

Activities of the Grants Assistance Programs

The two types of EPA financial assistance instruments are grants and cooperative agreements. The difference between the two is the involvement by the Agency in the performance by the recipient. A grant presumes a limited amount of involvement by the Agency and a cooperative agreement presumes substantial amount of involvement by the Agency.

An interagency agreement (IAG) is a written agreement between Federal agencies under which goods or services are provided in exchange for monetary reimbursement, or where services are provided without monetary reimbursement.

An intergovernmental agreement is a written agreement between a Federal agency and a State or local government under which the Federal agency provides special or technical services to the State or local Government with or without monetary reimbursement.

An administratively consolidated grant is one funded under more than one grant authority by the Environmental Protection Agency.

Data for this report is derived from the Grants Information and Control System (GICS), monthly regional reports of grant activity and other sources.

Monthly awards figures are preliminary and subject to adjustment.

Increases and decreases in funding may include revisions (change in project scope) and augmentations (project scope unchanged).
