EXECUTIVE SUMMARY

The Multi-Media Noncompliance Profile is a comprehensive, automated tool designed to aid the Regions in a cross-media approach to enforcement targeting. The profile is tailored to each Region and is generated by the Corporate Cross-Regional Identification Program (CCRIP).

CCRIP is an automated process developed by the NEIC which identifies

- facility multi-media noncompliance
- corporate cross-regional noncompliance

The results of CCRIP are dependent on data contained in the following database systems.

- AIRS Facility Subsystem (AFS) for air sources regulated under the Clean Air Act
- Permit Compliance System (PCS) for discharges regulated under the Clean Water Act
- Hazardous Waste Data Management System (HWDMS) for waste facilities regulated under the Resource Conservation and Recovery Act
- Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) for sites listed in the CERCLA inventory
- Toxic Release Inventory System (TRIS) for sources reporting under EPCRA Section 313 (Title III of the Superfund Amendments and Reauthorization Act of 1986)

- Facility Index System (FINDS) for EPA ID Numbers
- Duns Market Identifiers (DMI) for Duns Numbers to provide the corporate relationship structure

Acknowledging the limitations of the data, the purpose of CCRIP is to provide a comprehensive, automated strategy using the best available technology to identify both facility multi-media noncompliance and corporate cross-regional noncompliance.

CCRIP was developed in ADABAS/NATURAL and resides on EPA's IBM 3090 at Research Triangle Park. Questions about CCRIP may be directed to Regina S. King at FTS 776-2379.

INTRODUCTION

The National Enforcement Investigations Center (NEIC) has been involved in the development of a process to identify multi-media noncompliance by regulated entities since the early 1980s. Initial manual cross-references of data from Agency databases evolved into computer matching of significant noncompliers using EPA ID number as a link. Targeting pilots included testing SIC code criteria and approaches for ranking and screening facilities within specific geographic areas.

Eventually, the process was expanded to encompass the entire United States. Work focused on linking (via a combination of manual and computer methods) a parent corporation with its related facilities and subsidiaries to identify noncompliance within the corporate structure. Resulting from this effort was the development in late 1986 of "Potential Noncompliance Profiles" for all 10 Regions. Subsequently, the Region IV Deputy Regional Administrator requested an update to that report.

Prior to the Region IV project in May 1987, database retrieval selection logic were fine tuned to more closely approximate "significant" violation/noncompliance criteria for air, water, and hazardous waste. Strategic Planning and Management System (SPMS) measures were used as a guideline, in conjunction with Regional program staff. In April 1988, the noncompliance profiles were included as part of the Office of Pesticides and Toxic Substances' (OPTS) Compliance Monitoring Strategy for section 313 of the Emergency Planning and Community Right-to-Know Act (Title III of the Superfund Amendments and Reauthorization Act of 1986).

The identification of corporate, cross-regional noncompliance was accomplished by an entirely automated process for the first time in March 1989. Instrumental to this achievement, which represented a major milestone in the Agency's ability to integrate environmental compliance data from a multi-regional, corporate perspective, was the Dun's Market Identifier (DMI) data leased by the Agency from Dun & Bradstreet and made available by OIRM's FACTS database. Access to the DMI file with its

ability to link a corporate entity with its subsidiaries has enabled the NEIC to provide a comprehensive, automated tool for enforcement targeting.

In December 1989, the Deputy Administrator called for the participation of the Regions in an initiative to encourage a cross-media enforcement focus. In his request to the Regions for enforcement pilot projects demonstrating a cross-media approach, the Deputy cited NEIC's substantial experience in this area and offered NEIC's support to the Regions. Region IV and NEIC have worked closely in this regard since early 1990, and the automated noncompliance profile has become an integral part of Region IV's pilot project and case screening methodology. The reports in this profile reflect the criteria agreed upon with Region IV.

Concurrent with the cooperative effort in Region IV, the profile process itself has continued to evolve. Most recent enhancements include the following:

- The addition of Superfund (CERCLIS) and EPCRA (TRIS) data as "risk indicators" to further screen the list of multi-media violators
- Conversion from the Compliance Data System (CDS) to the AIRS Facility Subsystem (AFS) for sources subject to regulation under the Clean Air Act
- Re-formatting of the corporate cross-regional report (Multi-Regional Listing of Noncompliance Sources) to identify the media of each facility's noncompliance
- Availability of the software which produces the noncompliance profile reports in a user-friendly, menu-driven system

The data used in preparing this report are maintained in the respective database systems by Headquarters and Regional program staff. The selection criteria used in data retrieval for these reports are controlled by the user, and are directly related to the end product, as is the quality of

the data in the various media database systems. All data systems used in the preparation of these reports reside on EPA's IBM 3090 mainframe computer at Research Triangle Park (RTP). After retrieval from the media databases, the data are further processed on the IBM 3090 using software developed in ADABAS/Natural by NEIC.

