INTRODUCTION

In recent years, the National Enforcement Investigations Center (NEIC) has developed an automated process for identifying those facilities which are not complying with environmental regulations across media within a specific geographic area. Eventually, this effort expanded in scope to include the entire United States and attempted to disclose corporate noncompliance. This resulted in the development, in late 1986, of what were termed "Potential Noncompliance Profiles" for all 10 Regions. Following receipt of that report, the Region IV Deputy Regional Administrator requested that the Region IV report be updated for Fiscal Year 1986. Computerized data processing is essential to a facility noncompliance identification process due to the volume of data to be examined for 10 Regions in air, water and hazardous waste. NEIC recognizes that data availability and quality from the program databases [Air - Compliance Data System (CDS), Water - Permit Compliance System (PCS), Hazardous Waste - Hazardous Waste Data Management System (HWDMS)] may vary from very good to very poor and that the quality of the report is largely a direct result of the quality and reliability of the data. Acknowledging these limitations, the purpose of the noncompliance profile is to provide a comprehensive, automated strategy using the best available technology to identify facility multi-media noncompliance.

Prior to the Region IV project in May 1987, database retrieval selection logic were finetuned to more closely approximate the criteria for "significant violation/noncompliance" for each media (i.e., air, water, hazardous waste). Using Strategic Planning and Management System (SPMS) measures as a guideline, database documentation for CDS, HWDMS and PCS were reviewed, and regional program staff with knowledge of the appropriate databases were consulted. In April 1988, NEIC's noncompliance profiles were cited as part of the Office of Pesticides and Toxic Substances' (OPTS) Compliance Monitoring Strategy for section 313 of the Superfund Amendments and Reauthorization Act (SARA), Title III. After discussion with the Office of Compliance Monitoring (OCM), selection logic were modified to describe a universe of facilities which would support the regional neutral administrative inspection schemes (NAIS) proposed to select facilities for section 313 inspections. The resulting data retrieval selection criteria are described below.

The air, water and hazardous waste data used in preparing this report are maintained in their respective database systems CDS, PCS and HWDMS. Along with the media data outlined above, EPA ID number and facility name data were retrieved from FINDS (Facility Index System). These systems reside on EPA's IBM 3090 mainframe computer at Research Triangle Park (RTP). After retrieval from the databases, the data were processed further on the 3090 using a combination of NEIC computer programs written in FORTRAN and FOCUS. Figure 1 is a graphical representation of the integrating process.

