CATALOG OF PESTICIDE CHEMICAL NAMES AND THEIR SYNONYMS

This list is an extensive collection of chemical reference points compiled from the following sources:

- o EPA-540/9-77-017 - "Acceptable Common Names and Chemical Names for the Ingredient Statement on Pesticide Labels"
- o The working files of R. Coberly
- o The working files of E. Merrick
- o Title 40 CFR 180.1 thru 180.418 (7/1/84)

Primary Names

All primary names are listed alphabetically and are numbered sequentially in the leftmost column (Entry). In addition, the Caswell Number (Casw#), Chemical Abstract Service Number (CAS#), 40 CFR reference number (CFR#), Shaughnessy Number (SHG#) and one or more synonyms may also be listed. These names are listed without regard to the EPA categories of active and inert, and are generally the ones used, at least in part, by other countries.

Synonyms

Alternate names, including product names, are also sorted alphabetically, but are not numbered sequentially in the leftmost column. Instead, they are cross-referenced (Xref) by the number of the Primary Entry listing.

Abbreviations

The following abbreviations are used in this catalog:

- o ANSI Names established by the K-62 committee of the American National Standards Institute
- o BSI Names accepted by the British Standards Institute
- o CA Chemical names used by the Chemical Abstracts Service of the American Chemical Society (CA* are names from the 1972 Chemical Abstracts index)
- o CAN Canadian Names
- o FDA Names accepted by the Food and Drug Administration
- o ISO Names accepted by the International Standards Institute
- o OFFICIAL Names established by the former Interdepartmental Committee on Pest Control
- o PROP Proposed chemical names

Disclaimer

The listing of trade or proprietary names does not imply endorsement of these products by the United States Environmental Protection Agency.