MULTI-MEDIA NONCOMPLIANCE PROFILE

Figure 1
Noncompliance Profile Process

WATER (PCS)

Significant noncompliers in this media are those active National Pollutant Discharge Elimination System (NPDES) permitted facilities (excluding general and standard permits) designated as major dischargers with at least one instance of significant noncompliance (SNC) as reportable on the QNCR for effluent violations, compliance schedule violations, or DMR nonreceipt between October 1, 1989 and September 30, 1990.

RETRIEVAL SPECIFICATIONS

To retrieve the facilities which met the above noncompliance definition, the following retrieval specifications were established.

- **Permit Type Indicator (PTYP) absent**
- **Facility Inactive Code (IACC) equal to A (active)**
- **Major Discharge Indicator (MADI) equal to M (major facility)**
- **QNCR Status Code, Previous Year Automatic (PYQS) equal to S (SNC Compliance Schedule Violation), D (SNC DMR Non-receipt); or E (SNC Effluent Violation)**

AIR (AFS)

Significant violators in this media include those operating PSD, NESHAP, NSR, and NSPS sources, operating Class A SIP sources, and Class B SIP sources in non-attainment areas for ozone with a plant compliance status in violation for any quarter corresponding to the period October 1, 1989 through September 30, 1990.

RETRIEVAL SPECIFICATIONS

To retrieve the facilities which met the above noncompliance definition, the following retrieval specifications were established.

- Air program status (APST) equal to 0 (operating)
- Plant Compliance Status (DCH1) for the specified period equal to any of: 1 (in violation with no compliance schedule), 6 (in violation but not meeting compliance schedule, 7 (in violation but unknown with regard to schedule), B (in violation with regard to both emissions and procedural compliance), or W (in violation with regard to procedural compliance).
- Month or Quarter (MORQ) for historical compliance status equal to Q (Quarter)
- Historical Compliance Date (HDT1) corresponding to the period October 1, 1989 through September 30, 1990

AND:

- Air Program Code (APC1) equal to 6 (PSD), 7 (NSR), 8 (NESHAP), or 9 (NSPS), or
- Air Program Code (APC1) equal to 0 (SIP) or 1 (SIP under Federal Jurisdiction) and State Classification Code equal to A1 or A2, or

- **Air Program Code (APC1) equal to 0 (SIP) or 1 (SIP under Federal Jurisdiction) and State Classification Code (SLA1) equal to B and State Attainment/Non-attainment indicator equal to N**

HAZARDOUS WASTE (HWDMS)

Significant noncompliers in this media include those RCRA-regulated facilities listed as Treatment/Storage/Disposal (TSDs) facilities and/or Large Quantity Generators (LQGs) with at least one High Priority violator classification in one or more of the following areas: groundwater monitoring; closure/post-closure; compliance schedule; financial responsibility; Part B; manifest; landban violation; or other, which was discovered by an evaluation conducted between October 1, 1989 and September 30, 1990.

RETRIEVAL SPECIFICATIONS

To retrieve those facilities which met the above noncompliance definition, the following retrieval specifications were established.

- **TSD facilities where C305 exists**
- **Large quantity generators where C1101 equal to 1**
- **Date of Subsequent Evaluation (C2313) greater than or equal to October 1, 1989 and less than or equal to September 30, 1990 and at least one of the following:**
- **Class of violation (C2331) equal to H (High Priority Violator) in at least one of the following areas:**
 - **Groundwater Monitoring violations (C2332)**
 - **Closure/post-closure violations (C2333)**
 - **Financial responsibility violations (C2334)**
 - **Part B violations (C2335)**

- **Compliance Schedule violations (C2336)**
- **Manifest violations (C2337)**
- **Other violations (C2338)**
- **Landban violations (C2339)**

EPCRA (TRIS)

Facilities submitting Form R's under section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) were selected from the Toxic Release Inventory System (TRIS) if they had reported an actual release to any media during any 1-year period beginning in 1987.

