Key Words: Expansion, Interim Status Changes, New Unit

Regulations: 40 CFR 270.72

Subject: Interim Status of Proposed Landfill Cells

Addressee: Michael Bonchonsky, Deputy Director, Enforcement Division,  
Region II

Originator: Bruce Weddle, Deputy Director, State Programs and Resource  
Recovery Division

Source Doc: #9487.01(81)

Date: 3-12-81

Summary:

A proposed landfill cell included in the design capacity as described in the Part A permit application may qualify for interim status if the facility itself qualified for interim status. A proposed landfill cell must be included in the original Part A or it must be approved as a Part A revision subject to §270.72 conditions before it can qualify for interim status.

Response to Letter from SCA re: Interim Status of Proposed  
Landfill Cells

Bruce Waddle  
Deputy Director  
State Programs and Resource Recovery Division

Michael Bonchonsky  
Deputy Director, Enforcement Division  
Region II

Attached is a letter we received from Mr. George Kush of  
SCA Chemical Services, Inc. requesting a decision on the status  
of their proposed scientific landfill cells.

The issue raised in the letter concerns whether proposed  
landfill cells which were included in the design capacity  
described in the Part A permit application may qualify for  
interim status. I have reviewed the circumstances described  
in the Application with CGC and the Office of Enforcement and  
determined that in cases where a proposed landfill cell is  
included in the design capacity described in the original  
Part A application, it may qualify for interim status, assum-  
ing of course, that the facility qualifies for interim status.  
If a proposed landfill cell has not been included in the  
original Part A application, it cannot qualify for interim  
status unless a revised Part A permit application is submitted  
and approved subject to the conditions of §112.23(c). If you  
have any questions or disagree with my analysis, please  
contact either Ms. Deborah Wolpe or me at 755-9107.

It is appropriate for Region II to respond to the letter,  
as the facility is located in New York. I therefore have  
referred Mr. Kush to you if he has any further questions.
