ADDENDUM TO THE PUBLICATION

"AIR POLLUTION REPORT ON FEDERAL FACILITIES IN THE
METROPOLITAN ATLANTA INTRASTATE AIR QUALITY
CONTROL REGION", May, 1971.

This inventory was prepared consistent with the report entitled "Consultation on the Metropolitan Atlanta Intrastate Air Quality Control Region", January 1970, and the geographical designation of April 29, 1970. On March 31, 1971, in line with the concept of including the entire United States in these geographical units called Air Quality Control Regions, this Region was redesignated and its boundaries expanded by the Environmental Protection Agency. Hence, the data presented herein do not reflect Federal facility emissions data for the counties of: Butts, Carroll, Corveta, Fayette, Heard, Lamar, Meriwether, Pike, Rockdale, Spalding, Troup, Upson in Georgia, which have been added to the region.

This report presents the current status of the Federally owned facilities within the Metropolitan Atlanta Air Quality Control Region with regard to the implementation of the objectives prescribed by the Clean Air Act, as amended. The data in this report are the most recently available and reflect the current fuel usage, refuse disposal practices, air pollution emissions and proposed abatement measures for the listed installations.

I. BOUNDARIES OF THE AIR QUALITY CONTROL REGION

On April 29, 1969, the Metropolitan Atlanta Intrastate Air Quality Control Region was designated pursuant to section 107(a) of the Clean Air Act, as amended. The seven-county intrastate Region is located in central Georgia and consists of Clayton, Cobb, De Kalb, Douglas, Fulton, Gwinnett, and Henry Counties. A map of this Region is presented in Figure 1.

II. NUMBER OF FEDERAL FACILITIES

There are 81 Federal installations within the Region and of these only 25 are involved in burning either fossil fuels or refuse. Table I is a listing of these facilities and the quantities of fuel and refuse for the respective Counties within the Region.

III. FEDERAL CONTRIBUTIONS TO AIR POLLUTION

The Federal facilities within the Metropolitan Atlanta Air Quality Control Region emit annually a total of 1700 tons of hydrocarbons (HC), 540 tons of nitrogen oxides (NO_x), 180 tons of sulfur oxides (SO_x), 170 tons of particulate (PART), and 100 tons of carbon monoxide (CO). These emissions, as summarized in Table III, contribute slightly less than 1% of the total particulates and sulfur oxides from all stationary sources within the area.

Emissions from transportation sources were not included in this report, but will be covered in a subsequent report of air pollution emissions from mobile sources. Identifiable annual aircraft emissions are estimated to total 11,000 tons of carbon monoxide, 1200 tons of hydrocarbons, 700 tons of nitrogen oxides and 400 tons of particulates.

Table IV lists the Federal sources which emit annually more than 100 tons per year (Point Sources) of any one pollutant. There are two point sources in this Region - Atlanta Army Depot in Forest Park and Air Force Plant 06 in Marietta.

2.

One installation in this Region, as listed in Table V, has coal-fired boilers in violation of the particulate emissions limitations as per Federal regulation: Title 42, Part 76.4, Sections (7) and (8).

IV. REMEDIAL ABATEMENT MEASURES PROPOSED

Six Federal facilities, listed in Table VI, have reported air pollution problems and/or proposed remedial measures in their 1967-1972 five year abatement plans. These actions and the expected reductions in the air pollution emissions produced by these facilities when all of the abatement plans have been put into effect are presented by Table VII.