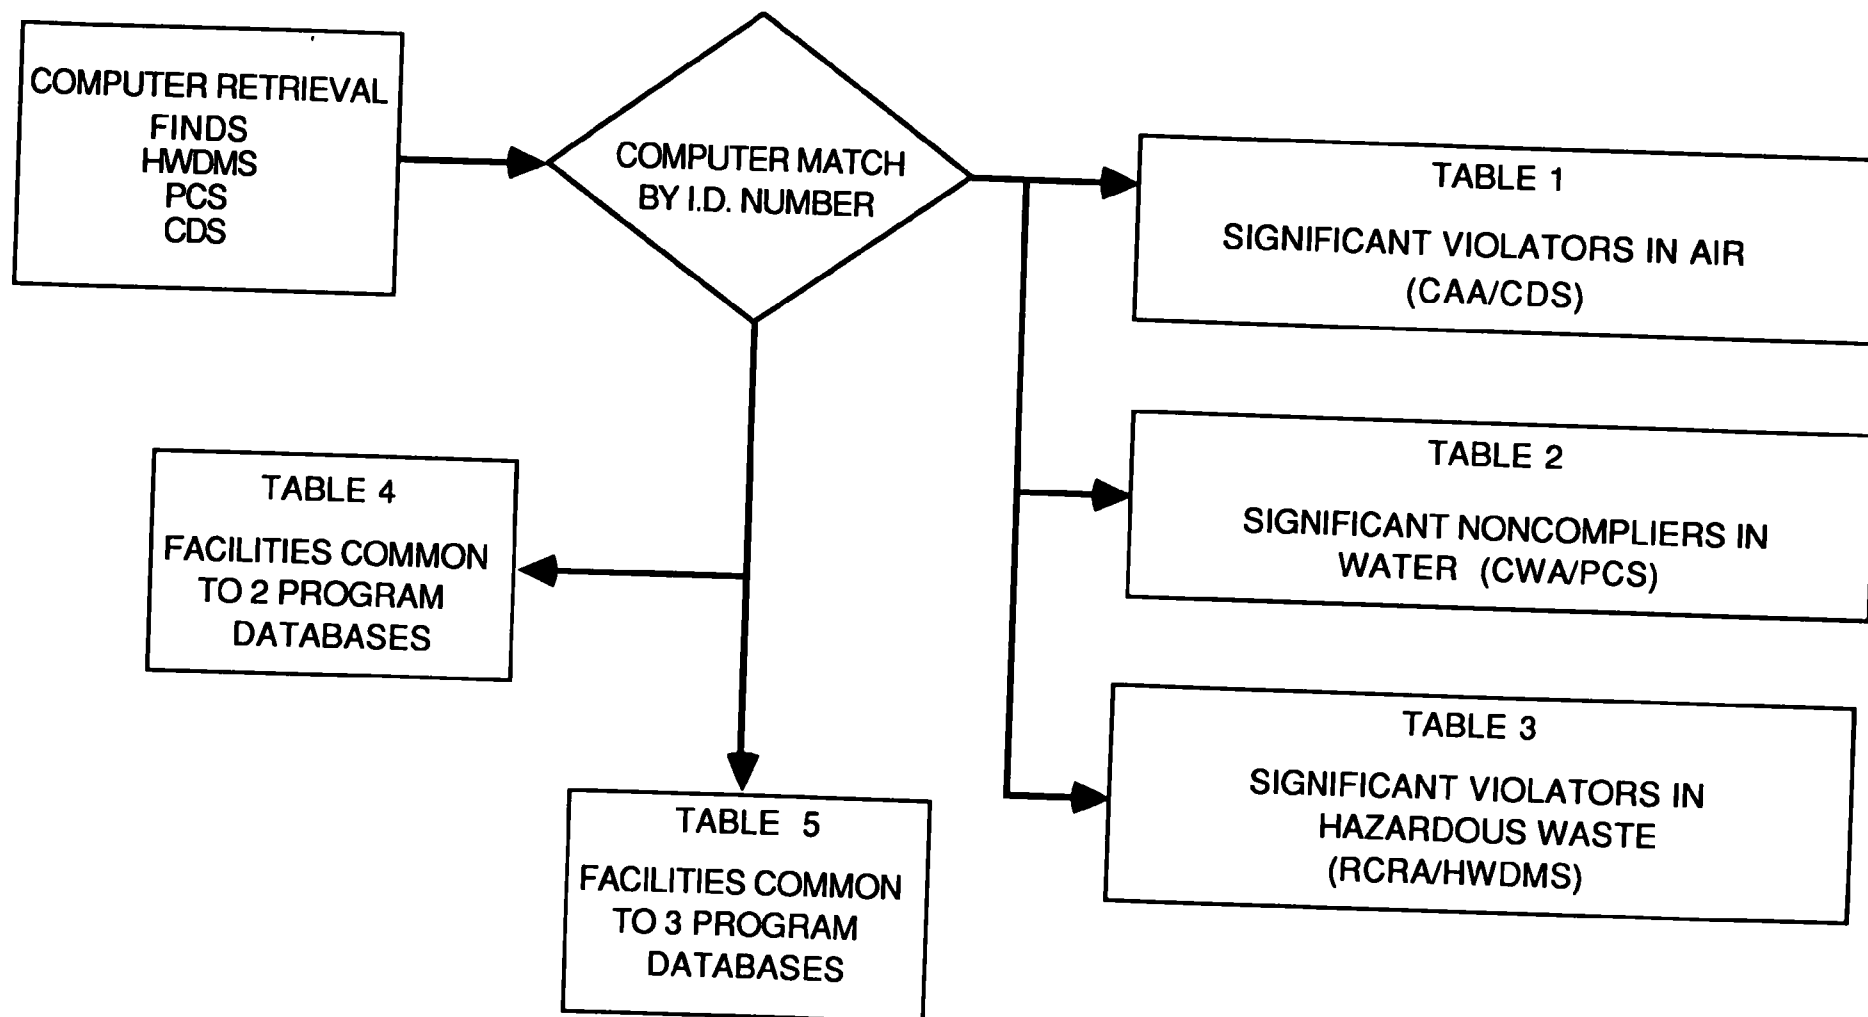

FIGURE 1
NONCOMPLIANCE PROFILE PROCESS

WATER (PCS)

NONCOMPLIANCE DEFINITION

Significant noncompliers in this media are those active National Pollutant Discharge Elimination System (NPDES) permitted facilities (excluding general and standard permits) designated as major dischargers with: (a) at least one instance of reportable noncompliance (RNC) between October 1, 1986 and December 31, 1987 for a particular effluent measurement [excluding Discharge Monitoring Report (DMR) nonreceipt violations], or (b) at least one instance of reportable noncompliance between October 1, 1986 and December 31, 1987 for a particular compliance schedule violation (excluding compliance schedule report nonreceipts).

