HOW TO USE YOUR TELEPHONE

EPA TELEPHONE SYSTEM

Centrex

Your EPA Headquarters system is called ESS CO (Electronic Switching System - Central Office) Centrex Service. It provides the following features:

o Call transfer:

Allows you to transfer a call from one station to another station within the Centrex System.

This feature is activated depressing the switchhook briefly. A recall dial tone (three short tones followed by a steady dial tone) will be heard. The user then dials the number to which the call is to be transferred.

o Consultation hold:

User may consult with a third party while talking on an established connection. You do so by depressing the switchhook once, as in call transfer. Three short tones followed by a steady dial tone will be heard. The user can then dial another station and talk to that person while the original call remains in a "hold" condition.

Once the consultation is over, the user waits for the called party to hang up. To reestablish communication with the original caller, the user depresses the switchhook twice.

If the station user receives a no answer, a busy tone, or makes a dialing error when calling the third party he can drop the connection and return to the original caller by depressing the switchhook twice.

o Conference calls*

If the user wishes to speak with two parties at the same time, a conference call can be made. This is accomplished by following the steps below:

- 1 Call the first party;
- 2 Depress the switchhook and wait for recall dial tone;
- 3 Dial the second party; and
- 4 Depress the switchhook once.

You can now speak with both parties.

o Call forwarding options

One of the features available on EPA's ESS system is call forwarding, the ability to transfer calls to another station automatically. This can be accomplished in two ways:

- Call forwarding busy or no-answer

This feature automatically routes calls to a preselected attendant or another station when the called station is busy or no one answers after three rings.

This feature is provided by the Telephone Company's Electronic Switching System (ESS). A service order must be issued by the EPA Telecommunications Section to change the station to which calls will be forwarded automatically. Your Administrative Officer should complete EPA form 5020-1 to have service changed or modified.

* See page 8 on Teleconference Services.

- Call forwarding-variable

This is generally available on secretarial stations. This feature is controlled totally by the user, and when activated, will route all calls to a telephone number inside or outside of the ESS Centrex System. When the feature is in effect, calls are routed directly to the selected station without ringing on the originally called station. This feature must be specially ordered by the EPA Telecommunications Section.

DIALING INSTRUCTIONS

- When calling a Federal government exchange in Washington, D.C., dial all seven digits of the number. Normally, dial 9 is not required.
- When calling a non-government local number, dial 9 followed by all seven digits. ALL LOCAL DIAL 9 CALLS produce a message unit charge to EPA.

- Reporting FTS Troubles

If you experience problems with FTS service, report by calling the local FTS operator (just dial "0"). Be prepared to supply the following information:

- o Your FTS telephone number, agency and location.
- o The telephone number and location of the dialed telephone.
- o Brief description of the trouble encountered, such as "noise", or "cut-off".

- Reporting Troubles with your Telephone or Local Line

Call the C&P Company by dialing 9-611.