RETRIEVAL SPECIFICATIONS

To retrieve facilities which met the criteria described above, the following retrieval specifications were established.

- Release medium equal to 1 (fugitive or non-point air emissions), 2 (stack or point air emissions), 3 (discharges to water), 4 (underground injection), or 5 (releases to land)
- Release estimate greater than 0

SUPERFUND (CERCLIS)

Sites from the Comprehensive Environmental Response, Compensation and Liability Act Information System (CERCLIS) were selected based on their National Priority List (NPL) status. Sites which were identified as either final or proposed NPL sites were included.

RETRIEVAL SPECIFICATIONS

To retrieve facilities which met the criteria described above, the following retrieval specifications were established.

- National Priority List Indicator (C305) equal to F (final) or P (proposed)

FACILITY INDEX SYSTEM (FINDS)

Having met the criteria defined above, facilities from the five media databases were cross-matched against each other and against FINDS data, using EPA identification number (EPA ID) as the common link. A facility was defined by a unique identification number; either the EPA ID number, if one existed, or by a unique Source ID number in the respective database. The matching process resulted in the identification of multi-media violators and associated risk indicators as shown for each Region.

DUNS MARKET IDENTIFIERS (DMI)

Facilities from the Air, Water and Hazardous Waste noncomplier lists were then processed to identify corporate cross-regional noncompliance. This was accomplished by computer software developed by NEIC specifically for this purpose, involving a complex, iterative routine using DUNS and EPA ID numbers, facility and alias names and locations, company names and secondary names. Using the corporate/subsidiary relationships established by the DMI file, this artificially intelligent program produced the Multi-Regional Listing of Noncompliance Sources for each Region. The report associates each noncompliant facility with its respective corporation, along with other noncompliant facilities from other Regions belonging to the same corporation.

DISCUSSION

Tables 1, 2, and 3 (Noncompliance Sources in Air, Water, and RCRA, respectively), are simply a list of single media noncompliers based on the criteria here defined. Contained in the tables are data from the respective media database, including identification number, facility name, city, and state.

The Multi-Media Noncompliers Report [Table 4] contains the EPA ID number by which the match was accomplished. Lacking EPA ID numbers in PCS and AFS hindered the process. However, this was partly compensated for by using source identification numbers to obtain a corresponding EPA ID from FINDS and subsequently provided additional matches.

The Multi-Regional Listing of Noncompliance Sources [Table 5] was produced by a complex, iterative routine which establishes corporate/subsidiary relationships using Dun & Bradstreet data, and supplemented by a computerized string-matching artificially intelligent algorithm based on name and location. The report is comprised of Air, Water, and RCRA violators (from Tables 1, 2, and 3) related to a corporation which has shown noncompliance in more than one Region. Listed are corporate name (asterisked); violating facility name, location, and EPA ID number; company DUNS number; EPA Region number; media database (Source) from which the facilities originated, and whether the match was accomplished on name (N) or number (#). Whether or not the cross-regional noncompliance is/is not multi-media, the case is noted in the Source column.

NOTES ON MULTI-MEDIA NONCOMPLIANCE PROFILE

THIS TABLE CONTAINS THE FOLLOWING INFORMATION:

EPA-ID	- THE EPA-ID NUMBER USED TO CROSS-MATCH FACILITIES FROM MULTIPLE PROGRAM OFFICES.
FACILITY-NAME	- THE FACILITY NAME AS IDENTIFIED BY FINDS. IF THE FACILITY IS NOT IN FINDS THIS FIELD CONTAINS THE FACILITY NAME AS IDENTIFIED BY ONE OF THE PROGRAM OFFICES.
CITY	- THE CITY AS IDENTIFIED BY FINDS. IF THE FACILITY IS NOT IN FINDS THIS FIELD CONTAINS THE CITY AS IDENTIFIED BY ONE OF THE PROGRAM OFFICES.
FINDS	- AN 'X' IF THE FACILITY WAS LOCATED IN FINDS.
RCRA	- AN 'X' IF THE FACILITY WAS MONITORED BY HWDMS.
WATER	- AN 'X' IF THE FACILITY WAS MONITORED BY PCS.
AIR	- AN 'X' IF THE FACILITY WAS MONITORED BY AFS.
TRI	- AN 'X' IF THE FACILITY WAS MONITORED BY TRIS.
CERCLA	- AN 'X' IF THE FACILITY WAS MONITORED BY CERCLIS.