RETRIEVAL SPECIFICATIONS

To retrieve the facilities which met either noncompliance description, the following retrieval specifications were established for both effluent violations and compliance schedule violations.

Effluent Violations:

- **Permit Type Indicator (PTYP) absent**
- **Facility Inactive Code (IACC) equal to A (active)**
- **Major Discharge Indicator (MADI) equal to M (major facility)**
- **Measurement/Violation Monitoring Period End Date (MVDT) greater than or equal to October 1, 1986 and less than or equal to December 31, 1987.**
- **QNCR Measurement Violation Detection Code (SNCE) present but not equal to N (DMR nonreceipt)**

Compliance Schedule Violations:

- **Permit Type Indicator (PTYP) absent**

- **Facility Inactive Code (IACC) equal to A (active)**
- **Major Discharge Indicator (MADI) equal to M (major facility)**
- **Compliance Schedule Violation Date (CVDT) greater than or equal to October 1, 1986 and less than or equal to December 31, 1987**
- **QNCR Compliance Schedule Violation Detection Code (SNCC) present but not equal to N (Compliance Schedule Report nonreceipt)**

AIR (CDS)

NONCOMPLIANCE DEFINITION

Significant violators in this media include those operating PSD, NESHAP (except asbestos removal sources), NSR and NSPS Sources and operating SIP Sources with a Source Compliance Status in violation for any quarter corresponding to the period October 1, 1986 through December 31, 1987.

RETRIEVAL SPECIFICATIONS

To retrieve the facilities which met the above noncompliance definition, the following retrieval specifications were established for the non-SIP and SIP noncompliers.

Air program code (APCD) equal to 6 (PSD), 8 (NESHAP), 7 (NSR) or 9 (NSPS):

- Air program status (APST) equal to Blank or 0 (operating) and not equal to D, R or S (asbestos removal)
- Source Compliance Status (SCMS0) for the specified period equal to any of: 1 (in violation with no compliance schedule), 6 (in violation but not meeting compliance schedule), 7 (in violation but unknown with regard to compliance schedule), B (in violation with regard to both emissions and procedural compliance), or W (in violation with regard to procedural compliance). SCMS0 is retrieved and then processed by the FOCUS program to select the codes.

Air program (APCD) code equal to Blank, 0 or 1 (SIP):

- Air program status (APST) equal to Blank or 0 (operating)
- Source Compliance Status (SCMS0) for the specified period equal to any of: 1 (in violation with no compliance schedule), 6 (in violation but not meeting compliance schedule, B (in violation with regard to both emissions and procedural compliance), or W (in violation with regard to procedural compliance). SCMS0 is retrieved and then processed by the FOCUS program to select the codes.

HAZARDOUS WASTE (HWDMS)

NONCOMPLIANCE DEFINITION

Significant noncompliers in this media include those facilities occurring in one of the following categories:

- Land disposal facilities with land disposal units that are in operation, in post-closure care, or closing prior to certification.
- Treatment, storage and disposal facilities (TSDFs) other than land disposal facilities with incineration, storage and/or treatment units that are new, operating or closing but not yet certified, with a RCRA permit application or permit status of operating facility/permit candidate, RCRA permitted facility, permit withdrawal candidate, RCRA permit denied or other, or facilities with underground injection wells or clean-closed land disposal units with a RCRA permit application or permit status, as above, and interim status capacity process code for container storage, tank storage, tank treatment or other treatment submitted on a Part A that has not been found not to exist, or an incinerator submitted on a Part A that has been verified as existing or not submitted on a Part A but found to exist.
- Generator handlers only, facilities that notified as large quantity generators, have not claimed a RCRA nonregulated status, and are presumed not to be involved in any treatment, storage or disposal activity.

These facilities have had at least one Class I groundwater monitoring, closure/post-closure, compliance schedule or landban violation which was discovered by an evaluation conducted between October 1, 1986 and December 31, 1987.

RETRIEVAL SPECIFICATIONS

To retrieve those facilities which met the above noncompliance definition, the following retrieval specifications were established.

