrile	75-05-8	Acetonitrile	3,4
Acetophenone	98-86-2	Acetophenone	3,4
3-( $\alpha$ -Acetonylbenzyl)-4-hydroxy-coumarin and salts	81-81-2	Warfarin	3,4
2-Acetylaminofluorene	53-96-3	2-Acetylaminofluorene	3,4
Acetyl bromide	506-96-7	Acetyl bromide	3,4
Acetyl chloride	75-36-5	Acetyl chloride	3,4

(a) Chemicals without a CAS Number may have a Premanufacture Notification (PMN) number. In these cases, PMN numbers, identifiable by a P- preceding the number, appear in this column.

(b) Numbers refer to matrix table(s) as follows: 2 = Table 2-1 (Multi-Program Activities)

3 = Table 3-1 (Current/Planned Activities)

4 = Table 4-1 (Completed Activities)

5 = Table 3-3 (Related Chemical Activities)

Table 5-1 - continued

Chemical Name	CAS No.	Matrix Listing	Matrix Table(s)
8-Acetyl-3-dodecyl-7,7,9,9-tetramethyl-1,3,8-triaza-spiro[4,5]decane-2,4-dione	P-83-370	8-Acetyl-3-dodecyl-7,7,9,9-tetramethyl-1,3,8-triaza-spiro[4,5]decane-2,4-dione	3

Table 5-1 - continued

Chemical Name	CAS No.	Matrix Listing	Matrix Table(s)
Vinyl acetate	108-05-4	Vinyl acetate	3,4
Vinyl bromide	593-60-2	Vinyl bromide	3,4
Vinyl chloride	75-01-4	Vinyl chloride	2,3,4
4-Vinyl-1-cyclohexene	100-40-3	4-Vinyl-1-cyclohexene	3
4-Vinyl-1-cyclohexene diepoxide	106-87-6	Epoxides	4
Vinyl fluoride	75-02-5	Fluoroalkenes	3,4
Vinylidene chloride	75-35-4	Vinylidene chloride	2,3,4
Vinylidene fluoride	75-38-7	Fluoroalkenes	3,4
Vydate	23135-22-0	Vydate	3
Warfarin	81-81-2	Warfarin	3,4
Xylene	1330-20-7	Xylene	2,3,4
m-Xylene	108-38-3	Xylene	2,3,4
o-Xylene	95-47-6	Xylene	2,3,4
p-Xylene	106-42-3	Xylene	2,3,4
Xylenol	1300-71-6	Xylenol	3,4
Yohimban-16-carboxylic acid, 11,17-dimethoxy-18-[(3,4,5-trimethoxybenzoyl)oxy]-, methyl ester	50-55-5	Reserpine	3,4
Zinc	7440-66-6	Zinc	3,4
Zinc acetate	557-34-6	Zinc compounds	3,4
Zinc ammonium chloride	52628-25-8	Zinc compounds	3,4
Zinc borate	1332-07-6	Zinc compounds	3,4
Zinc bromide	7699-45-8	Zinc compounds	3,4
Zinc carbonate	3486-35-9	Zinc compounds	3,4
Zinc chloride	7646-85-7	Zinc compounds	3,4
Zinc compounds	--	Zinc compounds	3,4
Zinc cyanide	557-21-1	Cyanides	2,3,4
Zinc fluoride	7783-49-5	Zinc compounds	3,4
Zinc formate	557-41-5	Zinc compounds	3,4
Zinc hydrosulfite	7779-86-4	Zinc compounds	3,4
Zinc nitrate	7779-88-6	Zinc compounds	3,4
Zinc phenolsulfonate	127-82-2	Zinc compounds	3,4
Zinc phosphide	1314-84-7	Zinc compounds	3,4

Table 5-1 - continued

Chemical Name	CAS No.	Matrix Listing	Matrix Table(s)
Zinc silicofluoride	16871-71-9	Zinc compounds	3,4
Zinc sulfate	7733-02-0	Zinc compounds	3,4
Zineb	12122-67-7	Zineb	3,4
Ziram	137-30-4	Ziram	4
Zirconium compounds	--	Zirconium compounds	3,4
Zirconium nitrate	13746-89-9	Zirconium compounds	3,4
Zirconium potassium fluoride	16923-95-8	Zirconium compounds	3,4
Zirconium sulfate	14644-61-2	Zirconium compounds	3,4
Zirconium tetrachloride	10026-11-6	Zirconium compounds	3,4