- Land disposal facilities, as described above, where C305 equal to D and C1105 not equal to 9
- Treatment, storage and disposal facilities other than land disposal facilities, as described above, where C305 equal to I or S and C1105 equal to 1, 2, 4, 8, A, 0 or O or C305 equal to U or C and C1105 equal to 1, 2, 4, 8, A, 0 or O and C1801 equal to S01, S02, T01 or T04 and C1804 not equal to L and C1804 equal to B or R
- Large quantity generator handlers only, as described above, where C303 fails and C305 fails and C1101 equal to 1
- Class of violation (C2331) equal to 1 (Class I violation)
- Date of Subsequent Evaluation (C2313) greater than or equal to October 1, 1986 and less than or equal to December 31, 1987 and at least one of the following:
 - Indicator of Groundwater Monitoring violations (C2332) equal to X (indication of one or more groundwater monitoring violations and no releases) or B [violation/ releases in both the 'X' and 'R' categories were reported, with 'R' being an indication that a release addressable by 3008(H) or state-equivalent authority was detected but no violations were discovered]
 - Indicator of closure/post-closure violations (C2333) equal to X (indication of one or more closure/post-closure violations)

- Indicator of one or more financial responsibility violations equal to X or B (indication of one or more financial responsibility violations)
- Indicator of Compliance Schedule Violations (C2336) equal to C (handler is not on schedule with a corrective action compliance schedule in an order or a permit)
- Indicator of Landban Violations (2339) equal to X or B (one or more landban violations)

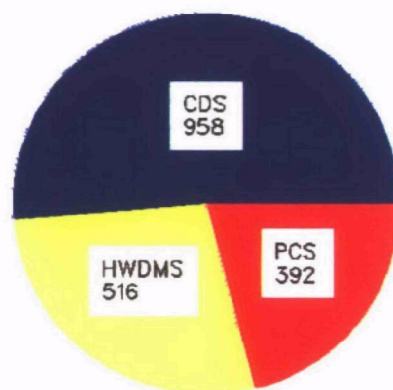

FACILITY INDEX SYSTEM (FINDS)

Having met the specific noncompliance criteria defined above, facilities from the three media databases were matched against FINDS data, using EPA identification number (EPA ID) as the common link. A facility was defined by a unique identification number. This was the EPA ID number, if one existed. Where there was no EPA ID, a facility was defined by a unique NPDES number in PCS or a unique State-County-Source number in CDS. Thus, for facilities appearing in one or more media database(s) and also appearing in FINDS, the unique identifiers are the EPA ID's; the names of these facilities are the FINDS names (Tables 1, 2, 3, 4 and 5).

DISCUSSION

Table 1 (Significant Violators in Air, 958 facilities), Table 2 (Significant Noncompliers in Water, 392 facilities), Table 3 (Significant Violators in Hazardous Waste, 516 facilities), Table 4 (Facilities Common to Two Program Databases, 41 facilities) and Table 5 (Facilities Common to Three Program Databases, 1 facility) are produced by attempting to match facilities by their EPA ID numbers. Lack of EPA ID numbers, particularly common in CDS, hindered the identification of facilities in noncompliance in more than one media. Facilities whose EPA ID numbers occurred in only one program database, as well as those facilities without EPA ID numbers, appear in Tables 1, 2 and 3. Facilities whose EPA ID numbers occurred in two or three program databases appear in Tables 4 and 5. Based on the match of EPA ID numbers, one facility occurred in more than two program databases. The results of the data integration process are represented graphically in Figure 2.

INFORMATION INTEGRATION - REGION V

THIS REPORT CONTAINS THE FOLLOWING INFORMATION:

ID NUMBER - THE EPA ID NUMBER IF AVAILABLE. IF NO EPA ID
NUMBER IS AVAILABLE, EITHER THE NPDES NUMBER FROM PCS (IF THAT
FACILITY WAS FOUND IN PCS), OR THE STATE-COUNTY-SOURCE CODE
FROM CDS (IF THAT FACILITY WAS FOUND IN CDS) IS DISPLAYED.

DBASE - THE NAME OF THE EPA DATABASE FROM WHICH THE ID
NUMBER IN THE PREVIOUS COLUMN WAS TAKEN.

FINDS NAME - THE FINDS FACILITY NAME (IF THAT FACILITY WAS
FOUND IN FINDS)

HWDS NAME - THE FIRST TEN CHARACTERS OF THE HWDS
FACILITY NAME (IF THAT FACILITY WAS FOUND IN HWDS).

PCS NAME - THE FIRST TEN CHARACTERS OF THE PCS FACILITY
NAME (IF THAT FACILITY WAS FOUND IN PCS).

CDS NAME - THE FIRST TEN CHARACTERS OF THE CDS FACILITY
NAME (IF THAT FACILITY WAS FOUND IN CDS).

DBASE CITY - THE CITY WHICH APPEARED IN THE DATABASE
LISTED IN THE 'DBASE' COLUMN.

RCRA - AN 'X' IF THE FACILITY WAS FOUND IN HWDS
WATER - AN 'X' IF THE FACILITY WAS FOUND IN PCS
AIR - AN 'X' IF THE FACILITY WAS FOUND IN CDS

FACILITIES WHICH MEET NONCOMPLIANCE CRITERIA AND ARE COMMON TO 2 PROGRAM DATABASES
